- Gunn oscillators fabricated from ultra-thin gallium arsenide chips 14 p2248 A66-27050
- Harmonic linearization technique to examine characteristics of oscillatory circuits with nonlinear capacitors 14 p2250 A66-27167
- Laser oscillator study of coherent stimulated emission of IR transitions in rare gases 14 p2308 A66-27336
- Spectral features of stable generation of oscillation in delayed-feedback microwave oscillator consisting of TW amplifier and waveguide delay line 14 p2267 A66-27738
- Spurious X-band output signals observed during interaction of dual reflex klystron cavities and klystron beams 14 p2258 A66-27956
- Quartz self-excited oscillator employing Hartley oscillator circuit 14 p2259 A66-28163
- Frequency oscillations in oscillator with double-loop delayed feedback 14 p2259 A66-28165
- Five-channel FM/FM telemetry encoder using molecular electronics, noting oscillators, delay lines and linear amplification functional blocks 14 p2243 A66-28350
- VHF and UHF amplifiers, oscillators and signal sources using silicon transistors 14 p2262 A66-28382
- High power sources for millimeter wavelength oscillator and amplifier design 15 p2461 A66-29008
- Phase locking range of avalanche diode CW oscillator to external microwave signal by direct injection 15 p2463 A66-29042
- Relationships involving power and efficiency of self-excited tunnel diode oscillator, calculating effect of parasitic TD parameters and circuit 15 p2464 A66-29122
- Tunable precision frequency source using phase locked variable frequency oscillator for mobile radio sets 15 p2451 A66-29313
- Temperature dependent soft-mode lattice vibration in perovskite-type ferroelectric crystal single-oscillator 15 p2567 A66-29394
- Tunnel diode coupling to Q resonator of hybrid type, ensuring wide tuning range and oscillation frequency insensitive to temperature change, supply voltage variations, etc 15 p2466 A66-29676
- Comparison of frequency-modulated tunnel diode oscillators 15 p2468 A66-29924
- Book on nonlinear electron-wave interaction phenomena and application to amplifiers, oscillators and other crossed electric and magnetic field devices 16 p2653 A66-30873
- Sinusoidal UHF tunnel diode oscillator, showing selection of particular oscillation mode by power matching load to oscillator 16 p2662 A66-30959
- Feasibility of solid state negative feedback amplifiers based on use of RC networks meeting requirements of frequency stability, high tolerance and long shelf life 17 p2880 A66-31955
- Serrodyne frequency conversion determined, using sawtoothed FM of microwave oscillator and subsequent conversion with delay line in sawtoothed phase modulation, calculating phase distortion 17 p2884 A66-32218
- Phase fluctuations of multimode oscillators detected by nonlinear transformations of oscillations 17 p2874 A66-32249
- Tunnel diode application to tunable microwave oscillators, noting coupling to high Q factor resonator for frequency stability 17 p2885 A66-32287
- Wide tuning range solid state microwave source consisting of transistor oscillator and varactor diode harmonic generator chain 17 p2893 A66-32926
- Phase-jitter spectrum of oscillators and frequency multipliers, noting additive nature of output 17 p2894 A66-33111
- Isocline method used to analyze quasi-linear equation for single-loop self-excited oscillator with periodically varying bias voltage and resonant frequency radio signal 17 p2898 A66-33522
- Spectral density and mean value of power

flow between two stiffness coupled oscillators under white noise random excitation 18 p3251 A66-33675

Reproducible ohmic contact preparation for high resistivity n-type GaAs in fabrication of Gunn oscillators 19 p3313 A66-35351

Telemetry transmitters using solid state wideband microwave voltage-controlled oscillators operating in S, C and X bands 19 p3316 A66-35683

Feedback methods for conversion of electrical signals into frequencies, using oscillator with signal-current-controlled inductance 19 p3325 A66-35988

Ephemeral georotational variations from deviations in quartz oscillator clocks of Paris and Greenwich observatories 19 p3351 A66-36370

Weak harmonic signal effect on synchronized oscillator analyzed, based on van der Pol equation 20 p3525 A66-37130

Amplitude and phase fluctuations in two-circuit quartz-crystal oscillator with crystal positioned between grid and electron tube cathode 20 p3525 A66-37152

Brushless DC torque motor with unique position-sensing device based on variable magnetic reluctance 20 p3498 A66-37168

Frequency modulation in quartz oscillators, deriving nonlinear distortion and frequency deviation factors and analyzing effect of destabilizing factors 20 p3516 A66-37383

Upper oscillation frequency limit for Gunn oscillator imposed by finite energy-relaxation time of heated carriers 20 p3527 A66-37449

Fourier analysis determination of optimum efficiency of cavity-controlled Gunn-effect oscillator when bias voltage is almost two times voltage 20 p3527 A66-37450

Operation principles of fluid switches and oscillators, examining possible practical application to temperature measurement 20 p3560 A66-37651

Frequency stabilization for narrow band microwave oscillators, using supplementary resonator connected by transmission line with basic resonator of oscillator 20 p3532 A66-37862

Doppler effect on emission spectrum and energy of moving oscillator and intensity of surface wave excited by it 20 p3519 A66-37995

Linear prediction theory for maximum load tolerance of oscillator and lossless embedding required to induce oscillation 20 p3540 A66-38288

Absorption spectrum of sulfur hexafluoride in far UV due to electron impact and inelastic scattering and oscillator strengths for three absorption bands 21 p3774 A66-38524

Esaki diode oscillator, investigating oscillation waveform, conductance characteristics, constants, hysteresis and parasitic oscillation 21 p3712 A66-39221

Oscillator circuit needing no standby power and pulsed on when required, with application to tone generators 21 p3714 A66-39495

High power Gunn-effect oscillators constructed from thin epitaxial layers of GaAs, noting relation of drive voltage to frequency, efficiency and power output 22 p3959 A66-39725

Programmed oscillators to control Doppler tracking radar systems for space communications and radar astronomy 22 p3862 A66-39731

Frequency stabilization method for reflex klystrons and other self-excited microwave oscillators 22 p3874 A66-39839

Transistorized LR oscillator design using piecewise linear approximation in oscillation theory 22 p3874 A66-39843

Spectral composition of oscillations produced by keying oscillator 22 p3874 A66-39845

Transient response determined from phase difference of input-trigger oscillations of two self-excited oscillators with common nonlinear load 22 p3876 A66-40081

YIG resonators, oscillators and filters in microwave design 22 p3880 A66-40737

Perturbation approximations of order greater than unity used to study behavior of oscillator 23 p4096 A66-41946

Time dependency of phase difference of

two weakly coupled nonlinear optical oscillators, considering coupling of two traveling waves in laser 24 p4220 A66-42257

Q-switching laser system to obtain simultaneous giant pulses from five ruby laser oscillators 24 p4220 A66-42302

OSCILLATORY COMBUSTION

S COMBUSTION INSTABILITY

OSCILLOGRAPH

SA BARKHAUSEN EFFECT

Lightning discharges investigated by oscillographic method in field laboratory at Pirkul in 1963 01 p0096 A66-10191

Q-factor of ferrite-core networks measured by nonlinear inductance 07 p1031 A66-17400

Cathode ray oscillograph-directional antenna recordings of electromagnetic pulses from lightning discharges 20 p3553 A66-38081

Oscillographic studies of point discharge pulses in individual points in multiple point discharger 22 p3920 A66-40802

Retinal analogs of three-dimensional forms produced on CRT for three-dimensional oscillographic display 23 p4047 A66-41596

OSCILLOSCOPE

Scope display width expansion via simple switching circuit with binary counter and several resistors 10 p1508 A66-21300

Field and current-induced transition in superconductor plotted in oscilloscope 16 p2772 A66-30421

Semi-automatic data system for Model C stellerator, noting oscilloscope/camera modifications 16 p2706 A66-30829

CRT oscilloscope tracer device for relay units and relay parameter influence on operational characteristics 19 p3358 A66-35835

Laser system for meteorological data using oscilloscope to display return signal, translated as concentrations of matter or aerosols 24 p4226 A66-43044

OSEEN APPROXIMATION

Oseen flow in plane studied, using approach having velocity field expressed in terms of four auxiliary functions 02 p0218 A66-11805

Flow past fluid film-covered sphere and cylinder of given radius in different fluid, discussing external and film flow conditions 04 p0509 A66-13555

Base flow and near wake problem at very low Reynolds numbers, discussing influence of inertia terms by using Oseen approximation 04 p0456 A66-14470

Oscillating thin airfoil theory, using Oseen method for classical potential solution of flow about thin airfoil 04 p0456 A66-14476

Integral equation formulation of Oseen flow past obstacles and approximate solution of integral equations for low Reynolds numbers 10 p1525 A66-21848

Vekua method to solve Oseen form of Navier-Stokes equation for incompressible viscous fluid flow 18 p3097 A66-33712

Wiener-Hopf technique for exact solution of plane Oseen flow past half-plane and horizontal for singularity 22 p3901 A66-40452

OSO

Orbiting Solar Observatory /OSO/ design and development 08 p1301 A66-18566

OSO observations of EUV radiation applied to identification of emission lines in spectral region 170-1400 angstroms 10 p1597 A66-21080

Selection of elliptic orbit for solar probe craft without undue perihelion growth [AIAA PAPER 64-646] 19 p3459 A66-35601

OSO-I

Photon-flux measurements by high energy gamma-photon detectors onboard Explorer XI and OSO-I 03 p0423 A66-13028

Solar X-ray emission measured by OSO 10 p1598 A66-21083

OSO-II

Astronomical UV spectrophotometer for second U.S. Orbiting Solar Observatory 14 p2293 A66-27328

OTOLITH

Mathematical model for otolithic organs used to analyze human spatial orientation 01 p0018 A66-10785

Measurement of oculogravic illusion in subjects with or without labyrinthine defects, showing validity as specific response to stimulation of otolith organs 06 p0813 A66-16828

Otolith organ activity within Earth standard, one-half standard and zero gravity environments and effect of extralabyrinthine factors effect upon 15 p2431 A66-28664

Human otolith and cupula system behavior under anomalous gravity conditions 15 p2434 A66-29446

Model of vestibular apparatus emphasizing function of otolithic part, noting reactions of receptor-neuron system to g forces 15 p2444 A66-29496

Vestibular training for aerospace operations, discussing function of otolith and semicircular organs, suppression, sensory control theory, spatial disorientation and motion sickness 21 p3700 A66-38634

Twofold transversely applied 8-g centrifuging effect on functional state of otolithic part of vestibular apparatus of guinea pigs 23 p4026 A66-41337

OUTER RADIATION BELT

SA INNER RADIATION BELT

SA VAN ALLEN BELT

Kinetic instability of terrestrial outer radiation belts calculated, using magnetospheric electron flux data 08 p1286 A66-19789

Particle transfer across drift shells as basic mechanism of acceleration of protons and electrons in outer radiation belt and formation of inner radiation belt 09 p1444 A66-21023

Flux of soft electrons in outer radiation belt as measured by Elektron II 09 p1445 A66-21032

Time variation in radiation belts during year of quiet Sun observed by Elektron satellites 09 p1445 A66-21033

Electron flux at upper boundary of outer radiation belt measured by Elektron I and II satellites 09 p1445 A66-21034

Cosmos and Sputnik observation of outer radiation belts at low heights 09 p1446 A66-21035

Mechanism of electron leakage from outer radiation belt and X-ray bursts in stratosphere 09 p1446 A66-21037

Cosmos XLI satellite measurements of outer radiation belt 09 p1446 A66-21038

Outer radiation belt with energies between 100 ev and 10 to 40 kev 09 p1446 A66-21039

Diurnal variation of outer radiation belt of energetic trapped electrons and relationship to magnetic activity 10 p1600 A66-21163

Outer radiation belt particle penetration into stratosphere, accounting for increased total ionizing radiation recorded at Murmansk 11 p1762 A66-22426

Lifetimes of low energy electrons in outer radiation belt at magnetically quiet times 12 p1938 A66-24120

Correlation of time variations of proton and electron intensity of outer radiation belt and dependence on geomagnetic environment 15 p2575 A66-29103

Soviet space research in 1965 including Moon and planets, magnetosphere, radiation belt, upper atmosphere, space vehicle dynamics, etc 15 p2599 A66-29897

Satellite observation on correlation between outer radiation zone electrons and solar activity cycle 17 p2993 A66-32518

Terrestrial radiation belt during solar minimum, noting results from measurement with Elektron satellite series 18 p3175 A66-34745

Low-energy protons and electrons of outer radiation belt measured by equipment onboard Cosmos XLI 18 p3196 A66-34872

Increases of ionizing radiation in stratosphere correlated with recurrent magnetic storms, ionospheric perturbations in auroral zone, etc, possibly due to electrons from outer radiation belt 18 p3197 A66-34874

Temporal variations of outer radiation zone electron intensities at 1000 km as affected by geomagnetic storms observed by Alouette I satellite 20 p3631 A66-37623

Intensity and spectra of 100 to 1700 kev protons in region above two earth radii measured by charged particle detectors on Explorer XII, XIV and XV 20 p3639 A66-38314

Acceleration processes of outer zone protons investigated, using Kellogg hypothesis of radiation belt formation

through magnetic disturbances where third adiabatic invariant is 20 p3640 A66-38322

Diffusion of protons in outer radiation belt due to violation of third adiabatic invariant For trapped particles 20 p3640 A66-38323

Diffusion coefficients in outer radiation belt, examining energy dependence on electric and magnetic disturbances contributing to transport of particles 20 p3641 A66-38327

Kinetic instability of terrestrial outer radiation belts calculated, using magnetospheric electron flux data 21 p3809 A66-38785

Equatorial measurement of intensity of protons with energies greater than 400 kev and electrons with energies greater than 2 mev in outer radiation belt center in 1964 22 p3974 A66-40755

Relativistic-electron diffusion wave in outer radiation belt recorded by device mounted on Cosmos XLI satellite in high geomagnetic latitudes 22 p3974 A66-40756

Temporal variations of electron energy flux in outer radiation zone measured during geomagnetic activity with instrumentation on board Explorer XII satellite 24 p4263 A66-42601

OUTPUT

AS LASER OUTPUT

AS MASER OUTPUT

OVER-WATER FLIGHT

Helicopter navigation requirements for low altitude sea missions at beyond-horizon distance from supporting ship or shore base 04 p0544 A66-14442

Bertin-type air cushion vehicles, examining power supply and refinements required for over-water application 10 p1483 A66-21401

Civil aviation communications between pilot and ground controller on over-ocean flights, considering use of VHF and HF and synchronous satellite to extend VHF 20 p3515 A66-37234

OXALATE

Oxalate determination in two methods based on photochemical decomposition of ferric oxalate complexes in aqueous acidic solution 24 p4171 A66-43166

OXIDATION

SA COMBUSTION

SA ELECTROCHEMICAL OXIDATION

Mercury photosensitized oxidation of perfluoropropene to study postulated excited molecule mechanism 02 p0188 A66-11596

Effect of corrosive environments on various metals and anticorrosion techniques to protect metal surfaces 04 p0534 A66-13374

Oxidation kinetics of tantalum-iron and tantalum-cobalt alloys and iron and cobalt at 500-900 degrees C 04 p0535 A66-13696

Electron paramagnetic resonance in biradicals of hydrazine series, discussing structural changes during transition from mono- to biradical state 04 p0572 A66-13877

Tungsten disilicide oxidative destruction, discussing porosity induced disintegration upon exposure to air 05 p0704 A66-15818

Impurity redistribution effect on production of n-type inversion layers on surface of p-type bulk silicon during high temperature oxidation, noting tests on MOS capacitors 06 p0925 A66-16656

Pressure dependency in oxidation of platinum above 800 degrees C explained by boundary layer diffusion mechanism 07 p1000 A66-17476

Oxidation kinetics of pure tungsten and tungsten alloys with various niobium content at high test temperatures 07 p1050 A66-18065

Thermal oxidation kinetics of silicon, describing diffusion process, oxide layer boundary reactions and space charge effects on initial phase 07 p1106 A66-18401

Graphite protection against high-temperature oxidation by making composites with high-resistant metal powders 07 p1055 A66-18505

High temperature oxidation of liquid yttrium and liquid lanthanides and their alloys with gold, obtaining parabolic diffusion-controlled rate constants 08 p1235 A66-18622

Participation of ferredoxin of clostridium nigrificans in sulfite reduction, describing transportation of electrons for sulfide

formation 08 p1177 A66-18699

Dimensional control of oxide films on n- and p-type silicon by thermal oxidation and chemical etching in HF 08 p1230 A66-18870

Electric Ag-CdO contacts obtained by internal high temperature oxidation method 08 p1239 A66-18900

Fluorocarbon oxidation and photolysis of mixtures of trifluoriodomethane, oxygen, nitric oxide and hydroiodic acid 08 p1178 A66-19069

Built-in surface charge on thermally oxidized silicon as function of exposed crystal face orientation 09 p1411 A66-19929

Titanium oxidation characteristics, determining activation energy of scale formation, oxygen absorption of base metal and total oxygen 09 p1389 A66-20613

Kinetics and mechanism of enhanced oxidation of platinum in activated oxygen as function of partial pressure of oxygen atoms 09 p1339 A66-20946

Kinetics of oxidation of various atmospheric contaminants over several catalysts tested in catalytic reactor [AICE PREPRINT 26C] 10 p1491 A66-21190

Oxidation of artificial graphitic carbon 14 oxidized to carbon 14 dioxide in presence of nonsterile soils, noting inhibition of biological activity by electron beam irradiation 11 p1649 A66-22304

Oxidation rate and heat treatment effect on density of states of silicon surface potential in silicon-silicon dioxide system 12 p1932 A66-24825

Sigmoid oxidation of powdered tungsten at moderate temperature and low oxidation temperature 13 p2106 A66-25357

Transmission electron microscopy determination of structure and morphology of oxide films during Ti oxidation initial stages 13 p2107 A66-25584

Electro-oxidation of organic materials capable of functioning as fuel in fuel cells 13 p2017 A66-25674

High temperature oxidation of two ductile Cr-Ru alloys with composition near bcc alpha-phase solubility limit analyzed by four different techniques 16 p2721 A66-30220

Short-time high temperature oxidation of cobaltous oxide 16 p2646 A66-30671

Oxidation of powdered titanium, zirconium, hafnium, vanadium, niobium and tantalum 16 p2724 A66-31355

Oxidizability in air of three titanium alloys at temperatures from 700 to 1100 degrees C 16 p2727 A66-31570

Kinetics of oxidation of various atmospheric contaminants over several catalysts tested in catalytic reactor [AICE PREPRINT 26C] 17 p2868 A66-32680

Hardness and lattice parameter increase effect on oxidation temperature of internally oxidized Ag-Mg and Ag-Al alloys 18 p3122 A66-33750

Oxidation kinetics of niobium in air from 500 to 1000 degrees C 19 p3376 A66-35461

Oxygen role in oxidation/reduction reaction and polyoxide formation mechanisms associated with refractory metal corrosion by liquid alkali metals 19 p3383 A66-36135

Periodic volt-ampere curves of anode oxidation mechanism of hydrocarbons, alcohols, ketones, aldehydes and carboxylic acid to carbon dioxide, using Raney platinum catalyst 19 p3295 A66-36291

Effect of chemical chromate film on high temperature oxidation behavior of beryllium 19 p3386 A66-36437

Additive effects on jet propellants, noting corrosion and oxidation resistance 20 p3627 A66-38296

Imperfection of silicon dioxide layers caused by dust particles during thermal oxidation of silicon, measuring breakdown voltage 22 p3961 A66-39999

Correlation between chemi-ionization in flames containing organic fuels and heat of oxidation of carbon in fuel molecule 23 p4147 A66-41154

Vacuum coating techniques for thin film layers for bonding, examining adhesion, bonding layer reinforcement and surface oxidation 23 p4043 A66-41194

Tungsten disilicide oxidative destruction, discussing porosity induced disintegration

upon exposure to air 23 p4083 A66-41384

Magnesium alloy components protected from corrosion by subjection to anodic oxidation 23 p4074 A66-41659

Origin and identity of oxide platelets observed in tantalum sheet and ribbon after oxidation and quenching 24 p4228 A66-42615

2-cardoxy-3-keto-9-methyl hexahydronaphthalene converted in high yield into 5/7 fused products on irradiation in aqueous and nonaqueous media 24 p4171 A66-43101

OXIDATION RESISTANCE

Protective coatings for extreme temperature environment discussing types, application, performance in oxidizing atmospheres, tests and industrial problems 01 p0084 A66-10090

Diffused aluminum coating for high temperature application 03 p0380 A66-12371

Binary systems of niobium pentoxides with various oxides for improvement of oxidation behavior of niobium alloys 03 p0386 A66-13210

High temperature oxidation resistance of zirconium boride/molybdenum disilicide alloys 04 p0535 A66-13435

Oxidation, stress-to-rupture, thermal and vibration fatigue tests at various temperatures carried out on protectively coated molybdenum and titanium-molybdenum alloy 05 p0702 A66-15469

Oxidation-resistant ceramic coatings for tungsten, tantalum, molybdenum and niobium 07 p1051 A66-18300

Oxidation resistance enhancement in tungsten base alloys by addition of refractory metal oxide particles 10 p1547 A66-21783

Oxidation of hot pressed and extruded beryllium during heating in air at various temperatures and for various heating times 12 p1897 A66-24902

High temperature oxidation-resistant hafnium tantalum alloys, noting phase composition 14 p2315 A66-27501

Silicon carbide coatings on molybdenum and tungsten by pyrolysis of methyl trichlorosilane, discussing oxidation tests and spalling due to thermal expansion mismatch 16 p2729 A66-30248

Oxidation-protection disilicide coatings effect on ductile-to-brittle transition temperature of refractory alloys at low temperature 16 p2726 A66-31459

Oxidation characteristics of titanium alloys Ti-679 and Ti-8Al-1Mo-IV determined with weight-gain techniques 17 p2941 A66-33426

Oxidation resistant pack cementation coatings for refractory metal complex structures 19 p3370 A66-36140

Protective coatings for titanium and tantalum refractory alloy brazing envelopes, offering ephemeral protection from oxidation at ultrahigh temperatures 19 p3384 A66-36143

Plasma arc metal spraying techniques for deposition of thermo/oxidation protective coatings on refractory metals 19 p3370 A66-36144

W-3 oxidation-resistant coating effect on mechanical properties of notched and unnotched TZM Mo alloy, analyzing photomicrographic and microhardness data 19 p3384 A66-36145

Oxidation-resistant silicide thermoprotective coatings for tantalum and tantalum-based alloys 19 p3384 A66-36146

Oxidation-resistant coatings for high temperature tungsten 19 p3384 A66-36148

Oxidation-protective coating of niobium alloy for application on reentry vehicles 19 p3384 A66-36149

Tensile properties of protectively coated refractory metals for structural components in high temperature oxidizing environments 19 p3385 A66-36151

High temperature oxidation resistance of zirconium boride/molybdenum disilicide alloys 20 p3586 A66-38137

Oxidation and mechanical performance of tungsten and composite tungsten systems at high temperatures and pressures, determining surface recession rate up to 6750 degrees R 22 p3935 A66-40343

[AIAA PAPER 65-293] Structural materials for oxidizing environments at high temperature analyzed

including nickel, cobalt and chromium alloys 23 p4080 A66-41125
Iridium coating for graphite oxidation protection at temperatures over 2000 degrees C 23 p4083 A66-41891

Oxide ceramics fabrication, with particular attention to microstructure 07 p1053 A66-18296
Lanthanothermal reduction of samarium oxide and vapor pressure dependence on temperature 14 p2314 A66-27341
Oxide-base cermets prepared by infiltration with silver and silver alloys, noting dispersion strengthening, bend creep, impact loading, etc, for gas-turbine application 16 p2730 A66-30250
Grain boundary precipitation and intermediate phase in polycrystalline oxide systems after annealing 19 p3387 A66-35414

OXIDE FILM

Boundary layer thickness responsible for anomalous lattice distortions of colloidal barium titanate 04 p0571 A66-14492
Base diffusion profile arising from boron redistribution in oxide, noting useful approximation 05 p0732 A66-14671
Pulsed volt-ampere characteristics of oxide-coated cathode at various pulse repetition rates 06 p0838 A66-15890
Ionizing irradiation effects on oxide covered silicon surface properties, measuring changes in inversion layer conductance 06 p0940 A66-17164
Solid oxide electrolyte with hydrogen fuel, discussing cell thermodynamics, application limitations, etc 07 p0996 A66-18474
Unilateral conductivity of thin high-density film of refractory metal oxides, discussing formation of p-i-n junctions 08 p1276 A66-19568
Effect of surface charging on superconducting transition temperature, locating negative charges at oxide-oxygen interface in experiments with thallium films 09 p1419 A66-20043
Surface hydride corrosion film effect on electrolytic corrosion and oxidation of titanium 09 p1390 A66-20841
Silicon dioxide glass films by decomposing tetraethoxysilane in AC-induced glow discharge in which water is chemically incorporated into oxide films 09 p1432 A66-20979
Effect of orientation of silicon substrate on surface charge density and properties of silicon-silicon dioxide interface 10 p1573 A66-21346
Thin-film triode devices to investigate hot-electron penetration of oxide films 10 p1509 A66-21540
Vacuum effect on fatigue life of aluminum under constant stress cyclic bending deformation 11 p1717 A66-22995
Formation of oxide films on metals using polarized light to measure film thickness

and vibrating capacitor measurements of changes in Volta potential, noting extension of Mott theory 11 p1718 A66-23211
Parabolic growth deviations in thermal oxidation of silicon 11 p1758 A66-23351
Coefficients of space charge effects for growing oxide films, derived from perturbation treatment, evaluated in terms of boundary concentrations of diffusing species 12 p1811 A66-23624
CdO films as transparent ohmic contacts with CdS /single crystal and film type/ photoconductor 12 p1927 A66-23771
AC resistivity profiles through anodic oxide films on Al and Al alloys 12 p1895 A66-24392
Heat treatment and ionizing irradiations effect on charge distribution and number of surface states in silicon-silicon dioxide system 12 p1932 A66-24824
Phosphorus interacting with boron and conductivity measurements at 600 degrees C observed on phosphorus stabilized silicon dioxide films 12 p1932 A66-24826
Dielectric relaxation in thermally grown silicon dioxide films 12 p1932 A66-24828
Maximum dielectric strength of thin evaporated silicon oxide films, calculating breakdown processes 12 p1933 A66-24830
Surface pit formation in aluminum, discussing effects of vacuum, quenching high temperature and repeated cycling 12 p1897 A66-24921
Transmission electron microscopy determination of structure and morphology of oxide films during Ti oxidation initial stages 13 p2107 A66-25584
Optical and electrical characteristics of n-type indium oxide films prepared by spraying, noting relation between carrier mobility and particular impurity used 15 p2559 A66-28623
Anodic oxide film growth on sputtered tantalum films in dilute sulfuric acid, noting ionic conductivity, dielectric constant and optical properties 15 p2562 A66-28718
Oxide film thickness effect on field effect silicon, noting concentration of surface electron states 16 p2787 A66-31735
Surface microstructure of cathode oxide coatings using carbon replicas 16 p2789 A66-31805
Silver oxide films by cathodic sputtering, discussing changes in sample preparation and material characteristics due to aging and heat treatment 17 p2976 A66-32262
Oxide films grown on GaAs in oxygen plasma 19 p3437 A66-35435
Transient charge and discharge currents in tantalum oxide with anodic electrolyte and tantalum oxide with anodic metal 19 p3448 A66-36754
Anodic oxidation process for silicon, examining current flow in strong electric field as function of time, Curie-von Schweidler law and Tafel law 19 p3448 A66-36755
Thermal growth and deposition of silica films by silicon tetrafluoride hydrolysis 22 p3962 A66-40048
Oxide film surface effect on electrophysical characteristics of Ge surface, noting potential changes and recombination rate 22 p3965 A66-40313
Microwave discharge technique for depositing noncrystalline oxide films of silicon, germanium, boron, titanium and selenium on substrates by decomposing compounds by oxygen 23 p4109 A66-41129
I-V characteristics of junction diode with antibarrier layer and oxide film pressed on rear contact 23 p4045 A66-41445
Nondestructive detection technique of phosphosilicate layer on semiconductor wafers, using IR spectrophotometer 24 p4181 A66-42390

OXIDIZER

SA LIQUID OXIDIZER
SA PROPELLANT OXIDIZER

Manufacture of propellants by aerogel carbothermal process involving reduction of silicates with methane and/or carbon [SAE PAPER 650835] 01 p0053 A66-10831
Steady state composition mechanism of solid /heterogeneous/ propellants noting linear pyrolysis, exothermal oxidizers, fuels, etc

[ONERA TP 240] 02 p0278 A66-11681
Stationary germanium potentials in oxidizing media and light illumination 09 p1410 A66-19891
Swedish hypergolic propellant for rocket motors consisting of fuming nitric acid a oxidizer and condensation product of liquid aromatic amines and aldehydes as solid fuel 14 p2374 A66-27560
Regression rates of metallized hybrid fuel systems applied to lithium hydride butyne rubber-fluorine-oxygen system, oxidizer flow, etc 15 p2569 A66-29289
Source book on propellant chemistry covering combustion thermodynamics, recombination kinetics, solid propellant binders, oxidizers, etc 18 p3159 A66-33717
Ignition and controlled burning of liquid oxygen-liquid methane mixture, evaluating use as rocket monopropellants [AICE PREPRINT 28E] 22 p3969 A66-39880
Advanced propellant chemistry - ACS Meeting, Detroit, April 1965 23 p4116 A66-41218
Ultimate energy achievable in propellants evaluating oxidizing group as propellant with model fuel, hydrazine 23 p4116 A66-41218
Difluoramine reactions with Lewis acids studied to establish existence of difluorammonium compounds and to obtain new oxidizers containing difluoramino groups 23 p4031 A66-41232

OXYGEN

SA AIRCRAFT BREATHING APPARATUS
SA LIQUID OXYGEN /LOX/
SA OZONE

Data from ion energy spectrometer mounted on Ariel I satellite indicating increased concentration of oxygen ions during afternoon at high altitudes 01 p0061 A66-104980
Atomic hydrogen reaction with HO-2 as source of hydrogen molecules in lower thermosphere 02 p0221 A66-11504
Diffusivities of oxygen in polycrystalline niobium at 600 and 815 degrees C 02 p0243 A66-11721
Portable photoelectric instrument for determining oxygen admixture in hydrogen, nitrogen and inert gases with low sensitivity 02 p0231 A66-11999
Sticking coefficients for interaction of molecular oxygen with clean semiconductor surfaces assuming immobile adsorption process 03 p0408 A66-12406
Dissociation of oxygen molecules by vibrational excitation 03 p0396 A66-13212
Reaction of molecular hydrogen with oxygen in absence of molecular oxygen at various temperatures, using stirred reactor with mass spectrometer 04 p0473 A66-13649
Gaseous impurity distribution /oxygen/ between scale and diffusion layer after heat treatment of various titanium alloys 05 p0699 A66-14700
Atmospheric oxygen absorption factor of centimeter and millimeter radio waves 05 p0636 A66-15878
Temperature and oxygen effect on aromatic solute sensitized photo-decomposition of ethanol and ether glasses 06 p0821 A66-16125
Hydroquinone and oxygen effects on photovoltaic characteristics of optically excited chlorophyll 06 p0812 A66-16357
Vacuum fusion and IR absorption determination of bulk oxygen content of germanium crystals 07 p1098 A66-17743
Partition functions in equilibrium chemical composition and thermodynamic properties of nitrogen and oxygen plasmas 07 p1087 A66-17936
Methane concentration relation to relaxation frequency and vibrational specific heat of mixtures of oxygen and methane 08 p1178 A66-18938
Thermal dissociation in interactions of carbon with carbon dioxide and oxygen 08 p1320 A66-19639
Charge transfer between nitrogen ions and oxygen atoms, calculating cross sections 09 p1405 A66-20681
Purification of enzyme responsible for degradation of nicotine to 6-hydroxynicotine 09 p1339 A66-20877
Data compendium on neutral composition

- of atmosphere at altitudes from 100 to 200 km, noting nitrogen and oxygen concentration values from optical and mass spectroscopic studies 09 p1376 A66-20991
- Reconciling observed ozone distribution in atmosphere with that of photochemical theory, using accepted rate constants 10 p1531 A66-21278
- Oxygen and water vapor effects on propagation of fatigue cracks in aluminum alloy sheets 10 p1614 A66-21338
- Energy transfer by radiation and thermal conductivity in high temperature oxygen and nitrogen [AIAA PAPER 66-182] 10 p1620 A66-21432
- Reaction rate of atomic oxygen with nitrous oxide in shock tube at high temperatures 11 p1649 A66-22881
- Oxygen content effect on recovery of cold worked tantalum investigated by measuring Snoek damping, electric resistivity and dynamic E_p modulus 11 p1717 A66-22997
- Argon-oxygen phase diagram determined by X-ray diffraction 11 p1650 A66-23208
- Gas spectroscopy of laser-induced stimulated Brillouin effect in high pressure oxygen 11 p1715 A66-23432
- Oxygen interacting with zinc oxide and UV-irradiated magnesium oxide studied, using electron paramagnetic resonance techniques 12 p1916 A66-23618
- Intermolecular reaction between oxygen and nitrogen at energies from 0.1 to 1.5 ev 12 p1917 A66-24222
- Photolysis of trifluoroethylene iodide in presence of nitric oxide and oxygen 12 p1812 A66-25001
- Atmospheric radio wave absorption coefficient and altitude determined and linked to effects of colliding paramagnetic oxygen molecules 13 p2020 A66-25224
- Nonresonant absorption of radio waves in molecular oxygen 13 p2025 A66-26044
- Stimulated emission spectroscopy of hydrogen, nitrogen, oxygen and deuterium diatomic gases in 0.8 to 8 micron region 13 p2102 A66-26205
- Rotational excitation of oxygen by slow electrons, calculating electron energies, quadrupole moments and energy loss rates 13 p2135 A66-26270
- Analytical solution to rate equations for branching chain reactions of hydrogen-oxygen reaction under shock tube conditions, for application to ignition problems 13 p2018 A66-26442
- CAT detection by radiometric measurement of mm wave emission from oxygen molecules and measurement of ambient air temperature and temperature gradient 15 p2532 A66-28926
- Oxygen photochemical equilibrium above 150 km, assuming dominant role of radiative recombination above 120 km 15 p2486 A66-29089
- Oxygen and hydrogen effect on microstructure, tensile and impact strength and hardness of titanium alloys 15 p2522 A66-29180
- Absorption coefficients for nitrogen and oxygen ion in air at temperatures of 150,000 to 800,000 degrees K 15 p2617 A66-29345
- Preference of mice for oxygen-poor atmosphere after removal from 60 and 90 percent oxygen 15 p2439 A66-29489
- Effects on white mice of exposure to oxygen-enriched air, noting biological and physiological observations 15 p2439 A66-29493
- Calorimeter bomb combustion of hydrocarbons and fluoro-substituted hydrocarbons with nitrogen trifluoride and nitrogen trifluoride-oxygen mixtures and mass spectrometric analysis 15 p2570 A66-29609
- Clean and oxygen-covered molybdenum /110/ surface analysis using low energy electron diffraction, noting various oxygen structures 16 p2721 A66-30109
- Rate constant for atomic oxygen ion destruction by carbon dioxide measured in pulsed flowing afterglow 16 p2645 A66-30115
- Photoreduction of viologen dyes analyzed with chloroplasts, noting oxygen evolution and photophosphorylation efficiency, reduction potentials, etc 16 p2638 A66-30647
- Atomic-to-molecular oxygen concentrations ratio values in upper atmosphere used to determine strength of turbulent mixing in atmosphere, noting definition of turbopause height 16 p2694 A66-30704
- Temperature effect on UV absorption continuum of oxygen, using photoelectric techniques, obtaining absolute absorption cross sections 16 p2695 A66-30711
- Effect of oxygen on kinetics of decomposition of beta phase in VT 15 titanium alloy 16 p2724 A66-31236
- Laser oscillation in flash photolysis of carbon disulphide and oxygen to form CO 17 p2933 A66-31941
- Continuous flow, solid state electrochemical device for simultaneous carbon dioxide removal and oxygen generation [AICE PREPRINT 47E] 17 p2867 A66-32675
- Clinical findings of effect on man during 56-day exposure to oxygen-helium atmosphere at 258 mm Hg total pressure 18 p3058 A66-33779
- Seed germination and seedling growth dependence on oxygen, noting microaerobic capabilities among vascular plants, water effect, etc 18 p3059 A66-34204
- Ascorbic acid concentration in urine and organs of guinea pigs exposed to high oxygen concentrations 18 p3060 A66-34410
- Macromolecular organization of hemocyanins and apohemocyanins as revealed by electron microscopy 18 p3060 A66-34460
- Oxide films grown on GaAs in oxygen plasma 19 p3437 A66-35435
- Oxygen role in oxidation/reduction reaction and polyoxide formation mechanisms associated with refractory metal corrosion by liquid alkali metals 19 p3383 A66-36135
- Hazards associated with ignition of various condensed phase hydrogen-oxygen systems 20 p3625 A66-37083
- Low temperature liquid-vapor equilibrium in neon-oxygen system at pressures up to 5000 psi from 63 to 152 degrees K 20 p3601 A66-37088
- Absorption coefficients for monomers of water vapor and oxygen for various altitudes, noting seasonal variation 20 p3511 A66-37133
- Effect of variations in mission and vehicle constraints on hydrogen-oxygen fuel cell system optimization 20 p3497 A66-37160
- Absorption coefficients for nitrogen and oxygen ions in air at temperatures of 150,000 to 800,000 degrees K 20 p3604 A66-37350
- Mean life of electronic level in O V measured by beam-foil technique 20 p3604 A66-37605
- Phase diagram of titanium-oxygen-hydrogen system, plotting isotherms and isobars for equilibrium hydrogen pressure, noting oxygen effect 20 p3585 A66-37748
- Stability limits of quasi-cylindrical diverging detonations in propane-oxygen-nitrogen mixtures 20 p3679 A66-37819
- Ionization of oxygen examined, using charge exchange in double mass spectrometer, noting break in electron impact ionization efficiency curve and constructing breakdown graph 20 p3605 A66-38097
- Fluorine concentration in oxygen monitored by instrument with nickel thermoconductivity cell 20 p3511 A66-38173
- Intensity measurements on molecular oxygen Herzberg I system emitting in afterglow of microwave discharge, noting dependence of transition moment on internuclear distance 20 p3555 A66-38208
- Supersonic nozzle flow of dissociated oxygen, nitrogen and carbon dioxide 21 p3694 A66-39089
- Thermal conductivity and accommodation coefficient measurements in gas mixture of atomic and molecular oxygen 21 p3836 A66-39174
- Equipment design and weight estimates for lunar production of oxygen and water 22 p3977 A66-39896
- Neutron activation investigation of cesium ion sputtering of Al in rarefied oxygen atmosphere 22 p3950 A66-40082
- IR absorption band growth and decay in spectra of oxygen-doped Si irradiated with fast neutron 22 p3962 A66-40085
- Analytic solution for ignition kinetics of dry carbon monoxide-oxygen reaction obtained, assuming initiation reaction followed by chain-branching steps 22 p3998 A66-40115
- Seed water content influence on oxygen effect as detected in gamma irradiated barley seeds and prolonged post-storage period in terms of biological effect and paramagnetic resonance signal 22 p3855 A66-40378
- Intermolecular reaction between oxygen and nitrogen at energies from 0.1 to 1.5 ev 22 p3951 A66-40584
- Quenching of metastable states by atmospheric particles on basis of rocket measurements of dayglow, noting quenching coefficients of oxygen 22 p3916 A66-40872
- Oxygen inhibition of grain boundary movement and stabilization of optical transmission in cuprous iodide thin film 23 p4110 A66-41152
- Fluorescence quantum efficiencies of octa-coordinated europium homogeneous and mixed chelates in organic solvents, noting effect of oxygen removal 23 p4030 A66-41153
- Radiolysis applied to effects of ionizing radiation on volatile inorganic compounds of fluorine, oxygen and nitrogen, noting mass spectrometric peaks 23 p4032 A66-41235
- Detonability of hydrogen-oxygen mixtures in large vessels at low initial pressures, using strong and weak igniters 23 p4120 A66-41890
- Cross sections for charge transfer reactions of nitric oxide with atomic and molecular ions of oxygen and nitrogen 24 p4200 A66-42590
- OXYGEN AFTERGLOW**
- Molecular oxygen dissociation resulting from collisions with neon and argon metastable atoms in auroral afterglow 11 p1696 A66-22419
- Reaction rates for charge transfer reactions of carbon monoxide with oxygen and carbon dioxide measured at 300 degrees K in pulse-discharge flowing afterglow system 22 p3859 A66-39907
- OXYGEN APPARATUS**
- Oxygen storage and distributions systems development trends for business aircraft [SAE PAPER 660207] 13 p2002 A66-26387
- Hose coupling utilized in oxygen umbilical cord for astronaut extravehicular activity 14 p2225 A66-27110
- OXYGEN ATOM**
- Oxygen impurity atom interaction with radiation-induced defects in germanium over wide temperature range, producing optically active oxygen defect complexes 02 p0272 A66-11486
- Rate coefficients of ion charge exchange reaction between atomic oxygen ions and oxygen-nitrogen molecules measured at thermal energies by afterglow method 02 p0263 A66-11505
- Spin-orbit coupling and electron-affinity determinations from radiative capture of electrons by oxygen atoms 04 p0547 A66-13641
- Ionspheric magnetic dipole transition, noting radiative transfer equation for atomic oxygen and nitric oxide 05 p0667 A66-14793
- Terrestrial helium loss by speculated reaction between helium metastables and oxygen atoms 05 p0669 A66-14940
- Heat transfer rate to stagnation point of catalytic surface placed in slow flow of dissociated oxygen from glow discharge tube and atom-molecule diffusion coefficient 06 p0822 A66-16632
- Connection between occurrence of auroral green line of atomic oxygen and head echo by meteors suggests common mechanism for both phenomena 07 p1135 A66-17636
- Binding energy between oxygen atom and dislocation in tantalum by measuring critical temperature at which discontinuous yield disappears on heating 07 p1052 A66-18514
- IR absorption spectra of oxygen-defect complexes in irradiated silicon 10 p1581 A66-21737
- Laboratory duplication of processes exciting airglow, noting green line of oxygen atoms 11 p1699 A66-23116
- Excitation of auroral green line in terrestrial nightglow caused by interaction

of three ground state oxygen atoms 11 p1703 A66-23498

Excitation temperature of three states of atomic oxygen determined to be 2000 degrees K from intensity ratio of three atomic oxygen 1300 angstrom triplet lines in daylight 15 p2484 A66-28907

Photolysis of carbon dioxide and molecular oxygen, using 1470 angstrom radiation to produce atomic oxygen 16 p2645 A66-30117
F-layer nightglow 6300 angstrom emission intensity and electron density data, noting variations in emissions 16 p2694 A66-30708

Limiting conditions of temperature, gas flow rate and heat removal for combustion of methane in atomic oxygen, calculating heat balance of process 16 p2827 A66-30792

Relation between Rydberg series lines observed in absorption spectrum of atomic oxygen and absorption cross sections of Cairns and Samson 17 p2961 A66-32504

Upper atmospheric temperature measurement from Doppler line widths of atomic oxygen auroral and nightglow emission, using Michelson interferometer 17 p2919 A66-32993

Atomic concentration measurement in discharged nitrogen, oxygen and hydrogen 18 p3139 A66-34507

Photoionization cross sections for N and O atoms and ions in state of excitation, using quantum defect method 21 p3775 A66-39076

Chemiluminescence in atomic-oxygen-acetylene and atomic-oxygen-carbon suboxide flames attributed to formation of CO in excited and electronic states 22 p3997 A66-39926

Negative ion associative detachment reaction with atomic oxygen in determination of nighttime D region electron density profiles at high latitudes 22 p3905 A66-39945

Spatial inhomogeneities in green line of atomic oxygen, using electrophotometry during airglow 22 p3915 A66-40778

OXYGEN BREATHING

Aerospace Breathing Chart used in analytical evaluation of breathable atmospheres and emergency oxygen systems [AIAA PAPER 65-723] 03 p0328 A66-12544

Spacecraft cabin atmosphere, comparing pure oxygen with two-gas atmosphere 06 p0814 A66-15925

Test program evaluating protective clothing and safety equipment for personnel working in Saturn booster at minus 100 F in oxygen-rich or deficient environment, noting problems with communications, visibility, breathing, etc 12 p1810 A66-24958

Hypoxemia induced in man by sustained forward acceleration while breathing pure oxygen in five pounds per square inch absolute environment 15 p2430 A66-28659

Oxygen compatibility environmental test chambers noting design, performance and results of operation 16 p2679 A66-30471

Low atmospheric pressure and oxygen-rich environment effect on characteristics of uninterrupted long-term exposure to toxic gases of space cabin atmospheres, noting animal testing 16 p2642 A66-30623

Human reaction to pure oxygen inhalation interrupting previous hypoxia 17 p2849 A66-31832

Life support subsystem for recovering breathable oxygen by water vapor electrolysis 17 p2866 A66-32194

Liquid oxygen purity control for onboard breathing equipment by IR absorption spectrophotometry and gas chromatography 17 p2866 A66-32233

LOX characteristics for on board breathing equipment including contaminants noxious to people, clogging of equipment, explosiveness and possible use of contaminated LOX 22 p3858 A66-40504

OXYGEN COMPOUND

SA OXIDE

Mass spectrometer measurements of oxygen fluorides at cryogenic temperatures 06 p0821 A66-16156

Microstructural and superconductivity analyses of Nb-Ti-O compound as function of thermomechanical processing treatment, plotting critical current density against transverse magnetic field 22 p3960 A66-39780

EPR spectroscopic analysis of liquid oxygen difluoride, noting photolytic

dissociation into paramagnetic species 23 p4097 A66-41237

Heat of formation of oxygen difluoride for reaction with hydrogen, using Parr fluorine combustion bomb containing metal ampoule employing burst diaphragm 23 p4118 A66-41238

OXYGEN CONSUMPTION

Titanium oxidation characteristics, determining activation energy of scale formation, oxygen absorption of base metal and total oxygen 09 p1389 A66-20613

Human efficiency measured in producing power by tramping, hand cranking and lateral pumping modes 11 p1648 A66-23082

Feasibility of oxygen-helium atmosphere at 380 mm Hg total pressure proven by two-week exposure of four men 16 p2639 A66-31120

Pulmonary effects of two-week exposure of four men to helium-oxygen atmosphere at total pressure of 380 mm Hg 16 p2639 A66-31121

Increase of arterial lactate and pyruvate in blood glucose of fasted anesthetized dog after hydrazine injection 17 p2856 A66-32157

Oxygen consumption of rabbits decreases in proportion to inert gas concentration dissolved in tissues 17 p2857 A66-32174

Altitude effect on metabolic rates of deer mice, noting direct relationship between seasons and metabolic rate at all ambient temperatures 20 p3506 A66-37385

Liquid breathing effects on dogs in hyperbaric chamber 21 p3699 A66-38447

Respiratory activity and hematological factors of avian blood cells, discussing oxygen consumption, thermal effects, tissue metabolism 23 p4024 A66-41043

Vibration effect on bioelectric activity of brain and oxygen consumption, using experimental rats 23 p4027 A66-41340

OXYGEN DEFICIENCY

SA ANOXIA

SA HYPOXIA

Behavior of right intraventricular conduction in 148 flying cadets under normal sea-level conditions and acute anoxic anoxia 01 p0020 A66-10608

Thermal homeostasis under hypoxia in man, discussing thermal stress adaptation and physiological responses in oxygen-deficient environment 04 p0465 A66-14068

Rats resistance to oxygen deficiency while suffering effects of 750 roentgen dose X-ray exposure 15 p2438 A66-29483

Hypoxia in cats and rats due to gradual and abrupt drops in oxygen content of air 15 p2439 A66-29491

Superacute hypoxia in cats exposed to pure nitrogen followed by artificial respiration 15 p2439 A66-29492

Oxygen defect complexes in neutron irradiated germanium 17 p2980 A66-32647

OXYGEN FLUORIDE

Test method evaluating explosive sensitivity, due to shock, of materials immersed in oxygen difluoride for application to rocket propulsion systems [CI PAPER WSCI-65-34] 05 p0743 A66-15150

Preparation and properties of oxygen fluorides O5F2 and O6F2 by electrical discharge apparatus used to prepare O4F2 07 p1000 A66-18344

Acute inhalation toxicity of oxygen difluoride in albino rat 08 p1175 A66-19723

Detonability of cryogenic oxydizers, discussing modified continuous wire technique analysis of detonation properties of trioxxygen difluoride 16 p2790 A66-31194

Electron paramagnetic resonance study of tetraoxygen difluoride, showing existence of FOO free radical giving asymmetric spectrum 17 p2871 A66-32854

OXYGEN MASK

Human evaluation and testing requirements for physiological protective efficiency of civil aviation oxygen equipment 17 p2863 A66-32151

OXYGEN METABOLISM

Photoreduction of viologen dyes analyzed with chloroplasts, noting oxygen evolution and photophosphorylation efficiency, reduction potentials, etc 16 p2638 A66-30647

Vibration stimulus effect on oxygen metabolism of brain in rats with partial

destruction of auditory and vestibular apparatus and in anesthetized control rats 23 p4027 A66-41340

Vibration effect on external respiration of rats, noting independence of oxidation metabolism from respiratory changes 23 p4027 A66-41340

OXYGEN PRODUCTION

SA HILL REACTION

Oxygen recovery from metabolic carbon dioxide for spacecraft environment 08 p1177 A66-18820

Regenerative separation and recovery of carbon dioxide from manned atmospheres using metallic oxides [AICE PREPRINT 26D] 10 p1491 A66-21191

Chemical analysis of permanent and trace organic gases in 30-day manned experiment using gas chromatography 12 p1811 A66-25011

Limitation on oxygen concentration in possible primitive atmospheres examined via physical and photochemical factors 13 p2186 A66-26122

Oxygen reclamation for manned spacecraft considering stored, nonregenerative and molten carbonate systems 17 p2864 A66-32175

Bosch process closed cycle oxygen production unit for space application [AICE PREPRINT 47A] 17 p2867 A66-32670

Oxygen regeneration in solid electrolytic cell, constructed from zirconia based ceramic material for space flights [AICE PREPRINT 20E] 17 p2848 A66-32672

Oxygen regeneration from solid electrolytic reduction of carbon dioxide for space cabin atmosphere [AICE PREPRINT 47D] 17 p2867 A66-32673

Regenerative separation and recovery of carbon dioxide from manned atmospheres, using metallic oxides [AICE PREPRINT 26D] 17 p2868 A66-32681

Carbon dioxide decomposition and oxygen reclamation by chemical reaction with electrochemically reduced lithium 19 p3292 A66-36234

Chemical methods for carbon dioxide conversion for oxygen recovery, including relationship to biological processes 19 p3293 A66-36235

Chemical reactor on-site manufacture of propellant oxygen from metallic silicates found on Moon [AICE PREPRINT 46C] 22 p3977 A66-39895

Oxygen electrolytic reduction using porous sintered silver electrode, noting effects of gas pressure, current and cathode thickness on potential as applied to fuel cells 24 p4161 A66-42333

Onboard spacecraft generation system extracts necessary breathing oxygen from ambient air, using electrochemical cell that separates oxygen from inert gases and impurities 24 p4162 A66-42956

Oxygen electrolytic reduction using porous sintered silver electrode, noting effects of gas pressure, current and cathode thickness on potential as applied to fuel cells 24 p4161 A66-42333

Onboard spacecraft generation system extracts necessary breathing oxygen from ambient air, using electrochemical cell that separates oxygen from inert gases and impurities 24 p4162 A66-42956

Onboard spacecraft generation system extracts necessary breathing oxygen from ambient air, using electrochemical cell that separates oxygen from inert gases and impurities 24 p4162 A66-42956

OXYGEN RECOMBINATION

Pressure volume recombination coefficient in oxygen, using capacitor to determine average ion density 04 p0549 A66-14286

Pressure dependence of initial recombination of ions in oxygen 04 p0549 A66-14287

Interaction mechanism between internal gravity waves and radiative photochemical processes, noting solar radiation absorption, heat of atomic oxygen recombination, etc 13 p2073 A66-26129

Atmospheric mixing time and lifetime of atomic and molecular oxygen at high altitude, noting agreement with barometric distribution law, concentration pattern, etc 15 p2486 A66-29088

Nightglow emission from atomic oxygen caused by dissociative recombination in F region 16 p2694 A66-30707

Recombination of carbon monoxide and atomic oxygen in expansion wave at high temperature in single pulse shock tube 22 p3860 A66-40527

Recombination of carbon monoxide and atomic oxygen in expansion wave at high temperature in single pulse shock tube 22 p3860 A66-40527

Recombination of carbon monoxide and atomic oxygen in expansion wave at high temperature in single pulse shock tube 22 p3860 A66-40527

Recombination of carbon monoxide and atomic oxygen in expansion wave at high temperature in single pulse shock tube 22 p3860 A66-40527

Recombination of carbon monoxide and atomic oxygen in expansion wave at high temperature in single pulse shock tube 22 p3860 A66-40527

Recombination of carbon monoxide and atomic oxygen in expansion wave at high temperature in single pulse shock tube 22 p3860 A66-40527

Recombination of carbon monoxide and atomic oxygen in expansion wave at high temperature in single pulse shock tube 22 p3860 A66-40527

Recombination of carbon monoxide and atomic oxygen in expansion wave at high temperature in single pulse shock tube 22 p3860 A66-40527

neutral oxygen in 28 planetary nebula spectra linked to lower ionization levels 05 p0759 A66-14874

Doppler temperatures obtained from 6300 angstrom line of atomic oxygen in airglow 05 p0673 A66-15047

Electron spin effect of oxygen and short-range static fields of hydrogen, nitrogen and oxygen molecules upon rotational excitation of these molecules by slow electrons 11 p1741 A66-23389

Brightness of oxygen bands in twilight and day airglow, relating variation to sunspot cycle, ozone dissociation and solar eclipse 11 p1702 A66-23490

Atomic oxygen night sky emission observations with pressure scanning Fabry-Perot interferometer 12 p1873 A66-24837

Electron attachment and detachment coefficients for pure oxygen determined from current waveforms in drift tube 13 p2130 A66-25374

Quadratic Stark effect constants in oxygen 14 p2338 A66-28345

Intensity of oxygen red line in night airglow analyzed, obtaining temperature dependence of rate coefficients of ion atom interchange reaction and collisional deactivation, noting red line intensity dependence on solar activity 15 p2484 A66-28905

Excitation temperature of three states of atomic oxygen determined to be 2000 degrees K from intensity ratio of three atomic oxygen 1300 angstrom triplet lines in dayglow 15 p2484 A66-28907

Absorption coefficient of oxygen gas Schumann-Runge continuum, using microsecond flashing source 18 p3137 A66-33988

Ionization potential, dissociation energy and electron affinity for molecular oxygen 18 p3137 A66-33989

Absorption spectrum of condensed oxygen in 1.26 to 0.3 micron region 18 p3140 A66-34693

Diurnal and latitudinal variations in 6300 angstrom nightglow intensity determined along Pacific coast of South America, noting relation between location of antisolar point and equatorial midnight enhancement 19 p3352 A66-36628

Behavior of lambda 6300 angstrom Fraunhofer absorption line in solar spectrum 22 p3984 A66-40850

OXYGEN SYSTEM

Alkali metal superoxide applied by Soviet as active chemical for space cabin air revitalization 06 p0819 A66-16830

Physiology of breathing at reduced pressure and design of aircraft oxygen system, noting cabin and mask design 10 p1489 A66-22116

Two oxycarbide phases in zirconium-carbon-oxygen compositions found in zirconia-carbon mixtures at high temperatures, giving X-ray diffraction patterns indexed as fcc at various lattice parameters 16 p2729 A66-30246

Liquid oxygen converter designed to provide oxygen for space flight, using combined forces of surface tension and paramagnetism [AICE PREPRINT 24C] 22 p3886 A66-39898

OXYGEN TENSION

Experiments with anesthetized dogs subjected to g accelerations, observing behavior of arterial oxygen saturation and pulmonary ventilation during short periods 08 p1175 A66-19083

Physiological effects of pressure breathing and aveolar oxygen tension at high altitude 10 p1489 A66-22117

OXYGEN TOXICITY

Mechanism, prevention and treatment of oxygen toxicity in central nervous system, noting acetylcholinesterase activity 03 p0326 A66-13346

Age dependence of resistance of chickens to 100 percent oxygen at one atm /OAP/, noting delayed mortality in adult birds 07 p0997 A66-17458

Continuous exposure of rats to 100 percent oxygen at 450 mm Hg for 64 days shows no physiological effects 12 p1807 A66-25013

Physiological differences between air and low pressure oxygen atmospheres, discussing role of nitrogen in

respiration 14 p2228 A66-27474

Hamsters, mice and rats exposed to elevated oxygen tensions for 60-day periods with nitrogen at high or minimal levels 16 p2640 A66-31129

Lysosomal enzymes in rats exposed to 100 percent oxygen to determine possibility of accelerated in vivo lipid peroxidation 17 p2857 A66-32169

Proliferative pulmonary lesions in monkeys under high oxygen concentration for various periods 17 p2858 A66-32181

Oral, cutaneous and aerosol bacteriological evaluation of astronaut exposed to oxygen-helium atmosphere at low pressure 18 p3058 A66-33778

Physical and chemical variables of space cabin environment and effect on human body, discussing oxygen toxicity, decompression sickness, fire and blast hazards and radio protection 19 p3292 A66-36232

Mortality and histopathology of germ-free rats and mice exposed to pure oxygen, noting effect of chronic respiratory condition 24 p4162 A66-42315

OXYGEN TREATMENT

Oxygen addition to niobium-zirconium alloys at high temperatures, noting oxygen solubility and oxide precipitation 14 p2315 A66-27492

Increased partial oxygen pressure effect on morphological composition of peripheral blood of rats and mice 15 p2439 A66-29490

Coverage dependent evaporative lifetimes of various metals and oxygenated W ribbon filaments at high temperatures 22 p3934 A66-40097

OXYGEN 18

Extraterrestrial life detection based on catalysis of oxygen exchange between labeled oxyanions and water, noting equipment 15 p2441 A66-29961

OXYHALIDE

Oxyfluorides relationship to basic aluminic fluorides, discussing difficulties and formation 18 p3064 A66-33928

OZONE

Stationary distribution of ozone density with height in presence of long waves in atmosphere, solving continuity equation for ozone and considering photochemical processes 01 p0062 A66-10752

Spectral distribution of UV radiation in ozone band reflected from Earth, assuming Rayleigh scattering 01 p0133 A66-10756

Vertical distribution of atmospheric ozone measured by balloon-borne Sun-seeking guidance system and light-scattering gypsum screen 01 p0071 A66-11044

Solar UV radiation measurements in stratosphere for calculating ozone production 02 p0283 A66-11573

Further evidence of correlation of atmospheric ozone and relative sunspot number 02 p0222 A66-11823

Electrochemical and chemiluminescent ozonesonde performance, using analysis of comparative ascents 04 p0517 A66-14451

Atmospheric ozone variations, distributions, continents and planetary circulation according to IGY data 05 p0674 A66-15222

Earth radiation field characteristics from radiation transfer equation for plane model of atmosphere for specific region, considering ozone absorption and molecular scattering 06 p0876 A66-16553

Ozone decomposition effect upon heat transfer determined, using differential energy and material balance equations 07 p1152 A66-17595

Water vapor influence on latitudinal and seasonal distribution of stratospheric ozone concentration explained via Hampson chemical mechanism 08 p1216 A66-19209

Estimation of ozone concentration at altitudes of 44 to 102 km from nighttime geophysical rocket measurements of atmospheric brightness 08 p1221 A66-19796

Earth atmosphere composition noting extent and effects of ozone, absorption, ionization, electron attachment and detachment, etc 09 p1371 A66-20273

Seasonal variation of atmospheric ozone, determining via IR method total amount and vertical distribution 10 p1526 A66-21124

Radiative heat transfer due to 9.6 micron band of ozone, noting pressure correction

for optical length of absorbing gas 11 p1694 A66-22200

Ozone photochemistry in atmosphere containing hydrogen, calculating equilibrium vertical distribution, rate of formation of hydroxyl, diurnal variation, etc 11 p1700 A66-23138

Vertical distribution of atmospheric ozone measured by balloon-borne Sun-seeking guidance system and light-scattering gypsum screen 11 p1709 A66-23291

Local peculiarities of vertical distribution of ozone in equatorial and polar regions for different turbulent dynamic models of stratosphere 12 p1869 A66-24279

Primary processes in ozone photolysis, determining quantum yields of photodecomposition for various wavelengths and concentrations 13 p2016 A66-25369

Coriolis interaction in first and third fundamental frequencies of ozone, noting vibration rotation spectrum and coupling of two states 13 p2016 A66-25373

Atmospheric distribution profiles of ozone noting formation, elimination, effect on terrestrial heat losses, UV absorption, etc 13 p2073 A66-26318

Stationary distribution of ozone density with height in presence of long waves in atmosphere, solving continuity equation for ozone and considering photochemical processes 14 p2285 A66-27851

Spectral distribution of UV radiation in ozone band reflected from Earth, assuming Rayleigh scattering 14 p2285 A66-27855

Interaction of organosilanes with ozone 14 p2233 A66-27866

Breakdown of biennial oscillation of ozone and of lower stratospheric temperature of Southern Hemisphere and relation to sunspot cycle observations 14 p2286 A66-27904

Earth radiation field characteristics from radiation transfer equation for plane model of atmosphere for specific region, considering ozone absorption and molecular scattering 14 p2289 A66-28225

Solar UV reflection and scattering from Earth atmosphere, use in determining total concentration and vertical distribution of ozone 15 p2486 A66-29090

Monograph on intensity distribution and polarization of scattered radiation in ozone absorption bands at selected levels of terrestrial Rayleigh atmosphere 16 p2698 A66-31226

Atmospheric ozone and effect on geophysics, noting concentration at ground level, distribution, temperature, origin, etc 16 p2700 A66-31744

Atmospheric ozone absorption coefficients measurement, determining errors in extraterrestrial constant of Dobson spectrophotometer 17 p2923 A66-33359

Small-scale fluctuations in vertical distribution of atmospheric ozone analyzed, examining possible transport mechanisms in Southern Hemisphere stratosphere 20 p3551 A66-37469

Statistical characteristics of atmospheric ozone distribution, determining autocorrelation and cross correlation functions, concentration and temperature profiles 20 p3552 A66-37751

Estimation of ozone concentration at altitudes of 44 to 102 km from nighttime geophysical rocket measurements of atmospheric brightness 21 p3733 A66-38792

Ozone measurements with rocketborne ozonesondes, showing graphs of distribution as function of altitude and temperature profile 22 p3903 A66-39683

Nocturnal high altitude ozone distribution determined, using small geophysical sounding rockets with Moon as light source to measure atmospheric absorption of UV radiation 22 p3914 A66-40559

Density, viscosity, surface tension, vapor pressure and vapor liquid equilibria data of liquid ozone-fluorine mixtures considered as Newtonian fluids 23 p4119 A66-41244

Atmospheric ozone data on basis of meteorological observations and synoptic maps on ship in Atlantic 23 p4065 A66-41804

OZONOSPHERE

Atmospheric ozone concentration variation during total eclipse of sun affected by limb darkening and solar radiation

P-3 AIRCRAFT

intensity 05 p0666 A66-14545
Closed vertical and horizontal air circulation effect on steady state distribution of ozone in Earth atmosphere 08 p1213 A66-19031
Reconciling observed ozone distribution in atmosphere with that of photochemical theory, using accepted rate constants 10 p1531 A66-21278
Diurnal heating of ozonosphere near stratopause level results in diurnal temperature variation of 15 degrees C and development of tidal circulation in stratospheric wind field 22 p3916 A66-40874

P

P-3 AIRCRAFT

P-3 tricycle landing gear assembly, examining mechanical and hydraulic mechanisms for brakes and steering, using graphic charts 19 p3279 A66-36059

P-14 SATELLITE

S EXPLORER X SATELLITE

P.A.C.M. TELEMETRY

Time correlated burst retransmission PACM telemetry system, memory requirements, data time delay and bandwidth utilization efficiency 14 p2244 A66-28431
Computer design of programmable decommutator for multiformat PCM telemetry data 14 p2246 A66-28432

P-BAND

Inversion layers of MOS field effect transistors observed by scanning-electron microscope and current measured 10 p1574 A66-21355

P-I-N DIODE

Current oscillations in forward biased silicon p-i-n diode with wide intrinsic region 03 p0342 A66-12728
Theory for switching power rectifiers from forward to reverse state derived and confirmed by measurements 05 p0646 A66-14662
Direct and indirect converters emphasizing preconcentration of solar radiation, noting thermophotovoltaic generators of p-i-n type 06 p0807 A66-15918
Gamma irradiation effects on float-zoned single-crystal p-type boron-doped silicon, using lithium drifted p-i-n junctions 06 p0937 A66-17144
Diffusion technique preparation of GaP p-n junctions and relation of p-i-n junction electric field calculation to Baraff carrier ionization rate theory 07 p1108 A66-18415
Unilateral conductivity of thin high-density film of refractory metal oxides, discussing formation of p-i-n junctions 08 p1276 A66-19568
P-i-n diode modulators for K and Q frequency bands, extending operation from 18 to 40 gc 10 p1513 A66-21856
P-i-n diode coaxial attenuators and levelers noting design, performance parameters and application 12 p1831 A66-23812
Current-voltage characteristics of conductivity-modulated silicon p-i-n diode as affected by high-level injection and fast-neutron bombardment 13 p2158 A66-25054
High power phase shifting with p-i-n diodes, noting that 1000-v diodes will increase peak power capacity to 10 kw 13 p2165 A66-25547
Voltage-controlled switch using p-i-n diodes loop-coupled to section of WR975 waveguide for use in satellite tracking radar system 14 p2258 A66-27953
Thermal models for microwave dissipation within p-i-n diode for forward and reverse biased states 15 p2458 A66-28890
Microwave equivalent steady state circuit parameters of reverse-biased p-i-n diode as function of process variables 15 p2458 A66-28891
Silicon p-i-n junction diode microwave switches of wide bandwidth 17 p2890 A66-32905
Silicon microwave p-i-n diode design and use as variable resistance 17 p2891 A66-32909
P-i-n diode switch design including RF insertion loss, RF isolation and mechanical configuration of device 17 p2891 A66-32910

Varactor and p-i-n diode switch and limiter design, detailing basic concepts of switching and limiting 17 p2891 A66-32911
P-i-n diode for microwave variable attenuator 17 p2891 A66-32914
Impurity concentration and electric field distribution determined in drift region of silicon p-i-n detectors from capacity as function of reverse voltage 17 p2986 A66-33303
Negative resistance in forward direction in silicon p-i-n diode 17 p2987 A66-33318
Gate-controlled threshold voltage of silicon p-i-n diode having negative resistance phenomenon in forward direction 17 p2987 A66-33323
Transient behavior of electronic transistorized system of irradiated p-i-n polarized diode in pulsed reactor 19 p3439 A66-35586

P-N JUNCTION

Optical and electrical characteristics of injection electroluminescence p-n homojunctions from zinc selenium telluride crystals 01 p0119 A66-10346
Incremental-elasticity vs charge relationship used for impurity profile of p-n junction measurement 01 p0119 A66-10398
P-n transitions in gallium arsenide investigated as factor in performance of such diodes as converters of ultrasonic into electrical oscillations 01 p0036 A66-10422
Recombination radiation of p-n junctions in CdTe-ZnTe system crystals for various current densities and molecular compositions 01 p0125 A66-10780
Thermal limitations on capabilities of gallium arsenide p-n junction lasers 01 p0082 A66-10895
Phonon-assisted tunneling current for model p-n junction obtaining wave function, interband operator and matrix element 02 p0272 A66-11485
Form, period and spectrum of free oscillations in LC circuits with nonlinear capacitative p-n alloy junctions 02 p0198 A66-11704
Combination of approximations method for natural oscillations in circuit containing p-n junction capacitance and nonlinear inductance 02 p0199 A66-11846
Large signal transient response simulation of p-n junction diode using RC analog network 02 p0200 A66-11882
Microwave power measuring device using p-n junction diodes and operating at 8, 4 and 2 mm 02 p0200 A66-11885
Volt-ampere characteristics and minority carrier recombination region width in degenerated semiconductor p-n junction 02 p0277 A66-12085
External electric field effects on volt-ampere characteristics and breakdown in p-n, p-n-p and p-n-p-n structures 02 p0277 A66-12090
Light emission in forward biased semiconductor p-n junction 03 p0409 A66-12577
Synchronization of reflex klystron loaded with resonator with nonlinear capacitance from p-n junction of semiconductor diode at third harmonic of external signal 03 p0342 A66-12626
Uniaxial stress effect on minority carrier concentration, mobility and lifetime in germanium p-n junction 03 p0409 A66-12726
Cuprous oxide-cadmium sulfide junction photocells enhanced in photosensitivity and rectifying properties by exposure to periods of light and darkness 03 p0413 A66-13190
Electrochemical oxidation of p-n junctions on silicon surface in potassium nitrate solution in ethylene glycol, noting electric current 03 p0413 A66-13203
Hole current and electron current affected by local pressure applied on emitter surface of planar-diffused n-p-n silicon transistor 04 p0558 A66-13420
P-n junction of semiconductor CdHgTe behaved as detectors and emitters of IR radiation, showing possibility of laser effect in such alloys 04 p0559 A66-13480
Temperature sensitivity of p-n junction volt-ampere characteristic may make such devices suitable for meteorological sensors 04 p0519 A66-13675
Equivalence of stress and electron-irradiation induced defects in degenerate p-

SUBJECT INDEX

n germanium junctions as indicated in similar voltage-anneal characteristics 04 p0562 A66-13751
Current-voltage characteristics of long diodes calculated by dividing diode base into three regions 04 p0495 A66-13767
Silicon p-n junction analysis using electron photographic developers when space charge region is present 04 p0563 A66-13881
Semiconductor p-n junction laser consisting of gallium arsenide-phosphorus solid solution 04 p0532 A66-14274
Boron, nitrogen and gallium in photo- and electroluminescences of silicon carbide p-n junctions, noting radiative electron transitions 04 p0567 A66-14343
Stimulated radiation from zinc diffusion p-n junctions in gallium antimonide crystals 04 p0569 A66-14355
Optically connected laser constructed on gallium arsenide p-n junction, noting coherent radiation 04 p0533 A66-14363
Mechanical sapphire-point pressure effect on characteristics of silicon p-n junction 04 p0570 A66-14491
Formation of breakdown of silicon p-n junctions in pulse mode 05 p0730 A66-14649
Gallium arsenide p-n junction laser diode covering injection current distribution, density and emission spectra variation 05 p0692 A66-14659
Avalanche breakdown for low voltage silicon p-n junctions 05 p0733 A66-14772
Monolithic integrated circuits regenerative interaction between substrate parasitics and intended semiconductor circuit elements exposed to ionizing radiation 05 p0734 A66-14852
Light induced pulse oscillation in metal-silicon contact with p-n junction 05 p0736 A66-14970
Time dependent theory of tunneling for semiconductor junction with inhomogeneous electric field 06 p0922 A66-16174
Shift of optical absorption edge toward longer wavelengths under strong electric field in silicon p-n junction 06 p0923 A66-16184
Width of depletion region of reverse-biased silicon p-n junction 06 p0923 A66-16382
Negative resistance due to avalanche multiplication in p-n junction 06 p0850 A66-16439
Avalanche multiplication factors other than impact ionization leading to breakdown in p-n junctions 06 p0850 A66-16445
Extension into microwave region of pulse-driven oscillators produced by biasing common diffused p-n junctions into avalanche breakdown region 06 p0851 A66-16451
Characteristics of spontaneous IR source for which external quantum efficiency of forward-biased GaAs p-n junction measures 40 percent at 20 degrees K 06 p0855 A66-16766
Emitter degeneration effects in design of transistor amplifiers when it is desirable to predict and control amount of distortion produced by nonlinearity of transistor input characteristic 06 p0857 A66-16974
P-n junctions and vacuum diodes used to demonstrate that thermal and shot noise are produced by nonuniform velocity distributions in charge-carrier plasmas 06 p0858 A66-16989
Nature and mobility of point defects present in silicon at high temperature and interactions between them 06 p0937 A66-17142
Impurity concentration effect of electron irradiation damage in photovoltaic silicon cell with shallow p-n junction 06 p0938 A66-17145
Recombination process of electron-hole pairs in germanium irradiated with cobalt 60 gamma rays, using photovoltaic effect in p-n junctions 06 p0938 A66-17146
Nature of radiation effects in semiconductor devices determined from alteration of electrical characteristics 06 p0938 A66-17149
Potential distribution, field intensity and carrier concentration in space charge region under direct bias 06 p0940 A66-17188
Oscillations in two-circuit parametric oscillator operating on fixed-bias p-n

SUBJECT INDEX

P-N JUNCTION CONT

- junction 06 p0860 A66-17194
- Current amplification factors of micropower silicon planar transistors in low current common-base and common-emitter circuits 06 p0860 A66-17196
- Current voltage characteristics of four-layer structures with common diffusion p-n junction and two emitters 06 p0860 A66-17197
- Photovoltaic effect in thin ternary semiconductors of Cd-Te-Hg 07 p1092 A66-17248
- Radiative recombination in germanium doped with As, Sb or In, using optical or electrical injection at 10 to 20 degrees K 07 p1095 A66-17322
- Radiative recombination in p-n junctions produced by diffusion of beryllium into GaAs with very high electron concentration 07 p1096 A66-17325
- Energy spectrum of recombination radiation from forward-biased heavily doped GaAs diodes at 4.2, 77 and 290 degrees K as function of current 07 p1096 A66-17326
- Pulse-amplitude modulator, using p-n junction diode for transforming weak input signals by amplifying voltage 07 p1005 A66-17399
- Current creep in selenium rectifier and effect on local conductivity channels in p-n junction of rectifier 07 p1099 A66-17930
- Electrical conductivity variation of low and high resistance germanium due to X-ray radiation absorption 07 p1100 A66-17932
- Radiation-induced leakage current across gate-to-substrate and drain-to-substrate semiconductor junction dominates behavior of MOS field effect transistors for small gate impedances 07 p1009 A66-18146
- SIC p-n junctions as rectifiers and radiation detectors, studying degradation in charged particles and neutron fluxes 07 p1100 A66-18147
- Magneto-optical reflection measurements at liquid-helium temperature for p-type PbTe samples in Faraday and Voigt configuration 07 p1102 A66-18206
- Continuous-wave operation of laser diode at room temperature 07 p1044 A66-18245
- Coherent radiation from gallium arsenide p-n junction formed by beryllium diffusion, noting radiative recombination with zinc 07 p1105 A66-18378
- Potential distribution in epitaxial p-n semiconductor measured via moving light spot, determining deposition depth 07 p1106 A66-18382
- Electrical properties of carrier generation-recombination centers in silicon p-n junctions, noting energy levels, effective capture cross sections for holes, etc 07 p1107 A66-18402
- Diffusion technique preparation of GaP p-n junctions and relation of p-i-n junction electric field calculation to Baraff carrier ionization rate theory 07 p1108 A66-18415
- Alloying technique through doped diffused layer for production of high speed silicon tunnel diodes for logic circuits and memory functions 08 p1188 A66-18653
- Localized diffusion of phosphorus in silicon used to produce deep p-n junctions with Gaussian P distribution 08 p1268 A66-18678
- Photo emf effect calculated at p-n junction of crystal photodiode 08 p1268 A66-18696
- Gallium arsenide luminescent diodes with triangular resonator producing coherent emission at high density current 08 p1193 A66-19195
- Origin of channel currents associated with P plus regions in silicon, discussing breakdown of field-induced junction 08 p1195 A66-19357
- Light activated low level switch consisting of electroluminescent GaAs p-n diode and double emitter silicon transistor 08 p1195 A66-19359
- Kinetic theory of semiconductor laser with p-n step junction 08 p1234 A66-19612
- Line width of semiconductor laser 08 p1234 A66-19613
- Phonon effect on temperature dependence of tunnel breakdown in silicon 08 p1277 A66-19615
- Minority carrier lifetime in junction transistors measured by three methods, noting deviations between p-n junction and transistor mode results 09 p1410 A66-19858
- Recombination-radiation spectra of GaP-GaAs p-n heterojunctions 09 p1412 A66-19984
- Orientation effect on zinc diffusion rate in p-n junctions, using gallium arsenide single crystals as initial material 09 p1412 A66-19996
- Hysteresis nature of current-voltage characteristics observed in p-n junctions obtained by bombarding germanium crystals with fast electrons 09 p1413 A66-20001
- Potential jump at p-n junction used to indicate position of junction in silicon rectifier 09 p1353 A66-20365
- High field V-I characteristics of transistor 09 p1355 A66-20570
- Circuit techniques for performing analog pulse arithmetic, using logarithmic p-n junctions on amplitudes of random nuclear pulses 09 p1356 A66-20604
- Capacitance of alloyed p-n junctions in p-type InSb is inversely proportional to square root of bias voltage 09 p1429 A66-20814
- Relaxation of photoresponse of photocells, using lateral photoeffect 09 p1358 A66-20815
- Film-type photocell consisting of p-n heterojunction between copper oxide and cadmium sulfide with secondary maximum in sensitivity 09 p1429 A66-20821
- Photovoltaic cells based on p-n junctions of ternary Cd-Te-Hg films, noting fabricating methods for n-or p-types 09 p1431 A66-20926
- IR and sub-mm wave modulation using free carrier absorption in p-n junction, examining reverse and forward-biased configurations 09 p1432 A66-20972
- Light emission associated with growth defects from reverse biased gallium phosphide p-n junctions 10 p1577 A66-21556
- Microplasma breakdown in reverse biased p-n junctions in epitaxial gallium arsenide 10 p1577 A66-21571
- Directional radiation from incoherent electroluminescent diodes, noting increase in refractive index for dielectric slab model 10 p1509 A66-21581
- Impurity atom diffusion through narrow diffusion mask opening determined by relaxation method 10 p1512 A66-21762
- One-dimensional small signal analysis of negative resistance in p-n junctions under avalanche breakdown conditions 10 p1586 A66-22083
- Small-signal impedance of space-charge region of p-n junctions under avalanche breakdown conditions, using realistic physical assumptions 10 p1586 A66-22084
- Spectral density of white noise generated in uniformly multiplying p-n junction calculated for any distribution of injected carriers 10 p1515 A66-22087
- Electronic tuning effects through DC avalanche current variation in negative-resistance diode 10 p1515 A66-22088
- Silicon diode microwave oscillators and amplifiers, noting application of avalanche transit time for increased efficiency of p-n junctions 10 p1515 A66-22090
- Microwave oscillations from reverse-biased gallium arsenide diodes of diffused p-n junctions and surface barrier structures 10 p1516 A66-22102
- Width variation of forbidden band of Si in electric field of p-n junction 10 p1588 A66-22160
- Anisotropic deformation effects on silicon p-n junction 10 p1588 A66-22164
- Recombination radiation of p-n junctions in CdTe-ZnTe system crystals for various current densities and molecular compositions 11 p1749 A66-22293
- P-n transitions in gallium arsenide investigated as factor in performance of such diodes as converters of ultrasonic into electrical oscillations 11 p1664 A66-22608
- Dependence of recombination-generation current and injection coefficient of p-n junction on forward bias voltage 11 p1666 A66-22730
- Electrophysical parameters of epitaxial p-n junction regions determined, using galvanomagnetic and photomagnetic measurements 11 p1751 A66-22734
- Second-order subharmonic oscillations in circuit containing varactor diode and consisting of series-connected R and L and closed abrupt p-n junction 11 p1667 A66-22742
- High injection theories of transport in p-n junctions and transistors in charge neutrality approximation 11 p1756 A66-23020
- Current dependence of resistivity and mobility measured in silicon epitaxial layers on control wafer 11 p1756 A66-23021
- Transient processes in nonlinear trigger circuit with capacitive p-n junction used in bistable trigger systems 11 p1670 A66-23226
- Volt-ampere characteristics of short semiconductor diode at high injection levels 11 p1757 A66-23229
- Potential distribution in p-type selenium layer adjacent to n-type cadmium selenide in cut-off direction 11 p1757 A66-23231
- Circuit design techniques for linear integrated circuits, noting manufacturing methods, achievement of monolithic construction, etc 11 p1670 A66-23243
- Hole and electron smearing and p-type absorption influence on threshold current 11 p1715 A66-23478
- Computer calculation of depletion layer properties of simultaneously-diffused, double-diffused and triple-diffused transistors 12 p1832 A66-23964
- Hyperfine structure of p-n junction phase boundaries in silicon according to electron microscopy data 12 p1930 A66-24461
- Width of spontaneous emission region in degenerate gallium arsenide p-n junction, noting spectral shifts, emission, interference, etc 13 p2159 A66-25064
- Copper diffused gallium arsenide p-n junctions, explaining current-voltage characteristics, light emission and capacitance of diodes at 300 and 77 degrees K 13 p2161 A66-25186
- Uniaxial stress effect on Ge inclined p-n junctions 13 p2161 A66-25191
- Gold or copper diffusion effect on breakdown and multiplication characteristics of high voltage silicon p-n junctions, noting presence and formation of microplasma 13 p2161 A66-25194
- Optically coupled linear circuit techniques, discussing GaAs p-n junction diode, noncoherent light emitters and silicon p-n junction photosensors 13 p2036 A66-25521
- Silicon diffused p-n junctions with boron acceptor for varactor diodes 13 p2040 A66-25816
- Formation of breakdown of silicon p-n junctions in pulse mode 13 p2167 A66-25924
- Gallium arsenide p-n junction laser diode, injection current distribution, density and emission spectra variation 13 p2092 A66-25934
- Voltage buildup on p-n junction and base of semiconductor diode during jump in forward current 13 p2041 A66-25943
- Spectral characteristics of gallium arsenide junction luminescence, noting radiative recombination mechanism, energy spread of impurity states and line shape temperature dependence 13 p2168 A66-26186
- Abrupt p-n junction irregularities in barrier layer where Poisson equation is reducible to quadrature 14 p2348 A66-26798
- Avalanche breakdown voltages of abrupt and linearly graded p-n junction in Ge, Si, GaAs and GaP 14 p2356 A66-27027
- Spectral distribution of photosensitivity of gallium arsenide p-n junctions in near UV region 14 p2356 A66-27067
- Radiation effects on silicon p-n junction diode solar cell and use of transparent radiation shield 14 p2225 A66-27107
- Green emission lines from solution-grown p-n junctions in GaP diodes doped with shallow donors and acceptors 14 p2251 A66-27231
- Silicon p-n junction analysis using electron photographic developers when space charge region is present 14 p2363 A66-27579
- Series resistance of silicon microwave varactors 14 p2254 A66-27731
- Passage of pulse signal through distributed RC circuit with nonlinear p-n junction capacitance 14 p2254 A66-27740
- V-I characteristics of alloyed p-n junctions in InAs in temperature range from 78 to 296 degrees K 14 p2364 A66-27745
- Time parameters of powerful laser measured with GaAs photodiode, noting time constant and time resolution of photodiode 14 p2309 A66-27750
- Epitaxially grown junction as nonlinear transmission line 14 p2260 A66-28168

- Boron, nitrogen and gallium in photo- and electroluminescences of silicon carbide p-n junctions, noting radiative electron transitions 14 p2367 A66-28238
- Stimulated radiation from zinc diffusion p-n junctions in gallium antimonide crystals 14 p2368 A66-28253
- Optically connected laser constructed on gallium arsenide p-n junction, noting coherent radiation 14 p2310 A66-28262
- FET in biased p-n junction controlled electric field applied to low level circuit design 14 p2261 A66-28374
- Avalanche breakdown voltages for diffused junctions in silicon epitaxial layers 2-32 microns thick for different impurity profiles 15 p2564 A66-28899
- Gallium arsenide laser design using p-n junction obtained by diffusion of zinc in tellurium doped n-GaAs single crystal 15 p2514 A66-29057
- Stable microwave oscillations in single crystal Ge alloy p-n junction diodes 15 p2567 A66-29402
- P-n homojunctions in zinc selenide, preparation and properties 15 p2567 A66-29411
- Reverse recovery phenomena in silicon alloyed p-n junction 15 p2467 A66-29710
- Frequency stability and spectral purity of p-n junction laser output improved by synchronization with gas laser beam 15 p2518 A66-29717
- Survey of literature on basic properties and circuit designs of silicon-controlled p-n-p-n rectifiers 15 p2468 A66-29916
- Dependence of amplification factors on emitter current in p-n-p-n silicon rectifiers 15 p2468 A66-29917
- Electronic relays with bistable elements based on nonlinear circuits with p-n junction capacitance 15 p2468 A66-29923
- Relation between time of voltage buildup and length of diode base in p-n junction at high injection levels 16 p2776 A66-30866
- Switching time of semiconductor diode with limited base region analyzed by charge control techniques 16 p2777 A66-30867
- Local pressure effect on forward and reverse current in germanium p-n junction 16 p2779 A66-31081
- Temperature gradient of microplasma in silicon p-n junction 16 p2781 A66-31404
- Current voltage characteristic of three layer germanium semiconductors, noting quadratic dependence of current on voltage 16 p2785 A66-31668
- Entrainment effect transmitted across p-n junction noting contribution of minority carriers 16 p2785 A66-31670
- Transfer processes in steep p-n junction of long diodes with interval between forward and reverse bias 16 p2667 A66-31671
- Minimum spectral line width, threshold current density, radiation-peak displacement and possible recombination mechanism for GaSb laser diode p-n junctions in coherent radiation 16 p2721 A66-31764
- Coherent emission of indium arsenide phosphide p-n junction 16 p2721 A66-31788
- Shunting of input current into collector region of planar triode 17 p2879 A66-31865
- Photodiode operation mode and steady-state response of diffused p-n junction type Si radiation detectors to X-rays 17 p2975 A66-31883
- P-n junction lasers for short range communications, examining design, technological problems and performance 17 p2933 A66-31956
- Undepleted current carrier effect on characteristics of inverse p-n junction 17 p2976 A66-32069
- Photo emf variation with radiation power of Q-switch ruby laser incident on silicon crystal with p-n junction 17 p2978 A66-32509
- Space charge density in p-n junction found to be unrelated to charge density assumed in Schottky theory 17 p2979 A66-32641
- Avalanche breakdown voltage calculated for planar p-n junction 17 p2981 A66-32688
- Kinetic theory of semiconductor laser with p-n step junction 17 p2936 A66-33126
- Line width of semiconductor laser 17 p2936 A66-33127
- Phonon effect on temperature dependence of tunnel breakdown in silicon 17 p2983 A66-33129
- Scanning electron microscope to examine crystal mosaic structures and lasing properties of gallium arsenide laser diodes 17 p2937 A66-33300
- Strong injection in nondegenerated p-n junction producing electron-hole plasma in n region near junction 17 p2986 A66-33307
- Photoeffect on barrier capacitance of p-n junction 17 p2988 A66-33326
- Scanning microscope for studying Si p-n junctions by electron or ion bombardment 17 p2927 A66-33454
- Stroboscopic electron mirror microscope observations of Si p-n junctions in pulsed regime 17 p2928 A66-33455
- Scanning electron microscope observations of p-n junctions using small periodic bias voltages 17 p2988 A66-33457
- Local pressure effect on changes of forward current and stored charge of germanium p-n and p-s-n structures explained by change of energy gap 18 p3153 A66-33759
- Carrier travel time in transistor region where changeover from neutral region to depletion layer takes place 18 p3076 A66-33936
- One-dimensional diode model with high resistivity n region and built-in electrical field 18 p3088 A66-35038
- Tunnel diode capacitance relation to displacement interpreted in terms of impurity drift in nonuniform field of p-n junction in highly doped germanium diodes 19 p3433 A66-35302
- Diffusion and melting techniques used to determine effect of Ni, W, Ti and Ta impurities on lifetime of minority carriers in n-base of silicon p-n junctions 19 p3433 A66-35310
- Potential jump at p-n junction used to indicate position of junction in silicon rectifier 19 p3312 A66-35322
- Energy band structure, carrier behavior and characteristic curve of p-n junction diode at high-current level, solving transport and Poisson equations 19 p3312 A66-35346
- Chemical etchants for In As noting functions, rate dependence on bromine in methanol, p-n junction delineation, etc 19 p3434 A66-35349
- Transient process in semiconductors when charge carrier concentration deviates from equilibrium 19 p3437 A66-35454
- Intrinsic dislocations in diffused silicon p-n junctions and effect on transient processes 19 p3437 A66-35455
- Potential distribution, field intensity and carrier concentration in space charge region under direct bias 19 p3439 A66-35546
- Oscillations in two-circuit parametric oscillation operating on fixed-bias p-n junction 19 p3315 A66-35552
- Current amplification factors of micropower silicon planar transistors in low current common-base and common-emitter circuits 19 p3315 A66-35554
- Current voltage characteristics of four-layer structures with common diffusion p-n junction and two emitters 19 p3315 A66-35555
- Width variation of forbidden band of Si in electric field of p-n junction 19 p3440 A66-35774
- Anisotropic deformation effects on silicon p-n junction 19 p3441 A66-35778
- Phototube using shallow-diffused p-n junction diodes as multiplier element 19 p3359 A66-35909
- Gallium arsenide lasers operating at room temperature investigated, based on diffusion p-n junctions, discussing emission spectrum 19 p3375 A66-36070
- Separation centers and dislocations during diffusion of Zn into GaAs at high temperatures, analyzing photographs of p-n junctions 19 p3445 A66-36339
- I-V-P characteristic of p-n junction explained by band gap widening due to mechanical stress exerted by stylus, assuming Zener effect 19 p3323 A66-36823
- Surface space-charge region associated with p-n junction characteristics when not in equilibrium, using MOS structures theory 20 p3527 A66-37403
- Recombination radiation from Ga-Sb p-n junctions, noting spectral composition as function of current density and impurity concentration 20 p3618 A66-37563
- Electrical properties, design and construction of microwave varactor diodes with diffused p-n junctions 20 p3529 A66-37589
- Hyperfine structure of p-n junction phase boundaries in silicon according to electron microscopy data 20 p3620 A66-37693
- Bias voltage dependence of capacitance in n-type silicon p-n junctions with voltage breakdown 20 p3621 A66-38007
- Effective minority carrier lifetime and recombination rate determined from voltage growth curve of p-n junction 21 p3798 A66-38912
- Volt-ampere characteristics and photomicrographs of p-n junctions produced by diffusion of Zn and Cd into InP 21 p3798 A66-38918
- Radiation intensity dependence for various spectral bands of diffused gallium arsenide p-n junctions on current density 21 p3798 A66-38921
- Internal electric field effect on singly ionized acceptor or donor impurity diffusion in uniformly doped n-or p-type semiconductors 21 p3804 A66-39468
- Metallurgical junction radius of curvature effect on avalanche breakdown voltage in Ge, Si, GaAs and GaP spherical and cylindrical p-n junctions 22 p3959 A66-39740
- Far-field light emission mode pattern of GaAs diode injection lasers, dielectric gradient in inversion layer and refractive index in junction 22 p3930 A66-39743
- Photovoltaic response of p-n Ge-Si and Ge-GaAs heterojunctions dominated by carrier generation in narrow or wide gap material 22 p3960 A66-39813
- Four-layer p-n-p-n diodes having two separate capacitance modes enables use as controlled element in frequency keying circuits 22 p3875 A66-40074
- Theoretical model for effect of mechanical stress on generation-recombination currents in p-n junctions 22 p3963 A66-40095
- Recombination radiation from GaAs p-n junctions with and without Fabry-Perot resonator, noting parameter dependence on current density 22 p3932 A66-40314
- Silicon dioxide complexes and deposition of excess oxygen at dislocations and structural defects, examining creation of microplasma breakdown of silicon p-n junctions 22 p3965 A66-40320
- Spectral distribution of photosensitivity of gallium arsenide p-n junctions in near UV region 22 p3966 A66-40826
- Current characteristics of solution and vapor grown p-n Ge-Si and Ge-GaAs heterojunctions as function of voltage and temperature 22 p3968 A66-40963
- Dependence of recombination-generation current and injection coefficient of p-n junction on forward bias voltage 23 p4045 A66-41468
- Electrophysical parameters of epitaxial p-n junction regions determined, using galvanomagnetic and photomagnetic measurements 23 p4113 A66-41472
- Second-order subharmonic oscillations in circuit containing varactor diode and consisting of series-connected R and L and closed abrupt p-n junction 23 p4045 A66-41480
- Resistance network analog method determination of carrier density distribution and charge constant in p-n junction for two-dimensional axisymmetric case 23 p4115 A66-41858
- Approximate steady state solutions of continuity equation containing effects of diffusion, drift and recombination for carrier diffusion region of forward-biased p-n junction over wide range of injection 24 p4249 A66-42225
- Electrical and electroluminescent property of GaP diffused p-n junctions, accounting for V-I characteristics due to space-charge recombination by Sah-Noyce-Shockley theory 24 p4249 A66-42226
- Injection electroluminescence in AlAs-GaAs as p-n junction diodes of graded energy gap 24 p4251 A66-42300
- Multiple energy bands effects on stress dependence of breakdown and order of magnitude in breakdown voltage of Ge and Si junction diodes 24 p4251 A66-42306

Epitaxial growth of bulk quality GaAs on GaAs and Ge substrates, using hydrogen stream saturated at room temperature with arsenic chloride 24 p4251 A66-42307

Radiative recombination within space-charge region in germanium exposed to increasing surface field 24 p4251 A66-42308

Lithium ion drift and density distribution in electric field of Si p-n junction 24 p4253 A66-42359

Prebreakdown region of selenium rectifiers, using pulse method with exponential pulse leading edge 24 p4254 A66-42426

Diffusion of phosphorus into silicon, using doped silicon oxide skin sources produced by anodic oxidation 24 p4255 A66-42504

Surge-proof silicon power diode combining p-n and p-i-n structures 24 p4182 A66-42505

P-N-P JUNCTION

Punch-through avalanche phenomena, describing fast rise pulse production in junction transistors of variable base width 05 p0651 A66-15840

Transistorized switch, employing n-p-n and p-n-p silicon triodes, capable of switching voltages from 10 mv to 20 v 09 p1352 A66-20360

Charge-controlled /p-n-p/ transistors, discussing three-dimensional asymmetric model, dynamic characteristics and switching time calculation 09 p1355 A66-20569

Electron processes in p-n-p-m transistor, relating capacitor current and emitter current and current amplification factor and emitter current 09 p1358 A66-20812

Double-ended transistors /n-p-n and p-n-p/ in circuit design application, explaining why transistors of opposed polarity facilitate direct interstage coupling 10 p1511 A66-21713

Minority carrier flow in base region of Graded Band Gap Base /GBGB/ transistor, determining effect of injected current level upon carrier transit time 11 p1668 A66-23024

P-n-p and n-p-n silicon epitaxial power transistors, noting geometry vs output for interdigitated structures 13 p2037 A66-25542

Diffused-base alloyed-emitter p-n-p type planar germanium microwave transistor 13 p2038 A66-25558

Traveling solvent technique for p-n-p or n-p-n semiconductor structures with highly doped middle layer demonstrated on indium arsenide 16 p2779 A66-31088

Transistorized switch, employing n-p-n and p-n-p silicon triodes, capable of switching voltages from 10 mv to 20 v 19 p3312 A66-35318

Transistor theory approximation of DC and small signal I-V characteristics of p-n-p-n junction diodes and triodes 24 p4184 A66-42744

P-TYPE SEMICONDUCTOR

Field-emission current voltage behavior of p-type germanium crystals whose surfaces were prepared by high field evaporation 02 p0271 A66-11439

Microwave emission at O-band from n-and p-type indium antimonide subjected to applied electric and magnetic fields 04 p0564 A66-14103

Noise and lifetime of nonequilibrium current carriers in p-indium antimonide 04 p0566 A66-14276

Laser excitation in gallium arsenide anode by slow electrons, taking into account diffraction and absorption losses 04 p0533 A66-14319

Coulomb interaction of electrons and holes in contacts of degenerate n-and p-type semiconductors causes ground state instability relative to electron-hole pair formation 05 p0730 A66-14645

Strain dependence of impurity conductivity measured in compensated p-type germanium, using uniaxial compression 06 p0922 A66-16171

Ultrasonic attenuation and velocity changes in doped p-type silicon in frequency range from 608 to 960 mc 06 p0851 A66-16460

HF response of copper doped p-type germanium IR detectors 06 p0882 A66-16764

Impurities effect on electrification of cadmium telluride dust, specifically n and p types, with electrification increasing with impurity concentration 06 p0928 A66-16891

Secular conductivity changes in p-type germanium of both high and intermediate

purity indicate defect annealing resulting from electron irradiation 06 p0932 A66-17116

Gamma irradiation effects on float-zoned single-crystal p-type boron-doped silicon, using lithium drifted p-i-n junctions 06 p0937 A66-17144

Optical emission induced in gallium arsenide samples by bombardment with high energy electron pulses 07 p1096 A66-17338

Cyclotron resonance in Azbel-Kaner geometry in n-and p-type lead telluride, examining anisotropy of absorption under anomalous skin effect conditions 07 p1102 A66-18205

Magneto-optical reflection measurements at liquid-helium temperature for p-type PbTe samples in Faraday and Voigt configuration 07 p1102 A66-18206

Hole concentration effect on elastic constant of heavily doped p-type silicon 07 p1106 A66-18396

Structural formation and electrical properties of polycrystalline thin films of GaSb obtained by discrete vacuum evaporation method 08 p1267 A66-18588

Electrical properties of alpha ferric oxide containing magnesium, noting temperature effect, carrier concentration, conductivity variations, etc 08 p1271 A66-19221

Double impulse method for lifetime measurement on pure silicon crystals, using injecting metal-semiconductor contacts 08 p1271 A66-19241

Grid dispersion mobility dependence on temperature in p-type Ge, noting discrepancy of theoretical and experimental results 08 p1273 A66-19257

Metallography of cadmium crystals with copper impurities obtained by sublimation from copper powder, noting that copper solubility is limited 08 p1277 A66-19623

Phonon drag in p-GaAs, graphing temperature dependence of thermoelectric power 09 p1426 A66-20196

Capacitance of alloyed p-n junctions in p-type InSb is inversely proportional to square root of bias voltage 09 p1429 A66-20814

Symmetrical negative resistance in valence-exchange reaction in semiconductor p-x-p-type glass junctions 09 p1430 A66-20847

Nonisothermal wave motion in nondegenerate semiconductors with charge carrier possessing scalar effective mass 10 p1586 A66-22091

Double injection in long p-p-n diffused silicon junctions subjected to heat treatment, noting donor density energy level and electrical properties 11 p1756 A66-23027

Potential distribution in p-type selenium layer adjacent to n-type cadmium selenide in cut-off direction 11 p1757 A66-23231

Length changes and conductivity variations in electron irradiated n-and p-type germanium, noting methods of measurement, effects of isochronic annealing at liquid helium and nitrogen temperatures 12 p1926 A66-23717

Jump conductivity of lightly doped p-germanium single crystals, noting Hall coefficient temperature dependence and specific resistance with low donor and acceptor concentrations 12 p1927 A66-23724

Antimony ionization in p-germanium single crystals, based on diffusion of Sb into Ge 12 p1930 A66-24460

Electroluminescence and emission spectra of indium-alloyed diodes made from phosphorus doped p-type ZnTe biased in either forward or reverse direction at liquid nitrogen temperatures 13 p2029 A66-25184

Hall reversal at negative resistance in forward biased p-Ge point contact diode 13 p2029 A66-25192

Coulomb interaction of electrons and holes in contacts of degenerate n-and p-type semiconductors causes ground state instability relative to electron-hole pair formation 13 p2166 A66-25918

Influence of p and n doping on electrification of dust of Ge monocrystals grown from zone-melted material 14 p2364 A66-27717

Minority carrier drift mobility in p-type germanium single crystal under uniaxial lattice compression 14 p2365 A66-27758

Field effect measurements in n-and p-type CdTe at room temperature and

pressure 15 p2558 A66-28612

Acceptor nature of dislocations in p-type germanium 15 p2560 A66-28636

Generation-recombination and modulation noise power spectrum of high purity p-type InSb at 77 degrees K 16 p2784 A66-31449

Photo-Hall effect and photoconductivity on compensated p-InSb at low temperatures, examining temperature dependence of carrier mobility 16 p2788 A66-31773

Surface IR photoconductivity spectra of chemically etched p and n silicon, noting energy distribution, activation energies of centers, etc 16 p2788 A66-31774

Electron mobility in p-type indium antimonide, noting entrainment of minority carriers by majority carriers 16 p2789 A66-31784

Perturbation approach to IR absorption in p-type semiconductor with zincblende or zinc telluride structure 17 p2982 A66-32971

Metallography of cadmium crystals with copper impurities obtained by sublimation from copper powder, noting that copper solubility is limited 17 p2984 A66-33137

Damaged germanium surface epitaxial layer influence on resistivity and mobility of thin semiconductor sheets 17 p2986 A66-33294

Controlled doping of germanium layers during evaporation, noting behavior differences for p-and n-type impurities and concentration dependence 19 p3434 A66-35344

Chemical sectioning of p-type surface layers on silicon, presenting electrical and X-ray measurements of boron-induced defect distribution 19 p3436 A66-35424

Thermal and electric properties of InAs-GaAs alloy as function of composition, impurity additions and temperature 19 p3436 A66-35427

Reflectivity of heavily doped samples of p-type gallium arsenide of known carrier concentration and determination of dependence of effective mass upon carrier concentration 20 p3619 A66-37631

Antimony ionization in p-germanium single crystals, based on diffusion of Sb into Ge 20 p3620 A66-37692

Optical determination of hole concentration dependence in p-type silicon semiconductors by measuring absorption coefficients 21 p3798 A66-38765

P-silicon semiconductor strain gauge for mechanical stress analysis and electrical measurement of mechanical values 21 p3737 A66-38826

Galvanomagnetic effects in p-type aluminum antimonide, discussing field dependence of Hall effect and magnetoresistance 21 p3801 A66-38999

Kinetic energy causing anomalous increase in thermoelectric power in semiconducting p-type iron-chromium sulfide near Curie temperature 21 p3803 A66-39261

MOS capacitance of p-type silicon in inversion layer and ion drift in fringing field 22 p3872 A66-39744

Carrier density, mobility and space-charge-limited current in p-type silicon 22 p3962 A66-40049

Spontaneous and stimulated emission from GaAs diodes with three-layer structures consisting of n-n-p, n-i-p or n-p-p diodes 22 p3932 A66-40102

Coherent radiation generation in electron-hole indium antimonide plasma, discussing emission spectrum 22 p3965 A66-40319

Voigt-ampere characteristics of germanium and silicon diodes with p region formation by gold diffusion into n-type material 23 p4046 A66-41566

P-type conductivity and stored electron charge densities in high resistivity cadmium sulfide crystals 23 p4114 A66-41625

Variation of resistivity and inversion of sign of conductivity of quenched specimens of p-type silicon 23 p4115 A66-41838

Electron paramagnetic resonance and Hall effect measurements to determine properties of dominant paramagnetic defect in electron irradiated p-type silicon 24 p4250 A66-42230

Energy levels and wave function of hole in field of two acceptor ions and nearest ion donor for p-type Ge and Si 24 p4255 A66-42496

Matrix elements of Coulomb potential between Schechter functions and overlap

integrals necessary in determining two-center acceptor states in p-type Ge and Si 24 p4255 A66-42497

Energy levels and wave function of hole in field of two acceptor ions and nearest ion donor for p-type Ge and Si, noting numerical results 24 p4255 A66-42498

Impurity photoconductivity spectra of p-type germanium at low temperatures, noting parameters of relative depth of equidistant minima oscillations 24 p4256 A66-42515

Four-terminal operation of transistors with substrates of p-type material in which channel current is carried by electrons or metal oxide semiconductor transistors 24 p4185 A66-43032

P-1127 AIRCRAFT

S HAWKER P 1127 AIRCRAFT

PACIFIC OCEAN

Density, temperature and wind data of strato-and mesosphere, together with water vapor measurements in central tropical Pacific, using rocket and balloon soundings 15 p2485 A66-28937

PACKAGING

SA ELECTRONIC PACKAGING

Lightweight packageable structurable materials capable of expansion, erection and rigidization in space 14 p2317 A66-28016

Transportation needs of business in small shipment category, discussing role of air freight 15 p2819 A66-29791

LOX-compatible packaging films for maintaining cleanliness of supercleaned components 17 p2943 A66-32203

Transient response analysis in package design, formulating damage criteria and linear theory value 21 p3824 A66-38573

PACKING

New materials in compression packings and O rings such as fibers, metals, plastics and homogeneous materials 04 p0525 A66-13782

Mechanical end face seals covering design, operation, parameters, materials used, advantages and limitations 04 p0525 A66-13784

Changes in fine structure of powdered copper during compression, determining dislocation density and disorientation angles, noting plastic deformation cause as packing defect occurrence 10 p1546 A66-21505

Machine parts of complicated form manufactured from powdered materials by vibrational compacting 10 p1540 A66-21506

Changes in fine structure of powdered copper during compression, determining dislocation density and disorientation angles, noting plastic deformation cause as packing defect occurrence 23 p4081 A66-41526

Machine parts of complicated form manufactured from powdered materials by vibrational compacting 23 p4073 A66-41527

PACKING DENSITY

Upper and lower bounds on partition functions for finite systems of rigid disks and spheres for high density limit 18 p3139 A66-34503

Physical limits of miniaturization, noting element size, packing density, heat dissipation, etc, in connection with integrated circuits 19 p3323 A66-36825

PADE APPROXIMATION

Location and nature of singularity of Ising square lattice susceptibility, using Pade approximation based on Clapp spin-spin correlation function 02 p0263 A66-11887

PAIN

Gate control system role in pain mechanism, noting specificity and pattern theories 03 p0325 A66-13337

PAIN SENSITIVITY

Origin of chest pains associated with G force sinusoidal vibration, noting effect of anterior chest wall anesthetization, results suggest pain originates in chest wall 19 p3286 A66-36375

PAINT

SA FILLER

SA FINISH

Temperature indicating paints applied to high-temperature and high-velocity gas streams in gas turbine design [SAE PAPER 650705] 07 p1110 A66-17866

Heat-sensitive paint in measuring kinetic heating in hypersonic wind tunnel 08 p1316 A66-18720

Supersonic aircraft finishes resisting corrosion and high temperatures, including

epoxy-amine cured primers, acrylic paints, silicone, synthetic enamels, etc 10 p1547 A66-21136

Measuring aerodynamic heating of wind-tunnel models by temperature sensitive paint, noting ambient pressure effect 16 p2682 A66-30916

PAIR PRODUCTION

Singlet and triplet pairs coexistence in anisotropic superconductor 10 p1583 A66-21971

Excitation in electron beam pumped /EBP/ GaAs lasers including electron scattering, energy dissipation pattern, phonon emission, pair production, etc 13 p2099 A66-26181

Delta-electron generation by muons and fluctuations in soft cosmic ray component, assuming thick absorption layer 15 p2547 A66-29598

Singlet and triplet pairs coexistence in anisotropic superconductor 21 p3805 A66-39550

Mean energy required to create electron-hole pair in Si measured as function of temperature, using cryostat 23 p4111 A66-41264

Asymptotic approximation of distribution of small ionization bursts produced by high energy muon under thick layer of matter in direct electron-pair production 24 p4271 A66-42935

Ultrarelativistic muon electromagnetic interaction energy loss due to bremsstrahlung and pair production 24 p4271 A66-42936

PAKISTAN

Pakistan space program including rocket soundings, satellite tracking, meteorological research, etc 15 p2601 A66-29913

PALLADIUM

Palladium-hydrogen diffusion electrode noting current densities 04 p0460 A66-14034

Small angle scattering technique with high resolution electron microscopy to determine columnar structure of thin vacuum condensed Pd films 10 p1573 A66-21247

Change in thermionic emission current of palladium wire at 1000 degrees C due to exposure to molecular and atomic-hydrogen beams 22 p3859 A66-39913

PALLADIUM ALLOY

Tensile tests and strain rates at various temperatures on palladium hydrogen alloys, noting plastic deformation and strain aging 05 p0701 A66-14966

Low temperature study of resistivity and thermoelectric power variations of silver-palladium alloys as function of concentration, caused by electron diffusion 09 p1425 A66-20079

Palladium-silver and palladium-rhodium alloys electrical resistance, Hall effect and Nernst effect as affected by temperature 09 p1389 A66-20805

PAM

S PULSE AMPLITUDE MODULATION

/PAM/

PANEL

SA CONTROL PANEL

SA CURVED PANEL

SA PLATE

SA RECTANGULAR PANEL

SA WING PANEL

Shell structures solved numerically, using network of partial panels 14 p2404 A66-27990

Form stability of shallow convex skin panels produced by press forging 15 p2615 A66-29781

Variational theorems for creep of shallow cylindrical shells, noting buckling and snap-through of square cylindrical panel compressed along generatrix 21 p3829 A66-38977

PANEL FLUTTER

Vibration response of steel panels to fluctuating pressures in turbulent boundary layer of wind tunnel compared to random excitation caused by jet noise and siren 01 p0148 A66-10138

Acoustic fatigue testing of 20 fuselage panels of XC-142A VTOL/STOL transport aircraft, using simulated propeller noise 01 p0151 A66-10158

Panel flutter from Mach 1 to 1.5, correlating analytical and experimental results presented in literature 01 p0151 A66-10342

Parabolic temperature distribution effect

on flutter behavior of panel subjected to supersonic flow over one surface

[AIAA PAPER 65-112] 02 p0297 A66-11544

Small amplitude vibrations of rectangular panel relative to static buckled configuration 02 p0301 A66-12164

Aeroelastic instabilities of simply supported two-dimensional panels in subsonic flow at Mach numbers up to 0.85 [AIAA PAPER 65-772] 03 p0434 A66-12555

Model consisting of closed rectangular box with one vibrating panel, comparing results of one-term approximation with orthogonal-mode solution 03 p0437 A66-12809

Turbulent boundary layer pressure fluctuations in subsonic wind tunnel flow and relation to panel vibration response 04 p0509 A66-13535

Traveling wave vibration in stationary and rotating cylindrical shells in gas turbine engines [ASME PAPER 65-WA/GTP-3]

05 p0780 A66-15718

Supersonic panel flutter using small deflection plate theory and three-dimensional unsteady aerodynamic theory [AIAA PAPER 64-491] 05 p0609 A66-15789

Liapunov stability criterion for panel flutter in supersonic flow derived from second method of

Liapunov 08 p1310 A66-19160

Flutter of circular cylindrical isotropic shells 14 p2408 A66-28187

Oscillatory pressures in idealized annular boundary layer apply to panel flutter of circular cylindrical shell in supersonic flow 15 p2610 A66-29282

Traveling wave vibration in stationary and rotating cylindrical shells in gas turbine engines [ASME PAPER 65-WA-GTP-3]

16 p2813 A66-30342

Flutter of simply supported thin isotropic parallelogrammic flat panels in supersonic flow [AIAA PAPER 66-474] 17 p3028 A66-32766

Forced vibrations of flexible rectangular panel backed by closed rectangular cavity under external acoustic pressure, noting sound transmission into

cavity 18 p3250 A66-33674

Flutter of rectangular orthotropic panel supported by deflectional spring along two edges in supersonic

airflow 18 p3257 A66-34590

Panel flutter at high Mach numbers, using linear plate theory and first-order aerodynamics, noting damping, relation between traveling and standing wave theories, etc 18 p3257 A66-34592

Two- and three-dimensional plates in high supersonic flow undergoing limit cycle oscillations analyzed, using aerodynamic theory and von Karman large deflection plate theory 18 p3257 A66-34593

Aeroelastic instability of flat rectangular panels leading, trailing and free lateral edges, noting gap between theoretical and wind tunnel stability test 20 p3491 A66-36952

Flutter of infinitely long panel of finite width with upper surface exposed to inviscid flow, noting critical wavelength and flutter velocity 21 p3827 A66-38691

Energy dissipation effect on panel vibration damping due to structural joints 21 p3827 A66-38693

Panel flutter analysis via forced vibration technique noting frequency coalescence, flutter boundary and experimental technique [AIAA PAPER 66-769] 22 p3895 A66-40650

Vibration excitation of plane panel by idealized model of turbulent boundary layer, comparing infinite panel/running wave with finite panel/ modal density approaches 24 p4293 A66-43048

PANORAMIC SCANNING

Computer processing of data obtained from panoramic vertical sounding of ionosphere to separate reliable portions of height-frequency characteristic from total 02 p0224 A66-12122

Image movement from aircraft velocity for vertical and oblique panoramic cameras 13 p2078 A66-25605

Computer processing of data obtained from panoramic vertical sounding of ionosphere to separate reliable portions of height-frequency characteristic from

total 14 p2287 A66-28081
Dielectric-tape TV camera for panoramic scanning application in meteorological satellite, discussing subject logic and control system design 14 p2262 A66-28418

PARA HYDROGEN
Ultrasonic velocity of compressed fluid hydrogen between 15 and 100 degrees K and in normal and parahydrogen of saturated liquid between 14.5 and 32.2 degrees K 09 p1392 A66-20081
Temperature and density dependence of viscosity of parahydrogen determined by Welber torsional crystal method 09 p1392 A66-20082
Heat of fusion and density of solid and slush hydrogen at pressures to about 400 atm 20 p3625 A66-37081
Heat transfer coefficients over range of Reynolds numbers for solid-vapor mixture of parahydrogen discharge below triple point pressure 20 p3679 A66-37511

PARABOLIC EQUATION
Inhomogeneous parabolic equation for density change of solar particles in space and time, determining duration of solar cosmic ray emission 02 p0284 A66-12127
Locally one-dimensional method applicability for solving multidimensional second order equation of parabolic type 02 p0251 A66-12245
Monograph on boundary problems for linear parabolic systems with complex coefficients 03 p0388 A66-12456
Parabolic differential equations connected with optimal pursuit, discussing analysis and solution of problem of two moving points, with application of maximum principle 04 p0539 A66-13991
Correct solvability of Cauchy problem for parabolic systems with coefficients satisfying Dini condition 06 p0902 A66-16534
Boundary value problem for parabolic equation in closed region 07 p1056 A66-17599
Second order degenerate elliptic and parabolic equations, giving smoothness theorems of solutions 07 p1056 A66-17604
Parabolic form representation by linear combinations of quaternary theta series 10 p1552 A66-21987
Alternating direction schemes for heat equation in general cross sections with M space dimensions and nonlinear equations 11 p1722 A66-22982
Uniqueness theorems for second-order linear elliptic and parabolic equations with discontinuous boundary values 11 p1724 A66-23362
Schauder-type solution estimates to first boundary value problem for parabolic equations of order 2p 12 p1901 A66-23663
Consistent theory of nonlinear optical effects in bounded light beams by extending parabolic equations to nonlinear problems 12 p1891 A66-24888
Theorems associated with surface parabolic potentials 13 p2116 A66-25334
Modified Cauchy problem in Bitsadze representation with smoothness conditions imposed on initial conditions and on coefficients of pertinent parabolic equation 13 p2119 A66-25907
Schauder-type boundary estimates for solution of directional-derivative problem of parabolic equation in noncylindrical region 13 p2120 A66-25909
Optimal control problems described by classical boundary problems for equations of parabolic and hyperbolic type 14 p2263 A66-26768
Nonlinear parabolic equations of order 2m in plane having generally nondivergent form 14 p2319 A66-26769
Uniqueness theorems of Cauchy problem for parabolic equations of heat conduction 14 p2322 A66-27630
Inhomogeneous parabolic equation for density change of solar particles in space and time, determining duration of solar cosmic ray emission 14 p2377 A66-28084
Finite difference method solution of parabolic and hyperbolic partial differential equations in one space variable 14 p2324 A66-28146
Surface pressure on thin two-dimensional airfoils in transonic flow 15 p2478 A66-29246
Uniqueness and existence theorems for parabolic partial differential equations for

case of free boundary 15 p2528 A66-29334
Approximate continuation of harmonic and parabolic functions as solutions of Laplace and heat equations 16 p2732 A66-30242
Small parameter problem for parabolic differential equations examining motion of Markov-type random point in Euclidean space 16 p2733 A66-30737
Certain incorrect Dirichlet and Cauchy problems of potential theory for elliptic and parabolic equations 16 p2733 A66-30744
Correct solvability of Cauchy problem for parabolic systems with coefficients satisfying Dini condition 16 p2735 A66-30972
Mixed boundary value problem for parabolic hypoelliptic equation with two independent variables treated by modified potential method 16 p2740 A66-31798
Stochastic equation applied to investigating second boundary value problem for parabolic differential equations with small parameters 17 p2946 A66-32297
Nonlinear parabolic equations, considering existence, uniqueness theorems, abstract Cauchy problem, etc 17 p2946 A66-32307
Generalized solutions to second-order linear or quasi-linear uniform parabolic equation 17 p2947 A66-32664
Series solution to parabolic PDE for heat transfer from smooth wall to turbulent boundary layer 17 p3037 A66-33041
Accuracy analysis of variable-direction diagrams for numerical solutions to heat conductivity equations 19 p3478 A66-35937
Parabolic form representation by linear combinations of quaternary theta series 19 p3390 A66-36192
Schauder-type solution estimates to first boundary value problem for parabolic equations of order 2p 19 p3390 A66-36193
Theorems associated with surface parabolic potentials 19 p3390 A66-36195
Finite difference method approach to discontinuity in parabolic equations for shear laminar boundary layer flow of injected gas past wall 19 p3342 A66-36477
Plane viscous problem of gas motion through weak straight line discontinuity of acceleration, noting formation of boundary layer 19 p3278 A66-36845
Estimate of solutions to parabolic differential equations with Euclidian space 20 p3592 A66-38422
Validity of Ito-Yamabe solution of parabolic equation for time-dependent coefficients 21 p3758 A66-39316
Consistent theory of nonlinear optical effects in bounded light beams by extending parabolic equations to nonlinear problems 23 p4076 A66-41095
Parabolic equations describing periodic oscillatory processes that occur in certain electrolytic systems, oil gushers and relay regulation of body temperature 24 p4230 A66-42218
Parabolic equations applied to nonlinear thermoconductivity and filtration, describing propagation of plane wave 24 p4230 A66-42219
Generalized solution to linear second-order parabolic equation showing that first boundary value problem has unique solution, obtaining estimates of Holder norms of solutions 24 p4231 A66-42233

PARABOLIC FLIGHT

Barany hypothesis tested to clarify mechanism of caloric nystagmus by use of zero gravity environment 17 p2857 A66-32168

PARABOLIC REFLECTOR

Manned automatic spaceborne structural assembly systems considering sectionalizing, fasteners and kinematics for antenna reflectors, solar concentrators, reentry bodies, etc 01 p0078 A66-10813
[SAE PAPER 650787]
Path-loss equation derived for two parabolic antennas with aperture illumination of form of second-order exponential function 03 p0336 A66-13101
Wind forces and moments on parabolic antennas supported above ground 04 p0495 A66-13803
Design and electrical properties of 25-meter Cassegrainian antenna installed at Raising ground station for radio communications via satellites 08 p1190 A66-18681
Cross-polarization radiation of axisymmetric

mirror antennas 09 p1353 A66-20448
Circular horn radiators with annular seal connections to antenna for simultaneous transmission of dual waves decoupled by polarization 09 p1354 A66-20493
Mechanical interpretation of problem of passage of light through curved light conductor 09 p1387 A66-20790
High accuracy nonspherical reflectors fabricated for millimeter and submillimeter wavelength region 10 p1540 A66-21865
Radiating mechanisms in reflector antenna system including aperture radiation, direct feed radiation and diffracted radiation 11 p1673 A66-23481
Fresnel and Fraunhofer patterns of overmoded feeds and reflector antennas 12 p1841 A66-24632
Ground-based steerable paraboloid spherical reflector and multiplate type antennas, noting cost per unit area for unit wind speed of 30 mph and frequency of 1400 mc, performance, restrictions, etc [AIAA PAPER 66-324] 12 p1844 A66-24794
Radiotelescope of 40-sec-of-arc resolving power, composed of compound interferometers with small antennas 13 p2058 A66-25569
Fabrication of solar concentrator, investigating plastic film reflector shaping and rigidization, using urethane foam [AIAA PAPER 64-733] 13 p2005 A66-26632
Measurements of positions of 22 radio sources by one-mile radio telescope in England, using three parabolic reflectors 14 p2384 A66-27845
Ground clutter shields for L-band radar using 60-ft parabolic reflector with Cassegrain geometry 15 p2457 A66-28596
Comparative merits and design features of millimeter wave antennas used as parabolic reflectors, Cassegrain systems and lenses 15 p2462 A66-29021
Dual polarized high-power synthetic conical scan tracking system at various frequency ranges for parabolic reflector used in communication link 16 p2650 A66-30552
Design and testing of cross polarized feed for 10 ft diameter parabolic dish, noting coincidence of focal and aperture plane 16 p2666 A66-31565
Horn radiators with high attenuation capabilities, noting design features, application to parabolic antennas, etc 17 p2894 A66-32989
Rear feeds for paraboloidal reflectors 18 p3075 A66-33618
High precision 85-ft paraboloidal reflector radio telescope, U.S. Naval Research Laboratory, Maryland Point Observatory 18 p3094 A66-34052
Large steerable antennas in control systems, emphasizing antennas using paraboloidal reflectors 18 p3081 A66-34267
Structural vibration of large microwave steerable radio telescopes and large paraboloidal reflectors due to wind loading 18 p3255 A66-34268
Feeding paraboloidal reflectors by stacked horns, using 45 degree polarization and double stacking of horns 18 p3081 A66-34270
Vertically-fed steerable parabolic reflector system for communications satellite Earth station 18 p3081 A66-34271
Antenna design techniques, describing methods of improvement in resolution and sensitivity of radio telescopes 18 p3081 A66-34272
Accuracy limitations in control and construction of large steerable paraboloid antennas 18 p3081 A66-34273
Optical system for measurement of aerial profile accuracy of large parabolic reflector noting design principles, instrument composition and experimental results 18 p3113 A66-34276
Electronic compensation for phase errors in surface profile of reflecting antennas 18 p3081 A66-34277
Steerable parabolic reflector performance characteristics noting gain, noise pattern, polarization and pointing system performance 18 p3082 A66-34280
Steerable parabolic reflector/Haystack antenna/mechanical design, discussing structural properties, test program and operation 18 p3255 A66-34281
Conical beam scanning by nutating

subreflector in Cassegrain antenna system, showing most favorable motion pattern from point of view of electrical performance 18 p3082 A66-34282

Shadow and diffraction effect of spars on Cassegrain antenna system gain performance 18 p3082 A66-34283

Approximate theory for estimating effect of manufacturing tolerances on deep parabolic reflector performance 18 p3082 A66-34284

Tolerance theory for parabolic reflector antenna, noting gain and radiation-pattern distortion 18 p3082 A66-34285

Feed system design for radio telescope emphasizing microwave performance, noting gain, efficiency, resolution, application, etc 18 p3082 A66-34287

Cost and performance factors of steerable parabolic reflectors, spherical reflectors and multiplate antennas 18 p3268 A66-34288

Optimum shape of feed patterns for paraboloidal antennas 18 p3083 A66-34293

Reflector surface measurement technique for parabolic antenna with paraboloidal axis at zenith distances 18 p3083 A66-34298

Feed horn for large parabolic reflectors has low spillover, nearly uniform aperture illumination, equal F and H plane patterns and wide frequency bandwidth 18 p3084 A66-34302

Design specifications for fully steerable radio telescope with 80 m parabolic opening 18 p3084 A66-34305

Design specifications of radome protected fully-steerable parabolic reflector antenna of 25 m diameter 18 p3084 A66-34306

Improved feed synthesis using multimodes for large circular paraboloids at Parkes 18 p3084 A66-34310

Reduced gain and increased sidelobes caused by errors in surface of parabolic reflector 18 p3085 A66-34311

Reflector surface and feed-support structure for center-fed paraboloidal aerial system for satellite communication 18 p3085 A66-34315

Primary feed for center-fed paraboloidal aerial system for satellite-communication Earth station 18 p3086 A66-34323

Millimeter wavelength parabolic reflector with Cassegrain feed system 18 p3095 A66-34325

Large steerable antenna and microwave problems in designing 18 p3086 A66-34329

Amplitude-comparison tracking antenna utilizing parabolic reflector, determining parameters from radiation patterns 18 p3086 A66-34396

Multipurpose feed system for large paraboloid antennas operable in S band 19 p3316 A66-35685

Ultralow-noise planetary radar receiving system with high-performance feed and maser preamplifiers, noting aperture utilization 19 p3301 A66-35690

Space modular assembly of paraboloidal antenna having rigid truss frame structure 19 p3363 A66-35954

Radio astronomy instrumentation, describing antenna parameters, design characteristics, instrumentation needs, etc 20 p3524 A66-36962

Soviet RT-15 radio telescope control system, noting two-reflector system telescope antennas, parabolic mainreflector and automatic and visual tracking possibilities 20 p3540 A66-37026

Large aperture antennas, noting limitations of apertures due to wave propagation characteristics, mechanical problems and optimum gain 20 p3530 A66-37714

Gain, efficiency, directivity and application of reflectors, considering use of passive repeaters for increased transmission efficiency 20 p3516 A66-37715

Microwave antenna design elements, feed equipment and performance characteristics 20 p3530 A66-37716

Radio astronomy antenna theory, discussing antenna resolution, brightness distribution of celestial bodies, interferometer patterns, actual antennas, etc 20 p3530 A66-37721

Effect of inaccurate orientation of paraboloid of mirror-type solar power unit on collecting efficiency under static conditions 20 p3502 A66-37736

Parabolic reflector design modified to

reduce temperature noise level by increasing diameter and extending cylindrical mantle around antenna rim 21 p3714 A66-39513

Mechanical interpretation of problem of passage of light through curved light conductor 22 p3931 A66-39849

Military air-transportable satellite communications terminal design, noting parabolic antenna and amplifier 22 p3896 A66-40712

Solar concentrator technology, discussing design requirements of space power conversion devices and manufacturing methods 23 p4021 A66-41757

Clutter shield for L-band monopulse radar employing Cassegrain parabolic reflector 24 p4173 A66-42620

PARABOLIC VELOCITY

MHD flow with parabolic velocity at entrance region of flat channel 18 p3149 A66-34915

PARABOLOIDAL MIRROR

Radio telescope with solid-surface paraboloid reflector of 140 ft diam 02 p0231 A66-11865

PARACHUTE

SA DROGUE PARACHUTE

SA RECOVERY PARACHUTE

SA RIBBON PARACHUTE

Pressure distribution and heat transfer for flow over simulated cylindrical parachutes [ASME PAPER 64-WA/HT-7] 04 p0457 A66-13394

Wind tunnel study of supersonic guide surface parachute considering shock waves, pressure distribution and mass flow 04 p0457 A66-13528

Spacecraft landing systems, examining laboratory and full-size studies with steerable parachutes 04 p0584 A66-13529

Multistage parachute recovery systems used for aerial delivery systems, escape from aircraft and recovery of spacecraft [AIAA PAPER 66-25] 06 p0960 A66-17107

Parachute operation at high Mach numbers and dynamic pressures for reentry vehicle deceleration [AIAA PAPER 66-24] 07 p0989 A66-17888

Soft landing problems for unmanned Mars entry, noting parachute system, descent time, sensing system constraints, extreme wind environment, etc 13 p2190 A66-25244

Shock waves, pressure distribution and mass flow effects on supersonic guide surface parachute 13 p1994 A66-25589

Northrop Cloverleaf steerable parachute combined with horizontal thrust rocket engine in descent system for manned Mars landing vehicles [AIAA PAPER 65-385] 16 p2810 A66-30904

Parachute and cushion landing system for specific payload geometry for touchdown with gliding descent, considering minimum weight design 19 p3278 A66-35626

Aerodynamic deceleration systems - AIAA Conference, Houston, September 1966 22 p3848 A66-40589

Aerodynamic problem of steady potential flow and added mass in unsteady motion of idealized hemispherical parachute 22 p3845 A66-40591

Three-dimensional parachute dynamic stability theory 22 p3845 A66-40593

Shock wave instability and mass flow accommodation for ribbon-type parachutes, noting canopy porosity and free stream Mach number 22 p3845 A66-40594

Limiting initial deceleration forces generated by supersonic decelerators, noting that decelerators deployed in wake region of body result in divergent wake and drag force reduction 22 p3845 A66-40595

Load prediction method necessitated by minimum weight and volume requirements for spacecraft recovery system, considering nonuniform opening of parachutes in cluster 22 p3849 A66-40596

Distribution of differential pressure on parachute canopies during inflation using pressure transducers and high speed photography, calculating stress distribution 22 p3846 A66-40600

High altitude parachute systems test techniques for analysis of inflation, stability variations, porosity, effects at low dynamic pressure, etc 22 p3849 A66-40602

Parachute stress analysis during inflation,

evaluating magnitude and distribution of snap stress to prevent canopy failure 22 p3850 A66-40604

Super-and hypersonic first-stage decelerators for stabilization and initial deceleration for final recovery device, noting Ballute and reefed ribbon canopy types, testing, fabrication, etc 22 p3850 A66-40606

Airdrop, delivery of personnel, supplies and equipment from aircraft in flight, increased effectiveness through new family of low-cost cargo parachutes, ballistically deployed reserve parachute and extraction-force transfer coupling 22 p3850 A66-40614

Locating general drop zone and desired impact point, identifying receiving unit and dropping supplies for aerial delivery systems 22 p3850 A66-40615

Parachutes and other devices for slowing body falling through air including Rogallo wing, ballute, ribbon parachute and vortexing parachute 24 p4160 A66-43197

PARACHUTE FABRIC

Air flow resistance and effective porosity of round wire parachute fabrics with varying wire thickness and mesh width 04 p0538 A66-13532

Stress calculation for recovery parachute fabric during inflation and steady state periods 09 p1330 A66-20743

Parachute for meteorological rockets, noting design, testing, high altitude performance, etc [AIAA PAPER 66-399] 12 p1802 A66-24514

Calculating method for parachute opening forces, system velocity, cloth pressure loading and filling time for horizontal and vertical deployment conditions 22 p3844 A66-40590

Filling process of solid cloth parachute canopies of flat circular and 10 percent extended skirt types operating under finite mass conditions 22 p3845 A66-40592

PARACHUTING

Filling or inflation process of flat circular solid-cloth type parachute canopy operating under finite mass conditions 04 p0457 A66-13530

PARAELECTRIC MATERIAL

Paraelectric as prospective materials for UHF amplifiers with very low noise level 06 p0854 A66-16727

PARAGLIDER

SA DORNIER PARAGLIDER ROCKET

Recoverable and reusable radio controlled sounding rocket equipped with deployable flexible wings attached to paraglider beams 24 p4284 A66-43071

PARALLAX

Astronomical and parallax refraction determined for satellites, elevated targets and meteors inside and outside atmosphere 03 p0429 A66-13199

Influence of parallax of near cosmic bodies on equatorial coordinates 14 p2388 A66-28339

Diagrams of computers calculating parallax angle of azimuthally mounted astronomical telescopes 24 p4211 A66-42484

PARALLEL PLATE

MHD flow analyzed in entrance region of parallel-plate channel 02 p0267 A66-11531

Modes existing in infinite parallel-plate waveguide with centrally placed unidirectional conducting screen 02 p0198 A66-11578

Interference between plane surfaces in supersonic gas flow between two rectangular parallelepipeds 02 p0220 A66-12180

Viscous dissipation effect on temperature profile in thermal entrance region between parallel plates, considering flow laminar and velocity profile developed 03 p0358 A66-13092

Monte Carlo method solution of heat transfer in rarefied gas between infinite flat plates 05 p0787 A66-14987

Finite and infinite H-plane bifurcation in parallel-plate waveguide filled with homogeneous anisotropic incompressible plasma 06 p0848 A66-16272

Azimuthal propagation in nonuniform concentric cylindrical waveguide with application to Earth-ionosphere waveguide 06 p0835 A66-16978

Variational principle application to heat conduction in solids, noting temperature dependence, physical meaning of Lagrangian heat flow between parallel plates,

- etc 12 p1975 A66-23542
- H-plane bifurcation of parallel plate waveguide filled with anisotropic plasma 15 p2457 A66-28597
- Multipactor effect in X-band waveguide slots, determining multipactoring occurrence and parallel plate role 15 p2464 A66-29043
- Shock wave excited by pulsed current flowing between two plane parallel electrodes in rarefied air 16 p2690 A66-31621
- Automatic control of spacing of Fabry-Perot interferometers to transmit at given wavelength 20 p3558 A66-37286
- Spherical coupler for fastening mirrors and plane-parallel plates at Brewster angle in gas laser 20 p3578 A66-37523
- Pressure distribution in laminar flow between parallel disks, noting inertia effects 21 p3729 A66-39439
- Slip flow in hydrodynamic entrance region of tube and parallel plate channel determined by solving linearized momentum equation 21 p3730 A66-39459
- Unsteady flow of two immiscible Maxwell fluids between two parallel plates when upper plate is given transient velocity and lower plate is fixed 21 p3731 A66-39605
- Schlieren photographs of plasma discharges in parallel plate rail tube, using pulsed ruby laser as light source 23 p4104 A66-41510

- Optical range parametric amplification, describing power output experiment with glass-laser-excited potassium dihydrogen phosphate crystal 09 p1387 A66-20893
- Balanced parametric amplifier with varactor diodes simultaneously self-resonant at both 16 and 35 gc 10 p1510 A66-21662
- Gc/s nitrogen-cooled nondegenerate parametric amplifier, noting design, application and operation characteristics 10 p1513 A66-21857
- Wide band solar radiospectrograph employing untuned parametric upconverter 11 p1704 A66-22552
- Field effect transistor application to linear amplifier and attenuator circuits 11 p1673 A66-23470
- Properties helping design of linear sampled data systems containing periodically time-varying components like parametric amplifiers 12 p1848 A66-24139
- Oscillating and amplifying characteristics of degenerate microwave amplifier using ferromagnetic yttrium iron

garnet 12 p1845 A66-24851
 Parametric amplifier design using transverse interaction and electrostatic focusing of electron beam 13 p2042 A66-26048
 Low temperature techniques in satellite communications systems, noting maser, cooled parametric amplifier and trend toward closed-cycle refrigerators 13 p2042 A66-26104
 Second harmonic generation of light analyzed, stressing saturation effects occurring at high laser power, solving nonlinear Maxwell equations 13 p2096 A66-26144
 Parametric oscillation in VHF transistor power amplifier which precipitates breakdown 14 p2248 A66-27046
 Laser detection of coherent light and superheterodyne and nonlinear parametric studies in optical spectrum 14 p2309 A66-27821
 Parametric amplification in millimeter-wave range, detailing parametric amplifier with germanium epitaxial diodes for use in radiometers 14 p2260 A66-28296
 Parametric amplifiers and lasers 14 p2310 A66-28358
 HF transistor circuit design, noting effect of bias frequency and temperature on y and h parameters 14 p2261 A66-28369
 Parametric amplification with resonator consisting of superconducting films on mica substrates, noting vortex movement 15 p2463 A66-29030
 Noise figure and bandwidth of superregenerative parametric amplifier 15 p2463 A66-29040
 Bandwidth of nonoverdriven abrupt-junction varactor-frequency doubler, deriving upper bounds for minimum constant T for lossless case 15 p2465 A66-29323
 Minimum noise temperature of parametric amplifier depends on varactor junction capacitance, spreading resistance and temperature 15 p2465 A66-29673
 Gallium arsenide varactor diode design for parametric amplifiers and multipliers, noting efficient harmonic generation at higher microwave frequency 15 p2466 A66-29677
 Modulation type radiometer with input parametric converter used for observation of weak radiation from Moon, Jupiter and other celestial sources 15 p2503 A66-29695
 Parametric amplification in selective RC-circuit depends on pumping amplitude and phase shift between input-signal voltage and pumping voltage 15 p2475 A66-29930
 Active network synthesis, discussing parametric amplifiers and transistor circuits, noting gain and phase stability 16 p2668 A66-30519
 Receiver of ionospheric diffusion probe noting radio telescope, low noise parametric amplifier, filters, signal detection, etc 16 p2662 A66-30957
 Pump modulation factor of various GaAs and Si varactor diodes under operating conditions, noting experimental bandwidth gain via increased shot noise 16 p2663 A66-31017
 Steady state circuit analysis of basic linear parametric amplifier using successive approximation 17 p2880 A66-32058
 Parametric amplification by monochromatic pumping of electromagnetic oscillations of substance contained in resonator 17 p2885 A66-32244
 Parametric oscillator threshold with single mode optical masers and observation of amplification in lithium niobate 17 p2935 A66-32716
 Low temperature silicon variable capacitance diodes for use in low noise S-band parametric amplifier 17 p2890 A66-32903
 Multiport linear networks in which pumped variable capacitances shunt and interconnect several ports, exemplifying with varactor parametric amplifier, impedance transformer, coupler, etc 17 p2890 A66-32907
 Varactor diode parametric amplifiers compared for various applications in satellite communication ground stations including FM reception, tracking and radio noise reception 17 p2890 A66-32908
 Simple diode parametric amplifier, discussing bandwidth and noise

measurements, compensating circuits for gain-frequency response 17 p2892 A66-32917
 Parametric and tunnel diode amplifiers for radio astronomy, noting diode quality, operating frequency range, noise, temperatures, etc 17 p2892 A66-32918
 Parametric amplifier based on two-port circuit, employing idler frequency equal to difference between pump and signal frequency, noting negative resistance 18 p3086 A66-34391
 Measurement of varactor diode characteristics for subsequent application in microwave low-noise parametric amplifiers 19 p3313 A66-35471
 Self-mixing regime and self-modulation in parametric generator, considering nonlinear capacitance and conductivity of diode 19 p3314 A66-35542
 Electron interaction with quadrupole pumping field, noting phase-focusing character in quadrupole region and determination of amplifier effect 19 p3314 A66-35544
 Capacitive biasing transducer is electromechanical analog of parametric system 19 p3356 A66-35557
 Parametric amplifier design curves to calculate gain-bandwidth product, noise temperature, pump frequency and idler loading for one-and two-port amplifiers 19 p3319 A66-36031
 Variable characteristics of receiver for noise signals with semiconductor regenerative parametric amplifier /SRPA/ determined for fixed SRPA instability levels 20 p3532 A66-37868
 Iterative parametric circuit, examining equivalent circuit representation, quaternion form representation of parameters, generalized Floquet theorem, etc 21 p3718 A66-38744
 Parametric amplification at collector-base diode for microalloy graded-base transistor and normal mixing due to resistive nonlinearity at emitter 22 p3872 A66-39735
 Barium titanate rods as nonlinear element of S-band resonant cavity microwave parametric amplifier, noting variation of permittivity of rods with percentage of barium titanate 22 p3872 A66-39736
 Effect of signal frequency maladjustment and automatic phase control circuit parameters on amplitude and phase shift of reflex amplifier, analyzing filtering properties 22 p3875 A66-40071
 Amplification processes in parametrically regenerated circuit with simultaneous complex variation of capacitance and attenuation 23 p4038 A66-41517
 Unidirectional semiconductor-diode parametric amplifier and mixer, emphasizing power transfer and low noise characteristics 23 p4048 A66-41856
 Parametric amplification in beam-plasma system and generation of stationary waves 24 p4258 A66-43004

PARAMETRIC DIODE

SA VARACTOR DIODE

Microwave absorption, series resistance and capacitance of silicon-mesa parametric diode calculated in terms of parent resistivity, geometry and diffusion 03 p0344 A66-13015
 UHF quarter-wave frequency divider with parametric diode placed transversely in rectangular waveguide 06 p0839 A66-15902
 Parametric mixing action resulting from pumping emitter capacitance in transistors 09 p1355 A66-20601
 Experimental evidence of parametric mixing action at collector base diode of UHF transistor operating as common base amplifier 09 p1355 A66-20602
 Additive phase noise measurement in step-recovery-diode in frequency multiplier compared to ideal 12 p1835 A66-24141
 Power level of varactor diodes, noting problems of standing wave ratio measurement and application of reciprocity and mixing principle 24 p4185 A66-42893
 PARAMETRIC FREQUENCY CONVERTER
 Parallel combinations of nonlinear resistive reactive elements for unilateralization and widebanding of parametric admittance frequency converter 05 p0651 A66-14572

Linear phased array receiving system using parametric upconverter for low noise with gain 06 p0849 A66-16395
 Rate error of frequency parametric transducer 07 p1013 A66-17389

PARAMETRIC OSCILLATOR

Microwave power by parametric frequency multiplication in transistors, noting equivalent circuits 05 p0644 A66-14577
 Automatic relay systems, describing self-oscillation induced parameter variation 06 p0863 A66-16530
 Oscillations in two-circuit parametric oscillator operating on fixed-bias p-n junction 06 p0860 A66-17194
 Parametric resonance excitation of plasma oscillation 08 p1262 A66-19013
 Phase switching of two-circuit parametric oscillator operating as three-position trigger 11 p1666 A66-22721
 Equations of motion governing interaction of optical modes in presence of time-varying parameters 12 p1890 A66-24559
 Parametric oscillator theory applied to tunable coherent optical parametric oscillation in lithium niobate 13 p2096 A66-26145
 Oscillations of cylindrical orthotropic three-layer shell having ideal fluid flow at variable rate, establishing parametric resonance and determining limits of shell motion instability regions 13 p2206 A66-26461
 Binary pulses in microwave band regenerated, using pulse regenerator with hysteresis characteristic of parametric oscillator employing variable capacitor diode 14 p2248 A66-27059
 Composite parametric excitation in balanced circuit at frequency equal to half-sum of frequencies of two applied forces 15 p2469 A66-28675
 Parametric oscillations of cylindrical shell filled with liquid of variable depth 15 p2607 A66-28768
 Hooke law analysis of dynamic stability of closed circular cylindrical anisotropic shell compressed by longitudinal force 15 p2609 A66-29196
 Forced aperiodic vibrations in idealized viscously damped system, subjected to parametric excitation by forcing function with uniformly accelerating frequency and constant displacement 16 p2678 A66-30460
 Parametric oscillator threshold with single mode optical masers and observation of amplification in lithium niobate 17 p2935 A66-32716
 Resonant circuit behavior of Gunn diode, considering device as self-pumped parametric oscillator 18 p3078 A66-34086
 Oscillations in two-circuit parametric oscillation operating on fixed-bias p-n junction 19 p3315 A66-35552
 Phase switching of two-circuit parametric oscillator operating as three-position trigger 23 p4045 A66-41459
 Asymmetrical nonlinear oscillations of control systems analyzed by parameter plane method, considering systems with reference-perturbing and slow-varying input signals 23 p4050 A66-41610
 Nonlinear optics emphasizing parametric oscillation, self-focusing and trapping of laser beams and stimulated Raman, Rayleigh and Brillouin scattering, using Maxwell equations and electric dipole approximation 24 p4225 A66-42810
 PARAMETRON
 Balanced and ordinary inductive-parametron circuit 09 p1353 A66-20445
 Emf amplitude and phase for pumping and resonant circuit current calculated for inductive parametron 14 p2252 A66-27251
 PARKING ORBIT
 Electric propulsion for transfer mission between parking orbits in cislunar space under optimum payload conditions 17 p2992 A66-33238
 PAROTID
 Parotid fluid collection technic for determining in-flight biochemical responses for 17-OHCS levels 22 p3854 A66-39791

Existence of explicit stable difference scheme in correct Cauchy problem for linear systems of partial differential equations with constant coefficients 01 p0094 A66-10654

Existence and formal uniqueness theorem of partial linear differential equations with Cauchy conditions on characteristic multiple hyperplane 01 p0095 A66-11075

Reduction of quasi-linear partial differential equations to single linear heat equation 02 p0251 A66-12157

Extension of Calderon paper on global existence and uniqueness theorems for solutions of system of partial differential equations to same double characteristics 02 p0251 A66-12230

Proof of boundary regularity connected with inhomogeneous systems of partial differential equations leading to elliptic boundary value problems 02 p0251 A66-12231

Monograph on boundary problems for linear parabolic systems with complex coefficients 03-p0386 A66-12456

Explicit lower bounds for lowest eigenvalue of nonhomogeneous membrane with fixed boundary, using Payne-Weinberger method 03 p0435 A66-12613

Conditions of integrability for certain normal systems of equations with partial derivatives 04 p0538 A66-13469

Optimal control problems in Banach spaces, discussing extension to infinite dimensions and application to distributed parameter systems 04 p0506 A66-13998

Structure of solutions of chain of equations for deriving Boltzmann kinetic equation of gases 05 p0663 A66-15344

Cauchy problem for first-order nonlinear equation 05 p0709 A66-15360

Identification of distributed parameter systems by partial differential equations [ASME PAPER 65-WA/AUT-1] 05 p0710 A66-15702

First order nonlinear partial differential equation discussing global locally-Lipschitzian solutions via Jacoby theorem extension 06 p0901 A66-16006

Rotating orbiting cables, determining lateral vibration in orbital plane via mathematical model analysis [AIAA PAPER 66-98] 06 p0962 A66-16264

Stress and strain analysis of sandwich plates, formulating and solving problem of bending for transversally isotropic layers and light core 06 p0964 A66-16477

Optimal control, discussing fundamental general necessary conditions for Mayer problem solution 06 p0864 A66-16623

Solution of boundary value problems for partial differential equations 06 p0903 A66-16903

Optimal control of distributed parameter systems governed by systems of linear partial differential equations 06 p0866 A66-16964

Convergence of nonlinear problem solutions with respect to higher derivatives 07 p1057 A66-17853

Group properties of PDE system for one-dimensional gas flows with plane waves, using external Cartan forms 07 p1019 A66-17859

Partial differential equations for conditional Markov process distribution for noisy observations 07 p1059 A66-17968

Boundary layer equation transformation, using special curvilinear coordinates 08 p1206 A66-18872

Optimum processes in systems with distributed parameters described by partial differential equations 08 p1202 A66-19710

Green function-eigenvalue relationship on closed smooth boundary of open dimensional region 09 p1394 A66-20265

Perturbation technique solution for MHD flow in closed regions with symmetric flow properties and axial boundary conditions 10 p1563 A66-21543

Partial differential equation solved by integral transform under prescribed boundary conditions 10 p1550 A66-21914

Optimum gliding regime using Krotov generalized theory and linear partial differential equations 11 p1732 A66-22354

Elastic strip and elastic annulus

differential-difference equations, using Fourier transforms and analytic continuation 11 p1780 A66-22439

Algorithm for computer eigenfunction solution of boundary value problem involving partial differential equations for stress functions of semimomentless cylindrical shells 11 p1782 A66-22856

Modified Ellissen finite difference grid solution of primitive hydrostatic equations system for barotropic and baroclinic model of atmosphere 11 p1730 A66-22946

Convergence of solutions of finite-difference analogs of equation satisfied by generalized axially symmetric potential 11 p1723 A66-22986

Variational extremal principles for continuum systems, analyzing various approaches to boundary layer flow 12 p1975 A66-23544

Numerical solutions of problems in gas dynamics in U.S.S.R., using computers stressing methods for solving systems of nonlinear partial differential equations 12 p1861 A66-23807

Existence of explicit stable difference scheme in correct Cauchy problem for linear systems of partial differential equations with constant coefficients 12 p1903 A66-24023

Supersonic flow around blunt body calculated via integral relations, using simultaneous approximation function in two directions 12 p1797 A66-24208

Hydrodynamic equation for ideal compressible fluid in case of steady three-dimensional vortex motion solved via two second order PDEs 12 p1865 A66-24867

MHD gyroscope with axial magnetic field, plotting design parameters, estimating performance, etc 13 p2078 A66-25513

Two-fluid approach for solutions to hydromagnetic waves including pressure, viscosity, heat conduction, etc, using partial differential equations 13 p2146 A66-25741

Stress state of weakly curved cylindrical shell analyzed, finding biharmonic function from given boundary value of partial derivatives 13 p2197 A66-25853

Integral relations method to reduce by approximation PDEs to ODEs or to algebraic or transcendental equations 13 p2119 A66-25854

Goursat problem for hyperbolic systems of two first-order equations solved by integral relation method 13 p2119 A66-25855

Second-order elliptical operator for m-dimensional Euclidian space with open region bounded by closed surface 13 p2120 A66-26010

Axisymmetric wave propagation in elastic body-conducting fluid system, noting parameters of motion expressed in PDE 13 p2150 A66-26427

Cauchy problem of first-order nonlinear partial differential equations 13 p2121 A66-26503

Maximum property of Cauchy problem for wave operator 14 p2320 A66-26941

Stresses and displacements in circular cylinder of transversely isotropic material for mixed boundary conditions, obtaining solution by using partial differential equation 14 p2397 A66-27388

Direct numerical solution by method of characteristics for hyperbolic partial differential equation of Timoshenko beam under moving force 14 p2398 A66-27423

Similar solutions of partial differential flow equations for cylindrical blast uniform flow shock wave and determination of blast wave velocity 14 p2344 A66-27633

Separation of variable technique to solve partial differential equations for vibration of cable containing turnbuckle 14 p2399 A66-27660

Numerical solution of partial differential equation for convection of scalar or vector 14 p2323 A66-27780

Solution of stochastic differential equation with Markov coefficients by reduction to nonrandom PDE of Fokker-Planck type 14 p2324 A66-27932

Differential equation for lubrication layer pressure in gas lubrication of sliding bearings at large transverse temperature drops 15 p2505 A66-28524

Nonlinear system of partial differential equations describing one-dimensional

combustion process of gas mixture 15 p2616 A66-28961

Unique absolutely continuous extensions of strict solutions to first-order nonlinear partial differential equations, satisfying these equations at almost all points of half-space 15 p2527 A66-29060

Multiple characteristics of square systems of linear partial differential equations with constant coefficients, obtaining formal series solutions for systems 15 p2527 A66-29061

Uniqueness, existence and stability of solutions to polylvibrant systems with delayed remainder and arguments 15 p2528 A66-29652

Structure of solutions of chain of equations for deriving Boltzmann kinetic equation of gases 15 p2582 A66-29972

PDE of terminal shape of ablating body as function of time derived, noting mass and energy flow, boundary layer thickness, etc 16 p2628 A66-30219

Numerical solution of partial differential equations - Symposium, University of Maryland, May 1965 16 p2731 A66-30233

Finite difference method for elliptic systems of partial differential equations subjected to natural boundary conditions /generalized Neumann problems/ 16 p2731 A66-30234

Error bounds based on a priori inequalities for solutions of boundary value problems for linear elliptic partial differential equations 16 p2731 A66-30236

Unstable behavior of nonlinear discretization algorithms when perturbation of computation exceeded threshold value 16 p2731 A66-30237

A posteriori error bounds in iterative matrix inversion 16 p2732 A66-30238

Intermediate problems for eigenvalues involving self-adjoint differential operator 16 p2732 A66-30239

Riemann-Hilbert boundary value problem for elliptic systems of linear partial differential equations of first order 16 p2733 A66-30651

Necessary and sufficient condition for growth of solution to second order PDE with delayed arguments 16 p2733 A66-30742

Singular hyperbolic-parabolic problem relative to partial differential equation of second mixed type 16 p2737 A66-31041

Transformation equivalency of various forms of partial differential equations of motion of nonholonomic systems 16 p2747 A66-31144

Existence, uniqueness and continuous initial function-dependence theorems and asymptotic nature of solutions for stochastic differential equations with constant delay 16 p2737 A66-31406

Partial differential equation solution, using small parameter method for electron hole transition 16 p2784 A66-31553

Axiomatic theory of Dirichlet problem applicable to nonlinear PDEs and to systems of PDEs 16 p2738 A66-31704

Floating random walk and use in Monte Carlo solutions to partial differential equation of heat conduction 16 p2739 A66-31720

Unified treatment of nonlinear partial differential equations, considering solution technique in engineering application 16 p2739 A66-31740

Metal behavior during hypervelocity cratering, noting momentum and energy equations for impulsive loading, including anisotropic stress and strain rate tensors, etc 17 p3022 A66-32013

Heat transfer problems solved, using Pohlhausen solution for phase-space trajectory, noting effect of boundary conditions and application of analog computer 17 p3034 A66-32497

Method of characteristics computer code applied to partial differential equations of inviscid fluid, calculating flow fields [AIAA PAPER 66-412] 18 p3097 A66-33637

Partial differential equations for three-dimensional inviscid flow solved for flow field over blunt body shapes at various angles of attack, for application to Apollo spacecraft [AIAA PAPER 66-413] 18 p3045 A66-33638

Partial differential equation describing transient conduction in multidimensional

inhomogeneous media solved by method based on use of known boundary conditions 18 p3262 A66-34380

Boundary value problem of Stokes equations proving branching for flow between two rotating concentric cylinders and nonexistence of singular flow 18 p3101 A66-34659

Mixed initial boundary value problem for wave equation in three space dimensions, proving existence of generalized solution 18 p3128 A66-34662

Extension of Vlasov bending theory for thin shells to include shells with undamped solutions, obtaining partial differential equations for normal deflection and stress function 19 p3472 A66-35466

Pointwise bounds for solutions to Cauchy problem for elliptic systems of partial differential equations, using extension of Payne and Trytten results 19 p3388 A66-35487

Partial differential solutions related to concave and quadratic nonlinear programming problems over Euclidean N-space 19 p3308 A66-35870

Solution of mixed boundary and Cauchy problem for system of PDE 19 p3389 A66-35933

Dynamic system parameters substituting integral equation for differential equation of motion, noting application to nonlinear, differential and PDE systems 19 p3325 A66-35987

Sensitivity analysis and Liapunov stability, discussing correctly set problem and parametric imbedding within theory of partial differential equations 19 p3326 A66-36010

Optimum thrust nozzle contours for chemically reacting gas flows, obtaining set of partial differential equations for gas dynamic properties [AIAA PAPER 66-638] 19 p3277 A66-36599

Linear continuous time stochastic optimal control process, obtaining optimum performance achievable as function of total effort at initiation of optimization period 19 p3335 A66-36694

Stability problems in randomly excited dynamic systems, discussing partial differential equations governing evolution of conditional probabilities and expectations 19 p3471 A66-36718

Weierstrass necessary condition and basic equations for optimal control of initial or boundary states of continuum mechanical MHD and hypersonic partial differential systems 20 p3535 A66-36853

Asymptotic behavior of solutions to boundary value and initial problems for ODE with small parameter, using functions of power law boundary layer 20 p3590 A66-37109

Approximate method of integrating linearized equation for laminar boundary layer to establish relations of velocity distribution with friction stress 20 p3546 A66-37679

Modified Eliassen finite difference grid solution of primitive hydrostatic equations system for barotropic and baroclinic model of atmosphere 20 p3593 A66-37859

Elementary effects method solution of fourth-order PDEs for bending and vibration of elastic plates 20 p3671 A66-37989

Linear elliptic partial differential systems, eigenvalue and boundary value problems - Johns Hopkins University, Lectures, March-May 1965 21 p3754 A66-38457

Well-posed BVP for linear partial differential system and relation of weak solution with two Banach spaces 21 p3754 A66-38458

Sufficient conditions for equilibrium stability of mixed distributed and lumped parameter feedback control system in parabolic PDE form 21 p3718 A66-38666

Eigenvalue problems with monotonic operators and error estimation for operator equations with continuous homogeneous operators in semiordered normalized vector space 21 p3757 A66-38942

Synthesis of optimal Liapunov-Bellman function, noting sequential solution method for independent variables and method using first-order partial differential equation 21 p3758 A66-39281

Difference approximations to PDEs of fluid

dynamics used to determine necessary condition for stability, examining advective, diffusive and inertial terms 21 p3730 A66-39471

Book on boundary value problems and partial differential equations for electric circuits and other engineering problems 22 p3938 A66-39703

Reissner-Uflyand-Mindlin PDEs for circular ring flexural vibrations under transverse shear and rotary inertia 22 p3992 A66-40297

Hydrodynamic equation for ideal compressible fluid in case of steady three-dimensional vortex motion solved via two second order PDEs 22 p3899 A66-40328

Compressible turbulent boundary layer on flat plate, noting correspondence between compressible and incompressible flow, numerical results on skin friction and heat transfer, etc 22 p3899 A66-40344

Cauchy problem of first-order nonlinear partial differential equations 22 p3939 A66-40439

Supersonic flow around blunt body calculated via integral relations, using simultaneous approximation function in two directions 22 p3844 A66-40572

Approximate solution of PDE for heat transfer in uniform-property universal turbulent boundary layer 22 p4001 A66-40923

Reduction of PDE system of heat transfer, using Hermitian approximating polynomials to obtain solution to initial system 23 p4041 A66-40971

Geometrical properties of partial differential equations with independent variables, using Cartan method 23 p4084 A66-41061

Heat transfer through turbulent boundary layer, using velocity and temperature profiles as phenomenological relations 23 p4147 A66-41120

Parameters of dynamic systems described by PDEs determined by replacing PDE with integral equation and eliminating via recursion process terms resulting from initial and boundary conditions 23 p4084 A66-41396

Optimization of nonlinear control systems by means of Bellman equation and dimensional analysis minimizing integral square error 23 p4051 A66-41695

Parametric method in laminar boundary layer theory, noting reduction of equations for incompressible fluid 23 p4059 A66-42008

Partly invariant solutions of equations admitting Lie group and application to gas dynamics 23 p4086 A66-42024

Series truncation applied to hypersonic flow problems by treating elliptic partial differential equation as parabolic or hyperbolic 23 p4014 A66-42060

Vibrations of systems governed by nonlinear partial differential equations analyzed by perturbation method 24 p4236 A66-42267

Longitudinal and torsional plastic wave propagation in thin walled tube, governed by four quasi-linear symmetric hyperbolic PDEs of first order with two distinct wave speeds 24 p4288 A66-42277

Hilbert parametric method of solving linear BVPs for second-order elliptic PDEs, using Green functions 24 p4232 A66-42740

Linear second-order partial differential equations of elliptic type analyzed, using maximum principle and barrier functions 24 p4233 A66-43065

PARTIAL PRESSURE

Vacuum technique application to space research, discussing partial pressure measurements, space simulation procedures and rarefied gas flow 20 p3544 A66-38089

Continuous in vivo recording of partial pressure of arterial carbon dioxide and oxygen by mass spectrography 21 p3701 A66-39494

Mutual conversion of direct and inverse problems of light scattering by soft-particle system, noting transparency data determining particle spectrum 10 p1553 A66-22029

Mutual conversion of direct and inverse problems of light scattering by soft-particle system, noting transparency data determining particle spectrum 16 p2747 A66-30848

Differential spectra of charge components of primary cosmic ray heavy nuclei at different solar modulation levels and effects of interstellar propagation 18 p3191 A66-34839

Barometric effect and density spectrum of photon-initiated EAS muons 18 p3208 A66-35115

EAS mu component fluctuations in density distribution and reception spectrum recorded, using hodograph detectors 18 p3208 A66-35116

Altitude variation of EAS particle density and primary energy/nucleon spectra measured with proportional counters 18 p3210 A66-35125

Spectrum of nuclear active component of cosmic rays determined by nuclear calorimeter 18 p3217 A66-35171

Broken symmetry densities within current algebra arising in magnetic moment ratio, renormalization constants and unitary symmetry correction 20 p3606 A66-38293

Particle spectrum determination by inversion of scattering data for high concentrations of sol 21 p3760 A66-39364

PARTICLE ACCELERATION

Linear accelerations of particles in spherical electromagnetic fluctuating field 02 p0195 A66-11254

Transfer and acceleration of particles in Earth magnetosphere effect on origin of radiation belt 02 p0283 A66-12110

Charged particle motion in field of plane traveling wave and acceleration by transverse wave 03 p0397 A66-12387

Cosmic ray electromagnetic acceleration mechanism, calculating motion of charged relativistic particles in applied fields 05 p0753 A66-15388

Stochastic acceleration of charged particles in randomly time-varying electromagnetic fields 07 p1084 A66-18426

Turbulent condition in plasma beam with virtual cathode characterized by electric field oscillation spectrum, off-center plasma torch spinning into ion side and ion acceleration 08 p1264 A66-19270

Fermi acceleration of charged particles in shock transition region beyond magnetosphere 08 p1219 A66-19407

Earth radiation belts, summarizing present knowledge and noting as-yet-unknown particle acceleration mechanism 09 p1444 A66-21021

Ion propulsion by electrostatic acceleration of cesium ions subjected to transverse magnetic field, using negative space charge sheath [AIAA PAPER 66-256] 10 p1563 A66-21461

Charged particle motion in field of plane traveling wave and acceleration by transverse wave 13 p2139 A66-25392

Model of Fermi acceleration at shock front developed and applied to Earth bow shock 13 p2184 A66-25620

Phase stability of system of particles in cyclic accelerator with automatic frequency correction of accelerating field, noting kinetic equation method 13 p2147 A66-25748

Plasma as energy source for thermoelectric and electromagnetic propulsion systems 13 p2173 A66-26579

Charge particle acceleration through electron absorption of bremsstrahlung photons 14 p2375 A66-27259

Transfer and acceleration of particles in Earth magnetosphere effect on origin of radiation belt 14 p2377 A66-28069

Charged particle acceleration by coherent radiation 14 p2348 A66-28313

Temperatures, Lorentzian widths and drift

velocities of excited neutral and ionic species in argon-ion laser, noting thermal equilibrium achievement 15 p2512 A66-28695

Dynamic dissipation of magnetic field, examining mechanism by which magnetic energy is converted directly into fast particle energy 15 p2576 A66-29132

Radiation belt origin, examining acceleration of solar plasma electrons to energies of 30 to 100 kev by nonlinear waves called solitons 16 p2792 A66-30156

Proton data from rocket flight into break-up phase of IBC-I aurora, noting proton movement in atmosphere 16 p2794 A66-30701

Developments in study of high energy particles of 25 to 30 gev 16 p2795 A66-31268

Particle velocity in gas particle two-phase nozzle expansion using gas laser and Fabry-Perot interferometer for rocket engine propulsion [AIAA PAPER 66-522] 16 p2708 A66-31500

Increase of mean photon energies by mechanism related to Cerenkov plasmon-induced acceleration of charged particles 17 p2965 A66-32254

Particle velocity in detonating gases determined by MHD principle 17 p3035 A66-32634

Statistical particle acceleration in turbulent plasma 17 p2974 A66-33506

High energy electron acceleration detected in shock transition region of terrestrial magnetosphere, using Au-Si surface barrier solid state detector and IMP-I satellite mounted GM counter 18 p3177 A66-34753

Particle acceleration in neutral sheet of geomagnetic tail in two models and implications for auroral and solar activities 18 p3179 A66-34766

Cosmic ray intensity attenuation due to energy loss of particles passing through electric field in solar system 18 p3180 A66-34773

Plasma formation by fast atom injection into mirror magnetic field and well, showing effect of geometric transition on hydromagnetic drift and ion-cyclotron instability 19 p3421 A66-36541

Production of hot plasma by Penning discharge in inhomogeneous magnetic field accelerating ions to high energy level by strong electric field 19 p3431 A66-36592

Electron and ion acceleration by cosmic plasma waves, examining contribution of these processes to radiation belt formation 20 p3647 A66-37033

Acceleration of electrons in inner radiation belt by magnetic field variations over slope of geomagnetic anomaly in resonance with longitudinal drift frequencies of electrons 20 p3638 A66-38308

Charged particles and plasma in geomagnetic field, noting diffusion of trapped particles and acceleration by Fermi mechanism and wave acceleration 20 p3640 A66-38319

Magnetospheric models, discussing role of fast magnetospheric merging in connection with charged particle acceleration and magnetospheric configuration 20 p3641 A66-38330

Particle acceleration by plane wave along magnetic field increased by self-induced resonance, analyzing radiation effect on particle acceleration 21 p3782 A66-39017

Collisional excitation in Van de Graaff accelerator of beams of light elements producing light emission in 2700-6600 angstrom range 21 p3776 A66-39396

Pitch-angle dependence of first-order Fermi acceleration of particles trapped between shock front and moving magnetic mirror 21 p3776 A66-39564

Galactic radio sources noting disk model brightness distribution, relativistic particle energies, continuous particle acceleration and ratio between proton and electrical component of cosmic radiation 22 p3985 A66-40952

Macroscopic particle acceleration to meteoritic velocities by trapping and accelerating superconducting solenoid in front of magnetic traveling wave 24 p4237 A66-42401

SA MOLECULAR BEAM
SA NEUTRAL BEAM
SA PROTON BEAM

Interaction between Rayleigh waves in CdS-type piezoelectric crystal and charged particle beam traveling within crystal, system becoming unstable during wave resonance in beam 01 p0125 A66-10775

ELF emission from electron and proton beams injected into magnetospheric plasma 05 p0748 A66-15043

Instability of plasma with spatially inhomogeneous current at frequencies above ion-cyclotron frequency, noting electron charge convection and wave-particle interaction 06 p0914 A66-16141

Large transverse velocity components imparted to charged particles by passing particles through magnetic field prior to injection into trap 10 p1570 A66-22000

Interaction between Rayleigh waves in CdS-type piezoelectric crystal and charged particle beam traveling within crystal, system becoming unstable during wave resonance in beam 11 p1749 A66-22287

Fast-particle beam plasma probing of plasmoid interacting with axisymmetric magnetic field 13 p2152 A66-26516

Instability of plasma with spatially inhomogeneous current at frequencies above ion-cyclotron frequency, noting electron charge convection and wave-particle interaction 15 p2556 A66-29871

Large transverse velocity components imparted to charged particles by passing particles through magnetic field prior to injection into trap 18 p3151 A66-34977

Book on plasma diagnostics covering measuring devices and techniques, SHF antenna and waveguide system, emission measurements, etc 21 p3737 A66-38949

Nonlinear theory of parametric excitation applied to modulated wide beams of uniform

cross section, analyzing propagation in such beams of charge density oscillations 21 p3781 A66-39013

Plasma diagnostics method, measuring parameters of hydrogen plasma with beam of fast hydrogen atoms and ions 21 p3784 A66-39032

Plasmoids reflection from metallic surface, using fast particle beam-probing techniques 21 p3787 A66-39050

Intense beams of fast neutral hydrogen atoms injected into magnetic trap by ionization in strong magnetic field 21 p3789 A66-39060

Electron-ion beam interaction with confined plasma in strong magnetic field, noting ion-sound excitation 22 p3953 A66-39764

PARTICLE CHARGING

SA CHARGED PARTICLE

Design and operation of radioisotope-powered battery using direct beta-particle collection to negatively charge electrode, noting choice of isotope, dielectric, collector, etc 08 p1172 A66-19657

PARTICLE CLOUD

Ablation particulate dispersion in atmosphere estimation by calculating particle deposit concentration at Earth surface [AIAA PAPER 66-379] 12 p1951 A66-24504

Concentration distribution at Earth surface associated with precipitation of cloud of interacting particles forming dust source, due to turbulent scattering in time and space 13 p2122 A66-26248

Concentration distribution at Earth surface associated with precipitation of cloud of interacting particles forming dust source, due to turbulent scattering in time and space 22 p3942 A66-39710

PARTICLE COLLISION

SA MOLECULAR COLLISION

Tables of classical collision transport integrals for screened Coulomb potential 03 p0401 A66-12958

Kinetic energy in unstable and weakly stable plasma noting optical and acoustical modes in electron-ion system, Vlasov term in quasi-linear theory and two-particle correlation term 04 p0550 A66-13406

Energy function and conservation of inertial mass and three-momentum from relativity principle and conservation of energy in particle collisions 05 p0719 A66-15530

Instability of plasma supported under gravity by magnetic field, considering collisions between charged and neutral particles dominate over charged particle interaction 06 p0915 A66-16180

Precipitation formation considering collision efficiency of different-size droplets, noting influence of gravitational and electric fields, space charge, atmospheric turbulence, etc 06 p0905 A66-16269

Captured electron drift from trap with spatially periodic helical magnetic field, using time variable 06 p0919 A66-16879

Pi-meson momentum spectra, discussing production frequency and mechanism in hundred bev range 07 p1113 A66-17537

K meson and hyperon production cross sections, discussing primary energy dependence and upper limit determination 07 p1113 A66-17539

Collision effect on coupling of ion-acoustic waves to neutral acoustic waves at diffuse boundary consisting of partially ionized gas 07 p1088 A66-17955

Nonequilibrium radiative and collision ionization, photoionization and shock wave structure in high temperature hypervelocity low density gas 08 p1204 A66-18521

Wave propagation in magnetoplasmas noting momentum transfer, dispersion relations, temperature relaxation effects and collisional energy exchange 09 p1408 A66-20372

Charge transfer and charge rearrangement in atmospheric ion-neutral particle collisions 10 p1557 A66-21143

Projection operators applicable for rearrangement and exchange processes with full recoil effect for unified reaction theory of Feschbach 10 p1558 A66-21961

Kinetic equation for density matrix of discrete system undergoing relaxation in

presence of instantaneous collisions 10 p1622 A66-21988

Tensor component of dielectric permittivity of isothermal plasma derived from kinetic equation, accounting for effect of magnetic field on collision between particles 11 p1745 A66-22588

Four momentum transfer in high energy jet showers and resultant number of multifireballs 11 p1763 A66-22701

Two-center model evaluation of four momentum transfer in high energy jet showers, noting pion or boson exchange 11 p1763 A66-22702

Kinematic analysis of multiple pion production in high energy jet showers under asymmetric angular distribution 11 p1763 A66-22703

High energy cosmic ray jet showers noting energy, angular momentum, collision inelasticity, secondary meson distribution, etc 11 p1763 A66-22705

Moleculochron, stable molecular beam generator using pairs of resonators coupled by molecular beam 11 p1666 A66-22726

Model of high energy collision processes, based on terms of four-momentum transfer and spectra variation, used for calculation of atmospheric diffusion of heavy triplets produced by primary cosmic radiation 11 p1741 A66-23190

Lagrangian for particular collisional models in fluid dynamics, considering fluctuation theory relations and stability in presence of external field 12 p1918 A66-23552

Kinetic equation with collision frequency operator used to represent high-temperature plasma instabilities induced by particle collisions 12 p1918 A66-23555

Kinetic oscillation of nonhomogeneous collision plasma, discussing drift instability, ionization, longitudinal current effect, etc 12 p1921 A66-24204

Measurement of cross section for excitation of cesium atom by electron impact in prethreshold energy region, using electron trap method 12 p1925 A66-24878

Atmospheric radio wave absorption coefficient and altitude determined and linked to effects of colliding paramagnetic oxygen molecules 13 p2020 A66-25224

Collisional effects in region of electron cyclotron frequency on electromagnetic wave propagation in plasma 13 p2147 A66-25752

Synthesis of plasma by ion beam bombardment, discussing electrostatic instabilities and collisional and noncollisional damping 14 p2339 A66-26816

Charge exchange cross section increase during single collisions of alkali-metal ions with atoms of inert gases and atomic hydrogen and nitrogen molecules 14 p2336 A66-27155

Method of constructing particle distribution function for quasi-neutral plasma consisting of electrons and singly charged heavy ions 14 p2344 A66-27648

Correction of Fatkullin expressions for LF conductivities of homogeneous plasma in presence of electron-ion collisions in ionosphere 15 p2488 A66-29109

Meteor luminescence during atmospheric motion, obtaining radiation coefficient as function of cross sections of particle excitation and pulse transfer processes 15 p2596 A66-29143

Calculation of effective excitation cross sections of hydrogen atoms for collisions with nitrogen molecules and hydrogen atoms 15 p2545 A66-29211

Average diffusion cross section for elastic collisions of electrons with heavy particles, comparing calculated and measured values 15 p2551 A66-29225

Interaction of nuclear active particles with atomic nuclei, using ionization chamber at 3260 m above sea level 15 p2584 A66-29558

Extremely collimated nuclear interactions in carbon induced by collisions of charged cosmic ray particles in energy region 20-100 gev 15 p2585 A66-29559

Nuclear interaction characteristics in brass and carbon, noting production by neutral and charged cosmic ray particles, observation methods, energy spectrum, etc 15 p2585 A66-29560

Secondary cosmic radiation and meson

production at high energy, noting particle flux regularities and collision 15 p2586 A66-29564

Occurrence of collisions between ionized and neutral particles based on analysis of spectrum diffused by E region 15 p2491 A66-30021

Ionospheric plasma movement, neutral-neutral and charged-neutral particle collisional interactions, electron-ion collision frequencies, mobility and LF Hall conductivity, irregularities, etc 15 p2495 A66-30053

Long-lived impact excitation states of particles measured from cross section of nonelastic collision with second particle 18 p3137 A66-34025

Condensed phase particle growth in rocket nozzle by particle collision and coalescence [AIAA PAPER 66-639] 18 p3164 A66-34438

Center-to-center collisions of cosmic radiation nuclei with heavy nuclei of Ag, Br plasma emulsions 18 p3170 A66-34578

Charge ratio of cosmic ray electrons, examining excitation of baryon resonances in high energy collisions with no exchange of isospin 18 p3193 A66-34850

Electromagnetic interactions and collisions of particles in cores of EAS studied, using GM counters, plastic scintillators and Wilson cloud chambers 18 p3207 A66-35107

Component composition and photonuclear interactions of photon-initiated EAS 18 p3209 A66-35121

High primary energy EAS composition, energy spectrum of nuclear active particles and high energy collisions 18 p3210 A66-35128

Time lags of nuclear interacting particles in extensive air showers 18 p3214 A66-35148

Nucleon interaction with complex nuclei at high energy in terms of multiple collision model 18 p3218 A66-35180

High energy interaction calculation and experimental techniques 18 p3219 A66-35185

Braking of bodies moving in rarefied plasma 19 p3275 A66-35256

Output current characteristics of thermionic converters derived without reference to elastic and inelastic collisions and expressed as plasma electron density and temperature profile 19 p3405 A66-35428

Diffusion spectrum modifications due to positive ions collision with neutral particles observed through ionospheric probe in E layer 19 p3346 A66-35590

Plasma model permitting numerical solution of nonlinear interpenetration problem of two rarefied plasma clouds 19 p3406 A66-35734

Collision damping of transverse electron plasma oscillations 19 p3408 A66-36273

Finite Larmor radius, inhomogeneity of magnetic field and particle collision effects in plasma instabilities analysis, noting open mirror defect 19 p3412 A66-36496

Verification of Landau theory that longitudinal electron waves in plasma of finite temperature are damped even in absence of collisions 19 p3416 A66-36522

Hydromagnetic, resistive and microinstabilities in plasmas, noting particle collisions and effect and validity of Maxwell-Vlasov equations with Fokker-Planck collision term 19 p3417 A66-36528

Stability of low pressure confined plasma taking into account effect of particle collisions, analyzing equilibrium configuration stability 19 p3417 A66-36529

Relation of kinetic theory to unstable plasmas /weak turbulence/, noting expansion parameters and extension to include discrete particle effects 19 p3418 A66-36536

Recharge cross section in collisions of slow atoms or ions involving interparticle transfer of one electron 20 p3604 A66-36987

Polarization interaction of plasma fluxes moving in transverse magnetic field, using plasma diagnostic techniques including superhigh-speed photography and double electrostatic and magnetic probes 21 p3787 A66-39053

Emission spectrum of plasma consisting of colliding blobs, noting photographic and photoelectric recording and ion temperature measurement 21 p3790 A66-39070

Electron concentrations and effective frequencies for electron collisions with

neutral particles in atmospheric gases in shock wake 21 p3726 A66-39085

Book on particle kinetics of plasmas 22 p3954 A66-39855

Charged particle collisions effect on drift instability of low pressure plasma studies, using Landau collision integral as model collision integral 22 p3956 A66-40192

Particle growth in rocket nozzle, particle size distribution, effect of channeling, determining increase of mass-median diameter of distribution 22 p3971 A66-40364

Kinetic oscillation of nonhomogeneous collision plasma, discussing drift instability, ionization longitudinal current effect, etc 22 p3956 A66-40568

Measurement of cross section for excitation of cesium atom by electron impact in prethreshold energy region, using electron trap method 23 p4099 A66-41085

Magnetic pumping heating rate for plasma, using conversion of organized energy into random energy by charged particle collisions 23 p4100 A66-41250

Moleculochron, stable molecular beam generator using pairs of resonators coupled by molecular beam 23 p4078 A66-41464

Collisions between plasma jets in homogeneous and longitudinal magnetic field 23 p4105 A66-41704

Phosphorus 32 and 33 produced by interactions of secondary neutrons from cosmic rays with argon in atmosphere determined radiochemically from rainwater samples 23 p4124 A66-41845

Electric field effects on collision efficiency of charged cloud droplets 23 p4065 A66-41846

Drift cyclotron oscillations of inhomogeneous collision plasma propagating across magnetic field, taking into account particle collisions with aid of Landau collision integral 24 p4243 A66-42530

Angular and energy distributions of muons produced by interaction of atmospheric neutrinos with matter 24 p4270 A66-42933

Underground 24 p4270 A66-42933

Charge exchange cross section increase during single collisions of alkali-metal ions with atoms of inert gases and atomic hydrogen and nitrogen molecules 24 p4239 A66-42975

Ionospheric constituent parameters at altitude between 78 and 100 km by local measurements of VLF field radiated from ground transmitter 24 p4203 A66-43074

PARTICLE COUNTER

Injun I and III particle observations discussing methods and results on fast electrons, particle counters, energy separation, spectra, flux variation, angular distributions, etc 03 p0363 A66-12647

Device with surface-barrier silicon detectors used to record protons, alpha particles and nuclei with Z greater than 2 08 p1223 A66-19043

Low energy particle flux measuring circuits of spherical electrostatic analyzers aboard Elektron II and IV 11 p1704 A66-22431

Cosmic ray meson monitors with plastic scintillators and near cubical geometry designed for total counting rate of 1,000,000 counts/hr 12 p1879 A66-23709

Polarization of particle counters, noting distortion of internal fields through pre-irradiation spatial polarization 12 p1883 A66-24788

Counting characteristics of SI-5G counters in pre-Geiger region, measuring voltage dependence of dead time 15 p2502 A66-29114

Contamination control methods used in Royal Swedish Air Force, presenting special particle counting and patch test methods in hydraulic oils 17 p2870 A66-32204

Regression calculations correlating daily average meson intensity with barometric pressure, atmospheric temperature and neutron monitor intensity 18 p3195 A66-34862

Daily correction of meson diurnal variation for ground-level air temperature and barometric pressure effects 18 p3195 A66-34863

Daily variations of cosmic ray distribution, examining effect of geomagnetic field, aperture, orientation and geographical position of counters 18 p3195 A66-34865

Absolute number of ultrahigh energy muons in extensive air showers estimated

by using large air shower array on ground and muon detectors far below
18 p3205 A66-35094

Mu-triggered extensive air showers are rich in muons and have less component energy flow than electron triggered showers
18 p3205 A66-35096

Electron-photon and nuclear active components energy of young air showers measured by ionization calorimeter, determining inelasticity coefficient
18 p3206 A66-35100

Ionizing particle trajectory analysis via vidicon TV techniques, noting methods of increasing system sensitivity
18 p3115 A66-35230

Signal processor recovery time effects on photon counting accuracy, observed counts and true events in some derived curves
19 p3359 A66-35919

Transistorized electron counter using tunnel diodes, noting trigger
20 p3559 A66-37517

Rocketborne instruments for observing galactic X-rays including scintillation and proportional and GM counters
23 p4067 A66-41287

Radiosonde for high altitude balloon soundings using large polyethylene balloons to carry payloads of electronics, cosmic ray and nuclei counters
23 p4087 A66-42084

High accuracy directional recording of cosmic ray flux components, using counter telescope
24 p4213 A66-42943

PARTICLE DECAY

Series of self-quenched Geiger counters for visual detection in cosmic rays of unstable charged particles decaying within millisecond
03 p0417 A66-12281

Analysis of 3587 tau-meson decays in emulsion stacks, comparing experimental pion energy spectra with theory
03 p0395 A66-12697

Hypothesis of two intermediate bosons to explain K-2 meson anomalous decay, exploring relation to gravitational and cosmological theories
05 p0718 A66-15348

Series of self-quenched Geiger counters for visual detection in cosmic rays of unstable charged particles decaying within millisecond
05 p0756 A66-15453

Detection by coincidence counting techniques of two-photon decay of metastable state of singly ionized helium
09 p1404 A66-20290

Effect of satellite size on electron lifetime in artificial belt, causing charged particles in radiation belts to decay at surface
10 p1596 A66-21052

Nuclear reaction and beta decay rates for silicon 28, considering conditions for nuclear statistical equilibrium in stars
12 p1917 A66-24117

Five-dimensional relativistic scheme
15 p2537 A66-28679

Normal scalar nonet, K1 meson-2 pion decay, K1-K2 mass difference and S-wave pion scattering
15 p2544 A66-28946

Integral number spectrum and absorption characteristics of muons in extensive air showers
15 p2581 A66-29536

Cosmic ray measurements, muon production from decay of charged pions and kaons, muon polarization, momentum spectra, atmospheric gamma cascades and derivation of kaon/pion ratio
15 p2587 A66-29573

Kaon decay contribution to sea level muon flux at large zenith angles, using Ashton and Wolfendale
15 p2588 A66-29579

Sea level energy spectrum analysis of high energy cosmic ray muons generated by pi-mu decay
15 p2589 A66-29588

Three quantum decay of super 1S sub zero state positronium determined via measurement of three quantum coincidence events in Al and oxygen with energy sum of 1.02 Mev
16 p2750 A66-30132

Hypothetical mechanism of earthward radial drift of charged particles, noting albedo neutron decay, proton belt, etc
18 p3197 A66-34876

Rate of stopping positive pions measured by observing decay pulses in scintillation counter, identifying events with muon and electron pulses
18 p3222 A66-35210

Muon decays arising from neutral primary

in cosmic rays, using detector built of scintillating plastic and located near sea level
18 p3224 A66-35222

Total cross sections for arbitrarily oriented dielectric circular cylinders used in obtaining extinction and polarization by realistically oriented interstellar particles, noting refractive index
20 p3649 A66-37325

Production and equilibrium spectrum of galactic cosmic ray secondary electrons arising from secondary pion and neutron decay
20 p3633 A66-38200

Dynamics and symmetries of nonleptonic hyperon decay based on assumptions of parity-violating and parity-conserving amplitudes, inverse associated production amplitudes and SU symmetry
20 p3606 A66-38292

Atomic degeneracy influence on mode interactions in gas laser
22 p3931 A66-39930

Polarization measurements of cosmic ray muons by detection of positrons from muon-to-positron decay
24 p4271 A66-42937

PARTICLE DETECTOR

SA ELECTRON DETECTOR

SA NEUTRON DETECTOR

Penetrating particle detector sensitive to muons of energy greater than 700 mev and nuclear active particles of energy greater than 15 gev used to monitor extensive air shower
01 p0132 A66-10330

Spark spectrometer for measurement of high energy cosmic ray shower particles
01 p0067 A66-10454

Rocket-mounted spectrometer with solid state detectors for measuring internal energy spectra of auroral electrons and protons in 40-104 kev range
03 p0369 A66-12650

Double-focusing miniaturized beta-spectrometer for measuring low energy electrons within small band spread associated with auroral phenomena
03 p0369 A66-12651

Electrostatic spectrometers discussing deflection type, retarding-potential type and magnetic analyzers, advantages, uses, flux measurement techniques via energy selectors, etc
03 p0369 A66-12652

Solar cosmic particle measurements by solid state detectors
03 p0422 A66-12871

Plasma diagnostic techniques for direct measurements of electron, ion and neutral particles
04 p0522 A66-14199

Small particle detection capability of low-gain helium-neon gas laser enhanced by use of Stokes settling law and layered sedimentation technique
05 p0692 A66-14583

Velocities of dust particles in cislunar space
05 p0762 A66-15266

Detection of slow neutrons escaping from atmosphere by counters filled with boron fluoride onboard high altitude balloons
05 p0754 A66-15401

Muon detection and energy determination in multilayer system of ionization chambers and probability of finding muon in n-electron shower at depth
07 p1117 A66-17569

Orientation detector mechanism for high altitude cosmic ray research utilizing directional East-West symmetry in geomagnetic rigidity cut-off
07 p1034 A66-17980

Responses of cubical meson telescopes and neutron monitors, at equatorial and high latitude stations, to anisotropy with different assumed spectrum and latitude dependence
07 p1125 A66-18005

Atmospheric diurnal variation investigated, using temperature controlled high-counting neutron and meson monitors
07 p1126 A66-18008

Particle detection with electric charges of two-thirds in cosmic radiation
07 p1131 A66-18238

Channel conductance measurements on silicon power rectifiers and midgap donor and acceptor detection on oxidized and lacquered rectifiers
08 p1189 A66-18664

Vela satellite system electronic detection instrumentation and block diagrams
09 p1379 A66-19910

Detection by coincidence counting techniques of two-photon decay of metastable state of singly ionized helium
09 p1404 A66-20290

Mean solar time from seven years data

obtained by two muon telescopes at Hobart, Tasmania
09 p1443 A66-20796

Triaxial electron spectrometer, mounted on OGO-E spacecraft, measures flux and energy distributions of electrons, noting electron multiplier
12 p1877 A66-23689

Three parameter pulse height analyzer and coincidence system for satellite-borne scintillation telescope study of cosmic radiation
12 p1878 A66-23691

High resolution pulse height analyzer for satellite and balloon-borne telescope
12 p1878 A66-23692

Low-power multichannel pulse height analyzer for solar neutron detection aboard balloon or rocket
12 p1878 A66-23693

Efficiency of large-size liquid scintillation detectors compared to other particle detectors
12 p1882 A66-24187

L-3 rocket observation of proton and electron fluxes at high altitudes, using solid state detectors
15 p2574 A66-28910

Multiple muon events at sea level and association with air showers detected, using Geiger and scintillation counters
15 p2580 A66-29533

Thick lithium drifted semiconductor silicon detectors for investigation of fluctuations of energy loss by high and intermediate energy particles
16 p2755 A66-31389

Space radiation monitoring systems for categorizing particle types and intensities
17 p2924 A66-32164

Plasma beam action on tritiated titanium and high energy deuteron detection in mixed-field accelerator
17 p2972 A66-32953

Multidirectional high-counting-rate meson counting array
18 p3114 A66-34803

Balloon-borne nuclear emulsion detection of finite fluxes of low energy cosmic ray heavy nuclei and interstellar cosmic radiation propagation
18 p3191 A66-34838

Plasma fluxes inside magnetosphere detected by spherical electrostatic analyzers mounted on Elektron II satellite
18 p3196 A66-34871

Atmospheric neutron flux measured by balloons, using polyethylene-moderated boron fluoride counter
18 p3197 A66-34875

Central part and core structure of muon extensive air shower studied by large area underground hodoscope
18 p3204 A66-35093

Energy flow variation of high energy nuclear active particles in EAS measured by scintillation detectors in Bolivia
18 p3205 A66-35099

EAS mu component fluctuations in density distribution and reception spectrum recorded, using hodograph
18 p3208 A66-35116

EAS front structure and normal energy transfer determined from pulse forms recorded by Cerenkov
18 p3210 A66-35126

Detectors
18 p3210 A66-35126

Data on energy and angular distribution of high energy muons, noting detector and structural bursts
18 p3220 A66-35193

Frequencies of secondary particles and penetrating particles, using underground scintillators, Geiger counters and flash tubes
18 p3221 A66-35202

Telescope design for detection of muons produced by neutrinos installed underground and consisting of plastic scintillators
18 p3222 A66-35212

Detection of solar neutrinos for analysis of solar structure, using various detector types and recoil electrons in neutrino-electron elastic scattering process
18 p3223 A66-35214

Various light nuclei considered as possible solar neutrino detectors, deriving cross sections and angular distributions of electrons
18 p3223 A66-35216

Muon decays arising from neutral primary in cosmic rays, using detector built of scintillating plastic and located near sea level
18 p3224 A66-35222

Two detector elements developed for 2000-ton neutrino detector, noting cylindrical spark counter and Cerenkov counter
18 p3096 A66-35224

Interaction of high energy cosmic ray neutrinos produced in atmosphere measured with detector array operated underground
18 p3224 A66-35225

Role of particle channeling in affecting results from crystal-line detectors used for charged particle and nuclear

scattering 19 p3359 A66-35912
Hydrogen ions detected near anode of glow discharge at various pressures, using mass spectrometer 19 p3410 A66-36455
Scintillation counter and proportional counter spectral measurements of solar flare X-ray emissions and analogies to hot plasma 20 p3633 A66-38191
Alouette satellite, topside sounder measurement of ionosphere electron density from above 20 p3639 A66-38313
Predicted capture rate in chlorine experimenter detecting solar neutrinos, using set of nuclear parameters, showing CNO cycle and proton-proton chain contribution to solar energy generation 21 p3809 A66-38657
Solar cosmic ray multiply charged nuclei and July 18, 1961 solar event, discussing relative abundances and heavy nuclei detection 22 p3973 A66-40548
Inconclusiveness of satellite measurements of micrometeoroid fluxes using piezoelectric microphone detectors in supporting hypothesis of cloud of dust surrounding Earth 23 p4128 A66-41213

PARTICLE DIFFUSION

Dynamic equations for two-point double correlations of fluid pulsation velocities and particles suspended in it, noting isotropic turbulence degeneration 02 p0217 A66-11393
Electron beam-hot plasma interaction at low frequencies, explaining cesium discharges and gas noise 03 p0398 A66-12539
Observed and predicted standard deviations compared for cross-wind deposits 04 p0541 A66-13670
Cosmic rays from solar flare and interplanetary space properties, covering particle scattering and magnetic field induced one-dimensional particle diffusion 05 p0751 A66-15377
Solar cosmic ray propagation, discussing intensity time dependence in terms of isotropic diffusion of solar particles 06 p0947 A66-16571
Charged particle drift across magnetic field in plasma with oscillating electrons contained in metal chamber 08 p1264 A66-19181
Particle transfer across drift shells as basic mechanism of acceleration of protons and electrons in outer radiation belt and formation of inner radiation belt 09 p1444 A66-21023
Plasma stability in magnetic field where disordered energy of particles may be liberated so as to cause collective evolution of plasma, using formalism describing particle diffusion, noting distribution function role 13 p2144 A66-25719
Polydispersity of particle system engaging in mass exchange with ambient, noting difficulties caused by nonlinearity 14 p2410 A66-26777
Laminar boundary layer separated flow of particulate suspension, including Brownian diffusion, jet flow, etc 14 p2275 A66-27561
Spreading of injected miscible additive caused by convection and diffusion in Poiseuille flow 14 p2278 A66-28147
Electron-concentration distribution in ionospheric F-2 layer with vertical distribution of electron-ion gas 15 p2486 A66-29096
Magnetic effects on diffusion of ferromagnetic colloidal particles dispersed in current-carrying fluid medium, noting force effects on relaxation process 15 p2556 A66-29809
Neutral particle densities of nitrogen, molecular and atomic oxygen and argon in upper atmosphere, noting density profile irregularities, diffusive separation altitude, etc 15 p2497 A66-30086
Macroscopic equations describing effect of negative ions on diffusion of electrons and positive ions in lower ionosphere 17 p2917 A66-32255
New solution method for nuclear cascade equation for nucleons and charged pions 18 p3206 A66-35105
Instabilities in plasma produced by magnetron source diffusing along static magnetic field, examining effect on particle diffusion perpendicular to magnetic field 19 p3416 A66-36521
Least squares iterative procedure for

resolving individual particle distributions comprising model atmosphere density profile above 110 km 20 p3551 A66-37516
Nonadiabatic and adiabatic acceleration and diffusion of particles trapped in Earth magnetic field, examining particle drift, trapping boundary, auroral substorms and bounce resonances 20 p3658 A66-38326
Charged particle diffusion in plasma discharge in chamber with nonconducting walls, noting relations of various parameters 21 p3784 A66-39030
Domain formation process during passage of current through multivalley semiconductor when electron intervalley scattering drift length exceeds diffusion length 21 p3804 A66-39313

PARTICLE EMISSION

SA QUANTUM GENERATOR

Particle precipitation measurements with Injun satellites, discussing space and time variations of electron precipitation, trapped Van Allen particles and auroral light emission latitude 03 p0363 A66-12648
Effect of radiation on various types of materials and application of irradiation processes to field of industrial technology 04 p0587 A66-13375
Cosmic radiation studies in U.S.S.R during IGY noting 11-year variations, Forbush effect, solar particle propagation, etc 05 p0749 A66-15232
Relativistic mechanism of electromagnetic wave scattering at velocity fluctuations and emission from plasma in external field 09 p1344 A66-20353
High energy interactions - International Conference on Cosmic Rays, Jaipur, India, December 1963 15 p2582 A66-29541
Meson emission asymmetry, inelastic particle collisions and multiplicity in ultrahigh energy interactions in nuclear emulsion 15 p2545 A66-29543
Grain density, scattering and range measurements on 22 proton, neutron and alpha jets in 22-liter emulsion stack analyzed to identify nature of particles emitted in extreme backward center of mass angle cone 15 p2585 A66-29561
Fast emitted and reflected particles during ionic bombardment of metallic surfaces, considering two-atom collision rules, light emission, ion scattering, etc 16 p2753 A66-30795
Probability of spontaneous emission of particles in multimode resonator with several related types of oscillations 17 p2874 A66-32257
Longitudinal electric field effect on redistribution of emitting particles in combustion front of plane methane-air flame 17 p2870 A66-32828
Nuclear processes of stellar evolution resulting in neutrino emissions 19 p3453 A66-36085
SID-AND terrestrial disturbance-causing enhanced solar particle emissions associated with intense solar flares and plasma streams 20 p3634 A66-38212
IR photometric measurement of Comet 1965f, noting absolute intensity dependence on distance from Sun, tail intensities and nature of particle emissions 21 p3816 A66-39557
Steady state solar neutrons and solar neutron bursts measured by neutron detectors on Vela satellites 24 p4263 A66-42599

PARTICLE FLUX

Extension of study showing that increase in temperature of silicon carbide increases absorption coefficient of defect, for case of heavy particle irradiation 02 p0274 A66-11723
Difference magnetic analyzer of low-energy electrons and protons in which particles are separated before arriving at detector 02 p0284 A66-12143
Energy spectrum of variations in cosmic ray intensity and changes in spectrum with decreasing solar activity calculated for additional particle flux 05 p0754 A66-15399
Plasma interaction of rapid movement of object with electrically conducting surface through ionized gas, representing particle motion by Schroedinger equation 06 p0917 A66-16400
Data obtained by satellite and rocket

probes on cosmic ray composition, particularly on fluxes on nuclei of elements contained in rays 06 p0946 A66-16569
Neutron activation and cesium-aluminum sputtering in oxygenated gas atmosphere [AIAA PAPER 66-77] 06 p0913 A66-17103
Nature and momentum spectra of nuclear active particle flux at low altitudes, determining root mean square error 07 p1115 A66-17552
High energy particle jets analysis by Lobachevskil velocity diagram 07 p1116 A66-17560
Polarization of cosmic ray muons with various residual energies, using hodoscopes and Wilson chamber 07 p1117 A66-17565
Mu-meson flux irregularities, lateral distribution and average characteristics in extensive air showers at 200 mwe depths 07 p1118 A66-17572
Experiments on solar particles noting abundance of solar cosmic rays, energy region, spectrum of solar protons, sudden commencement, etc 07 p1130 A66-18080
Performance correlation of conical and contoured nozzles for gas-particle flows, defining differences between particle effects for such nozzles 08 p1165 A66-19155
Limit on stably trapped particle fluxes determined theoretically and compared with data from Explorer satellites 08 p1184 A66-19391
Auroral absorption measured, using riometers compared with energetic particle fluxes simultaneously detected by passing satellite, showing absorption and particle flux correlation 09 p1374 A66-20881
Simultaneous measurements of magnetic field and positive ion fluxes in Earth magnetosphere from Elektron II satellite 09 p1444 A66-21025
Cosmic rays during flights of Sputniks and Cosmos satellites investigated by analysis of charged particle fluxes obtained by gas discharge counter 10 p1595 A66-21042
VHF hiss zone morphology and correlation with particle precipitation events, from Alouette I satellite observations 11 p1700 A66-23136
Rocketborne measurements of electron precipitation and relative brightness of ionized molecular nitrogen ion and atomic oxygen auroral emissions 11 p1764 A66-23139
Lower limit of age of cosmic ray nuclei, flux ratio of Be nuclei to B nuclei and intergalactic cosmic ray propagation 12 p1938 A66-24092
Meteoroid environment, meteoroid impact hazard on spacecraft structure and meteoroid shields 13 p2193 A66-25845
Solar protons from class 2 solar flare of February 1965 measured from satellite 1964-45A 13 p2175 A66-26351
Electron trajectory equations for outer and inner flux boundaries, taking into account thermal velocities under static conditions of centrifugal electrostatic focusing 14 p2236 A66-27246
Particle distribution in low density collisionless plasma in vicinity of moving charged body smaller than Debye radius 14 p2284 A66-27556
Difference magnetic analyzer of low-energy electrons and protons in which particles are separated before arriving at detector 14 p2297 A66-28099
Measurement of total number of nuclear active particles in showers with various particle numbers at 3330 m above sea level, determining size spectrum of EAS 15 p2580 A66-29529
Arrival directions of large EAS falling in 10 to 80 degree band of north declination, noting angle, azimuth and sidereal time 15 p2580 A66-29532
High energy neutrino production in atmosphere contributed by pion, muon and kaon interactions 15 p2590 A66-29593
Statistical approach to range and energy relationship for high energy muons 15 p2590 A66-29595
Polar glow aurora, discussing optical emissions generated by solar cosmic ray protons and alpha particles, energy spectrum, atmospheric and ionospheric absorption effect, etc 15 p2492 A66-30026
High altitude balloon top collections of cosmic dust shows evidence of absence of

crystal structure in particles 15 p2604 A66-30065
 Flux of low energy heavy primary nuclei obtained by slicing emulsion method, using recoverable satellite during minimum solar activity period 15 p2592 A66-30077
 Optimum conditions for molecular beam generation determined by measuring particle flow density and speed ratio of short beam pulses from convergent nozzle 16 p2752 A66-30384
 Continuum source molecular beam facility, examining effect of source-skimmer distance variation on flux and spatial distribution of beam in collimation chamber downstream 16 p2746 A66-30386
 Flux of primary cosmic ray heavy nuclei measured with sandwich of C.2 and G.5 emulsions at magnetic latitude 42 degrees N, noting solar modulation as shown by neutron monitor data 16 p2794 A66-30720
 Radiative flux divergence for lower few centimeters of atmosphere, accounting for combined effects of water vapor, particle absorption and scattering 16 p2699 A66-31640
 Free-free galactic X-ray emission from hot fully-ionized hydrogenic plasma 17 p2992 A66-31916
 Cosmic ray neutron flux as function of altitude measured near Earth surface, using boron trifluoride detectors 17 p2992 A66-31974
 Quasi-stellar radio source characteristics, noting methods of identification, emission of high energy particle flux, etc 18 p3176 A66-34751
 Explorer XVIII satellite measurements of proton energy spectra in region corotating with Sun, noting modulation of galactic cosmic radiation and source of continuous particle accelerations 18 p3177 A66-34754
 Solar modulation and time variation of differential energy spectrum and flux of primary helium nuclei in 30 to 90 mev/nucleon energy range 18 p3190 A66-34832
 Nuclear emulsion stack investigation of composition and differential energy spectra of primary cosmic ray heavy nuclei fluxes 18 p3191 A66-34837
 He-3-He-4 isotopic composition of primary cosmic ray helium flux in terms of energy, rigidity and solar modulation 18 p3192 A66-34841
 Stability of Earth radiation belts, considering wave absorption in ionosphere, noting role of proton fluxes, Alfvén wave generation, etc 18 p3197 A66-34877
 Search for long-lived particle fluxes with masses larger than about five nucleon masses created by cosmic radiation 18 p3214 A66-35150
 Nuclear reactions in stellar interiors, calculating probabilities of various proton-proton reactions and obtaining solar neutrino fluxes at Earth for point source solar model 18 p3223 A66-35213
 Quark detection in cosmic rays noting flux dependence on mass, energy loss through ionization, production spectrum threshold, etc 18 p3225 A66-35231
 Flux of elementary triplets of unitary symmetry in cosmic radiation, noting production via nucleon-nucleon collision, particle interaction, etc 18 p3225 A66-35232
 Possible presence of relic quarks in cosmic rays 19 p3454 A66-36723
 Neutrino flux calculation based on models of solar interior with tabulated results 19 p3454 A66-36794
 Space chamber molecular kinetics, noting importance of molecular flux upon simulation fidelity and effect of various gases and chamber geometry on flux profile 20 p3544 A66-38161
 Ring current-induced variations in geomagnetically trapped particle fluxes 20 p3633 A66-38192
 Seasonal anomaly of F-2 layer critical frequency partially explained by assumed electron-ion flux flowing between magnetically conjugate points from summer to winter hemisphere 22 p3908 A66-39966
 Energy spectrum of levels appearing in silicon single crystals irradiated by integral fluxes of fast electrons, neutrons and gamma quanta 22 p3964 A66-40193
 Charged particle radiation shielding in

space of solar cell panels by use of concentrator geometry 22 p3852 A66-40512
 Star collapse observation by detection of high energy neutrino fluxes produced by catastrophic star contraction 22 p3975 A66-40953
 Small neutral hydrogen flux in total solar wind flux and electron impact and photoionization mechanisms 23 p4123 A66-41689
 Flux and energy spectrum of low energy heavy nuclei of primary cosmic radiation measured by balloon-mounted nuclear emulsion stacks 24 p4264 A66-42608
 Thermometry of solar interior via neutrino flux measurement, noting temperature dependence of number of events in detectors 24 p4270 A66-42931
 Resonance of antineutrino-electron interaction cross section, calculating electron density and velocity distribution via Ritz method 24 p4270 A66-42932
 High energy muon flux in interference radiation incident to fast charged particle constant-speed trajectories through periodic laminar medium 24 p4271 A66-42939
 High accuracy directional recording of cosmic ray flux components, using counter telescope 24 p4213 A66-42943
PARTICLE IN CELL TECHNIQUE
 Particle in cell method for calculation of supersonic wake flow, noting transient effects for flow initiated by shock diffraction 03 p0316 A66-12791
PARTICLE INTENSITY
 Increase with latitude of Forbush effects and secular variations in cosmic ray intensity explained by worldwide data obtained with meson detectors 05 p0754 A66-15398
 Ionization bursts in shielded spherical chambers with burst data transformed to give integral energy distribution of muon intensity at sea level 07 p1116 A66-17563
 Muon absorption curves under ground and under water with absorption less steep at great depths under water than under ground 07 p1116 A66-17564
 Lunar surface ideal for thermal neutron, molecular and atomic beam measurements 08 p1287 A66-18768
 Intensities and ratios of intensities of Be, B and S nuclei determined near geomagnetic equator in India, using nuclear emulsion stack 10 p1600 A66-21844
 Numerical calculation of relative intensity distribution of solid particles in cometary head, neglecting interparticle collisions 17 p3011 A66-33384
 Low-energy protons and electrons of outer radiation belt measured by equipment onboard Cosmos XLI 18 p3196 A66-34872
 Frequencies of secondary particles and penetrating particles, using underground scintillators, Geiger counters and flash tubes 18 p3221 A66-35202
 Vertical intensity and angular distributions of penetrating cosmic ray muons measured underground by scintillators, Geiger counters, etc 18 p3221 A66-35205
 Upper atmospheric phenomena and particle precipitations noting ionization cross section, energy and spatial distribution and auroral activities 20 p3642 A66-38334
 Scattered particle intensity inside and outside finite medium determined from Maxwell and Schrodinger equations 22 p3975 A66-40954
PARTICLE MASS
 Stable elementary particle detection of mass greater than that of proton in hydrogen, deuterium and atmospheric air samples, using mass spectrometer 01 p0060 A66-10251
 Comet atmosphere analyzed for neutral particle distribution, acceleration and velocity variations relative to Sun, brightness, etc 10 p1605 A66-21207
 Stable elementary particle detection of mass greater than that of proton in hydrogen, deuterium and atmospheric air samples, using mass spectrometer 13 p2131 A66-25968
 Normal scalar nonet, K1 meson-2 pion decay, K1-K2 mass difference and S-wave pion scattering 15 p2544 A66-28946
 Formula representing empirical masses of elementary particles, using two quantum numbers 15 p2546 A66-29568

Statistical equilibrium of fundamental particles at elevated temperatures, determining degeneration parameters 15 p2618 A66-29645
 Equilibrium distribution function of particles in phase space applicable to collisionless rarefied plasma confined by magnetic mirror, using first integrals of motion 24 p4242 A66-42399

PARTICLE MOTION

SA ELECTRON MOBILITY

Charged Styropor ball motions in free float between plates of perforated capacitor with alternating electric field 01 p0119 A66-10374
 Extension of measurements in Van Allen belt concerning particle equator crossing at given pitch angle between magnetic mirrors, suggesting repulsing force from equator 01 p0132 A66-10495
 Laws of motion for monopolar particle in given gravitational field 01 p0107 A66-11076
 Magnetic moment of charged particle as function of initial particle motion, particle distance from axis of field and asymptotic behavior of field 02 p0268 A66-11775
 Photon tracks near very massive star, deriving motion equations with independent time coordinate for spherically symmetric four-dimensional manifold 02 p0291 A66-12184
 Semigenerally covariant motion equations of particles moving in external gravitational field 03 p0392 A66-12606
 Reflection and transmission of charged particles incident on plane moving plasma shock with small thickness compared to Larmor radius of particles 04 p0552 A66-14019
 Motion of finite mass particles in external gravitational field determined by comparison of relativity and Minkowsky theories, considering gravitational radiation 04 p0545 A66-14172
 Synchrotron radiation from primary cosmic ray, describing near field produced by relativistic single charge moving in circle in medium of constant refractive index 05 p0749 A66-15053
 Motion of charged particle in plasma electric and magnetic field 05 p0725 A66-15237
 Nonrelativistic motion of charged test particle in plasma 05 p0725 A66-15238
 Magnetic particle motion, analyzing effect of Earth electric dipole field 05 p0752 A66-15387
 Cosmic ray electromagnetic acceleration mechanism, calculating motion of charged relativistic particles in applied fields 05 p0753 A66-15388
 Estimation in equilibrium state surface potential and distributions of electric potential field and electron density in vicinity of object moving in ionized medium 05 p0685 A66-15795
 Behavior of carrier mobility in semiconductors with layered structure, with carriers acting as mobile particles in stack of independent layers 06 p0929 A66-16941
 Motion of particles of dispersed phase at inlet to sampling probe analyzed for application to two-phase medium flow 07 p1031 A66-17417
 Nuclear interaction at high energies, discussing active component structure ionization calorimeter application, energy spectrum of particles, etc 07 p1113 A66-17536
 Particle distribution and motion in field of force, discussing density profile, energy dissipation, Coulomb charge shielding for local thermodynamic equilibrium and free orbital motion 08 p1261 A66-18743
 Dislocation interaction with coherent ordered zones, noting onset of plastic deformations in alloys 08 p1240 A66-19250
 Transition radiation relative to dispersion of dielectric permittivity for charged particle passing through boundary between two media 09 p1410 A66-20930
 Charged particle motion determined by gravitational-electromagnetic field properties with motion equations following from integrability condition of field equations 11 p1735 A66-22343
 Saturn ring stability examined, using model stabilized by gravitational dilution and random particle motions 11 p1769 A66-22530
 Van Allen radiation belt noting composition, charged particle motion in

dipolar magnetic field, particle origins, etc 11 p1763 A66-22769

Physical pattern of high altitude fission cloud and motion of gamma and beta fission fragments captured by geomagnetic field and observed by Cosmos satellite 11 p1764 A66-23043

Mean radial particle displacement per unit time due to magnetic impulses for two-dimensional transport motion of magnetospheric trapped particle 11 p1765 A66-23149

Motion of magnetically charged neutrino in cosmic magnetic fields 12 p1942 A66-24181

Spectrum, energy and radiation field of charge moving above anisotropically conducting surface 12 p1921 A66-24206

Motion of charged particles in rotating and fixed magnetic fields, using drift approximation equations to determine field parameters 12 p1921 A66-24209

Necessary condition for motion stability of particle moving in gravitational field of axisymmetric planet 12 p1949 A66-24247

Charged particle motion in time dependent axially symmetric magnetic field, using drift theory of plasma radial compression 12 p1922 A66-24462

Variational formulation for equilibrium and stability of plasma with particle orbits described by guiding center approximation 12 p1923 A66-24569

Plasma kinetics analysis by expanding motion in terms of particle deflection from noninteracting orbits 12 p1923 A66-24570

Drift velocity of aerosol particle in field of sound wave distorted by second harmonic 13 p2127 A66-25087

Invariance principle applied to motions of material particle that do not depend on particle mass 13 p2127 A66-25625

Nonadiabatic motion of particle in cusped magnetic field 13 p2143 A66-25715

Flute instability of beta and neutral plasma contained in mirror machine, considering particle motion for solution of Vlasov equation, obtaining eigenvalue equation for potential of flute-like perturbation 13 p2146 A66-25742

Stimulated Brillouin scattering in anisotropic media, showing excitation and propagation of stimulated phonons at radio frequencies 13 p2097 A66-26163

Gravitational theory developed by generalizing Newtonian and special relativistic concepts 13 p2129 A66-26332

Dust particles in laser cavity observed for angular stabilization and constant velocities 13 p2105 A66-26594

Electrohydrodynamic phenomena associated with motion of charged particle in plasma, showing that disturbance produced depends on particle speed 13 p2154 A66-26669

HF potential for motion of charged particle in combined quasi-static magnetic and HF electromagnetic field 14 p2341 A66-27198

Identity between inertial and gravitational fields in infinitesimally small region of space-time, discussing equivalence and Mach principle 14 p2332 A66-27211

Perturbation of particle motion in stellarator 14 p2347 A66-28307

Accelerator with nonlinear spiral focusing, approximating size of stability region, adiabatic damping, transverse phase stability and perturbations effect 14 p2347 A66-28309

External injection of ions into cyclotron, examining case of injection of beam in median plane of magnet 14 p2347 A66-28310

Stormer method solution of charged particle motion in field of magnetic dipole situated in external uniform magnetic field antiparallel to dipole magnetic moment vector 15 p2482 A66-28491

Adiabatic motion of charged particles in space-and time-variant magnetic field studied, using guiding-center approximation 15 p2574 A66-28902

Corrected geomagnetic coordinates of Hakura compared to study of geomagnetic threshold rigidity for cosmic ray particles 15 p2484 A66-28908

Clear air turbulence detection with optical radar, using spectral analysis of backscattered Doppler-shifted light particle formation mapping via correlates of rough flying conditions 15 p2450 A66-28920

Charged particle motion in Van Allen belts, examining effect of nondipole terms on mirror point distributions 15 p2489 A66-29314

Motion of charged nongravitating test particle in Einstein gravitational theory 15 p2542 A66-29655

Adiabatic deceleration effect on cosmic ray spectrum, noting particle momentum and energy change, diffusion coefficient independent of energy, etc 16 p2795 A66-30924

Orbit calculations used to evaluate effective atmospheric densities traversed by geomagnetically trapped 125-mev protons in South Atlantic anomaly 17 p2993 A66-32528

Computer code study of magnetospheric trapped-particle drift under influence of magnetic field gradient, magnetic line curvature, electric rotational field and electric field across tail of magnetosphere 18 p3168 A66-34350

Solar particle propagation in magnetic fields revealing anisotropies in proton flux analyzed from Pioneer VI space probe data 18 p3170 A66-34536

Mean absolute particle velocity in fluidized bed calculated by radioactive isotope method 18 p3267 A66-35058

Plasmoid structure produced by coaxial plasma gun with interchangeable polarity electrodes, noting experimental setup, particle velocity, density, energy, etc 18 p3151 A66-35071

Linear nonrelativistic motion of charged particle in field of traveling electromagnetic wave 18 p3092 A66-35073

Charged particle motion and penetration of magnetosphere in proximity of neutral point as result of solar wind-geomagnetic field interaction 19 p3405 A66-35281

Charged particle motion in field of magnetic dipole situated in external magnetic field /magnetospheric G region/, using Stormer method 19 p3451 A66-35282

Motion of isolated energetic charged particle in simple force-free magnetic field with rectilinear lines of force 19 p3400 A66-35925

Diffusion coefficients for transport of plasma across magnetic field calculated directly from motion of test particles 19 p3416 A66-36520

Shock wave propagation in gas-dust medium, examining motion and velocities of gas and dust at distance approaching infinity 20 p3647 A66-37034

Van Allen radiation belt particle motion in spherically confined magnetosphere 20 p3630 A66-37301

Adiabatic theory of charged particle motion, considering first-order effects in radius of gyration and Alfvén theory 20 p3603 A66-38303

Magnetosphere tail sheet pinch model, discussing motion of particles for cases of surface crossing 20 p3642 A66-38336

Drift velocity of aerosol particle in field of sound wave distorted by second harmonic 21 p3769 A66-38512

Time-mass dependent events during motion of material particle, using Hamilton-Jacobi equation of relativistic mechanics in Minkowski continuum 21 p3772 A66-39276

Nonlinear theory of fast-particle motion in helical toroidal magnetic fields, using averaging techniques to obtain adiabatic invariants describing nonlinear oscillatory motions 21 p3792 A66-39295

Photography of small freely moving particles undergoing heat and mass transfer, using beam splitter to align two cameras on drop 22 p3917 A66-39675

Energy loss of charged particles during passage through weakly turbulent plasma in magnetic field with HF oscillations 22 p3952 A66-39751

Spectrum, energy and radiation field of charge moving above anisotropically conducting surface 22 p3956 A66-40570

Motion of charged particles in rotating and fixed magnetic fields, using drift approximation equations to determine field parameters 22 p3956 A66-40573

Smooth particle motion in nonresonant HF and magnetostatic fields 23 p4100 A66-41141

Electric microfields in plasma taken as system of charged particles moving in

uniform neutralizing background, using approximations and Monte Carlo study 23 p4101 A66-41363

Radiative equilibrium of electron gas in magnetic field based on quantized particle motion and perturbation theory 23 p4101 A66-41365

Second term obtained in asymptotic series for second adiabatic invariant of charged particle motion in static magnetic field and found to vanish at mirror points 23 p4103 A66-41491

Drift approximation of motion equations for relativistic charged particle in electromagnetic field, adiabatic trap, HF magnetic field, etc 24 p4241 A66-42332

Motion of single charged particle inside plasma accelerator with static electric and magnetic fields, showing periodicity of radial motion with time 24 p4241 A66-42397

Parametric phenomena in ferromagnetics, noting parametric excitation of quasi-particles and stationary state of excited waves 24 p4256 A66-42522

Soviet ground station for observation of energy spectrum, composition and anisotropy in arrival directions of primary cosmic ray particles 24 p4269 A66-42917

Solution method for nuclear cascade equation representing process of propagation of pions through atmosphere 24 p4270 A66-42925

HF potential for motion of charged particle in combined quasi-static magnetic and HF electromagnet field 24 p4246 A66-43096

Adiabatic theory and lowest order invariants applied to Van Allen radiation indicate that without collisions particles would remain in geomagnetic field 24 p4240 A66-43110

PARTICLE PRODUCTION

SA KAON PRODUCTION

Recombination coefficient and electron production rate in lower D region during solar flare 04 p0574 A66-13444

Accuracy estimation in determination of maximum values of electron production 04 p0514 A66-13446

Calculation of neutron generation by mu-mesons for various depths in Earth 05 p0755 A66-15409

Secondary particle generation in satellite walls due to 0.1 to 20 bev pi-mesons and protons 05 p0756 A66-15411

Neutral pi-meson production in processes involved in formation of large ionization bursts by high-energy nuclear-active particles 07 p1114 A66-17547

Multiple meson production analyzed by conformal mapping of Lobachevskii plane onto Euclidean strip 07 p1116 A66-17559

Neutrino generation in solar interior 08 p1297 A66-19451

Monte Carlo method analysis of electron photon cascade 09 p1436 A66-20134

Particle formation involving homogeneous condensation by mixing reaction technique for eventual development of colloid thruster [AIAA PAPER 66-254] 10 p1593 A66-21459

Propellant properties and particle formation efficiency determined for homogeneous condensation-type colloid thruster [AIAA PAPER 66-253] 11 p1760 A66-22221

Cosmological-galactic creation, steady state expansion and high energy particle production associated with radio sources 11 p1774 A66-23068

Distribution of atoms and molecules in comet head, assuming particles may be created and annihilated during dissociation and ionization 12 p1945 A66-23509

Quantum mechanics and gravitational effect on origin of cosmic particles, discussing Schroedinger wave equation, electric potential and alpha decay 12 p1944 A66-24465

High energy particle generation in coaxial plasma gun studied by discharge-current curve 13 p2153 A66-26522

Pion emission in backward hemisphere in laboratory system of cosmic ray jets 13 p2088 A66-26576

Production spectrum of high energy electrons from high energy cosmic ray pion decay and proton-proton collisions 13 p2176 A66-26762

High energy cosmic ray collisional pion production spectrum and pion energy and angle distributions in CMS and laboratory frames from Landau-Milekhin hydrodynamic model of very high energy nucleon 13 p2176 A66-26763

Collision cross sections of high energy nucleon-nucleon interactions in nuclear emulsion 15 p2583 A66-29545

Experimental data analysis of cosmic ray showers, secondary particle production by nucleon-nucleon collision at high energy, momentum distribution in pions and primary energy-inelasticity relation 15 p2583 A66-29547

Electron-photon cascades caused by nuclear active component in atmosphere and on gamma rays, atmospheric absorption spectrum of primary nucleons and generation of pions 15 p2584 A66-29556

Particle energy measurements in high energy jets with large stacks of nuclear emulsion 15 p2584 A66-29557

Energy and angular distribution of meson created by 22 gev protons in lithium hydride with respect to secondary cosmic radiation 15 p2585 A66-29563

Cosmic ray measurements, muon production from decay of charged pions and kaons, muon polarization, momentum spectra, atmospheric gamma cascades and derivation of kaon/pion ratio 15 p2587 A66-29573

Muon charge ratio derived from inelastic collision model of pion production, considering just average multiplicities 15 p2588 A66-29575

Electron-muon similarities and multiple pion production by high energy muons, using accelerators and cloud chamber 15 p2546 A66-29576

Electron pair production by high energy muons, noting application of Monte Carlo method for appearance of low energy with high energy partner below target plate 15 p2546 A66-29583

Particle number fluctuation in electron-photon shower, influence on spectrum of bursts produced by high energy mu mesons under thick filters 15 p2589 A66-29585

High energy neutrino production in atmosphere contributed by pion, muon and kaon interactions 15 p2590 A66-29593

Energy spectra of muons and neutrino production from cosmic gamma rays 15 p2547 A66-29597

Electron content for ionospheric station located 47 degrees N determined from observation of Faraday polarization rotation 15 p2496 A66-30073

High energy photon absorption in space due to electron-positron pair production in photon-photon collision 16 p2750 A66-30150

Production rates of muons in extensive air showers determined from spatial and energy distributions 16 p2795 A66-31694

Ionospheric electron generation formula derived, based on analysis of interaction of cosmic radiation on ionosphere 17 p2994 A66-32882

Exchange reactions of charges appearing when beam of fast ions passes into thin gas target, examining characteristics of source of high energy neutral particles 17 p2961 A66-32947

Neutrino generation in solar interior 18 p3232 A66-34480

Neon hodoscope study of energy and production heights of high energy EAS electron-photon cascades, comparing results to nuclear emulsion study findings 18 p3207 A66-35109

Primary gamma ray production, arrival directions, particle collisions and distribution of EAS penetrating particles in intergalactic space 18 p3209 A66-35120

Production spectra and arrival time distributions of heavy cosmic ray particles in air showers 18 p3210 A66-35127

Extremely high energy nuclear interactions observed by emulsion chamber, deriving inelasticity of nucleons and mesons and transverse momentum of fireball 18 p3215 A66-35158

Inelastic n-p cross section at 60 gev determined from attenuation of penetrating shower-producing cosmic ray neutrons in paffer and graphite 18 p3216 A66-35167

Particle production at superhigh energies based on composite model of particle and resonance 18 p3141 A66-35175

Mu meson charge ratio variation with energy at sea level 18 p3219 A66-35186

Positive excess of cosmic ray muons at sea level, taking into account change of ratio of proton to neutron with atmospheric depth 18 p3219 A66-35187

Muon charge ratio change with energy at large zenith angle 18 p3219 A66-35188

Positive excess of cosmic ray muons as function of energy from data collected by Nagoya spectrometer at large zenith angle 18 p3219 A66-35189

High energy single meson production, analyzing and comparing various models 18 p3220 A66-35192

Stack of nuclear emulsion exposed underground to analyze fast neutrons, obtaining energy spectrum of neutrons from measurements on hydrogen recoils 18 p3222 A66-35211

Distribution of atoms and molecules in comet head, assuming particles may be created and annihilated during dissociation and ionization 20 p3646 A66-37022

Cosmic radiation theories and experimental supporting evidence, origin of cosmic ray particles and relation between cosmic ray sources and radio wave sources 20 p3631 A66-37436

Production and equilibrium spectrum of galactic cosmic ray secondary electrons arising from secondary pion and neutron decay 20 p3633 A66-38200

Upper atmospheric phenomena and particle precipitations noting ionization cross section, energy and spatial distribution and auroral activities 20 p3642 A66-38334

Relativistic electron production by cosmic radiation in lower ionosphere 20 p3645 A66-38437

Quark abundance effect on limits of anisotropy of universe determined from study of radio and quasi-stellar objects 22 p3982 A66-40539

Measures of electron production and loss and scale height of F-1 layer during summer solar minimum 22 p3916 A66-40808

Phenomenological picture of production of secondary particles in nucleon interactions at energies of hundreds and thousands of bev 24 p4267 A66-42902

High energy inelastic interactions, discussing necessity of statistical methods, secondary particle composition and angular distribution, etc 24 p4267 A66-42904

Cross section for lambda, kappa and sigma particle production in cosmic ray interaction with C, Cu and Pb nuclei dependent on atomic weight of target material 24 p4268 A66-42911

Inelastic interactions at ultrahigh energies, discussing secondary particle jets production moving in same direction as colliding particles 24 p4268 A66-42912

Muon production in atmosphere and energy dependence of positive excess 24 p4271 A66-42938

PARTICLE PROPERTY

Properties of chromium particles obtained by vaporization of metal in argon at low pressure, noting cubic shape, electron diffraction pattern, etc 06 p0894 A66-16185

Characteristic spectral information obtained from surface of fine particles if spectrum is observed at high SNR or particles are compacted 14 p2335 A66-27809

Static properties and interactions of neutrinos noting mass, spin, helicity, charge, lepton number, etc 15 p2546 A66-29582

Representation of cone group of zero-mass particle with complex spin 16 p2767 A66-31736

Muon-poor EAS determined from 80,000 EAS recordings, representing distribution of recorded muon multiplicities over large intervals by Polya distribution 18 p3205 A66-35098

Polarized pyrometric probe with thermal insulation, comparing probe radiation with volt ampere characteristics of plasma to obtain particle density and energy 19 p3409 A66-36280

Auroral absorption analysis during geomagnetic storm, noting satellite measurement of energetic

particles 20 p3642 A66-38335

PARTICLE SIZE

Effect of incomplete and inaccurate optical information on particle size distribution function, considering transparency and scattering pattern 01 p0097 A66-10758

Formula for average rate of atmospheric particle fallout in terms of height-averaged values of density and viscosity of atmosphere 01 p0097 A66-10760

Ratio of maximum wall thickness to crater depth as function of impact velocity of meteoric particles 06 p0961 A66-17173

Model derived describing oxide particle distribution obtained from internal burning cylindrically-perforated aluminized solid propellant grains [AIAA PAPER 65-10] 08 p1282 A66-19137

Fourier analysis, used to determine particle size, strains and faulting, applied to silver films evaporated onto glass substrates at different residual gas pressures 09 p1383 A66-20255

Liquid and particulate content of atmosphere noting surface rates of rainfall, particle size distribution, cloud data, aerosols, etc 09 p1398 A66-20272

Atmospheric aerosol size distribution from scattered light measurements by rocketborne equipment 11 p1697 A66-22565

Effect of incomplete and inaccurate optical information on particle size distribution function, considering transparency and scattering pattern 14 p2326 A66-27857

Formula for average rate of atmospheric particle fallout in terms of height-averaged values of density and viscosity of atmosphere 14 p2327 A66-27859

Particle size and heat treatment effects on stability and reflectance of thermal control glass pigment coatings under UV radiation [AIAA PAPER 65-136] 15 p2616 A66-29288

Nuclear radil for electromagnetic interactions of primary cosmic ray particles in nuclear emulsions 15 p2545 A66-29546

Ice crystal size during expansion of humid air in supersonic nozzle 17 p2948 A66-32417

Heavy cosmic ray primary energy spectrum from BASJE measurements 18 p3209 A66-35122

Permeability of porous sintered tungsten depends on density of specimen and particle size of tungsten powder 19 p3382 A66-36121

Particle size distribution, aging effects, terminal velocity measurements and production techniques of slush hydrogen investigated as potential upgraded spacecraft fuel 20 p3676 A66-37075

Burning rate anomalous dependence on particle size for ammonium perchlorate-polystyrene mixture 20 p3679 A66-37703

Particle size effects in age hardening of high temperature Ni-based alloys 20 p3586 A66-38094

Shock propagation and attenuation in porous graphite and aluminum foams, noting effects of particle shape and size on materials response to shock loading 20 p3588 A66-38407

Particle growth in rocket nozzle, particle size distribution, effect of channeling, determining increase of mass-median diameter of distribution 22 p3971 A66-40364

Free-atomic pseudopotentials, sizes, s-p splittings and pseudowave functions 22 p3951 A66-40910

PARTICLE THEORY

SA MANY-PARTICLE THEORY

Cosmic rays and fundamental problems in elementary particle theory 01 p0133 A66-10642

Ionosphere and high latitude particles - COSPAR Symposium, Alpbach, Tirol, Austria, March 1964 03 p0361 A66-12639

Particle-field interaction in magnetosphere discussing categories, properties, scale model experiments, etc 03 p0363 A66-12646

Evolution of system of gravitational interacting point particles noting quasi-equilibrium states and particle evaporation and radiation 03 p0427 A66-12910

New tests for invariance of vacuum state under Lorentz group 04 p0546 A66-13456

Simple alternative derivation of conventional cluster expansion formula for matrix elements of identity and Hamiltonian for expectation value of energy of many-Fermion system 08 p1259 A66-19445

Nature and relationship of elementary particles classified according to quark theory, for scientists lacking particle theory specialized knowledge 09 p1404 A66-20932

Gaudin-Meloy distribution parameter estimation from fracture data, based on moments about origin 10 p1613 A66-21180

[AICE PREPRINT 17E] 10 p1613 A66-21180

Nonconservation of baryon and cosmological theory, discussing creation of matter in discrete manner around isolated pockets with strong gravitational fields 11 p1774 A66-23067

Particle theory in which additive particle labels are defined in geometric terms of classical gauge theories of Yang-Mills type 12 p1916 A66-23823

Distorted wave one-meson-exchange /DWOME/ for high-energy elementary particle reaction analysis, leading to different expression for transition amplitude 13 p2131 A66-25482

Evolution of system of gravitational interacting point particles, noting quasi-equilibrium states and particle evaporation and radiation 14 p2380 A66-27258

Cosmic rays and fundamental problems in elementary particle theory 14 p2377 A66-27949

Electromagnetic form factors of electron and muon neutrinos evaluated, using intermediate vector-boson theory, noting renormalization induced by electromagnetic interactions 15 p2544 A66-28944

Dynamics of baryon-meson systems in 27-fold representation, obtaining self-consistent bound state and low lying resonant solutions with Balazs method 15 p2544 A66-28945

Spin-free transition density matrices, using permutation group algebra 15 p2547 A66-29620

Solution to chain of kinetic gas equations, showing effect of fast reversible and slow irreversible processes on particle distribution function 21 p3771 A66-39248

Electron field operator derivation from dynamical rearrangement formulation applied to neutral superconductivity 23 p4112 A66-41275

Microscopic model of symmetry between particle and antiparticle populations in expanding universe 23 p4131 A66-42065

PARTICLE TRACK

Stereocamera for determining spatial orientation of cosmic particle tracks in large diffusion chamber 03 p0368 A66-12503

Nuclear emulsions exposed for several days in recoverable satellite scanned for ending tracks of cosmic ray particles, obtaining energy spectra for various nuclei 07 p1111 A66-17464

Identification of charged fast particles in nuclear emulsions, measuring multiple scattering of protons and mesons along track with various kinetic energies 07 p1114 A66-17543

Geometric program for processing penetrating cosmic ray shower data consisting of individual track processing and initial point location 09 p1441 A66-20234

Photometric measurements of tracks of heavy primary particles found in emulsion stack near geomagnetic equator, noting ratio of C and N nuclei to O nuclei 11 p1762 A66-22654

Proton energy spectrum of flux penetrating packs of passive radiation sensors on Gemini IV and V missions 17 p2865 A66-32185

Tracks of nuclei of primary cosmic rays that ended within nuclear emulsions and possibility of separating isotopes 18 p3192 A66-34842

Energy estimation of high-energy interactions by quartile angle of emitted tracks, estimating fireball mass and elasticities 18 p3218 A66-35179

PARTICLE TRAJECTORY

Kinematic and physical relations for small motion superposed on initial motion defined in fixed reference frame 01 p0106 A66-10735

Axisymmetric cluster of hyperbolic trajectories of material particle near planet, for space navigation application 02 p0289 A66-11652

Numerical analysis of behavior of very large number of constant volume particle trajectories 02 p0253 A66-11822

Electromagnetic disturbances effects on particles trapped in radiation belts 05 p0749 A66-15251

Text on high energy beam optics including trajectory optics in quadrupole systems and deflecting magnets, spectrometry, envelope optics and particle beams 06 p0911 A66-16306

Nucleon passage through atmosphere and meson production data including nuclear cascade intensity, gamma ray production, etc, and mean free path values for nucleon interaction 07 p1115 A66-17553

Cosmic ray threshold rigidities determined by trajectory calculations, noting disagreements between hemispheric data 07 p1128 A66-18017

Vertical cut-off rigidities of cosmic rays, using sixth degree simulation of geomagnetic field 07 p1128 A66-18019

Particle distribution in neighborhood of charged sphere in weakly ionized rarefied plasma 08 p1263 A66-19022

Latitude variation of second harmonic of diurnal variation of cosmic rays, considering curvature of particle trajectories in geomagnetic field 09 p1439 A66-20222

Particle localization in spark chamber and ion drift in Wilson cloud chamber, noting experimental result of simultaneous observation of identical particles 09 p1379 A66-20233

Spatial scattering of associated electromagnetic waves arising during passage of fast charged particles through semiconductors, noting role of Cerenkov radiation 09 p1428 A66-20596

Effect of higher harmonics of geomagnetic field on cosmic ray trajectories, noting reception cones of Soviet stations 12 p1943 A66-24268

Newtonian and relativistic analysis of orbits of electromagnetically neutral test particles in magnetic universe 12 p1914 A66-24567

Plasma stability with plane boundary, noting effect of perturbed electric field, particle trajectory and equilibrium distribution 13 p2144 A66-25726

Violation of second and third adiabatic invariants, examining mirror point change of trapped particles under displacement of guiding centers along force-lines and particle diffusion 13 p2176 A66-26356

Momentum measurements of muons using solid iron magnet spectrograph 15 p2546 A66-29578

Multiple penetrating particles underground, noting interaction of muons with matter at 148 meters water equivalent 15 p2546 A66-29584

Molecular-kinetics experiments /trajectory calculation of particle interaction/ using digital computer iterative method for theoretical comparison 16 p2656 A66-30947

Proton trajectories in static dipole magnetic field, noting effects in radiation belt proton pitch angle oscillation at cyclotron frequency, etc 17 p2993 A66-32519

Numerical calculation of relative intensity distribution of solid particles in cometary head, neglecting interparticle collisions 17 p3011 A66-33384

Flight performance of small diameter folding fin aircraft rocket using particle trajectory shows large dispersion magnitudes 18 p3240 A66-33819

Threshold rigidities for vertical incident cosmic ray particles derived, using trajectory computations by higher-order simulation of geomagnetic field 18 p3198 A66-34881

Effects of deformed magnetic field on trajectories and asymptotic directions of arrival of medium energy cosmic rays at various stations, using spherical harmonics 18 p3198 A66-34883

Spatial scattering of associated electromagnetic waves arising during passage of fast charged particles through semiconductors, noting role of Cerenkov radiation 20 p3622 A66-38130

Plasma flux reflection from magnetic surface for nonlinear reflected plasma in region of particle trajectory rotation 21 p3787 A66-39049

Charged particle motion in magnetic traps of acute geometry, examining particle trajectories by numerical

integration 21 p3788 A66-39056

Rarefied plasma in magnetic trap with oppositely moving magnetic fields, examining charged particle motion 21 p3788 A66-39057

Differential equations for stream functions of particle trajectories in unsteady three-dimensional flows in cylindrical and spherical coordinate systems 22 p3898 A66-40111

Adiabatic motion of auroral particles in model of electric and magnetic fields surrounding Earth, commenting on importance of higher order terms in asymptotic expansion 22 p3914 A66-40561

High energy neutral particle injection into mirror quadrupole cusp magnetic well, Lorentz ionization and trapped particle trajectories 23 p4103 A66-41493

Density fluctuations of penetrating particles in extensive air showers at various distances from shower axis 24 p4268 A66-42916

PARTITION FUNCTION

Evaluation of absolute free energy of rigid-disk system at very high compression 05 p0740 A66-15772

Free energy of single and multicomponent plasmas in particle number density determined, using quantum mechanical perturbation expansion of partition function 15 p2552 A66-29617

Partitioning procedure for shell theory equations, using intercorrelation function 17 p3025 A66-32591

Upper and lower bounds on partition functions for finite systems of rigid disks and spheres for high density limit 18 p3139 A66-34503

PASSIVE SATELLITE

SA ECHO SATELLITE

Echo II program to launch passive communications satellite that will maintain spherical shape and surface smoothness after loss of inflatable pressure 01 p0145 A66-11122

Experiments with Echo II satellite to determine its capability as passive communications device and study shape and surface as function of time 01 p0032 A66-11126

Echo project objectives and results 01 p0145 A66-11127

Lincoln radar calibration sphere ejected from Titan III-A transtage to calibrate all but large-scale radar installations 11 p1777 A66-22875

Post-Echo II passive communication satellites and systems and results of Comsat systems [AIAA PAPER 66-312] 12 p1823 A66-24778

Orbit position control based on solar pressure on plane sail structure and hollow thin-skinned lenticular shape of passive communications satellites [AIAA PAPER 66-313] 12 p1956 A66-24779

Passive satellite communications system for conventional and specialized networks, discussing new materials and satellite configurations 14 p2244 A66-28402

Dynamical formalism for arbitrary number of interconnected rigid bodies analyzed with reference to passive attitude stabilization of satellites 20 p3659 A66-36886

Periodic oscillations of satellite in plane of elliptic orbit investigated to provide passive orbital stabilization of satellite 23 p4134 A66-41980

PATCH TEST

Effect of variations of seven elements on resistance of Invar production heats to weld metal cracking, using circular patch test 14 p2314 A66-27344

Contamination control methods used in Royal Swedish Air Force, presenting special particle counting and patch test methods in hydraulic oils 17 p2870 A66-32204

PATENT

Government research and development inventions 06 p0972 A66-16076

Possible infringement liability regarding unlicensed transmission of copyrighted works via communications satellites 07 p1155 A66-17227

PATH

S DIFFRACTION PATH

S FLIGHT PATH

S GLIDE PATH

S MULTIPATH PROPAGATION
S OPTICAL PATH
S TRAJECTORY
PATHOLOGICAL EFFECT
 Flight accident casualties, pathological changes in bodies of victims of Comet 4C SA-R7 accident in Italy 14 p2229 A66-26812
 Erythropoieting properties and polyglobulia-inducing techniques 14 p2227 A66-26814
 Pathomorphological changes in hemopoietic organs of mice after irradiation with high energy protons 15 p2438 A66-29482
 Short-term starvation effect on gastric mucosa of weanling vs post-weaned rats 16 p2638 A66-30636
 Residual pathologic changes in central nervous system of dog following rapid decompression to 1 mm Hg 19 p3286 A66-36381
PATHOLOGY
SA HUMAN PATHOLOGY
 Air Force pathologist role in accident investigation, noting crash injuries 19 p3294 A66-36443
 Thromboelastographic investigation of short duration high-intensity chest-to-back impact deceleration in rats 22 p3856 A66-40502
PATIENT
S INJURY
PATTERN
S DIFFRACTION PATTERN
S FLOW PATTERN
S WIDMANSTATTEN PATTERN
PATTERN DISTRIBUTION
 Source distribution determination from radiation pattern and field amplitudes expressed as Fourier transform pair 18 p3066 A66-33545
PATTERN RECOGNITION
SA AUTOMATIC PATTERN RECOGNITION
 Recognition procedure identifying given star constellation despite erroneous scanning, for application in celestial navigation 01 p0102 A66-10619
 Cluster finding technique for determining and coding subclasses in pattern recognition problems 01 p0034 A66-10894
 Computer simulation of pattern recognition system employing same variables as human visual system and using cell assemblies and contour projection 01 p0034 A66-10963
 Automatic command control system using phonetic voice pattern recognition 04 p0469 A66-13496
 Classifying capacity of learning matrix used in cybernetics, discussing principle and application to weather forecasting and speech recognition 04 p0489 A66-13509
 Electromyography signals to control external power based upon pattern recognition [ASME PAPER 65-WA/HUF-3] 05 p0628 A66-15700
 Bayes risk function of sequential games, discussing recurrence formula, decision rule and approximate computational method in pattern recognition 05 p0639 A66-15838
 Pattern recognition applied to fault detection in equipment testing procedure 06 p0868 A66-15984
 Linearly separable codes for adaptive threshold networks for pattern recognition 10 p1507 A66-21696
 Adaptation theory concepts, examining threshold learning process, Markov chain, learning wave, feedback adaptivity, etc 11 p1647 A66-22299
 Electrocardiogram interpretation by computer, using pattern recognition approach which permits differentiation between normal and abnormal rhythms 12 p1810 A66-24231
 Recognition procedure identifying given star constellation despite erroneous scanning, for application in celestial navigation 13 p2123 A66-25179
 Coupling impedance selection for Perceptron-like adaptive pattern recognition system 13 p2045 A66-25338
 Automatic target recognition, discussing machine analysis problems of aerial reconnaissance data 13 p2124 A66-25657
 Algorithm for perceptron-type recognition systems with input

correlator 14 p2264 A66-27203
 Nervous system and recognition of patterns 14 p2230 A66-27554
 Noise-rejecting spatial filters in signal pattern recognition 14 p2242 A66-28150
 Multicategory pattern recognition, noting mathematical treatment, dimensional and correlational effects, etc 15 p2453 A66-29774
 Measurement of simple and central moments of one-dimensional density function applied to pattern recognition 15 p2475 A66-29864
 Dispersionless ballistics patterns of weapons analyzed as check on reported computer program 16 p2831 A66-31147
 Segmental differential approximation in system identification with data available 16 p2656 A66-31227
 Coherent optical systems in signal processing techniques, information theory and antenna pattern simulation 16 p2657 A66-31242
 Easily mechanized method of using stored samples to approximate set of distributions for adaptive pattern recognizer 18 p3073 A66-34073
 Adaptive on-off communication system for binary data transmission over noisy channel of unknown attenuation 19 p3302 A66-35709
 Learning control system design, discussing hill-climbing and pattern recognition schemes in framework of statistical decision, automata and information theory 19 p3333 A66-36662
 Performance criterion for adaptive pattern classification system, noting approximation to optimum Bayes discriminant function 19 p3333 A66-36665
 Pattern recognition techniques applied to process identification, examining capability of mode learning machines for on-line identification of both linear and nonlinear processes 19 p3310 A66-36712
 Trainable nonlinear function generator using threshold logic elements for pattern classifiers 19 p3338 A66-36737
 Scale of bidirectional similarity in recognition and identification problems 20 p3505 A66-37052
 Square root of time effect on human perception of stimulus pattern unvarying over time 20 p3505 A66-37108
 Adaptive pattern classification system, based on typical patterns or training samples used by system to determine decision procedure that does not require a priori knowledge of probability density of class pattern vectors 20 p3522 A66-37666
 Nonsupervised sequential pattern recognition and classification, analyzing Bayes solution 21 p3720 A66-39640
 Distortion, fill and noise effects on pattern discrimination 23 p4030 A66-41577
 Piecewise linear transformations to simplify multiple threshold rules in statistical decision theory of pattern recognition systems 23 p4040 A66-41595
PAULI EXCLUSION PRINCIPLE
 Superconductivity inhibition by normal polarization, noting mechanism of second order suppressive effect 08 p1255 A66-18631
PAVEMENT
 Stress repetitions as design parameter for pavements, considering traffic load on roads 02 p0216 A66-12220
 Control of pneumatic tire tread design parameters to limit or delay hydrodynamic pressure buildup 18 p3052 A66-34199
PAYLOAD
SA PIGGYBACK SYSTEM
 Economic feasibility of all-rocket approach to reusable launch system, comparing various classes of launch vehicles, noting need for payload recovery [SAE PAPER 650802] 01 p0144 A66-10817
 Analytical solution to determine rocket design for maximum payload energy 02 p0294 A66-11634
 Electric analogy to derive sound laboratory test specification and procedure for testing Nike-Tomahawk payload vibration 08 p1308 A66-18928
 Items affecting information transmitted from payload landed on remote planet to Earth via communications satellite including orbit, transmission policy and orbit injection error effect on communication capability [AIAA PAPER 66-314] 12 p1823 A66-24780

Laboratory payload concept of automated laboratories for planetary exploration, noting systems engineering advantages 13 p2179 A66-25237
 Use of lift to increase payload of unmanned Martian landing capsule, discussing approach corridor and capsule design 13 p2191 A66-25271
 Orbital satellite launching systems, problem of increasing percentage orbital payload at minimum cost and advantages of air breathing engines 14 p2391 A66-27010
 Integrated checkout of Apollo payloads, command module, lunar excursion module and service module 14 p2271 A66-28423
 Mariner II and Mariner IV space probes, discussing Venus and Mars observation, instrument testing, subsystem testing and design 16 p2807 A66-30363
 Increased payload capability of Saturn IB launch vehicle by addition of zero stage to core vehicle which ignites before first stage [SAE PAPER 660451] 17 p3017 A66-33160
 Payload integration in space experimentation, discussing commonality, flight and load matrices, experiment-spacecraft-ground system interfaces, computer methods, etc 20 p3662 A66-37186
 Computerized cost-effectiveness model for large payload test vehicle system of 50-150 launch program 20 p3684 A66-37901
 Optimization of operational payloads for manned Mars missions, discussing life support and environmental control systems, auxiliary power, radiation shielding, data acquisition, navigation, guidance and cost analysis 20 p3663 A66-37903
 Pioneer VI spacecraft design, noting performance and instrument payload 20 p3664 A66-38064
 Transonic buffeting effects on hammerhead shaped payloads analyzed, using power spectral techniques and wind tunnel tests 20 p3672 A66-38170
 Use of lift to increase payload of unmanned Martian landing capsule, discussing approach corridor and capsule design 23 p4132 A66-41113
 Payload capabilities of launch vehicles, particularly for missions with high velocity requirements, analyzing various propulsion systems 23 p4121 A66-41315
 Trajectory and performance analysis instrument unit and payload envelope for Saturn IB space vehicle program 24 p4282 A66-42694
PAYLOAD MASS RATIO
 Calculus of variations method used to maximize payload capability for multistage launch vehicles [AIAA PAPER 66-92] 08 p1304 A66-18998
 DC-9 Douglas short-and medium-range air transport, discussing takeoff field length, fuel capacity, payload and landing-field length 12 p1800 A66-23754
 Frequency distribution of route temperature at supersonic flight levels, noting effect on payload during extended trips [AIAA PAPER 66-371] 12 p1802 A66-24499
 Mars atmosphere definition important in advanced landing vehicle design with increased payload capability and reduced complexity [AIAA PAPER 65-22] 12 p1952 A66-24697
 Space instrumentation for Martian exploration, discussing biological, geophysical, meteorological and engineering equipment, payload mass ratio, etc 13 p2078 A66-25515
 Space station design trends, noting functional requirements, payload capability, logistics and launch requirements 13 p2193 A66-25759
 Electric propulsion for spaceflights, discussing nuclear rocket technology, mission planning, payload optimization, etc 13 p2173 A66-26610
 Aircraft mile cost vs seat mile cost, noting payload estimation, profit potential, productivity and other parameters [SAE PAPER 660277] 15 p2427 A66-29823
 Effect of air mixture application on optimum ascent trajectories and ratio of payload to takeoff weight of carrier rocket configurations 16 p2790 A66-30345
 Rocket engines for Black Arrow satellite launcher, noting solid propellant motor in

- third stage, payload mass ratio, etc 16 p2791 A66-30349
- Jet engine technology, including spinoff from lift jet, propulsion systems, cost estimates, etc 16 p2791 A66-31280
- Lift engine technology, noting effect on operational transport aircraft design, VTOL capabilities, low speed control, etc 17 p2844 A66-32732
- Heavy equipment short-range transportation with crane-type helicopters, noting correlation between lift capacity and aircraft weight 17 p2845 A66-32739
- Electric propulsion for transfer mission between parking orbits in cislunar space under optimum payload conditions 17 p2992 A66-33238
- Maximum payload delivery with restricted-power propulsion system, noting trajectory optimization course-correction-time distribution, etc 18 p3242 A66-33849
- Titan III building blocks, discussing vehicle features, launch facilities, mission and maneuver capability, payload mass ratio, etc [SAE PAPER 660447] 18 p3245 A66-33893
- High energy missions for Saturn such as solar system probes, cometary intercepts, flights to Earth-Moon libration points, etc [SAE PAPER 660448] 18 p3246 A66-33894
- Saturn launch vehicle, discussing methods of increasing payload capacity, engine improvements, propellant substitution, etc [SAE PAPER 660453] 18 p3246 A66-33896
- Optimum stage initial acceleration and velocity distribution between stages for maximum payload ratio in single and multistage vehicles 19 p3470 A66-36620
- Optimization methods for preliminary cost and mass distribution assessment for multistage rocket vehicles 19 p3470 A66-36622
- Reusable first stages using liquid propellant compared with nonreusable stages using solid and liquid combinations, for minimum cost of loaded-and-ready-for-launch stage cost per unit of stage payload mass 19 p3470 A66-36623
- Relation between weight, drag and cost of single trip single-stage glider 23 p4016 A66-41789
- PCM**
- S PULSE CODE MODULATION /PCM/**
- PDM**
- S PULSE DURATION MODULATION /PDM/**
- PEARSON DISTRIBUTION**
- Pearson universal random distribution generator, noting analysis of randomly chosen variables for unimodal underlying distribution 15 p2526 A66-28808
- PECLET NUMBER**
- Temperature distribution in flow past sphere, discussing time dependent form of Boussinesq transformation [ASME PAPER 65-HT-38] 05 p0784 A66-14752
- Theory of homogeneous-heterogeneous radical reactions in turbulent flow in one-dimensional elongated reactor with high Peclet number 08 p1179 A66-19379
- Convective diffusion of material from single drop moving in liquid medium at low Reynolds numbers, using quasi-stationary approximation 16 p2689 A66-31516
- PEGASUS ENGINE**
- S BRISTOL-SIDDELEY BS-53 TURBOFAN ENGINE**
- PEGASUS SATELLITE**
- Terrestrial transportation via space vehicle with land-recovered reusable booster utilizing Pegasus principle, emphasizing application, speed and commercial feasibility 03 p0433 A66-13222
- Space environment degradation of thermal control coatings tested by experimental packages on Pegasus I, II and III [AIAA PAPER 66-419] 18 p3239 A66-33640
- Pegasus meteorite-detecting satellite design and performance and data on meteorites 24 p4283 A66-42741
- PELLET**
- Forming of titanium alloy pellets which are extruded to make dense bars and composites, noting mechanical and tensile properties 14 p2310 A66-26832
- PELTIER EFFECT**
- SA SEEBECK EFFECT**
- SA THOMSON EFFECT**
- Combined Peltier-Ettingshausen device evaluated for cryogenic refrigeration to 70 degrees K 02 p0272 A66-11490
- Peltier effect analogy of heat absorption and emission at junction in superconductor between region in flux-flow state and region with no flux flow 16 p2769 A66-30154
- Thermoelectric and thermomagnetic properties of semiconductors applied to refrigeration, discussing Peltier and Ettingshausen effects 21 p3798 A66-38767
- PEM EFFECT**
- S PHOTOELECTROMAGNETIC /PEM/ EFFECT**
- PENDULUM**
- SA GYROSCOPIC PENDULUM**
- Periodic solutions of equation circular motions of coupled Froude pendulums 01 p0106 A66-10405
- Periodic motions of double pendulum with medium resistance and applied rotational forces 03 p0369 A66-12710
- Periodic motions of simple pendulum excited by horizontal periodic disturbance 07 p1081 A66-18043
- Small oscillations of pendulum with spherical cavity filled with viscous incompressible liquid 12 p1882 A66-24357
- Stability analysis of linear dynamic system in form of rigid straight shaft having several stable mathematical pendulums 17 p2958 A66-32607
- General method of averaging transformed motion equations of slightly damped nonlinear oscillations of simple pendulum 23 p4090 A66-41542
- PENDULUM APPARATUS**
- Shape of elastic suspension plate for cycloidal pendulum 04 p0524 A66-14395
- Friction corrections introduced in results obtained by differential pendulum method in measuring acceleration of gravity at sea, noting motion equations 06 p0879 A66-16418
- Pendulum motion in system of coordinates related to pendulum base, considering damping of absolute and relative angular velocity 08 p1223 A66-18892
- Bounds for decay times of pendulum damper vibrating in plane containing spin axis of space vehicle [AIAA PAPER 64-658] 12 p1954 A66-24693
- Impact properties of six materials compared on two falling-weight tensile impact testers, pendulum tester and high speed universal tensile tester, giving stress-strain curves 13 p2197 A66-26110
- Resonance oscillations and rotations in pendulum with vibrating suspension point analyzed, using averaging method to determine stability conditions for steady state operation 14 p2290 A66-27164
- Passive wobble damping system with pendulum damper designed for manned rotating space station 20 p3664 A66-38159
- Notched bar impact testing machine with solid slab pendulum and no material protruding beyond striking edge 22 p3988 A66-39670
- PENETRATING PARTICLE**
- Penetrating particle detector sensitive to muons of energy greater than 700 mev and nuclear active particles of energy greater than 15 gev used to monitor extensive air shower 01 p0132 A66-10330
- Mu-meson flux irregularities, lateral distribution and average characteristics in extensive air showers at 200 mwe depths 07 p1118 A66-17572
- Hydrogen ion intrusion into stainless steel surface measured with apparatus in which hydrogen and helium condensation pumps provide ultrahigh vacuum 13 p2108 A66-25754
- Nondestructive testing specifications noting equipment, personnel and acceptance criterias, radiographic ultrasonic penetrant and magnetic particle specifications, etc 15 p2508 A66-28814
- Hodoscope recordings of extensive air showers with abnormally low content of penetrating particles 15 p2579 A66-29523
- Multiple penetrating particles underground, noting interaction of muons with matter at 148 meters water equivalent 15 p2546 A66-29584
- Upper and lower limits to expected alpha and beta hydrogen and helium line emissions due to protons and alpha particles penetrating auroral atmosphere 22 p3913 A66-40554
- Penetrating radiation measurement on Moon surface obtained by Luna IX spacecraft 23 p4128 A66-41410
- Density fluctuations of penetrating particles in extensive air showers at various distances from shower axis 24 p4268 A66-42916
- PENETRATION**
- S CRATERING**
- S FRAGMENTATION**
- S IMPACT**
- S PROJECTILE PENETRATION**
- S TARGET PENETRATION**
- PENETRATION BALLISTICS**
- Meteoritic penetration through obstacle theoretically considered 15 p2606 A66-28498
- Cratering in materials analysis, considering transient, primary, secondary and recovery phases, using rod projectiles at high velocity impact 15 p2607 A66-28702
- Mathematical model for predicting strength and density of material from deceleration-time history of instrumented impact probe 18 p3253 A66-33805
- Penetration parameters of individual targets of different materials, examining impulse due to perforation, penetration hole diameter and front and back dispersion angles 20 p3672 A66-38115
- PENNING DISCHARGE**
- Dependence of properties of moving striations in plasma of positive column on external and internal parameters 04 p0553 A66-14178
- Diffusion coefficient calculated for fluctuations due to flute instability in low pressure Penning discharge, using measured correlation times and flute amplitudes 13 p2156 A66-26688
- Retarding potential measurement of kinetic energy of electrons released in Penning ionization by excited helium atoms in metastable electron states 18 p3139 A66-34505
- RF breakdown in air studied for two electrode configurations leading to nonlinear Mathieu-like differential equations for confined electron motion 19 p3296 A66-35417
- Production of hot plasma by Penning discharge in inhomogeneous magnetic field accelerating ions to high energy level by strong electric field 19 p3431 A66-36592
- PENTABORANE**
- Chemical inhibition of pentaborane-oxygen reaction in development of improved fire protection systems 03 p0413 A66-12487
- PENTAERYTHRITOL TETRANITRATE /PETN/**
- Combustion temperatures of explosives PETN, hexogyn and tetryl in constant pressure bomb in nitrogen atmosphere 08 p1316 A66-18795
- PENTOBARBITAL SODIUM**
- Mice susceptibility to pentobarbital sodium, showing short term fluctuations in toxicity 09 p1338 A66-20964
- PENTOLITE**
- Oblique detonation impacts in pentolite on iron treated by methods of plane steady compressible flow, discussing regular and shock Mach reflection and expansion 21 p3727 A66-39172
- PEPTIDE**
- Behavior of synthetic polyribonucleotides in cell-free amino-acid-incorporating systems from E coli, noting release of polypeptide chains into supernatant fraction 12 p1805 A66-23538
- RNA requirements in formation of primordial organism, noting peptide synthesis 17 p2850 A66-32084
- Amino acid, peptides and spherules obtained from sparking in closed atmosphere of ammonia, methane, hydrogen and water 17 p2851 A66-32088
- Dipeptidyl arylamidase I of bovine pituitary tissue and chloride and sulphydryl activation of seryltyrosyl-beta-naphthylamide hydrolysis 17 p2861 A66-32899
- Repetitions in polypeptide sequence of cytochromes 18 p3059 A66-34196
- Amino-acid-sequence determination in peptides using N-fatty acids, mass spectra of peptide derivatives and computer techniques 20 p3510 A66-37057
- Synthesis of peptides related to active site of esterase enzymes 20 p3510 A66-37633
- Statistical mechanics DNA molecular

model, noting bonding free energy between adenine-thymine and guanine-cytosine base pairs 21 p3699 A66-38530

Classification of display systems according to human sense 16 p2644 A66-31413

PERCEPTRON

Automatic pattern recognition and application to space navigation 04 p0543 A66-13511

Coupling impedance selection for Perceptron-like adaptive pattern recognition system 13 p2045 A66-25338

Algorithm for perceptron-type recognition systems with input 14 p2264 A66-27203

PERCEPTUAL DEPRIVATION

S SENSORY DEPRIVATION

PERCEPTUAL SPEED

Psychological stress susceptibility of naval and marine pilot trainees, examining environmental cue manipulation to control perceptions 03 p0327 A66-12355

Inter- and intramodal comparisons of light and tone durations in two-alternative forced-choice situation, noting possible judgment errors 13 p2015 A66-25789

Tone quality variation with time interval of perception, using photometer with Balzer interference filter 20 p3507 A66-38099

PERCHLORATE

S AMMONIUM PERCHLORATE

S HYDRAZINE PERCHLORATE

S NITRONIUM PERCHLORATE

PERCHLORIC ACID

Methane-rich premixed flames of perchloric acid analysis noting burning velocities, temperatures and burnt gas composition required for stoichiometric mixtures 02 p0304 A66-12018

Nitrogen, phosphorus and calcium determination from perchloric acid digestion, process includes sample collection, preparation, digestion and determination 17 p2870 A66-32143

PERCHLORYL FLUORIDE

Dipole moment of perchlorofluoride by measuring absolute absorption maximum and linewidth parameters in resonant cavity 24 p4170 A66-43038

PERCUS METHOD

Chemical potential and integral equation for correlation functions of classical fluids, using Percus method when functions exhibit cluster properties 14 p2276 A66-27637

PERFECT GAS

SA IDEAL GAS

Steady state irrotational flow of perfect gas in plane and axisymmetric Laval nozzles 01 p0008 A66-11015

Boundary layer relation between viscosity laws of perfect gas and equilibrium dissociating air 04 p0456 A66-14158

Adherence of gas to wall, investigating Boltzmann equations for perfect fluid, Prandtl-type flow and state of rest fluid 05 p0661 A66-14535

Hypersonic perfect gas flow around slightly blunted plate, discussing analogy between asymptotic shock behavior and explosion theory 07 p0981 A66-18109

Plane rotational motions of perfect fluid in presence of elliptical and circular cylinders and flat plates 07 p1026 A66-18340

Equations of inviscid flow of perfect gas over cusped concave bodies, noting dependency of shock wave slope on infinite Mach number 08 p1166 A66-19818

Leading edge pressure distributions measured on circular cylinders in normal cross flow, obtaining data from tests in arc-heated perfect gas and variable atmosphere wind tunnels 11 p1686 A66-22845

Shock wave systems in design and

operation of supersonic intakes, noting motion equation describing flow and role of multiple wedges meeting at one point 12 p1800 A66-25003

Perfect thermodynamic vapor, deriving analytic relation for efficiency of two Rankine cycles 13 p2001 A66-26254

Self-similarity criteria in radiative flow for unsteady one-dimensional inviscid flow of perfect gas 17 p3034 A66-32471

Inviscid hypersonic flow of perfect gas past symmetric two-dimensional and axisymmetric blunt bodies at angle of attack [AIAA PAPER 66-411] 18 p3045 A66-33636

Body shapes providing minimum wave resistance to supersonic flow of perfect gas, considering bodies around which flow causes bound shock waves 23 p4009 A66-41717

PERFORATED PLATE

Stress field about axial crack in pressurized cylindrical shell 01 p0152 A66-10379

Stress concentration near holes with reinforced edges in elastic plate 03 p0440 A66-13288

Elastoplastic stressed state of plates with holes assuming Illushin theory of deformation 04 p0587 A66-13489

Biaxial uniform stressed state of physically nonlinear plate with circular hole 04 p0589 A66-14145

Elastic impact and perforation of aluminum plates at minimal velocities by projectiles 05 p0775 A66-15299

Plane stationary thermoconductivity problem for infinite series of identical circular holes having same temperature 06 p0970 A66-16328

Symmetrical loading of infinite plate weakened by three circular holes 08 p1306 A66-18704

Stressed state of unbounded nonlinear isotropic plate with square hole during triaxial uniform tension 08 p1307 A66-18880

Small parameter method determination of pure bending and torsion of thin plate with circular hole, where material of plate obeys nonlinear elasticity law 08 p1312 A66-19435

Stress-strain state of infinite plate with two holes of different diameter solved, using integral equation derived for two-dimensional problem in elasticity theory for anisotropic medium 08 p1314 A66-19578

Stress concentrations in fatigue bending of perforated rectangular and tapered plates studied by photoelastic means 08 p1315 A66-19802

Simplified formula for circumferential tensile stresses at boundary of suddenly punched circular hole in stretched plate 10 p1617 A66-21499

Photoelastic solution of distribution of stresses around centrally located elliptical hole in plate of finite width subjected to uniform axial loading 12 p1962 A66-23991

Plastic band propagation near circular hole for biaxial tension of plate consisting of strain hardening material 12 p1967 A66-24114

Review of published papers on stress-strain of perforated shells, including bibliography 13 p2201 A66-26402

Bending of isotropic perforated plate with linear temperature 13 p2201 A66-26405

Stress-strain state near ring reinforced hole in spherical shell under internal load 13 p2201 A66-26407

Photoelastic investigation of stress concentrations near circular hole in hyperbolic shell under axial compression 13 p2201 A66-26409

Shallow spherical shell with hole hinge-supported and flexibly fixed 13 p2201 A66-26410

Critical load under uniaxial tension for thin infinite plates with holes weakened by cracks 13 p2202 A66-26415

Stress concentration for cylindrical bending of plates with holes, deriving equations and evaluating errors in classical theory 13 p2203 A66-26424

Elimination of stress concentrations at holes in plates, noting selection of compensating reinforcement 13 p2204 A66-26434

ring 13 p2204 A66-26434

Stress concentration at rectangular hole with rounded corners in nonlinear elastic plates 13 p2204 A66-26437

Stress concentration near hole in shell 13 p2205 A66-26438

Stress-strain state and temperature field near circular hole in thermoelastic plate, assuming stresses and strains propagate as waves 13 p2205 A66-26439

Effect of stress concentrations on load carrying capacity of brittle materials of nonuniform microstructure, considering iron plates with holes 13 p2205 A66-26441

Stress redistribution in vicinity of holes in polymeric plate under tensile stress 14 p2396 A66-27180

Stress of isotropic rectangular plate with elastic collar soldered into it under tensile load 15 p2607 A66-28770

Pure bending of orthotropic plate with curvilinear hole reinforced by rigid ring 15 p2612 A66-29425

Stress concentration of isotropic plate weakened by infinite row of elliptical holes 15 p2612 A66-29426

Tension of isotropic plate with two different curvilinear holes studied by successive approximations 15 p2612 A66-29427

Stress distribution of isotropic plate with infinite row of circular holes with elastic cores or elastic ring reinforcement 15 p2612 A66-29428

Stress distribution in plate with infinite number of equally spaced square reinforced holes situated along axis of plate 15 p2612 A66-29429

Stress distribution in anisotropic plate with equally spaced elliptic holes reinforced by rigid rings 15 p2612 A66-29430

Kosmodamianskii approximate method for solution of tension problem of isotropic plate with two similar circular holes reinforced by rigid rings 15 p2613 A66-29431

Approximation method for solution of bending problem of isotropic plate resting on rigid columns to cover case of anisotropic plate with reinforced elliptic hole 15 p2613 A66-29434

Plastic strain effect on fatigue strength of aircraft skin sheets with hole subjected to constant loading, noting stress concentration at hole 16 p2815 A66-30678

Boundary perturbation solution of stress concentration around curved hole in thin plate under elastic bending 16 p2819 A66-31140

Elastic stresses around holes in webs of simply-supported wide-flange beams under uniform load 17 p3024 A66-32396

Stress concentration factor at circular and elliptic holes in glass-fiber-reinforced plastic plate subject to elongation at angle to orientation direction 18 p3251 A66-33702

Steady state stress in flat plate with elliptical hole subjected to linear heat source 20 p3669 A66-37575

Bending of elliptical anisotropic plate with two elliptic holes 20 p3669 A66-37668

Stability of annular plate with small hole 20 p3669 A66-37669

Stress analysis of elastic cylindrical shell perforated by rectangular cut-out and governed by Donnell equation 20 p3673 A66-38272

Extension of upper limit of Reynolds number for constant discharge coefficient of quadrant-edge orifice meter, noting performance in turbulent zone 21 p3724 A66-38819

Moment stress effect on elastic equilibrium of plate with circular opening 22 p3991 A66-40148

Elasticity problems solutions as related to stress distribution at holes in shells and plates 23 p4137 A66-41002

Two-dimensional elastic equilibrium problems in reinforced plates with holes and bending theory problems in reinforced thin plates 23 p4137 A66-41003

Stress concentration around curvilinear holes in plate, discussing plane problem of elasticity theory and shell theory 23 p4143 A66-41960

Stress-strain analysis of critical load-induced crack formation near elliptic or circular hole 24 p4290 A66-42438

Stress redistribution in vicinity of holes in polymeric plate under tensile stress 24 p4290 A66-42733

PERFORATION

Stress concentration at holes to determine

service life or load-carrying capacity of thick walled pressurized cylinders 06 p0966 A66-16703

Mixed flow of two gases through coaxial cylindrical tubes separated by perforated plate 14 p2273 A66-26782

PERFORMANCE CHARACTERISTICS

Output criteria function in terms of interference and performance measure 03 p0333 A66-12569

Transistor performance limits as function of semiconductor dielectric breakdown strength and minority carrier saturated drift velocity 07 p1011 A66-18272

Calculation method for pinpointing design characteristics and performance parameters of sounding rockets 09 p1464 A66-20543

Hybrid computer methodology and electronic data processing applied to quality evaluation of test operations 12 p1828 A66-23837

Quadratic performance index in designing linear multivariable control systems 12 p1849 A66-24254

Factors determining performance characteristics of powered aircraft, including takeoff altitude, runway length, air temperature, etc 12 p1802 A66-24833

Direct-coupled multistage integrated amplifier design for optimum performance under arbitrary cascade configuration, noting power gain and frequency range 13 p2040 A66-25831

Role of metrology in design, manufacturing and acceptance testing, evaluating performance characteristics 15 p2508 A66-28811

Two-stage radial-flow turbomolecular vacuum pump noting design, measured and predicted performance, application, etc 16 p2710 A66-30382

Long term solar simulation test, noting spacecraft performance, equipment design, instrumentation, etc 16 p2678 A66-30469

Failure effect on phased array radar systems, noting treatment of outage threshold on probabilistic ground and interdependence of system parts 16 p2652 A66-30663

Time shared general-purpose digital computer with hybrid linkage to analog consoles used for determination of static and dynamic performance characteristics of rocket engines, jet engines, V/STOL aircraft, etc 16 p2658 A66-31249

High performance aerodynamic vehicle design, noting configuration variables, optimum performance parameters, vehicle force characteristics, optimization of hypersonic aircraft performance, etc [AIAA PAPER 66-486] 16 p2635 A66-31476

Performance spectrum of military aircraft noting speed, range, endurance, safety, etc 17 p2843 A66-32501

Microcircuit design, manufacture and application, noting use of silicon monolithic integrated circuits, performance characteristics, reliability, etc 17 p2894 A66-33101

Vertical-track free-fall rocket sled system, discussing design principles, operation and performance characteristics 18 p3093 A66-33796

Single-axis Sun-tracking system for satellite orientation, noting operation modes and system performance 18 p3243 A66-33855

Saturn IVB vehicle constraints noting burning time, associated design problems, performance requirements, propellant management, etc [SAE PAPER 660441] 18 p3245 A66-33889

Thermionic conversion research, discussing direct conversion of nuclear produced heat into electricity, converter performance, lifetime, etc 18 p3053 A66-34055

Optical system for measurement of aerial profile accuracy of large parabolic reflector noting design principles, instrument composition and experimental results 18 p3113 A66-34276

Experimental antenna with closed loop profile control, noting light sensor application and fast response characteristics 18 p3081 A66-34278

Steerable parabolic reflector performance characteristics noting gain, noise pattern, polarization and pointing system performance 18 p3082 A66-34280

Cost and performance factors of steerable parabolic reflectors, spherical reflectors and multilayer antennas 18 p3268 A66-34288

VTOL aircraft performance characteristics noting flying qualities, hover dynamics, transition flight and variable stability system 18 p3052 A66-34623

Kestrel /P-1127/ Tripartite V/STOL Operational Trials, describing aircraft performance, test unit organization, results, etc [SAE PAPER 660320] 18 p3052 A66-34945

Optimal control for plant with polynomial ratio as transfer function, noting general performance index which involves output and control variables 19 p3323 A66-35341

Capacitive transducer principle, describing basic circuit, performance characteristics and sensitivity factors 19 p3355 A66-35472

Astronaut maneuvering unit, discussing experiments, performance requirements, design concepts, system tradeoffs, packaging and configuration 19 p3290 A66-35958

Gain specification of linear controller for large launch booster, using new application of linear control theory 19 p3471 A66-36687

Experimental maneuver demand aircraft control system, noting design considerations, operation and performance characteristics 20 p3493 A66-36887

Twin engine UH-2 Seasprite helicopter, noting increased power availability, advantages and performance characteristics 20 p3495 A66-37046

Jet aircraft electric power system performance affected by transmission line impedances 20 p3499 A66-37191

Pulse generator for driving semiconductor laser diode, noting circuit diagram and operating characteristics 20 p3578 A66-37588

Constant impedance antennas, noting applicability for high gain broadband performance 20 p3530 A66-37711

Variables/attributes/error/propagation /VAEP/ method of system estimation from performance parameters, using binomial analysis 20 p3568 A66-37919

Ranque tube application for gas cooling, discussing performance characteristics of vortex tube with and without heat exchanger 21 p3834 A66-38625

Calibration process for RZ-2 rocket engine, noting changes in orifices, engine performance, influence coefficients, etc 21 p3807 A66-38640

Feedback control system performance indexes used to characterize response precision, analyzing parameter dependence of integral square error /ISE/, integral time square error /ITSE/ and Feldbaum index 21 p3718 A66-38807

Jet-flap controlled lifting propeller, examining power and efficiency 21 p3731 A66-39592

Performance characteristics of avalanche-breakdown transit-time GaAs varactor diodes for miniaturized microwave circuits 22 p3874 A66-39991

Inert gas effect on performance characteristics of cesium thermionic converter, noting saturation current increase 22 p3853 A66-40944

Wind tunnel testing of delta-like lifting bodies at low, supersonic and hypersonic speeds, noting lift to drag ratios and off-design performance of caret wave-rider wings [ICAS PAPER 66-24] 23 p4007 A66-41011

Performance characteristics for pulse type Ar laser with external interferential system of quasi-confocal spherical mirrors 23 p4078 A66-41452

Semiflexible elliptical waveguide for microwave relay systems, noting design and performance characteristics 23 p4046 A66-41547

Pulsed energy turboalternator power generation system, discussing operation principles and performance characteristics 23 p4022 A66-41761

Piezoelectric balance for aerodynamic force measurements in hypersonic shock tunnel, discussing design, calibration and performance characteristics 24 p4190 A66-42174

Thin film thermal radiation detector noting construction, calibration, performance, error sources and advantages of pyroelectric over thin film gauges 24 p4208 A66-42179

Radiometer system with photomultiplier tube for measuring absolute radiation from hypervelocity projectile flow fields 24 p4208 A66-42181

Woven and knitted electron emitters noting reliability, mechanical stability, transparency and efficiency 24 p4180 A66-42369

PERFORMANCE DECREMENT

Task interruption and performance decrement of active pilots and flight crew personnel following rapid decompression 18 p3061 A66-33782

PERFORMANCE PREDICTION

Physiological and performance determinants in manned space systems - AAS and HFS Symposium, San Fernando Valley State College, Northridge, California, April 1965 06 p0816 A66-16234

Human thermal comfort prediction in oxygen-nitrogen atmospheres 06 p0817 A66-16235

Statistical study of training and job performance measures of Air Traffic Control Specialists representing Enroute, Terminal and Flight Service Station specialties 06 p0973 A66-16821

Approach to sensitivity problem of optimal control systems by introducing performance index 13 p2052 A66-26072

Critical Human Performance and Evaluation /CHPAE/ Program methods for evaluating and predicting human performance and potential error probabilities 14 p2231 A66-28422

Functional analysis of electromechanical control systems, noting application of mathematical methods for system reliability determination 15 p2428 A66-28797

Exceedance theory application to reliability and quality control problems, noting tolerance limit and life test problem solutions 15 p2508 A66-28809

Calibration ensuring optimal instrument performance, using statistical quality control, noting background of Assured Performance Calibration program 15 p2508 A66-28810

Reliability data analysis for systems, discussing confidence intervals, limits and parameters independent of mathematical models employed 16 p2714 A66-30666

Analog simulation and performance prediction techniques in reliable circuit design and analysis, emphasizing programming procedures using Monte Carlo and worst-case methods 17 p2877 A66-32302

Prediction of rocket engine flight performance with less than 2 percent error in specific impulse data measured at sea level 23 p4120 A66-41111

Electronic system reliability prediction methods, comparing indices of new design with existing design 24 p4184 A66-42647

PERIOD EQUATION

Solution to two equations, for wave propagation in periodic media expressed as solution to Hill equation 06 p0848 A66-16106

PERIODIC FUNCTION

Periodic solutions of equation circular motions of coupled Froude pendulums 01 p0106 A66-10405

Parametric dependence of almost periodic solutions to nonlinear differential equations with deviating argument 01 p0094 A66-10457

Estimates in Stepanov metric of deviation of uniform almost periodic function with bounded spectra from S-almost periodic functions 01 p0094 A66-10649

Generalized convolution theorems of periodic functions based on Fourier series formalism used to study processes in linear systems 04 p0506 A66-14402

Representation of analytical periodic

- Fourier transforms of difference operators by sum of squares 05 p0708 A66-15328
- Coefficient properties and absolute convergence of Fourier series of periodic function 06 p0902 A66-16230
- Existence in large of periodic solutions of hyperbolic partial differential equations 06 p0903 A66-16899
- Theorem on quotients of complex-valued almost periodic functions of one real variable containing Bohr theorem 06 p0904 A66-17043
- Existence and uniqueness of almost-periodic solution of system of differential equations 06 p0904 A66-17057
- Calculation of integrals of infinitely differentiable functions, showing error estimate by network method for periodic functions 07 p1056 A66-17597
- Approximation theorem and uniqueness theorem for abstract equations with almost periodic coefficients 07 p1056 A66-17603
- More general solution to difference equation y/x plus $1/-y/x/$ equals $f/x/$ than that derived by Euler 07 p1059 A66-17974
- Periodic motions of simple pendulum excited by horizontal periodic disturbance 07 p1081 A66-18043
- Asymptotic stability of periodic solutions of nonautonomous quasi-linear systems with two degrees of freedom 07 p1016 A66-18187
- Floquet form of solution to system of linear differential equations with periodic parameters 09 p1363 A66-20798
- Equations for variation of orbital elements in two-body problem with variable mass solved analytically for various laws of mass loss, noting periodic function of eccentric anomaly 10 p1605 A66-21205
- Operational calculus for finite rings employing Galois fields for periodic sequences via transfer function application 11 p1678 A66-23242
- Linear approximation method for continuous periodic functions based on theorems concerning relation between triangular matrix and continuity modulus of subset of functions 11 p1724 A66-23365
- Estimates in Stepanov metric of deviation of uniform almost periodic function with bounded spectra from S-almost periodic functions 12 p1903 A66-24020
- Existence of cycles as nonzero periodic solution to system of differential equations with one degree of freedom 13 p2117 A66-25415
- Deriving nearly periodic solutions for Sobolev equation with near periods dependent on spatial variables, constructing solutions for boundary value problem of Hopf equations 13 p2119 A66-25906
- Domains of attraction in large of periodic solutions of weakly nonlinear systems, using Liapunov function and differential equations 15 p2525 A66-28509
- Existence and stability theorems for almost periodic solutions of nearly Liapunov systems 15 p2527 A66-29050
- Periodic solutions of nonautonomous systems of ordinary differential equations and equations with delayed argument, examining new theoretical methods 15 p2527 A66-29164
- Representation of analytical periodic Fourier transform of difference operators by sum of squares 16 p2735 A66-30966
- Periodic and quasi-periodic solutions to differential equations describing pulsed systems 16 p2738 A66-31709
- Left almost periodic function defined on topological group G is not necessarily right almost periodic even if g is Lie group 18 p3127 A66-34461
- Periodic solutions of nonlinear mechanical oscillator under harmonic excitation and plot of resonance curves 18 p3259 A66-34941
- Asymptotic expression for difference between continuous periodic function and typical mean of Fourier series 18 p3128 A66-35013
- Equations describing stability in Liapunov sense with respect to permanently existing perturbation 24 p4230 A66-42217
- Stability of periodic solution of nonlinear systems with coefficients dependent on amplitude and frequency 24 p4188 A66-42478
- Local approximation of continuous periodic function by Fourier series 24 p4231 A66-42513
- PERIODIC ORBIT**
- Routh criterion concerning existence of periodic solutions around triangular libration centers is shown to be valid only at first order [AIAA PAPER 65-681] 01 p0134 A66-10235
- General properties of periodic orbits in given potential field related to invariant curves in four-dimensional phase space 02 p0291 A66-12185
- Comet missions, discussing spacecraft exploration criteria for short period and long period first-apparition comets 06 p0952 A66-15923
- Generalization of Whittaker formula for periodic orbits to fields with arbitrary attraction law 07 p1139 A66-18189
- Numerical analysis of stability of periodic orbits for restricted problem of two equal masses 09 p1456 A66-20464
- Book on celestial mechanics considering Laplace-Newcombe method, Hill planet and lunar methods, periodic orbits methods, etc, using differential equations 09 p1459 A66-20916
- Analytical continuation and first-order stability of short-period orbits originating at equilateral center of libration in Sun-Jupiter system 13 p2048 A66-25808
- Inclined periodic solutions of restricted three-body problem in form of orbit parameters 13 p2185 A66-25809
- Poincare-von Ziepel procedure in celestial mechanics applied to satellite motion about oblate Earth 16 p2796 A66-30263
- Periodic motion of artificial satellite around Earth and Moon 19 p3464 A66-36369
- Matter exchange, period change and orbital element variation in close binary system 21 p3812 A66-38824
- PERIODIC OSCILLATION**
- Parametric response of structures with periodic loads 01 p0152 A66-10399
- Short period fluctuations in intensity of auroral luminescence and relation to geomagnetic fluctuations 01 p0065 A66-11166
- Optimal surface damping in two-layered cantilever for random periodic loading decreasing in symmetrical cycle 01 p0160 A66-11180
- Pulsations of aurora luminescence and irregular quasi-periodic oscillations of geomagnetic field 02 p0224 A66-12120
- Periodic motions of double pendulum with medium resistance and applied rotational forces 03 p0369 A66-12710
- Obtaining deadbeat response of third order servosystems by discrete parametric control 06 p0866 A66-16965
- Harmonic analysis of periodic sequence of pulses, using Fourier analysis 07 p1001 A66-17349
- Nonlinearity effect on harmonic mode shape in almost-periodic vibration of autonomous weakly-nonlinear multiple degree of freedom 07 p1144 A66-18094
- Schlichting two-dimensional unsteady boundary layer problem results extended to three-dimensional periodic boundary layers 08 p1208 A66-19341
- Two uniqueness theorems for periodic solutions of second order nonlinear differential equation describing oscillatory systems 08 p1246 A66-19709
- Characteristics of periodic fluctuations in voltage, current and luminous intensity of discharge through inert gases and mercury vapor, using commercial discharge tubes 11 p1747 A66-23369
- Vibration and stability of beams solved for variable length 12 p1970 A66-24784
- Two-dimensional Stokes flows for functions time-periodic with common frequency, noting analogy to oscillations of long cylinder in viscous fluid 12 p1867 A66-24963
- Periodic undamped oscillations in power intensity of two-mode optical maser 13 p2103 A66-26217
- Numerical-analytical method of obtaining periodic solutions to T systems 14 p2321 A66-27160
- Numerical calculation of periods of natural oscillations and corresponding eigenfunctions of planetary atmospheres as function of planets rotational speed 14 p2381 A66-27534
- Pulsations of aurora luminescence and irregular quasi-periodic oscillations of geomagnetic field 14 p2287 A66-28079
- Amplitude ratio of two forced vibrations for asymmetric shaft rotor excited by periodic external force 16 p2714 A66-30811
- Spatial periodic modulation of high field domain in cadmium sulfide 17 p2974 A66-31813
- Almost periodical oscillations of nonlinear systems containing quasi-cyclic coordinates 17 p2959 A66-32803
- Numerical inversion of Laplace transform 18 p3127 A66-34082
- Poincare-Liapunov systems of ordinary differential equations, qualitatively investigating plane and rough systems, singular points, periodic solutions, etc 18 p3128 A66-34966
- Quasi-periodic motion theory, discussing nonlinear oscillations and perturbation theory solution to differential equations 19 p3400 A66-35823
- Periodic and height-dependent solutions for disturbances of concentrations of radon and thoron and decay products above Earth surface, considering turbulent diffusion and radioactive decay 19 p3453 A66-36385
- Viscosity effect on small periodic oscillatory disturbance of rigidly rotating incompressible fluid 20 p3545 A66-37474
- Nonadiabatic magnetic trap energy redistribution during charged particle motion in spatially periodic magnetic field 21 p3788 A66-39058
- Stability of one-dimensional steady detonations for periodic disturbances of small transverse wavelength 21 p3727 A66-39171
- Difference assessment between secular and long period perturbations generated by similar initial conditions for celestial mechanics problems 22 p3985 A66-40959
- General method of averaging transformed motion equations of slightly damped nonlinear oscillations of simple pendulum 23 p4090 A66-41542
- Wave motions of liquid extended to case where derivative functions describing free surface are present in boundary conditions of problem 23 p4057 A66-41833
- Nearly-periodic oscillations in nonlinear systems having periodic coefficients and subject to external periodic force 23 p4141 A66-41947
- Departure phenomena of pointer type moving-coil instrument for electrical measurement with capability of torsional vibrations 23 p4071 A66-41952
- Periodic oscillations of satellite in plane of elliptic orbit investigated to provide passive orbital stabilization of satellite 23 p4134 A66-41980
- Numerical calculation of periods of natural oscillations and corresponding eigenfunctions of planetary atmospheres as function of planets rotational speed 24 p4273 A66-42320
- Point transformation method applied to quasi-periodic oscillations of nonlinear systems, discussing uniqueness of solution 24 p4189 A66-42850
- PERIODIC PROCESS**
- Dynamic model of multistable elements noting synchrotron and spectrotron 03 p0344 A66-13046
- Criteria for occurrence of spatially periodic solutions of self-consistent problem in steady state rarefied plasma 04 p0556 A66-14419
- Analysis and harmonic synthesis of periodic signals of any form by successive steps 05 p0657 A66-14728
- Strong and intensified representability of 2pi-periodic function with singular integral 05 p0708 A66-15308
- Solution method for Poincare problem concerning periodic solutions of nonautonomous systems with analytical right-hand side 05 p0708 A66-15338
- Duality theorems derived for problem of periodic solutions of systems of higher order differential equations 05 p0709 A66-15340
- Sufficient conditions for containing modulus of Fourier indices of almost periodic solution of nonlinear almost periodic system 05 p0709 A66-15341
- Relationship between distribution entropy and variation in distribution of almost-

periodic channels 05 p0638 A66-15361
 Coding theorems for almost-periodic channels 05 p0638 A66-15362
 Differential equations defining interaction of nonlinear oscillations in certain regions of parametric space where stable periodic solutions exist 07 p1079 A66-17447
 Transient processes and periodic motions in extremal control system with higher derivative control action 11 p1677 A66-22757
 Periodic processes in combustion mechanism of composite 14 p2412 A66-27489
 Propellants 14 p2412 A66-27489
 Poincare small-parameter method in constructing periodic solutions for nonlinear oscillation 15 p2541 A66-29166
 Integral equations in determining periodic regimes for nonlinear dynamic systems and for linear systems with periodically varying parameters 15 p2541 A66-29167
 Solution method for Poincare problem concerning periodic solutions of nonautonomous systems with analytical right-hand side 16 p2735 A66-30968
 Duality theorems derived for problem of periodic solutions of systems of higher order differential equations 16 p2735 A66-30970
 Sufficient conditions for containing modulus of Fourier indices of almost periodic solution of nonlinear almost periodic system 16 p2735 A66-30971
 Behavior of self-adaptive system under external periodic action, using point transformation method 17 p2901 A66-32251
 Dynamic model of multistable elements, noting synchrotron and spectrotron 18 p3088 A66-35009
 Existence of unique periodic solution to first-order differential equation and nonautonomous system of two first-order differential equations 20 p3591 A66-37752
 Periodic flows of orientable anisotropic fluids tending to be unoriented at rest considered through linear equations which predict resonance phenomenon 21 p3727 A66-39173
 Periodic solutions of nonlinear differential systems, examining Galerkin procedure and method of averaging 23 p4084 A66-41054
 Parabolic equations describing periodic oscillatory processes that occur in certain electrolytic systems, oil gushers and relay regulation of body temperature 24 p4230 A66-42218

PERIODICITY

SA LONG PERIOD EFFECT

Periodically alternating noise as design problem in theory of information transmission 12 p1824 A66-24854
 Satellite orbit stability discussing proof of Haseltine formal stability theorem, doubly periodic expansions, satellite motion around oblate curve, etc 17 p2999 A66-32065
 Quasi-periodic solutions of nonlinear ordinary differential equations containing parametric discontinuities 20 p3591 A66-37592
 Existence theorems of periodic solutions to integro-differential equation with delayed argument 21 p3756 A66-38742
 Polarization, periodicity and angular diameter of radiation from Jupiter at 610 mc/s 23 p4125 A66-41064

PERIPHERAL CIRCULATION

Peripheral modes in chelate laser, noting luminescence emitted by axis of cylindrical cell and lateral face 05 p0697 A66-15171
 Increased partial oxygen pressure effect on morphological composition of peripheral blood of rats and mice 15 p2439 A66-29490

PERIPHERAL JET

Peripheral jet ground effect machine /GEM/ stability in pitch and roll 13 p1995 A66-25591
 Skirt Jet peripheral retrorocket for lightweight terminal impact attenuation system using multiple nozzle rocket motors assembled to form annulus around outer periphery of vehicle 22 p3986 A66-40598
 Peripheral jet theory in design of air cushion vehicles 23 p4013 A66-42004

PERISCOPE

Takeoff and landings by periscope under various flight conditions, noting effect of variations in image magnification 22 p3946 A66-40859

PERMALLOY

Pulse transmission through cavity,

observing if instability or bistable response is present, in connection with behavior of ferromagnetic thin films of permalloy 01 p0120 A66-10529
 Anisotropy axes dispersion relation to plane galvanomagnetic effect in thin permalloy films to obtain Gaussian directional distribution 07 p1092 A66-17222
 Changes with time in coercive force of iron films and permalloy films prepared by sputtering material in magnetic field 11 p1753 A66-22802
 Domain structure of partially oriented thin permalloy films analyzed through appearance of adjoining 180 degree walls of equal contrast and by electron microscopy 12 p1934 A66-25029
 Spin wave excitations and surface impedance in microwave transmission through thin permalloy films 14 p2350 A66-26885
 Domain wall mobility effect on multilayer magnetic thin films consisting of permalloy layers separated by silicon oxide layers 14 p2351 A66-26888
 Multilayer composite magnetic thin films used to constrain domain walls to localized region 14 p2351 A66-26889
 Anisotropy spectrum in nonmagnetostriuctive permalloy films 14 p2353 A66-26902
 Composition dependence of irradiation-induced uniaxial magnetic anisotropy energy of permalloy films 14 p2354 A66-26904
 Torsional strain sensitivity and absolute compositional analysis of permalloy films 14 p2354 A66-26905
 Structural properties correlated with magnetic characteristics of annealed electrodeposited permalloy film 14 p2354 A66-26906
 Static magnetic properties of zero-magnetostriuctive permalloy films during vacuum deposition and substrate heating and cooling period 14 p2355 A66-26910
 Uniaxial permalloy film anisotropy at cryogenic temperatures and magnetization characteristics 14 p2355 A66-26914
 Effects of angular dispersion of anisotropy and film thickness on thin permalloy ferromagnetic film pulse switching 16 p2773 A66-30682
 Pulse switching of permalloy films by use of interrupted pulses and Kerr magneto-optical effect 16 p2773 A66-30683
 Magnetic anisotropy of vacuum deposited permalloy films under applied magnetic field and obliquely incident molecular beam 16 p2773 A66-30686
 Static properties of vacuum deposited thin permalloy films 16 p2773 A66-30687
 Thin Permalloy film deposition by controlled high-vacuum ion source, noting design of apparatus 16 p2661 A66-30691
 Magnetic properties of thin Permalloy films prepared in glow and arc discharge in inert gas 16 p2774 A66-30692
 Magnetostriiction, negative anisotropy and chainlike domain walls along line defects in thin permalloy films 16 p2776 A66-30803
 Anisotropy axes dispersion relation to plane galvanomagnetic effect in thin permalloy films to obtain Gaussian directional distribution 17 p2976 A66-31993

PERMEABILITY
 SA DIELECTRIC PERMEABILITY
 Complex permittivity and permeability of lithium aluminium ferrite in cavity resonator determined, using perturbation theory 01 p0123 A66-10590
 Gas permeation measurements on ion exchange fuel cell membranes using chromatography 05 p0611 A66-14539
 Magnetic permeability effect on magnetoelastic plane wave propagation 09 p1403 A66-20579
 Beam power increase and radiation damage effect on high power accelerator components, determining permeability change 13 p2058 A66-25743
 Time decrease of initial permeability in manganese zinc ferrite, noting increase in magnetic loss due to increasing disaccommodation 13 p2166 A66-25881
 Permeability of porous sintered tungsten depends on density of specimen and particle size of tungsten powder 19 p3382 A66-36121
 Gaseous diffusion cells to remove carbon

dioxide from spacecraft life support system, discussing construction material in terms of permeability coefficients substrate porosity 19 p3293 A66-36236
 Compensation of positive and negative anisotropies in ZnNi and ZnLi ferrites, noting effects of magnetization, wall motion and temperature on rotational permeability 21 p3803 A66-39203

PEROXIDE

SA HYDROGEN PEROXIDE

Chemical pumped UV laser action through thermal decomposition of dimethyl peroxide 15 p2513 A66-28836

PERSEID METEOR

Time interval distribution of Perseid radio meteors 07 p1134 A66-17523
 Mount Bezovec meteor expedition /1961/ observations on luminosity function of visual Perseids and sporadic meteors 07 p1135 A66-17634
 Radio-echo observation of Perseid meteor shower during August 1962, studying distribution of radio magnitude as function of solar longitude 16 p2694 A66-30642

PERSHING MISSILE

Pershing weapon system test stations and new microminiaturization packaging 02 p0197 A66-11458
 Packaging tradeoffs for Pershing ground support equipment 02 p0197 A66-11459
 Electronic packaging in Pershing weapon system ground support equipment 02 p0197 A66-11460
 Multilayer printed wiring for reliable Pershing module program 02 p0197 A66-11461
 Epoxy transfer molding of high density modules for Pershing weapon system reliability and economy 02 p0234 A66-11462
 Producibility of electronic hardware for Pershing weapon system ground support program 02 p0198 A66-11463
 Ground support equipment for Pershing weapon system 20 p3542 A66-37239

PERSONALITY

S APTITUDE

S CREATIVITY

PERSONALITY ASSESSMENT

Personality development, application of theory to problems of aerospace selection 19 p3294 A66-36378
 Voluntary withdrawal from primary flight training as function of individual flight instructor 22 p3856 A66-39793

PERSONNEL

S ASTRONAUT

S FLYING PERSONNEL

S MANPOWER

S PILOT

S SPACECREW

PERSONNEL SELECTION

SA PHYSICAL EXAMINATION

SA PILOT SELECTION

Frequency of neurotic depressive reactions and other neuroses in Air France personnel, stressing importance of neuropsychiatric examinations before employment 09 p1335 A66-20535
 Criteria for aircrew selection, describing aptitude and performance tests used by RAF 10 p1494 A66-22137
 Inspection techniques for NASA, discussing control of supplier plants, Quality Requirements for Hand Soldering of Electrical Connections and personnel accountability 15 p2506 A66-28792
 Image interpretation in manned space surveillance systems 18 p3060 A66-33742
 Screening tests to predict potential ability of persons to be trained as aerial photo interpreters 18 p3061 A66-33744
 Integrated mission simulation technique tests pilot reliability for seven-day manned lunar mission [AIAA PAPER 65-275] 18 p3061 A66-33792
 Reliability education, discussing general questions, problems, levels of education, personnel distribution, etc 20 p3686 A66-37971

PERSONNEL SUBSYSTEM

Spacecraft maintainance and repair cost minimization and system effectiveness increase by controlling contamination due to personnel, static electrification and bacteria 20 p3567 A66-37899

PERCEPTION

SA DEPTH PERCEPTION

Device that will conveniently, rapidly and

precisely determine position of point in specific perspective from space coordinates 21 p3745 A66-39332

PERT PROJECT

PERT programming applied to design and manufacture of joint Anglo-French Concorde aircraft 02 p0305 A66-11599
Difficulties encountered in applying system of overall project management to ELDO initial program, noting PERT use, costs plans, etc 09 p1473 A66-20657

PERT in tool schedule for T-38 trainer and F-5 fighter assembly line 10 p1539 A66-21168

PERT statistical design of logic systems, discussing expected delays, critical timing paths, timing slack between various inputs and probability of achieving specific output by given time 14 p2264 A66-27232

PERT-type network, mathematical model and human factor approaches to maintainability and availability predictions for man-machine systems 20 p3684 A66-37892

PERTURBATION

SA LUNAR PERTURBATION

SA ORBIT PERTURBATION

SA PLASMA PERTURBATION

SA SATELLITE PERTURBATION

SA SECULAR PERTURBATION

Complex flow-perturbing potential for Joukowski profile in incompressible fluid with parabolic velocity distribution, using Jacob first order approximation to solve Dirichlet problem 16 p2627 A66-30211
Gravitational perturbation effect on MHD stability of helical magnetic field in spiral arm 16 p2800 A66-30652

Variational principle for steady flows of ideal liquid and sufficient conditions for nonlinear stability under finite perturbations 17 p2913 A66-33168

Perturbation technique to study three-body problem of motion of close satellite [AIAA PAPER 65-690] 19 p3462 A66-35896

Differential equations of steady motions in perturbed nonlinear autonomous systems with one degree of freedom 21 p3772 A66-39299

Supersonic flow past pointed bodies of revolution at small angles of attack 24 p4157 A66-42611

PERTURBATION THEORY

Perturbation theory of nonlinear oscillations in collisionless plasma 01 p0109 A66-10256

Perturbation technique applied to nonlinear problem in heat conduction 01 p0164 A66-10900

Perturbation of boundary value problem for second order hyperbolic equation 01 p0095 A66-10927

Plane wave diffraction by sinusoidal network 01 p0031 A66-11074

Solar disturbance daily variations and behavior of horizontal perturbation vector based on magnetic observations at Soviet high latitude stations 01 p0065 A66-11170

Development and stabilization laws of aerodynamic perturbations 01 p0009 A66-11187

Relations for interaction between waveguide field and ferrite obtained from reflection and transmission coefficients, using perturbation method 02 p0196 A66-11416

Perturbation solutions of differential equations of motion for low-thrust rocket trajectories 02 p0288 A66-11546

Exterior stationary problem for Navier-Stokes equations and associated perturbation problems 02 p0219 A66-12010

Perturbation velocity and magnetic fields due to interaction of slow flow field of viscous fluid with aligned quadrupole magnet calculated 02 p0270 A66-12159

Spectral analysis of drift oscillations expanding crosswise in external magnetic field of inhomogeneous plasma, based on perturbation theory 03 p0396 A66-12380

First order approximation of nonlinear mechanical behavior of oscillator including derivation of second order perturbations for period and amplitude, noting motion equation 03 p0435 A66-12692

Liapunov stability equilibrium for systems with infinite number of degrees of freedom, discussing stability criteria 04 p0545 A66-13558

Linear system using differential circuits

for indirect measurement of perturbations 04 p0503 A66-13771

Non-Newtonian media, parallel flow, discussing effects of two- and three-dimensional perturbations on flow stability 04 p0510 A66-13872

Nonlinear eigenvalue problem for equilibrium state of rotating rod solved by perturbation procedures and Leray-Schauder degree theory 04 p0589 A66-13948

Steady states of mechanical system using perturbation method, assuming primary and secondary oscillators are tuned to single pulse, each involving Duffing type nonlinearity 04 p0545 A66-14169

Perturbation calculation of average rate of energy transfer in random vibration of nonlinearly coupled modes 05 p0716 A66-15051

Singular perturbation for mixed Cauchy problem relative to equation with second-order partial linear hyperbolic derivatives 05 p0708 A66-15094

Dielectric and metallic rod equivalent circuit, examining resonant frequency change upon placement in waveguide, using perturbation techniques 05 p0649 A66-15120

Perturbation factors in turbulent reattachment, with theory based on Korst [ONERA TP 275] 05 p0663 A66-15322

Cylinders in reciprocating harmonic rotation, calculating momentum, heat and mass transfer in forced convective field via perturbation technique [ASME PAPER 65-WA/HT-6] 05 p0791 A66-15654

Bracketing theorem applied in partitioning technique for solving Schroedinger equation to determine upper and lower bounds to energy eigenvalues, ground and excited states 06 p0911 A66-16166

Oscillating disk induced flow, discussing mathematical formulation of flow field produced by finite-amplitude rotational oscillations 06 p0872 A66-16354

Least squares recursive differential-correction estimation in nonlinear problems, examining equations and stochastic interpretation 06 p0903 A66-16735

Relativistic perturbed oscillator, solving problem via canonical transformation 07 p1080 A66-17498

Perturbation method in theory of dynamic stability of systems with distributed parameters, discussing linear Hamiltonian equation in separable Hilbert space 07 p1056 A66-17606

Perturbation theory for two-body problem, using regularized Levi-Civita variables [AIAA PAPER 66-8] 07 p1137 A66-17882

Convergence of Chapman-Enskog expansion for linearized Boltzmann equation, using perturbation theory 07 p1081 A66-17935

Prandtl lifting line classical theory of high aspect ratio wings as singular perturbation problem yields asymptotic expansions of Navier-Stokes solution 07 p0982 A66-18124

Perturbation expansions for ground state function of helium atom, using Hartree or Hartree-Fock model Hamiltonian, based on Weiss-Martin variation-perturbation calculation 07 p1083 A66-18422

Self-consistent-field type perturbation theory for stationary and homogeneous turbulence to determine energy spectrum and response frequencies 08 p1204 A66-18531

Mixed boundary value problem for velocity potential of unsteady perturbation flow past oscillating thin profile in inviscid compressible gas at subsonic speeds 08 p1205 A66-18674

Linear perturbation theory computation of target errors in lunar impact trajectories due to random injection errors 08 p1289 A66-18828

Perturbation solutions of stress and deformation problems for homogeneous anisotropic shells constructed from orthotropic material [AIAA PAPER 66-141] 08 p1309 A66-19004

Corrections to effective mass theory of shallow impurity states in germanium, using perturbation theory and wave functions 08 p1269 A66-19007

Small perturbations of parabolic boundary value problem 08 p1245 A66-19114

Optimal feedback control and bounding

hypersurface of allowable perturbations in linear plant regulator, noting multiplier equation 08 p1200 A66-19543

Perturbation method for approximating solutions of nonlinear differential systems with initial conditions 09 p1393 A66-19907

Modified Cochran method giving valid expansions for singular perturbation problems in heat transfer 09 p1469 A66-20084

Electromagnetic wave diffraction by arbitrary shaped dielectric bodies treated by perturbation method, based on Taylor series expansion 09 p1342 A66-20086

Laminar circulation and thermal equilibrium in stars generated by nonspherical perturbations 09 p1448 A66-20096

Self-focusing of longitudinal electromagnetic waves in nonlinear plasma in strong magnetic field 09 p1343 A66-20343

Induced radiation at high photon densities, noting applicability of perturbation theory to multiphoton resonance radiation of lasers 09 p1386 A66-20344

Weighting function and frequency response determination of linear system with N degrees of freedom, using convergent series solution 09 p1396 A66-20636

Dynamic stability of circular elastic rods, noting iteration method analysis of nonlinear coupling effect between axial force and curvature in forced in-plane vibrations 09 p1467 A66-20638

Simplification of algebraic formalism of quantum-mechanical perturbation theory 09 p1405 A66-20678

Stability of plane motion of fluid subject to continuous perturbations distributed over volume and boundary of flow 09 p1368 A66-20755

Asymptotic structure of remote parts of wake of bodies moving in rarefied plasma, using linearized perturbation theory 09 p1465 A66-21017

First-order perturbation analysis of free convection of liquid metal from isothermal vertical finite plate extended to uniform heat flux 10 p1619 A66-21054

Stability of baroclinic circular vortex in incompressible inviscid fluid for axially symmetric disturbances 10 p1530 A66-21275

Singular perturbation problems with infinite domain treated by perturbation method 10 p1550 A66-21304

Perturbation technique solution for MHD flow in closed regions with symmetric flow properties and axial boundary conditions 10 p1563 A66-21543

Small perturbation plane steady flows in nonequilibrium MGD, noting diffusion effects 10 p1566 A66-21793

Reflection coefficient and critical length determination for unstable convective modes in weakly homogeneous plasmas 10 p1567 A66-21819

Halley comet motion during return of 1910, obtaining orbits via differential correction procedures, including perturbation by all planets but Pluto 11 p1769 A66-22531

Self-consistent theory of curvilinear electron fluxes interaction with wave conducting line, taking into account space charge 11 p1655 A66-22722

Ground state of hydrogen molecule treated by perturbation theory through second order, noting energy and wave function 11 p1738 A66-22882

Energy minimization for trial wave function constrained to give expectation value of operator 11 p1738 A66-22883

Perturbation effects in differential elastic ion-atom scattering generated by crossing of molecular states from even potentials 11 p1740 A66-22972

Formalism of regular perturbation theory similar to Fredholm resolvent and having infinite radius of convergence 11 p1740 A66-23184

Book on mathematics underlying celestial mechanics, including central force problem, n-body problem, Hamilton-Jacobi and perturbation theories 11 p1776 A66-23202

Perturbation theory of ionization of hydrogen and rare-gas atoms by simultaneous absorption of several photons 11 p1715 A66-23388

Equations for perturbative derivatives of two sets of elements in terms of universal

formulation, discussing low thrust orbits 12 p1946 A66-23591

Coefficients of space charge effects for growing oxide films, derived from perturbation treatment, evaluated in terms of boundary concentrations of diffusing species 12 p1811 A66-23624

Approximation of expectation values for nonenergy properties via perturbation theory, obtaining values for molecular polarizability 12 p1917 A66-23935

Development and stabilization laws of aerodynamic perturbations 12 p1797 A66-24005

Derivation of explicit form of output signal from noise perturbed oscillator by perturbation technique 12 p1834 A66-24126

Statistical analysis of circuit noise effect on oscillators according to perturbation theory, discussing power spectrum, power and signal phase spectral densities, frequency stability, etc 12 p1834 A66-24127

Nonlinear systems including oscillators, frequency multipliers, limiters, etc, driven by periodic carrier, deriving circuit theory for small perturbations propagated throughout system 12 p1848 A66-24136

Optimal control for mechanical system ensuring optimal stabilization and maximum accuracy at terminal moment through minimization of difference between perturbed and unperturbed motion 12 p1914 A66-24239

Perturbation theory determination of third harmonic current density generated in plasma by AC field for velocity-dependent plasma 12 p1924 A66-24593

Injected plasma spiral instability in transverse magnetic fields, demonstrating existence of rotating mode in semiconductor disk 12 p1931 A66-24803

Spiral shaped perturbations of plasmas in Corbino disk shaped semiconductors during application of axial magnetic and radial electric fields 12 p1931 A66-24804

Hydrodynamic equation for ideal compressible fluid in case of steady three-dimensional vortex motion solved via two second order PDEs 12 p1865 A66-24867

Heat transfer in steady flow of non-Newtonian fluid characterized by Rivlin-Ericksen constitutive equation inside wavy cylindrical tube, with momentum and energy equations solved by perturbation technique 12 p1866 A66-24960

Convergence of Keck-Beyer perturbation solution of nonlinear differential equation for finite-amplitude plane wave propagation in viscous fluid 13 p2060 A66-25143

Electron correlation theory in nonclosed-shell states, discussing orbital wave functions and perturbation theory 13 p2130 A66-25376

Spectral analysis of drift oscillations expanding crosswise in external magnetic field of inhomogeneous plasma, based on perturbation theory 13 p2139 A66-25385

Second order approximation and perturbation theory applied to determine effect of instantaneous pulse on oscillation amplitude 13 p2127 A66-25451

Goedel universe analyzed, noting generalized Poisson equation, angular velocity in perturbed metric, equations of motion in inertial frame of reference, etc 13 p2183 A66-25609

Plasma stability with plane boundary, noting effect of perturbed electric field, particle trajectory and equilibrium distribution 13 p2144 A66-25726

Drift instabilities in thermionic plasmas, noting excitation of LF oscillations with finite perturbation amplitude around cathode ion sheath 13 p2145 A66-25729

Averaging method for differential equations with retarded arguments 13 p2118 A66-25827

Perturbation theory of nonlinear oscillations in collisionless plasma 13 p2148 A66-25973

Controllability of linear and nonlinear dynamical systems, using perturbation properties expressed as sensitivity functions 13 p2050 A66-26059

Control system design, analyzing sensitivity of system performance to parameter variations by obtaining time domain measure of sensitivity 13 p2050 A66-26062

Perturbation theory analysis of stimulated phonon-photon double-quantum emission in multilevel spin systems 13 p2099 A66-26178

Ionization cross section for rare gases and hydrogen atoms calculated from perturbation theory, noting ruby laser photon absorption 13 p2133 A66-26188

Models of matter-electromagnetic field interaction for gas lasers, using perturbation theory 13 p2103 A66-26216

Inviscid hypersonic flow of nonuniform incident stream over wedge, noting vorticity effects, perturbation equations and boundary conditions 13 p1992 A66-26665

Damping constant of electromagnetic wave in plane parallel waveguide with ferrite resonant isolator, using perturbation theory, considering dielectric and magnetic losses 14 p2250 A66-27143

Active-control and similar-control stabilization of Lagrange solutions of restricted three-body linear perturbation problem 14 p2382 A66-27559

Non-Newtonian media, parallel flow, discussing effects of two- and three-dimensional perturbations on flow stability 14 p2275 A66-27572

Perturbation theorem for ordinary differential operators 14 p2321 A66-27626

Charging effect of Ag-Au alloys and other properties determined by perturbation theory 14 p2365 A66-27754

Quasi-linear perturbation theory of transverse electromagnetic waves from instabilities in nonthermal magnetoactive plasma, using Boltzmann equation, applied to magnetospheric MHD emissions 14 p2286 A66-27982

Perturbation method analysis of thermodynamic equilibrium properties of multicomponent plasma 14 p2345 A66-27984

Perturbation spectra and decrements of plane parallel flows at small Reynolds numbers with even and odd velocity profiles 14 p2278 A66-28055

Impurity scattering in theory of interband magneto-optical effects, noting inadequacy of first-order perturbation treatment and low and high impurity-atom concentration with weak interaction 15 p2558 A66-28610

Singular characteristics of dynamic systems with steady state motion, noting effect of constantly acting small perturbations 15 p2537 A66-28950

Free energy of single and multicomponent plasmas in particle number density determined, using quantum mechanical perturbation expansion of partition function 15 p2552 A66-29617

Pressure effect on transition point of superconductors from Bardeen-Cooper-Schrieffer theory, perturbation theory and electron scattering near Fermi surface 15 p2568 A66-29714

Perturbation theory approach to calculation of autoionization rates 15 p2548 A66-29807

Spin-rotation interaction and relaxation time of fluorine nuclei in benzotrifluoride calculated, using time-dependent perturbation theory 16 p2645 A66-30110

Fundamental vibration spectrum of HD in liquid argon, noting rotation-translation coupling, quantized translational energy levels and perturbation treatment of interaction 16 p2645 A66-30120

Unsteady interaction between blunt bodies and shock wave, comparing reflected shock wave velocity decrease for plane spherically blunted cylinders 16 p2685 A66-30788

Hill climbing in self-optimizing control systems, noting effect of sinusoidal perturbation, application, etc 16 p2671 A66-31059

Boundary perturbation solution of stress concentration around curved hole in thin plate under elastic bending 16 p2819 A66-31140

Harmonic approximation of infinite crystal dynamics problem, noting collisional case and action of external force on atoms 16 p2820 A66-31169

Angular dependence of spin-lattice relaxation times in ruby evaluated, using second order perturbation wave function and field coupling representation 16 p2781 A66-31220

Extension of problem of singular perturbation for linear scalar constant

coefficient differential-difference equation with single retardation to several retardations, noting degenerate equation solution 16 p2737 A66-31230

MHD first-order partial differential equations used to investigate wave front between perturbed and unperturbed flow regions in magnetosonic propagation through homogeneous medium 16 p2764 A66-31363

Simultaneous differential equations of perturbed motion and variational determination of sufficient conditions for stability of systems with memory 16 p2738 A66-31586

Initial value problem for small amplitude wave perturbations solved on zonal atmospheric flow with constant vertical shear and vanishing temperature lapse rate 16 p2699 A66-31638

Vertical propagation of long period small amplitude temperature perturbation in medium with photochemical processes and radiative heat transfer 16 p2742 A66-31642

Laminar boundary theory perturbation solutions modified by formulating perturbation about Blasius solution 16 p2691 A66-31663

Perturbation function expansion in power series of eccentricities in elliptical three-body problem, describing algorithm for numerical values of Newcomb operators of arbitrary order and giving tables for Ljach series expansions 17 p2995 A66-31850

Motion of planet Pluto, noting first-order perturbations with respect to planetary mass and giving tables of Newcomb operator coefficients 17 p2998 A66-32046

Variation of mean square error of linear system with time, applying parameter perturbation process to random or deterministic input 17 p2901 A66-32289

Dominant mode perturbation theory applied to treatment of influence of imperfect waveguide contact on measured complex permittivity of semiconductors 17 p2887 A66-32643

Perturbation approach to IR absorption in p-type semiconductor with zincblende or zinc telluride structure 17 p2982 A66-32971

Equilibrium structure of magnetic fields in stars analyzed, employing perturbation theory for assumed polytropic configuration 17 p3005 A66-33001

Turbulent flow near boundary and equations for mass- or heat-transfer coefficient in terms of turbulent diffusion coefficient and thermal diffusivity 17 p3037 A66-33042

Profile of supercavitating lattice traced for certain parameter values, using perturbation theory of perfectly irrotational incompressible fluid 17 p2914 A66-33253

Dual mode frequency discriminator for microwave source frequency stability, discussing application of beam waveguide resonator 17 p2895 A66-33274

Perturbation theories for equations of celestial mechanics, obtaining analytical solutions in terms of Chebyshev polynomial series [AIAA PAPER 66-534] 18 p3226 A66-33664

Injection phenomena of theory of perturbational optimal guidance of space vehicles 18 p3132 A66-33887

Perturbation theorems for waveguide junctions expressing changes in impedance or admittance matrix elements 18 p3077 A66-34057

Perturbation-like theory for case when available starting wave function is not eigenfunction of unperturbed Hamiltonian 18 p3135 A66-34511

Time harmonic wave propagation in perfectly conducting large waveguides containing random media, emphasizing computation and physical interpretation of wave motions 18 p3072 A66-34570

Iterative determination of space flight trajectory and velocity represented as sum of Kepler motions about celestial bodies 18 p3234 A66-34635

Buoyancy in convecting ideal dissociating gas analyzed, obtaining solution for one-dimensional unsteady free mixing 18 p3103 A66-34931

Calculations of energy loss of relativistic charged particles in dielectric media compared with mass operator and

perturbation theory calculations and with oxygen experiment 18 p3221 A66-35201
Cosmic ray threshold rigidities examined, discussing penumbral and threshold perturbation effects produced by superimposing external magnetic fields on dipole model 18 p3096 A66-35227
Drift effect on diffusion spreading of plasma inhomogeneities in magnetic field, deriving expression for Fourier component potential and magnetic field perturbations 19 p3344 A66-35265
Perturbation method solution of rectangular waveguide boundary value problem filled with transversely magnetized semiconductor or plasma 19 p3317 A66-35716
Small perturbation method applied to combustion stability of high explosives taking into account heat release in K phase 19 p3477 A66-35740
Quasi-periodic motion theory, discussing nonlinear oscillations and perturbation theory solution to differential equations 19 p3400 A66-35828
Steepest descent method extended to trajectory optimization problem for stochastically disturbed systems with application to Euler equation for white noise problem of reentering vehicle 19 p3388 A66-35879
Steepest descent method of solving multiple-arc optimal control problems of orbital transfer 19 p3388 A66-35881
Generalized method of averaging and von Zeipel method as applied to perturbed Hamiltonian system of appropriate form [AIAA PAPER 65-687] 19 p3462 A66-35893
Asymptotic representations of perturbation methods used to solve differential equations of satellite orbit 19 p3462 A66-35897
Efficient and accurate orbit prediction for very long periods of time using analytic perturbation technique in conjunction with multistep methods [AIAA PAPER 65-692] 19 p3462 A66-35899
Comparison of parameter hunting procedures and implementation techniques for solving higher order boundary value problems with rapid convergence [AIAA PAPER 65-693] 19 p3462 A66-35900
Maximum temperature of any substance in equilibrium with thermal radiation, considering properties of hot matter at very high densities, including gravitational interaction of photons 19 p3463 A66-36069
Homogeneous linear differential equations, examining stochastic processes for perturbations causing discontinuous solutions and for perturbations acting on entire bounded intervals 19 p3390 A66-36334
Inhomogeneous plasma instability for cylindrical rotational geometry examined, using Vlasov equations 19 p3418 A66-36534
Propagation of spherically symmetric, cylindrically symmetric and plane waves examined via analytic perturbation method in solving gas dynamics equation for nonstationary compressible flow 19 p3343 A66-36638
Asymptotic behavior of solutions to boundary value and initial problems for ODE with small parameter, using functions of power law boundary layer 20 p3590 A66-37109
Acoustic oscillations in solid propellant rocket chambers, discussing cases of small amplitude perturbations and solving wave equations 20 p3628 A66-37387
Analytic formulae application for determining perturbations of orbital elements produced by zonal harmonics in case of great eccentricities 20 p3654 A66-37852
Critical values of satellite orbit inclinations accounting for effects of first-order perturbations and mean anomaly 20 p3654 A66-37853
Perturbation theory analyses of network matrix eigenvectors and natural frequencies 20 p3539 A66-38282
Pitch angle diffusion perturbing relativistic electrons in Van Allen zones and violating adiabatic invariants of electron motion, using Fokker-Planck equation 20 p3641 A66-38328
General nonequilibrium system in contact with reservoir described via correlation functions of quantized field operators,

noting influence of cavity and optical pump 21 p3746 A66-38633
Boundary layers with coupled heat and mass transfer for large enthalpy per unit mass of injected material, based on linearity of perturbation equations 21 p3834 A66-38704
Velocity distribution function of plasma in high intensity perturbation field, noting linear response for weak interaction and long wavelengths, connection formulae and absorption of electromagnetic waves 21 p3777 A66-38760
Comparison variables transformation of linearized perturbation initial value problems for nonlinear ordinary first-order differential equation 21 p3756 A66-38817
Energy spectrum of semiconductor compounds with chalcopyrite structure analyzed, using perturbation theory, noting changes resulting from crystalline and spin-orbital interactions 21 p3799 A66-38923
Coefficients of equations of perturbed motion of body containing ideal incompressible liquid 21 p3770 A66-38973
Stability of one-dimensional steady detonations for periodic disturbances of small transverse wavelength 21 p3727 A66-39171
Finite amplitude disturbances in baroclinic atmosphere, considering interaction with zonal current and effect of upward eddy transport upon time change of mean static stability 21 p3759 A66-39205
Optimal control of variable structure system in presence of perturbation, discussing quality control and preservation of sliding plane 21 p3719 A66-39285
Laminar incompressible axisymmetric free jet with swirl, examining perturbation scheme for stream function and asymptotic series 21 p3729 A66-39453
Ground state resonance, noting absence of Doppler broadening of signals in forward scattered light 22 p3931 A66-39810
Perturbation theory of constraints applied to variational calculation on ground state of lithium hydride molecule, using 28-term wave function 22 p3947 A66-39925
LF wave propagation in inhomogeneous plasma column, deriving normal mode of expansion and perturbed dispersion curves 22 p3955 A66-40047
Static perturbation technique used in analysis of stability relationship to shape of equilibrium surface for finite-dimensional problems 22 p3992 A66-40202
Hydrodynamic equation for ideal compressible fluid in case of steady three-dimensional vortex motion solved via two second order PDEs 22 p3899 A66-40328
Simultaneous differential equations of perturbed motion and variational determination of sufficient conditions for stability of systems with memory 22 p3940 A66-40448
Reduction principle applied to nominal stability, determining perturbation function for case where equations of perturbed motion are autonomous and characteristic equation of linear system has double zero root 22 p3941 A66-40796
Perturbation theory-variational calculus analysis of optical rotatory power of molecules based on wavefunction badness 22 p3951 A66-40907
Monograph on electronic theory of heavily doped semiconductors covering energy spectrum, perturbation theory, absorption of electromagnetic waves, density states, etc 23 p4109 A66-41119
Time dependent Schrodinger equation for Bloch electron in presence of laser field, using WKB approximation method, compared with perturbation theory 23 p4077 A66-41266
Supersonic gas flow problems around lattice of conical blades solved in any approximation of perturbation theory 23 p4008 A66-41358
Radiative equilibrium of electron gas in magnetic field based on quantized particle motion and perturbation theory 23 p4101 A66-41365
Variational methods for approximating perturbation effect on nondegenerate eigenvalue extended to degenerate case 23 p4084 A66-41390
Self-consistent theory of curvilinear electron fluxes interaction with wave

conducting line, taking into account space charge 23 p4037 A66-41460
Initial broadening of diffusion flame sheet caused by nonvanishing equilibrium constant determined, using method of inner and outer expansions 23 p4148 A66-41500
Perron theorem, Liapunov functions and stability analysis of certain perturbed systems 23 p4085 A66-41552
Perturbation theory of heteronuclear diatomic molecules based on isoelectronic homonuclear molecules applied to carbon monoxide and nitrogen 23 p4032 A66-41646
Finite resistivity instabilities of sheet pinch examined, using numerical analysis in terms of normal modes 23 p4106 A66-41709
Compressible fuel mixture deflagration perturbation stability in induction regime characteristic of heat-stressed combustion chambers of rocket engines 23 p4122 A66-41790
Perturbation analysis of radiative cooling in shock layers and radiative heat transfer effects on hypersonic flow over wedge and circular cone 23 p4011 A66-41882
Perturbation approximations of order greater than unity used to study behavior of oscillator 23 p4096 A66-41946
Response spectrum of random vibration of nonlinear oscillator predicted by applying classical perturbation method to statistical moments of random response of nonlinear systems 23 p4097 A66-41954
Linear perturbation theory of flow due to convection of entropy and vorticity in nonuniform flow field, noting sound generation 23 p4062 A66-42051
Approximate ground state wave functions used in calculation of interaction energies by second-order perturbation theory 23 p4033 A66-42081
Generalization and extension of Perron theorem to behavior of solutions of certain perturbed systems 24 p4230 A66-42215
Equations describing stability in Liapunov sense with respect to permanently existing perturbation 24 p4230 A66-42217
Vibrations of systems governed by nonlinear partial differential equations analyzed by perturbation method 24 p4236 A66-42267
Screening function of interacting electron gas at high and metallic densities by many-body perturbation theory 24 p4236 A66-42294
Equilibrium theory of plasma stability in EM field, applying virial theorem and variational principle to random infinitesimal plasma perturbations 24 p4241 A66-42330
Laminar boundary layer characteristics on continuous moving surface, noting high critical Reynolds number, disturbance amplitude function and energy criterion for stability 24 p4194 A66-42412
Scattering of circularly polarized electromagnetic wave in Coulomb field, noting coalescence of two-wave quanta into one quantum of double frequency 24 p4220 A66-42529
Perturbed motion of mass point in central force field, noting integrability of equations 24 p4238 A66-42848
Instability of laminar Ekman boundary layer, obtaining critical values of Reynolds numbers, perturbation growth rates and equilibrium finite amplitude solutions 24 p4197 A66-42980
Stability of two-dimensional boundary layer flow in rotating tank with small inflow analyzed, using perturbation theory 24 p4197 A66-42981
Decay of small temperature perturbations by thermal radiation in atmosphere, noting gray and line absorption, relaxation time constants and numerical computations 24 p4203 A66-42986
PETN
S PENTAERYTHRITOL TETRANITRATE /PETN/
PETROGRAPHY
SA ROCK
Lunar rock petrography by X-ray diffraction system in soft-landed unmanned spacecraft 01 p0067 A66-10312
Petrographic microscopy has led to through optical characterization of phase composition of aged solid-propellant thin sections 02 p0278 A66-11540

PETROLEUM
S KEROSENE

PETROLOGY
SA METAMORPHISM
SA ROCK
Biologic-type alkanes of indigenous origin more than 2.7 billion years old present in Precambrian rocks of Sudan formation 03 p0325 A66-12366

PFM
S PULSE FREQUENCY MODULATION /PFM/

PFM TELEMETRY
Optimal scientific satellite PFM encoding system circuit design and digital data processing 14 p2244 A66-28429

PH FACTOR
Buffering capacity of substances liberated by *Chlorella* expressed in terms of van Slyke buffer index, noting changes in pH 17 p2860 A66-32831

PHANTOM AIRCRAFT
S F-4 AIRCRAFT

PHARMACOLOGY
SA TOXICOLOGY
System costs and pharmacological techniques as function of exercise program designed to maintain space crew physical fitness 07 p0999 A66-17658
Pharmacochemical protection from radiation injuries during space flights 15 p2435 A66-29453
Flight fatigue treatment by acetyl-aspartic acid and citrulline, noting improved reaction to acoustic and visual stimuli 17 p2859 A66-32232
Effects of radiation protective pharmacological agents /cystamine, serotonin, AET, strychnine, etc/ on animals subjected to centrifugation, for application to astronauts 19 p3283 A66-35292

PHASE
S GAS PHASE
S LIQUID PHASE
S LUNAR PHASE
S SOLID PHASE
S TWO-PHASE FLOW
S TWO-PHASE SYSTEM
S VAPOR PHASE

PHASE ANGLE
Phase angles of reflection and transmission coefficients for microwave energy of rectangular waveguide whose electromagnetic field interacts with ferrite spheroid 04 p0496 A66-13909
Pressure phase angle and frequency for forced oscillations of small porous chamber [ASME PAPER 65-WA/FE-8] 05 p0685 A66-15731
CW bistatic radar design with arrival direction, distance and Doppler measurements obtained from phase comparisons and used in ionospheric wind determination from meteor trails 10 p1501 A66-21626
Correlation between amplitudes and phase angles of first two harmonics of monthly mean Sq and solar activity for period 1905-1960 14 p2376 A66-27395
Measuring modulus and phase angle of transistor current gain 15 p2464 A66-29058
Basile hypothesis applied to diagonalization of vibration equation matrix, using phase curve 20 p3589 A66-36953
Phase angles of reflection and transmission coefficients for microwave energy of rectangular waveguide whose electromagnetic field interacts with ferrite spheroid 20 p3532 A66-37867

PHASE CHANGE
Time-dependent temperature distribution and interface location of phase change of one-component systems in container 01 p0164 A66-10901
Plasma decay by measuring phase variation and signal amplitude with interferometer, determining distribution function and recombination coefficient 01 p0115 A66-11056
Petrographic microscopy has led to through optical characterization of phase composition of aged solid-propellant thin sections 02 p0278 A66-11540
He-Ne laser incorporated into arm of interferometer used to measure fringe shift in small transient plasma 04 p0529 A66-13743
Frequency manipulated signal spectrum for case of modulating function with arbitrary off-duty factor 04 p0482 A66-13912

Phase change across interface of suddenly pressurized binary liquid-vapor system [ASME PAPER 64-WA/AV-1] 04 p0597 A66-14026

Relationships between VLF phase fluctuations, radio signal fading and natural geomagnetic background observed in British Columbia 04 p0487 A66-14367
Melting and freezing of finite and semiminfinite bodies, discussing variational, heat balance integral, Riemann-Mellin contour integral, etc 06 p0971 A66-16728
Intensity distribution of fringe systems used to verify phase inversion between two lobes of laser in TEM-10 mode 07 p1043 A66-17453
Intrinsic noise effect on synchronization of self-excited oscillators, determining phase diffusion coefficient, frequency fluctuation spectra and spectral line 09 p1344 A66-20345
Phase-change hypothesis of structure of Earth, describing liquid core as product of static pressure crushing outer electron shell in solid mantle material 09 p1375 A66-20945
Quantum mechanical nonlinear theory of intensity and phase fluctuations of homogeneously broadened laser noise 11 p1711 A66-22466
Linear quadrupoles, wave and operating parameters, transfer loss and phase coefficient for mismatched network 11 p1677 A66-23063
Oxygen addition to niobium-zirconium alloys at high temperatures, noting oxygen solubility and oxide 14 p2315 A66-27492
Space thermal control using fusible materials, with analysis of one-dimensional adiabatic system 16 p2826 A66-30505
Structural and physical properties of WC-TaC-Co and WC-NbC-Co alloys studied by metallographic, electrochemical and X-ray methods 17 p2939 A66-31970
Stress field on epitaxial dislocation line in weakly alloyed titanium, calculating energy of phase boundary and contribution of latter to plastic deformation 19 p3381 A66-35929
Heat exchangers for liquid hydrogen conversion to ambient temperature hydrogen gas, using water heat source 20 p3677 A66-37102
Intermediate phases in alloys of Ti with Ir, Rh and Os indicate possibility of polymorphism 20 p3584 A66-37418
Frequency manipulated signal spectrum for case of modulating function with arbitrary off-duty factor 20 p3518 A66-37870
Numerical data for common solid state reaction equations which are functions of alpha, fraction of material reacted in time, t 21 p3797 A66-38594
X-ray analysis of lattice structure of terbium crystals at 120 to 300 degrees K 21 p3803 A66-39304
Phthalocyanine crystal phase change effect on electric conductivity 22 p3860 A66-39921
Long VLF path propagation measurements, determining characteristics of lower ionosphere, noting role of phase and amplitude variations during solar flares 22 p3907 A66-39959
Numerical solution via digital computer of nonlinear transient heat conduction with phase changes 23 p4149 A66-41697

PHASE COHERENCE
Phase coherent and nonphase coherent coded communications systems, discussing theoretical word error probability vs signal to noise ratio 04 p0478 A66-13593
Synthetic generation of phase coherent microwave signals for transient behavior of wideband networks and dispersive media 06 p0847 A66-16102
Phase coherent digital M-ary transmission with binary waves through Gaussian channel 13 p2022 A66-25554

PHASE CONTRAST
Three quarter-wave compensating methods for measuring phase difference in visual spectral region 01 p0066 A66-10210
Measuring phase difference in photoelastic coatings with reflected light effect eliminated by doubly refracting plate 01 p0067 A66-10318
Reconstruction of phase objects by holographic imaging as three-dimensional lensless photography 07 p1032 A66-17461

Optimum realizable transmitter waveforms for high-speed data transmission, noting application to low pass filter channel 13 p2019 A66-25146
Displacement vector at antiphase boundaries in rutile determined by contrast experiments in electron microscope 24 p4252 A66-42354

PHASE CONTROL
Reducing setting time of phase shifters in phase control of microwave signals using space charge sheaths 01 p0028 A66-10564
Space-diversity reception with common phase control over several frequency bands for combating microwave fading 02 p0189 A66-11367
Eagle arrays obtained by substituting for continuous or discrete phase inverters simpler controlled and more stable ones, noting radiation patterns 02 p0198 A66-11753
Statistical characteristics of various uniform phase distribution processes and their envelopes 02 p0193 A66-12269
Phase-correlation system for pulse compression in radar 05 p0649 A66-15262
Advantages gained by amplitude and/or phase adaptivity in optimum reception of on-off signals subject to Rayleigh fading in presence of additive receiver noise 06 p0828 A66-16109
Nonlinear forced oscillations in phase automatic frequency control system, accounting for nonlinearity of system 07 p1001 A66-17353
Phase correcting circuit construction using delay line cut into adder feedback circuit 09 p1360 A66-20295
Statistical characteristics of various uniform phase distribution processes and envelopes 12 p1813 A66-23873
Stability of automatic phase control system for output generation from voltage controlled oscillator 12 p1836 A66-24305
Residual difference between oscillator frequencies used to investigate noise immunity of phase automatic frequency control 14 p2236 A66-27245
Approximation to linear bounded phase coordinate control problem and continuous adjoint solution for optimum controller 14 p2266 A66-27632
Noise rejection ability of phase discrimination technique 17 p2888 A66-32708
Technique for zero or 180-degree phase generation for spatial filters using photographic printing and polarized light 20 p3556 A66-36936
Optimal control problem for linear systems with phase constraints 21 p3717 A66-38540
Distortion of FM signals after being processed through time-invariant channels with nonlinear phase characteristic and fluctuating amplitude function 22 p3864 A66-40061
Polarization characteristic variations of HF signal received over short-range ionospheric path, noting phase measurement of elliptically polarized wave components, using receiving dipoles 22 p3864 A66-40065
Effect of signal frequency maladjustment and automatic phase control circuit parameters on amplitude and phase shift of reflex amplifier, analyzing filtering properties 22 p3875 A66-40071

PHASE DEMODULATOR
Coherent interference rejection, discussing noise and modulator-leakage pickup rejection in laser communications experiments 07 p1001 A66-17217
Diene tracking station electronic equipment accomplishes variable and selective amplification of signals and coherent demodulation of phase information 10 p1520 A66-21710

PHASE DETECTOR
Computer analysis of loading effect on diode phase-sensitive detector circuit from point of view of nonlinearity 01 p0043 A66-10917
Antenna phase measurement by reflection method, with transmitting antenna and receiving test antenna located side by side 06 p0878 A66-16037
Phase principle for detecting weak narrow band Gaussian signal in presence of receiver noise 08 p1187 A66-19840
Port-to-port isolation of phase detectors through use of complementary transistors in

- beta multiplier circuit to prevent unwanted signal reception 11 p1657 A66-23177
- Fast phase fluctuations of signal reflected from F-2 layer 15 p2451 A66-29094
- Phase fluctuations of multimode oscillators detected by nonlinear transformations of oscillations 17 p2874 A66-32249
- Binary delay-lock tracking-loop performance for various RF implementations 18 p3069 A66-34252
- Explorer XVIII plasma flux measurement data analysis, plasma detector, map of transition zone between magnetosphere and solar wind and associated energy spectra 18 p3168 A66-34351
- Amplitude and phase detection for determined signal with nonstationary noise, using generalization of Levin method 20 p3516 A66-37385
- Doppler frequency-measuring tracking system in which tracking filter or returned heterodyne is used for definition of signal with unknown frequency 23 p4038 A66-41524
- Bridge circuit measurement of phase at UHF and microwave frequencies, examining amplitude modulation and mixer types 24 p4171 A66-42101
- PHASE DEVIATION**
- Directional properties of surface antennas with linear, squared and cubic phase distortions for symmetrical and asymmetrical amplitude distribution laws 01 p0035 A66-10220
- Correlation of phase fluctuations of optical field by photoelectric predetection interferometer 03 p0367 A66-12304
- Mean square phase fluctuations at phase detector input of automatic frequency control system with proportional integrating filter 06 p0859 A66-17192
- Signal separation and phase measurement device using phase probability distribution function of signal-noise mixture 07 p1005 A66-17352
- Microwave all-pass circuits consisting of reactive networks used in conjunction with wideband circulators or couplers, noting resultant phase distortion 07 p1006 A66-17502
- Optimal processing time of signal in side-scanning radar in presence of phase fluctuation 08 p1183 A66-19111
- VLF phase perturbations produced by Soviet high altitude nuclear explosion of November 1, 1962 10 p1496 A66-21153
- Parameters of dielectric walls of various structures with optimal radio-engineering characteristics treated by graphical method 10 p1511 A66-21676
- Small peak phase deviation measured from required characteristics in linear frequency-modulated and pulse-compression radar system 11 p1652 A66-22386
- Diurnal phase variation of VLF signal propagated through Arctic polar cap as affected by solar plasma and associated ionospheric activity 11 p1657 A66-23107
- Plasma diagnostics in terms of response times, noting conversion of phase frequency deviations of probing signal, data recording for plasma in motion and expression for waveguide frequency band 14 p2298 A66-28472
- Phase variation of vlf radio waves received from NPG/NLK 16 p2653 A66-30799
- Relation between phase shift and mechanical changes in waveguide due to evacuation or pressurization 16 p2667 A66-31646
- Synthesis of phase synchronization system providing maximum-level filtering of external fluctuation noise, using generalized integral criterion 17 p2898 A66-31853
- Directional properties of surface antennas with linear, squared and cubic phase distortions for symmetrical and asymmetrical amplitude distribution laws 17 p2880 A66-31903
- Mean square phase fluctuations at phase detector input of automatic frequency control system with proportional integrating filter 19 p3324 A66-35550
- Phase angle irregularities in scattering of ionospheric radio waves 20 p3521 A66-38357
- Characteristic phase-lag method for analyzing forced response of damped systems used in optimal multipoint excitation 21 p3824 A66-38568
- Nonlinear phase distortion as function of output power and helix voltage measured on O-type TWT amplifiers for reduction purposes 21 p3710 A66-38832
- Tapered waveguide delay equalizer for correcting phase distortion caused by cut-off characteristics of waveguide 22 p3882 A66-40868
- Time dependency of phase difference of two weakly coupled nonlinear optical oscillators, considering coupling of two traveling waves in laser 24 p4220 A66-42257
- PHASE DIAGRAM**
- Quasi-binary cross sections and phase diagrams for ternary semiconductor systems obtained on basis of combination energy estimates 01 p0118 A66-10288
- Polythermal and isothermal cross sections of phase diagram of titanium-niobium-chromium system at high temperatures 01 p0086 A66-10453
- Microstructural and X-ray studies of solid solutions of Ga-Sb-Te system to determine solubility region in gallium antimonide section of phase diagram 01 p0120 A66-10458
- Phase diagram from thermodynamic data of complex solution of nitric acid and nitrogen tetroxide at low temperature 01 p0163 A66-10626
- Thermal and microscopic analysis and determination of microhardness, electrical conductivity and emf in titanium-aluminum-oxygen ternary system 01 p0087 A66-10659
- Isothermal cross section of phase diagram of Zn-Cd-S and sulfide films 01 p0125 A66-10781
- Thermodynamic properties of cobalt-molybdenum alloys determined by emf method measured between 1170 and 1470 degrees K 01 p0088 A66-10940
- Beta phase in alloys determined based on titanium with aid of X-ray diffraction 02 p0246 A66-11997
- Isothermal section and phase equilibria of Ti-V-C system 02 p0246 A66-12273
- Concentration gradients in meteoritic kamacite predicted from Fe-Ni phase diagram and diffusion analysis 06 p0955 A66-16787
- Phase diagram of copper gallium telluride-gallium telluride semiconductor alloy 07 p1091 A66-17219
- Cobalt-vanadium-boron system, discussing phases with boron coordination number 8 07 p1047 A66-17225
- Phase diagram of ternary system niobium-aluminum-nickel with results of thermal, microstructural and X-ray phase analyses and hardness measurements 07 p1050 A66-18063
- Interaction between hydrogen and various titanium alloys, noting correlation between sorption capacity of alloys and type of phase diagram 07 p1050 A66-18064
- Thermal shock resistant carbides, using arc-casting techniques, noting microstructure, phase diagram, mechanical properties, etc 07 p1055 A66-18504
- Equation for entropy of formation of interstitial solid solution with two interstitial sublattices, using phase diagram for constants in free energy and activity equations 08 p1258 A66-18903
- Phase equilibria in Zr-Co-C and Nb-Fe-C ternary systems at high temperatures, using X-ray and microscopic analyses 10 p1546 A66-21509
- Isothermal cross section of phase diagram of Zn-Cd-S and sulfide films 11 p1749 A66-22294
- Phase composition effect on relaxation stability of chromium steel used for helical spring 11 p1716 A66-22750
- Argon-oxygen phase diagram determined by X-ray diffraction 11 p1650 A66-23208
- One-dimensional probability density of phase derivative of mixture of radio signal and Gaussian noise 11 p1658 A66-23222
- Phase equilibrium diagram of Ti-Co-Al system at 800 degree C, based on X-ray and Microstructural analyses 12 p1893 A66-23762
- X-ray study of 16 monolith and powdered brass samples with 30.07 to 40.1 percent copper, indicating two phase fields for gamma region of Cu-Zn system 12 p1896 A66-24866
- Effects of heat treatment and aging on phase composition, strength and plasticity of industrial titanium alloys 15 p2522 A66-29178
- Fe-Ni-P system and structure of iron meteorites 15 p2603 A66-29967
- Au-Sn-Pb section of Au-Pb-Sn phase diagram, examining solderability of gold coatings of electronic components 16 p2722 A66-30223
- Sigma-type phase occurrence in austenitic superalloys, discussing electron/atom density, residual matrix composition, etc 16 p2725 A66-31456
- Metastable phase composition diagram for alloys of titanium-chromium system 16 p2727 A66-31567
- Phase diagram of copper gallium telluride-gallium telluride semiconductor alloy 17 p2975 A66-31990
- TiN-Mo cermet production by hot pressing and microstructure and phase composition, noting Ti-N production method 17 p2939 A66-32392
- Phase relations in cobalt niobate-cobalt tantalate system noting structural characteristics, solubility, phase transitions, etc 17 p2940 A66-33062
- Thermodynamic analysis of Hg-Cd and Hg-Bi alloys, noting enthalpies and entropies of mixing, boiling point and phase diagrams, vapor pressure measurements, etc 17 p3037 A66-33289
- Aging temperature ranges for tensile specimens of equiatomic niobium-zirconium alloys, noting phase diagrams, structural changes, mechanical properties, precipitation hardening, etc 17 p2940 A66-33290
- Ti-Be system phase diagram, noting solubility and formation of eutectoid and eutectic 18 p3121 A66-33725
- Chemical activities of cadmium and magnesium in binary Mg-Cd alloys based on vapor pressure measurement by Knudsen effusion method 18 p3121 A66-33729
- Electric conductivity of beta and gamma phases of tantalum-carbon system as affected by temperature and composition 19 p3386 A66-36424
- Phase equilibria in Ti-Co-Si system 19 p3387 A66-36451
- Low temperature liquid-vapor equilibrium in neon-oxygen system at pressures up to 5000 psi from 63 to 152 degrees K 20 p3601 A66-37088
- Systems producing germanide phases noting phase diagrams of germanides of s-elements, ds-elements, fds-elements and sp-elements 20 p3616 A66-37415
- Phase diagram of titanium-oxygen-hydrogen system, plotting isotherms and isobars for equilibrium hydrogen pressure, noting oxygen effect 20 p3585 A66-37748
- Phase and chemical compositions of structural components forming in iron-nickel-chromium alloys with aluminum and titanium content 22 p3936 A66-40787
- Phase equilibria in Zr-Co-C and Nb-Fe-C ternary systems at high temperatures, using X-ray and microscopic analyses 23 p4081 A66-41529
- Metallography, roentgenography and differential thermal analysis of composition temperature ranges of chromium-germanium phases 23 p4082 A66-41825
- Transitions between phases and states of crystallographic order in films; noting conditions for preferential nucleation and analogies between two-and three-dimensional phase diagrams 24 p4251 A66-42305
- Alpha and gamma solubility limits in Fe-Ni phase diagram at temperatures above 500 degrees C, using quench-and-anneal and diffusion-couple techniques and electron probe microanalyzer 24 p4227 A66-42365
- PHASE ERROR**
- Phase comparison of outputs from variable frequency oscillator and crystal oscillator 06 p0853 A66-16674
- Phase-correcting circuit design methods for equalizing phase characteristics of high sensitivity communication channels 07 p1001 A66-17343
- Variation of antenna amplification ratio with distance as function of phase error at antenna aperture with exciter off-focus as error source 13 p2030 A66-25225
- Antenna tolerance theory, presenting axial loss of gain and pattern degradation as function of reflector surface rms error 15 p2462 A66-29020
- Phase error and associated cross-

polarization effects in Cassegrainian-fed microwave antenna 18 p3074 A66-33528
Near-threshold behavior of phase-locked devices, noting phase error processes 19 p3301 A66-35697

PHASE LOCK

SA DELAY LOCK

Nonlinear time-variant phase-lock loop differential equation for arbitrary loop voltage-controlled oscillator sweep voltages used in aerospace tracking and communication systems 04 p0502 A66-13605
Digital computer simulation for phase-locked loops used as narrow-band tracking filters in space communications and radar systems 05 p0652 A66-14590
Stability and synchronizing properties of third order phase-locked oscillator system 06 p0823 A66-15889
Gunn effect n-type GaAs diode phase locked to stable frequency by injecting CW signal into circuit along with video pulse 06 p0925 A66-16671
Gas laser direct modulation 07 p1045 A66-18355

Phase-locking effect and phase sum of LF and HF oscillating modes in laser 07 p1046 A66-18413
Wiener filters in phase locked loop design, noting tracking function for orbital trajectory, derivation of optimum filter and noise bandwidth 09 p1350 A66-19921
Filtering properties of frequency-stability transport circuits of molecular beam generator, noting design considerations for high efficiency 09 p1353 A66-20442
Probability of signal acquisition by phase-locked oscillator system operating in frequency search mode, determining maximum admissible search rate without noise 09 p1345 A66-20443

Phase-locked marker for rapid identification and accurate measurement of arbitrary frequency in spectrum under analysis 09 p1382 A66-20673
Pulse-phase locked automatic frequency control for multiplication conversion 10 p1504 A66-21678
Phase locking of two gallium arsenide oscillators at 2 to 4 gc under CW operation 10 p1516 A66-22097

Digital and RF/linear circuits compared noting monolithic, hybrid and thin film circuit limitations, phase locked loop design, etc 12 p1830 A66-23756
Frequency stability requirements for space communications and tracking systems 12 p1815 A66-24131
Acquisition behavior of phase-locked loops analyzed by treating loop as first-order loop with slowly varying dependent bias 12 p1856 A66-24648

Test instrumentation for threshold sensitivity and noise bandwidth measurement of narrow band phase-locked receivers, employing statistical techniques 13 p2079 A66-25659
Stability of phase-locked loops using Fokker-Planck equation and under additive stationary white Gaussian noise linearized about some equilibrium point 13 p2025 A66-26075

Phase locking of one laser to another by direct injection of first laser beam into second laser cavity 13 p2105 A66-26593
Fundamental principles of circuits used by Iris telemetry stations, including narrow bandwidth locking phase loop, coherent phase demodulator and diversity combining network 14 p2238 A66-27546

Phase locking range of avalanche diode CW oscillator to external microwave signal by direct injection 15 p2463 A66-29042
Tunable precision frequency source using phase locked variable frequency oscillator for mobile radio sets 15 p2451 A66-29313

Response of phase-locked loop near threshold to input consisting of modulated carrier and white Gaussian noise, noting role of SNR 18 p3070 A66-34259
Near-threshold behavior of phase-locked devices, noting phase error processes 19 p3301 A66-35697

Sequential estimation on states of linear systems disturbed by white noise, determining relations between covariance matrices 19 p3338 A66-36736
VLF signal phase and amplitude from FR-1 satellite measured by phase-locked filter 22 p3866 A66-40165

Pontryagin maximum principle minimization of time frequency transition in white noise driven phase-locked loop 23 p4048 A66-41316
Error probability in PCM/FM with phase-lock loop discriminators, noting role of input SNR 23 p4037 A66-41320
Digital simulation study of acquisition capabilities of phase-locked loop in presence of noise 23 p4050 A66-41616

Silicon integrated circuits in rocket telemetry transmitter phase-lock frequency stabilization unit 24 p4180 A66-42262
Nonlinear behavior of second-order phase locked loop in presence of noise, discussing probability distribution of phase error, statistical properties of loop behavior, etc 24 p4172 A66-42618
Phase-lock servo-loop circuit for space communication providing estimate of incoming signal through correlation process 24 p4175 A66-42826

PHASE LOCK DEMODULATOR
Threshold performance of frequency demodulator using feedback compared to phase locked loop 04 p0492 A66-13587
Optimization of control loop type for minimum threshold which is function of modulation index, obtaining results using sine wave modulation 19 p3301 A66-35695
Multilevel pulse code modulation system for space communication that uses increased power availability due to larger boosters while meeting reduced bandwidth requirement 20 p3513 A66-37198

PHASE MODULATION

SA FREQUENCY MODULATION

Optical phase modulator using ferroelectric barium titanate crystal plate 01 p0117 A66-10240

Hysteresis-free UHF ferrite phase modulator using remanent field in rotating ferrite disk as modulating feature 01 p0040 A66-10556

Serrodyne frequency conversion determined, using sawtoothed FM of microwave oscillator and subsequent conversion with delay line in sawtoothed phase modulation, calculating phase distortion 04 p0499 A66-14052

Phase modulated standard signal and additive noise effect on nonlinear phased locked oscillator 04 p0488 A66-14401

High speed microwave ferrite amplitude and phase modulators in standard rectangular waveguide systems 06 p0841 A66-15959

Power spectrum of random phase-modulated carrier, assuming rectangular spectrum for modulating signal 06 p0853 A66-16661

Transmission of analog message over channel corrupted by additive Gaussian noise, using modulation of sinusoidal carrier 06 p0834 A66-16857

Bridge phase modulator with RLC circuit, noting parasitic amplitude modulation elimination 06 p0858 A66-16991

High sensitivity method for measuring small phase modulations according to line width of Lissajous figures 07 p1005 A66-17346

Signal to noise ratios of AM, FM and PM systems applied to FM-FM receiver 08 p1185 A66-19563

Arc-sine modulation method of overcoming amplitude nonlinearities in transmission systems 08 p1186 A66-19741

Solar diurnal variation data used to determine parameters of phase-amplitude modulation of periodic cosmic-ray variations 08 p1286 A66-19788

Signal to noise ratio in amplitude-, angle-, and pulse-modulated systems with carrier power exceeding receiver power 12 p1820 A66-24727

Linearity of phase vs input signal characteristics of phase modulators improved through feedback 13 p2036 A66-25524

Modulation theory, discussing phase-envelope relation for band limited wave in terms of Fourier series 14 p2234 A66-27032

Models of hybrid AM-PM signal modulated by single sinusoid and having one-sided frequency spectrum described by using

MacLaurin series expansions, noting phase relation of sidebands to carrier 14 p2235 A66-27061

Design and operation of ferrite rectangular waveguide modulator in 5 to 7 gc/s range 14 p2258 A66-27963

Desensitization in FM or PM transistorized receivers 14 p2259 A66-28042

Polyphase coding modulation system with additive white Gaussian noise, finding channel capacity bounds on maximum rate and error exponent 15 p2452 A66-29659

FM/FM and PAM/PM integrated telemetry systems with MDI for missile evaluation system 16 p2651 A66-30562

Demodulation method in which phase modulation of laser beam is converted to amplitude modulation by autocorrelation 16 p2717 A66-30616

Varactor frequency doubler response to amplitude and phase modulated signals 17 p2878 A66-31811

Spectral analysis of HF oscillations with phase-modulated fluctuations as functions of phase dispersion and spectral form of modulating fluctuations 17 p2898 A66-31854

Serrodyne frequency conversion determined, using sawtoothed FM of microwave oscillator and subsequent conversion with delay line in sawtoothed phase modulation, calculating phase distortion 17 p2884 A66-32218

Internal phase modulation in He-Ne laser using electro-optic effect in crystal quartz, observing spectrum and RF mode beats 17 p2934 A66-32621

Simultaneous amplitude-phase modulation of periodic cosmic ray variations, examining properties of satellites produced by these variations for case of true waves 18 p3196 A66-34867

Interference in passband of FM or PM channel due to adjacent FM or PM channel in telemetry system 19 p3300 A66-35687

Phase comparison telemetry consisting of passive VHF receivers and CW transmitters for satellite detection 19 p3301 A66-35692

Black-box approach applied to design of 60-megacycle IF amplifier, considering application of AGC to circuit and design of phase modulator and balanced mixer 19 p3321 A66-36423

Amplitude and phase fluctuations in two-circuit quartz-crystal oscillator with crystal positioned between grid and electron tube cathode 20 p3525 A66-37152

Solar diurnal variation data used to determine parameters of phase-amplitude modulation of periodic cosmic-ray variations 21 p3809 A66-38784

Coded and phase-modulated signals detected by receiver containing phase detector and decoder operating algebraically on quantized phase values, using polynomial representation 21 p3704 A66-39139

Equations derived for combined single sideband hybrid AM-PM signal 22 p3866 A66-40177

Spatial phase modulation of wavefronts used in spatial filtering and holography, examining means of preventing or reducing noise and distortion 22 p3920 A66-40888

Image restoration via phase holograms, noting applications to deteriorated photographic negatives and positives 23 p4068 A66-41411

AC background in phase of output oscillation of multistage frequency multipliers attributed to presence of HF harmonics in automatic bias circuit 23 p4038 A66-41520

Latching phase modulator in standard rectangular waveguide, using square loop magnetic properties of toroidal ferrite materials to obtain digital increments of reciprocal phase shift 24 p4186 A66-43174

PHASE SHIFT

Phase shift in electromagnetic waves between unmagnetized and magnetized ferrite partially filling waveguide 01 p0039 A66-10538

Differential phase shifts in circularly cylindrical waveguides partially filled with circumferentially magnetized ferrite compared with theoretic computation 01 p0027 A66-10553

Reggia-Spencer phase shift for X-band scanning antenna 01 p0042 A66-10581

Remanent ferrite phase shifter as beam steering elements in phased array radars 01 p0042 A66-10592

Phase shifters for UHF waves using plasmas 01 p0042 A66-10593

Phase shifter which includes ring potentiometer and passive network, noting possible frequency division application 01 p0043 A66-10878

Estimation of apparent vertical wind velocity from measurement of phase variation of ordinary and extraordinary magnetotonic wave components 02 p0224 A66-12134

Small slope phase-frequency for minimum phase loops with adjustable transmission band, using cascading tuned individual or connected circuits 02 p0209 A66-12267

Phase-shift analysis of electron and hole optical scattering by high density of ionized acceptors, calculation appropriate to direct band-gap semiconductor 03 p0411 A66-13146

Phase shifting and elimination of spectral components effect on transmission channel for pulsed signal frequency limited from below 04 p0488 A66-14403

Spectrum of phase-manipulated signal at output of ideal amplitude limiter 04 p0501 A66-14405

Frequency analysis of wideband RL and RLC phase shifters, using Chebyshev polynomials 04 p0501 A66-14406

Real and theoretical accuracy of direction finding discussing phase, frequency and amplitude fluctuation of signal 04 p0544 A66-14412

20-kw latching nonreciprocal X-band ferrite phase shifter design and performance 05 p0641 A66-14556

Phase steps and amplitude fading of VLF signals at dawn and dusk, supposing two waveguide modes exist in dark part of path and one in daylight 05 p0632 A66-14838

Antenna phase measurement by reflection method, with transmitting antenna and receiving test antenna located side by side 06 p0878 A66-16037

Coaxial transmission line with adjustable harmonic phase delay equalizer network 06 p0848 A66-16105

Transistor RC oscillator with single-element tuning, using two push-pull driven half-lattice phase shifters 07 p1004 A66-17216

Microwave theory and techniques - IEEE G-MTT Symposium, Clearwater, Florida, May 1965 07 p1006 A66-17501

Digital latching phase shifter which combines submicrosecond switching with compact ferrite strip transmission line structure 07 p1007 A66-17506

High power phase shifter for phased array systems, using temperature compensated garnet along with dielectric liquid cooling technique 07 p1007 A66-17507

Quadrature modulation single-sideband circuit as frequency translating two-port, comparing performance with conventional modulator-with-SSB filter 07 p1015 A66-17746

Radiative lifetimes of strongest vacuum UV multiplets of B I, B II, C I, C II, N I and N II measured by phase shift 07 p1083 A66-18423

Optimal value of reactance of microwave parametric element 08 p1191 A66-18919

Self-adaptive closed-loop automatic control systems to produce given or maximum damping coefficient of free oscillations 08 p1201 A66-19675

Design, construction and electrical performance of 20-kw 8.5 to 9.5 gc nonreciprocal latching X-band ferrite phase shifter 09 p1352 A66-20259

Boundary condition constraint method for generalizing R-matrix theory, permitting use of shell model as basis for nuclear-reaction calculations 09 p1405 A66-20822

Carnahan proposed first order ether drift experiment using two lasers shown to be of second order nature, noting role of phase shifts 10 p1543 A66-21656

Microwave phase measurement technique using slotted-line interferometer for optimum accuracy 10 p1537 A66-21874

Phase switching of two-circuit parametric oscillator operating as three-position trigger 11 p1666 A66-22721

Optical constants of thin films deposited

on nonabsorbing window obtained by Kramers-Kronig method 11 p1755 A66-22871

Small slope phase-frequency for minimum phase loops with adjustable transmission band, using cascading tuned individual or connected circuits 12 p1848 A66-23871

Phase variation dependence at receiver output on polarization of wave incident on antenna of phase measuring system 12 p1817 A66-24277

Phase shifters for signals arriving from North-South arm elements of Northern Cross radio telescope reflector antenna array 12 p1836 A66-24304

Exact equation for phase constant obtained for rectangular waveguides partially filled with ferrite, using ABCD matrix, eliminating writing of field equations and matching boundary conditions 12 p1839 A66-24617

Design of nonreciprocal latching ferrite devices including single toroid digital waveguide phase shifter, cut-off switch, miniaturized slow wave phase shifter, etc 12 p1839 A66-24618

Phase difference due to elastic waves produced by cyclic heating of targets by impacting ions from pulsed beam 13 p2159 A66-25070

Measuring apparatus to determining amplitude and phase of components of electromagnetic wave transmitted and reflected by given propagation medium 13 p2022 A66-25465

Temperature stable high power C band digital many-phased-array-radar phase shifter 13 p2035 A66-25502

Magnetic material and field application to solid state electronics, noting amplification of microwaves, magnetoelastic waves, application of microwave ferrite components, low temperature circulators, etc 13 p2165 A66-25520

Differential amplifiers using common-collector, isolated and lateral complementary transistor structures, including frequency response, phase shift, etc 13 p2036 A66-25532

Figure of merit for reflection type varactor phase shifter 13 p2037 A66-25545

High power phase shifting with p-i-n diodes, noting that 1000-v diodes will increase peak power capacity to 10 kw 13 p2165 A66-25547

Phase shifter for large phased array radar, operation and performance 13 p2037 A66-25548

Optical length variations in laser amplifiers determined during pumping and amplification, using interferometry 13 p2092 A66-25999

Phase hologram generation by means of thermoplastic xerography 13 p2081 A66-26001

Automatic gain control for reducing dynamic range of signals at output of phase radio range finder, noting effect of parasitic phase shifts 14 p2236 A66-27356

Thin-iris loaded planar waveguide, considering phase shift and series representation 14 p2241 A66-27962

Low temperature transport properties of hydrogen, deuterium and HD, noting quantal phase shift, intermolecular potentials, etc 14 p2414 A66-27973

Estimation of apparent vertical wind velocity from measurement of phase variation of ordinary and extraordinary magnetotonic wave components 14 p2287 A66-28091

Schroedinger equation in semiconductor with N atoms containing dislocation, vacancy or other defect, noting phase shift and local charge neutrality 16 p2775 A66-30730

Synchro system transfer functions comprising synchro and resolver cascades of nonidentical units, giving graphs for system transformation ratio and phase shift 16 p2672 A66-31440

Phase shift lifetime of excess carriers in semiconductors under sinusoidal injection, showing decrease as injection frequency increases 16 p2784 A66-31451

Boresight shift in phase sensing monopulse antennas due to reflected signal 16 p2667 A66-31647

Probability distribution of phase difference between two spaced antennas excited by random fan of rays plus specular component 17 p2874 A66-32385

Phase observations of 20-and 60-khz signals

received at different locations 17 p2875 A66-32535

Precision phase meter, discussing principle of operation, design, circuit description and uses 18 p3075 A66-33832

High-power feed for satellite tracking radar using four-way static split system with Cassegrain antenna and four symmetrical horns, noting phase shift errors 18 p3086 A66-34324

Variable-structure automatic control system with switchable phase-shifting filters for linear plants, converting error signal to control switching device 18 p3092 A66-34994

Excess carriers lifetime in semiconductors nonstatic measurement by photoconductive phase shift of spreading resistance under point contact 19 p3433 A66-35330

Device for frequency translations in microwave range employing latching ferrite phase shifter and digital switching driver to obtain multiple step approximation 19 p3314 A66-35520

Plasma density using laser based interferometer, interpreting phase shift of laser signal as time dependent laser frequency variation 19 p3374 A66-35817

Phase shifts of elastic electron scattering from neutral helium, considering atomic distortion in adiabatic approximation 19 p3402 A66-35991

Primary shift of phase of circadian periodicity effected by time displacement for physiological functions 19 p3285 A66-36374

Quantum mechanical calculations for Lennard-Jones potential show dependence of barrier penetration and resonance effects on phase shifts 19 p3404 A66-36798

Self-adaptive closed-loop automatic control systems to produce given or maximum damping coefficient of free oscillations 20 p3538 A66-37267

Stimulated Brillouin scattering in ferroelectric triglycine sulphate crystals and Rochelle salt exhibiting second-order phase transition, measuring scattering threshold as temperature function 20 p3620 A66-37770

Multielement antenna scanning grid-phasing method having random function distribution at aperture 20 p3533 A66-37994

Phase anomaly detected by chemical test D during decreasing phase of last solar cycle 21 p3732 A66-38629

Born approximation for phase shift of microwaves scattered from underdense cylindrical plasma used to determine plasma electron density 21 p3794 A66-39572

Stable limiting cycles of laser resulting from mutual synchronization of phase-shifted oscillation modes 22 p3929 A66-39653

Phase switching of two-circuit parametric oscillator operating as three-position trigger 23 p4045 A66-41459

Transient ionization levels of hypersonic velocity projectile wakes measured by open microwave resonators phase shift observation 24 p4209 A66-42194

AM/PM conversion factor of TWT as function of helix voltage when beam current is varied to keep gain constant 24 p4180 A66-42371

Integral equation of flat-roof resonator solved by iteration method, deriving mode patterns, phase shifts and power losses 24 p4174 A66-42807

Latching phase modulator in standard rectangular waveguide, using square loop magnetic properties of toroidal ferrite materials to obtain digital increments of reciprocal phase shift 24 p4186 A66-43174

PHASE-SHIFT KEYING

Book on channel construction for data transmission using phase-shift keying, considering relative phase telegraphy and noting subassemblies, noise effect, etc 03 p0336 A66-13285

Keying phase-sensitive loop with capacitive loading in selection circuits for frequency separation of telemetry signals 04 p0504 A66-13775

Optimum number of phase-quantization steps in phase-shift keying communications system for maximum data transmission rate, using binary integration method 08 p1183 A66-19097

Comparison of frequency shift keyed and phase shift keyed pulse compression

systems via digital computer simulation 12 p1819 A66-24602
 Phase shift keying with transmitted reference, obtaining probability of error for m-phase receiver system in presence of additive Gaussian noise 13 p2019 A66-25147
 Analog form data transmission via FM compared to digital form via phase shift keying, noting accuracy, power and bandwidth required, output signal to noise ratios, etc 18 p3067 A66-33902
 Graph and derivation of performance characteristics of phase-shift-keyed communication systems where receiver phase reference is noisy 18 p3069 A66-34250
 Optimal design of one-way and two-way coherent communication links for space communication 19 p3300 A66-35667
 Upper and lower bounds on binary error probability as function of signal to noise ratio for digital data systems operating over complex Gaussian fading channel 21 p3720 A66-39638
 Optimal design of one-way and two-way coherent communication links for space communication 22 p3864 A66-40060

PHASE-SPACE INTEGRAL

Number of repetitions of aperiodic Markov chain with given phase state space and transition probability 01 p0095 A66-10732
 General properties of periodic orbits in given potential field related to invariant curves in four-dimensional phase space 02 p0291 A66-12185
 Equations of motion of turbulent gas and formulation of simple model of turbulence from classical Liouville equation and aerodynamics of rarefied gas 06 p0802 A66-16537
 Stability theory of magnetic phases for simplified quasi-particle band model of transition metals and alloys 10 p1580 A66-21734
 Space-time correlation tensor of turbulent fields by phase space functional Lebesgue-Stieltjes integration, statistical hydromechanics and probability measure theory 15 p2479 A66-29398
 Equations of motion of turbulent gas and formulation of simple model of turbulence from classical Liouville equation and aerodynamics of rarefied gas 15 p2482 A66-29973
 Resonance phenomena in oscillator acted upon by sinusoidal external force with slowly varying frequency and amplitude 16 p2747 A66-30740
 Minimum time control systems with servoloop relay for optimal error correction, employing matrix analysis 16 p2671 A66-31061
 Nonlinear system position in phase space determined from approximate solution of integral equations yielding initial values 16 p2748 A66-31519
 Electronic computer technique for dividing phase space of transistorized circuit into linearity regions 17 p2885 A66-32253
 Heat transfer problems solved, using Pohlhausen solution for phase-space trajectory, noting effect of boundary conditions and application of analog computer 17 p3034 A66-32497

PHASE TRANSFORMATION

Crystal chemistry of nonmetallic materials prepared under moderate or high pressure and recovered and retained under ambient conditions 01 p0090 A66-10292
 Variations of transition temperature and long-range order parameter of tantalum-tin compounds studied as functions of sintering time and temperature 02 p0271 A66-11441
 Electrolytic isolation and precise composition of intermetallic phase of titanium silicide formed in alloys of system Ti-Al-Fe-Si-B-Cr 02 p0245 A66-11994
 Nuclear magnetic resonance study of ferroelectric phase transition in NaNO_2 02 p0276 A66-12027
 Effect of aluminum on stability and kinetic decomposition of beta phase in Ti-Mo-Mn alloys 03 p0384 A66-13169
 Knight shift for nuclear resonance lines of intermetallic Nb-Sn phase varies with transition temperature 04 p0566 A66-14289
 Thermodynamics and Phase Relations, Volume 1, covering interaction of metals and gases 06 p0895 A66-16305

Phase work hardening of austenitic Fe-Ni alloys in phase transformation process 06 p0896 A66-16607
 Phase transitions in lithium niobate and tantalate, discussing 07 p1092 A66-17221
 Temperature dependence of electrical conductivity in organic semiconductors, examining compounds during transition from solid to liquid state 07 p1100 A66-17931
 Phase transitions theory analyzed by simple self-consistent equations including ferromagnetism, antiferromagnetism, liquid-gas condensations and melting and freezing 09 p1424 A66-20076
 Phase recrystallization effect on structure and mechanical properties of cast monophase titanium alloys 09 p1389 A66-20614
 Wideband DC amplifier operating with double full-wave signal transformation 11 p1664 A66-22621
 Diffusion and nondiffusion transformations in titanium alloys, noting martensitic transformation 11 p1716 A66-22751
 Spacecraft thermal control by fusible or phase-change materials 11 p1787 A66-23165
 Soviet and foreign papers on kinetics of phase transformations in titanium alloys 12 p1892 A66-23520
 Zeta phase in tantalum-carbon system, noting diffusionless transformation of carbon-deficient lattice under compressive stress 12 p1892 A66-23566
 Temperature dependence of dielectric permittivity and relative expansion of bismuth ferrite in large temperature intervals, detecting phase transitions 14 p2357 A66-27078
 Bubble boiling model of nucleation and growth of bubble on heating surface 14 p2411 A66-27138
 Condensation of vapor and vapor-gas mixtures in supersonic nonequilibrium nozzle flows 14 p2219 A66-27454
 Transient thermoelastic stresses under thermoelastic and sublimation ablation, noting temperature profile 14 p2402 A66-27970
 X-ray and thermographic methods to study structure and phase composition of alloys belonging to silver indium selenide systems 15 p2557 A66-28558
 Phase transformations in titanium alloys annealed at high temperatures and subjected to aging 15 p2522 A66-29181
 Effect of high temperature thermomechanical condition on structure and phase composition of titanium alloys, noting deformation role in hardening 15 p2522 A66-29184
 Hardenability /ratio between phase transformation and cooling rates at given point of sample cross section/ in several titanium alloys after annealing 15 p2522 A66-29190
 Transformation process effect on superconducting behavior of titanium-chromium alloy 16 p2722 A66-30308
 Effect of oxygen on kinetics of decomposition of beta phase in VT 15 titanium alloy 16 p2724 A66-31236
 Solubility of hydrogen in titanium 16 p2724 A66-31238
 Phase transitions in lithium niobate and tantalate, discussing 17 p2976 A66-31992
 Mutual reactions occurring between various allotropic forms of Ta₆A during isothermal treatments of austenitized beta alloy 17 p2939 A66-32327
 Phase transition in two-dimensional lattice gas of hard-square molecules 17 p2978 A66-32505
 Phase transformation and precipitation processes as function of aging treatment in 15 percent Ni maraging steel 18 p3122 A66-33752
 Existence of dense and dilute distinct phases in one-dimensional classical fluids consisting of finite particles obeying Boltzmann statistics and potential wells of finite range 18 p3099 A66-34203
 Structural transformations in alnico alloy with titanium studied by X-ray 18 p3123 A66-34401
 Mathematical analysis of thermal wave

technique for linear kinetics from viewpoint of solid-liquid interface motion 18 p3265 A66-34508
 Superconducting-to-mixed state phase transformation in type II superconductors in applied magnetic field and accompanying onset of vortex filaments at surfaces 18 p3158 A66-34686
 Martensitic transformations in ferrous and nonferrous alloys, discussing kinetic and structural characteristics 19 p3380 A66-35848
 Molecular-kinetic resistance effect on heat exchange in Nusselt-type vapor condensation on vertical plate and in vapor-bubble growth in superheated liquid 19 p3479 A66-36310
 Phase separation from tempering of martensite in iron-nickel alloys with aluminum additions 19 p3386 A66-36426
 Niobium addition effect on solid state transformations in vanadium-tantalum alloys 19 p3387 A66-36452
 Temperature dependence of UV radiation absorption coefficient in quartz undergoing phase transition for several spectral lines 19 p3447 A66-36722
 Solubility and phase transformation in titanium-zirconium system, using X-ray diffraction techniques 20 p3585 A66-37786
 Equilibrium phases of elastic materials occurring at uniform temperature and pressure and at zero deviatoric stress, examining rapid quenching and shearing effects 21 p3829 A66-38940
 Temperature dependence of dielectric permittivity and relative expansion of bismuth ferrite in large temperature intervals, detecting phase transition 22 p3967 A66-40834
 Electron field operator derivation from dynamical rearrangement formulation applied to neutral superconductivity 23 p4112 A66-41275
 X-ray and thermographic methods to study structure and phase composition of alloys belonging to silver indium selenide systems 23 p4112 A66-41279
 Vanadium and molybdenum effect on properties and phase transformations of titanium chromide 23 p4082 A66-41824

PHASE VELOCITY

Tapered circuit TW amplifier experiments considering circuit phase velocity tapering effects on small signal gain, bandwidth, dynamic power limiting, etc 01 p0036 A66-10394
 Wave attenuation with phase velocity greater than speed of light in infinite plasma layer between ideal metallic plates 02 p0268 A66-11785
 Extension of Vladimirovskii method for wave propagation in circular iris waveguide to include iris waveguides of rectangular cross section 02 p0199 A66-11787
 Phase velocity and growth coefficient of instability of plasma with discontinuous velocity distribution, noting role of ion distribution function 07 p1087 A66-17852
 Operations in vector analysis applied to velocity field of image point in phase plane, establishing stability criterion for singular points 09 p1361 A66-20436
 Geomagnetic micropulsations, noting diurnal patterns of phase difference, propagation medium dispersive characteristics, signal velocities, etc 10 p1529 A66-21151
 Stability of idealized laminar boundary flow, determining phase velocity, amplification rate and wave number of all disturbances 16 p2686 A66-30948
 Plateau formation mechanism for electron velocity distribution function during damping of monochromatic plasma waves 19 p3406 A66-35737
 Electromagnetic wave propagation in plasma boundary, considering electron collision with boundary, noting role of thermal velocities of electrons 20 p3512 A66-37137
 Generation of ion plasma waves in weakly ionized gases with measurement of phase velocity and damping 20 p3609 A66-37597
 Flute type oscillations of hot ion plasma in homogeneous magnetic field with wave-plasma resonances 23 p4105 A66-41705

PHASED ARRAY

Angular scanning of laser beam forming multiple beam phased array, making use of

time coherence 03 p0377 A66-12445
Transformation technique enables any aperture distribution of circular array to be electronically rotated by phasing techniques for linear array 03 p0344 A66-13018
Design parameters of phase compensated circular arrays studied for synthesis of diametric-plane directional patterns having low sidelobes 04 p0498 A66-14043
Circular array phased to produce main beam in one direction by feeding elements from set of series-connected phase shifts 04 p0500 A66-14105
Electro-optical signal processors for phased linear array antennas, discussing time and spatial delay multiplexing 05 p0648 A66-14832
Choosing number of faces of phased array antenna for hemisphere scan coverage 06 p0826 A66-16020
Linear phased array receiving system using parametric upconverter for low noise with gain 06 p0849 A66-16395
Grating lobe thinning of large active or two-way antenna system with dissimilar transmitting and receiving 06 p0849 A66-16397
Balanced mixer array with two nonlinear elements, one excited in phase and other out of phase, has no intermodulation outputs, including even-order harmonics of out of phase signal 06 p0853 A66-16673
Properties of helical delay line used to feed frequency scanned X-band array, noting role of ball bearing inserted in helix 06 p0854 A66-16686
Electronically-steerable antenna for ground terminal of satellite communications system 06 p0855 A66-16863
High power phase shifter for phased array systems, using temperature compensated garnet along with dielectric liquid cooling technique 07 p1007 A66-17507
Ground based self-phasing and nonrigid airborne arrays for aerial mapping and navigation 08 p1252 A66-19510
Microwave integrated circuits in radar systems, detailing airborne forward-looking radar, using phased arrays and pulse compression 12 p1840 A66-24620
Phase shifter for large phased array radar, operation and performance 13 p2037 A66-25548
Radiation impedance of infinite planar dipole array, phased for any angle of radiation, calculated by Fourier series expansion of field in plane 14 p2247 A66-26865
Numerical analysis of infinite phased array of open rectangular waveguides, noting use of Fredholm integral equation, effects of wall thickness and reflection coefficient 14 p2255 A66-27909
Radiation impedance of phased array of rectangular waveguides, noting coupling coefficient amplitude, phase difference, etc 14 p2256 A66-27910
Stationary phase technique synthesis of continuous linear antenna and integral equation for determining radiation pattern 14 p2259 A66-28158
Thinned lens approach in optimizing cost and performance of phased array antenna 15 p2455 A66-28568
Phase array antenna system based on 48-element subarray 15 p2455 A66-28577
Internally and externally observable mutual coupling effects and seriousness in closely spaced arrays used for electronic scanning application 15 p2456 A66-28583
Numerical analysis of infinite phased array of thick-walled rectangular waveguides 15 p2456 A66-28584
Cumulative coupling and impedance mismatch and radiation pattern problems in large uniformly spaced flat phased array 15 p2456 A66-28585
Gain, impedance and scan angle variation in polarization of phased radar antenna arrays constructed with hybrid-fed crossed dipole radiating elements 15 p2456 A66-28586
Failure effect on phased array radar systems, noting treatment of outage threshold on probabilistic ground and interdependence of system parts 16 p2652 A66-30663
Phased array antenna system for multidirectional transmission and reception of focused beams with high

gain 17 p2872 A66-31936
Design considerations for advanced digital beam steering computer through use of geometric optics 21 p3707 A66-38674
Microcircuits in ground radar, emphasizing phased array techniques and digitalization of beam steering functions 21 p3710 A66-38829
Optimal discrete binary system of electrical control of beam position of phased linear antenna array 21 p3712 A66-39251
Large, small and infinite phased array antennas and coupling 22 p3881 A66-40749
Electronically-scanned K-band passive phased array for spaceborne radiometry 22 p3882 A66-40752
Maintainability impact on redundant system design of phased array radar, presenting Monte Carlo technique for assessing availability of array portion 24 p4178 A66-42091
Phased array receiver compared with conventional system by defining effective input noise temperature, computing by two-port cascade form 24 p4187 A66-43193
PHENANTHRENE
Lattice constants of ultrapure phenanthrene to determine resistivity anomaly association with polymorphic transformation 10 p1576 A66-21553
PHENOL
S EPOXY RESIN
PHENOL FORMALDEHYDE
Combustion of solid rocket propellants, using potassium nitrate as oxidizer and phenol formaldehyde as fuel 08 p1319 A66-19201
PHENOL RESIN
Kinetic studies of high temperature carbon-silica reactions in charred silica-reinforced phenolic resins [CI PAPER WSCI-65-25] 05 p0788 A66-15149
Carbon and graphite textiles use as ablative reinforcements for high temperature phenolic resin systems 06 p0899 A66-16285
Performance assurance for phenolic resin refractory fabric materials used for insulation and ablative components in rocket propulsion hardware and reentry heat shields 06 p0899 A66-16287
Kinetics of highly endothermic carbon-silica reaction for silica-reinforced resin systems 17 p2943 A66-32453
Nuclear radiation and liquid hydrogen effect on environmental mechanical properties of phenolic asbestos, glass and linen resins 20 p3587 A66-37097
High temperature structural properties of glass fabric-reinforced polybenzimidazole, polyimide and phenolic laminates for aerospace application 23 p4083 A66-41389
Heat of pyrolysis of resin in silica-phenolic ablator determined from combustion calorimetry measurements of heats of formation 23 p4150 A66-41892
PHENOMENON
S CHORUS PHENOMENON
S GIBBS PHENOMENON
S MEDICAL PHENOMENON
S ONSAGER PHENOMENOLOGICAL COEFFICIENT
S PHYSIOLOGICAL PHENOMENON
S THERMONUCLEAR PHENOMENON
PHENYL
New synthesis of o-nigrophenylacetaldehyde 16 p2646 A66-30621
PHILOSOPHY
Necessity of fitting causality concept to new experimental techniques 21 p3769 A66-38631
PHONEME
Distinctive features and errors in short term memory for English vowels 03 p0328 A66-12816
PHONOCARDIOGRAM
Myocardiograph study of dogs leading to development of flight-rated vibrophonocardiographic system for monitoring cardiac dynamics in flight environment 17 p2924 A66-32191
PHONON
Space and time dependence of increased phonon population/amplitude of lattice vibration/ in amplifying cadmium sulfide crystal 01 p0122 A66-10575
Phonon-assisted tunneling current for model p-n junction obtaining wave function,

interband operator and matrix element 02 p0272 A66-11485
Phonon spectra in aluminum single crystals investigated by means of inelastic scattering of slow neutrons 02 p0277 A66-12083
Microwave acoustic waves generated by ferromagnetic resonance and spin-wave resonance modes in magnetic film 03 p0331 A66-12409
Microwave acoustic delay lines made practical by low-loss propagation of microwave phonons at room temperature in single crystals 03 p0331 A66-12412
Magnetoelastic interaction in thin permalloy films at X-band noting phonon excitation by spin waves, spin wave excitation by phonons and re-excitation of spin waves by phonons 04 p0561 A66-13726
Components of relaxation tensors associated with thermal and spontaneous phonon scattering in semiconductors 04 p0564 A66-14254
Theoretical anisotropic energy gap of superconducting lead when phonon density of states is principal source of gap anisotropy 05 p0741 A66-15866
Lattice thermal conductivity of GaAs and InSb calculated for 2 to 300 degrees K, considering separate contributions of longitudinal and transverse phonons 05 p0742 A66-15872
Interaction of helicons with cyclotron resonance of single particles, other helicons, phonons, optical phonons and magnetons 07 p1102 A66-18207
Displacement of absorption band edge into long wave region by phonon-caused damping 07 p1105 A66-18372
Brillouin scattering of light by phonons and phonon maser in derivation of conservation theorems from basic equations 07 p1045 A66-18397
Thermoconductivity of annealed pyrolytic graphite from 100 to 900 degrees K, using phonon mean free path characteristics 07 p1055 A66-18518
Phonon effect on temperature dependence of tunnel breakdown in silicon 08 p1277 A66-19615
Thermal conductivity and emf of gallium arsenide at low temperatures, showing phonon drag effect 08 p1278 A66-19628
Phonon series in cadmium sulfide single crystal emissions at low temperature range 10 p1583 A66-22025
Coherent excitation of optical phonons in polar semiconductors developed, using Boltzmann equations 10 p1584 A66-22071
Current saturation in CdS crystals 12 p1931 A66-24814
Stimulated Brillouin scattering in anisotropic media, showing excitation and propagation of stimulated phonons at radio frequencies 13 p2097 A66-26163
Electronic structure and Seebeck coefficient for chromium-iron alloys from 125 to 625 degrees K, emphasizing phonon drag and electron diffusion effects 14 p2310 A66-26879
Temperature variation and carrier concentration effects on density-of-states effective mass, polar and dipolar thermoconductivity, electron and phonon scattering and electron-phonon interaction in doped Si-Ge alloys 14 p2365 A66-27759
Logarithmic decrements of quartz crystal driven in torsional vibration mode at resonant frequency determined as function of temperature in liquid helium 15 p2537 A66-28869
Phonon spectrum of lead indium alloys noting distinctness of impurity band as inferred from electron tunneling measurements 16 p2768 A66-30130
Phonon series in cadmium sulfide single crystal emissions at low temperature range 16 p2776 A66-30844
Electrical conductivity of metals, explaining electron scattering amplitude changes, phonon spectrum distortion and temperature effects caused by impurity concentration in conductor 16 p2780 A66-31180
Magnitude of DC conductivity change in CdS by microwave phonons at liquid helium temperature explained with piezoelectric polaron effect 17 p2975 A66-31886
Conduction-electron plasmons interaction

with longitudinal optical phonon in Raman spectrum of gallium arsenide 17 p2975 A66-31888
Electric field effect for free carrier absorption, determining coefficient for acoustic phonon 17 p2976 A66-32264
Phonon effect on temperature dependence of tunnel breakdown in silicon 17 p2983 A66-33129
Thermal conductivity and emf of gallium arsenide at low temperatures, showing phonon drag effect 17 p2984 A66-33140
Phonon-drag thermopower variation in dilute copper alloys assuming Rayleigh law for phonon scattering 17 p2984 A66-33152
Isotope shifts for zero-phonon absorption lines associated with radiation induced color centers in lithium fluoride single crystals 18 p3154 A66-33921
Twin boundary effect on measurements of phonon momentum propagating through Ge bicrystal p-layers at liquid nitrogen temperatures 19 p3438 A66-35482
Low temperature vibronic transitions between electronic states involving destruction of photon and creation of phonon via electric dipole term of Hamiltonian 19 p3446 A66-36394
Ultrasonic attenuation in lithium fluoride from liquid helium to room temperature, finding anharmonic attenuation of slow transverse mode to vary with frequency 19 p3447 A66-36398
Optical transition in zinc telluride attributed to oxygen substituting isoelectronically for tellurium, classifying isoelectronic traps into donors and acceptors 20 p3622 A66-38250
Direct phonon relaxation between two electronic levels in ruby and effect on temperature dependent R-line breadth 20 p3623 A66-38399

PHONON BEAM

Velocity and lifetime of microwave thermal phonons in liquids and solids determined by spectrum of light scattering from laser illuminated sample 13 p2133 A66-26166
Excitation in electron beam pumped /EBP/ GaAs lasers including electron scattering, energy dissipation pattern, phonon emission, pair production, etc 13 p2099 A66-26181
Uniaxial stress effect on two-phonon lattice absorption bands of silicon 18 p3154 A66-33920
Optical phonon production, showing existence of electric field strength range at low temperature scattering in which phonon emission results in electron stoppage 20 p3577 A66-37376
Frequency tuning of coherent emission over vibronic continuum of phonon-terminated optical masers by thermal tuning and wavelength-selective feedback 23 p4077 A66-41369

PHOSPHATE

SA ADENOSINE MONOPHOSPHATE
SA ADENOSINE TRIPHOSPHATE /ATP/
SA AMMONIUM PHOSPHATE
SA POTASSIUM PHOSPHATE
Ferrous /manganous/ orthophosphates, sarcoside and grafted found in four iron and pallasite meteorites 16 p2803 A66-31221
Solar UV synthesis of nucleoside phosphates from terrestrial atmosphere, discussing irradiation of adenine-ribose-phosphoric acid solution 17 p2851 A66-32090
Nucleosides and polynucleotides synthesis from sugars and heterocyclic bases by metaphosphate esters 17 p2852 A66-32095
Occurrence of adenosine monophosphate inhibition of carbon dioxide fixation photosynthetic and chemosynthetic autotrophs 18 p3056 A66-33697
Phosphate glass effect on frequency behavior of n-inversion layers on silicon MOS diodes 20 p3529 A66-37545

PHOSPHIDE

SA GALLIUM PHOSPHIDE
SA INDIUM PHOSPHIDE
Donor impurity effect on direct-indirect transition in gallium arsenic phosphide, particularly at low temperature 13 p2170 A66-26590

PHOSPHINE

Lithium cleavage of unsaturated vicinal di-tert-phosphines producing lithium diphenylphosphide 24 p4170 A66-42889

PHOSPHOR

Optical laser pumps, high power CW laser operation by cathodoluminescence and suitable selection of phosphors 08 p1234 A66-19546

PHOSPHORESCENCE

SA AFTERGLOW
Excitation of phosphorus suspension in electroluminescent panel by steel ball impact 06 p0928 A66-16887
Excited ruby crystal phosphorescence noting spectral range, duration, electron excitation mechanism and upper wavelength limit 08 p1234 A66-19667
Excited ruby crystal phosphorescence noting spectral range, duration, electron excitation mechanism and upper wavelength limit 10 p1543 A66-21834
Spin axis orientation of spherical free gyroscope determined by using phosphorescent coating on rotor 10 p1536 A66-21861
Sensitized and unsensitized phosphorescence and energy transfer properties of series of aliphatic alpha diketones in fluid solution 12 p1916 A66-23620
Ruby phosphorescence under intense optical excitation, inferring possible recombination characteristics from initial brightness decay 15 p2558 A66-28607
Triplet states of liquid benzene and toluene studied, using blacetyl phosphorescence sensitization 23 p4032 A66-42077

PHOSPHORIC ACID

Electrical conductivity of concentrated phosphoric acid from 25-60 degrees C 17 p2870 A66-32042
Thermal polycondensation of free amino acids with polyphosphoric acid 17 p2852 A66-32094
Thermal condensation of cytidylic acid from mononucleotides in presence of polyphosphoric acid 17 p2852 A66-32096

PHOSPHORUS

Phosphorus diffusion production of p-type silicon for solar batteries 01 p0016 A66-11036
Electron mobility of gallium arsenide-phosphorus alloys 06 p0923 A66-16380
Phosphorus diffusion into silicon film and resultant defect structures 06 p0928 A66-16762
Diffusion distribution of phosphorus in silicon at low surface concentration 06 p0928 A66-16893
Potential correction effect on ground states of P and ionic-S impurities in silicon discussed in terms of cavity model 06 p0930 A66-17051
Fluorescent K-absorption and emission spectra of phosphorus in III-V semiconductor compounds 09 p1426 A66-20192
Phosphorus interacting with boron and conductivity measurements at 600 degrees C observed on phosphorus stabilized silicon dioxide films 12 p1932 A66-24826
Scintillators stable at 110 degrees C from styrene/divinyl benzene copolymers and additions of phosphors, establishing optimum thermal conditions for block polymerization and determining luminescence yield 13 p2077 A66-25326
Precipitation effects in phosphorus-diffused silicon after gold diffusion, using transmission X-ray diffraction microscopy 15 p2561 A66-28700
Phosphorus I lines identified in lambda greater than 2935 region of solar spectrum with aid of tables of Fraunhofer lines 17 p2999 A66-32287
Gold distribution and precipitation in phosphorus-diffused silicon wafers 17 p2980 A66-32649
Temperature dependence of absorption bands by localized vibration modes associated with substitutional impurities in phosphorus-doped gallium arsenide 20 p3622 A66-38249
Phosphorus 32 and 33 produced by interactions of secondary neutrons from cosmic rays with argon in atmosphere determined radiochemically from rainwater samples 23 p4124 A66-41845
Diffusion of phosphorus into silicon, using doped silicon oxide skin sources produced by anodic oxidation 24 p4255 A66-42504

PHOSPHORUS COMPOUND

Nuclear magnetic resonance of phosphorus compounds, discussing signs of spin-spin couplings in dimethylphosphine and methylphosphine 18 p3153 A66-33831
Luminescent surfaces and structures for information display, discussing cathode ray tube, image intensifier for night vision, spectral emission, etc 19 p3312 A66-35338
Semiconducting properties of cadmium tetraphosphide 24 p4253 A66-42361

PHOSPHORUS OXIDE

Controlled phosphorus diffusion into silicon from phosphorus pentoxide vapor using red phosphorus as source, noting relations of resistivity-surface concentration to pressure temperature 02 p0275 A66-11872
Nondestructive detection technique of phosphosilicate layer on semiconductor wafers, using IR spectrophotometer 24 p4181 A66-42390

PHOTIC STIMULATION

Changes in shock-evoked response complex /SERC/ recorded from visual cortexes of cats after retinal illumination, noting enhancement of waveform after photic stimulation and role of barbiturate anesthetization 13 p2012 A66-26581
Visual effects produced by factors of so-called glare from stationary and moving targets 16 p2641 A66-31388
Chorioretinal lesion produced by pulsed ruby laser beam and complex changes in retinal excitability in cats 16 p2641 A66-31761
EEG experiments on men exposed to intermittent photic stimulation under simulated IFR conditions produced drowsiness as primary response 17 p2864 A66-32165

PHOTOCATHODE

SA PHOTOTUBE
Total reflection technique to achieve effective high absolute photocathode sensitivity 01 p0078 A66-10857
Anode-current spectrum of photomultiplier illuminated by light of time-varying intensity and derivation of moments of photoelectron counts 07 p1047 A66-18432
Laser ranging via digital counter coupled photomultiplier tube, noting spectral response, gain transit time dependence, output coupling and effective cathode diameter 12 p1830 A66-23759
Cs-Sb film thickness measurement method in various compositions and relation between thickness and composition 24 p4251 A66-42301

PHOTOCHEMICAL REACTION

Stationary distribution of ozone density with height in presence of long waves in atmosphere, solving continuity equation for ozone and considering photochemical processes 01 p0062 A66-10752
Superhigh speed IR spectrometers used in detection and study of free radicals and photochemical reaction, pulse discharges in gases, etc 05 p0685 A66-15862
Upper atmospheric parameters that control daytime electron density distributions in F-1 region determined with use of N/h/ profiles 09 p1372 A66-20369
Reconciling observed ozone distribution in atmosphere with that of photochemical theory, using accepted rate constants 10 p1531 A66-21278
Chemical and photochemical reactions controlling ion composition of atmosphere between 150 and 300 km 11 p1699 A66-23041
Ozone photochemistry in atmosphere containing hydrogen, calculating equilibrium vertical distribution, rate of formation of hydroxyl, diurnal variation, etc 11 p1700 A66-23138
Photosensitivity of semiconductor thin films deposited on metallic substrates in vacuum, noting photochemical transformation and photodecomposition of substance 12 p1930 A66-24458
Interaction mechanism between internal gravity waves and radiative photochemical processes, noting solar radiation absorption, heat of atomic oxygen recombination, etc 13 p2073 A66-26129
Solid state reduction of lanthanide ions in laser hosts, effect of presence of recombination hole-centers in photoreduced samples and elimination during electrochemical process 14 p2362 A66-27464

- Stationary distribution of ozone density with height in presence of long waves in atmosphere, solving continuity equation for ozone and considering photochemical processes 14 p2285 A66-27851
- Photochemical decomposition of carbon suboxide and spectroscopic observation of carbon atom reactions with nitrogen, hydrogen and deuterium at 4.2 degrees K 14 p2233 A66-27975
- Conversion of 2-formyl dienone III into dienone IV upon irradiation in acetic acid followed by base-catalyzed deformylation of crude photoproduct 15 p2446 A66-28873
- Oxygen photochemical equilibrium above 150 km, assuming dominant role of radiative recombination above 120 km 15 p2486 A66-29089
- Effect of radiative and photochemical processes on stability of two level baroclinic flow, noting low and high shear instability, wavelength, phase speed, etc 16 p2700 A66-31644
- Focused laser coherent radiation-induced degradation of solid methylene and gas chromatographic analysis of reaction products 17 p2933 A66-31870
- Photosensitivity of semiconductor thin films deposited on metallic substrates in vacuum, noting photochemical transformation and photodecomposition of substance 20 p3620 A66-37690
- Upper atmospheric parameters that control daytime electron density distributions in F-1 region determined with use of N/h/ profiles 20 p3636 A66-38235
- 2-carboxy-3-keto-9-methyl hexahydronaphthalene converted in high yield into 5/7 fused products on irradiation in aqueous and nonaqueous media 24 p4171 A66-43101
- Oxalate determination in two methods based on photochemical decomposition of ferric oxalate complexes in aqueous acidic solution 24 p4171 A66-43166
- PHOTOCHEMISTRY**
- Mesospheres radiative and photochemical response to fluctuations in UV and visible radiation 02 p0222 A66-11821
- Photochemical studies of oxygen-ozone and carbon dioxide equilibria with bromine UV lamp 04 p0473 A66-13397
- Electrochemical current generator principles based on oxyhydrogen fuel cell for space travel, stressing regeneration by using solar radiation in photochemistry 04 p0459 A66-13545
- Photochemistry of vision including spectrophotometric analysis of rhodopsin optical density, absorbance and quantum efficiency 04 p0461 A66-13789
- Hydroquinone and oxygen effects on photovoltaic characteristics of optically excited chlorophyll 06 p0812 A66-16357
- Sensitized and unsensitized phosphorescence and energy transfer properties of series of aliphatic alpha diketones in fluid solution 12 p1916 A66-23620
- Book on photochemical origin of life 16 p2641 A66-31745
- Conversion of 2-carboxy-3-keto-9-methyl-unsaturated hexahydronaphthalene into 5/7-fused products on irradiation in aqueous and nonaqueous media, observing photochemical rearrangements 24 p4170 A66-42314
- PHOTOCONDUCTIVE CELL**
- Thermoelectric cooling of IR detectors, examining thermistor bolometers and photoconductive detectors 08 p1221 A66-18683
- Relaxation of photoresponse of photocells, using lateral photoeffect 09 p1358 A66-20815
- Solar VIII observation of May 20, 1966 solar eclipse penumbral zone in X-ray and UV bands 21 p3810 A66-38468
- PHOTOCONDUCTIVITY**
- Tetracene and anthracene organic semiconductor photoconductivity increase effect in weak magnetic field 01 p0118 A66-10264
- Light effect on surface conductivity of gold-alloyed germanium with clean surface 01 p0125 A66-10776
- Nonlinear electrical effects and recombination of hot electrons in compensated germanium, studying steady and transient I-V characteristics 02 p0273 A66-11717
- Spectral distribution of carrier lifetime obtained from photomagnetolectric effect and photoconductivity 02 p0273 A66-11719
- Spectral responses of photoconductivity in plastically deformed germanium at liquid nitrogen temperature 02 p0274 A66-11720
- Capture and recombination levels in CdS single crystals examined from photoconductivity analysis 02 p0277 A66-12087
- Electron distribution function in semiconductors discussing steady state illumination effects, energy and spectral characteristics and photoconductivity oscillations at low temperatures 03 p0410 A66-12938
- Tetracene and anthracene organic semiconductor photoconductivity increase effect in weak magnetic field 03 p0413 A66-13309
- Photoconductivity and spectral distribution of impurity radiative recombination in n-type silicon containing indium or boron 04 p0565 A66-14264
- Electric field effect on long wave edge of extrinsic photoconductivity in zinc and mercury doped germanium 04 p0565 A66-14266
- Surface photoeffect from highly alloyed semiconductor accounting for Coulomb electron interaction 04 p0567 A66-14344
- Transmission of hole-type germanium in strong electric fields, noting spectral dependences of radiation modulation and hole absorption cross section 04 p0568 A66-14352
- Impurity concentration on semiconductor surface observing photoconductivity of silicon in IR region of spectrum 04 p0569 A66-14356
- Electric oscillation by monochromatic light in high resistivity gallium arsenide, noting temperature dependence 04 p0569 A66-14361
- Electron collision-ionization avalanches in cadmium sulfide crystal due to electric field intensities 04 p0570 A66-14489
- Quenching and enhancement of dark conductivity in high resistivity photosensitive single crystals of cadmium sulfide 05 p0732 A66-14663
- Light induced pulse oscillation in metal-silicon contact with p-n junction 05 p0736 A66-14970
- Irradiation of very pure silicon with intentionally introduced residual impurities, obtaining photoconductivity measurements 06 p0934 A66-17123
- Gamma irradiated germanium at zero degrees C, studying annealing of recombination center, obtaining life times from transient decay of photoconductivity 06 p0934 A66-17126
- Radiative recombination emission and photoconduction in lead sulphide, emphasizing chemical deposition or vacuum evaporated layers 07 p1094 A66-17311
- Photoconductivity kinetics in thin n-type impurity semiconductor layers with surface capture and recombination levels 07 p1099 A66-17872
- Time dependent fluctuations in photoconductivity of Cu doped low ohmic n-type gallium arsenide exposed to IR radiation 07 p1099 A66-17876
- Oscillations in impurity photoconductivity and absorption spectra of p-germanium samples 08 p1269 A66-18973
- Rise and decay of photoconductivity of cadmium sulfide single crystals with superlinear photocurrent illumination characteristics 08 p1272 A66-19248
- Postdeposition vacuum heat treatments of cadmium sulfide films, examining effect on photocurrent and photocurrent to dark current ratio 08 p1273 A66-19258
- Minority-carrier lifetimes from two-probe measurements of photoconductivity of semiconductor films 08 p1274 A66-19318
- Change in photoconductivity and photoelectromagnetic effect of gallium arsenide single crystals caused by constant illumination of spectral compositions 09 p1412 A66-19997
- Impurity-photoconductivity spectra of silicon single crystals containing lithium and arsenic impurities 09 p1413 A66-19999
- Photoconductivity and p-n photoeffect in SiC single crystals excited by X-rays 09 p1425 A66-20188
- CdS-type superlinear photoconductivity due to excitation from localized levels 09 p1426 A66-20195
- Spectral dependence of photovoltaic effect CdS-CdSe heterojunction 09 p1427 A66-20482
- Stationary IR quenching of photocurrent in CdS, discussing recombination channels 09 p1428 A66-20538
- Optical signal reception, considering use of HF subcarrier superimposed on light signal and bias-sensitive crystal detector for mixing process between subcarrier and local oscillator, deriving signal to noise ratios 09 p1346 A66-20567
- Contact barriers on insulating semiconductor cadmium sulfide measurements, based on pulsed light and bridge 10 p1573 A66-21245
- Numbers theory for lead sulfide photoconducting films, noting balancing of n and p-type impurities, various activation energies, etc 10 p1578 A66-21574
- Photoconduction model for illuminated lead sulfide films with shunt path increase during barrier modulation 10 p1578 A66-21575
- Electrical and optical experiments performed on single crystals of beta-rhombohedral boron, noting resistivity decrease and differences between thermal and optical band gap 10 p1579 A66-21722
- Electric and photoconductivity of vacuum sintered and zone refined semiconductor boron 10 p1579 A66-21722
- Bipolar excitation of photoconductivity in silicon due to structural disarrangement caused by IR radiation 10 p1583 A66-22019
- N-type germanium alloyed with gold shows negative photoconductivity in strong electric fields 10 p1589 A66-22173
- Light effect on surface conductivity of gold-alloyed germanium with clean surface 11 p1749 A66-22288
- Cobalt doping effects on energy level and negative photoconductivity in n-type silicon 12 p1926 A66-23720
- Electric conductivity and spectral distribution of impurity photoconductivity of n-and p-silicon bombarded by fast neutrons, noting role of annealing 12 p1929 A66-24450
- Photoconductivity and optical transmission of cadmium-indium-telluride, noting temperature dependence 13 p2165 A66-25685
- Surface photoconductivity dependence on thermal and spectral state and time lag of germanium 14 p2357 A66-27073
- Plastic deformation effect on carrier capture in silicon 14 p2358 A66-27090
- Design, performance and application of multicell luminous-symbol screen with optically coupled photosemiconductive and electroluminescent films 14 p2297 A66-28112
- Surface photoeffect from highly alloyed semiconductor accounting for Coulomb electron interaction 14 p2367 A66-28239
- Transmission of hole-type germanium in strong electric fields, noting spectral dependences of radiation modulation and hole absorption cross section 14 p2368 A66-28250
- Impurity concentration on semiconductor surface, observing photoconductivity of silicon in IR region of spectrum 14 p2368 A66-28254
- Electric oscillation by monochromatic light in high resistivity gallium arsenide, noting temperature dependence 14 p2369 A66-28259
- Transient and steady state photoconductivity in plastically bent germanium, noting logarithmic decay of photocurrent and logarithmic lux-ampere characteristics 15 p2558 A66-28608
- High amplitude LF current and optical transmission oscillations in CdS single crystals under high electric field and monochromatic illumination near fundamental absorption edge 15 p2558 A66-28613
- Device for measurement of photocurrent noise spectra in semiconductors at 1 cps to 5 kc 16 p2664 A66-31361
- Kinetics of semiconductor characteristics determined from impurity photoconductivity, using circuit measuring effective cross section of current carrier capture in impurity centers 16 p2709 A66-31667
- Infrared and thermal suppression of

photoconductivity in mercury sulfide crystals with copper and silver impurities 16 p2786 A66-31729

Gamma radiation and fast neutron effects on dark resistance, photoconductivity, majority carrier mobility, recombination kinetics, etc., in CdS single crystal 16 p2787 A66-31765

Photo-Hall effect and photoconductivity on compensated p-InSb at low temperatures, examining temperature dependence of carrier mobility 16 p2788 A66-31773

Surface IR photoconductivity spectra of chemically etched p and n silicon, noting energy distribution, activation energies of centers, etc. 16 p2788 A66-31774

Photoconductivity spectra and kinetics of p-and n-type germanium crystals bombarded by fast electrons at 5.2 and 100 degrees K 16 p2788 A66-31776

Photo emf variation with radiation power of Q-switch ruby laser incident on silicon crystal with p-n junction 17 p2978 A66-32509

Negative photoconductivity in germanium at temperature and doping levels important with impurity conduction 17 p2985 A66-33293

High resistivity silicon single crystals, discussing carrier lifetime, photoconductivity and recombination levels 17 p2987 A66-33312

Negative photoconductivity in germanium, noting breakdown and negative conductivity in In region, volt-ampere characteristics, etc. 17 p2987 A66-33315

Photocurrent and leakage current in zinc diffused GaAs junction diodes in terms of channel effect 17 p2987 A66-33319

Photoconductivity induced in uncolored sodium chloride and aluminum oxide single crystals by radiation from ruby laser 18 p3154 A66-33939

Ruby photoconductivity when exposed to laser irradiation, noting oscillograms 18 p3154 A66-33941

Photoconductivity of thin layers of CdS, noting intrinsic maximum for various dopants, temperature effect, activation energy, etc. 18 p3157 A66-34628

Free current carrier formation in molecular crystal, examining dependence of photoconductivity on magnetic field intensity 18 p3158 A66-34683

Semiconductor photoconductivity dependence on external radiation frequency, examining electron-phonon interaction 18 p3158 A66-34689

Excess carriers lifetime in semiconductors nonstatic measurement by photoconductive phase shift of spreading resistance under point contact 19 p3433 A66-35330

Transient behavior of current to applied voltage step for semiconductor structure with double injection behavior in initial and final states 19 p3435 A66-35406

Evaporated and recrystallized CdS layers, discussing electron mobility, level distribution, capture cross section and techniques of measurement 19 p3435 A66-35408

Spatial distribution of acoustoelectric field in photoconductive CdS measurement under conditions of current saturation, determining carrier drift mobility 19 p3435 A66-35415

Concentration and lifetime of minority carriers in cadmium sulfide determined by method based on optically induced changes in concentration 19 p3437 A66-35477

Layer of CdS crystals photoconduction measurements suggesting change in space charge under illumination due to increase of free electron concentration in volume 19 p3438 A66-35478

N-type germanium alloyed with gold shows negative photoconductivity in strong electric fields 19 p3441 A66-35787

Absorption, radiative recombination and photoconductivity of CdSe 19 p3444 A66-36035

Photoconductivity of semiconductor under strong illumination, considering monomolecular recombination by Shockley-Read centers 19 p3447 A66-36456

Electric conductivity and spectral distribution of impurity photoconductivity of n-and p-silicon bombarded by fast neutrons, noting role of annealing 20 p3619 A66-37682

Fast-neutron irradiation effects on photoconductivity spectra and induced crystal structure defects for n-and p-type

gallium arsenide single crystals 20 p3624 A66-38415

Heat treatment of silicon at high temperatures leads to donor centers affecting electric and photoelectric properties 21 p3802 A66-39157

Photoconductive and luminescent behavior of undoped cadmium sulfide single crystals at room temperature under laser excitation 21 p3748 A66-39165

Surface photoconductivity dependence on thermal and spectral state and time lag of germanium 22 p3966 A66-40831

Plastic deformation effect on carrier capture in silicon 22 p3967 A66-40846

Photoconductivity in homogeneous semiconductors when solution of second-order nonlinear differential equations with indivisible variables is obtained in elementary functions, noting light intensity effect 23 p4113 A66-41564

Generation-recombination noise and lifetime measured using photoconductive decay in n-and p-type Ge samples doped with shallow impurities 24 p4253 A66-42357

Impurity photoconductivity spectra of p-type germanium at low temperatures, noting parameters of relative depth of equidistant minima oscillations 24 p4256 A66-42515

PHOTOCONDUCTOR

Stationary and kinetic methods determining parameters of sensitizing recombination r-center in high resistivity monolayer photoconductors 02 p0273 A66-11718

Recombination parameters in CdS determined from kinetics and IR quenching of photocurrent relative to available illumination 04 p0564 A66-14257

Photoimpedance measurement as function of AC field of CdS crystals coated with SiO films or situated between polystyrene foils 09 p1425 A66-20189

Minority carrier lifetime in monolayer photoconductors determined by frequency dependence of time 10 p1587 A66-22149

CdO films as transparent ohmic contacts with CdS /single crystal and film type/ photoconductor 12 p1927 A66-23771

X-ray radiation effect on electrical conductivity of liquid organic semiconductors obtained on diethyl ether base with halogen derivatives of benzene, methane, etc. 13 p2160 A66-25096

Image converter tube for middle IR, noting sensitivity dependence on photoconductor properties 14 p2331 A66-27100

Minority carrier lifetime in monolayer photoconductors determined by frequency dependence of time 19 p3440 A66-35763

PHOTODECOMPOSITION

Temperature and oxygen effect on aromatic solute sensitized photo-decomposition of ethanol and ether glasses 06 p0821 A66-16125

Photosensitivity of semiconductor thin films deposited on metallic substrates in vacuum, noting photochemical transformation and photodecomposition of substance 12 p1930 A66-24458

Primary processes in ozone photolysis, determining quantum yields of photodecomposition for various wavelengths and concentrations 13 p2016 A66-25369

Photochemical decomposition of carbon suboxide and spectroscopic observation of carbon atom reactions with nitrogen, hydrogen and deuterium at 4.2 degrees K 14 p2233 A66-27975

Photosensitivity of semiconductor thin films deposited on metallic substrates in vacuum, noting photochemical transformation and photodecomposition of substance 20 p3620 A66-37690

PHOTODETACHMENT

SA PLANE WAVE Electric fields in hydrogen plasma leading to forbidden free-bound transitions, considering photodetachment of electrons and radiative capture cross sections 13 p2135 A66-26265

PHOTODETECTOR

National Bureau of Standards photoelectric and thermoelectric instrumentation for use in measurement of spectral irradiances of solar simulator 02 p0226 A66-11223

Solid state camera system consisting of monolithic phototransistor mosaic sensor and

molecular digital readout system 06 p0678 A66-15975

IR detectors based on photon-electronic interaction and sensor thermal changes 06 p0880 A66-16559

Planckian black body approximation used to simulate and assign star magnitudes for nonhuman photodetector, considering relationship between star brightness and stellar spectra 07 p1003 A66-18332

Bore-sighted star tracker using image dissector tube as photodetector and incorporating continuous strip electron multiplier 08 p1252 A66-19499

Balanced mixer for heterodyning light of two different frequencies from independent sources to obtain intermediate frequency in microwave region 12 p1890 A66-24143

Unitarity conditions for photon echo detectors of coherent radiation 13 p2128 A66-26219

UV photography and spectroscopy using spectrally selective image converter and photodetection 14 p2293 A66-27330

Light deflection technique for transient shock wave detection by phototube activation wave based on Snell law 19 p3357 A66-35811

Book on laser receivers covering noise performance, atmospheric effects, detection techniques, hardware and systems available, optical communication in visible and IR spectrum, etc. 19 p3375 A66-36060

Electroluminescent photodiodes and diode light detectors applied to microcircuit design as relays, photochoppers or multichannel couplers 19 p3320 A66-36287

Detectability of coronal IR lines due to Mg, Al and Si ions with practicable IR spectrometers and photoconductive detectors, considering atmospheric attenuation 20 p3649 A66-37333

Photodetectors capable of microwave modulation frequency response operating in visible or near IR portion of optical spectrum 24 p4212 A66-42808

PHOTODIODE

Electrical and electroluminescent properties of gallium arsenide diodes with high resistivity region flanked by low resistivity R and N regions 01 p0043 A66-10896

Frequency characteristics of single coordinate inversion photodiode in presence of low signal level, using equivalent circuit 04 p0499 A66-14056

Photovoltaic effect and principles upon which operation of photodiodes are based, including analysis of photovoltaic circuits to determine operating parameters 04 p0524 A66-14456

High pressure high current argon discharge covering statistical variations of nonblack body, photon and IR radiation and measurement with InSb photodiode 05 p0720 A66-14507

Recombination emission process in direct semiconductor devices for realization of high speed nondestructive readout from tunnel diodes without direct measurement or perturbation 05 p0647 A66-14828

Radiation damage and annealing of gallium arsenide laser diode 05 p0696 A66-14979

Recording sampling system for measuring energy incident on biological system exposed to laser beam 07 p1030 A66-17293

Photo emf effect calculated at p-n junction of crystal photodiode 08 p1288 A66-18696

Photoelectric behavior of n-type Ga-As wafers having shallow zinc diffused surface layers 08 p1269 A66-18869

Gallium arsenide luminescent diodes with triangular resonator producing coherent emission at high density current 08 p1193 A66-19195

Sensitivity measure for optical and IR detectors clarified by analysis of noise equivalent power for photodiode 09 p1351 A66-19940

Design and operation of contactless photopotentiometer 09 p1382 A66-20819

Time parameters of powerful laser measured with GaAs photodiode, noting time constant and time resolution of photodiode 14 p2309 A66-27750

LF noise measurements in silicon avalanche photodiodes in 10 kc-10 mc range 15 p2459 A66-28898

Photodiode operation mode and steady-state response of diffused p-n junction type Si radiation detectors to
X-rays 17 p2975 A66-31883
Low noise photodiodes with avalanche multiplication for high sensitivity, noting capability for low intensity wideband signal detection, performance in IR region, etc 17 p2880 A66-31934
Frequency characteristics of single coordinate inversion photodiode in presence of low signal level, using equivalent circuit 17 p2885 A66-32222
Transient response of three phototransistor devices of planar type, obtaining equivalent circuits 18 p3087 A66-34704
Electroluminescent photodiodes and diode light detectors applied to microcircuit design as relays, photochoppers or multichannel couplers 19 p3320 A66-36267
Applications for ferroelectric cold conductors and GaAs light-sensitive diodes, examining supersonic amplification in CdS 21 p3716 A66-39620

PHOTODISSOCIATION

Physics of lower thermosphere studied by using conditions applying to oxygen atmosphere and oxygen-nitrogen atmosphere 05 p0671 A66-15018
Solar radiation attenuation in UV region provides data on production of atomic oxygen by photodissociation of oxygen and ion and electron formation by photoionization of nitrogen and oxygen 05 p0748 A66-15022
Gas laser output and threshold in population inversion from photodissociation of methyl iodide and fluoro iodo methylidyne 06 p0892 A66-16771
Nuclear reaction and beta decay rates for silicon 28, considering conditions for nuclear statistical equilibrium in stars 12 p1917 A66-24117
Limitation on oxygen concentration in possible primitive atmospheres examined via physical and photochemical factors 13 p2186 A66-26122
Diffusion and dissociation of CO molecules in solar atmosphere 15 p2596 A66-29139
Fluorescence of NO during photodissociation of nitrous oxide due to vacuum UV radiation 15 p2542 A66-29351
Gas laser output and threshold in population inversion from photodissociation of methyl iodide and fluorolodo methylidyne 19 p3372 A66-35368
Fluorescence of NO during photodissociation of nitrous oxide due to vacuum UV radiation 20 p3602 A66-37356
Photodissociation laser system, discussing output energy dependence on pressure, temperature and number of successive optical pumping flashes 20 p3579 A66-37781

PHOTOELASTIC MATERIAL

Photoelastic experiment by birefringent coating method to determine stress analysis applicable for any elastic body 02 p0298 A66-11583
Stroboscopic arrangement for photoelastic investigation on longitudinal stressed beams 05 p0773 A66-14990
Polarization and birefringence of photoelastoplastic medium 11 p1781 A66-22613
Stress analysis of cylindrical shell with reinforced and nonreinforced circular, square and rectangular cuts under tensile and torsional loads, using photoelastic coatings 15 p2607 A66-28765
Modulation by ultrasonic diffraction of 10.6 micron laser radiation in photoelastic CdS, GaAs and Si crystals 21 p3747 A66-39112

PHOTOELASTIC STRESS MEASUREMENT

Measuring phase difference in photoelastic coatings with reflected light effect eliminated by doubly refracting plate 01 p0067 A66-10318
Normal incidence reflective polariscope and auxiliary instrumentation used in viscoelastic strain measurements 01 p0070 A66-10922
Axisymmetrical stressed state of three-dimensional models exposed to transmitted light determined from photoelasticity by polarized method 01 p0158 A66-10986
Prebuckling deformation and stress-strain distributions in clamped thin cylindrical shell subjected to axial load, determining

effect of boundary supports 02 p0297 A66-11557
Photoelastic investigation of stresses in cemented joints, particularly scarf and butt bonding 02 p0298 A66-11582
Photoelastic analysis and theoretical considerations to minimize stress concentration of blade joints of compressor and turbine of jet engine 03 p0373 A66-12402
Stress concentration effects in notched and perforated samples determined, using photoelastic method 03 p0439 A66-13164
Stroboscopic arrangement for photoelastic investigation on longitudinal stressed beams 05 p0773 A66-14990
Theory of errors when principal stresses are separated in photoelasticity for higher accuracy 05 p0775 A66-15301
Validity of three-dimensional photoelastic analysis of composite models of dissimilar materials in nonhomogeneous elastic field problems 08 p1310 A66-19225
Photoelastic measurement of dynamic stresses and loading of structures, examining impact stress phenomena, stress waves, vibrations, stress distribution, etc 08 p1316 A66-19805
Dynamic photoelasticity, polariscope and associated instrumentation for transient stress and strain in structures under shock loading 10 p1537 A66-21873
Photoelastic solution of distribution of stresses around centrally located elliptical hole in plate of finite width subjected to uniform axial loading 12 p1962 A66-23991
Photoelastic investigation of stress concentrations near circular hole in hyperbolic shell under axial compression 13 p2201 A66-26409
Three-dimensional photoelasticity calculation of stresses in spheres with concentric spherical cavities under diametral compression 14 p2401 A66-27769
Interferometric method for determining stress distributions in semiinfinite plate due to loaded pin 14 p2401 A66-27771
Elastic stress-strain distribution by photoelastic method for case-bonded grains of solid propellant rocket, noting effect of propellant cavity geometry [AIAA PAPER 65-190] 14 p2402 A66-27871
Immersion technique using Mach-Zehnder interferometer for obtaining sum and difference of major stresses in plane stress distribution 15 p2611 A66-29416
Dynamic photoelasticity measurements of stress concentration, using ruby laser monochromatic light source 18 p3256 A66-34557
Structural-model analysis of photoviscoelasticity and photoviscoelastic materials as rheological problem of mechanical and optical creep, relaxation and related phenomena 18 p3257 A66-34562
Minimization technique for light scatter due to diffuse mirrored birefringent coatings used in performing photoelastic studies by fringe multiplication 18 p3257 A66-34563
Elastic and elastoplastic distribution of stresses and strains around 45 degree V notch, with circular base determined by photoelastic and moire techniques 20 p3667 A66-37483
Photoelastic measurement of elastic strain fields in semiconductors 20 p3668 A66-37497
Ultrahigh-speed photographic recording of dynamic stress-optic patterns in high photoelastic modulus materials 20 p3670 A66-37741
Transient stress measurements in high modulus photoelastic materials with ultrahigh speed photography, noting usefulness of oblique incidence method, values of stress optic coefficient, Youngs modulus, etc 22 p3991 A66-40196
Optical dispersion and dispersion of birefringence, noting photoelastic methods and stress-strain optical coefficients 22 p3994 A66-40437
Photoelastic analysis of stress and strain distributions of case-bonded propellant grains, calculating internal pressure and dependence on mechanical properties of grain material 23 p4120 A66-41440
Photoelastic determination of stress concentration factor for flat strips notched on both sides under

tension 23 p4140 A66-41852
Photoelastic stress-concentration measurements in variously-reinforced circularly shaped cut-outs under uniaxial tension, three-dimensional effects and validity of neglecting bending stiffness 23 p4141 A66-41949
Stress separation in photoelasticity, using series solution of Laplace equation and least squares method 24 p4292 A66-42862
Birefringence recording device for measurements within very short wavelengths, describing photoelastic applications for identifying degrees of annealing and homogeneity of glass 24 p4292 A66-42965

PHOTOELASTICITY

Introductory book on photoelasticity in stress analysis and application 01 p0151 A66-10183
Blade root for split disk experimental multistage air turbine, citing two-dimensional photoelastic analysis and pull-out test 08 p1281 A66-18629
Deformation of photoelastic coatings on thin shells 08 p1307 A66-18882
Deformation components of photoelastic coatings of shells affected by errors due to rotation of direction of principal deformations 08 p1307 A66-18883
Properties of continuum determined experimentally, noting deformed shapes, displacement, strains, stresses, etc, taking advantage of grid, moire, photoelasticity and other methods 12 p1957 A66-23628
Stress concentration in T tails of turbine blades by photoelasticity and photocreep 12 p1966 A66-24064
Book on stress-strain analysis including photoelastic investigations of bending impact on cantilever beam 13 p2198 A66-26298
Elastic rectangular plate moment influence field calculated, using photoelastic method 13 p2198 A66-26299
Photoelastic intensity variations in glass beam following impact of steel ball, registering values 13 p2198 A66-26300
Optical beam scattering of gas laser for measurement of photoelastic constants and application to lithium niobate 15 p2512 A66-28692
Laser for photoelasticity including scattered-light method, conventional transmission polariscope with static loads and dynamic photoelasticity 17 p3022 A66-32072
Common representation of electromagnetic field tensor and stress tensor 19 p3474 A66-36319
Photoelastic Wertheim law in general tensor coordinate system derived for linearly anisotropic or isotropic homogeneous matter 19 p3474 A66-36320
Continuous wave gas laser as light source in scattered light static photoelasticity 20 p3577 A66-37443
Three-dimensional and axisymmetric problem in elasticity theory with particular reference to photoelasticity 23 p4135 A66-40989
Stress-strain determination in elastoplastic problems with aid of photoelastic epoxy resin coating 23 p4135 A66-40990
Autocorrelation as pulse compression system, giving effective time resolution as inverse of correlation bandwidth and compression ratio of time resolution to signal duration 23 p4034 A66-41022
Acousto-optical deflection and modulation devices, considering specific geometries and scattering-efficiency-bandwidth products 24 p4174 A66-42812
Direct determination of oblique incidence coefficients in birefringent coatings and models, eliminating error sources 24 p4292 A66-42863

PHOTOELECTRIC APPARATUS

Portable photoelectric instrument for determining oxygen admixture in hydrogen, nitrogen and inert gases with low sensitivity 02 p0231 A66-11999
Correlation of phase fluctuations of optical field by photoelectric predetection interferometer 03 p0367 A66-12304
MINEAC /new miniature electronic autocollimator/ and PEAC /photoelectric autocollimator/ 04 p0520 A66-13899

Longitudinal photoelements examined for guidance and homing 04 p0524 A66-14398

Photocapacitative effect for determining degree of anisotropy of zinc sulfide with stacking faults 04 p0571 A66-14498

IR detector types and component structure noting bolometer, thermistor, thermocouple and semiconductor photoelectric type 05 p0676 A66-14679

Electron-optical converters in astronomy 05 p0681 A66-15212

Practical electro-optical devices which give electrical signal in response to incident light 06 p0852 A66-16558

Photoelectric performance of solar cells tested by optical techniques and equipment 08 p1167 A66-18613

Photoelectric focus and seeing monitor for solar telescopes, noting atmospheric blurring 09 p1382 A66-20513

High sensitivity fast-response laser detection system, describing microwave response photoelectric detector with amplification and mixing functions 10 p1544 A66-22046

Optical techniques for satellite tracking and star identification, describing ASTRO II theodolite with photoelectric data recording 12 p1883 A66-24933

Temperature effect on UV absorption continuum of oxygen, using photoelectric techniques, obtaining absolute absorption cross sections 16 p2695 A66-30711

Photoelectric Rotating Slit Elevation and Azimuth Sensor design, operation and performance 17 p2925 A66-32614

Airborne photoelectric device for registration of cloud drops 21 p3739 A66-39365

Sunfollower assembly for maintaining horizon scanner in Sun 21 p3740 A66-39387

Electron tubes operation and performance, discussing TV, vidicon, photographic recording tubes and photoelectric devices 21 p3716 A66-39618

Photoelectric devices for converting luminous to electrical energy and vice versa, considering characteristics, performance and application 21 p3716 A66-39619

Semiconductor optoelectronic circuits for electric signal conversion into visible light 21 p3717 A66-39627

Photoelectric skylight perimeter for Stokes parameter measurements in plane polarized light 23 p4066 A66-41029

Pulsed ruby laser photoelectric receiver experiments determining satellite orbits, supplementing Baker-Nunn camera network 24 p4172 A66-42547

PHOTOELECTRIC CELL

SA PHOTOCONDUCTIVE CELL

Photovoltage profiles of rhodium to p-silicon contact at high and low level injection and various temperatures 02 p0275 A66-11873

Cuprous oxide-cadmium sulfide junction photocells enhanced in photosensitivity and rectifying properties by exposure to periods of light and darkness 03 p0413 A66-13190

Formation of photoelectric converters of solar energy by penetration of high-energy phosphorus ions into p-type silicon 07 p1105 A66-18367

Characteristics of cadmium sulfide photocells and p-n junction photocells, using germanium or silicon 09 p1355 A66-20573

Efficiency of drift-type semiconductor photocell 09 p1358 A66-20816

Thin aluminum antimonide film fabrication for photoelectric cell application 09 p1359 A66-20927

Spectral sensitivity and temperature characteristics of light generated pairs of photoelectric converters 11 p1640 A66-23046

Dependence of statistical noise characteristics of semiconductor photoreceiver on geometrical dimensions 11 p1757 A66-23230

Optimum processing of photocell output to produce Poisson photoelectron flux 14 p2242 A66-28156

Two photocells with positive and negative photoconductivity used in model simulating human color vision and anomalies 18 p3061 A66-33843

Experimental antenna with closed loop profile control, noting light sensor

application and fast response characteristics 18 p3081 A66-34278

Testing of silicon solar photoelectric battery when exposed to large light fluxes, noting overheating, current saturation, efficiency decrease, etc 20 p3503 A66-38439

PHOTOELECTRIC EMISSION

Thermionic and photoelectric screening of electric charge on metallic spherical object moving in rarefied ionized medium 06 p0919 A66-16906

Satellite charge and sheath formation resulting from photoelectric and secondary emission 08 p1302 A66-18748

Photoconductivity and p-n photoeffect in SiC single crystals excited by X-rays 09 p1425 A66-20188

Solar corona emission line polarization resulting from anisotropic effect of photospheric radiation 09 p1442 A66-20463

Internal photoemission measurements show potential barrier profile in thin anodically formed aluminum oxide films between metal electrodes 10 p1509 A66-21541

Optical absorption and photoemission of cubic potassium antimonide 10 p1576 A66-21548

Photoelectric yield data on n-and p-type silicon carbide crystals in vacuum UV 10 p1578 A66-21578

Enhanced photoelectron emission between 200 and 1300 angstroms, using polygonal cathode to absorb incident radiation 13 p2131 A66-25823

Voltage dependence of barrier heights in aluminum-aluminum oxide-aluminum tunnel diodes at room and liquid-nitrogen temperatures 13 p2170 A66-26595

Voltage dependence of barrier height in Al-AlN-Mg tunnel junction 13 p2170 A66-26596

Photoelectric yield and energy distribution for clean-cleaved cesium-covered /111/ surfaces of silicon and germanium 14 p2365 A66-27755

Photoemission of electrons from Si and Au valence bands into thermally grown silicon dioxide conduction band 14 p2365 A66-27757

Superweak radiation spectra measurement by photoelectronic device 14 p2296 A66-27833

Dielectric field cathode model of field and photofield emission from high resistivity Si and Ge at low temperatures 15 p2558 A66-28609

Daylight observations of 1965 f comet, noting influence on solar corona, spectra at various wavelengths, polarization data and results of photoelectric scans 15 p2592 A66-28645

Potential on hot body in plasma as function of surface temperature and plasma characteristics, considering case where photoemission is present 15 p2595 A66-29087

UV solar radiation absorption in upper atmosphere determined from measurement of photoelectron currents emitted by planar metallic orthogonal photocathodes onboard Cosmos II satellite 15 p2592 A66-30051

Energy transfer measurements in gas-solid surface interactions initiated by electron beam-excited photoemission 16 p2701 A66-30397

Photoelectric yields of alkali halides measured, using rare gas ion chamber to determine flux distribution of helium continuum and obtain absorption coefficients 16 p2754 A66-30855

Variation in photoelectric output of thin metal layers calculated as function of thickness, determining output for two light polarizations 16 p2780 A66-31211

Information content of photoelectric star images determined by background radiation, optical aberrations and photon noise, deriving equations for rms error 16 p2654 A66-31441

Vectorial photoelectric effect and quantum efficiency measurement in thin gold films for two light polarizations, using Lallemand electronic camera 20 p3614 A66-37279

Absorption spectra, reflection index and photoelectric emission of tellurium 20 p3618 A66-37566

PHOTOELECTRIC MATERIAL

Photoelectric properties of Cd, Si, Ge, GaAs and Se semiconductor films with narrow forbidden zone, producing

abnormally high photovoltages 08 p1277 A66-19621

Heat treatment effect on photoelectric properties of silicon with electron-induced structural defects 15 p2560 A66-28668

Photoelectric properties of Cd, Si, Ge, GaAs and Se semiconductor films with narrow forbidden zone, producing abnormally high photovoltages 17 p2984 A66-33135

Distribution of capacitive photo-emf over surface of semiconductor determined by measuring value created by scanning surface of sample with narrow modulated-light beam 22 p3965 A66-40316

PHOTOELECTRIC PHOTOMETRY

Zodiacal light position considering ecliptic, based on photoelectric observation 01 p0061 A66-10275

Electronic device measuring sunspot areas from luminance levels which are transformed into electrical pulses 01 p0067 A66-10280

Photoelectric measurements of twilight sky brightness and polarization and correction of measured values 01 p0138 A66-11103

Free oscillation device for studying dynamic stability of models in hypersonic range of intermittent wind tunnels 02 p0210 A66-11210

All-sky electrophotometer for attachment to camera 02 p0227 A66-11350

Photoelectric measurement of probability distribution of subsonic signals in form of electrical voltage 02 p0230 A66-11814

Photoelectric area scanner enables observer to scan linearly chosen area of sky, using narrow slit 02 p0232 A66-12210

Solar limb and chromospheric structure studied, using Unsoeld method during partial eclipse of February 15, 1961 03 p0428 A66-13109

Desensitizer pinacrytol green effect on photographic and photoelectric properties of emulsion layers 05 p0678 A66-15157

Digital electrometric device with automatic discrete compensation 05 p0680 A66-15211

Rowland ghosts during movement of spectral lines in double diffraction monochromators and compensation in photoelectric spectrophotometry 05 p0681 A66-15214

Photoelectric measurements of C sub 2, C sub 3, CH and CN band strengths in near nuclear region of Comet Ikeya 1964f 05 p0762 A66-15282

Five-color photoelectric photometry used to obtain more accurate apparent magnitudes of 1300 naked-eye stars 05 p0768 A66-15771

Photocathode scanned storage tube for detection of faint optical images 06 p0883 A66-17016

Zodiacal light brightness measured by Fabry-type electrophotometer 11 p1697 A66-22430

Photoelectric photometry of rotation of Echo I and II satellites, discussing duration, variation with time and direction of rotation relative to revolution 11 p1769 A66-22477

Photoelectric observations and orbital solutions of BV 267, obtaining new light elements, system light change and orbital solutions 11 p1769 A66-22533

Photoelectric observations and orbital solutions of BV 342, obtaining light element and light curve data 11 p1769 A66-22534

High precision photoelectric scan at 8667-8668 angstrom wavelengths in solar spectrum for identification and abundance of boron 11 p1771 A66-22773

Photosedimentometer for recording light absorption along entire length of cuvette containing highly dispersed metal powder suspension 11 p1709 A66-23474

Gegenschein brightness near 5300 angstroms deduced from photoelectric measurements finding no long period variations, no correlation with alrglow, solar flares, etc 16 p2800 A66-30655

Collected reports on new development of telescopic, photometric, spectrometric, meteorological, interferometric and detection equipment at various solar and stellar observatories 17 p2923 A66-32020

Photoelectric photometry of comet Everhart 1964 h, noting density of carbon radicals and CN

molecules 17 p3000 A66-32338
 Photoelectron counter stellar photometer
 noting design, applicability of secondary
 electron multipliers, etc 18 p3113 A66-34617
 Photoelectric photometer used for tracking
 entry of artificial satellites into shadow of
 Earth 20 p3518 A66-37839
 Photoelectric photometry of Echo II
 satellite and graphs of light curves giving
 light intensity logarithm as function of
 time 22 p3863 A66-39856
 Photoelectric observation of Moon during
 total lunar eclipse of June 24-25, 1964,
 noting blueing of color B-V before Mare
 Imbrium enters umbra 22 p3976 A66-39858
 IR I and visual V magnitudes of comet
 Ikeya-Seki determined, using photoelectric
 measurements 22 p3977 A66-39863
 Spatial inhomogeneities in green line of
 atomic oxygen, using electrophotometry
 during airglow 22 p3915 A66-40778
 Spectral energy distributions of various
 quasi-stellar radio sources, using
 photoelectric spectrum 23 p4129 A66-41806
 Tabulation of photoelectric
 spectrophotometric observations of eclipsing
 system RX Arietis 24 p4273 A66-42206
 Tabulation of photoelectric
 spectrophotometric observations of eclipsing
 system UV Leonis 24 p4273 A66-42207
 Photoelectric photometer using filter that
 tilts relative to incident light for patrol
 observation of 5577 angstrom intensity in
 nightglow 24 p4210 A66-42468
 High resolution photoelectric tracings of
 solar spectrum obtained at solar
 spectrometry station at Jungfraujoch
 Scientific Station 24 p4279 A66-42710
PHOTOELECTRICITY
 Photo-emf of germanium in presence of
 surface recombination rate
 gradient 02 p0277 A66-12089
 Pulse energy and power of lasers under
 continuous operating conditions measured,
 using calorimeters, photoelectric effect of
 radiation, etc 03 p0379 A66-13205
 Predicting equilibrium primary
 photocurrent from transistor electrical
 parameters 05 p0734 A66-14847
 Photoeffect sensitization in n-and p-type
 semiconductors by dyes having n-or p-type
 photoconductivity 08 p1179 A66-19640
 LF photocurrent noise intensity, spectrum
 and photoresponse in CdS single
 crystals 10 p1588 A66-22157
 Pressure transducer with small time
 constant where pneumatic pulse is
 transformed into electric signal by means of
 photoelectric principle 11 p1708 A66-23235
 Photoelectric properties and relaxation
 time of polycrystalline layers of cadmium
 sulfide are highly dependent on substrate
 temperature 13 p2160 A66-25097
 Electron density at large distances from
 Sun determined by photoelectric
 measurements during total solar eclipse of
 July 20, 1963 13 p2187 A66-26134
 Surface charge sign effect on capacitor
 photoelectromotive force in semiconductors
 and photoinduced contact potential
 change 15 p2559 A66-28628
 Capacitance variation of gold n-type
 gallium arsenide surface barrier diode when
 illuminated, applied to light detector,
 frequency modulation, etc 15 p2463 A66-29034
 Photoeffect on barrier capacitance of p-n
 junction 17 p2988 A66-33326
 LF photocurrent noise intensity, spectrum
 and photoresponse in CdS single
 crystals 19 p3440 A66-35771
 Anomalous photocurrent generation in
 transistors, noting carrier generation and
 transport processes 20 p3526 A66-37321
 Viscous thermoconductive model of solar
 wind motion, using Navier-Stokes
 equations 20 p3631 A66-37335
 Electrical and photoelectrical properties of
 silicon photocells with different impurities,
 examining load characteristics, V-I forward
 and reverse branches plotted for silicon
 cells 20 p3502 A66-37734
 Photoelectric solar power plant for water
 pumps in grazing areas noting design,
 construction and automatic control system
 testing 20 p3503 A66-38438
 Interstellar X-ray absorption edges due to

K-shell photoionization of oxygen and neon,
 using element abundances and atomic
 photoelectric cross section data 21 p3809 A66-38658
 DC-photodecay method for investigating
 minority-carrier lifetimes in silicon
 crystals 21 p3736 A66-38747
 Inhomogeneities in silicon crystal prisms
 studied by method of photoelectric
 conductivity 22 p3961 A66-39998
PHOTOELECTROMAGNETIC /PEM/ EFFECT
 Current-carrier scattering effect on electric
 and photoelectromagnetic properties of
 semiconductors in variable magnetic
 field 06 p0922 A66-16134
 Recombination of nonequilibrium charge
 carriers in p-type indium antimonide, using
 steady state photomagnetolectric
 effect 08 p1272 A66-19246
 Change in photoconductivity and
 photoelectromagnetic effect of gallium
 arsenide single crystals caused by constant
 illumination of spectral
 compositions 09 p1412 A66-19997
 Anisotropy of balanced
 photoelectromagnetic emf in p-type
 germanium sample in which normal to
 illuminated surface coincides with
 crystallographic axis 09 p1413 A66-20002
 Balanced anisotropic photoelectromagnetic
 effect in germanium 09 p1413 A66-20003
 Photomagnetically-generated electric field
 dependence upon magnetic field and
 semiconductor parameters for particular
 quantum region 13 p2169 A66-26505
 Photomagnetically generated electric field
 dependence upon magnetic field and
 semiconductor parameters for particular
 quantum region 24 p4257 A66-42728
PHOTOELECTRON
 Photoelectron impact excitation effect on
 dayglow intensity, calculating energy
 distribution for various
 altitudes 07 p1028 A66-17374
 Anode-current spectrum of photomultiplier
 illuminated by light of time-varying
 intensity and derivation of moments of
 photoelectron counts 07 p1047 A66-18432
 Ionospheric heating by magnetic conjugate
 point photoelectrons, showing variation of
 electron temperature with
 time 08 p1218 A66-19402
 Source energy spectrum of solar XUV
 produced photoelectrons in
 ionosphere 09 p1372 A66-20382
 Photoelectron counts of photomultiplier
 illuminated by gas laser light
 source 13 p2102 A66-26211
 Energy spectrum of primary photoelectron,
 using data from atmospheric density
 distribution, fluxes of solar XUV radiations
 and absorption and ionization cross
 sections 15 p2574 A66-28906
 Single-mode laser field model consisting of
 amplitude stabilized sine wave with slowly
 varying random phase plus stationary noise
 field 16 p2716 A66-30127
 Near-Bose-Einstein probability distribution
 of photoelectron counts produced by He-Ne
 gas laser narrow band Gaussian light source
 operating slightly below oscillation
 threshold 16 p2717 A66-30645
 Small signal modulation effect on
 photoelectron counting of He-Ne laser
 intensity fluctuations 16 p2719 A66-31097
 Effect of heating of ionosphere by
 photoelectrons coming from magnetically
 conjugate point, using electron temperature
 measurements 16 p2698 A66-31214
 Subshell photoelectron emission in
 germanium at angle of 90 degrees to
 converting X radiation determined for two
 radiation sources using photographic
 techniques and track counting
 method 20 p3621 A66-38096
 Ionospheric heating by photoelectrons
 streaming from sunlit magnetic conjugate
 point established from incoherent
 backscatter spectra data 22 p3910 A66-39979
 Photoelectron emission statistics
 determining probability distribution of
 photoelectron counts in photomultiplier
 illuminated by laser below and above
 threshold of oscillation 24 p4220 A66-42543
PHOTOGRAMMETRY
SA AERIAL PHOTOGRAPHY
SA MAPPING
 Method for computing base of aerial

photograph and maximum altitude for
 desired resolution 01 p0068 A66-10695
 Square plate vibration patterns
 determined, using
 stereophotogrammetry 01 p0157 A66-10921
 Reliability of photogrammetric equipment
 discussing formulation of criteria, contractor
 requirements and testing 02 p0227 A66-11377
 Stereometograph for photographing relief
 and contours in compilation of topographical
 charts from vertical aerial
 photographs 04 p0519 A66-13663
 Canadian photogrammetry for analytical
 aerial triangulation, using mathematical
 model and matrix
 calculus 04 p0516 A66-13898
 Spatial resection resolved with respect to
 axes for various stereometric
 techniques 04 p0524 A66-14396
 Stereo pairs taken at one-and two-minute
 intervals in photogrammetry of initiation of
 cumulus clouds over mountainous
 terrain 07 p1062 A66-17371
 Soviet papers on
 photogrammetry 07 p1036 A66-18479
 Imaging and altimeter-type radar employed
 in orbiting spacecraft for high resolution
 mapping, scattering cross section studies,
 climatology, etc 10 p1532 A66-21521
 Large-scale photography and mapping
 problems in lunar
 photogrammetry 13 p2182 A66-25601
 Photogrammetric analysis of structural
 deviations of 44-ft parabolic solar
 reflector 13 p1998 A66-25606
 Method for computing base of aerial
 photograph and maximum altitude for
 desired resolution 15 p2497 A66-28556
 Computational photogrammetry, deriving
 relation between image and object space,
 using collinearity conditions and orientation
 matrix 16 p2703 A66-30513
 Lens decentering distortion using thin
 prism and Conrady models, noting
 application of precise calibration to
 analytical
 photogrammetry 16 p2746 A66-30514
 Geometrical quality of elements of exterior
 orientation after double and single point
 resection in space, noting position
 determining characteristics of linear and
 angular parameters 16 p2704 A66-30515
 Aerial mapping camera for
 photogrammetric research, examining three
 systems of correcting for film
 distortion 18 p3110 A66-33740
 Calibration of spherical reflector of
 Arecibo Ionospheric Observatory antenna,
 using analytical photogrammetric
 methods 18 p3075 A66-33746
 Solar altitude relationship to scene
 luminance for aerial photographs determined
 by photographic
 photometry 19 p3358 A66-35816
 Photogrammetric network for large-area
 phototriangulation using star-tracking
 airborne cameras, discussing theoretical and
 technical aspects 20 p3551 A66-37472
 Satellite observation via photogrammetry,
 discussing triangulation
 grid 22 p3917 A66-39738
 Geometric analysis of recordings by IR
 scanners, emphasizing significance of stereo
 imagery 24 p4210 A66-42289
PHOTOGRAPH
S CLOUD PHOTOGRAPH
S LUNAR PHOTOGRAPH
PHOTOGRAPH INTERPRETATION
 Photographic, photometric and polarimetric
 observation of Mars from 1954 to 1958 at Pic
 du Midi noting seasonal variation of surface
 markings, clouds, diameter,
 etc 02 p0286 A66-11355
 Aircraft damage scale constructed from
 photographs of accident-involved aircraft by
 method of equal-appearing
 intervals 02 p0177 A66-11831
 Gridding error in graphical rectification of
 satellite photographs eliminated by adopting
 coupled rotation of principal
 lines 06 p0882 A66-16782
 Aerial photography in geology, climatology
 and urban development 06 p0882 A66-16937
 Effect of altitude and camera field-of-view
 at various degrees on geographic orientation
 and error in target position, using TV
 data 08 p1225 A66-19531
 Martian canals in interpretation of Mariner

photos 09 p1457 A66-20472
 Mariner IV photographs of planet Mars noting topography, soil composition, atmospheric phenomena, polar cap migration, radiation, etc 09 p1457 A66-20660
 Meteorological satellite data interpretation and use - Seminar, Tokyo, November-December 1964 11 p1725 A66-22305
 Meteorological interpretation of satellite pictures of weather systems, discussing APT and AVCS 11 p1726 A66-22307
 Satellite picture interpretation of cloud patterns, emphasizing scale identification and dependence on other meteorological parameters 11 p1726 A66-22308
 Cloud identification from Tiros satellite photographs, noting element identification of order of 1 km 11 p1726 A66-22309
 Tiros photographs of tropical cumulus and cirrus clouds along vertical wind shear vector 11 p1726 A66-22310
 Tropical storm intensity and formative stage from Tiros pictures 11 p1727 A66-22312
 Maximum wind velocity in tropical storms and hurricanes estimated from cloud patterns in satellite pictures 11 p1727 A66-22313
 Meteorological interpretation of Tiros satellite photographs of Australian area 11 p1728 A66-22319
 Mechanical swivel arm that can be used with several types of reflecting stereoscopes for inspecting aerial photographs 11 p1705 A66-22661
 Light-colored rays radiating from some lunar craters, hypotheses advanced and Ranger VII photographs 11 p1771 A66-22770
 Data processing procedures used on flights of Rangers VII, VIII and IX, evaluating lunar photographs 11 p1775 A66-23079
 Jodrell Bank observations of landing phase and TV signals of Luna 9 soft landing 12 p1948 A66-23915
 Luna 9 TV photographs of Moon 12 p1948 A66-23916
 Lunar photographs received from Luna IX 13 p2177 A66-25137
 Mariner IV photographs, detailing camera system and optical specifications, discussing constraints involved in determining what regions of Martian surface were to be photographed, etc 13 p2188 A66-26383
 Luna IX imaging system and analysis of pictorial data of lunar surface 15 p2498 A66-28741
 Aerial photograph interpretation of landscape in terms of tone, texture and stereo effect 15 p2500 A66-28967
 Mariner IV photographs of Mars, discussing mission objectives, functioning of camera system and interpretation of pictures 15 p2602 A66-29957
 Soviet papers on theory and practice of interpretation of aerial photographs 15 p2503 A66-30004
 Improvement of negative quality of aerial photographs 15 p2504 A66-30005
 Spectral brightness of haze and effect on interpretation of aerial photographs 15 p2504 A66-30006
 Aerial photograph interpretation theory including detection, recognition and interpretation of object on photograph 15 p2504 A66-30007
 Psychophysiological factors which influence performance of photointerpreter 15 p2504 A66-30008
 Stereoscopes for aerial photograph interpretation 15 p2504 A66-30009
 Topographic interpretation of aerial photographs 15 p2504 A66-30011
 Aerial photograph interpretation for sparsely populated regions 15 p2505 A66-30012
 Landscape interpretation of aerial photographs 15 p2505 A66-30013
 Interpretation of vegetation types from aerial photographs 15 p2505 A66-30015
 Craters on Mars from Mariner IV pictures, showing no evidence of primeval crater and analyzing aeolian erosion 16 p2800 A66-30629
 Automatic cloud cover picture interpretation 18 p3128 A66-33741
 Screening tests to predict potential ability of persons to be trained as aerial photo interpreters 18 p3061 A66-33744
 Physiographic and geologic features revealed through analysis of pictures from

Tiros satellites, useful for terrain information 18 p3104 A66-33745
 Geographic and topography features of lunar crater Caramuel based on 1965 photographs 18 p3239 A66-35245
 Photographic interpretation of shape of tail of comet Ikeya-Seki /1965 f/ and computation of velocity of particles in solar wind 19 p3459 A66-35588
 Lunar profiles determined from photographs of annular solar eclipses of 1962 and 1963 20 p3655 A66-38021
 Colored spectrozonal aerial photographs in topographic decoding of photographs of wooded regions 21 p3735 A66-38570
PHOTOGRAPHIC APPARATUS
 Schlieren photographic technique using photoelectric scanning device with photomultiplier, rotary mirror and oscillograph 01 p0067 A66-10372
 Photometric system for measuring linear and angular vibration of aerial photography apparatus 01 p0068 A66-10696
 Motion picture equipment used in 1963 and 1964 to photograph variations of solar photosphere 01 p0071 A66-11028
 High speed camera survey 03 p0367 A66-12311
 Solid state camera system for aerospace application incorporating monolithic phototransistor mosaic sensor, molecular digital readout system, etc 04 p0519 A66-13631
 Synchronous remote controlled photography used in photoinstrumentation is dependent on time, event, position and repetition relationships between subject and camera 05 p0877 A66-14864
 Criteria for quality of aerial camera systems including allowances for ground scene properties, photographic grain and human observer, noting role of resolving power and transfer function 07 p1035 A66-18154
 High speed photography equipment, light sources, shutters and special cameras 10 p1536 A66-21867
 Kerr cell as shutters and laser modulators in high speed photography 10 p1537 A66-21869
 Space photography, camera-film systems and TV/videotape systems for space environments 11 p1707 A66-23162
 Panoramic facsimile camera providing IR and visible spectrum imagery designed for unmanned space operation, noting construction, weight, etc 13 p2077 A66-25236
 Fiber optics assemblies for high resolution photographic application 14 p2292 A66-27321
 Photometric system for measuring linear and angular vibration of aerial photography apparatus 15 p2497 A66-28557
 Aerospace thermal environments, examining effects on components of large aperture photographic catadioptric systems 15 p2498 A66-28822
 Behavior of projectiles in hyperballistic tunnel analyzed by photographs of their shock waves, using array of spark gaps flashes correlated with cameras 16 p2673 A66-30313
 Military aerial mapping program, noting camera lens distortion, shutter, stabilization, films, etc 16 p2703 A66-30511
 High speed stroboscopic photography using Kerr cell modulated laser source 16 p2705 A66-30828
 Integrated elements for aerial surveying and mapping 18 p3109 A66-33739
 LASL lens design program for Doublet Achromat, from existing Fraunhofer design, used in solar corona monochromatic photography 19 p3354 A66-35383
 Cameras for recording data related to orbit of Earth satellites, noting technique in which tracks on photograph are chopped into discrete segments of length related to satellite velocity 20 p3560 A66-37841
 Drop-weight tester/photographic apparatus for studying impact initiation-explosion process in nitroglycerin 23 p4119 A66-41243
 Photographic equipment using image converter tube as electronic shutter with exposure times from 0.5 to 5000 microseconds 23 p4070 A66-41674
PHOTOGRAPHIC DEVELOPER
 Temperature automatic control system in photographic laboratory compensating for

humidity changes by using semiwet bulb controller 20 p3561 A66-38049
PHOTOGRAPHIC EMULSION
 Desensitizer pinacryptol green effect on photographic and photoelectric properties of emulsion layers 05 p0678 A66-15157
 Solar X-ray radiation, describing rocketborne instruments using photographic emulsion for X-ray emission intensity measurements 05 p0682 A66-15366
 Effect of fluctuations on systematic error in determination of energy characteristics of nuclear interactions in photoemulsion in presence of energy threshold 05 p0755 A66-15407
 Cosmic radiation transmission at 3392 meters through lead studied for thicknesses from 10 to 20 cm, measuring intensity from star frequency in photographic emulsions 06 p0944 A66-16274
 Passage of high energy electrons and photons through condensed media such as photographic emulsion in cascade theory and method of moments 07 p1116 A66-17558
 Sensitization of polyvinyl cinnamate, using Michler ketone 14 p2290 A66-27016
 Dependence of magnitude of Herschel bleaching in photographic emulsion on delay between forward and bleaching exposure, using laser radiation 15 p2513 A66-28884
 Behavior of high speed panchromatic emulsions and films sensitive to X-ray and far UV radiation exposed in spectral region 8-10 angstroms 15 p2499 A66-28885
 Aerial image reproduction on Lith type and extreme resolution emulsions, noting experimental results on sharpness, line width changes and methods of testing with photomicrography 19 p3353 A66-35315
 Photographic process role in holography, noting relationship of exposure and transmittance by highly nonlinear inverse power law 19 p3357 A66-35815
 Effect of emulsion thickness on optical characteristics of reconstructed images, noting sensitivity to incidence angle 20 p3558 A66-37287
 Image restoration via phase holograms, noting applications to deteriorated photographic negatives and positives 23 p4068 A66-41411
 White light reflection holography extended to recording of volume holograms in emulsions on sheet film 24 p4220 A66-42260
 Noise limitations in obtaining three-dimensional images by holographic techniques, considering graininess of photographic emulsion 24 p4212 A66-42752
PHOTOGRAPHIC FILM
 Structural character of modern black and white aerial photography films and relation to image definition 01 p0068 A66-10694
 Spectral and temporal characteristics of D sub N film for use in patrol spectrograph 02 p0227 A66-11347
 Device for marking and standardizing askafilms 02 p0227 A66-11351
 Camera timing marker blocks with dual spark and neon light sources for high speed camera 03 p0367 A66-12310
 Film calibration for rocket UV spectrographs discussing SWR film exposure and density characteristics, photometric parameters and experimental techniques 05 p0677 A66-14915
 Photographic sensitivity of thin semiconductor layers of CuCl and certain other compounds 05 p0737 A66-15158
 High speed gross alpha autoradiographic technique to reduce exposure time if silver activated ZnS is used as intensifier 07 p1030 A66-17235
 Photographic technique using tilting mirror satellite camera for precise observation of artificial satellites and some results from data on high satellites 09 p1383 A66-20889
 Resolving power and microphotometric granularity of IR films measured with resovometer, noting dependence on frequency of incident light 10 p1534 A66-21332
 Structural character of modern black and white aerial photography films and relation to image definition 15 p2497 A66-28555
 Behavior of high speed panchromatic emulsions and films sensitive to X-ray and far UV radiation exposed in spectral region 8-10 angstroms 15 p2499 A66-28885

Hologram construction and sources of image degradation including random vibrations, film transfer characteristics, etc 16 p2707 A66-31243

Aerial mapping camera for photogrammetric research, examining three systems of correcting for film distortion 18 p3110 A66-33740

Finite grain size of photographic film effect on holography for cylindrical wavefronts 21 p3740 A66-39393

PHOTOGRAPHIC MEASUREMENT

SA OPTICO-PHOTOGRAPHIC STRESS MEASUREMENT

SA PHOTOGRAMMETRY

Accurate and permanent data obtained for true-north referencing, using photography 01 p0065 A66-10030

Forced convection vaporization of Freon 113 flowing in horizontal Pyrex tube examined, using motion pictures 01 p0165 A66-10910

Motions in tail of comet Humason from photographs taken at different intervals 02 p0287 A66-11487

Photographic pyrometer using variable-density filter noting temperature master curve, attenuation, calibration and error sources 02 p0229 A66-11518

Reduction of photographic positions for arbitrary optical center 03 p0370 A66-12923

Photographs of passage of Echo II into Earth shadow to determine aerosols and atmospheric ozone height distribution 03 p0427 A66-12924

Laser technique to photograph hypervelocity projectiles in free-flight range 03 p0379 A66-13248

Basic techniques for measuring macroscopic plasma properties 04 p0521 A66-14189

Data analysis from film of framing camera with rotating mirrors, using frame edges as reference lines, calculating necessary corrections 05 p0677 A66-14863

Photographic film used for quantitative measurements of intensity distribution in Q-switched laser beam 05 p0695 A66-14920

Observation location and instrument vagaries cause discrepancy between photographic and photoelectric interferometric measurements of dayglow at 6300 angstroms 05 p0671 A66-14958

Improved photographic images of meteors, using method of instantaneous exposure 05 p0681 A66-15218

Photographic and radar observations of meteors, discussing pulse coherent techniques for studying ionospheric drifts and winds 05 p0761 A66-15227

Solar flare photographic observation, presenting development of flare and associated prominences on limb 07 p1118 A66-17621

Isophotometric representation of solar corona, using photographs of equal density 07 p1136 A66-17735

Cloud altitude determination from single satellite photograph, using Sun altitude 07 p1063 A66-18481

Lunar surface shape and altitude determination via stereophotogrammetric processing of telescopic Moon photographs 07 p1036 A66-18482

Photometric examination of brightness distribution along disk of Mars 08 p1295 A66-19332

Lunar crater distribution measurement from Ranger VII photographic data analysis, deriving approximate expression for secondary distribution 08 p1297 A66-19417

Airborne camera system used to obtain roll, pitch and heading angles for aircraft during takeoff and landing [AIAA PAPER 65-210] 09 p1330 A66-20744

Metric photography techniques utilizing stroboscopic light in highlight camera and rotating disk camera 10 p1534 A66-21229

Microdensitometer for evaluating photographically recorded images for direct use as computer input 11 p1705 A66-22672

Photographic method for measuring surface strain in solid propellant grains [AIAA PAPER 65-170] 12 p1970 A66-24712

Reduction of photographic positions for arbitrary optical center 14 p2291 A66-27272

Photographs of passage of Echo II into Earth shadow to determine aerosols and

atmospheric ozone height distribution 14 p2380 A66-27273

Evaluation of nonstereoscopic pairs of photographs obtained from vertical base by moving camera, determining spatial coordinates of points on photographs 16 p2703 A66-30512

Polarization photography of solar corona, noting apparatus used for separation of K from F component 16 p2705 A66-30827

Solar magnetic field measurements noting magnetic flux, development of bipolar magnetic region, etc 17 p2996 A66-31918

Mars disk intensity, noting spectrophotometric measurements in search for limonite near IR spectral features 17 p2997 A66-31923

Rocketborne filter heliograms in Mg II line at 2802.7 angstroms including tabulated data 17 p2997 A66-31925

Rapid drift in longitude of small dark spot on south edge of Jupiter North Temperate Belt, noting sinusoidal displacement characteristics and measurement with blue and UV photography 17 p3005 A66-33009

Lunar luminescence and photographic observation techniques, noting solar activity effect 17 p3006 A66-33010

Jupiter Red Spot coordinate measurement from recent plates 17 p3006 A66-33011

Velocity profile measurements in turbulent liquid jets via photography, noting calculation of flow turbulence characteristics 18 p3114 A66-34894

Photographic determination of azimuth orientation with respect to north celestial pole 19 p3358 A66-35827

High-temperature strain in fine wires measured by photographic technique 19 p3387 A66-36658

High strain rate deformation of solids under liquid impact examined via photographic methods 20 p3588 A66-37802

Air flow luminescence front propagation in electromagnetic shock tube measured, using phase synchronized high-speed photography 21 p3790 A66-39080

Extravehicular activity during Voskhod II flight, discussing motion and orientation of Soviet cosmonaut in space 21 p3701 A66-39337

Photoelectric devices for converting luminous to electrical energy and vice versa, considering characteristics, performance and application 21 p3716 A66-39619

Satellite space coordinates from photographs made simultaneously from two points on Earth surface 22 p3917 A66-39739

Photographic data on iron meteor 36221 noting trajectory, velocity, light curve, orbit and spectral emission intensities 22 p3977 A66-39860

Photographic photometry of comet Ikeya-Seki using telescope in red region of spectrum, obtaining stellar magnitude 22 p3977 A66-39862

Photographic data recorder noting simultaneous event and data recording capability 22 p3917 A66-39994

Transient stress measurements in high modulus photoelastic materials with ultrahigh speed photography, noting usefulness of oblique incidence method, values of stress optic coefficient, Youngs modulus, etc 22 p3991 A66-40196

Spectral distribution of light from exploding wire sources noting environment, pressure, energy and material effects 22 p3948 A66-40197

Aerodynamic breakup of liquid drops in flow behind plane shock wave analyzed via high speed photography, noting experimental setup, parameter variation, etc 22 p3899 A66-40198

Gas flow in supersonic wind tunnel measured with high speed photography, noting experimental techniques and applications 22 p3886 A66-40199

Tracking data for Lunar Orbiter I producing first estimate of overall gravitational field of Moon, noting spacecraft will not impact on Moon before completing photographic mission 22 p3979 A66-40302

Photographic determination of meteor masses, examining dependence of radiation coefficient 22 p3984 A66-40766

Quantitative photographic determinations

of laser beam power density distributions and Q-switched ruby oscillator-amplifier system divergence 23 p4075 A66-41032

Interference between deformed plane wave and reference wave in coherence, obtaining transfer function of objective, using holography 23 p4067 A66-41178

Photographic measurement on optical radiation associated with hypervelocity impact of projectile on target 23 p4091 A66-41909

Mass of shaped charge accelerator generated fragments determined via high speed flash X-ray photography of projectiles in flight 24 p4209 A66-42186

PHOTOGRAPHIC RECORDING

Fresnel diffraction laws for calculation of light amplitude distribution in image spot of point as function of aperture dimensions used on hologram, source function, etc 04 p0532 A66-14173

Silicon avalanche light sources for photographic data recording 05 p0677 A66-14831

Photography providing complete illusion of reality of object represented, noting holographic and interference techniques 10 p1584 A66-21331

Coherent light recording and reproduction system 11 p1711 A66-22270

Gamma ray spark chamber with photographic recording for manned satellites, determining energy spectrum 12 p1877 A66-23688

Photographic copies of holograms taken with laser light noting film, light source, directional effect, processing, etc 13 p2081 A66-26000

Meteorological data from weather satellites equipped with TV and IR sensors, noting Automatic Picture Taking /APT/ recorder 14 p2289 A66-26806

Solar eclipse coronal isotopes, noting spectrum in region of maximum visual sensitivity, ellipticity figures, Ludendorff coefficient, luminosity gradients, etc 15 p2593 A66-28867

Hologram construction for real three-dimensional scene without visual anomalies, noting technique and results 15 p2499 A66-28879

Photographic recording of spatially modulated coherent light 15 p2501 A66-28974

Image distortion within cinematographic process as related to photography, noting quality estimation, visual perception criteria, etc 16 p2702 A66-30432

Bibliography of holograms 16 p2702 A66-30433

High temperature fatigue in pure lead and aluminum observed continuously by microscopic cinecamera combined with fatigue machine 19 p3386 A66-36366

Technique for zero or 180-degree phase generation for spatial filters using photographic printing and polarized light 20 p3556 A66-36936

Emission spectrum of plasma consisting of colliding blobs, noting photographic and photoelectric recording and ion temperature measurement 21 p3790 A66-39070

Microcircuit joints evaluated, using metallurgical process 23 p4072 A66-41192

Image restoration via phase holograms, noting applications to deteriorated photographic negatives and positives 23 p4068 A66-41411

Magnetic tape and photographic film recording from video output of digital TV spectrometer system 23 p4069 A66-41667

White light reflection holography extended to recording of volume holograms in emulsions on sheet film 24 p4220 A66-42260

PHOTOGRAPHIC RECORDING INSTRUMENT

Influence of eye lid movement upon electro-oculographic recording of vertical saccadic eye movements 07 p0999 A66-17662

Ultrahigh speed photographic instruments, discussing camera characteristics, shuttering, illumination, film transport and selection 10 p1537 A66-21868

Fast lens component for SFR high speed photographic recorder with asymmetric objectives 17 p2927 A66-33439

Lunar facsimile camera, noting large angular field coverage and electromechanical

scanning system with optically narrow instantaneous field 19 p3356 A66-35675
 Electron tubes operation and performance, discussing TV, vidicon, photographic recording tubes and photoelectric devices 21 p3716 A66-39618

PHOTOGRAPHIC TRACKING

Photographic observation of artificial Earth satellites 03 p0368 A66-12463
 Sinusoidal rocking-motion camera, advantages in satellite tracking such as light grasp gain, speed error insensitivity, clock switch operation, etc 05 p0682 A66-15370
 Optical observations of artificial satellites used for geodetic and geophysical purposes in Rumanian Peoples Republic 09 p1458 A66-20722
 Photographing of satellites, using optical system and image converter for determining coordinates 15 p2453 A66-30002
 Smear resolution losses in ground target photographs for maneuverable target-tracking reconnaissance cameras, noting MOL simulation 17 p2925 A66-32351
 Photogrammetric network for large-area phototriangulation using star-tracking airborne cameras, discussing theoretical and technical aspects 20 p3551 A66-37472
 Subshell photoelectron emission in germanium at angle of 90 degrees to converting X radiation determined for two radiation sources using photographic techniques and track counting method 20 p3621 A66-38096
 Photographic radar system employing Q-switched ruby laser, Mullard type 6929 image tube and conventional camera 21 p3736 A66-38796

Optical data processing techniques considering storage, manipulation, holography and pattern recognition using matched filters 03 p0378 A66-12997
 Reconstruction of phase objects by holographic imaging as three-dimensional lensless photography 07 p1032 A66-17461
 Coherent laser light for conventional and unconventional photographic situations 11 p1705 A66-22670
 Graph that indicates image motion effect on photographic image resolution 13 p2078 A66-25607
 Photographic and spectroscopic optics - Conference, Tokyo and Kyoto, September 1964 14 p2291 A66-27316
 Two wide-angle camera lenses, one adapted by NASA for Tiros satellite, noting freedom from astigmatism and distortion correction by choosing refractive index 14 p2291 A66-27318
 Time characteristics of visual detection and recognition of two-dimensional images against varicolored background 14 p2230 A66-27652
 Electrophotographic technician training at Foothill College 15 p2618 A66-28828
 Crystal motion effect on time behavior of laser generation mode, using high speed photography and oscillograms 15 p2518 A66-29725
 Modulation transfer function shown to reduce harmonic distortion by forming positive images, provided exposure and

development conditions are met 21 p3738 A66-39127
 Photography of small freely moving particles undergoing heat and mass transfer, using beam splitter to align two cameras on drop 22 p3917 A66-39675
 Photographic integration process using Loran-C pulses for precise synchronization of timing signals at any point in continental U.S. 22 p3862 A66-39733

PHOTOIONIZATION

Fast photoionization aureole detection and cloud of concentrated long-lived ionization from spark shock wave in laser beam 01 p0080 A66-10263
 D-region atmospheric processes such as electron attachment, photo and other detachment processes, recombination and neutralization as studied in laboratory 03 p0362 A66-12640
 Ionic reactions and photoionization processes in D, E and F regions of ionosphere 03 p0365 A66-12874
 Ionization by solar photons in thermoelectronic converters 03 p0323 A66-12970
 Fast photoionization aureole detection and cloud of concentrated long-lived ionization from spark shock wave in laser beam 03 p0379 A66-13308
 Asymptotic theory of photoionization chamber noting charged particle densities, sheath equations and quasi-neutral plasma 05 p0721 A66-14717
 Equilibrium constant of thermal and photoionization of conducting particles present as impurities in partially ionized gas 06 p0918 A66-16838
 Photoionization upstream of strong shock wave determined by ion continuity and radiative transfer equations 07 p1022 A66-18107
 Nonequilibrium radiative and collision ionization, photoionization and shock wave structure in high temperature hypervelocity low density gas 08 p1204 A66-18521
 Equilibrium electron density distribution in F-2 region of equatorial ionosphere, noting effects of photoionization, loss, diffusion along geomagnetic field lines and electromagnetic drift 08 p1216 A66-19210
 Electron loss rate dependence on internal excitation and deactivation processes in F region ion-molecule reactions 08 p1218 A66-19405
 Earth atmosphere composition noting extent and effects of ozone, absorption, ionization, electron attachment and detachment, etc 09 p1371 A66-20273
 Multiphoton ionization of xenon atom in powerful electric field by ruby laser radiation 10 p1543 A66-21966
 Absorption spectrum of neutral nitrogen near 500 angstroms, noting vibrational spacings and Rydberg series 11 p1773 A66-22783
 Perturbation theory of ionization of hydrogen and rare-gas atoms by simultaneous absorption of several photons 11 p1715 A66-23388
 Gas discharge by laser pulse, taking into account photoionization due to electron impact 12 p1891 A66-24887
 Nonlinear dielectric laser light absorption by neutral gas resulting in avalanche breakdown of gas due to thermal ionization 13 p2090 A66-25425
 Growth rate of ionization by electron impact in presence of laser beam, elastic and inelastic scattering cross sections, free-free absorption, excitation and ionization coefficients, breakdown times and thresholds 13 p2134 A66-26193
 Photoionization of leucocarbinals and leucocyanides of malachite green, crystal violet and sunset orange dissolved in straight chain alcohols and chlorinated hydrocarbons 14 p2232 A66-27374
 Photoionization of atoms in coherent states 15 p2515 A66-29205
 Mars upper atmosphere and single-layer ionosphere UV photoionization, temperature profile and chemical composition 15 p2598 A66-29417
 Absorption, photoionization and fluorescence of carbon dioxide measured in regions of strong band and continuous absorption in various spectral

ranges 16 p2749 A66-30111
 Continuous-emission coefficient of argon plasma in 2500 to 7500 angstrom range at temperatures from 11,500 to 12,500 degrees K 16 p2766 A66-31602
 Photoionization of atoms in coherent states 17 p2936 A66-33054
 Photoionization mass spectrometer with 180-degree magnetic analyzer with inclined pole faces, applicability to gas analysis 19 p3354 A66-35419
 Fast overlap of microwave radiation by ionization aureole of spark in laser beam 19 p3376 A66-36719
 Photoionization cross sections calculated for carbon, nitrogen and oxygen ions, using Hartree-Fock approximation for final transition stages 19 p3405 A66-36805
 Photoionization efficiency curve for sulfur hexafluoride in wavelength region 1050 to 600 angstroms with Rydberg levels from electronically excited state 21 p3774 A66-38525
 Interstellar X-ray absorption edges due to K-shell photoionization of oxygen and neon, using element abundances and atomic photoelectric cross section data 21 p3809 A66-38658
 Photoionization cross sections for N and O atoms and ions in state of excitation, using quantum defect method 21 p3775 A66-39076
 Multiphoton ionization of xenon atom in powerful electric field by ruby laser radiation 21 p3749 A66-39545
 Photoionization cross section of negatively charged In atoms in n-type silicon from comparison of intrinsic photoconductivity with impurity photoconductivity 22 p3964 A66-40309
 Gas discharge by laser pulse, taking into account photoionization due to electron impact 23 p4076 A66-41094
 Ionization cross sections and efficiencies by electron impact and photoionization for molecular ionization at low energies 23 p4098 A66-41268

PHOTOLUMINESCENCE

Radial solution growth of GaAs single crystal layers and analysis of photoluminescence spectrum 13 p2164 A66-25488
 Photoluminescence and stimulated emission of gallium arsenide and indium antimonide obtained by optical pumping, noting effect of applied magnetic field on laser and diode emissions 13 p2099 A66-26182
 Photoluminescence for p-and n-type gallium arsenide as function of exciting light intensity, noting minority carrier recombination mode, electron energy spectrum, etc 13 p2169 A66-26187
 Radiative recombination lifetimes in laser-excited silicon, correlating emission with photoconductivity 13 p2105 A66-26597
 Spontaneous and coherent photoluminescence in cadmium mercury telluride crystals excited optically by GaAs diode laser 15 p2517 A66-29390
 Spectral distribution of relative quantum yield of photoluminescence in polycrystalline cadmium sulfide films 18 p3158 A66-34694
 Photoluminescence measurements on silicon doped gallium arsenide for detection of compensation in shallow surface layers 19 p3436 A66-35430
 Quasi-localized states associated with high-energy conduction-band minima in semiconductors, particularly Se-doped GaSb, plotting pressure-dependence of photoluminescence 20 p3618 A66-37598
 Unfocused ruby laser radiation field-biphenyl compound interaction, resulting luminescence and apparent multiphoton absorption 21 p3745 A66-38528

PHOTOLUMINESCENT BAND

Photoluminescent time decay of red band in gallium phosphide doped with shallow acceptor Zn and deep donor O 04 p0560 A66-13722
 Time resolved photoluminescence spectra of two green broad emission bands in CdS as function of temperature, attributing new structure to transverse optical phonons 08 p1276 A66-19368
 Inverse variation of external efficiency of incoherent radiation in GaAs diode with temperature due to increased absorption, noting constancy of quantum

- Efficiency 13 p2105 A66-26570
- PHOTOLYSIS**
- HA HILL REACTION**
- Mercury photosensitized decomposition of perfluoropropene to gain information about reactive species produced 02 p0188 A66-11595
- IR and UV absorption spectra of free radical NCN observed following photolysis of matrix isolated cyanogen 04 p0473 A66-13644
- Addition of molybdenum to neodymium doped calcium tungstate laser material increases susceptibility to photolytic coloring and changes vacuum reduction coloring spectra 04 p0561 A66-13732
- Sensitized photolytic decomposition of ethanol and diethyl ether glasses analyzed at low temperature, using electron paramagnetic resonance /EPR/ spectroscopy 06 p0820 A66-16124
- Free radical CCO spectroscopy when produced by vacuum UV photolysis of matrix isolated carbon suboxide 06 p0821 A66-16128
- Photolysis of trifluoronitrosomethane in gas phase, using red light above 6000 angstroms 06 p0821 A66-16159
- Photolysis of fluorotrichloromethane, using 2138 angstrom zinc lamp 06 p0822 A66-16160
- Fluorocarbon oxidation and photolysis of mixtures of trifluorolodomethane, oxygen, nitric oxide and hydroiodic acid 08 p1178 A66-19069
- Photolysis of water at 1470 angstroms in absence and presence of ethylene 09 p1338 A66-20679
- Paramagnetic resonance spectra of free radicals in hydrogen peroxide and alcohols during intense UV irradiation 11 p1650 A66-23216
- Photolysis of trifluoroethylene iodide in presence of nitric oxide and oxygen 12 p1812 A66-25001
- Primary processes in ozone photolysis, determining quantum yields of photodecomposition for various wavelengths and concentrations 13 p2016 A66-25369
- Quantum yield of CO formation from photolysis of carbon dioxide at wavelengths of argon lines 13 p2017 A66-25801
- Photolysis of carbon dioxide and molecular oxygen, using 1470 angstrom radiation to produce atomic oxygen 16 p2645 A66-30117
- Photolysis of carbon dioxide, using 1633 angstrom line of bromine lamp 16 p2646 A66-30862
- IR and UV absorption spectra of solid HN sub 3 film after photolysis with unfiltered radiation from Hg lamp 18 p3064 A66-34455
- Possible stabilization of AgCl crystals against solar radiation effects by addition of Cu, Ni, Zn, Cs, S or Hg 18 p3157 A66-34549
- Molecular elimination of nitrogen from hydrazine from single molecule and not radical-radical combination 21 p3806 A66-38531
- Molecular laser action by vibrational excitation of nitric oxide during flash photolysis of nitrosyl chloride 21 p3748 A66-39166
- EPR spectroscopic analysis of liquid oxygen difluoride, noting photolytic dissociation into paramagnetic species 23 p4097 A66-41237
- PHOTOMAGNETIC EFFECT**
- Spectral distribution of carrier lifetime obtained from photomagnetolectric effect and photoconductivity 02 p0273 A66-11719
- Damping of electron spectrum and oscillation maximum of magneto-optical effects of semiconductor 03 p0410 A66-12943
- Minimum silicon thickness for evaluating lifetime of minority carriers by photomagnetolectric effect 18 p3155 A66-34091
- Photomagnetic anomaly in germanium in induction coil subject to variations in magnetic moment 20 p3618 A66-37564
- PHOTOMECHANICS**
- Photomechanical effect in germanium, noting dependence of mechanical properties on quantity of impurity concentration 20 p3617 A66-37554
- PHOTOMETER**
- SA SPECTROPHOTOMETER**
- SA TEMPERATURE PHOTOMETER**
- Electronic device measuring sunspot areas from luminance levels which are transformed into electrical pulses 01 p0067 A66-10280
- Automatic frame photometer with modified circuit 02 p0227 A66-11349
- All-sky electrophotometer for attachment to camera 02 p0227 A66-11350
- Digital electrometric device with automatic discrete compensation 05 p0680 A66-15211
- Iris microphotometer on MF-2 base 05 p0681 A66-15215
- Monochromatic atmospheric transluence measured, using logarithmic photometer with diode photomultiplier for remedying image displacement due to atmospheric fluctuations 07 p1034 A66-17925
- Monochromatic atmospheric transluence measured, using logarithmic photometer with diode photomultiplier for remedying image displacement due to atmospheric fluctuations 12 p1880 A66-23886
- Design and fabrication of automatic all-sky scanning and self-recording photometer for night airglow 14 p2296 A66-27724
- Airglow continuum measurement with birefringent filter 15 p2484 A66-28837
- Calibration of birefringent filter photometer 15 p2499 A66-28845
- Airglow lines measured through photometers on OGO-II satellite, noting nadir and zenith airglow 15 p2494 A66-30044
- Tilting interference filter photometer to investigate morphology of hydrogen emission and relation to visible aurora 18 p3109 A66-35087
- Measuring irradiance at focal point of solar-radiation collector, using optical filament microphotometer 20 p3502 A66-37735
- Photometric device for measuring propagation velocity of light fluctuations in arc-heated plasma jet 24 p4212 A66-42776
- PHOTOMETRY**
- SA ASTRONOMICAL PHOTOMETRY**
- SA PHOTOELECTRIC PHOTOMETRY**
- SA SPECTROPHOTOMETRY**
- SA TELEPHOTOMETRY**
- SA ULTRAVIOLET PHOTOMETRY**
- Photometric system for measuring linear and angular vibration of aerial photography apparatus 01 p0068 A66-10696
- Film calibration for rocket UV spectrographs discussing SWR film exposure and density characteristics, photometric parameters and experimental techniques 05 p0677 A66-14915
- Photometric measurements of twilight brightness for upper atmospheric temperature determination 05 p0674 A66-15528
- Bearing strength of lunar surface, optical properties suggest rock particles which maintain high porosity by interparticle adhesion 06 p0955 A66-16788
- Radiometric and photometric measures including radiant and luminous flux, radiant and luminous emittance, radiance, luminance, wavelength region, etc 06 p0882 A66-16897
- Measurement of light scattering matrix in lower atmosphere, discussing apparatus and results 08 p1247 A66-19303
- Velocity of light determined from photometric distance comparison, using invar gauges 08 p1256 A66-19344
- Photometric monitorings of 5577 and 6300 angstrom lines during undisturbed geophysical conditions in South Atlantic 10 p1530 A66-21164
- Illuminance of Earth shadow at three wavelengths by numerical integration, accounting for light attenuation, ozone absorption and extinction, Rayleigh scattering and refractive beam divergence 11 p1770 A66-22570
- Photometric measurements of tracks of heavy primary particles found in emulsion stack near geomagnetic equator, noting ratio of C and N nuclei to O nuclei 11 p1762 A66-22654
- Photometric standards which are references for measurement of sources of energy in visual and near visual portion of electromagnetic spectrum 11 p1736 A66-22671
- Photometric method for deriving lunar surface elevation information from single picture 13 p2183 A66-25603
- Photometric figures of merit for various shaped semiconductor luminescent sources operating in spontaneous mode 14 p2362 A66-27495
- Spatial distribution of four cloud fields studied by photometry of aerial photographs, determining statistical parameters 14 p2325 A66-27537
- Photometric determination of extinction coefficient for optical scattering in turbid medium 14 p2326 A66-27544
- Photometric system for measuring linear and angular vibration of aerial photography apparatus 15 p2497 A66-28557
- CAT detection by photometric star tracking system from moving aircraft 15 p2500 A66-28931
- Height measurement of nightglow by photometric ground triangulation, minimizing previous errors 17 p2917 A66-32524
- Mapping 6300 angstrom airglow isophotes from observations of scanning photometer at Haleakala, Hawaii 17 p2918 A66-32534
- Measurement of light scattering matrix in lower atmosphere, discussing apparatus and results 19 p3393 A66-36040
- Velocity of light determined from photometric distance comparison, using invar gauges 19 p3400 A66-36052
- Photometry of flux from surface and representation as Fourier series of time dependence of received reflected flux for torse of convex curvature 20 p3556 A66-36937
- Zodiacal-light photometric measurements, analyzing effect of twilight radiation on observable brightness 20 p3549 A66-37036
- Vacuum upwellings of simulated basalt and granite magma, showing correlation with lunar surface by photometry 20 p3655 A66-38025
- Fog transmittance attenuation factor, comparing photometric values and values calculated from microstructural observations, using flow trap 21 p3759 A66-38917
- Photometry, polarization, structural peculiarities and density distribution of solar corona 21 p3813 A66-39121
- Spatial distribution of four cloud fields studied by photometry of aerial photographs, determining statistical parameters 24 p4233 A66-42323
- PHOTOMICROGRAPHY**
- Light and electron microscopic metallography and X-ray diffraction microanalysis of phase reaction during heat treatment of Ni-base superalloy 08 p1236 A66-18757
- Photomicrographic analysis of reactions during charging and discharging of nickel-cadmium alkaline cells 08 p1170 A66-19643
- Quasi-equilibrium states during pulse remagnetization of thin ferromagnetic films, discussing domain structure 11 p1752 A66-22798
- Microstructure viewed on several different successive parallel planes simultaneously, using multiple positive or negative transparencies, obtaining three-dimensional photomicrograph 12 p1892 A66-23626
- Cinephotomicrographic studies of metallized fuel-rich propellants with high aluminum powder content, discussing composition, burning rates, etc [AIAA PAPER 66-616] 18 p3162 A66-34433
- Volt-ampere characteristics and photomicrographs of p-n junctions produced by diffusion of Zn and Cd into InP 21 p3798 A66-38918
- PHOTOMULTIPLIER**
- SA FREQUENCY MODULATION PHOTOMULTIPLIER**
- Schlieren photographic technique using photoelectric scanning device with photomultiplier, rotary mirror and oscillograph 01 p0067 A66-10372
- Ultimate sensitivity limit and photoelectron statistics for photomultiplier lit by coherent and noncoherent light 03 p0377 A66-12473
- Precursor effects in T-tubes predominantly air-filled, using microwaves and photomultipliers, noting role of UV and plasma radiations 05 p0719 A66-14503
- Instrumentation used in analysis of short-periodic and microvariations of cosmic ray intensity, noting supermonitor with scintillation counters, photomultipliers, etc 06 p0951 A66-16597
- Anode-current spectrum of photomultiplier illuminated by light of time-varying intensity and derivation of moments of

- photoelectron counts 07 p1047 A66-18432
 Photomultiplier voltage pulse shaping and transmission network using germanium tunnel diode 08 p1193 A66-19278
 High resolution solid state precision star tracking system using magnetoresistance multiplier and image dissector
 phototube 08 p1250 A66-19349
 Slow neutron scintillation counter using photomultiplier with nonactivated dynodes, with low amplification factor to measure very low intensity ion beams 09 p1380 A66-20359
 Small-diameter linear electric shock tube, noting design characteristics, construction, operative functions, etc 10 p1519 A66-21516
 Laser ranging via digital counter coupled photomultiplier tube, noting spectral response, gain transit time dependence, output coupling and effective cathode diameter 12 p1830 A66-23759
 Photoelectron counts of photomultiplier illuminated by gas laser light source 13 p2102 A66-26211
 Discharge afterglow in low pressure tube studied by photomultiplier 13 p2150 A66-26473
 Multiplier phototubes for UV and visible spectra, noting dark current, equivalent noise input, etc, for space application 15 p2498 A66-28839
 Photomultiplier tube socket assembly with high gain and clean output signals for viewing organic scintillator light pulses 16 p2702 A66-30429
 Initial pulse in luminous emission of discharge laser, using photomultiplier preceded by mobile iris, determining geometrical distribution of discharge brightness 16 p2719 A66-31209
 Hybrid photomultiplier tubes using silicon diodes and transistors for low and medium gains 19 p3359 A66-35908
 High time resolution polarimeter for laser analysis, beam intensity after passing through analyzers measured by photomultipliers 20 p3558 A66-37285
 Temperature measurements of laser sparks from relative intensity of X-ray flux transmitted through beryllium foils of different thickness 22 p3933 A66-40421
 Radiometer system with photomultiplier tube for measuring absolute radiation from hypervelocity projectile flow fields 24 p4208 A66-42181
 Large scintillation counter design with one photomultiplier 24 p4214 A66-42945
- PHOTON**
 Photon tracks near very massive star, deriving motion equations with independent time coordinate for spherically symmetric four-dimensional manifold 02 p0291 A66-12184
 Free photon path distribution during passage through thick plane-parallel light scattering layer 04 p0541 A66-13416
 Nature and yield of photon and neutron induced defects in semiconductors determined from changes in electrical properties 06 p0939 A66-17154
 Photon momentum distribution in fully ionized gas 07 p1082 A66-17466
 Ratio of energy of electron-photon component and energy of charged mesons in interaction between nucleons and iron nuclei 07 p1114 A66-17548
 Origin of high energy pions, muons and photons studied from available spectral data 07 p1115 A66-17555
 Frequency dependence of hot carrier AC conductivity of covalent semiconductors, considering scattering due to acoustic and optical phonons 07 p1098 A66-17740
 Effects of derivative terms in leptonic current of photon interaction yielding neutrino and antineutrino 07 p1083 A66-18239
 Mechanism for production of X-rays and gamma rays in galaxies, noting photon and electron spectrum 10 p1598 A66-21100
 Diffusion length dependence on energy of exciting photons for p-silicon and n-and p-germanium, using bevel-grind technique 10 p1578 A66-21666
 Optimum signal to noise ratio photon detector and relation to high background radiation 10 p1505 A66-21842
 Hartree-Fock approximation method for calculating efficiencies of multiple-photon processes 11 p1737 A66-22495
 Photon echo, optical analog of spin echo, in ruby crystals, using ruby laser as excitation source 13 p2097 A66-26170
 Density distribution in exosphere, particularly Maxwellian velocity distribution disturbed by light particle 14 p2284 A66-27620
 escape 14 p2284 A66-27620
 High energy photons from radio sources, registering EAS with Cerenkov telescope 15 p2579 A66-29526
 Light absorption coefficient for indirect photon transitions during Coulomb interaction of electrons at high electron densities 16 p2787 A66-31766
 Stability conditions of two-photon processes, analyzing combination and double radiation by matter placed in resonator cavity 17 p2874 A66-32242
 Increase of mean photon energies by mechanism related to Cerenkov plasmon-induced acceleration of charged particles 17 p2965 A66-32254
 High energy X-ray spectrum from Crab Nebula at photon energies up to 90 kev 18 p3170 A66-34529
 Low temperature vibronic transitions between electronic states involving destruction of photon and creation of phonon via electric dipole term of Hamiltonian 19 p3446 A66-36394
 Two-photon laser excitation conditions deteriorated by presence of resonator tuned on transition frequency between operating levels of matter 20 p3576 A66-37143
 Photon time-of-arrival distribution measured in highly monochromatic and spatially coherent light beam from low pressure Hg discharge lamp 23 p4076 A66-41265
 RK-1-F radiosonde for stratosphere measurements of X-ray photon energy spectrum, charged particle density and X-ray photon density 24 p4213 A66-42941
- PHOTON ABSORPTION**
 SA TOWNSEND DISCHARGE
 Indirect optical transitions in semiconductors due to photons and impurities, noting absorption and emission of photons, avalanche and long wavelength radiation 02 p0273 A66-11714
 Multiphonon absorption in laser GaAs and ruby crystal of optical generator 02 p0241 A66-11727
 CdS single crystal optical generator during excitation by ruby laser, discussing two-photon absorption coefficient at 300 degrees K for radiation flux densities 04 p0529 A66-13874
 Barrat theory of multiple scattering of magnetic resonance radiation, accounting for vapor dispersion and photon propagation time 05 p0697 A66-15172
 K-shell photon absorption spectrum of neon gas 06 p0890 A66-16386
 Hydrogen molecule multiphoton ionization, determining probability of absorption, effected by ruby laser 06 p0891 A66-16517
 Hydrogen molecule multiphoton ionization, determining probability of absorption, effected by ruby laser 09 p1387 A66-20898
 Unattainability of detailed balancing in thermodynamic equilibrium of gray atmosphere 11 p1772 A66-22776
 Perturbation theory of ionization of hydrogen and rare-gas atoms by simultaneous absorption of several photons 11 p1715 A66-23388
 Electroreflectance effect on gallium arsenide surfaces, noting reflectance response upon electric field modulation 13 p2158 A66-25051
 Semiconductor GaAs quantum generator with two-photon absorption of neodymium laser emission 14 p2307 A66-27187
 CdS single crystal optical generator during excitation by ruby laser, discussing two-photon absorption coefficient at 300 degrees K for radiation flux densities 14 p2308 A66-27576
 Kinetic theory of two-photon absorption from single mode of radiation field, noting dependence on coherence properties of field 15 p2544 A66-28943
 High energy photon absorption in space due to electron-positron pair production in photon-photon collision 16 p2750 A66-30150
- Transitions and excited states in anthracene, using two-photon spectroscopy 16 p2717 A66-30203
 Change in reflectance of semiconductor induced by electric field at approximately photon energies of interband transitions 16 p2776 A66-30734
 Light absorption by free current carriers role in kinetic equations of semiconductor laser/radiation system 18 p3119 A66-34691
 Radiation transport in spectral lines as consecutive photon absorptions and emissions, discussing contemporary theories, approximation methods and applications 18 p3120 A66-35076
 Multiphoton ionization of krypton and argon by ruby laser radiation may occur by absorption 19 p3403 A66-36721
 Quenching of stimulated Raman scattering of coherent radiation by two-photon absorption in organic liquids 24 p4226 A66-43039
 Semiconductor GaAs quantum generator with two-photon absorption of neodymium laser emission 24 p4226 A66-43085
- PHOTON BEAM**
 High pressure high current argon discharge, calculating statistical variations of photon radiation, electron and ion densities 05 p0720 A66-14504
 Photon trapped wave effect for developing optical waveguides in which optical beam creates waveguide as it propagates 06 p0892 A66-16662
 Detection by coincidence counting techniques of two-photon decay of metastable state of singly ionized helium 09 p1404 A66-20290
 Laser scattering by bound charged particles 11 p1713 A66-23080
 Scattering of electron beam by standing waves of photons inside laser cavity corresponds to stimulated Compton effect 13 p2096 A66-26155
 Beam trapping in cadmium sulfide noting threshold, trapping length, refractive index change and Stokes 16 p2716 A66-30158
 Laser beam energy profile determined by multiple-layer aluminum foil technique 16 p2719 A66-31217
- PHOTON DENSITY**
 Light intensity in homogeneous turbid medium for unresolved absorption bands calculated from distribution of photon optical paths in absence of absorption, considering atmospheric scattering 04 p0542 A66-14302
 Energy and density spectra of X-ray photons in extensive air showers and in stratosphere 07 p1118 A66-17574
 Electroreflectance effect on gallium arsenide surfaces at various ranges of photon energies 08 p1279 A66-19838
 Induced radiation at high photon densities, noting applicability of perturbation theory to multiphoton resonance radiation of lasers 09 p1386 A66-20344
 Zodiacal light and atmospheric continuum examined via new photoelectric 30-cm telescope 10 p1526 A66-21125
 Lamb shift in lithium isotope measured by determining lifetime from photon emission and employing analog formula of Bethe and Salpeter 11 p1739 A66-22948
 Coherent behavior of light-quantum field in quantum electrodynamics, noting explicit terms of correlation and characteristic field conditions for nth order coherence 12 p1913 A66-23727
 Bose-Einstein distribution function for quantum photons from amplified spontaneous emission 14 p2307 A66-27195
 Light intensity in homogeneous turbid medium for unresolved absorption bands calculated from distribution of photon optical paths in absence of absorption, considering atmospheric scattering 14 p2327 A66-28216
 Configuration-space photon number operators in quantum optics, discussing photoelectric measurements of field, photon localization in space-time regions, commutator formalisms, etc 15 p2543 A66-28942
 Coherence conditions effects on electromagnetic field density operators and photon density distribution in single excited

- mode 17 p2957 A66-31975
Laser operated with saturable filter for Q-switching, noting two modes of excitation soft and hard regime/ 17 p2934 A66-32314
Intergalactic photon density estimated based on luminosity function of galaxies 18 p3186 A66-34812
Gain factor variation with threshold current in reflective and antireflective films of GaAs laser with photon and current densities 20 p3581 A66-38388
Bose-Einstein distribution function for quantum photons from amplified spontaneous emission 24 p4226 A66-43093
- PHOTON-ELECTRON INTERACTION**
Optical field effect in analyzing band structure and surface physics of silicon, noting reflectance 04 p0560 A66-13723
Isotropic photon gas interacting with electron plasma with Maxwellian distribution via Compton effect 05 p0722 A66-14721
Photon radiation effect on ionization of cesium vapor 05 p0615 A66-15533
Avalanche multiplication factors other than impact ionization leading to breakdown in p-n junctions 06 p0850 A66-16445
Silicon recombination radiation, describing long wave IR radiation effect and photon energy gain via conversion into short wave radiation 06 p0924 A66-16515
Nuclear interaction at high energies, discussing active component structure ionization calorimeter application, energy spectrum of particles, etc 07 p1113 A66-17536
Fraction of energy transferred to photon-electron component during interactions of particles with graphite nuclei at energies exceeding 100 bev 07 p1114 A66-17545
Compton scattering of laser photons, noting transformation into gamma radiation photons upon collision with high energy electrons 07 p1044 A66-17816
Anode-current spectrum of photomultiplier illuminated by light of time-varying intensity and derivation of moments of photoelectron counts 07 p1047 A66-18432
Photoadsorption effect on semiconductor surfaces determined as function of various parameters, noting role of external electric field 08 p1276 A66-19378
Induced radiation at high photon densities, noting applicability of perturbation theory to multiphoton resonance radiation of lasers 09 p1386 A66-20344
Silicon recombination radiation, describing long wave IR radiation effect and photon energy gain via conversion into short wave radiation 09 p1431 A66-20896
Ionizing role of photon radiation in gas thermionic converter, noting experimental results and application to solar energy converters, tubular emitter converters, etc 09 p1405 A66-20923
Fundamental width of spectral lines and generalized method for integral equations of quantized radiation interacting with matter 13 p2129 A66-26341
Charge particle acceleration through electron absorption of bremsstrahlung photons 14 p2375 A66-27259
Neon level broadening under effect of laser radiation studied by observing Hanle effect on fluorescent light 15 p2517 A66-29640
Compton-effect produced by thermal photons on relativistic electrons in solar atmosphere 19 p3454 A66-35247
Maximum temperature of any substance in equilibrium with thermal radiation, considering properties of hot matter at very high densities, including gravitational interaction of photons 19 p3463 A66-36069
Neutrino processes in stellar evolution, discussing pair annihilation, plasma, photon-neutrino, URCA, bremsstrahlung, photo-beta, photon-photon and electron-electron bremsstrahlung processes 19 p3454 A66-36790
Parallel and transverse magnetic field effects on electric field induced optical absorption at photon energies below direct gap in Ge 23 p4109 A66-41036
- PHOTONIC PROPULSION**
Electric and photon propulsion systems in German-American research 06 p0942 A66-15931
- PHOTOPLASTICITY**
Properties of materials for photoplastic stress analysis 14 p2318 A66-27950
Photoplastic method of solving plane elastoplastic problems, using celluloid as model material 24 p4287 A66-42212
- PHOTOPRODUCTION**
Photoproduction, lateral density distribution, energy spectrum and muon component fluctuations in electron photon cascades 18 p3208 A66-35114
Range of atoms recoiling from photonuclear reactions in solids measured by foil-sandwich irradiations followed by radiochemical detection methods 19 p3402 A66-36002
- PHOTOREDUCTION**
Quantum yield of photoreduction intrinsically lower in Bishop Scenedesmus mutant than in wild-type algae photosynthesis 11 p1644 A66-22975
- PHOTORESISTOR S RESISTOR**
- PHOTOSPHERE**
Solar photosphere noting radiative equilibrium theory, granules and convection observations for temperature distribution 03 p0420 A66-12840
Visual and photographic observation of solar photosphere in 1964 shows abundance of sunspots 03 p0428 A66-13032
Appearance of active regions of Sun associated with 10 to 20 percent increase in convection velocity 05 p0781 A66-15091
Source function models and modified mean values of solar photosphere, accounting for limb-darkening and intensity fluctuation data 05 p0763 A66-15283
Visible faculae on solar disk and gradual disappearance toward center of disk, with assumed temperature difference between faculae and photosphere of 200 K 05 p0756 A66-15421
Abundance of titanium for solar photosphere model derived from ion lines 07 p1135 A66-17641
Comparison of interplanetary magnetic field measurements made by Imp-I satellite and those obtained with solar magnetograph at Mount Wilson 09 p1455 A66-20402
Solar wind enhancement of heavy element content in composition of solar corona relative to value for photosphere 09 p1456 A66-20415
Blanketing and convection effect on theoretical models of solar photosphere 11 p1772 A66-22775
Goldberg method for determining Doppler widths in calculations of depth dependence of solar turbulence 13 p2183 A66-25615
Spectral equivalent linewidths of four solar faculae and adjacent undisturbed photosphere sections 15 p2596 A66-29140
Temperature and radii of nova photospheres 16 p2800 A66-30640
Oscillatory component in solar granulation continuum brightness fluctuations, secondary maxima in temporal autocorrelation functions and power spectra 17 p2996 A66-31920
Ten micron stellar flux measurements of 42 stars with 200 inch Hale telescope and predictions of model atmospheres and line-blanketing theory 17 p3000 A66-32268
Photospheric magnetic fields of Sun, discussing paths of lines of force based on pictorial records 18 p3231 A66-34341
Photospheric structure and temperature distributions, determined from center limb variations of central intensities in neutral titanium lines, used in connection with model atmosphere 19 p3465 A66-36609
Photospheric bridges over sunspots studied by meniscus photoheliograph at Tashkent Astronomical Observatory 20 p3646 A66-37030
Graphical and tabular presentation of solar photospheric faculae performed by four independent amateur astronomers from 1960 to 1963 20 p3651 A66-37514
- PHOTOSYNTHESIS**
SA CHLOROPHYLL
SA METABOLISM
Quantum yield of photoreduction intrinsically lower in Bishop Scenedesmus mutant than in wild-type algae photosynthesis 11 p1644 A66-22975
Algatron, device for life support systems in space, providing potable water, oxygen supply, stabilizing human wastes by algal photosynthesis 13 p2015 A66-25702
- Molecular nitrogen photofixation relation to electron-donor respiratory system, activity of hydrogenase and dehydrogenases and photosynthesis 13 p2010 A66-25893
Space photophysiology and UV irradiation effect on photosynthesis of plants 15 p2439 A66-29488
Maximum photosynthetic capacity for Chlorella determined experimentally from cell reproduction rates 15 p2440 A66-29505
Intensive Chlorella culture need of carbon dioxide concentration in closed and controlled air-carbon dioxide system 15 p2440 A66-29508
Dense continuous Chlorella culture growth at various illumination levels 15 p2440 A66-29509
Photoreduction of viologen dyes analyzed with chloroplasts, noting oxygen evolution and photophosphorylation efficiency, reduction potentials, etc 16 p2638 A66-30647
Isolation of morphologically intact and photochemically functional chloroplasts from marine chryomonad Hymenomonas sp 16 p2638 A66-30648
Role of light in chemical and biochemical evolution noting photosynthetic reactions depending on chlorophylls, pigment system, etc 17 p2853 A66-32102
Occurrence of adenosine monophosphate inhibition of carbon dioxide fixation photosynthetic and chemosynthetic autotrophs 18 p3056 A66-33697
Life detection instrument incorporating metabolism and growth experiments including detection of metabolism of radioactive substrates, photosynthesis, etc 18 p3062 A66-34368
Two-billion-year-old fossils related to blue-green algae considered in connection with origins of photosynthesis 19 p3285 A66-35794
Algal bioregenerative photosynthetic gas exchange system 19 p3293 A66-36239
Kinetics and spectral characteristics of photoinhibition of spinach chloroplast reactions 24 p4163 A66-42316
- PHOTOTRANSISTOR**
Film scanning system using GaAs light-emitting diode and phototransistor light detector 11 p1709 A66-23476
Epitaxial-planar diffusion techniques to fabricate monolithic electro-optical mosaics of 2500 phototransistor element with internal row and surface column interconnections 16 p2665 A66-31431
- PHOTOTROPISM**
Difference spectra of glucose cultures of Chlorella vulgaris beynernick indicate increased pigmentation in white light and monochromatic light over dark controls 20 p3507 A66-37791
Photoillumination effect on growth rate of Chlorella vulgaris, discussing action spectrum and mechanism of light requirement for heterotrophic growth 20 p3507 A66-37792
- PHOTOTUBE**
SA ELECTRON TUBE
SA PHOTOMULTIPLIER
Photoelectric storage tube capable of long term integration of faint optical images, employing as storage target low density layer of KCl for increased charge multiplication 06 p0883 A66-17017
Near IR detection system using phototube with type S1 phosphor photocathode, noting tunnel diode discriminator S/N ratio 08 p1227 A66-19696
Transverse wave FM phototube system for detection of microwave-frequency modulated light, noting design, operation and application 12 p1838 A66-24558
Light deflection technique for transient shock wave detection by phototube activation based on Snell law 19 p3357 A66-35811
Phototube using shallow-diffused p-n junction diodes as multiplier element 19 p3359 A66-35909
Traveling wave phototube /TWP/ theory in terms of modified TWT coupled mode theory, noting equivalent impedance concept and noise output 24 p4184 A66-42746
- PHOTOVISCOELASTICITY**
Mechanical and optical measurements on plasticized polyvinyl chloride, photoviscoelastic stress analysis and wave

propagation effects 14 p2318 A66-27767
 Structural-model analysis of photoviscoelasticity and photoviscoelastic materials as rheological problem of mechanical and optical creep, relaxation and related phenomena 18 p3257 A66-34562

PHOTOVOLTAGE

Secondary illumination effect on intrinsic photovoltage and photocurrent excited in certain spectral region in cadmium sulfide crystals with gold and indium contact 08 p1272 A66-19244

Photoelectric properties of Cd, Si, Ge, GaAs and Se semiconductor films with narrow forbidden zone, producing abnormally high photovoltages 08 p1277 A66-19621

Photovoltaic response of variously doped germanium-silicon diodes, confirming band diagram for germanium-silicon heterodiodes dominated by lattice mismatch interface states 09 p1360 A66-20978

Surface photovoltage measured in vapor-deposited cadmium sulfide using metal-insulator-semiconductor-structures, noting surface potential analysis as applied to thin film field effect transistor 13 p2164 A66-25487

Preparation, X-ray measurements and photovoltaic properties of Ge-epitaxial-PbS heterojunctions 15 p2562 A66-28710

Photovoltage of aluminum-aluminum oxide-aluminum thin film sandwich with aluminum oxide layer of 60 angstroms measured as function of wavelength and incident light intensity 16 p2778 A66-31076

Photoelectric properties of Cd, Si, Ge, GaAs and Se semiconductor films with narrow forbidden zone, producing abnormally high photovoltages 17 p2984 A66-33135

Steady state open-circuit photovoltage in some monocrystalline CdS samples found to be due to generation of free minority carriers 19 p3437 A66-35476

PHOTOVOLTAIC CELL

Concentrators to increase efficiencies and reduce costs of solar photovoltaic system used in ground-based application 05 p0612 A66-15305

Impurity concentration effect of electron irradiation damage in photovoltaic silicon cell with shallow p-n junction 06 p0938 A66-17145

Silicon photovoltaic cells applied to solar batteries, examining efficiency with which luminous energy is converted into electrical energy 06 p0810 A66-17160

Solar energy conversion into electrical energy by photovoltaic cells for satellite power source 08 p1267 A66-18615

Film-type photocell consisting of p-n heterojunction between copper oxide and cadmium sulfide with secondary maximum in sensitivity 09 p1429 A66-20821

Photovoltaic cells based on p-n junctions of ternary Cd-Te-Hg films, noting fabricating methods for n-or p-types 09 p1431 A66-20926

Potentials of solar power electric propulsion including photovoltaic devices, array structures and weight reduction [AIAA PAPER 66-210] 12 p1937 A66-24527

Weight advantages of solar-thermionic systems as compared to photovoltaic system [ATAA PAPER 64-718] 13 p2004 A66-26613

Impurity photovoltaic effect in cadmium sulfide, noting radiative enhancement of spectral response upon illumination with green light 15 p2561 A66-28709

Design, fabrication and testing of flat plate solar thermoelectric generator for near-Earth orbits, including comparison with photovoltaic cell 16 p2636 A66-31019

Flat plate solar thermoelectric generator panels for near-Earth orbits, comparing design, fabrication and testing to photovoltaic cells 16 p2637 A66-31103

Charged particle effect in Van Allen zone on short circuit currents of photovoltaic cells on D-1A satellite 18 p3053 A66-33980

Sensitivity of cadmium sulfate-based photovoltaic cells in short wave region 21 p3798 A66-38915

Solar photovoltaic cell design for lower temperature operation, noting application to near-Sun missions 23 p4019 A66-41745

Solar hybrid systems / photovoltaic-thermoelectric and photovoltaic-thermionic/

analyzed, determining potential for missions close to Sun 23 p4019 A66-41746

PHOTOVOLTAIC CONVERSION

Radioisotope-photovoltaic energy conversion system, discussing principal elements, radiative exchange and efficiency calculations 07 p0990 A66-17231

Energetic conversion of solar radiation noting photovoltaic, thermoelastic, thermoelectric, thermionic and heliochemical generators 11 p1638 A66-22240

Indium arsenide diodes for thermophotovoltaic conversion at 1000 K 11 p1639 A66-22248

Solar energy power converter based on illumination of battery of silicon photovoltaic cells with intense light fluxes 17 p2848 A66-32856

Photovoltaic response of p-n Ge-Si and Ge-GaAs heterojunctions dominated by carrier generation in narrow or wide gap material 22 p3960 A66-39813

PHOTOVOLTAIC EFFECT

Photovoltaic response in semiconductors based on Demmer effect which does not overtly depend on hole and electron mobility 02 p0275 A66-11976

Steady state zero-current photovoltaic effect for semiconductor subjected to strong illumination which is only weakly attenuated 02 p0275 A66-11977

Photovoltaic effect and principles upon which operation of photodiodes are based, including analysis of photovoltaic circuits to determine operating parameters 04 p0524 A66-14456

Hydroquinone and oxygen effects on photovoltaic characteristics of optically excited chlorophyll 06 p0812 A66-16357

Recombination process of electron-hole pairs in germanium irradiated with cobalt 60 gamma rays, using photovoltaic effect in p-n junctions 06 p0938 A66-17146

Photovoltaic effect in thin ternary semiconductors of Cd-Te-Hg 07 p1092 A66-17248

Light emission and photovoltaic effect of GaP diodes near bandgap 07 p1004 A66-17319

Photo emf effect calculated at p-n junction of crystal photodiode 08 p1268 A66-18696

IR radiation effect on photovoltaic effect in cadmium sulfide excited by visible light 12 p1927 A66-23772

High-voltage photovoltaic effect in thin silicon films, considering thermal processing, gas adsorption and stress 13 p2166 A66-25818

Anomalous photovoltaic effect in semiconductor Ge, Si, CdTe and GaAs thin films due to photodiffusion and microtransitions 20 p3620 A66-37701

Surface photovoltage theory for small signals in Si and Ge, considering photocarrier trapping on surface and conductivity in space charge region 24 p4253 A66-42358

PHTHALATE**S POLYETHYLENE TEREPHTHALATE****PHYSICAL CHEMISTRY**

Forms of water in biologic systems - Conference, New York, October 1964 11 p1644 A66-22987

Supersonic air flow past blunt bodies and equilibrium physicochemical conversion effects 12 p1797 A66-24426

Physicochemical quantitative analysis of cometary nucleus-coma buildup relationship, discussing gas liberation, entropy and enthalpy variation, change of state and gross energy balance 17 p3010 A66-33374

Chemico-physical and biological fluctuation and causality dependence on space phenomena 21 p3811 A66-38630

PHYSICAL ENDURANCE**SA WORK CAPACITY**

Infantile treadmill experience effect on body weight and resistance to exhaustion in rat 07 p0997 A66-17460

Physical conditioning found to have no effect on human tolerance of positive Gs during gradual or rapid onset centrifuge runs 16 p2640 A66-31123

PHYSICAL EXAMINATION**SA PERSONNEL SELECTION**

Astronaut selection including dynamic testing, discussing examination methods, biological parameters, laboratory and radiological procedures, blood chemistry techniques, etc 04 p0469 A66-14064

Speech audiometry in observing hearing loss with aid of live voice 13 p2015 A66-26700

PHYSICAL EXERCISE**SA WORK CAPACITY**

Exercise tolerance, plasma volume, red cell mass, total blood volume and orthostatic tolerance during four weeks of bed rest 03 p0326 A66-13354

Effects, singly and in combination, of heat, exercise and hypohydration upon voluntary dehydration in four acclimated physically-fit young men 06 p0812 A66-16533

Extraneous stimulation effect on vigilance performance investigated by repeated threshold measurement 11 p1646 A66-23372

Space cabin simulator to test premise that in-flight physical exercise can be used for early detection of deteriorative trends for mission preservation 17 p2924 A66-32172

Exercise performance and cardiovascular response of man exposed for 56 days to oxygen-helium atmosphere 18 p3057 A66-33772

Myocardial glycogenolysis in rat ventricle and relation to severity of exercise 20 p3505 A66-37058

PHYSICAL FACTOR

Activity indices of solar filaments 01 p0131 A66-10313

System of astronomical constants adopted in 1965 by International Astronomical Union for introduction in 1968, discussing difficulties in consistency, compatibility and durability 03 p0429 A66-13195

Astronomical constants system approved by International Astronomical Union at Hamburg in August 1964 05 p0759 A66-14885

Physical factors determining hardening of nimonic type alloy with high niobium content, discussing formation of intermetallic phase 05 p0704 A66-15820

Concepts, symbols, units and nomenclature for transmission of radiant flux through Earth /variable density/ atmosphere 14 p2335 A66-27776

Physical factors determining hardening of nimonic type alloy with high niobium content, discussing formation of intermetallic phase 23 p4080 A66-41385

Biological effect of atmospheric conditions and physical and psychological factors on living organisms 24 p4165 A66-43134

PHYSICAL FITNESS**SA FLIGHT FITNESS****SA MUSCULAR STRENGTH**

Comparative physical performances of naval aviator trainees from various procurement sources and under two different syllabi 03 p0327 A66-12354

Physical atrophy prevention in protracted weightlessness, discussing physical fitness maintenance during space flight 04 p0465 A66-14072

System costs and pharmacological techniques as function of exercise program designed to maintain space crew physical fitness 07 p0999 A66-17658

PHYSICAL OPTICS

Combination of geometrical and physical optics with modern system design such as computers, cameras for aerial use, space tracking, etc 09 p1403 A66-20918

Extended physical optics methods for calculating nose-on echo area of axisymmetric thin bodies having sharp apices 10 p1500 A66-21617

Physical-optics solution for backscattering from concave ring singularity 20 p3521 A66-38364

Optical properties of plane and aspherical diffraction gratings having unequal spacings of ruling, examining possible use in 50 to 500 angstrom wavelength 21 p3771 A66-39128

PHYSICAL PROPERTY

Titanium alloys as basic structural material for supersonic transport noting strength, corrosion resistance, fatigue, etc [SAE PAPER 650789] 01 p0088 A66-10814

Physical properties of uncommon noncrystalline amorphous silica, alumina, magnesium fluoride and gold-silicon alloy examined for identification as glasses [ACS PAPER 20-G-64F] 02 p0248 A66-11295

Physical properties of 181 glass cloth laminates of diallyl orthophthalate and isophthalate in high temperature range 02 p0248 A66-11689

Physical characteristics pointing differences between solid state urethanes and conventional rubbers, noting fabrication information and tooling application [ASME PAPER 65-WA/RP-7]

05 p0690 A66-15630
Effect of varying strain rate on physical properties of bone and muscle tissue, measuring load and time displacement with constant-velocity compression test machine [ASME PAPER 65-WA/HUF-9]

05 p0626 A66-15699
Physical properties of dense supercritical fluids composed of spherical molecules, noting spatial correlation 06 p0909 A66-16700
BeO properties and relationship to microstructure and fabrication variable 07 p1051 A66-18297
Interrelationship among fabrication procedures, microstructure and properties of ceramic materials, noting dependencies on porosity, grain size, temperature, pressure, etc 07 p1054 A66-18500
Fabrication and properties of translucent bodies of hot-pressed alumina, beryllia and magnesia with data on density, microstructure, thermoconductivity, etc 07 p1054 A66-18502
Average heat of atomization in correlating physical properties of vitreous semiconductor 08 p1268 A66-18655
Physical, thermal, electrical and optical properties of beryllium 08 p1238 A66-18849
Super chromium steel survey, including applications in gas turbines and aerospace industries, physical and mechanical properties, thermal stability, corrosion resistance, etc 09 p1387 A66-19953
Tabulation of physical properties of noble metals 09 p1388 A66-20254
Preparation and physical properties of polytetraacyanoethylene /TCNE/ copper chelate film, noting electric conductivity and heat treatment effect 10 p1574 A66-21348
Improving uncoupled Hartree-Fock expectation values for atomic and molecular properties 11 p1738 A66-22877
Linear heat conduction in metals with temperature-dependent physical properties and constant illumination 11 p1787 A66-23264
Physical properties of six III-V semiconductors /InSb, InAs, InP, GaAs, GaSb and AlSb/ 12 p1928 A66-23945
Resin compacts prepared by high temperature compression of hardened resins mixed with unhardened resins, noting strength, thermal behavior and physicochemical properties 13 p2113 A66-25911
Comparative calculation used in computation of physicochemical properties of hydrides, including densities of beryllium hydride, entropy of cesium hydride, crystal lattice energy of rubidium deuteride, etc 13 p2018 A66-26327
Rare earth research - Conference, Phoenix, April 1964 14 p2361 A66-27460
Chemical and physical properties of samarium dicarbide, prepared by heating samarium sesquioxide with graphite, using X-ray analysis, hydrolytic studies, etc, noting structure 14 p2362 A66-27465
Gravitational potential effects on physical properties of mass far from other mass or energy, noting Planck equation, Planck constant, etc 14 p2335 A66-27940
Semiconductor properties measurement using resonator with slit 15 p2560 A66-28639
Grease lubricants for aerospace application, determining physical properties and testing them at 400 degrees F and under high vacuum [ASLE PAPER 66AM 3C2]

16 p2711 A66-30409
Structure, bending strength, impact toughness and hardness of Wc-TaC-Co alloys with various proportions of components 16 p2724 A66-31234
Electrical resistance, thermal conductivity, thermal emf, elastic modulus, density and mechanical strength of Ti-Nb-Mo alloys 16 p2724 A66-31235
Structural and physical properties of WC-TaC-Co and WC-NbC-Co alloys studied by metallographic, electrochemical and X-ray methods 17 p2939 A66-31970
Harvard Radio Meteor Project observations of physical characteristics of small radio

meteors 17 p3002 A66-32525
Measurements on physical and laser properties of vapor-grown ruby single crystals prepared by epitaxial growth 19 p3375 A66-36081
Synthesis, purification, physical properties and electronic parameters of HgSe and HgTe semiconductors 19 p3445 A66-36318
Physical properties of DNA-dependent RNA polymerase from Escherichia coli 20 p3505 A66-37054
Physical and mechanical properties of cermets obtained by sintering powdered iron at high temperatures under dynamic impact compression 20 p3583 A66-37413
Niobium alloys properties noting effect of molybdenum and titanium additions 20 p3585 A66-37749

PHYSICAL SCIENCE

Theoretical and experimental studies in astronomy and astrophysics, relating them to physical and mathematical sciences 02 p0285 A66-11296
Relationship between biology and physics 18 p3060 A66-34454

PHYSICAL WORK

Effects of chronic hypohydration on responses to tests of bodily functions, defining set points and mechanisms involved in changes in work performance 09 p1337 A66-20528

PHYSICS

SA ASTROPHYSICS
SA BIOPHYSICS
SA CLOUD PHYSICS
SA COMBUSTION PHYSICS
SA ELECTRONICS
SA GEOPHYSICS
SA LOW TEMPERATURE PHYSICS
SA NEUTRON PHYSICS
SA NUCLEAR PHYSICS
SA PLASMA PHYSICS
SA POLYMER PHYSICS
SA PSYCHOPHYSICS
SA REACTOR PHYSICS
SA REENTRY PHYSICS
SA SOLAR PHYSICS
SA SOLID STATE PHYSICS
SA THEORETICAL PHYSICS
Book on problems of mathematical physics noting integral transforms, curvilinear coordinates, integral equations and other solution techniques 10 p1556 A66-21766
German Physical Society, Physics Session, Frankfurt am Main, October 1965 10 p1556 A66-22052
Similarities and differences between physical and mathematical measurement [PST PAPER NT-148] 14 p2335 A66-27839
Book on methods in computational physics including numerical simulation of Earth atmosphere, computation of propeller design and stellar evolution, etc 16 p2735 A66-30942
Kapitza papers, Volume 2, 1938-1964 20 p3603 A66-37833
Necessity of fitting causality concept to new experimental techniques 21 p3769 A66-38631
Two-body problem in Maxwell-Einstein theory 23 p4090 A66-41175

PHYSIOCHEMISTRY
SA BIOCHEMISTRY
High temperature crystallization processes and physicochemical properties of lithium aluminosilicate glass 12 p1900 A66-24859
Physicochemical methods of creating life support systems in spacecraft cabins 24 p4169 A66-43143

PHYSIOLOGICAL ACCELERATION
Internal organ injury mechanism of cats subjected to severe vertical sinusoidal vibration and observed by high speed X-ray cinematography 09 p1335 A66-20525
Neuronal spike populations and EEG activity in chronic unrestrained cats, noting multiple unit responses of acceleration/inhibition during behavioral conditioning procedures 24 p4169 A66-43098

PHYSIOLOGICAL FACTOR
Physiological and performance determinants in manned space systems - AAS and HFS Symposium, San Fernando Valley State College, Northridge, California, April 1965 06 p0816 A66-16234
Mechanical and physiological factors involved in design, testing and operation of ejection seats, examining effects of short duration acceleration 10 p1493 A66-22126

Automatic device for reversible hypothermia in living organism, considering parameters of physiological functions, included in logic circuits 15 p2444 A66-29498
Psychophysiological factors which influence performance of photointerpreter 15 p2504 A66-30008
Aerospace Medical Association, Scientific Meeting, Las Vegas, April 1966 17 p2853 A66-32134

PHYSIOLOGICAL INDEX

Swedish Air Force personnel testing for somatic classification, appraising body dimensions, muscular capacity, endurance index, etc 04 p0471 A66-14087

PHYSIOLOGICAL PHENOMENON

Basic physiological oculomotor mechanisms that make human image stabilization possible, examining flight disturbance effect on system stability 01 p0019 A66-10607
Mathematical model for otolithic organs used to analyze human spatial orientation 01 p0018 A66-10785
Mathematical representation for transport phenomena in living organism 13 p2011 A66-26578
Physiopathological phenomena of space flight stresses, especially weightlessness 22 p3856 A66-40506

PHYSIOLOGICAL RESPONSE

SA BIOLOGICAL EFFECT
SA PATHOLOGICAL EFFECT

Physiological test results on cosmonauts during Voskhod I and II flights including electrocardiograms, electroencephalograms, pneumograms, blood tests, spacesuit parameters, etc 01 p0017 A66-10416
Hematological changes in seven healthy young males subjected to intense heating transients 01 p0017 A66-10611
Physiological testing under simulated reduced gravity conditions with subject suspended and performing exercises on inclined treadmill 02 p0186 A66-11644
Dynamic environmental influences on man during space flight covering force fields, inertial forces due to acceleration and methods of protection 04 p0466 A66-14074
Soviet biological and physiological investigations in rockets and satellites, particularly nonpathological character of physiological reactions to stress factors 04 p0466 A66-14076
Spatial orientation disturbances and vegetative disorders occurring in cosmonauts during space flight due to disturbances in physiological interplay of sensing mechanisms governing space perception 04 p0468 A66-14084
Astronaut physiological responses to space flight conditions measured for clinical or experimental purposes 04 p0471 A66-14091
Gravitational influence on living organisms studied by klinostat principle 06 p0811 A66-16061
Human thermal comfort prediction in oxygen-nitrogen atmospheres 06 p0817 A66-16235
Spacecraft design influenced by man in capacity as designer and crew member 06 p0818 A66-16248
Book on physiological and medical observations on cosmonauts Bykovskii and Tereshkova during simultaneous flights in Vostok V and VI spacecraft 06 p0820 A66-16917
LF and infrasonic noise effects on mans cardiac rhythm, hearing, vision, motor control, spatial orientation, speech and subjective tolerance 07 p0999 A66-17656
Effect of extremes in magnetic environment on physiological behavior 08 p1174 A66-18585
Biological changes due to microwave absorption, examining energy losses due to ion conductivity and dielectric losses due to polarization relaxation in water molecules 09 p1336 A66-20931
Anoxia effect on central nervous system in forms of personality, vision and consciousness impairment 10 p1489 A66-22114
Anoxia induced changes in normal cellular metabolism as evidenced by oxidation-reduction system, lactic acid and glucose content and nerve conduction 10 p1489 A66-22115
Positive /headwards/ acceleration effect on vision, cardiovascular system, respiration,

kidneys, brain wave patterns and total performance 10 p1490 A66-22123

Negative acceleration physiological effect, discussing heart, blood pressure, respiration, vision, etc 10 p1490 A66-22124

Transverse acceleration physiological effect, discussing cardiovascular system, respiration, body position, etc 10 p1490 A66-22125

Mechanical forced vibrations encountered in aviation, assessing physiological and neurophysiological effects including visual acuity 10 p1493 A66-22128

Human and animal study of physiological and neurophysiological responses at different intensity levels and short periods of gravitational field 11 p1641 A66-22482

Physiological reactions to long periods of weightlessness beyond operational possibilities 11 p1642 A66-22484

Effects of water immersion, recumbency and activity without negative breathing pressures, measuring heart rate and blood pressure with and without tilting 11 p1642 A66-22573

Physiological reactions of human body to transverse acceleration, examining means of increasing organism resistance to these effects 11 p1643 A66-22575

Pre- and postflight medical examinations of Voskhod I cosmonauts 11 p1645 A66-23049

Extraneous stimulation effect on vigilance performance investigated by repeated threshold measurement 11 p1646 A66-23372

EEGs of monkeys stimulated cyclically by whole-body vibration, plotting coherence functions relating brain records to acceleration records 12 p1806 A66-24228

Physiological stress and fatigue in aerial missions for forest fire control, noting in-flight and postflight exercise heart rate 12 p1810 A66-25009

Continuous exposure of rats to 100 percent oxygen at 450 mm Hg for 64 days shows no physiological effects 12 p1807 A66-25013

Holtzman strain experiments on rats, determining if electrical stimulation of various neural sites produce motivational consequences of appetitive or defensive behavior 13 p2009 A66-25790

Preflight medical tests of responses of Soviet cosmonauts Beliaev and Leonov to simulated weightlessness and performance during simulated space walk 13 p2009 A66-25889

Human reaction to noise under various simulated acoustical conditions of space cabin 13 p2015 A66-25890

Cardiac and respiratory changes in spacemen under light physical strain during Voskhod I orbital flight 13 p2010 A66-25891

Physiological responses of astronauts Komarov, Feoktistov and Egorov during 24-hour orbital flight 13 p2011 A66-26229

Vegetative responses of human organism to angular, linear and Coriolis accelerations 13 p2011 A66-26230

Effect of unilateral renal vasodilatation on sodium excretion by infusing acetylcholine into renal artery of dogs 14 p2227 A66-26793

Physiological differences between air and low pressure oxygen atmospheres, discussing role of nitrogen in respiration 14 p2228 A66-27474

Adrenocorticotrophin-releasing hormone appears in peripheral blood of rats under physiological stress, noting role of pituitary gland 14 p2228 A66-27811

Individual differences in performance of vigilance task 14 p2228 A66-28480

Random lighting exposure effects in rats and changes caused in adrenal cortical function, circadian rhythm, endocrine system, group running activity, etc 15 p2429 A66-28487

Astronaut training based on environmental factors, rated efficiency and physical and mental condition 15 p2443 A66-29441

Physiological and biochemical tests on men subjected to isolation and hypokinesia 15 p2434 A66-29443

Nervous activity increase, EEG, EKG, gas exchange, respiration, urine, blood pressure, oxygen content and morphological state of humans after prolonged pressure chamber confinement 15 p2443 A66-29444

Human otolith and cupula system behavior under anomalous gravity

conditions 15 p2434 A66-29446

Abrupt angular acceleration effect on man, noting physiological responses such as blood pressure, EKG, EEG, cardiovascular, respiratory and nervous reactions, etc 15 p2434 A66-29447

Physiological, psychological and biochemical effects on humans after 8-hr inhalation of low carbon monoxide concentration 15 p2435 A66-29448

Resistance to hypoxia by individuals at height of 1650 m trained for high altitude climbing, noting equipment 15 p2435 A66-29449

Physiological functioning of monkeys under restricted mobility noting appetite, orientation reflexes, bioelectrical activity of brain, etc 15 p2436 A66-29470

Rotations effect on functional state of human cardiovascular and respiratory systems at various angles of inclination of torso 15 p2437 A66-29476

Effects on white mice of exposure to oxygen-enriched air, noting biological and physiological observations 15 p2439 A66-29493

Toxic and lethal effect on mice of ammonia in air, noting biological and physiological changes 15 p2439 A66-29494

Experimental research into olfactory code, noting psychological and physiological analysis, suggesting specific chemically sensitive molecules role 15 p2441 A66-29650

Daily physiological rhythm changes associated with light intensity and color, noting body temperature oscillations vs light intensity, heart rate changes, etc 15 p2441 A66-29959

Full pressure suit design for high altitude and space missions, discussing material selection, physiological requirements, etc 16 p2642 A66-30462

Cardiovascular measurement on anesthetized dogs subjected to vibration, noting recording techniques, instrument sensitivity, etc 16 p2642 A66-30622

[AIAA PAPER 66-442] Physiological factors in decompression sickness, noting recompression, plasma replacement, etc 16 p2638 A66-30624

Short-term starvation effect on gastric mucosa of weanling vs post-weaned rats 16 p2638 A66-30636

Portion of human vestibular system response determined through eyeball counterroll measurement, noting experimental techniques and methods of computing results 16 p2639 A66-30807

Physical and biological blast effects from explosive fragmentation of gaseous nitrogen flight pressurized Atlas missile without propellants 16 p2810 A66-30897

[AIAA PAPER 65-195] Hypoxia and lower body negative pressure effects on blood volume, and orthostatic and physical tolerance after four weeks of hypoxic bed rest 16 p2640 A66-31124

Comparative insulative properties of wet and dry type immersion protection flight clothing 16 p2643 A66-31127

Blood pressure and heart rate during hypothalamic self-stimulation in dogs, discussing experimental methods and results, physiological response, etc 16 p2640 A66-31154

Stimulus coding in cochlear nucleus, noting different discharge patterns of units in different subdivisions 16 p2641 A66-31187

Immobilization effect on monkeys noting influence on calcium, phosphorus and nitrogen metabolic balance 17 p2855 A66-32140

Mechanical impedance of human body subjected to vibration combined with various magnitudes of linear acceleration 17 p2863 A66-32154

Altered physiologic function of dogs produced by exposure to pulsed microwaves including study of combined effect of X-irradiation 17 p2856 A66-32156

Oxygen consumption of rabbits decreases in proportion to inert gas concentration dissolved in tissues 17 p2857 A66-32174

Stress in spacecraft crew members measured using parotid fluid, noting relationship between biochemical variables under stress and nonstress conditions 17 p2866 A66-32196

Serum glucose and free fatty acids in man

during prolonged exercise 17 p2859 A66-32366

Physiological reactions of astronauts to acceleration of Voskhod spacecraft characterized by greater emotional stress than during centrifuge simulation 17 p2861 A66-32936

Vibration exposure of mice 4 and 24 hours prior to irradiation tends to lessen mortality and increase mean longevity 17 p2861 A66-32938

Human physiological and psychological characteristics effects on design of mobile lunar laboratory /MOLAB/ 17 p2904 A66-32944

Adaptive responses of adrenal cortex to some environmental stressors, exercise and acceleration 17 p2862 A66-33093

Change pattern in human cerebral blood flow during time immediately following initiation of carbon dioxide inhalation 18 p3056 A66-33691

Human renal response to 56-day exposure to oxygen-helium atmosphere at 258 mm Hg total pressure 18 p3057 A66-33770

Human blood enzyme response to 56-day exposure to oxygen-helium atmosphere at 258 mm Hg total pressure 18 p3057 A66-33771

Exercise performance and cardiovascular response of man exposed for 56 days to oxygen-helium atmosphere 18 p3057 A66-33772

Urinary excretion of steroids and catecholamines as measure of emotional stress of man in 56-day exposure to oxygen-helium environment 18 p3057 A66-33773

Medical problems of weightlessness 18 p3059 A66-34365

Arterial blood pressure, visual accommodation power, vital capacity and body weight of pilots and tower controllers 18 p3059 A66-34407

Effect of head-to-foot accelerations of up to 10 g on rabbits, noting changes in ECG, EEG, brain histology, etc, leading to ischemic conditions 18 p3060 A66-34408

Human performance in space simulation chambers and physiological limitations 19 p3288 A66-35838

Rapid decompression effects on dogs and subhuman primates, studying physical and physiological responses after loss of consciousness and recompression effects 19 p3285 A66-35839

Limits of human performance and interaction of man and machine 19 p3292 A66-36179

Primary shift of phase of circadian periodicity effected by time displacement for physiological functions 19 p3285 A66-36374

Air ionization effect on vigilance task performance, noting smaller decrement for environment containing negative ions 20 p3504 A66-36933

Amplitude and wave shape of averaged evoked responses in awake animals including man 20 p3505 A66-37055

Book on physiological responses of healthy mammals to natural changes or extremes of physical environment, considering heat, cold, light, atmospheric pressure and water 20 p3505 A66-37253

Operant conditioning of single unit responses, considering hippocampus and midbrain tegmentum 20 p3506 A66-37601

Dissociation of rhinencephalic or thalamic self-stimulation and epileptiform activity in rats 20 p3506 A66-37602

Dynamic characteristics of muscle, discussing effect of contraction and force developed on state of activity in terms of force velocity diagrams 20 p3507 A66-38100

Cosmic radiation and space flight effects on lysogenic bacteria and human cells in culture 21 p3700 A66-39315

Supersonic transport radiation hazard theoretically analyzed, including physiological aging, increased genetic burden and status of fractional cell lethality 22 p3854 A66-39798

Response patterns to tone-burst stimulation of cochlear nucleus and dependency on stimulus parameters 22 p3855 A66-40375

Fracture mechanism of traumatic lesion caused by seat-ejection or bail-out from F-104 G aircraft and worsened by ground

- impact 22 p3858 A66-40503
Physiological and mechanical effects of radial accelerations on brain temperature of dog and rabbit 23 p4026 A66-41336
Perceptual masking and enhancements of two flashes in evoked cortical potentials recorded by electroencephalography 23 p4029 A66-41549
Square-wave electropulse evaluated as more effective tactile stimulus for cross modality comparison of reaction times than more traditional stimuli 23 p4030 A66-41576
Physiological disturbances caused by action of prolonged accelerations on human organism, examining methods of increasing maximum g force tolerance 24 p4166 A66-43136
Physiological and biomechanical reactions of humans exposed to action of g forces, examining effects of impact acceleration 24 p4166 A66-43137
- PHYSIOLOGICAL TELEMTRY**
Telemetering information from within body of animals and man, using tiny transmitters called endoradiosondes 04 p0469 A66-13370
Telemetric Universal Sensor /TELUS/ describing measurement, processing and control of biological data from terrestrial and aerospace sources [ISA PREPRINT 1.2-2-65] 05 p0683 A66-15506
In-flight measurement, describing human pulse wave velocity detection system principles, design and application [ISA PREPRINT 1.2-4-65] 05 p0638 A66-15509
Spacecraft crew monitoring system for evaluating performance capabilities and physiological state 06 p0818 A66-16241
FM/AM temperature telemetering system for unrestrained intact ruminants, discussing design, fabrication and application 06 p0820 A66-16853
Microcircuit internal medical sensors with high electronic gain and lower sensitivity transducers 11 p1647 A66-22298
Miniature long-life telemetry system for implanting in animal to study deep body temperature 11 p1649 A66-23499
Physiological study and instrumentation of pigtail Macaque under extended exposure to near-zero gravity 13 p2014 A66-25514
Automatic systems for diagnostic medical tests onboard spacecraft, using algorithms given in matrix form 15 p2444 A66-29462
Electroencephalograms, cutaneous galvanic reactions and electrooculograms of Nikolaev, Popovich, Bykovskii and Tereshkova as recorded during space flight 15 p2436 A66-29463
Biological and medical tests during training and flight of Russian astronauts 15 p2436 A66-29464
Physiological reactions of Russian astronauts under prolonged weightlessness, noting motor activity, heart and pulse beat, breathing rates, arterial pressure, etc 15 p2436 A66-29467
Soviet book on physiological methods in astronautics including collection, transmission and procession of medical information from long space flights 15 p2445 A66-29734
Physiological telemetry, using pulse duration approach for acceptable frequency response 16 p2642 A66-30546
X-ray motion picture recording of change in A-P chest diameter and heart position of five human subjects during transverse centrifuge accelerations of 5G and 10G 16 p2639 A66-31119
Biomedical equipment for manned space flight, noting characteristic requirements, specifications and design 17 p2862 A66-32139
Space cardiology, discussing methods of biological telemetry such as ECG, seismocardiography, kinetocardiograph, arterial oscillography, etc 18 p3059 A66-34364
Biological telecommunication, discussing application of microtelemeters for measurement of physiological processes and responses in animal and human subjects [ASME PAPER 66-MD-27] 21 p3700 A66-38483
High impedance electrode technique for large-scale flight physiological data collection, emphasizing skin preparation 22 p3856 A66-39790
Radio telemetry for acquisition of Circadian rhythm data on ambulatory animal, including deep body temperature, heart rate, locomotor activity and oviposition 22 p3856 A66-39792
Bioelectric potentials in animals, investigating electrical materials, anatomical sites and means of increasing output and long-term implants 22 p3857 A66-39797
Miniaturized implantable biotelemetering transducer for study of metabolic rhythms in extraterrestrial life 24 p4167 A66-42674
Medico-biological methods based on data recording on board rockets and spacecraft and telemetering information to Earth 24 p4169 A66-43141
- PHYSIOLOGY**
SA ELECTROPHYSIOLOGY
SA ENDOCRINE SYSTEM
SA FLIGHT FATIGUE
SA GASTROINTESTINAL SYSTEM
SA HUMAN BODY
SA METABOLISM
SA NEUROLOGY
SA NEUROPHYSIOLOGY
SA PSYCHOPHYSIOLOGY
SA RESPIRATORY PHYSIOLOGY
Space phytophysiology and UV irradiation effect on photosynthesis of plants 15 p2439 A66-29488
- PICRATE**
S AMMONIUM PICRATE
- PICTURE**
SA DISPLAY SYSTEM
SA MOTION PICTURE
PCM picture transmission, pseudorandom scanning, noise, bandwidth compression and digital simulation 15 p2450 A66-28785
- PIEZOELECTRIC CRYSTAL**
Interaction between Rayleigh waves in CdS-type piezoelectric crystal and charged particle beam traveling within crystal, system becoming unstable during wave resonance in beam 01 p0125 A66-10775
Piezoelectric resistance of n-silicon as function of electric field intensity 02 p0273 A66-11713
Piezoelectric crystals and ceramics properties that affect application in electroacoustic transducers 03 p0408 A66-12408
Ultrasonic waves and electrons in piezoelectric semiconductors, noting role of acoustoelectric fields and propagating collective sound waves 03 p0408 A66-12414
Ultrasonic traveling wave amplification in piezoelectric crystals 03 p0332 A66-12415
Laser excitation in quartz of elastic modes of thick plate, suggesting energy coupling mechanisms 03 p0376 A66-12423
Possible materials for second harmonic generation and laser action discussing centrosymmetric and piezoelectric crystals and single crystal plate with alternate layers of noncentrosymmetric composition 03 p0378 A66-12940
Hole current and electron current affected by local pressure applied on emitter surface of planar-diffused n-p-n silicon transistor 04 p0558 A66-13420
Acoustic propagation at microwave frequencies discussing generation, propagation, detection and reflection experiments with quartz crystals and ZnO transducers 04 p0480 A66-13680
Various types of acceleration-sensitive transducers such as piezoelectric crystal, potentiometer, strain gauge, variable reluctance and servo force-balance accelerometer 04 p0520 A66-13900
Coherent current oscillations observed in dark conductive In-doped CdS at 77 and 300 degrees K 06 p0925 A66-16659
Metal-insulator-piezoelectric semiconductor electromechanical transducer, discussing transistor and transducer operation characteristics 06 p0883 A66-16960
Electron-phonon interaction in semiconductors, explaining electron diffusion in solid in terms of effect of electron-phonon coupling 07 p1098 A66-17824
HF acoustic amplification using parameters of conductivity, electric field strength and acoustic wavelength based on Hutson and White theory 07 p1002 A66-17825
Thermal ionization of small traps in cubic piezoelectric 07 p1105 A66-18377
Piezoresistive properties of reduced strontium titanate single crystal at various temperatures and electron concentrations 08 p1275 A66-19366
Nonlinear optical effects of third order in crystals, specifically in Hamiltonian of system containing electrons, nuclei and radiation field 09 p1387 A66-20928
Sonic instability in piezosemiconductors with negative differential conductivity 10 p1589 A66-22170
Interaction between Rayleigh waves in CdS-type piezoelectric crystal and charged particle beam traveling within crystal, system becoming unstable during wave resonance in beam 11 p1749 A66-22287
Elastoresistance coefficients for n-type cadmium telluride determined at 300 and 195 degrees K 12 p1926 A66-23713
Two propellant injector designs for plasma accelerators that minimize or avoid bearing seal difficulty, using piezoelectric element and pulsed vaporization of filament of liquid conductor [AIAA PAPER 66-241] 12 p1936 A66-24519
Ultrasonic generation and amplification in CdS crystals with barrier layer under constant drift field 13 p2159 A66-25085
Negative resistance in cadmium sulfide single crystal 13 p2162 A66-25198
Materials for acoustic and magnetic microwave delay lines, discussing thin film piezoelectric transducers and magnetoelectric mode of microwave propagation 13 p2165 A66-25519
Packaging quartz pressure transducers 13 p2084 A66-26565
Transient acoustoelectric interaction in CdS and ZnS crystals during single transit, measuring electron drift 15 p2563 A66-28758
Acoustic amplification in piezoelectric semiconductors, examining present state of the art 17 p2892 A66-32919
Changes in piezoelectric constants of cadmium sulfide crystal caused by illumination and on mechanical vibration caused by fluctuation of carrier injection from electrodes 18 p3153 A66-33613
Necessary and sufficient conditions for existence of direct and inverse piezoelectric effect in crystals and textures 18 p3153 A66-33629
Electromechanical effects of ferroelectric crystals based on thermodynamic theory 18 p3153 A66-33630
Piezoelectric voltage of barium titanate with stabilized domains 18 p3153 A66-33631
Sonic instability in piezosemiconductor with negative differential conductivity 19 p3441 A66-35784
Ultrasonic generation and amplification in CdS crystals with barrier layer under constant drift field 21 p3795 A66-38510
Mechanical-type filters used in electronic circuits including quartz filters, piezoelectric materials, metallic resonators, ceramic converters, torsion resonators and miniaturized filters 21 p3717 A66-39628
Optical deflection of light beams via Kerr effect, ultrasonic waves, piezoelectric crystals and mirror 22 p3877 A66-40293
Inconclusiveness of satellite measurements of micrometeoroid fluxes using piezoelectric microphone detectors in supporting hypothesis of cloud of dust surrounding Earth 23 p4128 A66-41213
Laue reflection method of X-ray diffraction, determining single crystal orientation 24 p4255 A66-42506
- PIEZOELECTRIC PRESSURE GAUGE**
Unsteady forces in turbomachines are due to circulation effect, blade thickness effect, wake effect and wake distortion effect [ASME PAPER 64-WA/GTP-3] 02 p0176 A66-11763
Bursting shock tube diaphragms electrically, using two piezoelectric gauges 06 p0869 A66-16947
Piezoelectric pressure pickup for measuring pressure of gases and fluids in wake of incident and reflected shock wave 21 p3738 A66-39098
Simple inexpensive pressure transducer for wave velocity measurement in shock tubes compared to thin film resistance gauge 22 p3921 A66-40900
Flextensional transducer characteristics investigated, using dynamic and thermal analysis 23 p4067 A66-41206

Piezoelectric balance for aerodynamic force measurements in hypersonic shock tunnel, discussing design, calibration and performance characteristics 24 p4190 A66-42174
Stagnation pressure, temperature and static pressure measurement in shock driven facilities, using equipment with piezoelectric crystal and fast response 24 p4207 A66-42175
thermocouple 24 p4207 A66-42175
Valve arrangement for calibrating piezoelectric shock tunnel transducers used in pressure measurements 24 p4213 A66-42823
Quartz pressure transducers improved by integral acceleration-compensation cancelling vibration noise, helium bleed isolating transducer from severe environments and piezotron lowering output impedance 24 p4213 A66-42825

PIEZOELECTRICITY

Design of wideband microwave delay line using piezoelectric semiconductor transducers with acoustic gain 01 p0038 A66-10523
Amplification theory for low amplitude traveling sonic waves propagating in piezoelectric semiconductors situated in stationary electric field 01 p0123 A66-10727
Design and fabrication techniques for high voltage impulse generation by conversion of mechanical to electrical energy, using piezoelectric ceramics 01 p0016 A66-10916
Piezoelectric probe permits ultrasonic testing of spot welds automatically and simultaneously with welding 02 p0235 A66-11687
Electromechanical hysteresis and relaxation effects in piezoelectric ceramics 06 p0927 A66-16722
Piezoelectric and acoustoelectric effects observable in tellurium crystals at temperature of liquid nitrogen 07 p1098 A66-17826
Temperature and bias characteristics of ceramics of Pb/Zr-Ti/O-3 and its families, using schematic model on reorientations of 180 and 90 degree domains 08 p1243 A66-19061
Modification of Fourier law used to obtain hyperbolic wave equations of thermomagnetoelasticity for conductors and wave equations of thermopiezoelectricity 08 p1270 A66-19113
Piezoelectric acceleration sensors and fluid interaction with spherical shell container undergoing translational oscillatory motion 08 p1228 A66-19769
Direct piezoelectric coupling to surface elastic waves by spatially periodic electrode, noting measurements in quartz plate and CdS film 10 p1533 A66-21068
Nonisothermal wave motion in nondegenerate semiconductors with charge carrier possessing scalar effective mass 10 p1586 A66-22091
Electron-phonon coupling in piezoelectric semiconductors, obtaining electric field and current density vectors for application to ultrasonic amplification 11 p1750 A66-22401
Ultrasonic piezoelectric investigation of asymmetric polarizability of barium titanate crystal 11 p1757 A66-23252
Torsional-coupler mechanical filters, particularly types with higher harmonic suppression and piezoelectric material, utilized with simple structure 12 p1845 A66-24852
Resonance frequencies during longitudinal and radial oscillations of hollow cylindrical piezoelectric elements 13 p2194 A66-25086
Piezoelectric constants of polycrystalline ferroelectrics of barium titanate type, noting dependence on ceramic sintering temperature and applied constant voltage 13 p2160 A66-25099
Influence of trapping on acousto-electric effect in piezoelectric semiconductors, noting ultrasound absorption and experimental results in cadmium sulfide 14 p2359 A66-27101
Piezoelectric plate transducer for ultrasonic wave generation and detection and analysis of responses to partly periodic and partly periodic-transient inputs 15 p2497 A66-28526
Static uniaxial compression effect measurement along /100/, /110/ and /111/ on

electroreflectance spectrum of gallium arsenide, using electrolyte technique 16 p2777 A66-30951
Magnitude of DC conductivity change in CdS by microwave phonons at liquid helium temperature explained with piezoelectric polaron effect 17 p2975 A66-31886
Quartz resonators with DT-cut rectangular piezoelements 18 p3075 A66-33633
Coupling of resonators in electromechanical filter, noting application of energy trapping in piezoelectric resonators 18 p3078 A66-34090
Magneto piezo-optical reflection in germanium observed by piezoreflection technique for direct transition 18 p3156 A66-34467
Amplification theory for low amplitude traveling sonic waves propagating in piezoelectric semiconductors situated in stationary electric field 20 p3619 A66-37664
Resonance frequencies during longitudinal and radial oscillations of hollow cylindrical piezoelectric elements 21 p3822 A66-38511
Continuous wave ultrasonic piezoelectric amplifiers at gigacycle frequencies, noting desirability of high velocity sound in active medium and unimportance of high mobility 21 p3713 A66-39467
Velocity of sound vibration in partially plated piezoelectric ceramics differs in plated region and unplated region due to piezoelectric effect 22 p3877 A66-40186

PIEZORESISTIVE DEVICE

Piezoresistive effect and application to semiconductor silicon pressure transducers, noting diffused silicon beam and diaphragm and Wheatstone bridge 02 p0228 A66-11515
Uniaxial stress effect on germanium-silicon alloyed heterojunction 03 p0410 A66-12729
Piezoresistance of doped n-type germanium, determining nature of carrier scattering mechanism in degenerate materials and modification of conduction-band edge resulting from impurity states 03 p0412 A66-13148
High strain sensitivity in CdS evaporated films, noting effects of tension and/or compression on film resistance 05 p0736 A66-14977
Piezoresistance in semiconductors, noting anisotropic effect of mechanical stresses on electrical conductivity 07 p1034 A66-17834
Stress transducer used as piezoresistive physical sensing element in structural design of plastics 13 p2077 A66-25302
Electric field dependence of piezoresistance in germanium, noting correlation with intervalley scattering in energy balance 16 p2788 A66-31778
Uniaxial compression and hydrostatic pressure effect on piezoresistance and piezo-Hall effects in n- and p-type AISB 17 p2984 A66-33153
Miniaturized piezoresistive transducer pressure diaphragm for experimental stress analysis 20 p3559 A66-37501
Infinite plate consisting of monopolar semiconductor of given thickness under effect of electric field results in change in galvanomagnetic, piezoresistance and optical properties 22 p3965 A66-40317

PIGEON

Possible sustentation of observing behavior in pigeons by stimuli of chain schedule or by stimuli correlated with passage of time in interval schedules 24 p4167 A66-42366

PIGGYBACK SYSTEM

Probability of detection of smooth satellite-launched aluminum spheres, noting orbital parameters, microwave radar efficiency, etc 14 p2391 A66-27039

PIGMENT

SA RUTILE
Photochemistry of vision including spectrophotometric analysis of rhodopsin optical density, absorbance and quantum efficiency 04 p0461 A66-13789

PILOT

SA ASTRONAUT
SA AUTOPILOT
SA JET PILOT
SA TEST PILOT
Medical history of 1056 aviators over 24-year period 01 p0020 A66-10610
Divergent vertical helicopter oscillations due to pilot presence in collective control loop and physiological response of pilot to

oscillations 17 p2843 A66-32719
Flight safety and experiences with pilots treated in West Germany military hospital 19 p3295 A66-36446

PILOT ERROR

Naval Aviation Safety Center role in reducing aircraft accidents annually, noting material and man-made accidents 01 p0009 A66-10072
USAF aircraft accidents involving ten or more fatalities 06 p0807 A66-16825
Head-Up Display superimposition of processed primary command or situation information for pilot eye strain reduction 07 p1076 A66-17795
Human factors in causation of aircraft accidents such as faulty perception, erroneous instrument reading and central nervous system malfunction 10 p1495 A66-22140
Spatial disorientation experiences of Army helicopter pilots, noting accident and incident statistics, methods of correction, etc 11 p1648 A66-22578
Added pilot work load imposed by additional commands in compensatory display reduces tracking performance in control of simulated terrain-following aircraft 12 p1808 A66-23922
Human factors in B-58 aircraft accidents, considering nose-high landing requirement, pilot fatigue and evaluation of ejection facilities 17 p2864 A66-32166
Aircraft accidents resulting from pilot errors of skill and background factors 19 p3294 A66-36439
Flying skills assessment in relation to accident liability 20 p3508 A66-36995

PILOT PERFORMANCE

SA ASTRONAUT PERFORMANCE
Lateral-directional handling qualities of large transport, examining factors involved in pilot maneuvers 01 p0101 A66-10037
Oculomotor responses to vestibular and optokinetic stimuli during eight-turn spins in jet trainer aircraft 01 p0020 A66-10612
Human transfer function for pilot response for multiaxis and multiloop problems 02 p0185 A66-11633
Task loading effect on pilot performance in computer simulated low altitude high speed flight 02 p0187 A66-11829
Human pilot behavior compared with automatic pilots in terms of adaptability, response time and reliability 02 p0187 A66-11866
Comparative physical performances of naval aviator trainees from various procurement sources and under two different syllabi 03 p0327 A66-12354
Vestibulo-ocular disorganization in aerodynamic spin, noting roll plane of skull 03 p0325 A66-12363
Experimental fixed and moving-base flight simulator investigation of generalized aircraft longitudinal pilot induced oscillations [AIAA PAPER 65-793] 03 p0352 A66-12596
Carrier landing improvements in Fresnel lens optical landing system, emphasizing compensated-meatball stabilization [AIAA PAPER 65-791] 03 p0322 A66-13228
Swedish Air Force personnel testing for somatic classification, appraising body dimensions, muscular capacity, endurance index, etc 04 p0471 A66-14087
Plane crash as result of pilots coronary disease, discussing prevention and rehabilitation 04 p0469 A66-14387
Ability of airmen to withstand exposure to supersonic transport altitudes 05 p0627 A66-15000
Flight fatigue studies, discussing parametric evaluation of crew performance on overseas flights 06 p0816 A66-16057
Supersonic commercial aircraft, discussing piloting problems such as reaction time, visual acuity reduction, etc 06 p0816 A66-16060
Three-axis acceleration control task designed to detect space flight-induced decrements in piloting skills 06 p0818 A66-16246
Profile of pattern of airsickness obtained for 1067 naval aviators in pre-solo and basic acrobatic phase of primary flight training 06 p0814 A66-16833
Interaction of pilot capabilities and

economic factors on future air transport, noting problems with SST, V/STOL, Mach 6 transport craft, etc 07 p1156 A66-17611

Utilization of computers to reduce cockpit work load, particularly in SST aircraft 07 p1003 A66-17726

Morphological characteristics and functional data in pilot trainees, noting anthropometric data and vital capacity, oxygen intake, heart rate, etc 08 p1175 A66-19084

Vestibular system response of pilot and nonpilot to banking and turning in USAFSAM biaxial 09 p1335 A66-20530

simulator Problems in pilot fitness evaluation, especially physical and emotional capability assessment for flight safety 09 p1335 A66-20533

Effects on man of direct /escape/ and indirect /aircraft flight/ movement through atmosphere, considering moderate and high-speed aerodynamic forces 10 p1488 A66-22106

High altitude visual flight environment, discussing sky brightness, instrument and runway lighting, visual fields, eye protection, etc 10 p1494 A66-22131

Visual factors in aviation, examining night vision and dark adaptation, scanning technique to locate object, glare and dazzle from artificial source 10 p1490 A66-22132

Optical and atmospheric conditions contributing to visibility loss at high altitude for high-speed aircraft approaching each other with very rapid closing times 10 p1494 A66-22134

Human factor in design of controls and instrumentation in aircraft, discussing man-machine dynamics 10 p1494 A66-22135

Effect of environmental stress on aircrew performance including failure, distraction, fear, discomfort, speed and load and combat conditions 10 p1494 A66-22136

Disorientation in flight, discussing vestibular apparatus, perception and illusion and effect on pilot performance 10 p1494 A66-22138

Clinical observations and tests of solitary confinement on neurotic pilots 11 p1642 A66-22486

Alternobaric /pressure/ vertigo severity and frequency among Swedish RAF pilots 11 p1644 A66-22584

Aircraft crew fatigue on long distance jet flights, measuring flight safety parameters such as heartbeat, pulse rate and temperature 12 p1808 A66-23753

Military flying and experimental psychology, discussing screening and training of pilots, methods employed and prediction of failure based on psychosociological model 12 p1808 A66-23805

Decreased flying ability of pilots in simulated low altitude high speed flight from 0.4 to 0.9 Mach 12 p1809 A66-23928

Helicopter pilot proficiency based on performance of separate maneuvers in primary and basic training phases 12 p1809 A66-23929

Helicopter pilot proficiency based on performance of 151 tasks in primary and basic training phases 12 p1809 A66-23930

Age, cardiac output and choice reaction time of airline, military and test pilots, attempting resolution of data discrepancy 12 p1806 A66-24397

Visual segment vs glide slope geometry 12 p1810 A66-24959

Physiological stress and fatigue in aerial missions for forest fire control, noting in-flight and postflight exercise heart rate 12 p1810 A66-25009

Flying qualities of six late-model personal-owner aircraft in visual and instrument flight [SAE PAPER 660219] 13 p1996 A66-26396

Light aircraft lateral stability augmentation system for wing leveling, noting operation and pilot performance [SAE PAPER 660220] 13 p1996 A66-26397

Psychological testing of military pilots, discussing apprehensiveness under adverse conditions such as bad weather or fatigue 14 p2229 A66-27493

In-flight pilot responses to new nongyroscopic blind flight Kenyon instrument 15 p2442 A66-28662

Medical aspects of commercial jet pilot fatigue, examining effects of socio-economic

and off-duty activities 15 p2442 A66-28665

Pilot techniques for control of passenger transport aircraft during CAT or thunderstorm 15 p2426 A66-28935

Terrain clearance during climb and descent under air traffic control 15 p2535 A66-29627

Pilot eye movement data by recording eye fixations on flight instruments 16 p2644 A66-31273

Wind tunnel, simulator and flight test results to evaluate cockpit accelerations, handling qualities and stability and control of jet transports in severe turbulence [AIAA PAPER 65-330] 16 p2634 A66-31317

Lateral-directional handling qualities of large transport, examining factors involved in pilot maneuvers 16 p2634 A66-31318

Pilot performance evaluation method based on analysis of control of aircraft attitude in fixed wing aircraft 17 p2864 A66-32162

Helicopter pilot performance evaluation method based on ability to precisely control rotor rotational velocity 17 p2864 A66-32163

British fixed-base aircraft cockpit simulator experiments, testing pilot performance when relying on windshield display as primary information source 17 p2865 A66-32182

Lifting reentry test phases and effect of pilot performance on miss distance in first manned Gemini flight, discussing spacecraft control 17 p3016 A66-32685

Helicopter landing in zero-zero weather, describing experiment in England involving landing in dense fog 17 p2844 A66-32728

Helicopter handling qualities during hover noting pilot performance, position control tasks with and without gusts, effects of stability derivatives, etc 17 p2845 A66-32734

Pilot performance and problems arising during transition from instrument to visual flight in landing approach with low visibility 17 p2952 A66-33204

Head-up display used during transition from instrument to visual contact in Category II operations based on pilot sensitivity to movement and peripheral vision 17 p2953 A66-33210

Task interruption and performance decrement of active pilots and flight crew personnel following rapid decompression 18 p3061 A66-33782

Arterial blood pressure, visual accommodation power, vital capacity and body weight of pilots and tower controllers 18 p3059 A66-34407

Emergency escape experiments using ejection seats noting rate of successful escapes, pilot injuries, minimum terrain clearance, etc 18 p3063 A66-34409

Aircrew response effects to prolonged low altitude high-speed flight vibration 19 p3287 A66-35507

Cockpit displays associated with low altitude high-speed flight, emphasizing shift toward designing around man 19 p3287 A66-35508

Aviation fatigue noting flight-time limitations, indicators of excessive fatigue, new developments related to international flights and Forest Service 19 p3294 A66-36383

Handling in hovering mode of Dornier VTOL transport aircraft with and without autostabilizer, obtaining moments about roll, pitch and yaw axis 20 p3493 A66-36879

Visual displays to aid pilot to fly, monitor and control power plant, navigational and other equipment and communicate with ATC ground stations 20 p3508 A66-36996

Pilot protection from aircraft vibration caused by atmospheric turbulence 20 p3508 A66-36997

Transfer response of pilot to steady continuous one-dimensional perturbation of lateral motion of aircraft tested in Boeing 707 flight simulator 21 p3701 A66-38932

Intermediate visual acuity testing of senior airline pilots, including separate testing of each eye with trifocal chart and artificial accommodation measurement 22 p3857 A66-39799

Helicopter trainee performance following synthetic flight training, noting flyable aircraft attached to ground effects machine 22 p3857 A66-40250

Man-machine disciplines and integrated visual display techniques in vehicle stabilization and control 22 p3945 A66-40289

Medical aspects of skill in flying modern aircraft, considering health, personal and environmental factors such as noise levels, placing of controls and barometric pressure [ICAS PAPER 66-19] 22 p3858 A66-40668

Information and failure warnings monitoring by flight crew during autopilot operation, particularly during very low visibility landing [ICAS PAPER 66-17] 22 p3945 A66-40671

Pilot dynamic response in bank angle control maneuver simulation of sidewind landing of aircraft [ICAS PAPER 66-14] 22 p3945 A66-40672

Takeoff and landings by periscope under various flight conditions, noting effect of variations in image magnification 22 p3946 A66-40859

Internal carotid artery insufficiency in neuro-ophthalmic and aeromedical implications, noting ophtho-dynametry in flight qualification 24 p4164 A66-42457

Optimization of aircraft performance, pilot performance and mission completion [ICAS PAPER 66-4] 24 p4159 A66-42492

PILOT SELECTION

Electrocardiography as related to flying personnel including case histories 01 p0019 A66-10605

Pilot-trainee selection procedures for school-leaving population, using interviews and testings 01 p0019 A66-10606

Diagnostic standards for primary glaucoma in pilots, noting use of instrument tonometry and problems connected with sudden incapacitation 06 p0814 A66-16832

Psychological tests used in selection of aircrew personnel for French Air Force 10 p1492 A66-21754

Criteria for aircrew selection, describing aptitude and performance tests used by RAF 10 p1494 A66-22137

Brief Vestibular Disorientation Test /BVD/ assesses subject reaction produced by head movements in rotating chair 11 p1647 A66-22574

Psychiatric evaluation of candidates for space mission, developing rank order of candidates and stressing empathic approach of psychiatrist 17 p2862 A66-31982

PILOT TRAINING

Comparative physical performances of naval aviator trainees from various procurement sources and under two different syllabi 03 p0327 A66-12354

Psychological stress susceptibility of naval and marine pilot trainees, examining environmental cue manipulation to control perceptions 03 p0327 A66-12355

Motion sickness history relation to attrition from flight training in Pensacola Motion Sickness Questionnaire 03 p0325 A66-12364

Kestrel P-1127 V/STOL strike/reconnaissance aircraft evaluation trials with reference to background, aircraft description, organization, pilot training and major tasks 07 p0985 A66-17268

X-15 flight problems not encountered during simulation, particularly differences in aerodynamics, control systems, cockpit equipment, etc 07 p1017 A66-17274

Marine pilot training to develop visual habit patterns as aid in reducing mid-air collision hazards 07 p0999 A66-17712

Training and selection procedures used at USAF Aerospace Research Pilot School 08 p1176 A66-18579

Flight simulators in reducing cost of flight training 11 p1687 A66-23169

Handling and operation of XB-70 aircraft, noting flight testing, folding wing tips, weight, speed, etc [SAE PAPER 660273] 14 p2222 A66-27284

Mechanism having six degrees of freedom for flight simulation in pilot training 15 p2476 A66-29635

Visual simulation device for aircraft pilot and astronaut 16 p2643 A66-30952

T-27 space flight simulator design, system performance and use for training and research at USAF Aerospace Research Pilot School [ATAA PAPER 65-265] 18 p3093 A66-33789

Test pilot training, discussing syllabus, instrumentation, schools, etc 18 p3062 A66-33948

Canadian labor market for commercial helicopter pilots 18 p3268 A66-34624

PILOTED AIRCRAFT

Reduced stiffness responses of airplane to longitudinal control, noting elevator flutter and stick-fixed dynamic longitudinal stability [AIAA PAPER 65-784] 03 p0320 A66-12594

Systems design of automatic dynamic control for piloted aircraft, discussing stability, accuracy, response and behavior to external perturbations 12 p1803 A66-24090

Reduced stiffness responses of airplane to longitudinal control, noting elevator flutter and stick-fixed dynamic longitudinal stability [AIAA PAPER 65-784] 19 p3279 A66-36485

PINCH EFFECT

Pinch effect in low pressure discharge theory, examining effect of magnetic field produced by discharge and electric field effect 01 p0110 A66-10334

Electrodynamic acceleration of cylindrical plasmoid in Marshall gun, examining effect of plasmoid pulsations on acceleration stability 01 p0113 A66-10700

Stabilization of pinch discharge in hydrogen 02 p0267 A66-11726

Nonequilibrium field effect on silicon in region of high majority carrier depletion and nonequilibrium between energy bands 03 p0410 A66-12942

Pinch effect in pumping of lasers, using neodymium-ion glass or ruby 04 p0529 A66-13433

Rayleigh-Taylor instabilities of z-pinch discharge during contraction process solved by use of snowplow model for initial phase of z-pinch 04 p0557 A66-14429

Plasma instabilities, comparing experimental and theoretical results concerning pinch effect, helical growing waves, oscillations, etc 07 p1103 A66-18215

Pinch-effect theory in electron-hole plasmas, noting power input-asymptotic axial temperature interdependence in semiconductors 07 p1103 A66-18217

Neutral point between two parallel line currents in highly conductive plasma, noting topological flux change and relation to solar flares [AIAA PAPER 66-152] 10 p1565 A66-21683

Current oscillations and microwave emission in indium antimonide subjected to high applied parallel electric and magnetic fields at 77 degrees K 10 p1585 A66-22082

Electrodynamic acceleration of cylindrical plasmoid in Marshall gun, examining effect of plasmoid pulsations on acceleration stability 11 p1747 A66-23302

Plasma confinement characteristics of stabilized pinch effect in aluminum torus 13 p2056 A66-25121

MHD instability in plasmas during pinch discharge, noting wave velocity dependence on Larmor radius, Hall effect, electron temperature fluctuations, etc 13 p2142 A66-25704

Helium-neon gas laser used to determine electron density variation, spatial and temporal, in afterglow of Z-pinch in H at 100 mtorr 13 p2104 A66-26239

Discharge in pulsed plasma source as affected by densities 13 p2153 A66-26524

Electrostatic and magnetic pinch effects in electron beam-generated plasmas 15 p2549 A66-28717

Simultaneous measurement of voltage, current, current derivative and X-ray output as function of time in low inductance flash X-ray discharge tube 16 p2706 A66-30935

Large-dimensional inverse pinch discharge study of impulsive plasma acceleration, gas dynamics and stability of unrestrained current sheet [AIAA PAPER 66-482] 18 p3141 A66-33655

Dynamics of geomagnetic tail, noting transformation of magnetic energy into kinetic energy due to pinch instability and auroral activity 18 p3106 A66-34162

Pinch effect in InSb degenerate plasma, discussing electric conductivity and recombination emission spectra 20 p3615 A66-37371

Electrical breakdown in beams of hydrogen and nitrogen produced by expanding H or N gas out of Laval nozzle cooled by liquid hydrogen or nitrogen in high vacuum 20 p3605 A66-38055

Magnetosphere tail sheet pinch model, discussing motion of particles for cases of

surface crossing 20 p3642 A66-38336

Load-supporting capacity of vertical plasma cylinder contained by axial pinch effect analyzed for applications to bearings with electrically conducting lubricants 23 p4101 A66-41293

Pinch phenomena and current distribution in coaxial plasma gun 23 p4101 A66-41295

Axial pressure asymmetry produced by Hall effect in linear pinch discharge 23 p4104 A66-41512

Electric and thermal conductivity effects on MHD instabilities in diffuse linear pinch 23 p4105 A66-41706

Finite resistivity instabilities of sheet pinch examined, using numerical analysis in terms of normal modes 23 p4106 A66-41709

MOS equivalent circuit for small signal HF operation of insulated gate field effect transistor in pinch-off mode, using differential equation 24 p4183 A66-42638

Time of confinement of hot plasma in magnetic bottle without touching material walls, examining instability types, pinch configurations, etc 24 p4246 A66-43113

PION

Analysis of 3587 tau-meson decays in emulsion stacks, comparing experimental pion energy spectra with theory 03 p0395 A66-12697

High energy interaction of nucleons with complex nuclei described by model of cascade-type nucleon and pion multiplication within nucleus 05 p0755 A66-15406

Pi-meson momentum spectra, discussing production frequency and mechanism in hundred bev range 07 p1113 A66-17537

Jet characteristics considered from viewpoint of formation of shower particles resulting from intermediate pi-pi interaction 07 p1113 A66-17542

Identification of charged fast particles in nuclear emulsions, measuring multiple scattering of protons and mesons along track with various kinetic energies 07 p1114 A66-17543

Energy spectra for nuclear-active particles and particle distribution in air showers indicate that pionization plays minor role relative to high energy cosmic rays 07 p1114 A66-17546

Neutral pi-meson production in processes involved in formation of large ionization bursts by high-energy nuclear-active particles 07 p1114 A66-17547

Origin of high energy pions, muons and photons studied from available spectral data 07 p1115 A66-17555

Mean free path for nucleon-light atom interaction changed from 75 to 90 g/sq cm affecting air shower characteristics 07 p1118 A66-17575

Collision of cosmic rays and intergalactic gas to produce neutral pions which decay into high energy gamma rays 10 p1599 A66-21106

Kinematic analysis of multiple pion production in high energy jet showers under asymmetric angular distribution 11 p1763 A66-22703

Monte Carlo method test of new formulae of pion emission in high energy jet showers 11 p1763 A66-22704

Mathematical construction of extensive air shower based on hypotheses for nuclear phenomena, noting proton-proton interaction, pion generation, etc 13 p2174 A66-25454

Pion emission in backward hemisphere in laboratory system of cosmic ray jets 13 p2088 A66-26576

Production spectrum of high energy electrons from high energy cosmic ray pion decay and proton-proton collisions 13 p2176 A66-26762

High energy cosmic ray collisional pion production spectrum and pion energy and angle distributions in CMS and laboratory frames from Landau-Milekhin hydrodynamic model of very high energy nucleon 13 p2176 A66-26763

Normal scalar nonet, K1 meson-2 pion decay, K1-K2 mass difference and S-wave pion scattering 15 p2544 A66-28946

Experimental data analysis of cosmic ray showers, secondary particle production by nucleon-nucleon collision at high energy, momentum distribution in pions and primary

energy-inelasticity relation 15 p2583 A66-29547

Electron-photon cascades caused by nuclear active component in atmosphere and on gamma rays, atmospheric absorption spectrum of primary nucleons and generation of pions 15 p2584 A66-29556

Cosmic ray measurements, muon production from decay of charged pions and kaons, muon polarization, momentum spectra, atmospheric gamma cascades and derivation of kaon/pion ratio 15 p2587 A66-29573

Muon charge ratio derived from inelastic collision model of pion production considering just average multiplicities 15 p2588 A66-29575

Most probable energy loss in silicon for pions with energies from 365 to 50 mev, examining pion beam behavior through different absorption material thicknesses 16 p2755 A66-31390

New solution method for nuclear cascade equation for nucleons and charged pions 18 p3206 A66-35105

Ionization chamber to investigate distribution of energy portion transferred to photons by nuclear active particles colliding with atomic nuclei of C, Fe and Pb 18 p3215 A66-35157

High-energy pion generation in showers produced in carbon by cosmic ray particles 18 p3215 A66-35162

Shower production by pions and protons with momenta 0.1 and 20 gev/c in thin layers of matter, determining secondary particle energies and multiplicities 18 p3216 A66-35166

Relations between primary spectrum, pion multiplicity and sea level muon spectra, using integral equations 18 p3219 A66-35190

Charge distributions in systems of nucleons and pions with given total isotopic spin and charge 18 p3219 A66-35191

Rate of stopping positive pions measured by observing decay pulses in scintillation counter, identifying events with muon and electron pulses 18 p3222 A66-35210

Large air Cerenkov counter construction and performance characteristics for use in distinguishing protons and pions in cosmic radiation in 10-45 gev energy region 23 p4072 A66-42086

High energy particle interactions initiate large ionization bursts, noting pion production 24 p4267 A66-42907

Solution method for nuclear cascade equation representing process of propagation of pions through atmosphere 24 p4270 A66-42925

PIONEER V SPACE PROBE

Interplanetary magnetic effects of solar flares recorded by Explorer XVIII and Pioneer V 03 p0419 A66-12681

Explorer XVIII continuous monitoring of vector field data deemed plausible correlation with noncontinuous data coverage of Pioneer V 03 p0419 A66-12682

PIONEER VI SPACE PROBE

Navigation for spin stabilized deep space interplanetary spacecraft such as Pioneer VI, for missions to Venus, Mars and Jupiter 14 p2329 A66-28456

Cosmic ray flare effects observed by Pioneer VI spacecraft 15 p2591 A66-30022

Comparison of magnetic and cosmic ray data of Pioneer VI with particle guidance properties of interplanetary magnetic field 15 p2591 A66-30023

Solar particle propagation in magnetic fields revealing anisotropies in proton flux analyzed from Pioneer VI space probe data 18 p3170 A66-34536

Comparison of interplanetary magnetic field measurements obtained by Pioneer VI space probe and IMP-III satellite 18 p3233 A66-34540

Interplanetary electron number density determination by Pioneer VI radio propagation experiment 18 p3233 A66-34541

Pioneer VI spacecraft design, noting performance and instrument payload 20 p3664 A66-38064

Pioneer VI MIT experimental results on interplanetary plasma 20 p3657 A66-38210

PIONEER SPACE PROBE

Magnetic design of OGO and Pioneer solar probe including data on instrumentation,

mechanical equipment, permanent magnets, test methods, etc 06 p0958 A66-15919

Motion of spinning satellite during deployment of n asymmetrical appendages, noting Pioneer spacecraft [AIAA PAPER 66-100] 07 p1140 A66-18456

Plasma wind tunnel simulation of solar wind effect on Pioneer spacecraft [AIAA PAPER 66-153] 11 p1682 A66-22208

Measurement of differential energy spectra of protons, helium nuclei and heavy nuclei by cosmic radiation telescopes mounted on POGO and Pioneer satellites 12 p1877 A66-23684

Operation results of Mariner and Pioneer telecommunication systems, including system design and future capabilities 12 p1819 A66-24609

Mission-dependent Deep Space Instrumentation Facility equipment designed in support of Pioneer spacecraft program including command encoder, computer buffer and demodulator synchronizer 19 p3315 A66-35670

Motion of spinning satellite during deployment of n asymmetrical appendages, noting Pioneer spacecraft [AIAA PAPER 66-100] 24 p4283 A66-42768

IPE

SA TUBE

Oscillations of oval pipes in incompressible-liquid flow treated by method based on Mathieu functions 08 p1313 A66-19440

Edge effect in case of finite pipe under arbitrary axisymmetrical load, determining radial displacement 11 p1782 A66-22851

Breaking pressure in pipes determined, using plastic deformation theory, approximating stress-strain distribution curve of material 13 p2207 A66-26496

Heat pipe exhibiting very high effective thermal conductivity, showing temperature distribution, boiling heat transfer coefficients, vapor temperature and pressure drop 16 p2827 A66-30914

Megaton and decamegaton dynamic pressure production by blast-type compression of thick walled pipe with core subjected to internal implosion, giving theoretical foundations /Part I/ 23 p4091 A66-41859

I/

Megaton and decamegaton dynamic pressure production by blast-type compression of thick walled pipe with core subjected to internal implosion, for case of graphite core /Part II/ 23 p4091 A66-41860

PIPELINE

Hydraulic loss decrease in complex pipeline owing to wire grating 23 p4024 A66-41798

ISTON

SA MAGNETIC PISTON

Shock formation in mixture of chemically reacting ideal gases due to piston action 18 p3100 A66-34641

Brake force acting on piston of constant-speed controller with fluid friction 21 p3698 A66-39330

ISTON ENGINE

Chamber pressure balanced piston nozzle for fast depressurization to bring about combustion quenching 08 p1281 A66-18833

Comparison of piston engine with turbojet engine, noting power-weight ratio, specific fuel consumption, performance characteristics, etc 10 p1591 A66-21392

ISTON THEORY

Stability of gas expelled by piston considering velocity, temperature and time represented as explosion with shock wave 03 p0355 A66-12694

Piston pressure gauge performance characteristics, calculating piston velocity and work and presenting viscosity coefficients for glycerine and oils 04 p0519 A66-13757

Total stopping distance calculated for various experimental conditions for solid piston motion between driver and test gases in closed shock tube 05 p0680 A66-15061

Stability analysis of freely supported thin elastic conical three-layer shell situated in potential supersonic flow 11 p1780 A66-22349

Transient response of value-controlled actuator with inertial loading to step input excitation, considering fluid compressibility 11 p1640 A66-22622

Weak plane shock waves formation by impulsive motion of piston for viscous heat conducting gas 22 p3900 A66-40383

PITCH ATTITUDE

Electron pitch distribution anomaly as observed by Cosmos V satellite, noting possible causes of phenomenon 09 p1378 A66-21009

PITCH CONTROL

HF magnetic probes for measurement of transient magnetic fields in linear pitch devices and Helmholtz coil calibration 07 p1037 A66-18491

Efficiency factors such as roll scanning methods and pitch control effectiveness in hover control system for VTOL aircraft 11 p1638 A66-23258

Functioning of pitch angle stabilizing channel of ideal autopilot for aircraft flying in turbulent conditions 11 p1734 A66-23347

Peripheral jet ground effect machine /GEM/ stability in pitch and roll 13 p1995 A66-25591

Motion equations and simulation of spin-stabilized interplanetary spacecraft closed-loop pitch control system, using low-thrust gas jet torquers with rate gyro sensors 14 p2392 A66-27881

Theoretical existence of optimum pitch giving maximum net gain for traveling wave masers, using slow wave structures 14 p2309 A66-27958

Approximate analytical solution for pitching and rolling motion near resonance of sounding rocket, using nonlinear differential equation [AIAA PAPER 66-463] 16 p2811 A66-31470

Newtonian formulas for determining pitch and roll and normal force derivatives for various types of conical and spherical bodies 17 p2838 A66-32333

Flight control system design for high performance aircraft, particularly longitudinal transient response handling qualities 19 p3278 A66-35509

Pitch modulation maneuver for spacecraft reentry [AIAA PAPER 65-317] 19 p3468 A66-35604

V-gyro pair as dual-rate sensor, examining gimbal equations for gyros 21 p3736 A66-38712

Linearized motion equations for low-altitude flight pitching stability of aircraft with control surface 21 p3696 A66-38937

Nose-down pitching of capsule crew escape system observed during track test after separation from test vehicle and due to change in capsule pressure distribution 22 p3850 A66-40603

PITCHING MOMENT

Vacuum phase and reentry phase dynamics of spinning reentry bodies [AIAA PAPER 64-470] 03 p0431 A66-12743

Change rate of pitching moment coefficient upon aerofoil correlated to deflection of flap control for application to wing reversal analysis 06 p0801 A66-16001

Generalization of Allen-Kelley slender body theory to obtain estimates of two cubic nonlinear aerodynamic damping terms 12 p1795 A66-23593

Effects of nonlinearities in lift and pitching moment curves on longitudinal motion of aircraft, comparing approximate analytical method with computer calculations 13 p1995 A66-26285

Static pitching moment coefficient determination from location of center of pressure in right circular cone, using Newtonian impact mechanics 17 p2840 A66-32494

Three-dimensional parachute dynamic stability theory 22 p3845 A66-40593

Hypersonic small disturbance theory of unsteady inviscid flow past thin wedge oscillating in pitch motion and effects of wave reflections 23 p4012 A66-41925

PITOT TUBE

Boltzmann equation for Pitot tube problem, using distribution function, deriving equations for rarefied gas flow in impact tube under hypersonic and adiabatic conditions 15 p2481 A66-29739

Pitot tube readings in viscoelastic turbulent stream, noting stress and kinetic contribution, momentum average factor, etc 17 p2906 A66-32035

Calibration of turbine flow meter on air

against pitot tube traverse, considering random scatter 19 p3362 A66-36750

Pitot tube technique for measuring velocity profiles, using Bernoulli equation in stress measurement in laminar viscoelastic flow 22 p3898 A66-40010

PITUITARY GLAND

Dipeptidyl-beta-naphthylamidase activated by chloride in extracts of rat and bovine anterior pituitary glands 13 p2010 A66-25900

Adrenocorticotrophin-releasing hormone appears in peripheral blood of rats under physiological stress, noting role of pituitary gland 14 p2228 A66-27811

Electrophysiological study of pituitary-adrenal axis activation during rapid eye movement /REMS/ in human urology patients 17 p2859 A66-32305

PIVOT

Robustness, axial alignment and low friction through limited angular excursion of pivot, noting lapping fixture and anvil assembly 24 p4218 A66-43222

PIVOTED WING

Variable sweepback wing determination of pivot position influence on aerodynamic characteristics while wing is turning, deducing lift and thrust center laws [ONERA TP 272] 02 p0175 A66-11680

PLAN POSITION INDICATOR /PPI/

Digital data handling method for air traffic control system employing plan position indicators and video correlator for radar video signal analysis 11 p1732 A66-22899

PLANCK EQUATION

Structure of universe dictated by laws of physics, correlating physical with cosmological constants, particularly in atomic physics such as unit electric charge, Planck constant, etc 05 p0718 A66-15350

Planckian black body approximation used to simulate and assign star magnitudes for nonhuman photodetector, considering relationship between star brightness and stellar spectra 07 p1003 A66-18332

Gravitational potential effects on physical properties of mass far from other mass or energy, noting Planck equation, Planck constant, etc 14 p2335 A66-27940

Black body radiation law deduced from stochastic electrodynamics 14 p2414 A66-28173

Planck entropy equation and irreversibility of radiation matter interaction for stationary isothermal gas emitting resonance lines of two-level atoms 17 p2957 A66-32044

Lorentz transformation of thermodynamic quantities, noting application of formalism of statistical mechanics, validity of Planck-Einstein equations for total energy and momentum 22 p3997 A66-39806

Radiation fronts in gas dynamics, examining flow through or behind aerodynamic shock 23 p4062 A66-42052

PLANE

SA HALF-PLANE

Complete classification of fourth-order nondecomposing curves 12 p1901 A66-23641

Continuous plane with circular inclusion with different elastic properties, giving solution in form of boundary equation in random variable 20 p3668 A66-37530

Orbital transfer and rendezvous maneuvers between inclined circular orbits, particularly bielliptic transfer with plane change, Hohmann transfer with plane change and in-plane modified Hohmann transfer 20 p3657 A66-38158

PLANE WAVE

Compressibility effect on velocity distribution and gradient at stagnation point in plane subsonic jet incident at arbitrary angle on infinite plate 01 p0007 A66-10474

Plane wave diffraction by sinusoidal network 01 p0031 A66-11074

Lossless conversion of plane laser wave to plane wave of uniform irradiance, noting planoaspheric lenses method and aberrated lens system 02 p0242 A66-12204

Reflection coefficients of plane wave field in grid-earth system, using averaged boundary conditions 04 p0482 A66-13907

Two-dimensional diffraction of plane waves by slits or strips whose width and number are arbitrary studied by exact solution of integral equations 04 p0484 A66-14095

Scattering of H-polarized plane waves by infinitely long axially magnetized cylinder of

- uniform plasma 04 p0484 A66-14100
Nonlinear interaction between plane RF wave and one-dimensional inhomogeneous multicomponent plasma slab 04 p0487 A66-14370
Nonlinear reflection and transmission coefficients of inhomogeneous plasma slab when RF plane wave is incident upon it 04 p0488 A66-14371
Propagation mode of plane waves in isotropic plastic solids, deriving tensor equations with numerical solutions 05 p0774 A66-15055
Diffraction field determined for E-polarized plane wave incident normal to evenly spaced nonsymmetrical metallic grid 06 p0838 A66-15895
Approximation technique for computing transmission and reflection coefficients for plane electromagnetic waves propagating through inhomogeneous stratified dielectric slabs 06 p0826 A66-16025
Scattering resonances on fast-wave structure 06 p0843 A66-16028
Cylindrical receiving and scattering antennas, determining current from admittance, charge distribution and near field for incident plane wave 06 p0827 A66-16036
Group properties of PDE system for one-dimensional gas flows with plane waves, using external Cartan forms 07 p1019 A66-17859
Short wave asymptotics of diffraction field at sphere for incident plane transverse waves 07 p1144 A66-18182
Exact frequency solution for steady state wave propagation for plane strain vibrations of composite hollow cylinders 08 p1310 A66-19162
Uniqueness theorem for problems of reinforcing rib on plane sound wave reflected from thin plate 08 p1257 A66-19758
Magnetic permeability effect on magnetoelastic plane wave propagation 09 p1403 A66-20579
Error assessment in antenna radiation patterns at small distances by means of collimator which shapes plane wave region 09 p1358 A66-20807
Early studies of plane wave scattering by sphere 10 p1497 A66-21587
Electromagnetic field waveforms produced by transient plane waves scattering from finite objects related to those produced by impulsive plane waves 10 p1498 A66-21599
Harmonic wave generation by EM plane wave normally incident on collisionless plasma with linear density profile 11 p1652 A66-22548
Linear polarized plane electromagnetic wave diffraction by two pairs of parallel infinite coaxial cylinders 11 p1654 A66-22645
Plane electromagnetic wave diffraction on slot and tape having magnetic and electric fields parallel to edges of slot and tape respectively 11 p1655 A66-22717
Plane electromagnetic wave scattering by conducting cylinder surrounded by hot magnetoplasma sheath 11 p1657 A66-23112
Plane wave shielding effectiveness of vacuum deposited thin films, using section of air-filled coaxial transmission line 12 p1835 A66-24142
Elastic plane wave diffraction on solid strip soldered into infinite elastic medium 12 p1968 A66-24351
Dirac equation for spin-half particles in curved space-time formulated by using Cartan calculus, applied to treatment of neutrinos in homogeneous nonisotropic universes and plane wave geometries 12 p1905 A66-24563
Exact solution of ODE for plane wave diffraction on periodically rough surface after transmission through inhomogeneous layer 13 p2019 A66-25089
Convergence of Keck-Beyer perturbation solution of nonlinear differential equation for finite-amplitude plane wave propagation in viscous fluid 13 p2060 A66-25143
Plane electromagnetic wave diffraction by narrow strip-grating, obtaining reflection coefficient via optical approximation method 13 p2021 A66-25395
Plane wave diffraction by infinitely conducting network representing diffracted electric field by Rayleigh expansion 13 p2021 A66-25457
Normally incident plane electromagnetic wave scattering by circular cylinder coated with radially stratified sheath 14 p2238 A66-27587
Photoabsorption power due to sodium interband, using orthogonalized plane wave evaluation of matrix elements in oscillator strengths 14 p2365 A66-27753
Plane wave behavior, as deduced from Mathieu function, analyzed in permittivity modulated slab immersed in medium of arbitrary constant permittivity 14 p2240 A66-27913
Plane electromagnetic diffraction by wide aperture in conducting screen immersed in anisotropic medium 14 p2241 A66-27981
Plane electromagnetic scattering by unidirectionally conducting sphere 15 p2448 A66-28573
Plane wave propagation statistics in turbulent atmosphere 15 p2448 A66-28582
Electromagnetic scattering from infinite cylinder at oblique orientation 15 p2537 A66-28976
Dielectric constant, permeability and conductivity of random media determining electric field, current, magnetic field, etc, assuming these quantities are time harmonic plane waves 15 p2451 A66-29619
Plane electromagnetic wave diffraction at two parallel circular cylinders for TM and TE polarization 17 p2879 A66-31862
Computer-derived contour plots of electric and magnetic fields for acoustic electromagnetic plane wave pulse incident on wedge 17 p2875 A66-32390
Plane wave interaction with surface waves at plasma boundary 17 p2968 A66-32541
Plane and spherical wave propagation in locking-type of materials with viscous-type of stress-strain relationship 17 p3031 A66-33077
Shock wave, plane loading and unloading wave propagation in prismatic rod with variable cross section and curvilinear stress-strain relation 17 p3031 A66-33329
Diffraction by conducting half-plane in plasma 17 p2876 A66-33427
Reflection of time-harmonic plane dilatational or shear waves from rigid or stress-free boundary of arbitrary linearly viscoelastic half-space 18 p3136 A66-35025
Bending of plane electromagnetic waves around elliptically ideally conducting cylinder of infinite length and around parallel circular dielectric cylinder, with solution as Mathieu-type series 19 p3303 A66-36064
Functional equation applied to wave scattering by infinite grating of elliptic cylinders 19 p3304 A66-36409
Perfectly conducting prolate spheroid illuminated by plane wave at arbitrary incidence with LF solution and expansion terms predicted from symmetries 20 p3516 A66-37622
Plane linearly polarized electromagnetic wave diffraction on several spheres forming linear system, showing solution of boundary value problems 20 p3603 A66-37754
Reflection coefficients of plane wave field in grid-Earth system, using averaged boundary conditions 20 p3518 A66-37865
Exact solution of ODE for plane wave diffraction on periodically rough surface after transmission through inhomogeneous layer 21 p3702 A66-38514
Geometric diffraction theory for scalar wave incident on plane screen, emphasizing normally and nonnormally incident plane waves and spherical waves 21 p3769 A66-38601
Particle acceleration by plane wave along magnetic field increased by self-induced resonance, analyzing radiation effect on particle acceleration 21 p3782 A66-39017
Plane elastic waves of finite amplitude in Hadamard materials and harmonic materials 21 p3771 A66-39274
Stationary plane shock wave stability in arbitrary media, discussing error analysis 21 p3728 A66-39317
Vacuum sheath effect on surface currents excited on plasma-immersed cylinder by EM and EK plane waves 22 p3954 A66-39940
Uniform magnetic field effect on plane acceleration wave propagation and growth in homogeneously deformed perfectly electroconductive elastic material 22 p3955 A66-40135
Stability problem of plane steady detonation wave in ideal gas 22 p3898 A66-40156
Conformal mapping technique applied to boundary value problem of plane wave diffraction by perfectly conducting elliptic cylinder, noting integral equation 22 p3866 A66-40185
Weak plane shock waves formation by impulsive motion of piston for viscous heat conducting gas 22 p3900 A66-40383
Uniqueness theorem for particular inverse problem of plane wave perpendicularly incident on long cylinder of complex refractive index 22 p3866 A66-40455
Generalized full wave theory equations derived for EM plane wave propagation through magnetotonic medium for electron collision frequencies proportional to electron energy 22 p3869 A66-40805
Monochromatic wave interaction with isotropic electron-plasma, determining field and surface wave generated on basis of Maxwell equations 22 p3870 A66-40948
Particle-in-cell (PIC) method for approximate solution of propagation and reflection of plane shock waves in dusty gases 23 p4054 A66-41158
Interference between deformed plane wave and reference wave in coherence, obtaining transfer function of objective, using holography 23 p4067 A66-41178
Plane electromagnetic wave diffraction on slot and tape having magnetic and electric fields parallel to edges of slot and tape respectively 23 p4037 A66-41455
Modified Fock function for current distribution in penumbra and shadow region of plane electromagnetic wave incident upon convex cylinder, with application to backscattering 23 p4040 A66-41637
Scattering of plane elastic compressional pulse by circular cylindrical cavity in infinite homogeneous isotropic linear elastic solid 23 p4145 A66-41984
Parabolic equations applied to nonlinear thermoconductivity and filtration, describing propagation of plane wave 24 p4230 A66-42219
Electromagnetic wave scattering by stratified medium, noting Mathieu and Floquet type wave representation 24 p4171 A66-42292
Plane stationary elastic wave diffraction by stress-free circular cylinder, noting cylindrical cavity case 24 p4175 A66-42841

SA VENUS ATMOSPHERE
Structure and composition of Mars and Venus atmospheres 03 p0426 A66-12875
Formulas for light passage through planetary atmospheres of finite optical thickness, taking into account polarization 05 p0765 A66-15415
Temperature, density and gravitational escape on Mars, Mercury, Jupiter and Venus atmospheres 05 p0768 A66-15759
Spectral distribution of albedo and luminance at center of disk for diffusing and absorbing planetary atmosphere 07 p1027 A66-17247
Atmospheres of Venus and Mars-Astrophysics Conference, Kiev, Ukrainian SSR, June 1964 08 p1293 A66-19322
Planetary atmospheres and surfaces - Symposium, Dorado, Puerto Rico, May 1965 09 p1448 A66-20101
Collisional transition between lower atmosphere and collisionless exosphere analyzed, using integral formulation of

Boltzmann equation and collision models 09 p1459 A66-20882
 Hopf analytical solution for values of ratio of gray absorption coefficients for insulating and escaping radiation /greenhouse parameter/ assumed constant at all depths, presenting temperature distribution graphs 10 p1605 A66-21204
 Remote measurement of trace amounts of vapors in lunar and planetary atmospheres as indicator of biologic and geologic surface conditions 10 p1608 A66-21532
 IR cooling rate in planetary atmospheres, noting Curtis-Godson approximation, Doppler line shape, water vapor rotation band, etc 11 p1695 A66-22264
 Ignition temperatures of powdered metals in simulated atmospheres of Venus and Mars suggest potential chemical energy sources 11 p1786 A66-22458
 Radiative transfer and imperfect scattering in planetary atmospheres from Chapman approach 11 p1776 A66-23414
 High-temperature gas radiance in simulated planetary atmosphere at various entry velocities [AIAA PAPER 66-183] 13 p1990 A66-25169
 Limitation on oxygen concentration in possible primitive atmospheres examined via physical and photochemical factors 13 p2186 A66-26122
 Heating rates in gas mixtures of planetary atmospheres predicted by equation using transport properties of gases at lower temperatures 14 p2411 A66-27432
 Numerical calculation of periods of natural oscillations and corresponding eigenfunctions of planetary atmospheres as function of planets rotational speed 14 p2381 A66-27534
 Dissociation layer heights on Venus, Mars and Jupiter, noting CO flame airglow intensities 15 p2604 A66-30050
 Spherical semipassive probe for density/altitude and pressure/altitude profile of planetary atmospheres, notably Mars and Venus 16 p2801 A66-30889
 Solar extinction measurements and interpretation of terrestrial atmosphere microwave absorption spectrum near 1-cm wavelength 18 p3105 A66-34012
 Rapid remote sensing method using IR spectrum matching for determining material composition from both terrestrial and extraterrestrial sources 18 p3111 A66-34013
 Diffuse reflection by planetary inhomogeneous atmosphere with albedo for single scattering decreases exponentially with optical depth 18 p3230 A66-34149
 Gerden type chamber for measurements of ion mobility spectrum in terrestrial mesosphere and Mars atmosphere 18 p3114 A66-34712
 Atmospheric models, comparing Chamberlain evaporative and solar breeze models, Opik and Singer evaporative model and Parker solar wind model 19 p3465 A66-36605
 Spectral study of Jupiter, Saturn and rings of Saturn, determining methane concentration in cloud layers 20 p3647 A66-37035
 Transient temperature response of transpiration-cooled porous matrix entering planetary atmosphere with constant velocity and negative entry angle 21 p3821 A66-39455
 Molecular hydrogen structure, considering planetary and stellar atmospheres and interstellar space 21 p3815 A66-39487
 Mercury atmospheric temperature, composition and surface pressure and effect of nonsynchronous rotation 22 p3980 A66-40424
 Cylindrical functions for calculating free oscillations of Saturn rings and estimation of upper limit to mass of ring if motion is stable against axisymmetric perturbations 23 p4125 A66-41063
 Planetary scale atmospheric circulations of Jupiter and Saturn using fluid dynamics, noting rotation effects 23 p4129 A66-41679
 Numerical calculation of periods of natural oscillations and corresponding eigenfunctions of planetary atmospheres as function of planets rotational speed 24 p4273 A66-42320
 Planetary atmosphere resolution spectrum noting carbon dioxide lines, radiation transfer, composition, temperatures, pressures, etc 24 p4277 A66-42667

PLANETARY CONFIGURATION

Diameter and density of Pluto determined by observation of occultations of faint stars 12 p1945 A66-23505
 Correlation between sunspots and solar tide, calculating solar tide amplitude in planet parameters 13 p2181 A66-25441
 Solar activity centers studied to establish relationship to effect of planetary tides on surface of Sun 13 p2181 A66-25448
 Fourier series convergence domain of perturbation function in restricted three-body problem representing planetary configuration 17 p2995 A66-31845
 Celestial mechanics covering two-body problem, planetary and asteroid theory, interplanetary trajectories, lunar probe, spherical harmonics, etc 17 p2997 A66-32019
 Diameter and density of Pluto determined by observation of occultations of faint stars 20 p3646 A66-37018

PLANETARY CONSTITUTION

Curve fitting technique for integration of hydrostatic equilibrium equations of planetary constitution simplified by introduction of homology-invariant variables 16 p2799 A66-30619
 Revised MARS radius estimates and internal composition 21 p3810 A66-38470
 Planetary composition, structure, origin and history in light of recent space research 22 p3978 A66-40020

PLANETARY DISK

Simultaneous passage of shadows of two Jupiter satellites across planet disk, including tabulation of dates and times of phenomenon 05 p0758 A66-14731
 Terrestrial aureole structure in daylight, twilight and night and explanation for luminous particles observed in wake of Voskhod spacecraft 19 p3347 A66-35646

PLANETARY ENTRY

Heat transfer and melting ablation about decelerating spherical bodies during planetary atmosphere entry [AIAA PAPER 65-132] 02 p0303 A66-11539
 Planetary entry trajectory control of manned vehicles for Earth and Mars atmospheres 03 p0431 A66-12741
 Spectral and total radiation studies of bodies traveling at hypersonic speed in simulated Martian and Venusian atmospheres [AIAA PAPER 65-116] 03 p0315 A66-12783
 Optimum planetary approach of vehicle when direction of correcting pulses applied to trajectory plane is determined from maximum efficiency condition of pulse 11 p1774 A66-23034
 Foreign planetary atmospheric effect on hypersonic laminar stagnation region heat transfer and skin friction studied for various dissociating gases 13 p1993 A66-26729
 Simulated Martian entry conditions in Earth test program showing requirements for launch vehicle, tracking, cost and schedule [AIAA PAPER 65-219] 14 p2392 A66-27874
 Earth reentry simulation of planetary entry environment with exponential atmospheres of Mars and Venus type [AIAA PAPER 65-218] 14 p2392 A66-27875
 Venus probe design of expandable balloon-type instrument package capable of entry into and of static equilibrium within Kaplan atmosphere 14 p2392 A66-27887
 Tension shell theory applied to Voyager mission, noting equations for lateral loading for entry at zero angle of attack, shear and bending of wall role, etc 14 p2407 A66-28027
 Second-order theory used to provide nearly exact solution for entry mechanics including solution of nonoscillating and oscillating trajectories [AIAA PAPER 66-488] 17 p3016 A66-32771
 Basic shock layer radiation data obtained in shock tube and free-flight ballistic range facilities, applicable to Venus or Mars atmosphere entry [AIAA PAPER 66-421] 18 p3046 A66-33641
 Approximate and characteristics methods to predict effect of gas composition on forces and static stability of planetary entry configurations in air and assumed Martian atmospheres [AIAA PAPER 65-318] 19 p3275 A66-35605
 Hypersonic entry vehicle measurement of Mars atmospheric density, pressure, composition, temperature and detection

spectrometry of chemical species in shock layer 24 p4277 A66-42680

Computer program for parametric analysis and trajectory simulation for axisymmetric planetary entry vehicles 24 p4283 A66-42792

PLANETARY ENVIRONMENT

SA MARS ENVIRONMENT

Life on small extinct stars and large dark planets 01 p0133 A66-10177
 Generalized dimensional analysis applied to wind distribution in planetary boundary layer, using motion equations 02 p0223 A66-11981
 Space travel and exploration covering biological and technical difficulties such as radiation, meteor impact, vehicle sterilization, etc 04 p0469 A66-13806
 Nucleic acid molecule reproduction discussing probability of life development under favorable environmental circumstances 06 p0952 A66-15915
 Planetary environments in various models 09 p1454 A66-20287
 Space travel and exploration, biological and technical difficulties, radiation, meteor impact, vehicle sterilization, etc 12 p1807 A66-23640
 Probability of planetary contamination by terrestrial life from flyby or orbital spacecraft 13 p2014 A66-25290
 Planetary model of Venus indicates clouds composed of water and ice particles 14 p2381 A66-27555
 Planetary quarantine constraints, noting prevention of Martian atmosphere contamination 15 p2441 A66-29966
 Biogenesis, chemical evolution, detection of extraterrestrial life and future automated biological laboratory to explore Mars 16 p2798 A66-30361

PLANETARY EVOLUTION

Variation of Earth-Moon distance and inclination angle of orbital planes during period of tidal evolution 03 p0427 A66-12920
 Chondritic meteorites shed light on role of oxidation-reduction equilibria in formation of terrestrial planets 08 p1291 A66-19075
 Solar system origins and planet evolution as subcondensations in differentially rotating medium, discussing orbit and spin angular momentum 12 p1946 A66-23653
 Variation of Earth-Moon distance and inclination angle of orbital planes during period of tidal evolution 14 p2380 A66-27269
 Earth-like planets, theories supporting scarcity 17 p3006 A66-33016
 Book on possibility of extrasolar intelligence covering origin of planetary systems, development of life and terrestrial biological evolution 20 p3506 A66-37305
 Tidal dissipation function in solar system, examining cases having appreciable evolution since origin of planets and satellites 20 p3655 A66-38023
 Astronomical techniques on occurrence and nature of planets outside solar system 20 p3656 A66-38027
 Book on natural evolution including origins of universe, stellar and planetary evolution, beginnings of life on Earth and development of intelligence and technical civilizations among galactic communities 24 p4163 A66-42347

PLANETARY EXPLORATION

SA MARS PROBE

Mission profile, operations facilities and science subsystem of Mariner IV 01 p0144 A66-11110
 Navigation requirements for Empire manned interplanetary missions discussing orbit determination, path corrections, sensor selection, functional systems and man-machine roles 02 p0255 A66-11317
 Orbital Launch Facility for performing launch operations of advanced planetary missions 02 p0293 A66-11620
 Mission requirements for manned flyby, orbiter and lander missions to Mars and Venus 02 p0289 A66-11621
 Space research developments over next 20 years in fields of atmospheric science and lunar and planetary exploration including exobiology 02 p0291 A66-12069
 Goals of future space exploration including atmospheric studies, solar activity effects, planetary characteristics and interstellar space interaction effects 02 p0291 A66-12071
 Orbiter injected sterilized ballistic skipout

capsule for in-flight Martian stratosphere measurements, using nonablative heat shield and outside atmospheric propulsion maneuvers
[AIAA PAPER 65-23] 03 p0431 A66-12764
Scientific research using instruments in space vehicles, noting direct observations of Moon, Venus, Mars, global communications, meteorology, geodetic and navigation satellites, etc 04 p0575 A66-13361
Planetary radar system at Venus site of NASA Deep Space Instrumentation Facility for space communications, noting continuous-wave transmitters and receivers 04 p0478 A66-13602
Zond III photographs of lunar far side taken July 20, 1965 noting Oceanus Procellarum, Mare Orientale and thalassoids 04 p0578 A66-14023
Probable interior structure of planets in solar system and Moon, based on data relative to terrestrial theory 05 p0768 A66-15760
Communications of Arizona Lunar and Planetary Laboratory, Volume 3 09 p1455 A66-20291
Scientific research using instruments in space vehicles, noting direct observations of Moon, Venus, Mars, global communications, meteorology, geodetic and navigation satellites, etc 12 p1946 A66-23639
Extraterrestrial life in solar system, discussing equipment for Mars exploration, noting Gulliver program, Multivator automatic biochemical testing apparatus and TV microscope 12 p1805 A66-23794
Laboratory payload concept of automated laboratories for planetary exploration, noting systems engineering advantages 13 p2179 A66-25237
Management of large physical systems, detailing characteristics of mission planning for Mars exploration including process optimization, computer programming, systems engineering, etc 13 p2179 A66-25238
Manned scientific exploration of Mars, noting support systems on planet surface and experiments to be carried out by two mission designs 13 p2179 A66-25240
Evolutionary manned interplanetary exploration program with modular elements used for flyby, orbital capture and Mars landing, noting influence of Apollo program 13 p2179 A66-25241
Technological, economic, natural and political considerations for manned Mars exploration in 1981 13 p2180 A66-25242
Direct and relay link communication from Martian surface station 13 p2021 A66-25250
Unmanned Mars surface roving vehicle design, system and subsystem development, telecommunication and guidance modes, etc 13 p2057 A66-25265
Space probe sterilization problems, noting methods employed, development requirements, monitoring of contamination, etc 13 p2012 A66-25266
Design and feasibility studies of Mars atmosphere probe vehicle 13 p2192 A66-25292
Pulse radar observation of Moon and four nearest planets, determining values of round-trip-delay and Doppler shift for application to orbital ephemerides 13 p2181 A66-25535
NASA plans for planetary exploration from orbital altitudes 13 p2072 A66-25602
Book on planet Venus including data on atmosphere, temperature, etc, by IR and UV spectroscopy, radio astronomy, etc 15 p2595 A66-29127
Mars and Venus exploration - Conference, Virginia Polytechnic Institute, August 1965 16 p2796 A66-30350
Weather conditions on Mars and relation to projected manned exploration 16 p2797 A66-30355
Voyager program of unmanned scientific exploration of planets, discussing Flyby, Orbiter, Capsule and Lander missions 16 p2798 A66-30360
Mariner II and Mariner IV space probes, discussing Venus and Mars observation, instrument testing, subsystem testing and design 16 p2807 A66-30363
Problems involved in manned exploration of Mars surface 16 p2798 A66-30369
Planetary-exploration priorities delineated by Space Science Board of National

Academy of Sciences in 1965 17 p3003 A66-32690
Law of outer space - Colloquium, Athens, September 1965 19 p3480 A66-36201
Space law in planetary explorations 19 p3482 A66-36211
Using Mars and Phobos to advance interplanetary flight 19 p3464 A66-36315
Interior structure of Moon and planets studied by geophysical seismic methods 20 p3647 A66-37039
Large modular assembly space station in synchronous equatorial orbit described as key in Nth country planning for orbital science applications and manned planetary missions 20 p3657 A66-38184
Unmanned exploration of solar system - AAS Symposium, Denver, February 1965 24 p4274 A66-42653
Probe experiments to study atmosphere and surface of Mars with ballistic landing vehicle 24 p4276 A66-42664
Detection of extraterrestrial biological systems, noting criteria such as radiant energy requirements for life evolution, molecular characteristics, etc 24 p4164 A66-42669
Automated biological laboratory with initial missions to Mars, noting functions operation and necessary instrumentation 24 p4167 A66-42671
Extraterrestrial life detection on Mars and limitations on terrestrial observations and flyby and landing 24 p4167 A66-42673
PLANETARY GRAVITATION
Temperature, density and gravitational escape on Mars, Mercury, Jupiter and Venus atmospheres 05 p0768 A66-15759
Venus swingby used to decelerate manned spacecraft returning from Mars 10 p1609 A66-21928
Saturn ring stability examined, using model stabilized by gravitational dilution and random particle motions 11 p1769 A66-22530
Planetary perturbation effect on solar surface 13 p2180 A66-25427
Gravitational potential of oblate planet, expressed in terms of oblate spheroidal coordinates, generalized by means of transformation of associated Cartesian system 14 p2378 A66-27111
Orbits and gravitational fields of Mars and Venus, including celestial mechanical theories, perturbations, satellites, Mars oblateness and Venus mass 16 p2797 A66-30351
PLANETARY LANDING
SA MARS EXCURSION MODULE /MEM/
Mars atmosphere definition important in advanced landing vehicle design with increased payload capability and reduced complexity 12 p1952 A66-24697
NASA sterility requirements of hardware intended to land or enter atmosphere of planet, noting design considerations, reliability, test programs, etc 13 p2012 A66-25267
Use of lift to increase payload of unmanned Martian landing capsule, discussing approach corridor and capsule design 13 p2191 A66-25271
Manned Mars entry and landing, discussing aerobraking as feasible entry mode 13 p2191 A66-25272
Problem of operational flexibility in Mars landing mission, discussing use of lifting vehicles 13 p2191 A66-25273
Engineering constraints involved in selection of Martian landing site for lander vehicles 18 p3232 A66-34367
Spacecraft design requirements for achieving successful landing on Mars 18 p3247 A66-34954
Use of lift to increase payload of unmanned Martian landing capsule, discussing approach corridor and capsule design 23 p4132 A66-41113
Spacecraft sterilization, discussing hardware development, reduction of biological loading, protection and internal and surface decontamination of lander 24 p4167 A66-42672
Conceptual design and parametric evaluation of advanced Mariner flyby bus/lander mission to Mars in 1969 and 1971 launch opportunities 24 p4282 A66-42690

PLANETARY LONGITUDE

Computation of approximate coordinates of Moon with estimation of accuracy over time interval of 50 years 02 p0292 A66-12235
PLANETARY MAGNETIC FIELD
Satellite observation of solar protons from flares in September 1963, measuring impact zone effect, differential spectrum, latitude distribution of proton energies, proton fluxes, cosmic noise absorption, etc 03 p0417 A66-12649
Position determination of equatorial boundary of abnormally high nocturnal atmospheric ionization for various levels of planetary magnetic activity 08 p1221 A66-19793
Decametric radiation of Jupiter, discussing environment of planet and properties of magnetosphere 09 p1449 A66-20102
Magnetic fields of terrestrial planets, considering Mariner II measurements of magnetic field of Venus and motions in Earth core 12 p1948 A66-24032
Planetary magnetic fields noting Earth magnetic field 20 p3648 A66-37295
Interferometric observation of flux densities of solar radio emission at 4000 mc/sec and relationship to 27-day recurrence tendency of summation of planetary 3-hour indices 20 p3634 A66-38214
Magnetic fields and trapped radiation intensities of other planets in solar system, particularly Jupiter 20 p3639 A66-38316
Magnetospheric plasma instabilities, discussing resistive, flute type, whistler and HF two-energy component electrostatic loss-cone instability 20 p3642 A66-38333
Position determination of equatorial boundary of abnormally high nocturnal atmospheric ionization for various levels of planetary magnetic activity 21 p3733 A66-38789
Structural stability of near Earth coronal corpuscular system during solar cycles, based on planetary magnetic characteristics for 1937-1958 21 p3813 A66-39126
Polarization, periodicity and angular diameter of radiation from Jupiter at 610 mc/s 23 p4125 A66-41064
PLANETARY MASS
Motions of perigee and node and distribution of mass in Moon determined by treating Sun, Earth and Moon as point masses 08 p1296 A66-19352
Approximate value of mass of Moon calculated, using noncalculus derivation of Newton modification of Kepler third law 08 p1296 A66-19380
Anomalous rotation of Uranus explained by deriving expressions relating random rotation component with masses of largest bodies falling on planet 08 p1297 A66-19455
Anomalous rotation of Uranus explained by deriving expressions relating random rotation component with masses of largest bodies falling on planet 18 p3232 A66-34484
Mass and diameter of planet Pluto determined by gravitational effects on orbits of Neptune and Uranus and photometric detection of occultations 19 p3463 A66-35945
PLANETARY MOTION
Position of planets associated with 11.1-year cycle of solar activity 02 p0290 A66-11798
Visual data of sudden changes in motion of Jupiter Great Red Spot during 1962 02 p0292 A66-12191
Mercury rotational period determined by Doppler-spread measurements 03 p0429 A66-13265
Planet Mercury rotation theory, applying motion of rigid system in inverse square field 06 p0955 A66-16732
Arecibo Observatory procedures to determine Mercury rotation 09 p1451 A66-20119
Retrograde rotation of Venus established by radar observations is attributed to collision with 200-km diam asteroid 09 p1452 A66-20122
Variational principle for free oscillations of gravitating elastic compressible sphere 09 p1456 A66-20412
Book on celestial mechanics considering Laplace-Newcombe method, Hill planet and lunar methods, periodic orbits methods, etc, using differential equations 09 p1459 A66-20916

- Final spin states of planets and satellites, deriving criteria for synchronous rotation 11 p1769 A66-22528
- Second order linear differential equation used to analyze dynamics of rotation of Mercury 12 p1949 A66-24237
- Hamiltonian mechanics applied to planetary and artificial satellite motion problems 12 p1950 A66-24402
- Motion equation for rotation of Mercury solved by asymptotic expansion 13 p2187 A66-26287
- Disappearances of Saturn rings during 1966, including table of Earth and Sun passages across Saturn plane from 1840 to 2000 13 p2188 A66-26320
- Jovian rotational effects on magnetospheric model and conditions of fluting and two-stream instability 15 p2602 A66-29952
- Radar studies of Venus, noting values for rotation vector, latitudes and longitudes of several features and Earth influence on Venus rotation 15 p2602 A66-29955
- Planetary motion representation using trigonometric series and computer evaluation techniques 17 p2998 A66-32043
- Motion of planet Pluto, noting first-order perturbations with respect to planetary mass and giving tables of Newcomb operator coefficients 17 p2998 A66-32046
- Harmonics of absolute lunar elevations, discussing stability criteria and spherical harmonic analysis of geometric figure of Moon 17 p3006 A66-33019
- Contribution of rotating solar polytropes to perihelion advance of planet Mercury calculated as function of observable solar oblateness 18 p3233 A66-34571
- Angular momentum distribution in planetary systems computed, based on mass of star and period of revolution of planet-like companion 18 p3236 A66-34891
- Mercury rotational period as consequence of solar torques and equatorial asymmetry, based on radar data and model developing superharmonic resonance 20 p3650 A66-37337
- IR observation of Mercury as evidence of nonsynchronous rotation, considering energy radiation as function of position 22 p3979 A66-40305
- Direct solution method for canonical equations resulting from elimination of terms of first-order general planetary theory 23 p4127 A66-41174
- Spin-orbit coupling in solar system, examining resonant spin rates for one-and two-body planet/ satellite systems with eccentric orbits 24 p4272 A66-42203
- PLANETARY NEBULA**
- Modified double-interval spherical harmonic method to solve Milne equation of transfer for spherically symmetric planetary nebular shell 03 p0428 A66-13111
- Enhanced intensity of forbidden lines of neutral oxygen in 28 planetary nebula spectra linked to lower ionization levels 05 p0759 A66-14874
- Book on galactic structure including distribution of common stars, solar motion, interstellar hydrogen distribution, galactic radio emission, planetary nebulae, etc 11 p1766 A66-22253
- Planetary nebulas noting observational problems, parallax, proper motion, distance, etc 11 p1767 A66-22260
- Spectrophotometric studies of double-ringed planetary NGC 3242 show strong component of nonthermal RF radiation 11 p1771 A66-22772
- Stellar evolution and origin of planetary nebulae 11 p1776 A66-23428
- 12.8-micron IR emission lines observed by Low from planetary nebula IC 418 17 p3003 A66-32656
- Planetary nebula condensation, examining stability of thermal equilibrium 20 p3649 A66-37326
- Arguments inferring that all population II red giant stars become planetary nebulae 20 p3656 A66-38050
- PLANETARY ORBIT**
- Data on planets obtained by optical and radio techniques with emphasis on space vehicle observation 01 p0133 A66-10176
- Mariner IV TV system for photographing Mars surface during flyby 01 p0073 A66-11118
- Apollo extension systems for lunar and planetary mission 02 p0288 A66-11510
- Improved orbital data for 36 minor planets 02 p0292 A66-12263
- Planetary orbits affected by rotation-induced solar quadrupole moment and effects of noncoplanarity of ecliptic and solar equator 08 p1293 A66-19267
- Orbital elements of 13 asteroids, using digital computer and taking Jupiter and Saturn perturbations into account 10 p1606 A66-21262
- Halley comet motion during return of 1910, obtaining orbits via differential correction procedures, including perturbation by all planets but Pluto 11 p1769 A66-22531
- Stable resonant spins for planet in eccentric orbit, particularly Mercury rotation, analyzing motion equation for angular position of long axis relative to inertial line fixed in space 12 p1952 A66-24968
- Stability of commensurate spin angular velocity for Venus, assuming solar tidal torque action and suggesting Venus rotation period is commensurate with synodic period 12 p1953 A66-24969
- Orbits and gravitational fields of Mars and Venus, including celestial mechanical theories, perturbations, satellites, Mars oblateness and Venus mass 16 p2797 A66-30351
- NASA Voyager project, discussing planetary orbit design and selection and Mars orbiter trajectory 16 p2808 A66-30365
- Simplified method for derivation of universal gravitation law from Kepler law of planetary orbits 16 p2747 A66-30870
- Tables of improved orbital data for 152 minor planets prepared by use of BESM-2 electronic computer 17 p2995 A66-31847
- Declinations of minor planets Vesta and Pallas according to observations on vertical circle at Goloseevo in 1954-1962 17 p2995 A66-31849
- Gravitational theory based on solar observations, noting connection between gravitational eigenvalues, planetary orbit spacing and connection with cylindrical wave functions 18 p3104 A66-33757
- PLANETARY ORIGIN**
- Solar system formation theory that planets were formed from gigantic gaseous suns as result of tidal action and loss of mass by suns 01 p0135 A66-10298
- Origin of solar system, discussing monistic and dualistic theory, interstellar gas characteristics, star formation and planetary development 05 p0767 A66-15756
- Solar system origin, evidence of chemical physical nature, diamond content of meteorites, planetary density and gravitational instability 12 p1946 A66-23650
- Solar system origin hypothesis, assuming Sun condensed gravitationally out of initial cloud of gas and dust and planets formed from dust in gas which Sun failed to capture 19 p3466 A66-36624
- Early lunar cratering, circumterrestrial swarm as hypothetical origin of planetesimals 20 p3655 A66-38026
- Planetary composition, structure, origin and history in light of recent space research 22 p3978 A66-40020
- Origin, population, orbital characteristics, surface structure and chemical composition of asteroids /meteorite type/ in solar system 24 p4276 A66-42661
- PLANETARY RADIATION**
- SA LUNAR RADIATION**
- Jupiter radio emission, with plasma waves in planet ionosphere as source of radiation 01 p0131 A66-10273
- Albedo and planetary radiation simulation to provide field angle and uniformity of intensity for thermal testing 02 p0211 A66-11217
- Design of radiation source system simulating albedo and planetary emission energy flux to space vehicle in any planetary orbit 02 p0212 A66-11218
- Spectral index of radiation from Jupiter between 178 and 610 mc/s 02 p0282 A66-11502
- Brightness temperature of Venus at 3.3-mm with correction for atmospheric attenuation 05 p0758 A66-14805
- Jupiter emission data re-analyzed, supporting Bigg finding of control by satellite X 05 p0760 A66-14946
- Decameter emission from Jupiter, discussing polarization characteristics such as direction, magnitude, measurement techniques and data 05 p0762 A66-15280
- Spectral curves of integral Martian radiation in visual region compared with curves for central continents and curves of spectral reflectivity of red-colored terrestrial rocks 05 p0765 A66-15422
- Moon structure, origin, morphology and surface properties of polarization, radio and radar wavelength-emission, etc 05 p0767 A66-15758
- Space astronomy, considering UV spectra of Jupiter and Venus, stellar energy distributions, interstellar scattering and X-ray observations 05 p0768 A66-15761
- Emission and absorption of radiant energy in model Martian atmosphere composed of 15 percent carbon dioxide and 85 percent nitrogen by volume 05 p0768 A66-15777
- Electromagnetic propagation characteristics of Venus and Mars derived from atmospheric data 06 p0831 A66-16436
- Observations concerning origin of Venus radio emission and about ionosphere surrounding planet 06 p0954 A66-16625
- Radar observations of Mars, discussing surface reflecting properties 06 p0954 A66-16731
- Radio noise emission from Venus surface explained in terms of glow discharge 06 p0957 A66-17174
- Radiation from Jupiter magnetospheric tail contributes to decametric noise 07 p1133 A66-17467
- Convective and radiative heat transfer to reentry vehicles at superorbital velocities [AIAA PAPER 66-106] 07 p1155 A66-18459
- Two-element interferometer to investigate Jupiter decimeter circularly polarized radiation 08 p1288 A66-18789
- Radiometric observation of Venus near inferior conjunction and Mars near opposition of 1965 at 430 mc/s 08 p1289 A66-18790
- Strelkov theory of radio emission from Venus attributes high temperature radiation to radioactive heating of planetary surface 08 p1294 A66-19324
- Atmospheric composition of Venus and effect on radio emission in visible and near IR spectral bands 08 p1294 A66-19325
- Mars atmospheric optical thickness and scattering from photometric observation 08 p1294 A66-19327
- Decametric radiation of Jupiter, discussing environment of planet and properties of magnetosphere 09 p1449 A66-20102
- Decametric radiation of Jupiter, discussing effect of Io satellite and asymmetrical stop zones 09 p1449 A66-20103
- Frequency and polarization structure of Jupiter decametric emission on 10-msec scale 09 p1450 A66-20104
- Interferometric examination of Jupiter decimeter radio emission, noting equipment, polarization characteristics and distribution of nonthermal emission 09 p1450 A66-20106
- Relation of Jupiter decimeter radiation intensity and polarization to distribution of synchrotron radiating electrons in Van Allen belt 09 p1450 A66-20107
- Simultaneous observations of Jupiter on three frequencies, noting phase consistency of flux variations, Faraday rotation and flux density 09 p1450 A66-20108
- Radio observations of Mercury, Venus, Mars, Saturn and Uranus compared with other observational method 09 p1450 A66-20109
- Radio observation of Mercury, Venus, Mars, Saturn and Uranus and black body temperatures of planets 09 p1450 A66-20110
- Venus radiation at 13.5 mm water vapor line and planetary brightness variation with solar illumination phase 09 p1450 A66-20111
- Radio observation of planetary and stellar emission and effects of terrestrial atmosphere 09 p1454 A66-20289
- High-resolution spectra of decametric radio bursts from Jupiter 09 p1457 A66-20470
- Radar echoes and microwave and radio emissions from Moon and planets 10 p1601 A66-21063
- Equilibrium and nonequilibrium stagnation point shock layer radiation in simulated planetary atmospheres of varying

- composition 10 p1481 A66-21773
 Millimeter wavelength brightness
 temperatures of Mars, Jupiter and Saturn
 calculated from antenna
 temperatures 11 p1769 A66-22532
 Continuum emission from Venus, Mars,
 Jupiter and Saturn at 21.2 cm wavelength,
 measuring brightness temperature to
 determine source of radiation solar activity
 effects 11 p1776 A66-23491
 Koval method for correcting distortions in
 photometric cross sections for Martian disk
 brightness distribution 12 p1944 A66-23502
 Observation of Martian radio emission at 8
 mm with PT-22 radio telescope in March
 1965 12 p1945 A66-23514
 Postdetector correlation interferometry of
 size of noise burst at decimeter
 wavelengths from Jupiter 13 p2182 A66-25552
 Brightness temperature of radio emission
 from Venus 13 p2186 A66-26034
 Scintillations of Jupiter decametric radio
 wave emission explained in terms of
 diffraction and refraction by single
 ionospheric irregularities 15 p2593 A66-28903
 Planetary albedo as affected by solar
 radiation reflected from surface of red clay
 soil or white quartz sand 15 p2597 A66-29258
 Radio astronomy applications, noting solar
 and galactical emissions, planetary radiation
 measurement, instrumentation,
 etc 17 p2998 A66-32028
 Characteristics of lunar radio emission
 considered, taking into account averaging
 effect of antenna radiation
 pattern 17 p2999 A66-32237
 Geometric albedos and phase integral of
 planet Mercury compared with
 Moon 18 p3230 A66-34153
 Venus atmosphere, surface temperature
 and radiation
 characteristics 19 p3460 A66-35799
 Growth rate of forward-sublimous-mode
 electromagnetic wave excited in helical
 stream-plasma used to calculate Jupiter
 decametric emission 19 p3463 A66-35924
 Koval method for correcting distortions in
 photometric cross sections for Martian disk
 brightness distribution 20 p3646 A66-37015
 Observation of Martian radio emission at 8
 mm with PT-22 radio telescope in March
 1965 20 p3646 A66-37028
 Higher-plant leaves survival under UV
 along and under simulated solar UV
 radiation corresponding to radiation incident
 on Mars, Earth and
 Venus 21 p3700 A66-39211
 Faraday rotation measurements of
 decimeter wavelength radiation from
 Jupiter, calculating ionospheric electron
 content 22 p3977 A66-39987
 Polarization, periodicity and angular
 diameter of radiation from Jupiter at 610
 mc/s 23 p4125 A66-41064
 Periodicities in Jupiter decametric
 radiation and methods of assessing
 statistical and physical significances, noting
 natural satellites effects 23 p4129 A66-41684
 Jupiter radiation recorded almost every
 night with antenna arrays shows emission
 dependency on Jupiter longitude and Io
 position 23 p4131 A66-41817
 Radio emission from Venus, Jupiter, Pluto
 and other planets at 1.9 cm analyzed, using
 radio telescope, noting effective
 temperatures 23 p4131 A66-41818
- PLANETARY SPACE FLIGHT**
SA FLYBY MISSION
 Study of protection requirements for
 resistance of meteorite penetration damage
 for various interplanetary spacecraft systems
 [AIAA PAPER 63059-63] 08 p1303 A66-18807
 Autonomous navigation system for space
 flight in neighborhood of
 planets 08 p1254 A66-19677
 Trajectory characteristics of high-thrust
 Mars missions and effect on other aspects
 of mission planning 13 p2179 A66-25239
 Ground system design, data processing,
 digital command and digital-human interface
 in flight operations problems for unmanned
 spacecraft on planetary exploration
 mission 13 p2190 A66-25257
 Jupiter swingby missions to outer planets
 [AIAA PAPER 66-536] 16 p2805 A66-31502
 Low energy transfer from Earth to Mars
 via Venus, considering launch window and
 planet orientation
- [AIAA PAPER 64-647] 18 p3227 A66-33812
 Autonomous navigation system for space
 flight in neighborhood of
 planets 20 p3597 A66-37269
 Asteroid belt flyby spacecraft concepts
 based on Atlas family with potential growth
 for Jupiter flyby 24 p4278 A66-42691
 Jupiter swingby missions to outer planets
 [AIAA PAPER 66-536] 24 p4279 A66-42797
- PLANETARY SPACECRAFT**
SA MARS SPACECRAFT
 Conceptual unmanned spacecraft designs
 for Jupiter exploration including flyby and
 orbiter missions
 [AIAA PAPER 65-388] 14 p2394 A66-28176
 Sterilization of planetary probes to free
 them of terrestrial
 microorganisms 15 p2443 A66-28684
 Spacecraft-cabin microatmosphere
 composition, theoretically analyzing
 applicability of helium-oxygen
 mixtures 15 p2444 A66-29459
 Environmental testing associated with
 sterilization of planetary capsule, discussing
 time vs temperature cycles and flight
 acceptance 16 p2642 A66-30493
 Test program philosophy of electric
 propulsion and power for planetary mission
 application
 [AIAA PAPER 65-67] 16 p2791 A66-30901
 Sterilization procedures for planetary
 spacecraft probes ensuring clean component
 manufacture and hardware
 assembly 19 p3288 A66-35577
 Simulation experiments to describe effects
 of measurement function nonlinearity and
 ambiguities when linear filters are applied
 in distant planet satellite orbit parameter
 estimation 21 p3766 A66-38885
 Spacecraft system concepts for mission to
 Saturn 24 p4282 A66-42692
- PLANETARY SURFACE**
SA MARS SURFACE
 Radar astronomy investigations of Venus,
 Mars, Jupiter, Mercury and Moon, discussing
 surface and rotational characteristics to
 establish astronomical
 unit 04 p0578 A66-13963
 Concepts concerning Jupiter surface
 revised following transformations observed
 since 1962 and estimation of ash particles in
 planet atmosphere 05 p0759 A66-14880
 Jovian phase variations and limb-darkening
 of surface detail examined by scanning
 isodensitometer 08 p1293 A66-19266
 Planetary atmospheres and surfaces -
 Symposium, Dorado, Puerto Rico, May
 1965 09 p1448 A66-20101
 Lunar and planetary surfaces investigated
 from thermal radiation
 standpoint 09 p1451 A66-20114
 Radar observations of Mercury, Venus,
 Mars and Jupiter surfaces 09 p1451 A66-20116
 Arecibo observations of Mars and
 Jupiter 09 p1451 A66-20120
 Muhleman radar scattering law indicates
 that surface of Mercury is similar to Moon
 in roughness 09 p1452 A66-20121
 Angular dependence of mean power
 backscattered from Moon and Venus
 indicates greater smoothness of Venus
 surface 09 p1452 A66-20127
 Lunar and planetary terrain roughness in
 terms of curvature statistics, based on
 Ranger VII and Bonita Lava Flow contour
 map analysis
 [AIAA PAPER 65-389] 10 p1610 A66-21955
 Possible luminescence effects on
 Mercury 12 p1945 A66-23558
 Nondispersive X-ray spectrometer for
 remote geochemical analysis of lunar or
 planetary surfaces 12 p1878 A66-23694
 Radar maps of Moon and planets using
 bistatic continuous wave mode of radar
 operation between orbiting spacecraft and
 ground station 12 p1825 A66-24891
 1964 results of high resolution CW radar
 spectral studies of Venus at NASA/JPL
 Deep Space Instrumentation Facility at
 Goldstone, California 13 p2185 A66-25812
 Environmental test criteria for lunar and
 planetary soils, discussing particle size, clay,
 hydrothermal alteration, cohesion, adhesion,
 vacuum and temperature effects,
 etc 14 p2387 A66-28179
 Planetary albedo as affected by solar
 radiation reflected from surface of red clay
 soil or white quartz sand 15 p2597 A66-29258
- Jupiter planetary surface observations
 show slow evolution of atmospheric
 phenomena 16 p2804 A66-31310
 Stresses in spherical planet during
 accretion due to finite deformation of
 matter and subsequent change of distance
 from center of sphere 19 p3348 A66-36260
 Hot shadows cast on Jupiter by satellites
 explained in terms of freezing of
 supercooled ammonia
 droplets 23 p4128 A66-41308
- PLANETARY TEMPERATURE**
 Planetary temperature including oceans
 and atmosphere related to types of organic
 life, gravity, specific heat and thickness of
 atmosphere 01 p0136 A66-10301
 Discrepancy between derived temperature
 for cloud tops of Jupiter and Saturn and
 expected value for model in simple
 equilibrium with solar radiation attributed
 to presence of ammonia 04 p0579 A66-14180
 Brightness temperature measurements of
 Mars at 3.75 cm from February to June
 1965 08 p1288 A66-18788
 Brightness temperature measurements on
 illuminated side of Venus at 10.6 cm
 challenges Troitski theory of planetary
 radiation emission 08 p1297 A66-19457
 Venus radiation at 13.5 mm water vapor
 line and planetary brightness variation with
 solar illumination phase 09 p1450 A66-20111
 Venus cloud layer and brightness
 temperature from radiometric microwave
 observations from nocturnal side of
 planet 09 p1451 A66-20112
 Radio observations of Mercury show
 brightness temperature of only 200 degrees
 K, with no significant variation with
 phase 09 p1453 A66-20182
 Black body disk temperatures of Mercury
 and Mars from observations at 3.4 mm in
 April 1965 11 p1773 A66-22786
 Venus surface temperature from
 microwave measurements, noting thermal
 and nonthermal radiation 14 p2386 A66-28129
 Mars upper atmosphere and single-layer
 ionosphere UV photoionization, temperature
 profile and chemical
 composition 15 p2598 A66-29417
 Thermological aspects of Martian surface
 environment based on radiometric
 temperature
 measurements 16 p2799 A66-30435
 Radio telescopic temperature
 measurements of Venus at 3.75 cm
 wavelength over full cycle of planetary
 phase angle 17 p3006 A66-33017
 Brightness temperature measurements on
 illuminated side of Venus at 10.6 cm
 challenges Troitski theory of planetary
 radiation emission 18 p3232 A66-34486
 Venus atmosphere, surface temperature
 and radiation
 characteristics 19 p3460 A66-35799
 Venus brightness temperature and
 polarization of integral radio emission at
 3.75 cm wavelength 20 p3648 A66-37044
 Thermal model of Martian surface suggests
 solid carbon dioxide composition of polar
 caps, studying diurnal and annual
 temperature variations at various
 latitudes 22 p3981 A66-40482

Microwave helicon interferometer bridge technique for studying helicon wave propagation and related transmission phenomena in semiconductor plasma 13 p2083 A66-26555

Spontaneous and induced coherent radiation from indium antimonide electron-hole plasma 16 p2721 A66-31768

Effect of injected plasma on curvilinear magnetic field, noting polarization effect 17 p2962 A66-31825

Microplasma internal parameter measurement including switch-on voltage, switch-off voltage, plasma resistance, parallel capacity and internal series resistance 17 p2896 A66-33320

Black body radiation, pressure and temperature dependences of equilibrium composition, enthalpy, specific heat and electron density of air-carbon plasmas 18 p3144 A66-34040

Polarized EM wave propagation and microwave Faraday rotation in solid state plasma in circular waveguide under strong magnetic field 22 p3964 A66-40170

PLASMA ACCELERATION

Electrodynamics acceleration of cylindrical plasmoid in Marshall gun, examining effect of plasmoid pulsations on acceleration stability 01 p0113 A66-10700

Hall currents effect during acceleration of plasma intrinsic magnetic field 02 p0264 A66-11384

Velocity and momentum of high current steady state coaxial plasma noting mass flow, exhaust velocity, thrust, arc voltage and power 02 p0267 A66-11559

Electrode erosion impurities effect on performance of coaxial plasma source in fast particle generation mode 02 p0268 A66-11778

Plasma velocity field determined from glow discharge in crossed fields propagating along rectangular channel, two walls being dielectrics and other two electrodes 02 p0268 A66-11786

Plasma acceleration in combined constant electrical and HF field 03 p0397 A66-12386

Hydrodynamic acceleration of plasma in discharge tube into which energy is released in form of Joule heat 04 p0552 A66-14154

Magnetic field interaction with ring current in plasma gun for multiple acceleration and reflection of plasmoids 04 p0558 A66-14490

Electric drive operating parameters and design, using exploding wire type device and electromagnet apparatus for plasma production and acceleration 06 p0942 A66-15917

Plasma in accelerating waveguide investigated by correlating direct and reflected waves of two microwave probes 06 p0919 A66-16888

Striation on photocans of plasma jet formed by pulse discharge in vacuum 06 p0919 A66-16889

Electron beam acceleration by means of toroidal systems in which equilibrium of beam in annular orbit is achieved by image currents in metallic coating of vacuum chamber 07 p1085 A66-17648

Electromagnetic behavior of shock waves and supersonic plasma fluxes generated in shock tubes, using cylindrical and conical discharge chambers 08 p1264 A66-19191

Resonance conditions in accelerating plasma clusters between parallel conductors in strong transverse magnetic field 09 p1410 A66-20982

Resistance effect on resonance conditions in accelerating plasma clusters of constant mass in external magnetic field 09 p1410 A66-20983

Plasma behavior in crossed stationary electric and magnetic fields, examining field dependence of ion velocity and ion and electron temperature 10 p1586 A66-21704

Variable mass plasma blob acceleration due to eroding electrodes, taking into account motion resistance of unperturbed gas 11 p1745 A66-22850

Electrodynamics acceleration of cylindrical plasmoid in Marshall gun, examining effect of plasmoid pulsations on acceleration stability 11 p1747 A66-23302

Plasma acceleration in combined constant electrical and HF field 13 p2139 A66-25391

Plasma acceleration in circular waveguides in presence of high-power electromagnetic wave 13 p2147 A66-25746

Plasma acceleration in crossed magnetic and electric fields 13 p2153 A66-26520

Plasmoid propagation in field-free space, discussing thermal expansion, velocity distribution, charged particle density distribution, energy distribution in absence of thermodynamic equilibrium, etc 13 p2154 A66-26528

Static and magnetic HF field gradient combinations for accelerating, reflecting and accumulating plasmas 14 p2339 A66-26817

Plasma discharge in three-stage device suitable for accelerating and heating of plasma 14 p2343 A66-27608

Plasma acceleration in shock tube with concentric electrodes based on snowplow model, assessing error 15 p2552 A66-29421

Interaction of plasma jets ejected from electrode spots with accelerating magnetic field as possible cause of electrode polarity effect on flat-electrode-type plasma acceleration 16 p2757 A66-30106

Hexapole magnetic field for guiding accelerated plasma injected from inductive conical theta pinch gun 17 p2962 A66-31824

Hard superconductors as generators of strong magnetic fields to accelerate plasma in energy converters and plasma propulsion systems of spacecraft 17 p2981 A66-32898

Statistical particle acceleration in turbulent plasma 17 p2974 A66-33506

Large-dimensional inverse pinch discharge study of impulsive plasma acceleration, gas dynamics and stability of unrestrained current sheet 18 p3141 A66-33655

[AIAA PAPER 66-482] Anomalous electron diffusion and ion acceleration measured in steady state low-density weakly-turbulent plasma subjected to crossed E and B fields 18 p3149 A66-34913

Acceleration, reflection and accumulation of plasma by gradients of HF and static magnetic fields at electron cyclotron resonance 19 p3426 A66-36567

Energy-and mass-spectrum measurements of ions from plasmoids from coaxial plasma source, examining plasma acceleration mechanism inside source 21 p3785 A66-39036

Increase in inductance effect on acceleration of plasma cluster in external magnetic field 23 p4100 A66-41139

Transonic flow in throat of convergent-divergent nozzle for continuous fluid acceleration from subsonic to supersonic velocities 23 p4013 A66-42015

Plasma temperature increase by randomization of kinetic plasma energy through acceleration stages, obtaining higher plasma velocities 24 p4244 A66-42888

PLASMA ACCELERATOR

Electrically conducting two-dimensional compressible flow in traveling wave plasma accelerator, noting effect of nonuniform magnetic field 01 p0115 A66-11085

Heat flux measurements and electrode temperature estimation in pulse electromagnetic plasma accelerator 02 p0265 A66-11398

Current, potential electron and atom temperature distributions between anode and cathode in low pressure crossed-field plasma accelerator 03 p0416 A66-12784

Traveling fields in interaction of ionized gases with electromagnetic field currents checking Lorentz force and magnetic induction 03 p0404 A66-12980

Effect of coil geometry and initial power upon electrodeless plasma accelerator, outlining two methods for improving performance 04 p0573 A66-13544

Electric conductivity, electrode temperature and potential distribution across channel in potassium seeded-argon atmospheric-pressure Faraday accelerator [AIAA PAPER 66-75] 05 p0723 A66-15035

Propulsion efficiency of magnetic annular arc /MAARC/ 06 p0808 A66-16251

[AIAA PAPER 66-115] Traveling magnetic wave plasma accelerator, discussing representative MHD equations, force and output power parameters and energy relations [AIAA PAPER 66-72] 06 p0942 A66-16253

Au continuous electromagnetic drive

consisting of plasma generator and radial electric and axial magnetic fields acting as plasma accelerator 06 p0942 A66-16796

MGD DC crossed field plasma accelerator capable of operating on LF AC current 08 p1262 A66-18829

Variation of electron temperature and number density, ion current density and plasma potential through low density Hall current ion accelerator as function of magnetic field strength [AIAA PAPER 66-76] 08 p1262 A66-18994

Large vacuum facility tests of MPD arc thruster [AIAA PAPER 66-117] 08 p1282 A66-19001

Lorentz force maximization in continuous-flow Hall current plasma accelerators, using either axial electric field and radial magnetic field or radial electric field and slanted magnetic field 08 p1263 A66-19154

Plasma cluster and shock wave acceleration using plasma induction accelerator with radial magnetic field 09 p1333 A66-20984

MHD plasma accelerator with circular autostable path where centrifugal force is balanced by spontaneous centripetal MHD force 09 p1410 A66-20985

Theoretical treatment of acceleration of plasma bunch by radiation pressure, using 2-mw magnetron in pulsed operation 10 p1559 A66-21350

Experimental aspects of acceleration of plasma bunch by radiation pressure, using 2-mw magnetron in pulsed operation 10 p1574 A66-21351

Magnetoacoustic wave excitation and detection in rotating plasma accelerator, noting resonance and wave transition [AIAA PAPER 66-172] 10 p1560 A66-21426

Performance and operation of one-inch-square plasma accelerator to simulate reentry velocities [AIAA PAPER 66-180] 10 p1519 A66-21430

Cylindrical traveling magnetic wave plasma accelerator investigated in terms of finite and infinite conductivity theories [AIAA PAPER 66-243] 10 p1563 A66-21454

Annular magnetic Hall current plasma accelerator 10 p1594 A66-21779

Velocity, momentum and stagnation heating measurements at exit of free jxB plasma accelerator 11 p1684 A66-22833

Two propellant injector designs for plasma accelerators that minimize or avoid bearing seal difficulty, using piezoelectric element and pulsed vaporization of filament of liquid conductor [AIAA PAPER 66-241] 12 p1936 A66-24519

Particle collection and emission spectra observation in repetitively pulsed coaxial plasma accelerator [AIAA PAPER 66-197] 12 p1936 A66-24521

Solid propellant electric thruster /SPET/ for attitude control and drift correction of space vehicles [AIAA PAPER 66-229] 12 p1937 A66-24525

Electrical propulsion of space vehicles using solar energy, electrostatic drive, drifting field plasma accelerator, etc [ONERA TP 328] 12 p1937 A66-24904

Hydrogen arcs, sulfur hexafluoride arcs, decaying nitrogen arcs and nitrogen arcs with forced convection 13 p2137 A66-25110

Optimum potential distribution in electron gun of low noise traveling wave tube calculated, using plasma wave number changes in accelerating portion of gun 14 p2236 A66-27236

X-band electron-cyclotron resonance plasma accelerator 14 p2344 A66-27967

Electron cyclotron resonance plasma accelerator design for thruster application and measuring techniques [AIAA PAPER 65-301] 15 p2572 A66-29277

Charge motion in Hf accelerator described by nonadiabatic approximation in magnetic field under action of polarized wave 15 p2553 A66-29639

Repetitive plasma breakdown in flat electrode accelerator, causing relatively low plasma velocity 16 p2757 A66-30107

Supersonic section of nondissipative sectional low density plasma accelerator, calculating two-dimensional cold plasma flow 17 p2964 A66-31894

Minimum length solution for constant pressure MHD accelerator with axial variation in conductivity and magnetic

field 17 p2968 A66-32466

Pulsating plasma column acceleration in high current pulsed accelerator 17 p2972 A66-32870

Coaxial plasma accelerator experiments, determining relation with plasma front velocity, density profile and temperature 17 p2972 A66-32871

Plasma beam action on tritiated titanium and high energy deuteron detection in mixed-field accelerator 17 p2972 A66-32953

Electromagnetic induction electrodeless plasma accelerator for thrust generation applicable to space vehicle propulsion [AIAA PAPER 66-567] 18 p3184 A66-34429

Electron-ion current partitioning effects efficiency of pulsed plasma accelerators due to viscous drag caused by ions carrying current to cathode [AIAA PAPER 65-335] 18 p3147 A66-34586

RF propagation and absorption calorimetric measurements in magnetoplasma near electron cyclotron resonance, noting power conversion 19 p3305 A66-36420

Supersonic turbulent flow in low temperature plasma accelerator with rapid boundary layer growth 21 p3693 A66-38684

Neutral mass density measurements in repetitively pulsed coaxial plasma accelerator 21 p3776 A66-38690

Large vacuum facility tests of MPD arc thruster [AIAA PAPER 66-117] 21 p3777 A66-38716

Fast plasmoid produced by coaxial plasma accelerator, examining mass and energy spectra of plasma ion component 21 p3785 A66-39035

Reentry simulation systems using MHD accelerators, technical difficulties, performance and efficiency [ICAS PAPER 66-39] 22 p3896 A66-40661

Plasma in flat-electrode accelerator, examining optimum accelerator length associated with equilibrium between acceleration processes in plasma and diffusive scattering of plasmoid 22 p3958 A66-40937

Functioning of progressive wave plasma accelerators, discussing role of electromagnetic forces 23 p4100 A66-41177

Propulsion efficiency of magnetic annular arc /MAARC/ [AIAA PAPER 65-115] 23 p4107 A66-41901

Plasma flow processes in slip type traveling wave accelerator investigated to determine degree to which one-dimensional channel flow is used in design and scaling laws 23 p4053 A66-41917

Motion of single charged particle inside plasma accelerator with static electric and magnetic fields, showing periodicity of radial motion with time 24 p4241 A66-42397

PLASMA ARC

SA ARC CHAMBER

Plasma arc tunnel tests show thermochemical heat of ablation of magnesium strongly dependent on stagnation enthalpy [AIAA PAPER 65-641] 01 p0089 A66-10225

Origin of arc in hollow anode of argon high pressure arc plasma generator shown to be not static 02 p0264 A66-11241

Argon arc stabilized by cooled walls, considering radiation calculated with aid of dependences describing transport properties of argon plasma 02 p0265 A66-11390

Performance of vortex-stabilized arc radiation source in which arc current, gas pressure, gas flow rate and nozzle diameter are prime variables 02 p0270 A66-12209

Plasma cutting preferable on stainless steel and nonferrous materials, oxyfuel cutting advantageous when using four or more torches simultaneously on thick carbon steel 02 p0236 A66-12225

Survey of experimental studies of plasma arc cutting indicating that prevention of formation of secondary arc is essential for quality cutting 03 p0374 A66-13119

Reflex arc in lithium vapor analyzed, using spectrographic, mass spectrometric and probe measuring techniques 04 p0554 A66-14293

Pressure increase in plasma of cylindrical arc column under superimposed axial magnetic field, applying corona equation 04 p0554 A66-14296

Potential distribution over arc in vortex-type plasmatron determined from voltage

data and direct measurement by electrostatic voltmeters 04 p0557 A66-14435

HF noise from electron avalanches and relation to mechanism of cold cathode arc 04 p0502 A66-14480

Plasma emission properties of vacuum spark when producing high current H and D ion beams 06 p0919 A66-16884

MHD problems associated with wall-stabilized and convection-stabilized electric arcs 07 p1090 A66-18114

Electron diffusion coefficient estimated and compared with theory for case of infinite plane parallel plasma and constant electric field 08 p1264 A66-19226

Regularities in solid substance vaporization from probe surface in plasma arc allowing quantitative control without change in atomic excitation 08 p1266 A66-19770

Radial inhomogeneity, temperature dependence and ion and atom concentration of growing luminous cloud from arc discharge 08 p1266 A66-19771

Current density distribution in MPD arc jet exhaust measured, using Hall effect sensors [AIAA PAPER 66-116] 09 p1433 A66-20089

Aluminum nitride coatings on graphite deposited by introduction of plasma-generating gas into electric arc between tungsten cathode and aluminum filament anode 09 p1392 A66-20149

High voltage vortex arc radiation source for producing reliable quantifiable plasmas, noting argon spectral distribution [AIAA PAPER 66-186] 10 p1561 A66-21434

Vacuum arc thruster experiments in development of electric propulsion system for spacecraft [AIAA PAPER 66-202] 10 p1592 A66-21444

Equations for electric arc column based on MHD equation 11 p1746 A66-23237

Split Teflon shield to delay exposure of plasma arc probe to air jet until equilibrium conditions have been attained 14 p2412 A66-27448

Thermal radiation from argon plasma arc of wall-stabilized type with Poiseuille flow, comparing experimental measurements with theoretical reentry predictions [AIAA PAPER 65-546] 15 p2551 A66-29274

Maecker-Boldt cascade arc in argon as radiance standard, noting superiority over carbon arc, especially in UV 16 p2767 A66-31698

Electron temperature and concentration in DC plasma arc determined from Thomson scattering of laser radiation 18 p3118 A66-33840

Composition, heat conduction and radiative energy transfer characteristics of hydrogen and argon plasmas produced by arc in cylindrical channel with cooled walls 18 p3142 A66-34023

Various experiments explaining fundamental properties of probes used in measurements of plasma arc columns 18 p3112 A66-34115

Atmospheric argon Poiseuille plasma arc instability in axial magnetic field examined, noting frequency and shapes of stability curves 18 p3149 A66-34916

Infiltrated tungsten materials in subsonic air and nitrogen plasma arcs with changes evaluated metallurgically 19 p3377 A66-35610

Applications of plasma jets with enclosed flames in space industry, noting design of burners 19 p3281 A66-36601

Electric conductivity of magnetically balanced arc in transverse argon flow at atmospheric pressure 21 p3777 A66-38718

Electric field intensity of helium and argon arc column as affected by pressure and current intensity 21 p3783 A66-39021

Stabilization of long high-pressure argon arc achieved by rotation of gas for radiation measurement 21 p3783 A66-39022

Aluminum nitride coatings on graphite deposited by introduction of plasma-generating gas into electric arc between tungsten cathode and aluminum filament anode 21 p3754 A66-39419

Plasma arc spraying equipment, techniques, materials and applications 22 p3922 A66-39700

Plasma arc welding of aerospace materials, comparison with TIG method, penetration of thick sections, tests, etc 22 p3926 A66-40272

- Analytical expression derived for current density of arc moving extinguishing chute by force of external magnetic field 23 p4099 A66-41057
- Temperature profiles across argon plasma arc calculated from measured radiation intensities at arc currents from 1 to 400 amp 23 p4104 A66-41495
- Discontinuity gas model for high pressure plasmas and application to DC confined arc and AC impedance 23 p4108 A66-42032
- Wave front scattering and refraction by laser spark studied by holograms of air plasma formed by giant ruby laser pulse 24 p4219 A66-42131
- High density highly ionized nitrogen flow in plasma wind tunnel 24 p4191 A66-42192
- Photometric device for measuring propagation velocity of light fluctuations in arc-heated plasma jet 24 p4212 A66-42776
- PLASMA ARC METAL SPRAYING**
- Plasma arc metal spraying techniques for deposition of thermo/oxidation protective coatings on refractory metals 19 p3370 A66-36144
- Metal spraying processes including gas flame and plasma torch 24 p4217 A66-42533
- PLASMA ARC WELDING**
- Focused energy techniques for joining, including laser welding [ASTME PREPRINT AD66-718] 12 p1886 A66-24413
- Plasma arc welding of nickel and high nickel alloys 16 p2715 A66-31436
- PLASMA CHEMISTRY**
- H, C, N, O, Cl, Ca and Al negative ion formation in plasma, noting role of continuous radiation, formation temperature and metastable and stable states 18 p3144 A66-34041
- Thermodynamic properties of plasmas in pressure and temperature equilibrium, showing evaluation accuracy to 4 percent 18 p3145 A66-34104
- Ionization processes in hot products of combustion processes / flame gases/ as weak plasma media, noting flame properties, mass spectroscopy, electron concentration, etc 18 p3260 A66-34106
- Chemical kinetics of electron plasma reactions, discussing energy states, ion-molecule reactions, charge transfer, transport properties, phase interactions, etc 21 p3702 A66-38448
- PLASMA CLOUD**
- Plasma clouds, relativistic cosmic ray and subcosmic ray particle emission associated with solar flares 03 p0421 A66-12845
- Plasma compression effect of space vehicle in magnetoionic medium, discussing injection and removal of quasi-trapped ions 08 p1302 A66-18756
- Ambipolar diffusion of plasma cloud imbedded in ionized gas with homogeneous magnetic field, assuming electric current is not vanishing 15 p2494 A66-30045
- Plasma model permitting numerical solution of nonlinear interpenetration problem of two rarefied plasma clouds 19 p3406 A66-35734
- SID-AND terrestrial disturbance-causing enhanced solar particle emissions associated with intense solar flares and plasma streams 20 p3634 A66-38212
- Optical emission energy of solar flare and plasma cloud acceleration producing geomagnetic storm 20 p3635 A66-38215
- Zodiacal light, airglow and falling atmospheric dust measurements and observations in terms of solar orbiting small diameter particle clouds 24 p4276 A66-42663
- PLASMA COMPOSITION**
- Saha equation for composition of two-temperature plasma derived from thermodynamic approach, used for single temperature plasma 02 p0265 A66-11399
- Proton concentration of hydrogen plasma in alpha apparatus by probe with fast-atom beams 10 p1571 A66-22012
- Proton concentration of hydrogen plasma in alpha apparatus by probe with fast-atom beams 19 p3407 A66-36096
- Conical source plasma parameters during transverse and longitudinal motion in magnetic field examined by parabolic method and Thomson's mass analyzer 21 p3786 A66-39043
- Explosive driven MHD converters, discussing plasma geometry, density measurements and breadboard application 21 p3698 A66-39507
- Adiabatic equation of state for homogeneous compressible anisotropic plasma wave equation invalid for inhomogeneous case 24 p4243 A66-42639
- PLASMA CONDUCTIVITY**
- Nonisothermic pulse discharge column in argon-cesium and helium-cesium systems with produced plasma studied for nonisothermic conductivity 03 p0398 A66-12508
- Electron-ion recombination rate and effective ionization calculated for cesium plasma by Bates method 03 p0398 A66-12510
- Arc column parameters calculated for argon atmosphere, obtaining curves of thermal-electrical conductivity vs temperature and conductivity zone vs temperature 03 p0398 A66-12511
- Thermal conductivity measurements of argon plasma produced by stabilized electrical arc 03 p0399 A66-12825
- Ohm law for partially ionized gases and plasmas 03 p0403 A66-12974
- Plasma impedance measurement including block diagram of electronic system 03 p0371 A66-13254
- Motion, temperature distribution, concentration and change in electric conductivity of ionized gas in initial section of plane channel 04 p0557 A66-14432
- Formalism for determining linearized hydromagnetic wave phenomena in perfectly conducting plasma permeated by static magnetic multipole field 05 p0720 A66-14709
- Frequency dependence of resistivity, absorption and emission processes in fully ionized plasma 05 p0726 A66-15245
- Response of plasma in magnetic field to electric field oscillating with frequencies higher than collision frequency 06 p0915 A66-16179
- Plasma conductivity as function of Larmor electron frequency and mean electron-atom collision interval in transverse magnetic field of argon and mercury plasma 06 p0918 A66-16835
- Conductivity and transfer coefficients calculated from electron scattering in cesium plasma 06 p0918 A66-16836
- Thermionic and photoelectric screening of electric charge on metallic spherical object moving in rarefied ionized medium 06 p0919 A66-16906
- Semiconductor surface plasma density and conductivity, calculating distribution and variation via energy band curvature 06 p0929 A66-16981
- Instabilities of current and potential distribution in n-type GaAs and InP in electric field of several thousand v/cm 07 p1104 A66-18221
- Induction method for measuring electrical conductivity of steady plasma flow 08 p1262 A66-18858
- Plasma conductivity measurement in terms of frequency shifts and Q-factor variation in RF oscillatory circuit produced by presence of plasma sample in induction coil 08 p1264 A66-19190
- Electron transit time and impedance relation in rarefied plasma diode, considering electron and ion velocity straggling 08 p1193 A66-19193
- Transverse diffusion theory and static and HF conductivity of plasma in strong magnetic field 09 p1406 A66-19962
- Collision effects taken into account in determining conductivity tensor of quantum plasma in uniform magnetic field 09 p1407 A66-20077
- Ionization effect on plasma thermoconductivity, noting expressions for conductivity due to energy transfer or dissociation 09 p1407 A66-20136
- Low pressure, high temperature and low values of electrical output effect on plasma conductivity, noting operation of MGD generators at high Hall numbers 09 p1331 A66-20137
- Conductivity of nonisothermal plasma 09 p1407 A66-20143
- Electric conductivity of plasma measured by miniature immersed coil with RF magnetic field [AIAA PAPER 66-181] 10 p1561 A66-21431
- Relaxation to steady state, electron collision ionization, recombination and collision cross section uncertainties in conducting nonequilibrium plasma stream [AIAA PAPER 66-193] 10 p1562 A66-21439
- Electric output and gas conductivity of cesium-seeded helium closed-loop MPD generator with auxiliary ionization 11 p1639 A66-22246
- Solution of two first equations of BBGYK hierarchy, obtaining dielectric constant of plasma by using Guernsey solution, giving two-particles distribution function 11 p1744 A66-22445
- Contribution of electron-electron correlations to longitudinal dielectric constant for case of one-component plasma, noting resonance effect and formula for plasma oscillation damping 11 p1744 A66-22446
- Electrical conductance of turbulent magnetically active plasma, assuming oscillation is possible, determining width of weak shock wave in collisionless plasma 11 p1744 A66-22448
- Conductance and susceptance of neon plasma measured by Q-meter method in frequency range from 0.5 to 25 mc 11 p1745 A66-22587
- Tensor component of dielectric permittivity of isothermal plasma derived from kinetic equation, accounting for effect of magnetic field on collision between particles 11 p1745 A66-22588
- Transference numbers in ionized gases, contrasting current flow in electrolytes with steady state current flow in weakly ionized gases 12 p1920 A66-24097
- Conductivity of ionized gas in DC discharge in argon for various magnetic field intensities 13 p2139 A66-25406
- Ohm law in partially ionized inhomogeneous plasmas in presence of magnetic field derived, accounting for electron, ion and fluid motion 13 p2140 A66-25418
- Instability due to coupling between compressibility and resistivity in cylindrical plasma with surface currents, noting growth rate near acoustic velocity phase 13 p2142 A66-25705
- Legendre transformation and characteristics of MGD potential equation 13 p2142 A66-25708
- Electrostatic instabilities of hydrogen discharge in strong electric field and effects on ohmic heating and electric conductivity 13 p2144 A66-25721
- Random phase approximation of electron conductivity of turbulent plasma and effects of random static inhomogeneities 13 p2149 A66-26245
- Current density in slightly ionized gas for arbitrary collision cross section 13 p2150 A66-26274
- MHD channel flow as affected by nonuniform and anisotropic electric conductivity and boundary effects 13 p2150 A66-26339
- Correction of Fatkulin expressions for LF conductivities of homogeneous plasma in presence of electron-ion collisions in ionosphere 15 p2488 A66-29109
- Approximation of electrical conductivity change in ideally conducting gas in turbulent MGD flow 15 p2551 A66-29220
- Electroconductivity of combustion products of propane-air mixture determined by double Langmuir probes 15 p2617 A66-29312
- Conductivity of working fluid of MHD generator, using thermionic emission from suspended lanthanum hexaboride powder 15 p2552 A66-29408
- Recombination rate, ionization in nonequilibrium electric conductivity prediction for dense seeded plasma 15 p2554 A66-29752
- Ohm law for nonisothermal plasma, considering thermal diffusion forces, obtaining expressions for electric conductivity and Hall coefficient 16 p2761 A66-31085
- Numerical analysis of stabilization of one-component conducting plasma in two-dimensional coaxial duct 16 p2763 A66-31307
- Conductivity and electron-ion recombination coefficient in argon determined from collision cross sections of

electrons with neutral particles 16 p2755 A66-31599

Electric conductivity parameters for plasma gap formed by discharge in argon and potassium mixture in electric-arc heater 16 p2766 A66-31601

Effective thermal conductivity in toroidal plasma filament for Tokamak geometry and Stellarator with figure eight shape 17 p2963 A66-31829

Electron motion examined as major contributor to conductivity of thermally ionized gas in electrical field 17 p2964 A66-31892

Decay time on sunspot magnetic fields, calculating conductivity of solar plasma while neglecting influence of negative and positive hydrogen ions 17 p3000 A66-32334

Electric conductivity of multicomponent partially ionized gas calculated by simplified Chapman-Enskog method 17 p2967 A66-32446

Thermal conductivity coefficient experimentally determined for argon plasma at atmospheric pressure and temperatures from 10,000 to 13,000 degrees K 18 p3144 A66-34038

Low temperature plasma conductivity of combustion products, particularly of exhaust gases in duct of MHD oscillator 18 p3145 A66-34107

Electrodeless probe, consisting of single-layer coil enclosed in insulating tube, for plasma conductivity measurements 18 p3112 A66-34110

Shock front and current sheet separation predicted in magnetically driven shock tube with axial magnetic field and hydrogen as test gas 18 p3149 A66-34917

Impurities effect on electrical conductivity of air between 1000 and 10,000 degrees K 19 p3406 A66-35743

Possible measurement of current flow through electrode in plasma by inserting Rogowski coil in electrode 19 p3357 A66-35807

Finite Larmor radius, inhomogeneity of magnetic field and particle collision effects in plasma instabilities analysis, noting open mirror defect 19 p3412 A66-36496

Turbulent plasma and UHF radiation interaction, determining conductivity and density 19 p3417 A66-36526

Thermal conductivity measurements of argon plasma produced by stabilized electrical arc 19 p3433 A66-36767

Electric conductivity of argon plasma 19 p3433 A66-36776

Electrical conductivity of dense plasma in strong electric field, when electron gas accelerated by field produces beam of runaway electrons 21 p3784 A66-39029

HF long wavelength conductivities of solid state plasmas in thermal equilibrium derived, using variational formalism 21 p3791 A66-39106

Ionization effect on plasma thermoconductivity, noting expressions for conductivity due to energy transfer or dissociation 21 p3793 A66-39408

Low pressure, high temperature and low values of electrical output effect on plasma conductivity, noting operation of MGD generators at high Hall numbers 21 p3698 A66-39409

Conductivity of nonisothermal plasma 21 p3793 A66-39414

Explosive driven MHD converters, discussing plasma geometry, density measurements and breadboard application 21 p3698 A66-39507

Plasma stream conductivity and velocity measurement, using systems of primary coil and several secondary coils 22 p3921 A66-40899

Finite conductivity and heat release on magnetohydrostatic equilibrium of thermodynamically ideal plasma 23 p4099 A66-41081

HF conductivity of quasi-equilibrium isotropic fully ionized two-temperature plasma 23 p4102 A66-41367

MHD stability of ideally conducting plasma, discussing small oscillations equation, energy principle, pinch effects and stabilization of various current instabilities 24 p4241 A66-42331

Nonlinear electromagnetic waves in dense plasma with variable electric conductivity

induced by electric field changes 24 p4244 A66-42870

MHD flow, examining effects of finite electric conductivity on basic flows due to compression and shear 24 p4246 A66-43115

PLASMA CONFINEMENT

Confinement of slow ions by magnetic mirror trap in plasma with positive potential 01 p0109 A66-10258

Metallic plasma tube for ion lasers allows them to run at higher current densities than with ceramic tubes 02 p0239 A66-11373

Polarization and propagation of plasma confined by transverse magnetic field 02 p0268 A66-11774

Equilibrium configuration of plasma confined by magnetic field on kinetic equations of particle drift without considering collisions 02 p0268 A66-11781

Hydrodynamic approximation of interaction between charged particle beam and plasma confined by ideally conducting sheath 03 p0397 A66-12384

Low density plasma confinement by HF and static magnetic fields 04 p0550 A66-13474

Excitation of collisionless shock waves in rarefied plasma, examining neutron radiation and charged particle flux at chamber walls and magnetic field structure in plasma volume 04 p0557 A66-14431

Equilibrium of plasma confined in toroid 05 p0725 A66-15240

Confinement and stability of plasma in magnetic wells, examining pressure plasma and particle motion 05 p0726 A66-15252

Magnetospheric boundary /magnetopause/ dependence on intensity of solar wind 05 p0767 A66-15750

Nanosecond electromagnetic pulse dispersion in longitudinally magnetized plasma confined in coaxial transmission line 06 p0826 A66-16026

Image plane structure of inner and outer separatrix of asymmetric magnetic toroidal field 06 p0918 A66-16871

Boundary condition effects in magnetic mirror compression experiment, noting dependence of transition from unstable to quasi-stable plasma containment on density and lifetime 10 p1568 A66-21824

Loss rates of charged particles from ohmically-heated discharges in C-Stellarator, showing confinement time parameters 10 p1568 A66-21825

Toroidal system for adiabatic compression of plasma by magnetic field 10 p1570 A66-21996

Plasma in toroidal Tuman device, noting ionization and effect of varying field 10 p1571 A66-22008

Plasma confinement characteristics of stabilized pinch effect in aluminum torus 13 p2056 A66-25121

Hydrodynamic approximation of interaction between charged particle beam and plasma confined by ideally conducting sheath 13 p2139 A66-25389

Magnetic field with stopper-type configuration which increases with radius for plasma confinement in adiabatic trap 13 p2144 A66-25724

Plasma confinement in adiabatic trap formed by combined magnetic field, noting lifetime and instability 13 p2146 A66-25738

Confinement of slow ions by magnetic mirror trap in plasma with positive potential 13 p2148 A66-25975

Plasma interacting with transverse magnetic field, noting polarization and field changes 13 p2151 A66-26510

Mutual-inductance coefficients of coaxial spheroidal plasmoids interacting with external magnetic field 13 p2152 A66-26513

Static and magnetic HF field gradient combinations for accelerating, reflecting and accumulating plasmas 14 p2339 A66-26817

Magnetic mirror trapping of hot-electron plasma heated in quartz discharge tube 14 p2343 A66-27596

Radiation characteristics of vertical dipole in warm plasma, expressing vector potential functions in Fourier integrals 14 p2240 A66-27916

Electron-cyclotron-heated plasma stability in mirror containment systems possessing shear, minimum-B properties or both 15 p2555 A66-29760

Distribution of charged particles of

different energies escaping from magnetic trap in which spiral moving electron fluxes are created 16 p2755 A66-30094

Dependence of plasma heating and containment on distribution of magnetic field along trap axis in mirror trap 16 p2758 A66-30295

Thermal ionization for low temperature plasma confined in magnetic field, examining magnetic field effect on ionization 16 p2762 A66-31166

Plasma motion and confinement in octupole magnetic field, noting electron temperature density and field fluctuation 17 p2966 A66-32428

Kinetic theory of electromagnetic propagation in confined magnetoactive plasma 17 p2968 A66-32539

Sinusoidally varying HF electric field effect on glow discharge plasma, showing capability of confinement 17 p2971 A66-32785

Intense microwave radiation from high density plasma confined by magnetic mirror 18 p3145 A66-34114

Satellite and space probe measurements indicate continual confinement of geomagnetic field by solar wind forming magnetosphere and Earth magnetic tail 18 p3235 A66-34742

Toroidal system for adiabatic compression of plasma by magnetic field 18 p3150 A66-34973

Linear nonrelativistic motion of charged particle in field of traveling electromagnetic wave 18 p3092 A66-35073

Plasma in toroidal Tuman device, noting ionization and effect of varying field 19 p3407 A66-36092

Bulldup and confinement of plasma with high-energy electrons in PR-5 apparatus, using magnetron injection method 19 p3412 A66-36497

Containment of plasma trapped in magnetic well by guiding plasma from coaxial gun along injection line by converging magnetic field 19 p3412 A66-36498

Plasma heating and confinement in magnetic well, using deuterium plasma jet obtained by induction gun, measuring lifetimes 19 p3412 A66-36499

Deuterium plasma containment and stability in theta pinch configuration using megajoule capacitor banks, studying density, temperature and radial distribution 19 p3413 A66-36505

Plasma confinement, heating and losses in theta pinch experiment /Pharos/ with extended current pulse 19 p3414 A66-36509

Nonuniform plasma stability in magnetic field gradient 19 p3417 A66-36530

High ion and electron temperature plasma produced by fast internal injection from turbulent plasma jet and contained in magnetic mirror trap of composite type 19 p3421 A66-36544

Plasma confinement experiments with electron injection parallel to cusped magnetic field axis in nonadiabatic regime 19 p3422 A66-36549

Finite resistivity and nonhydrodynamic instability studied for extent of shear stabilization in levitron 19 p3424 A66-36556

Plasma gun and injection techniques for establishing hot field-free cusped plasmas that are MHD stable in equilibrium configuration 19 p3425 A66-36564

Plasma behavior studied in general atomic toroidal octupole machine in which magnetically confined plasma is MHD stable 19 p3426 A66-36570

Plasma confinement and loss rate in low-density C stellarator discharges under zero ohmic heating current 19 p3428 A66-36579

Plasma injection and confinement in stellarator magnetic trap with multipolar helical field, noting magnetic surfaces and perturbation effect 19 p3429 A66-36582

Plasma adiabatic compression by external magnetic field increasing with time in toroidal chamber, providing two-stage plasma heating 19 p3430 A66-36588

Ion cyclotron resonance heating and trapping and adiabatic compression of plasma in QP machine 19 p3431 A66-36590

Electromagnetic wave propagation in plasma boundary, considering electron collision with boundary, noting role of thermal velocities of

- electrons 20 p3512 A66-37137
 Plasma blob capture when injected perpendicular to magnetic force lines attributed to electrostatic repulsion of polarization space charge formed by interaction 20 p3610 A66-38057
 Electromagnetic and gas dynamic effects on magnetic compression of plasma loop 20 p3611 A66-38120
 Electric field distribution in plane-parallel layer of electron-ion plasma situated in external electric field normal to walls, deriving energy losses by kinetic theory 21 p3782 A66-39015
 Trapping, stability and confinement of high beta plasma in cusped geometry to measure hole size and relationship to energy containment time 21 p3792 A66-39181
 High density thermonuclear plasma confinement by multimegagauss magnetic fields 21 p3793 A66-39508
 Multimegagauss fields obtained by cylindrical explosive compression applied to plasma compression, using slotted liner and unslotted resistive cylinder methods 21 p3794 A66-39512
 Exact solution for transverse electromagnetic wave in plasma with diffuse boundary, noting reflection and transmission coefficients 22 p3952 A66-39719
 Microwave beam incident on linearly graded plasma for electron density profile determination, using ray theory 22 p3861 A66-39723
 MHD and velocity space instabilities of plasma in ring vortex confined by cold gas blanket in toroidal magnetic field 22 p3954 A66-39931
 Smooth particle motion in nonresonant HF and magnetostatic fields 23 p4100 A66-41141
 LF plasma instabilities causing pumpout losses prevented by scaling law determination for stable confinement in toroidal magnetic wells 23 p4102 A66-41482
 Equilibrium of toroidal magnetically confined plasma, using segmented circular aperture limiter 23 p4102 A66-41484
 Instabilities resulting in loss of energetic electrons and fast electrons analyzed in electron cyclotron plasma confined by magnetic mirrors 23 p4103 A66-41490
 Boundary conditions for unique solution to linearized warm plasma equations 23 p4105 A66-41640
 Plasma physics reviews, Volume 2, plasma confinement including structure of magnetic fields, plasma equilibrium, MHD stability and charged particles in EM field 24 p4241 A66-42328
 Static and quasi-stationary magnetic fields and possibility of providing stable plasma confinement, with emphasis on toroidal fields 24 p4236 A66-42329
 Drift approximation of motion equations for relativistic charged particle in electromagnetic field, adiabatic trap, HF magnetic field, etc 24 p4241 A66-42332
 Existence and topography of stationary points of square of magnetic field intensity determined by magnetic mirror system with minimum B field 24 p4242 A66-42404
 Magnetic mirror trapping of hot-electron plasma heated in quartz discharge tube 24 p4243 A66-42730
 Time of confinement of hot plasma in magnetic bottle without touching material walls, examining instability types, pinch configurations, etc 24 p4246 A66-43113
 Plasma potential and ion energy determination via ion extraction and energy analysis 24 p4247 A66-43209
- PLASMA CYLINDER**
 Properties of partially filled plasma waveguide in external longitudinal magnetic field 01 p0039 A66-10535
 Drag on plasma cylinder from rotating magnetic field, solving MHD and Maxwell equations 03 p0397 A66-12385
 Separation constants for finite gyromagnetic plasmas, discussing ion motion effects 06 p0826 A66-16024
 Plasma transition from macroscopic stable state to state with virtual cathode 06 p0918 A66-16770
 Time and space-resolved measurements on self-excited moving striations and on low pressure glow discharge to externally excited pulses 10 p1564 A66-21565
 Angular velocity effect on radial hydromagnetic oscillations of rotating plasma cylinder 10 p1566 A66-21732
 Cerenkov electron absorption of Alfvén and magnetoacoustic waves in plasma cylinder, obtaining formula for energy absorbed by plasma and damping factor where there is no resonance 11 p1743 A66-22443
 Hydromagnetic waves in partially ionized cylindrical hydrogen plasma 11 p1745 A66-22453
 Thermal radiation resonance of plasma cylinder in presence or absence of magnetic field 12 p1919 A66-23774
 Dispersion equation for cylindrical plasma with finite electrical conductivity under influence of applied magnetic field and own gravitational field 12 p1920 A66-24191
 Ion acoustic waves propagating along cylindrical plasma column analyzed, deriving boundary condition at plasma surface 12 p1923 A66-24572
 Drag on plasma cylinder from rotating magnetic field, solving MHD and Maxwell equations 13 p2139 A66-25390
 Electrostatic stability of cylindrical plasma beams composed of high velocity electrons rotating along magnetic lines of force in perpendicular direction and ions displaced along length of magnetic field 13 p2141 A66-25446
 Anomalous damping of helicon waves propagating in cylinder of hot plasma 13 p2143 A66-25717
 Diaphragm-shaped external electrode used to define shape of plasma column in Tokamak machines, noting ways of maintaining plasma column equilibrium 13 p2148 A66-25755
 Cylindrically symmetric plasma column produced by wall-stabilized arc constrained to operate within transparent tube 13 p2148 A66-25822
 Emergence point of conical microwave beam transmission through nonuniform electron plasma 14 p2234 A66-26860
 Stability of pulsating plasma cylinder contained by time-dependent magnetic field described by MHD equations 15 p2550 A66-28957
 Axially flowing gas through arc discharge, examining effect on I-V characteristic and radial temperature distribution in arc column 16 p2762 A66-31159
 Interaction of linear plasma column with alternating quadrupole magnetic field 17 p2963 A66-31827
 Plasma injection into programmed magnetic field 17 p2963 A66-31828
 Nonstationary radial motion of infinitely long conducting gas cylinder in time-varying longitudinal magnetic field 17 p2964 A66-31891
 Spectral distribution of thermal emission intensity of magnetically active plasma bounded by cylindrical surface 17 p2965 A66-32240
 Radial temperature distribution within argon plasma column determined spectroscopically at various arc currents, noting argon thermoconductivity 17 p2966 A66-32427
 Surface wave propagation along plasma column noting discharge tube properties, density distribution variation with magnetic field, attenuation due to collisional losses, etc 17 p2970 A66-32651
 Pulsating plasma column acceleration in high current pulsed accelerator 17 p2972 A66-32870
 Negative absorption /amplification or oscillation/ of microwaves by cylindrical cavity coaxial with plasma column along magnetostatic field 17 p2973 A66-32978
 Cylindrical plasma beam simulation of rocket exhaust turbulence and scattering effects on microwave propagation 18 p3069 A66-34253
 Distribution of charged particles in plasma column situated in interspace between two coaxial cylinders 18 p3147 A66-34698
 Plasma transition from macroscopic stable state to state with virtual cathode 19 p3405 A66-35367
 Transverse propagation of electromagnetic waves in cylindrically stratified axially magnetized plasma, noting profiles of permittivity tensor 19 p3303 A66-35856
 Hot cathode-gas discharge in equipotential space of magnetic field, noting formation of plasma column with opposite charge and discharge instability 19 p3408 A66-36275
 Rosenbluth diagram for cylindrical plasma stability 19 p3410 A66-36338
 Narrow-tube approximation applied to study of effect of curvature on toroidal plasma centered about closed curve 19 p3415 A66-36518
 Plasma column equilibrium in Tokamak-5, noting effect of short-circuiting of drift current by conducting diaphragm 19 p3427 A66-36573
 Current-carrying toroidal plasma column behavior in strong varying longitudinal magnetic field of Tokamak TM-1 19 p3428 A66-36577
 Electrical breakdown in beams of hydrogen and nitrogen produced by expanding H or N gas out of Laval nozzle cooled by liquid hydrogen or nitrogen in high vacuum 20 p3605 A66-38055
 Gravitational stability of uniformly rotating cylindrical plasma with finite radius investigated in terms of normal modes 20 p3610 A66-38069
 Interaction between weakly ionized plasma cylinder and electromagnetic fields, plotting dependences between resonance current vs frequency for different gases 20 p3612 A66-38446
 Electromagnetic wave absorption in nonuniform plasma cylinder in presence of forced oscillations 21 p3781 A66-39009
 Born approximation for phase shift of microwaves scattered from underdense cylindrical plasma used to determine plasma electron density 21 p3794 A66-39572
 Equations for ionized positive plasma column of gas discharge between infinite dielectric planes under oblique magnetic field with component in direction of external electric field 22 p3953 A66-39756
 Vacuum sheath effect on surface currents excited on plasma-immersed cylinder by EM and EK plane waves 22 p3954 A66-39940
 LF wave propagation in inhomogeneous plasma column, deriving normal mode of expansion and perturbed dispersion curves 22 p3955 A66-40047
 Transverse separation of rare gas-metal vapor mixture components in positive nonisothermal plasma column in plain-symmetric glow discharge 22 p3958 A66-40934
 Load-supporting capacity of vertical plasma cylinder contained by axial pinch effect analyzed for applications to bearings with electrically conducting lubricants 23 p4101 A66-41293
 Plane homogeneous wave scattering by cylindrical plasma column with glass wall placed in vacuum, noting axial drift velocity and resonance peaks 23 p4101 A66-41366
 Millimeter wave resonant interferometer capable of measuring spatial distribution of electrons in low density transient plasma column subject to perturbation 24 p4209 A66-42191
 Microwave emission from stationary plasma column measured taking into account spatial distribution of plasma density, using spectrometer 24 p4242 A66-42398
 Inverse cold-plasma resonance in cylindrical hole and applicability to plasma density measurement 24 p4242 A66-42402
 Optical transmission of plasma column generated by ionized gas explosion determined, using laser beam 24 p4245 A66-42998
 Helicon wave propagation in nonuniform cylindrical plasma, explaining discrepancies between experimental results and theory 24 p4245 A66-43017
 Dissipative mechanism in cylindrical plasma confined by axial magnetic field noting coefficients, linear transport relations, equations of change, Chapman-Enskog expansion and anomalous effects 24 p4246 A66-43112
- PLASMA DECAY**
 Longitudinal wave decay in inhomogeneous plasma may vary with distance 01 p0109 A66-10257
 Plasma decay by measuring phase variation and signal amplitude with interferometer, determining distribution function and

- recombination coefficient 01 p0115 A66-11056
Time-resolved spectroscopic measurement of absolute intensity, spectral profiles and self-absorption for He I lines in early helium afterglow 03 p0396 A66-12307
Spatial distribution and temporal decay of electron and atom concentrations in pulsed /argon afterglow/ plasma measured with laser interferometer 04 p0551 A66-13741
Microwave bridge to determine electron density in weakly ionized decaying plasmas 04 p0555 A66-14321
Recombination rate of electrons in plasma containing ions of molecule with both repulsive and bound neutral states 05 p0729 A66-15863
Helium-plasma decay in spherical balloon and volume removal by electron-ion recombination 06 p0914 A66-16146
Measurements of plasma from hydrogen-loaded titanium washer mounted at DC magnetic mirror 07 p1088 A66-17954
Time dependence of electron density during afterglow of plasma in helium-hydrogen, neon-hydrogen and argon-hydrogen mixtures measured by microwave cavity 07 p1091 A66-18398
Electron density and temperature in decaying hydrogen plasma determined, using monochromator 13 p2145 A66-25730
Longitudinal wave decay in inhomogeneous plasma may vary with distance 13 p2148 A66-25974
Plasma wave propagation and decay processes studied from profiles of plasma density in cylindrical metal vessel and results compared to Stark effect and framing camera photographic results 13 p2149 A66-26240
Time resolved electron density measurements with microwave interferometer used in weak afterglow plasma diagnostics 13 p2083 A66-26556
Helium-plasma decay in spherical balloon and volume removal by electron-ion recombination 15 p2556 A66-29876
Microwave cavity measurement of recombination coefficient of decaying plasma obtained by gamma ray induced ionization of xenon 16 p2756 A66-30098
Measurement of sticking coefficient for thermal electrons in oxygen and air, using microwave circuits 16 p2756 A66-30101
Quantum oscillations in damping of helicons propagating through degenerate semiconductor plasmas in presence of quantizing magnetic fields 16 p2770 A66-30185
Mechanical shutter with time resolution of 0.1 msec designed for spectroscopic observation of decaying plasmas 16 p2701 A66-30275
Space charge formation and decay during passage of electric current through plasma moving in electric field, obtaining V-I characteristics 16 p2766 A66-31598
Rate of diffusion disintegration of metastable helium atoms in decaying helium plasma at very low temperatures, with excitation by electrodeless method 18 p3142 A66-33940
Plasmon decay-type interactions in plasma with intensive transverse Langmuir waves, analyzing induced scattering 20 p3512 A66-37136
Interaction of decaying waves in magnetoelectric plasma when wave vectors are oriented along magnetic field 20 p3512 A66-37138
Plasma decay technique to measure density in discharge tubes compared to value obtained by Langmuir probe 21 p3792 A66-39182
Microwave cavity resonant frequency sampler for direct oscilloscope-photographic recording of electron density, recombination and diffusion time in decaying plasma 21 p3740 A66-39389
- PLASMA DENSITY**
Gas laser interferometers for plasma low electron density measurement 01 p0069 A66-10856
Electron distribution function of homogeneous Lorentzian plasma calculated by successive approximation 01 p0115 A66-11077
Oscillation modes on oscillators in locally concentrated magnetic field determined by simultaneous study of predominant and helical modes 01 p0116 A66-11195
Dielectronic recombination for low density plasma, estimating coefficient and ionization balance for iron and calcium ions in corona 02 p0286 A66-11357
Beam width of two antenna systems measured and compared for accuracy in determining plasma density 02 p0269 A66-11969
Possibility of determining electron concentration and magnetic field of plasma by measuring drift wave frequencies 02 p0291 A66-12114
Electromagnetic wave propagation in plasma filled disk-loaded waveguide, obtaining plasma densities 03 p0332 A66-12426
UHF Fabry-Perot interferometer for measuring low plasma electron density 04 p0518 A66-13475
Plasma density enhancement in arc discharge by applying converging magnetic field 04 p0551 A66-13742
Plasma density measurements by microwave cavity as affected by cavity holes and plasma nonuniformity 04 p0551 A66-13752
Ambipolar diffusion in magnetic field showing plasma equations of momentum-transfer yield unambiguous steady state solutions 05 p0669 A66-14943
Third harmonic component of current density in plasma in presence of electric and magnetic fields, analyzing generation and propagation of third harmonic of electromagnetic wave in magnetoplasma 05 p0724 A66-15188
Distribution of high plasma density along semiconductor rod, noting surface recombination rate and assuming existence of high level injection at one end of rod 06 p0923 A66-16176
Measurement of electron density of gas discharge plasma by laser interferometer 06 p0916 A66-16379
Plasma fluctuations in presence of turbulent gas flow in laboratory discharge 06 p0916 A66-16389
Axial variation of plasma column density in nonuniform axial magnetic field determined by theory for ambipolar diffusion and Boltzmann transport 06 p0917 A66-16649
Semiconductor surface plasma density and conductivity, calculating distribution and variation via energy band curvature 06 p0929 A66-16981
Self-consistent equilibrium configuration of s-component plasma representing infinitely extended plane layer consisting of periodic sequence of current quasi-filaments 07 p1085 A66-17646
Wave reflection and refraction across density discontinuity in two-fluid fully ionized plasma studied by coupled linearized hydrodynamic equations and Maxwell equations 07 p1088 A66-17948
Current density and heat flux expressions in terms of transport coefficients of partially ionized gas, noting thermoconductivities 07 p1088 A66-17950
Quasi-linear theory of plasma instabilities and density fluctuations 07 p1102 A66-18210
Miniature Rogowski coil probes for direct measurement of current density distributions in transient plasmas 07 p1037 A66-18494
Plasma formation during unstable electron beam passage through air, argon and hydrogen in magnetic field, determining plasma density, oscillation frequency and amplitude 08 p1263 A66-19176
Dielectronic recombination for low density plasma, estimating coefficient and ionization balance for iron and calcium ions in corona 10 p1602 A66-21088
Plasma electron density as function of radius compared with ion cyclotron heating theory and stability criteria [AIAA PAPER 66-158] 10 p1560 A66-21423
Plasma electron density and temperature from measurement of LF impedance of Langmuir probe, noting ionospheric probing 10 p1536 A66-21549
Necessary conditions creating high-density plasma in metallic chamber in presence of magnetic field, using optical and microwave techniques to determine plasma parameters 10 p1570 A66-21997
Product of oscillator strength, stark width and ground state density measured in T tube plasmas, using neutral helium resonance line 11 p1747 A66-23391
Plasma density distribution determined from microwave beam refraction as function of angle of incidence 12 p1922 A66-24217
Ionospheric-plasma density determined by phase difference of incident waves on and reflected from plasma 12 p1870 A66-24284
Long-wave electron oscillations excited by electron beam in rarefied plasma in presence of magnetic field 12 p1925 A66-24883
Plasma density drops developing when injecting plasma into trap with combined field, noting rise of HF field and acceleration of fraction of plasma ions with each drop 13 p2137 A66-25104
Disturbance of thermal equilibrium of weakly ionized cesium contact plasma due to wall losses measured by Langmuir probe 13 p2137 A66-25117
Transforming radial compression of hot plasma into axial component for formation of almost spherical plasma of high density 13 p2140 A66-25435
Microwave transmission and scattering measured in laboratory plasma, noting moving regions occulting microwave beam, existence of turbulence elements and frequency spectrum of uniformly scattered component 13 p2143 A66-25709
Effect of nonlinearities on electron cyclotron resonance, stressing determination of maximum velocity of plasma under cyclotron resonance conditions 13 p2143 A66-25711
Plasma wave propagation and decay processes studied from profiles of plasma density in cylindrical metal vessel and results compared to Stark effect and framing camera photographic results 13 p2149 A66-26240
Time resolved Langmuir probe measurements of plasma density in electromagnetic shock tubes 13 p2149 A66-26243
Electromagnetic wave propagation near missiles during hypersonic atmospheric reentry and computer program for determination of dissociated and ionized particle density in nonequilibrium nitrogen-plasma flow 13 p2150 A66-26374
Density of plasmoid interacting with axisymmetric magnetic field investigated by thermocouple 13 p2152 A66-26514
Electrohydrodynamic phenomena associated with motion of charged particle in plasma, showing that disturbance produced depends on particle speed 13 p2154 A66-26669
Hyperfrequency interferometer measurement of plasma profile and electron density 14 p2290 A66-26821
Laser beam techniques for study of plasmas with high electron densities 14 p2305 A66-26822
Localization conditions of high power linear HF discharge at low gas pressure, achieving localization of current and plasma density in magnetic field by using diaphragms 14 p2340 A66-27148
Laser radiation to determine electron density in dense high temperature plasma 14 p2374 A66-27507
Method of constructing particle distribution function for quasi-neutral plasma consisting of electrons and singly charged heavy ions 14 p2344 A66-27648
Possibility of determining electron concentration and magnetic field of plasma by measuring drift wave frequencies 14 p2385 A66-28073
Measurement of plasma density generated by underwater explosions, noting modes of electrical discharge and shock front role 15 p2549 A66-28693
Resonance probe for plasma density measurements consisting of vacuum cylinder, noting eigenfrequency 15 p2497 A66-28711
Photolionization of atoms in coherent states 15 p2515 A66-29205
Light diffraction by random fluctuation of refractive index of plasma 15 p2552 A66-29330
Free energy of single and multicomponent

plasmas in particle number density determined, using quantum mechanical perturbation expansion of partition function 15 p2552 A66-29617

Decaying plasma density determined from high-mode oscillations produced in magnetic trap with metallic chamber at 2000 to 6000 oe 16 p2756 A66-30099

Plasma density drops developing when injecting plasma into trap with combined field, noting rise of HF field and acceleration of fraction of plasma ions with each drop 16 p2758 A66-30283

Decaying gaseous plasma ion densities, metastable atom densities and light emission simultaneously measured by mass spectrometer and light spectrometer 16 p2759 A66-30422

Absolute deuterium density by energetic deuterium beam probing of plasma 16 p2759 A66-30425

Exact determination of electron density distribution in finite anisotropic plasma by integral equation relating tangential electric field and HF plasma current 16 p2767 A66-31691

Density and diameter of inhomogeneous plasma cylinder determined from numerical calculation of diffraction of electromagnetic wave 17 p2963 A66-31843

Photoionization of atoms in coherent states 17 p2936 A66-33054

Force action on charged spherical dust particles in cometary atmospheres, noting interaction with ions 17 p3012 A66-33399

Electron wave resonances in bounded plasmas, examining application to average plasma density measurement 18 p3145 A66-34113

Necessary conditions creating high-density plasma in metallic chamber in presence of magnetic field, using optical and microwave techniques to determine plasma parameters 18 p3150 A66-34974

Output current characteristics of thermionic converters derived without reference to elastic and inelastic collisions and expressed as plasma electron density and temperature profile 19 p3405 A66-35428

Plasma density using laser based interferometer, interpreting phase shift of laser signal as time dependent laser frequency variation 19 p3374 A66-35817

Spatial density distribution in cold electron plasma determined by measuring phase difference between incident and reflected electromagnetic waves 19 p3408 A66-36276

Turbulent plasma and UHF radiation interaction, determining conductivity and density 19 p3417 A66-36526

Hollow medium size linear Z pinch producing very high densities and high temperatures 19 p3424 A66-36559

Electron density, temperature and other related electromagnetic effects of deuterium plasma focus formed by coaxial electrode discharge as result of Z pinch 19 p3425 A66-36561

Biconical cusp injection of dense hydrogen and deuterium plasmas by plasma gun 19 p3425 A66-36563

HF heating of plasma in metallic vacuum chamber, noting generation and absorption of ion cyclotron waves, estimating plasma density 19 p3431 A66-36593

Chemical processes in low temperature plasma, noting high energy densities, enthalpies, etc 20 p3606 A66-36900

Increasing plasma density in Ogra 1 20 p3610 A66-38056

Boundary behavior of plasma heated by ion cyclotron waves 21 p3780 A66-39003

Fast neutral hydrogen atom beams used to probe plasma density and time-and space-dependent plasma distribution in longitudinal magnetic field 21 p3786 A66-39046

Plasma density and collision frequency diagnostics using extraordinary transverse wave 21 p3790 A66-39067

Microwave plasma diagnostics using longitudinal radio wave propagation 21 p3790 A66-39068

Plasma decay technique to measure density in discharge tubes compared to value obtained by Langmuir probe 21 p3792 A66-39182

Plasma spectrography in shock tube,

determining charged particle concentration 22 p3953 A66-39760

High temperature high density carbon plasma production in arc chamber of shock tube 22 p3955 A66-40092

Plasma density distribution determined from microwave beam refraction as function of angle of incidence 22 p3957 A66-40581

Gas ionization by fast electron beam directed along waveguide leading to longitudinal distribution of secondary electron concentration 22 p3958 A66-40938

Long wave electron oscillations excited by electron beam in rarefied plasma in presence of magnetic field 23 p4099 A66-41090

Resonant frequencies of VHF Lecher line coupled to mercury arc plasma via split cylinder coupler measured as function of electron density 23 p4100 A66-41155

Optical interferometers for low electron density measurements of transient plasmas 23 p4068 A66-41289

Electron and neutral atom densities in helium and argon afterglow plasma obtained by two helium-neon laser interferometers, noting temporal dependence of electron decay 23 p4101 A66-41364

External control of radial distribution of plasma density for magnetoplasma stabilization against helical instability 23 p4103 A66-41486

Laser induced plasma density measurement using multiple beam interferometry 23 p4105 A66-41630

Transient fiber optics probe for space resolved diagnostics of dense plasmas, noting adaptation to temperature measurements by line intensity and line ratio method 23 p4107 A66-41887

Uniform-current-density thermionic and secondary electron emission from dense plasma interaction with negatively biased solid surface at high temperature under high current arc cathode simulated conditions 23 p4107 A66-41908

Screening function of interacting electron gas at high and metallic densities by many-body perturbation theory 24 p4236 A66-42294

Microwave emission from stationary plasma column measured taking into account spatial distribution of plasma density, using spectrometer 24 p4242 A66-42398

Inverse cold-plasma resonance in cylindrical hole and applicability to plasma density measurement 24 p4242 A66-42402

Localization conditions of high power linear HF discharge at low gas pressure, achieving localization of current and plasma density in magnetic field by using diaphragms 24 p4244 A66-42968

PLASMA DIFFUSION

Friction, diffusion, and electrical conductivity tensors obtained for plasma subjected to strong external magnetic field 01 p0114 A66-10961

Relationship between laws of electron temperature and charged particle concentration fall-off in helium plasma diffusion flow 03 p0398 A66-12520

Ambipolar diffusion and electron-ion recombination coefficients dependence on electron temperature in afterglow of neon plasmas 04 p0554 A66-14294

Charge balance in plasma formed by passage of electron beam through gas in presence of constant magnetic field 06 p0918 A66-16870

Time dependent ambipolar diffusion waves, solving electron density equation 07 p1088 A66-17951

Plasma atomization of molybdenum, discussing variable process parameter effects on size grading of spherical powdered molybdenum 08 p1238 A66-18895

Charged particle drift across magnetic field in plasma with oscillating electrons contained in metal chamber 08 p1264 A66-19181

Ionospheric plasma diffusion, noting electric field effect in derived equation of continuity for F region 08 p1215 A66-19206

Anomalous diffusion and instabilities of argon plasma in strong magnetic field 10 p1564 A66-21568

Ground station installations for observation in ionosphere of noncoherent diffusion of plasma by electrons 10 p1532 A66-21711

Diffusion and lifetime of plasma charged particles in magnetic field covering instability, contraction, decay, recombination, etc 13 p2138 A66-25222

Two types of plasma instability affecting phenomena of transverse diffusion in magnetic field and particle scattering across lines of force 14 p2339 A66-26815

Time-dependent behavior of diffusion of plasma inhomogeneities with or without particle drift 15 p2595 A66-29085

Nonlinear diffusion equations in electron beam excited plasma noting two-and three-body recombination, radial distribution of electron density, light intensity, etc 15 p2555 A66-29761

Magnetoplasma diffusion measurements in narrow discharge tube, using classical ambipolar diffusion model for weak magnetic fields 16 p2760 A66-30802

Charged particle distribution in hollow cylinder shaped positive plasma column during diffusion and helical instability in longitudinal magnetic field 17 p2969 A66-32548

Strong axial magnetic field effect on constant current discharge in continuous-duty ion laser, noting plasma diffusion, charged particle density and laser output decrease 17 p2936 A66-33117

Radial diffusion effects on composition of solar corona and solar wind 18 p3168 A66-34344

Plasma half-space impedance for diffusive electron reflection from plasma vacuum boundary, noting damping decrement of surface electromagnetic wave, electric field Fourier components and absorption capacity 18 p3151 A66-35065

Drift effect on diffusion spreading of plasma inhomogeneities in magnetic field, deriving expression for Fourier component potential and magnetic field perturbations 19 p3344 A66-35265

Diffusion spectrum modifications due to positive ions collision with neutral particles observed through ionospheric probe in E layer 19 p3346 A66-35590

Deuterium plasma containment and stability in theta pinch configuration using megajoule capacitor banks, studying density, temperature and radial distribution 19 p3413 A66-36505

Radial plasma transport in magnetic wells, emphasizing LF instabilities not stabilized by positive gradient and employing free energy arguments 19 p3415 A66-36516

Growth of unstable collisionless plasma waves to turbulent state, decay of turbulent state and concomitant anomalous diffusion 19 p3415 A66-36519

Diffusion coefficients for transport of plasma across magnetic field calculated directly from motion of test particles 19 p3416 A66-36520

Interdiffusion of plasma and magnetic fields in pinch and hardcore discharges in large bore discharge tube /TIBER/ 19 p3424 A66-36555

Positive plasma column produced by hydrogen glow discharge studied by mass spectrometer for various pressures and currents 20 p3608 A66-37459

Schottky diffusion theory applied to calculation of coefficients of homogeneous positive column in neon, using Druvesteyn electron-energy distribution 20 p3608 A66-37462

Electron energy distribution function obtained by Druvesteyn analysis in low-current positive column neon discharge compared with theoretical distribution function 20 p3608 A66-37463

Diffusion of antiparallel bias magnetic field during initial stages of theta pinch explained as loss of trapped flux 21 p3791 A66-39179

Plasma in flat-electrode accelerator, examining optimum accelerator length associated with equilibrium between acceleration processes in plasma and diffusive scattering of plasmoid 22 p3958 A66-40937

Quasi-linear theory to study turbulent diffusion of plasma caused by instabilities in oscillating discharge 23 p4100 A66-41140

Diffusion in potassium plasma in presence of universal instability, examining

dependence of diffusion coefficient on magnetic field for given density range 23 p4106 A66-41708
Integral ratios for calculating diffusion rate of magnetic field into wall-cooled plasma 23 p4106 A66-41716
Dissipative mechanism in cylindrical plasma confined by axial magnetic field noting coefficients, linear transport relations, equations of change, Chapman-Enskog expansion and anomalous effects 24 p4246 A66-43112

PLASMA DISCHARGE

SA TOROIDAL DISCHARGE

Pinch effect in low pressure discharge theory, examining effect of magnetic field produced by discharge and electric field effect 01 p0110 A66-10334

Plasma ring discharge excitation used to drive high current density electrodeless arc for exciting gas ion laser transitions 01 p0083 A66-10967

Fast wave quasi-TE₁₁ mode behavior of two circular guides of different size containing same discharge plasma 02 p0197 A66-11450

Formulas relating detector current to average UHF power obtained for positive plasma column and dark Faraday region of glow discharge 02 p0269 A66-11844

Dependence of properties of moving striations in plasma of positive column on external and internal parameters 04 p0553 A66-14178

Spectral line intensities of hydrogen and helium plasma in P.I.G. discharge 04 p0553 A66-14283

Rayleigh-Taylor instabilities of z-pinch discharge during contraction process solved by use of snowplow model for initial phase of z-pinch 04 p0557 A66-14429

Precursor effects in T-tubes predominantly air-filled, using microwaves and photomultipliers, noting role of UV and plasma radiations 05 p0719 A66-14503

High pressure high current argon discharge covering statistical variations of nonblack body, photon and IR radiation and measurement with InSb photodiode 05 p0720 A66-14507

Plasma formation by dissociation of molecular ions by arc discharge in apparatus for adiabatic plasma confinement 06 p0915 A66-16152

Secondary emission ratio and multiplication constant of electron-ion oscillatory discharge 06 p0919 A66-16872

Simultaneous electron and ion oscillations on discharge gap of four-electrode chamber 06 p0919 A66-16881

Plasma emission properties of vacuum spark when producing high current H and D ion beams 06 p0919 A66-16884

Cyclic analysis of Gabor-type auxiliary discharge thermionic energy converter, determining critical equation parameters 07 p0991 A66-17241

E- and H-filaments formed in space periodic structure of high speed high current plasma, examining stability relative to theta- and z-pinch 07 p1085 A66-17644

Potential striae determined in hollow cathode plasma 08 p1264 A66-19183

Gas laser emission solution by determining emission field density dependence on resonator parameters, relaxation characteristics and atom excitation in gas discharge plasma 08 p1234 A66-19271

Field harmonics of HF plasma discharge, taking nonlinear interaction into account 09 p1407 A66-20349

Breakdown of theta pinch in helium at high initial densities without preionization 09 p1408 A66-20422

Resonant excitation by external forces, propagation and reflection of ion acoustic standing waves between electrodes in mercury vapor discharge 10 p1568 A66-21831

Ion distribution in plasma of vacuum spark 10 p1569 A66-21886

Helium afterglow in HF pulse-discharge plasma at 77 K from dissociative recombination of molecular helium ion with thermal electron 10 p1572 A66-22022

Spectral line shift in low-power spark-discharge argon plasma, noting line broadening and incomplete ionization 10 p1572 A66-22024

Plasma burner in which heating of gas is effected in jet discharge stabilized by vortex or flow methods 11 p1748 A66-23417

Nonlinear phenomena in HF plasma discharge, establishing qualitative relation between gas pressure, consumed microwave power and harmonic generation 12 p1919 A66-23711

Dynamic stabilization of direct discharge in magnetic field 12 p1922 A66-24215

Longitudinal magnetic field effect upon gas discharge, Zeeman effect and Faraday effect in He-Ne gas laser 12 p1890 A66-24224

Charge sheath role at discharge wall in determining boundary conditions for LF wave in low pressure discharge, using hydrodynamical model 12 p1923 A66-24571

Correlation between plasma and ion density fluctuations as detected by magnetic probe, spectral emission techniques and Langmuir probe 13 p2142 A66-25703

MHD instability in plasmas during pinch discharge, noting wave velocity dependence on Larmor radius, Hall effect, electron temperature fluctuations, etc 13 p2142 A66-25704

Nonthermal microwave radiation from plasma of electrodeless induction discharge, establishing correlation between microwave and X-ray radiation 13 p2143 A66-25710

Magnetic probing of plasma column motion in cylindrical and toroidal discharge vessels 13 p2144 A66-25723

Discharge in pulsed plasma source as affected by densities 13 p2153 A66-26524

Spectroscopic analysis of helium plasma shock waves, produced by annular discharge type conical coil shock tube 14 p2341 A66-27310

Plasma discharge in three-stage device suitable for accelerating and heating of plasma 14 p2343 A66-27608

Noncollisional damping effects limiting amplitude of resonance peaks experimentally verified, using mercury plasma discharges 14 p2346 A66-28270

Pulsed toroidal excitation of gas ion lasers extended to drive high power CW laser transitions in Ar, Kr, Cl and Br, noting operating parameters and power 15 p2513 A66-28877

Spectroscopic studies of plasma pulse discharge on hard electrodes in vacuum determining excitation temperatures for various portions of jet 15 p2550 A66-29213

Collision of opposed supersonic jets in pulse discharges, noting formation of shock-constricted plasma regions between electrodes 15 p2551 A66-29216

Plasma formation by dissociation of molecular ions by arc discharge in apparatus for adiabatic plasma confinement 15 p2557 A66-29882

Helium afterglow in HF pulse-discharge plasma at 77 degrees K from dissociative recombination of molecular helium ion with thermal electron 16 p2760 A66-30841

Spectral line shift in low-power spark-discharge argon plasma, noting line broadening and incomplete ionization 16 p2760 A66-30843

Model of discharge in electron bombardment thrusters noting mechanism and interplay between discharge plasma and cathode [AIAA PAPER 66-244] 16 p2791 A66-31153

Jet flow effect on electrical discharge in conducting viscous fluid based on magnetic boundary layer theory 17 p2964 A66-31895

Sinusoidally varying HF electric field effect on glow discharge plasma, showing capability of confinement 17 p2971 A66-32785

Discharge current, discharge voltage pressure and radius of discharge channel for discharge in water induced by tungsten filaments 18 p3142 A66-33841

HF electrodeless plasmatron working at atmospheric pressure, noting plasma discharge and temperature distribution characteristics, obtaining constricted plasma jet 18 p3142 A66-34021

Geometric dimensional, plasma temperature and pressure effects on capillary discharge with evaporating wall /CDEW/ 18 p3143 A66-34028

Three-fluid hydromagnetic computer code for studying dynamic phase of small theta-pinch, noting effects of impurity ionization and radiation losses 18 p3148 A66-34911

Particle concentration and luminescence intensity correlation with electron cyclotron frequency in stationary SHF argon discharge in magnetic field 18 p3152 A66-35080

Pulsed von Ardenne sources having filament substituted by point sources of emission 19 p3406 A66-35585

Transmission of luminous flux due to ionization of gases by high power laser, measuring energy absorption in ionized zone 19 p3403 A66-36255

Hydromagnetic disturbances during radial implosion phase of preionized theta pinch /Cariddi/ 19 p3414 A66-36510

Rotating plasma experiments, discussing creation by discharge, boundary momentum balance and voltage 19 p3415 A66-36514

Interdiffusion of plasma and magnetic fields in pinch and hardcore discharges in large bore discharge tube 19 p3424 A66-36555

Plasma energy loss distribution over linear surface during discharge in Tokamak TM-2 toroidal chamber measured by germanium bolometric probe 19 p3428 A66-36576

Plasma stability, density, energy, etc, resulting from electron beam/plasma interaction which excites microwave oscillations, creating microwave discharge 19 p3430 A66-36587

Nonaxisymmetric mode of standing waves excited in RF discharge by small coil around tube 19 p3404 A66-36759

Simplified model of relation between electron concentration and ionization rate in steady-state inert gas discharge column leading to contraction of column 20 p3608 A66-37464

Electrical control of boundary layer flip-flop fluidistor by disruptive discharges between electrodes producing pneumatic pressure shocks that switch output flow 20 p3501 A66-37648

Microwave and X radiation from plasma produced by electrodeless discharge in hydrogen, showing presence of accelerated electrons leading to plasma oscillations 21 p3783 A66-39023

Modification of conical plasma source of Azovskii design by replacing thin glass conical section with thick-walled neck section of glass bottle 21 p3785 A66-39039

Conical electrode plasma source consisting of organic-glass discharge chamber with cylindrical electrode at apex, examining performance characteristics with pulsed gas admission 21 p3786 A66-39040

Spectroscopic and microwave analysis plasma emission spectrum, density, electron concentration and layer velocity in electrodeless induction discharge 21 p3790 A66-39069

Air flow luminescence front propagation in electromagnet shock tube measured, using phase synchronized high-speed photography 21 p3790 A66-39080

Scintillation analysis of hard X-radiation from high power pulse discharges 22 p3952 A66-39753

Active component of voltage behavior in channel of helium pulse discharge measured, obtaining time dependence of channel resistance, input velocity and energy magnitude 22 p3953 A66-39755

Plasma spectrography in shock tube, determining charged particle concentration 22 p3953 A66-39760

Dynamic stabilization of direct discharge in magnetic field 22 p3957 A66-40579

Longitudinal magnetic field effect upon gas discharge, Zeeman effect and Faraday effect in He-Ne gas laser 22 p3933 A66-40586

Variation of phase constant and damping constant of SHF wave propagating in waveguide incorporating coaxial plasma-filled dielectric tube 22 p3870 A66-40935

Microwave discharge technique for depositing noncrystalline oxide films of silicon, germanium, boron, titanium and selenium on substrates by decomposing compounds by oxygen plasma 23 p4109 A66-41129

Schlieren photographs of plasma discharges in parallel plate rail tube, using pulsed ruby laser as light source 23 p4104 A66-41510

Theta pinch discharge as spectroscopic light source in highly ionized gas

- spectroscopy 24 p4241 A66-42393
 High speed photograph analysis of compressed volumes of plasma formed in reaction of colliding supersonic flares of high power pulsed discharge 24 p4244 A66-42875
- ## PLASMA DISPERSION
- Tonks-Dattner resonances of plasma column irradiated by RF electric field due to plasma acoustic wave propagation 01 p0025 A66-10536
 Singularities of kinetic /plasma/ dispersion equation 01 p0113 A66-10637
 Dispersion relation for plane longitudinal waves within macroscopic theory, considering collisions and viscosity of neutral particles, noting acoustical and ionic modes 03 p0404 A66-12983
 Equilibrium electron density of RF discharge excited with frequency higher than electron-neutral collision frequency and controlled by resonance from plasma dispersion 03 p0405 A66-12986
 Vortical electric field effect on inhomogeneities spreading in weakly ionized plasma /ionosphere/ in magnetic field 04 p0577 A66-13842
 Dispersion equation for LF electronic oscillations in electron beam Maxwell collision-free plasma 05 p0722 A66-14722
 Nanosecond electromagnetic pulse dispersion in longitudinally magnetized plasma confined in coaxial transmission line 06 p0826 A66-16026
 Cylindrical beam plasma system immersed in finite longitudinal magnetic field, deriving dispersion equation for approximate boundary conditions 06 p0921 A66-17161
 Equivalence of oscillating electric field on plasma boundary, with specularly reflecting bounding wall, to unbounded plasma with planar oscillating grid at wall position 08 p1261 A66-18546
 Electromagnetic-wave radiation peculiarities in homogeneous anisotropic dispersive magnetic plasma 09 p1343 A66-20342
 Surface plasma wave dispersion in metals, noting method for solving Kulik equation 09 p1389 A66-20615
 Hydrogen ion concentration, electron density and proton gyrofrequency determined from proton whistler dispersion 10 p1528 A66-21140
 Dispersion in longitudinally magnetized plasma guide studied by resonance change with magnetic field and plasma density 10 p1537 A66-21908
 Dispersion equation for cylindrical plasma with finite electrical conductivity under influence of applied magnetic field and own gravitational field 12 p1920 A66-24191
 Nonlinear polarization of radiation during passage through plasma 13 p2137 A66-25105
 Intense radiation emission at electron gyrofrequency harmonics from magnetoplasmas, discussing resonances, dispersion relations, electron trajectory perturbations, etc 13 p2155 A66-26675
 Dielectric tensor in relativistic Vlasov plasma in electron cyclotron harmonic resonance region 13 p2155 A66-26676
 Relativistic plasma wave dispersion in cyclotron harmonic resonance regions 13 p2155 A66-26677
 Electromagnetic waves in isotropic plasma layer and in plasma layer in magnetic field, determining second harmonics of wave and obtaining nonlinear dispersion equation 14 p2348 A66-28470
 Dispersion relations for waves propagating along warm homogeneous isotropic plasma columns immersed in dielectric medium 15 p2549 A66-28713
 Nonlinear polarization of radiation during passage through plasma 16 p2758 A66-30284
 Longitudinal and transverse waves transformation in nonuniform plasma 17 p2969 A66-32543
 Dispersion and modes of MHD wave propagation in collisionless plasma 17 p2973 A66-32977
 Dispersion relations for small-amplitude electroacoustic wave propagation in dense degenerate plasma, considering ion mobility and ion gas screening effects 18 p3148 A66-34727
 Temperature effect on dispersion and damping of electron plasma wave 19 p3432 A66-36762
 Reflection and transmission of EM waves by dispersive dielectric cold plasma 20 p3611 A66-38394
 LF incompressible waves and gradient instabilities in ionosphere 21 p3733 A66-39183
 Electron-collision-induced magnetoplasma instability, using Boltzmann equation for wave dispersion 21 p3794 A66-39571
 Incoherent scattering of radio waves by plasma extended to include effects of unequal ion and electron temperatures and magnetic field 22 p3867 A66-40550
 Dispersion characteristics of helicon wave in extrinsic solid state plasmas 23 p4034 A66-41018
 Dispersion relation for hydromagnetic waves in infinite collisionless plasma in static magnetic field, using numerical solutions 23 p4103 A66-41488
 Interaction models, negative energy waves and electrostatic instabilities 23 p4103 A66-41489
- ## PLASMA DYNAMICS
- Radiation characteristics of point charge moving along direction of external magnetostatic field in warm anisotropic plasma 01 p0111 A66-10509
 Stagnation enthalpy plasma due to propagation of electromagnetic shock wave 03 p0406 A66-13279
 Kinetic processes in simple plasma, using linear Liouville equation for N-body particle distribution and expanding solution as power series 05 p0727 A66-15259
 Controlled thermonuclear fusion technology including production, heating and containment of extreme temperature plasmas 06 p0917 A66-18394
 Dyadic Green function for anisotropic and compressible media based on reformulation of governing equations for electromagnetic phenomena in compressible anisotropic plasma 06 p0832 A66-16455
 Book on dynamics of rarefied gas discussing kinetic theory, shock wave structure, Couette flow, gas flow between coaxial cylinders and plasma dynamics 08 p1208 A66-19321
 Hydrodynamic equations describing strongly rarefied collisionless plasma 10 p1572 A66-22035
 Plasma kinetics analysis by expanding motion in terms of particle deflection from noninteracting orbits 12 p1923 A66-24570
 Light coupling with phonons, magnons and plasmons, deriving wave equations and coupling constants, observing Raman effect in spin systems and in plasmas, noting second harmonic generation 13 p2132 A66-26154
 Coupled wave equation for homogeneous gyrotropic compressible warm plasma derived, using partial differential equations 14 p2340 A66-27037
 Plasma motion and confinement in octupole magnetic field, noting electron temperature density and field fluctuation 17 p2966 A66-32428
 Prekinetic equations for multicomponent plasma, generalizing Bogoliubov theory 18 p3148 A66-34906
 Atomic energy levels in plasma, considering energy spectrum of hydrogen-like atom in plasma, based on cut-off Coulomb potential model 20 p3607 A66-37373
 Emission spectrum of plasma consisting of colliding blobs, noting photographic and photoelectric recording and ion temperature measurement 21 p3790 A66-39070
 Electro-magnetoplasma gas dynamics /EMPGD/ equations based on single fluid continuum-theory macroscopic plasma-dynamics theory 24 p4244 A66-42834
- ## PLASMA ELECTRODE
- Near electrode layers of potential change on hot electrodes in weakly ionized gas flow 02 p0264 A66-11387
 Brush cathode used in abnormal glow region, determining features of produced plasma 02 p0196 A66-11429
 Effective thickness of plasma sheath at cold electrode determined from electrode-plasma system capacitance 03 p0406 A66-13281
 Electron temperature distribution in plasma diode, discussing electron transport properties and current-voltage characteristics 05 p0615 A66-15535
 Heat transfer measured at different conditions of diode operation, obtaining data on plasma properties and electrode sheaths 05 p0616 A66-15546
 Lifetime and stability of emitter and collector materials in noble gas converters with barium covered tantalum electrodes 05 p0619 A66-15561
 Temperature boundary layer and electric sheath near cooled electrode 05 p0625 A66-15813
 Current exchange between electrodes and working fluid in open-cycle MHD generators 05 p0625 A66-15814
 Electrode size effects on performance of infinitely long MHD power generation duct calculated by conformal mapping, analyzing gas Hall parameter, electrode-insulator length ratio, etc 13 p2000 A66-25735
 Plasma contamination by electrode material in coaxial accelerator reduced by longitudinal magnetic field 13 p2153 A66-26523
 High intensity sharply-focused ion beam from plasma expansion ion source 15 p2552 A66-29405
 Axial pressure asymmetry produced by Hall effect in linear pinch discharge 23 p4104 A66-41512
 Uniform-current-density thermionic and secondary electron emission from dense plasma interaction with negatively biased solid surface at high temperature under high current arc cathode simulated conditions 23 p4107 A66-41908
 Velocity field generated by current flow between electrodes immersed in conducting fluid permeated by uniform magnetic field 23 p4108 A66-42034
- ## PLASMA-ELECTROMAGNETIC INTERACTION
- Langevin equation used to study interaction between radio wave and plasma, taking into account collisions between electrons and heavy ions and electric field caused by group displacement 01 p0022 A66-10322
 Microwave behavior of ferrimagnetics and plasmas - IEE Conference, London, September 1965 01 p0022 A66-10507
 Slotted-sphere antenna immersed in compressible plasma 01 p0037 A66-10513
 Doppler effects of plasmas in semiconductors in microwave field, examining beat frequency relationship to plasma velocity 01 p0120 A66-10514
 Admittance of rectangular waveguide radiating into compressible plasma 01 p0038 A66-10517
 Interaction of microwave signal with semiconductor material examining attenuation, phase shift and reflection of electromagnetic wave passing through plasma 01 p0038 A66-10520
 Parallel plate or circular waveguide geometry for analyzing plasma propagation in presence of magnetic field 01 p0039 A66-10534
 Electron density, collision frequency and electron drift velocity obtained from plasma column interaction with electromagnetic wave on physically separated helix 01 p0025 A66-10537
 Interaction of electromagnetic fields with very hot plasmas using electron cyclotron resonance, noting microwave properties 01 p0026 A66-10545
 Control systems to avoid detuning effects caused by plasma in resonant cavity experiments on plasma acceleration and confinement in HF electromagnetic fields 01 p0040 A66-10546
 Electromagnetic waves and effect of plasma from vehicle exhaust on microwave communication link between in-flight launch vehicle and ground 01 p0027 A66-10549
 Propagation, interaction and scattering of electromagnetic waves on diffusing inhomogeneous cylindrical plasma beam 01 p0027 A66-10550
 Plasma scattering measurements using microwave parallel-plate spectrometer 01 p0028 A66-10565
 Velocity dependence effect of electron

- RF electron plasma diagnostics in magnetic field 18 p3148 A66-34730
- Cosmic ray origin, discussing role of plasma effects in galaxies, radiogalaxies, metagalactic space, etc 18 p3175 A66-34747
- Fluctuation scattering and absorption cross section derived for space and time dispersive plasma 18 p3149 A66-34914
- Transverse boundary effects on ionoacoustic wave propagation in magnetoplasma 18 p3150 A66-34938
- Behavioral equations derived for caustic that envelopes locally-plane cylindrical wave incident on plane surface of layered plasma wedge 19 p3296 A66-35305
- Cooperative scattering of laser light by thetatron plasma 19 p3373 A66-35489
- Growth rate of forward-subliminous-mode electromagnetic wave excited in helical stream-plasma used to calculate Jupiter decametric emission 19 p3463 A66-35924
- Reflection coefficient of electromagnetic wave polarized in plane normal to magnetostatic field and failing from vacuum perpendicularly on plasma boundary parallel to field 19 p3303 A66-36198
- Spatial density distribution in cold electron plasma determined by measuring phase difference between incident and reflected electromagnetic waves 19 p3408 A66-36276
- Plasmoid interaction with magnetic field barrier, explaining acceleration and penetration processes 19 p3408 A66-36279
- Skin-effect theory for axisymmetric plasma-field configurations 19 p3409 A66-36309
- Interaction of dense plasma with HF field of magnetic wave traveling along toroidal discharge chamber, noting connection to nonlinear effects 19 p3416 A66-36525
- Turbulent plasma and UHF radiation interaction, determining conductivity and density 19 p3417 A66-36526
- Electromagnetic instabilities in collisionless plasma obtained, using Liapunov function 19 p3423 A66-36554
- Microwave transmission through turbulent plasma of Zeta machine, examining transport theory by use of Boltzmann equation 19 p3429 A66-36584
- Thruster device using self-induced magnetic Lorentz forces to attain velocities up to 50,000 m/sec for plasma jet ejected by

- electric arc engines 19 p3451 A66-36637
Instrumentation for plasma diagnostics
noting electron density profile, temperature,
ion-atom and electron-atom interaction,
etc 20 p3556 A66-36964
Electromagnetic field penetration into
magnetoactive plasma with calculation of
total surface impedance of 20 p3512 A66-37135
Interaction of decaying waves in
magnetoactive plasma when wave vectors
are oriented along magnetic field 20 p3512 A66-37138
Incidence of cylindrical /spherical/ local-
plane electromagnetic wave on weak plasma,
using ray-optics methods, leading to field
peculiarities 20 p3512 A66-37139
Self-focusing of electromagnetic waves in
nonlinear anisotropic medium 20 p3513 A66-37154
Quasi-static approximation of dipolar
resonance of cold homogeneous cylindrical
magnetoplasma column, examining magnetic
splitting of Herlofson-type resonances 20 p3528 A66-37451
Electrodynamics properties of homogeneous
magnetoactive plasmas including wave
propagation, excitation, scattering, etc 20 p3608 A66-37488
Turnstile multiple-probe microwave
polarimeter for anisotropic plasma
diagnostics 20 p3609 A66-37630
Near electric field of antenna in
magnetoactive plasma, noting frequency
effect 20 p3529 A66-37637
Recognition and subsequent amplification
of difference frequency in plasma-beam
system with two electromagnetic waves
propagating in opposite direction 20 p3519 A66-38006
Interaction between weakly ionized plasma
cylinder and electromagnetic fields, plotting
dependences between resonance current vs
frequency for different gases 20 p3612 A66-38446
Quantum statistical approach to interaction
of electromagnetic waves with hot plasma,
noting renormalization of Coulomb
interaction between charged particles 21 p3776 A66-38545
Spiral instabilities in semiconducting
germanium plasma in radial electric and
axial magnetic fields 21 p3797 A66-38757
Velocity distribution function of plasma in
high intensity perturbation field, noting
linear response for weak interaction and
long wavelengths, connection formulae and
absorption of electromagnetic waves 21 p3777 A66-38760
HF absorption by dense plasma in ion
cyclotron resonance region 21 p3780 A66-39006
Charged particle and electromagnetic wave
interaction with nonequilibrium plasma,
noting conversion of transverse into
longitudinal waves and angular distribution
of scattered radiation 21 p3781 A66-39011
Electric-and magnetic-field parameters
measured during discharge half-cycle in
coaxial plasma source 21 p3785 A66-39038
HF energy absorption effect on plasmoid
passing through magnetic barrier with
superimposed HF field 21 p3786 A66-39045
Plasma flux interaction with external
magnetic fields, noting equations of flexible
current turn correspond to MHD
equations 21 p3787 A66-39047
Polarization interaction of plasma fluxes
moving in transverse magnetic field, using
plasma diagnostic techniques including
superhigh-speed photography and double
electrostatic and magnetic probes 21 p3787 A66-39053
Plasma jet motion from coaxial plasma gun
through magnetic field of quadrupole lens,
examining interaction of plasma with
magnetic field 21 p3788 A66-39054
Potential difference and electric
polarization field measurement in plasma
moving in combined toroidal and helical
magnetic field of stellarator type 21 p3789 A66-39062
Microwave and optical range
electromagnetic wave scattering in plasma,
noting frequency and power of probing
signal 21 p3789 A66-39066
Fast charged particle and electromagnetic
field fluctuations interaction with
nonequilibrium plasma 21 p3791 A66-39155
RF-induced plasma shield propagation and
electron diffusion 21 p3792 A66-39190
Spectral analysis of interacting
electromagnetic, plasma and spin waves in
antiferromagnetic semiconductors and metals
with easy-axis and plane type anisotropy 21 p3804 A66-39311
Cylindrical and spherical waves propagation
in weakly inhomogeneous plasma treated by
geometrical optics, noting caustic surfaces 22 p3951 A66-39648
Electromagnetic wave reflection from
moving plasma characterized by conductivity
for slow waves, calculating reflection and
absorption factors 22 p3952 A66-39649
Self-focusing of TM-type electromagnetic
waves in isotropic plasma and formation of
waveguide channel 22 p3952 A66-39650
Predicted plasma mode in microwave
frequency range for magnetoplasma
excitations in germanium, applying theory to
n-type and p-type lead telluride 22 p3960 A66-39805
Electron-ion motion effect on
electromagnetic wave reflection from
plasma 22 p3955 A66-39997
Shock-tube study of ionization process in
neon and coupling with axially symmetric
magnetic field 22 p3955 A66-40094
Interaction of electromagnetic radiation
falling on plasma surface with plasma
surface wave, showing that wave amplitude
increases or decreases exponentially 22 p3956 A66-40575
Intense HF electromagnetic wave
propagation in isothermal isotropic
nonhomogeneous plasma, noting interaction
with electrons of Langmuir frequency 22 p3956 A66-40576
Kinetic theory of passage of s-and
p-polarized electromagnetic waves through
thin inhomogeneous plasma layer 22 p3867 A66-40587
Plasma-electromagnetic wave interactions
during hypersonic reentry of space vehicle
into lower layers of atmosphere
[ICAS PAPER 66-37] 22 p3957 A66-40666
Resonance scattering of electromagnetic
waves on arbitrary rarefied plasma region
with near-zero intrinsic wave number
relative to small perturbation 22 p3869 A66-40758
Cosmic radio wave, whistler and
transmitted radio wave interactions with
ionospheric magnetoplasma in collision-
dominated, photoequilibrium and
photoionization-dominated regions 22 p3916 A66-40873
Monochromatic wave interaction with
isotropic electron-plasma, determining field
and surface wave generated on basis of
Maxwell equations 22 p3870 A66-40948
Group velocity of wave packet propagating
radially across plasma immersed in static
axial magnetic field, examining ringing
phenomena due to pulsed transmission 23 p4101 A66-41261
Plane homogeneous wave scattering by
cylindrical plasma column with glass wall
placed in vacuum, noting axial drift velocity
and resonance peaks 23 p4101 A66-41366
Electric field normally incident onto warm
semifinite plasma obtained by Wiener-
Hopf technique and Vlasov equation 23 p4103 A66-41492
Flute type oscillations of hot ion plasma in
homogeneous magnetic field with wave-
plasma resonances 23 p4105 A66-41705
Power conversion enhancement of acoustic-
electromagnetic wave coupling across
plasma-air boundary by suitable thickness
and charged particle density 24 p4241 A66-42304
Plasma physics reviews, Volume 2, plasma
confinement including structure of magnetic
fields, plasma equilibrium, MHD stability
and charged particles in EM field 24 p4241 A66-42328
Equilibrium theory of plasma stability in
EM field, applying virial theorem and
variational principle to random infinitesimal
plasma perturbations 24 p4241 A66-42330
Coupled electromagnetic and
electroacoustic wave equations for
propagation in stratified compressible
magnetoplasmas 24 p4171 A66-42379
Ruby laser light scattering measurements
of electron and ion temperatures of
hydrogen and deuterium plasmas produced
in theta pinch devices 24 p4222 A66-42558
Basic relaxation times characterizing
electromagnetic-plasma interactions 24 p4243 A66-42622
Self-impedance of electric dipole immersed
in plasma half-space with finite
temperature 24 p4243 A66-42625
Electro-magnetoplasma gas dynamics
/EMPGD/ equations based on single fluid
continuum-theory macroscopic plasma-
dynamics theory 24 p4244 A66-42834
Electromagnetic wave propagation across
plasma boundary for broad and narrow
spectra 24 p4244 A66-42869
Nonlinear electromagnetic waves in dense
plasma with variable electric conductivity
induced by electric field changes 24 p4244 A66-42870
Approximate differential operator replacing
integral operator, taking ionization losses
into account in electromagnetic cascade
theory 24 p4269 A66-42923
Equations from hydrodynamic equations,
determining steady state fields and currents
in plasma caused by microwave field, using
quasi-linear approximation 24 p4244 A66-42973
Plasma-spin wave interaction in
ferromagnetic semiconductors and metals
with easy plane and easy axis magnetic
anisotropy 24 p4259 A66-43086
Plasma waves and oscillations, examining
HF response of laboratory plasma to
electromagnetic waves 24 p4246 A66-43116
Processes for producing electromagnetic
radiation including applications of
spectroscopic methods, noting relation to
plasma physics 24 p4238 A66-43117
PLASMA ENGINE
SA TWO-STAGE PLASMA ENGINE
Twenty kw solar powdered pulsed plasma
engine system, operating life, reliability,
payload delivery capability, etc
[AIAA PAPER 66-114] 09 p1433 A66-20088
Plasma measurements in cesium electron
bombardment ion engine indicate that
reversed cathode-anode configuration
improves radial ion distribution
[AIAA PAPER 66-246] 10 p1593 A66-21455
Energy efficiency trends in two-stage
repetitively pulsed coaxial plasma
accelerator 12 p1935 A66-23578
Digital computer determination of
equilibrium conductivity effect on MHD
plasma engine performance 12 p1935 A66-23604
Performance characteristics of two-stage
pulsed coaxial plasma engine
[AIAA PAPER 66-240] 12 p1935 A66-24518
Liquid cooled high specific impulse arc jet
engine has measured engine thrust not
completely aerodynamic in nature
[AIAA PAPER 64-669] 14 p2374 A66-27470
Plasma Separator Thruster, advanced ion
thruster design based on independent
operation and optimization of plasma source
and plasma extraction system
[AIAA PAPER 66-598] 18 p3163 A66-34217
PLASMA FLOW
Nonlinear kinetic equation of self-similar
motion of rarefied collisionless electron-ion
plasma 01 p0109 A66-10260
One-dimensional flow of plasma in
magnetic field perpendicular to direction of
flow 01 p0111 A66-10433
Interaction of polarized plasma flows in
uniform transverse magnetic field with
imposed magnetic field induced by
longitudinal \ current-carrying rods 01 p0114 A66-10701
Plasma flow described by dimensionless
similarity parameter characterized by
relative independence of ion and electron
components 01 p0116 A66-11191
Collisionless plasma flow over cone when
flow velocity is greater than ion wave speed
[AIAA PAPER 65-125] 02 p0267 A66-11534
Space charge convection effect on
magnetic field transition, with reference to
pressure-balance condition of unified
rarefied plasma flow and wall 03 p0417 A66-12324
Quasi-one-dimensional ionized gas motion
through channels of arbitrary cross section
in crossed electrical and magnetic
field 03 p0398 A66-12516

- Plasma flow discussing flow mode stabilization in channel formed by two electrodes, flow parameters and plasma conductivity 04 p0529 A66-13553
- Emf induced by plasma moving across constant transverse magnetic field used to determine rate of flow behind shock wave in shock tube 04 p0557 A66-14434
- One-dimensional plasma flow in crossed electric and magnetic fields covering subsonic, transonic and supersonic flow 05 p0720 A66-14508
- Isentropic expansion of argon plasma in Laval nozzle, discussing parallel flow parameters, frozen flow, thermodynamic equilibrium, energy balance, etc 05 p0720 A66-14509
- Electric shock tube flow modes at low pressure and conditions for shock wave detached from plasma flow 05 p0659 A66-14706
- Traveling wave interaction in dense plasma, discussing harmonic response, transients and wave growth, damping factors and Hall effect 05 p0720 A66-14708
- Chapman-Cowling formalism used to obtain transport equations for charged particle species in low energy three-component two-temperature plasmas 05 p0727 A66-15540
- Plasma velocity in weakly ionized gas with strong magnetic field and neutral component velocity determined independently [AIAA PAPER 66-4] 06 p0916 A66-16255
- Thin electrostatic sheath near body immersed in weakly ionized flowing gas in mean free path regime for relatively small Debye length 06 p0921 A66-17102
- Text on MHD from basic equations through motion and wave structure of ideal gas, nonideal gas and conducting fluids, with appendix on shock waves 06 p0921 A66-17109
- Behavior of small cylindrical Langmuir probe in steady low density flow of argon plasma [AIAA PAPER 66-5] 07 p1034 A66-17880
- Potential and forces acting on charged body in rarefied plasma flow 07 p1090 A66-18141
- Electrodeless MHD induction chamber with radial magnetic field acting with AC-fed exciting coil results in additional emf 08 p1168 A66-18894
- Smooth plasma polarization obtained by injecting plasma fluxes toward each other across magnetic field 08 p1264 A66-19179
- Plasma diagnostics by spectroscopic techniques, measuring polarity dependences of temperature and charged particle concentration for flows with shock wave and periodic structure 08 p1265 A66-19470
- Stationary nonviscous plane flow of conducting plasma in narrow channel subject to transverse magnetic field and Hall effect, using sectionized electrodes, noting boundary layer near anode 09 p1407 A66-20135
- Magnetospheric electric fields, noting implications of magnetic storm theories 10 p1528 A66-21149
- Electrical conduction behavior of laminar arc-heated flow in contact with cooled anode, noting anode current parameters [AIAA PAPER 66-188] 10 p1561 A66-21435
- Friction factors and mean electrical conductivity for argon arc plasma flow, examining laminar-turbulent flow modes [AIAA PAPER 66-189] 10 p1561 A66-21436
- Plasma pulses free-streaming from source plate into vacuum along magnetic field 10 p1567 A66-21821
- Instability of HF electron oscillations in plasma flows with nonuniform velocity profile along lines of force of external confining magnetic field 10 p1569 A66-21991
- Plasma wind tunnel simulation of solar wind effect on Pioneer spacecraft [AIAA PAPER 66-153] 11 p1682 A66-22208
- Average electrical conductivity and state of ionization in RF plasma flow device [AIAA PAPER 66-165] 11 p1742 A66-22209
- RF electromagnetic fields to control state of flowing thermal plasma [AIAA PAPER 66-166] 11 p1742 A66-22210
- Doppler shift measurements using low resolution monochromator to determine mass motion in plasmas [AIAA PAPER 66-177] 11 p1735 A66-22213
- Arc heating, self-magnetic acceleration and supersonic flow in plasma thrusters [AIAA PAPER 66-237] 11 p1760 A66-22220
- Imp-I observations of solar wind properties, including interaction with geomagnetic field and flow characteristics of positive ion component 11 p1775 A66-23132
- Unsteady two-dimensional axisymmetric plasma flows, classifying isentropic or incompressible flows according to magnetic field configurations 11 p1746 A66-23234
- Interaction of polarized plasma flows in uniform transverse magnetic field with imposed magnetic field induced by longitudinal current-carrying rods 11 p1747 A66-23303
- Langmuir probe measurements in hypersonic plasma flow, evaluating properties of plasma jet wind tunnel, electron temperature and plasma density 12 p1920 A66-23853
- Plasma flow described by dimensionless similarity parameter characterized by relative independence of ion and electron components 12 p1920 A66-24012
- Charged particle motion in time dependent axially symmetric magnetic field, using drift theory of plasma radial compression 12 p1922 A66-24462
- Gas flow regulator system conforming to prescribed time-dependent program, based on mass flow limitation properties of sonic orifices and polynomial approximation for exponential 12 p1859 A66-24713
- Tenuous hydrogen plasma injection into axial magnetic cusp field at entrance of long solenoid 13 p2147 A66-25749
- Nonlinear kinetic equation of self-similar motion of rarefied collisionless electron-ion plasma 13 p2148 A66-25977
- Spatial velocity distribution of plasma in transverse magnetic field 13 p2151 A66-26508
- Steady state motion of Couette plasma flow in electric field, assuming transfer of collective motion is effected by ions and heat transfer by electrons 14 p2339 A66-26774
- Modified MGD equations describing plane nonstationary flow in magnetic field perpendicular to flow 14 p2345 A66-28067
- Field theory, variational calculus, dynamic programming and Pontryagin maximum principle approaches to plasma optimal controllability 15 p2548 A66-28520
- Concentration waves excited by internal modulation of charged particle concentrations in cross section of plasma flow analyzed for various velocities of flow 15 p2550 A66-29212
- Plasma flows past bodies in magnetic field, using plasma gun, analyzing downstream wake of ordinary hydrodynamic shock wave 15 p2553 A66-29743
- Ionospheric plasma movement, neutral-neutral and charged-neutral particle collisional interactions, electron-ion collision frequencies, mobility and LF Hall conductivity, irregularities, etc 15 p2495 A66-30053
- Disturbances about solid body in flowing low density plasma applied to satellite-ionosphere interactions and Langmuir probe data analysis 16 p2759 A66-30373
- One-dimensional plasma flow across confining magnetic field 16 p2760 A66-30804
- Electrical power dependence of ideally sectioned Faraday MHD generator on nonequilibrium plasma flow Mach number 16 p2637 A66-31606
- Detection and measurement techniques for collisionless MHD shock wave propagation in interplanetary space, using bistatic-radar Earth-to-spacecraft transmissions 17 p3002 A66-32522
- Arc operation under nonsteady electrical inputs, noting initial conditions, energy equation solution, temperature profiles, application of Green function for moving boundary problem, etc 17 p2970 A66-32769
- [AIAA PAPER 66-480] 17 p2970 A66-32769
- Solar wind and type I comet tails, noting solar wind and plasma velocities as compared with Mariner II measurements 17 p3012 A66-33391
- Tail of Tomita-Gerber-Honda /1964 c/ comet, noting importance of spacecraft measurement of solar wind plasma direction 17 p3012 A66-33394
- Comet gas trail connection with interplanetary plasma and solar activity, noting agreement of results with Mariner II measurements 17 p3012 A66-33397
- Compositional, anisotropic and nonradial flow characteristics of solar wind as observed by ARC high-resolution Pioneer VI plasma probe 18 p3170 A66-34542
- Effect of mass entrainment from vacuum tank and electrode erosion on plasma velocity determined from mass flow and thrust of Hall accelerator [AIAA PAPER 65-297] 18 p3147 A66-34585
- Ion drift and diffusion of magnetically confined plasma due to inclination of conducting end-plate having electron sheath which reflects ions 18 p3149 A66-34912
- Instability of HF electron oscillations in plasma flows with nonuniform velocity profile along lines of force of external confining magnetic field 18 p3150 A66-34968
- Braking of bodies moving in rarefied plasma 19 p3275 A66-35256
- Hydrodynamic stability of inhomogeneous plasma flows relative to potential electromagnetic oscillations 19 p3408 A66-36272
- Motion of plasma stream injected transverse to magnetic field, examining stream action as it crosses region where magnetic field lines reverse direction about field null line 19 p3426 A66-36568
- Plasmoid motion in magnetic field of toroidal solenoid, examining contribution to closing currents and decontamination from heavy ions 19 p3427 A66-36571
- Self-similar motions in variable conducting fluid in strong magnetic field 20 p3607 A66-36988
- Axisymmetric viscous flow with electric conductivity around barrier, deriving existence theorem for zero Reynolds number 20 p3609 A66-37568
- Nonequilibrium ionization phenomena interaction with nonuniform flow of plasma, reviewing nonequilibrium characteristics for uniform flow with electric and magnetic fields 20 p3610 A66-37982
- Macroscopic hydromagnetic equations with magnetic viscosity for collisionless plasma, determining Larmor radius ratio to characteristic length, using Vlasov equation in drift frame 20 p3610 A66-38054
- Plasma flow velocity profile measurement by electrostatic probe detection of plasma drop caused by gas breakdown due to focused giant pulse laser 20 p3612 A66-38395
- Operation and design principles of mass spectrometer using system of diaphragms and modulators to extract well-constrained ion bunch from plasma beam 21 p3784 A66-39031
- Nonisotropic nonequilibrium lithium plasma flow through nozzle with allowance for friction and heat transfer 21 p3694 A66-39088
- Stationary nonviscous plane flow of conducting plasma in narrow channel subject to transverse magnetic field and Hall effect, using sectionized electrodes, noting boundary layer near anode 21 p3793 A66-39407
- Flow of strongly rarefied ionized plasma past electrically charged body solved by kinetic and Poisson equations in absence of magnetic field 21 p3795 A66-39604
- Free jet MHD accelerator for determining minimum length of crossed field accelerators, noting operation and solution in closed form 21 p3699 A66-39645
- Shock waves and periodic structures of supersonic plasma flows and effect on velocity of foremost luminous front 22 p3953 A66-39759
- Chapman-Cowling formalism used to obtain transport equations for charged particle species in low energy three-component two-temperature plasmas 22 p3955 A66-40096
- Behavior of small cylindrical Langmuir probe in steady low density flow of argon plasma [AIAA PAPER 66-5] 22 p3918 A66-40350
- Plasma stream conductivity and velocity measurement, using systems of primary coil and several secondary coils 22 p3921 A66-40899
- Monograph on kinetic theory of plasmas,

deriving state equation, Maxwell equation for plasma-magnetic field interaction and boundary layer heat transfer
 expressions 23 p4102 A66-41400

Plasma flow processes in slip type traveling wave accelerator investigated to determine degree to which one-dimensional channel flow is used in design and scaling laws 23 p4053 A66-41917

Sliding magnetic field effect on electric current in conducting annular channel flow, noting energy-transfer efficiency and acoustic resonance 23 p4107 A66-42030

Velocity field generated by current flow between electrodes immersed in conducting fluid permeated by uniform magnetic field 23 p4108 A66-42034

Convective processes in magnetoactive plasma flows transverse to homogeneous magnetic fields, based on multifluid equations derived from Boltzmann equation for ionization and recombination reaction 24 p4245 A66-43069

PLASMA FLUX MEASUREMENT

Multichannel Fabry-Perot interferometer noting design, application, construction, calibration and measurements on plasma 02 p0232 A66-12201

Pinch-effect theory in electron-hole plasmas, noting power input-asymptotic axial temperature interdependence in semiconductors 07 p1103 A66-18217

Neutral point between two parallel line currents in highly conductive plasma, noting topological flux change and relation to solar flares [AIAA PAPER 66-152] 10 p1565 A66-21683

Errors of charged-particle analyzer resulting from expansion of plasma beam within and without 11 p1744 A66-22452

Plasma flux instability in inhomogeneous medium 12 p1919 A66-23773

Probing technique for magnetic field in TA 2000 discharge device, noting plasma instabilities effect on oscillation 13 p2137 A66-25122

Solar wind parameters and geomagnetic activity determined from satellite plasma experiments and observations of magnetopause locations 13 p2075 A66-26368

Electron density in shock-produced argon plasma measured by microwave reflection probe 14 p2340 A66-27025

MHD approximation of solar plasma fluxes observed by Mariner II as free rotating jets 15 p2574 A66-29077

Electron density of plasma measured by multibeam Fabry-Perot radio interferometer 17 p2963 A66-31831

Explorer XVIII plasma flux measurement data analysis, plasma detector, map of transition zone between magnetosphere and solar wind and associated energy spectra 18 p3168 A66-34351

Plasma fluxes inside magnetosphere detected by spherical electrostatic analyzers mounted on Elektron II satellite 18 p3196 A66-34871

Langmuir probe curves for pulsed plasma obtained by time-sampling probe technique and compared with BBM analysis for ion saturation current 19 p3405 A66-35411

Magnetospheric boundary phenomena, noting dependence of charged particle observations on character of associated magnetic fields 20 p3641 A66-38329

Mass and energy spectra of ions in Bostik-type plasma source studied by time-of-flight mass spectrometer 21 p3784 A66-39033

Plasma flux reflection from magnetic surface for nonlinear reflected plasma in region of particle trajectory rotation 21 p3787 A66-39049

Correlation between lunar eclipse brightness and interplanetary plasma flux, examining lunar luminescence 23 p4131 A66-41862

PLASMA FREQUENCY

SA OSCILLATION FREQUENCY

Frequency dependence of plasma parameters in positive column with nonhomogeneous HF field 01 p0115 A66-11054

Phonon field effect on plasma frequency of dense electron gas for nonzero temperatures 02 p0267 A66-11708

Field analysis of plasma filled disk-loaded waveguide, obtaining TWT interaction

impedance 03 p0339 A66-12436

Dielectric properties of noble gases afterglows following electrodeless discharge over signal frequency and pressure ranges 04 p0551 A66-13813

Reflection and transmission of charged particles incident on plane moving plasma shock with small thickness compared to Larmor radius of particles 04 p0552 A66-14019

Admittance of short dipole antenna in ionosphere measured during rocket flights, deducing values of plasma frequency 05 p0669 A66-14945

Transverse diffusion theory and static and HF conductivity of plasma in strong magnetic field 09 p1406 A66-19962

Simultaneous comparison of RF standing wave impedance probe, plasma frequency probe and resonance rectification probe techniques in determining ionospheric electron density 10 p1529 A66-21155

Transport properties of III-V and II-VI semiconducting compounds with zincblende structure under uniaxial stress, calculating galvanomagnetic coefficients, Faraday effect, plasma frequency, etc 10 p1578 A66-21665

Plasma frequency determined by microwave bridge measurement of cut-off effect of plasma near electron cyclotron resonance 10 p1536 A66-21863

Collisionless nonlinear coupling of electromagnetic waves near electron gyrofrequency by plasma electrons 13 p2145 A66-25734

Small frequency shift measurement method for X-band plasma-loaded cavities 13 p2084 A66-26562

Ionospheric electron density profile and Schmilch integral equation for oblique incidence 13 p2075 A66-26740

Excitation of longitudinal waves in semiinfinite plasma by given external field for arbitrary law of electron reflection from plasma boundary, considering diffusion reflection and showing surface charges on plasma boundary 14 p2341 A66-27154

Velocity-dependent collision frequency effects on wave-plasma interaction described with aid of effective collision frequency and effective plasma frequency 15 p2554 A66-29750

Plasma frequency measurement based on Hall effect proportional to electron concentration 15 p2453 A66-29931

Scattering cross section for Langmuir waves and transverse waves using nonlinear integral equations describing plasma interaction of electromagnetic waves 17 p2873 A66-32238

Alouette satellite observation of ionospheric cyclotron resonance, obtaining plasma frequency at particular height 17 p2920 A66-33085

Nonlinear generation of combination frequencies due to strong uniform parallel electric fields in homogeneous plasma 18 p3142 A66-33918

Crossed-field electron beam stability for arbitrary values of Q /ratio of plasma frequency to cyclotron frequency/ 20 p3606 A66-38404

Spherical plasma probe behavior in AC potential with frequency near plasma frequency 22 p3954 A66-39811

Input resistance of short filamental antenna in warm isotropic plasma from kinetic /Vlasov equation/ rather than hydrodynamic approach 22 p3874 A66-39939

Antenna in interplanetary plasma, noting fluctuation noise in exosphere and radiation impedance when exposed to solar wind 22 p3877 A66-40466

Increment of constant HF electron flux in resonance probe determined for case of large constant potential, noting role of plasma 22 p3920 A66-40770

Excitation of longitudinal waves in semiinfinite plasma by given external field for arbitrary law of electron reflection from plasma boundary, considering diffusion reflection and showing surface charges on plasma boundary 24 p4245 A66-42974

PLASMA GENERATION

Electron beam generating plasma in tube aligned with magnetic field, measuring plasma density, beam velocity distribution and RF noise spectrum 02 p0266 A66-11442

Pulsed laser-created plasmas by light absorption by skin effect 03 p0403 A66-12975

Plasma generation by focusing laser beam in air at atmospheric pressure and room temperature indicate connection with luminous energy absorption during breakdown 05 p0692 A66-14538

Evolution of luminous zone of plasma generated by focusing laser beam in air 05 p0723 A66-15097

Plasma generation of ionized gases in electromagnetic field and properties 05 p0729 A66-15816

Mass and energy state dependence of plasma, generated by titanium source, on electrical operating conditions of source 06 p0919 A66-16878

Explorer XV and Telstar I satellite trapped radiation measurements, noting connection between magnetospheric trapped particles and natural plasmas in space 07 p1131 A66-18084

Heating by laser beam with application to lithium, noting use for high temperature plasma production 08 p1233 A66-18972

Small-diameter linear electric shock tube, noting design characteristics, construction, operative functions, etc 10 p1519 A66-21516

Plasma generation by fission fragment ionization of noble gases, discussing theory, ionization tube and data analysis 10 p1564 A66-21545

Plasma production by optical irradiation of gases and by solids, considering interaction of laser radiation with surfaces and irradiation of particles of solid material in vacuum [AIAA PAPER 66-174] 11 p1742 A66-22212

Propagation of circularly polarized plane electromagnetic waves through helium plasma along direction of static magnetic field, determining electron density 13 p2154 A66-26672

Propagation of linear polarized electromagnetic waves through helium plasma along magnetic field, measuring phase and intensity of components of electric field 13 p2155 A66-26673

Energy-rich plasmas produced by light pulses from Q-switched laser, noting energy transfer from electrons to ions during expansion process 14 p2308 A66-27607

Adiabatic compression device for plasmas containing hot ions 14 p2348 A66-28312

Plasma electron density and formation determined, using Fabry-Perot resonator 16 p2756 A66-30104

Ionization of air with laser radiation in spike mode 16 p2762 A66-31150

Multiphoton plasma production and stimulated recombination radiation in lead telluride, considering electron-hole pair production rate 17 p2975 A66-31884

High density plasma injection into magnetic-mirror trap by generation of plasma vortex structures under mirror coils 17 p2967 A66-32429

Surface ionization production of plasma containing negative ions, noting Q machine experiments with Cs and Cl molecules 17 p2970 A66-32654

Glowing high-voltage discharge produced with hollow anode in discharge gap of various configurations 18 p3152 A66-35079

Plasma formation by fast atom injection into mirror magnetic field and well, showing effect of geometric transition on hydromagnetic drift and ion-cyclotron instability 19 p3421 A66-36541

Hot plasma production in Ogra-II by injection of fast hydrogen atoms into magnetic mirror trap with stabilizing hexagonal field 19 p3421 A66-36542

High ion and electron temperature plasma produced by fast internal injection from turbulent plasma jet and contained in magnetic mirror trap of composite type 19 p3421 A66-36544

Plasma formation by high energy molecular hydrogen ion injection followed by dissociation and accumulation in static magnetic mirror configuration 19 p3422 A66-36546

Beam-plasma interaction used to generate fully ionized plasma and enhance component temperature for study of plasma heating and burnout 19 p3429 A66-36585

Production of hot plasma by Penning

- discharge in inhomogeneous magnetic field accelerating ions to high energy level by strong electric field 19 p3431 A66-36592
- Plasma production by firing giant pulse laser at solid deuterium pellet /ice/, noting strong anisotropy in plasma 19 p3432 A66-36595
- outburst 19 p3432 A66-36595
- High temperature high-density plasma from single solid particle of lithium hydride suspended in vacuum, using ruby laser irradiation 19 p3432 A66-36596
- Plasmoid in shock tube with electrical discharge, measuring pressure, velocity and conductivity with magnetic probe 20 p3611 A66-38119
- Plasma generation by electron beam with developing instability, noting plasma parameters 21 p3782 A66-39019
- XUV C, Ti, Mn, Fe, Ni, Cu, Zn and Ar line spectra and continuum radiation spectra in plasmas produced by focused ruby laser beam 22 p3954 A66-39812
- Formation of organic compounds under conditions of thermal equilibrium, noting aromatic compounds in solar nebula and gases activated to plasma state 22 p3860 A66-40483
- High speed photograph analysis of compressed volumes of plasma formed in reaction of colliding supersonic flares of high power pulsed discharge 24 p4244 A66-42875
- Laboratory methods of producing ionized gases, examining properties of real plasmas 24 p4247 A66-43118
- Controlled thermonuclear fusion program noting nuclear reactions, plasma production and confinement, etc 24 p4247 A66-43121
- PLASMA GENERATOR**
- SA MAGNETOHYDRODYNAMIC GENERATOR**
- Arc plasma generator for anode research, noting design operation techniques and results 10 p1485 A66-21687
- [AIAA PAPER 66-162] 10 p1485 A66-21687
- Spectroscopic and optical studies of high pressure underexpanded jet produced by expanding DC arc plasma generator through sonic orifice 10 p1565 A66-21688
- [AIAA PAPER 66-164] 10 p1565 A66-21688
- Radiation energy transfer rates characteristic of environments for advanced entry missions, examining laboratory simulation techniques, particularly plasma arc generators 11 p1687 A66-22866
- Plasma behavior and duct dimensions in direct current MHD generators of open-circuit type 13 p1997 A66-25114
- High power generators for studying interaction of oscillating fields with plasmas 14 p2246 A66-26818
- Production of neutral or ionized gas plasmoids by focusing beam of coherent light emitted by ruby laser on target of pure metal or metal containing gas 14 p2339 A66-26819
- Inverse brush cathode design that functions like brush cathode in producing negative glow plasma 15 p2550 A66-28728
- Emission spectroscopy of halides of carbon, silicon and boron in plasma 16 p2763 A66-31190
- reactor 16 p2763 A66-31190
- Arc burning mechanism of vortex-stabilized plasmatrons, noting effect of arc shunting on volt-ampere characteristics 18 p3143 A66-34034
- Trace impurity determination in semiconductors by spectral analysis, using plasma generator 19 p3442 A66-35944
- Hypersonic plasma generator for reentry vehicles with arc tunnel experimental data and analysis of nonequilibrium chemical reaction between cesium atoms and ionized air species 20 p3497 A66-37158
- Generator of plasma with supercritical rotational velocity in crossed electric and magnetic fields 21 p3789 A66-39063
- Characteristics of plasma generator with transpiration-cooled porous electrode, noting related heat transfer studies 24 p4161 A66-42263
- High temperature physicochemical characteristics of thermoelectric plasma, examining operating principles of several versions of plasma 24 p4243 A66-42537
- generator 24 p4243 A66-42537
- Nonlinear wave propagation in MHD, noting resulting shock waves conversion rate of magnetic energy into plasma energy and production of high temperature plasma samples 24 p4246 A66-43114
- Plasma thermocouple and MHD generator as energy conversion devices, with bibliography 24 p4162 A66-43119
- PLASMA GUN**
- Sufficiently pure plasmoids obtained, using coaxial plasma gun operating in waiting regime 10 p1571 A66-22010
- Energy distribution of hydrogen plasma from coaxial gun 10 p1571 A66-22013
- Rail-type plasma gun analysis using analog computer for application to space vehicle propulsion 11 p1743 A66-22405
- Electrical propulsion of space vehicles using solar energy, electrostatic drive, drifting field plasma accelerator, etc [ONERA TP 328] 12 p1937 A66-24904
- Delays effect on performance of coaxial plasma guns with about 20 kv applied, shown to produce fast burst of clean plasma containing pure hydrogen ion 13 p2000 A66-25750
- Triple-probe measurement of electron temperature of transient plasma from plasma gun 13 p2149 A66-26242
- Distribution of current and associated field in coaxial plasma gun, noting plasmoid formation from drift 13 p2153 A66-26521
- Laminar jets in nitrogen from DC plasma torch analyzed, using schlieren and spectroscopic techniques, noting jet form dependency on Reynolds number 14 p2344 A66-27849
- Predicted and observed calorimetric exhaust efficiencies of capacitor powered coaxial plasma guns 15 p2551 A66-29275
- [AIAA PAPER 65-340] 15 p2551 A66-29275
- Quasi-steady-state operation of arc thruster obtained with pulse time of few hundred microseconds, producing continuous plasma stream 15 p2572 A66-29276
- [AIAA PAPER 65-338] 15 p2572 A66-29276
- Plasma flows past bodies in magnetic field, using plasma gun, analyzing downstream wake of ordinary hydrodynamic shock wave 15 p2553 A66-29743
- Energy spectrum of neutral hydrogen atoms from coaxial plasma gun 17 p2962 A66-31823
- Hexapole magnetic field for guiding accelerated plasma injected from inductive conical theta pinch gun 17 p2962 A66-31824
- Conical induction plasma gun construction in strongly preionized regime and results of electrostatic probe measurements made with discharge camera 17 p2969 A66-32547
- Coaxial plasma gun performance in longitudinal magnetic field, noting conditions of generation of single plasmoid 18 p3151 A66-35070
- Plasmoid structure produced by coaxial plasma gun with interchangeable polarity electrodes, noting experimental setup, particle velocity, density, energy, etc 18 p3151 A66-35071
- Hydrogen density in coaxial plasma injector prior to application of high voltage to electrodes, noting experimental setup and results 18 p3151 A66-35072
- Sufficiently pure plasmoids obtained, using coaxial plasma gun operating in waiting regime 19 p3407 A66-36094
- Energy distribution of hydrogen plasma from coaxial gun 19 p3407 A66-36097
- Plasmoid interaction with magnetic field barrier, explaining acceleration and penetration processes 19 p3408 A66-36279
- Containment of plasma trapped in magnetic well by guiding plasma from coaxial gun along injection line by converging magnetic field 19 p3412 A66-36498
- Aspa device designed for study of composition, energy and density distributions produced when plasma blob is injected into mirror trap with adiabatic plasma compression 19 p3423 A66-36550
- Current jet and plasma produced by coaxial plasma gun which is source of abundant slow deuterium plasma and fast plasma, examining acceleration mechanism 19 p3425 A66-36565
- Plasma generating gun using coaxial electrodes, gas injection and preionization device for regulation with plasma purification by injection into magnetic field with double curvature 19 p3427 A66-36572
- Plasmoid composition effect on electrode geometry in coaxial plasma gun, decreasing impurity concentration by gun design and electrode material choice 21 p3785 A66-39037
- Electric and magnetic-field parameters measured during discharge half-cycle in coaxial plasma source 21 p3785 A66-39038
- Plasma jet motion from coaxial plasma gun through magnetic field of quadrupole lens, examining interaction of plasma with magnetic field 21 p3788 A66-39054
- Plasma injection from coaxial plasma gun into magnetic trap with opposite fields 21 p3788 A66-39055
- Plasma electron beam gun at rough vacuum pressures for welding ferrous and aluminum alloys 22 p3925 A66-40270
- Pinch phenomena and current distribution in coaxial plasma gun 23 p4101 A66-41295
- Energy storage film capacitors for pulsed plasma thrusters developed for coaxial plasma gun and pulsed arc gun [AIAA PAPER 65-337] 24 p4261 A66-42780
- PLASMA HEATING**
- Cyclotron heating of electrons creating plasma at HF field 01 p0115 A66-11108
- Heating of corona and chromosphere for generating solar wind 03 p0421 A66-12848
- Heating processes in plasma jet with hot interior and colder sheath, determining velocity and temperature 04 p0554 A66-14297
- Heating of completely ionized quasi-neutral gas by Joulean energy dissipation 04 p0556 A66-14420
- Two models /for collisional heating and collisionless transit-time heating/ of cylindrical plasma heated by oscillating magnetic field 07 p1086 A66-17652
- Dissipative effects in converging cylindrical symmetric shock wave, considering ion and electron heat conductivity, ion viscosity and energy exchange 07 p1025 A66-18180
- Resonance heating of decaying cold plasma by fast magnetoacoustic wave of quasi-stationary longitudinal electromagnetic field 07 p1090 A66-18258
- Mirror ratio is principal parameter controlling heating of plasma by electron beam in magnetic mirror system 07 p1090 A66-18260
- Resonance heating of decaying cold plasma by fast magnetoacoustic wave of quasi-stationary longitudinal electromagnetic field 09 p1409 A66-20902
- Mirror ratio is principal parameter controlling heating of plasma by electron beam in magnetic mirror system 09 p1409 A66-20904
- Experiments on ion cyclotron heating of plasma generated by Joule heating in Heliotron-B 12 p1919 A66-23851
- Injection of plasma blobs into mirror trap and subsequent compression of plasma by increasing magnetic field, using longitudinal current, noting X-ray radiation 12 p1925 A66-24877
- Heating of small plasmoids impinging on axisymmetric magnetic field 13 p2152 A66-26512
- Thermalization of plasma by creating imploding shock wave driven by laser energy release 13 p2106 A66-26683
- Ion heating by ion cyclotron wave generation in dense plasma created by HF generator in metal discharge chamber, determining ion temperature 14 p2341 A66-27150
- Plasma discharge in three-stage device suitable for accelerating and heating of plasma 14 p2343 A66-27608
- HF heating of dense plasma by resonance excitation of cyclotron-type ion waves and fast magnetoacoustic waves 16 p2756 A66-30095
- Dependence of plasma heating and containment on distribution of magnetic field along trap axis in mirror trap 16 p2758 A66-30295
- Nonresonant coupling of, RF power to plasma during ion cyclotron resonance heating in Model C stellarator 17 p2962 A66-31822
- Steady state resonance absorption of electromagnetic wave and cyclotron heating of low-density plasma 17 p2965 A66-32321
- Plasma heating rate in stochastic electric fields determined, using nonrelativistic collisionless lossless test

particle 17 p2967 A66-32436
 Electron-cyclotron heating of plasma via high power oscillator, noting experimental setup and characteristics 18 p3151 A66-35068
 Plasma confinement, heating and losses in theta pinch experiment /Pharos/ with extended current pulse 19 p3414 A66-36509
 Stable and unstable behavior of preheated hydrogen plasma in linear and cusped theta pinches 19 p3414 A66-36511
 Plasma equilibrium in torus with HF fields and plasma heating caused by beam of escaping electrons, measuring plasma density, time-dependent plasma luminescence, etc 19 p3424 A66-36558
 Plasma convergence, structure and heating by collisionless cylindrical shock waves, discussing wave front 19 p3424 A66-36560
 Joule heating of hydrogen plasma in toroidal Tokamak-3 device by annular electric current, noting stability and plasma interacting with diaphragm 19 p3427 A66-36574
 Beam-plasma interaction used to generate fully ionized plasma and enhance component temperature for study of plasma heating and burnout 19 p3429 A66-36585
 Electron beam interaction with plasma in mirror magnetic fields and heating of plasma components under beam instability, noting oscillation spectrum and thermal energy 19 p3430 A66-36586
 Plasma adiabatic compression by external magnetic field increasing with time in toroidal chamber, providing two-stage plasma heating 19 p3430 A66-36588
 Plasma turbulent heating by direct current discharge in magnetic mirror trap, analyzing adiabatic compression 19 p3430 A66-36589
 Ion cyclotron resonance heating and trapping and adiabatic compression of plasma in QP machine 19 p3431 A66-36590
 Plasma electrons heating by UHF fields analyzed in DC magnetic field, varied for HF electromagnetic or plasma wave propagation 19 p3431 A66-36591
 HF heating of plasma in metallic vacuum chamber, noting generation and absorption of ion cyclotron waves, estimating plasma density 19 p3431 A66-36593
 Ion cyclotron resonance heating applied to C stellarator plasma formed by ohmic heating, noting Alfvén wave generation by Stix coil 19 p3432 A66-36594
 Cerenkov absorption of whistlers in nonhomogeneous plasma cylinder, noting electron heating 21 p3780 A66-39005
 Cyclotron resonance in nonhomogeneous plasma cylinder with HF heating 21 p3780 A66-39007
 Collisionless heating of plasma cylinder by HF field 21 p3781 A66-39008
 Time dependent thermal behavior of ionospheric electron gas 22 p3913 A66-40552
 Injection of plasma blobs into mirror trap and subsequent compression of plasma by increasing magnetic field, using longitudinal current, noting X-ray radiation 23 p4099 A66-41084
 Magnetic pumping heating rate for plasma, using conversion of organized energy into random energy by charged particle collisions 23 p4100 A66-41250
 Collision-free shock heating of plasma without standard dissipative force 23 p4131 A66-42038
 Plasma temperature increase by randomization of kinetic plasma energy through acceleration stages, obtaining higher plasma velocities 24 p4244 A66-42888
 Ion heating by ion cyclotron wave generation in dense plasma created by HF generator in metal discharge chamber, determining ion temperature 24 p4244 A66-42970

PLASMA INSTABILITY
 Equilibria and stability of confined arc column noting electron temperature, temperature gradients and radiative transport [AIAA PAPER 65-541] 01 p0109 A66-10182
 Ion escape from magnetic mirror trap due to nonlinear stage of plasma instability related to loss cone 01 p0109 A66-10261
 Shear instability of spatially dependent electron current flowing in plasma 01 p0110 A66-10325
 Saturation and short-time behavior of

unstable ion waves in collisionless alkali plasmas in thermal equilibrium 01 p0110 A66-10339
 Hysteresis of screw instability of positive plasma column in magnetic field 02 p0265 A66-11418
 Microwave scattering from nonequilibrium plasmas where electrons have large steady drift velocity with respect to ions 02 p0266 A66-11479
 Ionization excitation of ionic sound in nonequilibrium discharge plasma and resultant instabilities 03 p0400 A66-12835
 Plasma instabilities in dipole magnetic field 03 p0400 A66-12893
 Finite gyro-radius corrections to hydromagnetic equations for Vlasov plasma 03 p0400 A66-12950
 Microinstability of mirror-confined plasma with non-Maxwellian particle distribution and propagating unstable waves 03 p0401 A66-12952
 Electrostatic ionic instability of cesium Q type machines for hot plasma-beam interactions in VLF range in sheath and plasma 03 p0404 A66-12984
 Kinetic theory of unstable plasma covering growth and stabilization of spatially homogeneous electron plasma in uniform neutralizing positive charge field, Pines-Schrieffer and formally equivalent kinetic equations and Balescu 03 p0406 A66-13359
 Kinetic energy in unstable and weakly stable plasma noting optical and acoustical modes in electron-ion system, Vlasov term in quasi-linear theory and two-particle correlation term 04 p0550 A66-13406
 He-Ne laser incorporated into arm of interferometer used to measure fringe shift in small transient plasma 04 p0529 A66-13743
 Microinstabilities in transversely magnetized semiconductor plasmas, discussing two-stream and resistive type instabilities 04 p0562 A66-13745
 Inhomogeneous plasma from hot-cathode arc discharge at various pressures using various gases, recording oscillations from plasma instability with Langmuir probes 04 p0552 A66-13868
 Plasma instability in oscillating discharge, with linear analysis of several types 05 p0723 A66-15161
 Microinstabilities in collisionless plasma due to Boltzmann equation 05 p0726 A66-15253
 Laminar Landau collisionless damping of finite amplitude disturbances in collision-free plasmas 05 p0727 A66-15257
 Asymptotic methods for hydrodynamic stability of slightly nonuniform plasma 05 p0727 A66-15261
 Inhomogeneous plasma from hot-cathode arc discharge at various pressures using various gases, recording oscillations from plasma instability with Langmuir probes 05 p0727 A66-15459
 Current-convective and flute instabilities of spatially inhomogeneous current in plasma, noting effect of current density and temperature 06 p0914 A66-16140
 Instability of plasma with spatially inhomogeneous current at frequencies above ion-cyclotron frequency, noting electron charge convection and wave-particle interaction 06 p0914 A66-16141
 Electron heating effect on acoustic instability of weakly ionized plasma in electric field 06 p0914 A66-16143
 Plasma convective instability, discussing effect of axial density gradient on weakly ionized state 06 p0917 A66-16516
 First mode of flute disturbances in axisymmetric plasma will be unstable for very large Larmor ion radius 07 p1086 A66-17653
 Phase velocity and growth coefficient of instability of plasma with discontinuous velocity distribution, noting role of ion distribution function 07 p1087 A66-17852
 HF electron oscillations in inhomogeneous plasma, noting kinetic drift instability added to hydrodynamic instability 07 p1087 A66-17915
 Resistive instability of shearing magnetic fields in incompressible plasma explored by perturbation procedure 07 p1088 A66-17947
 Complex Wentzel-Kramer-Brillouin phase

integral method and low density universal instability caused by finite Debye length 07 p1088 A66-17957
 Wentzel-Kramer-Brillouin calculation of exact solution of universal instability and drift approximation 07 p1089 A66-17958
 Kelvin-Helmholtz instability in fully ionized plasma in magnetic field, assuming variable streaming velocity 07 p1089 A66-17961
 Quasi-linear theory of plasma instabilities and density fluctuations 07 p1102 A66-18210
 Plasma instabilities, comparing experimental and theoretical results concerning pinch effect, helical growing waves, oscillations, etc 07 p1103 A66-18215
 Instability of cold plasma interacting with helical proton beam in magnetic field 07 p1091 A66-18428
 Flute modes at ion gyrofrequency propagating perpendicular to magnetic field 08 p1260 A66-18535
 Instability initiating plasma transport across magnetic field in plasma discharge occurring after plasma decayed for some time, damping loss by addition of cold electrons to discharge 08 p1260 A66-18544
 Electron cloud drifting axially outside conducting toroidal cylinder in presence of radial electric and azimuthal magnetic fields 08 p1260 A66-18545
 Turbulent condition in plasma beam with virtual cathode characterized by electric field oscillation spectrum, off-center plasma torch spinning into ion side and ion acceleration 08 p1264 A66-19270
 Interstellar and intergalactic plasma instability effects on energy distribution functions, cosmic ray diffusion and direction and interspace field 08 p1285 A66-19448
 Instability of noncollision plasma in strong external field in terms of development of nonpotential oscillations 09 p1408 A66-20599
 Plasma convective instability, discussing effect of axial density gradient on weakly ionized state 09 p1409 A66-20897
 Interaction of primary unmodulated beam of electrons and plasma in magnetic field 10 p1559 A66-21349
 Plasma density instability induced by electron-hole generation in impact ionization as affected by electric field 10 p1575 A66-21536
 Plasma instability in solids occurring in microwave frequency region 10 p1576 A66-21537
 Anomalous diffusion and instabilities of argon plasma in strong magnetic field 10 p1564 A66-21568
 Kadomtsev instability characteristics in terms of onset and spectra of strong oscillations in positive column discharge [AIAA PAPER 66-157] 10 p1565 A66-21685
 Turbulent fluctuation effect on dielectric properties of weakly turbulent plasma at LF and electron plasma frequency 10 p1567 A66-21815
 Reflection coefficient and critical length determination for unstable convective modes in weakly homogeneous plasmas 10 p1567 A66-21819
 Microinstability limitations of DCX-1 energetic plasma from gas dissociation and Lorentz force dissociation 10 p1568 A66-21826
 Quasi-linear current instability in two-temperature plasma for Coulomb collision and free electron acceleration 10 p1569 A66-21972
 Instability of axially symmetric inhomogeneous plasma with flowing current 10 p1570 A66-22006
 Solid state amplifiers using streaming carriers analyzed, noting different role played by collisions when electron stream interacts with TM and TEM waves 10 p1584 A66-22072
 Behavior of system of infinite compressible fluids under gravity and magnetic field action, with MGD equations showing instability at plasma boundaries 11 p1748 A66-23418
 One-dimensional model for constant-area rectangular and coaxial Hall-current generator geometries, estimating MHD characteristics for nonequilibrium plasma 12 p1802 A66-23609
 Plasma flux instability in inhomogeneous

medium 12 p1919 A66-23773

Growth rate of sheet pinch instability calculated in small Larmor radius limit, using integration along unperturbed orbits, finding instability driven by resonant electrons 12 p1951 A66-24573

Relative drift between ions in adjacent layers exciting Kelvin-Helmholtz instability analyzed in thermally ionized cesium plasma, noting range of frequency oscillations 12 p1923 A66-24577

Injected plasma spiral instability in transverse magnetic fields, demonstrating existence of rotating mode in semiconductor disk 12 p1931 A66-24803

Spiral shaped perturbations of plasmas in Corbino disk shaped semiconductors during application of axial magnetic and radial electric fields 12 p1931 A66-24804

Wave interaction underlying diocotron effect and model of instability presentation, analyzing cylindrical wall-enclosed charge layers for application to plasmas and gas discharges 13 p2136 A66-25041

Double stream instability in finite diameter beams analyzed by numerical experiments on digital computer, showing electron trapping as cause of RF current saturation 13 p2137 A66-25044

Stabilization of drift instability in traps with magnetic field increasing toward plasma boundary, taking into account Taylor instabilities 13 p2139 A66-25335

Instability due to coupling between compressibility and resistivity in cylindrical plasma with surface currents, noting growth rate near acoustic velocity 13 p2142 A66-25705

Helical instabilities in magnetoplasmas studied, using low-power level microwave propagation techniques 13 p2143 A66-25716

LF flute instability of collisionless plasma in curved mirror-type magnetic field 13 p2143 A66-25718

Electrostatic instabilities of hydrogen discharge in strong electric field and effects on ohmic heating and electric conductivity 13 p2144 A66-25721

Drift instabilities in thermionic plasmas, noting excitation of LF oscillations with finite perturbation amplitude around cathode ion sheath 13 p2145 A66-25729

Plasma confinement in adiabatic trap formed by combined magnetic field, noting lifetime and instability 13 p2146 A66-25738

Flute instability of beta and neutral plasma contained in mirror machine, considering particle motion for solution of Vlasov equation, obtaining eigenvalue equation for potential of flutelike perturbation 13 p2146 A66-25742

Ion escape from magnetic mirror trap due to nonlinear stage of plasma instability related to loss cone 13 p2148 A66-25979

Electrical fluctuations in argon-potassium nonequilibrium plasma measured and correlated with theories of electrothermal and magnetoacoustic waves 13 p2149 A66-26261

Equatorial electrojet cross section profile, describing longitudinal variations, current density, magnetic field produced and electron drift velocity 13 p2074 A66-26357

Instabilities in plasma trapped by transverse magnetic field 13 p2151 A66-26509

Plasmoid collapse in growing external magnetic fields, noting conversion of field energy to ion energy 13 p2152 A66-26511

Instability of plasmoid injected into axisymmetrical magnetic field 13 p2152 A66-26517

Velocity gradient instability for monotone distribution function in guiding center plasma 13 p2154 A66-26670

Transport equation for classical unstable electron plasma extended to quantum mechanical multicomponent case, rewriting kinetic equation 13 p2155 A66-26674

Excitation of azimuthal wave number equals 2 mode by helical instability for helium plasma 13 p2156 A66-26686

Diffusion coefficient calculated for fluctuations due to flute instability in low pressure Penning discharge, using measured correlation times and flute amplitudes 13 p2156 A66-26688

Two types of plasma instability affecting phenomena of transverse diffusion in

magnetic field and particle scattering across lines of force 14 p2339 A66-26815

Desirable TEM wave instabilities in solid state plasma in electromagnet field 14 p2362 A66-27515

Microwave radiation from inductive posts of indium antimonide in broadband spectrum occurring when placed in DC magnetic field and pulsed to average electric field, results suggest solid state plasma instabilities 14 p2363 A66-27517

Quasi-linear perturbation theory of transverse electromagnetic waves from instabilities in nonthermal magnetoactive plasma, using Boltzmann equation, applied to magnetospheric MHD emissions 14 p2286 A66-27982

Type I solar radio bursts possibly caused by interaction of coronal electrons and finite-amplitude MHD pulses 15 p2576 A66-29133

Plasma stability analysis, discussing low density fluid equations, variational principle and sufficiency condition at moderate densities, electric field effect, etc 15 p2554 A66-29746

Electrostatic instabilities in finite mirror-confined plasmas with loss-cone particle distributions, noting convective and nonconvective types 15 p2554 A66-29747

Relation between Kelvin-Helmholtz instability and resistive drift instabilities in plasma 15 p2555 A66-29758

Current-convective and flute instabilities of spatially inhomogeneous current in plasma, noting effect of current density and temperature 15 p2556 A66-29870

Instability of plasma with spatially inhomogeneous current at frequencies above ion-cyclotron frequency, noting electron charge convection and wave-particle interaction 15 p2556 A66-29871

Electron heating effect on acoustic instability of weakly ionized plasma in electric field 15 p2556 A66-29873

Negative-mass instability in threshold properties of energetic proton plasma 16 p2757 A66-30151

Explosive and nonexplosive onsets of instability by nonlinear analysis 16 p2757 A66-30152

Modes of Kadomtsev plasma instability in helium positive column, noting diffusion loss 16 p2757 A66-30188

Magnetization-density-wave instability of quantum plasma in random phase approximation 16 p2757 A66-30192

HF instabilities in plasma situated in superimposed magnetic and radial electric fields 16 p2758 A66-30293

Collisionless Boltzmann and Maxwell equations for plasma instability of plasma without external magnetic field for transverse oscillation propagating perpendicular to streams 16 p2760 A66-30817

Quasi-linear theory of plasma cyclotron instability for one-dimensional oscillation spectrum, noting energy of interaction with electromagnetic field, ion velocities, etc 16 p2762 A66-31172

Nonlinear instability theory of weakly inhomogeneous hot-ion plasma when loss cone exists in ion velocity distribution 17 p2964 A66-31890

HF flute unstable oscillations occurring when low temperature plasma is added to high temperature one, finding frequency and growth rate are of order of cyclotron harmonic frequency 17 p2966 A66-32423

Gravitational instability of magnetoplasma in radial electric field, noting resistive drift modes, stabilization criterion effect of Coriolis force, Landau damping, etc 17 p2966 A66-32425

Current instability of plasma injected into germanium, noting effect of strong electric field in presence of temperature gradient 17 p2987 A66-33313

Incoherent scattering of microwaves by HF oscillations resulting from beam-plasma instability 18 p3066 A66-33669

HF electron oscillations in inhomogeneous plasma, noting kinetic drift instability added to hydrodynamic instability 18 p3146 A66-34175

Instability of three- or four-component beam plasma for various coupling waves, graphically analyzing dispersion equation

derived from Boltzmann-Vlasov equations 18 p3146 A66-34472

Frequency and wave-vector-dependent dielectric tensor of drifting plasma in magnetic field calculated, based on macroscopic diffusion equation 18 p3146 A66-34473

Interstellar and intergalactic plasma instability effects on energy distribution functions, cosmic ray diffusion and direction and interspace field interaction 18 p3169 A66-34477

Two-stream instability for longitudinal waves in plasma traversed by ion beam 18 p3148 A66-34909

Atmospheric argon Poiseuille plasma arc instability in axial magnetic field examined, noting frequency and shapes of stability curves 18 p3149 A66-34916

Oscillations of inhomogeneous weakly ionized plasma situated in external electric and magnetic field, noting causes and conditions of plasma instability 18 p3151 A66-35066

Plasma instability in HF electric and constant magnetic field for sufficiently low pressure 18 p3151 A66-35067

Plasma stabilization mechanism for electron beam caused density variation, noting use of nonlinear effects 18 p3152 A66-35082

Nonlinear effects for immersion of positive plasma column in longitudinal magnetic field near critical strength, noting occurrence of resonance in received signal 19 p3407 A66-36078

Instability of axially symmetric inhomogeneous plasma with flowing current 19 p3407 A66-36090

Magnetic viscosity effect on Rayleigh-Taylor instability and Kelvin-Helmholtz instability of superposed fluids 19 p3408 A66-36271

Finite Larmor radius, inhomogeneity of magnetic field and particle collision effects in plasma instabilities analysis, noting open mirror defect 19 p3412 A66-36496

Anomalous escape of ions from plasma contained in magnetic mirror into loss cone studied for evaluation feasibility of controlled thermonuclear reaction in magnetic mirror trap 19 p3415 A66-36517

Instabilities in plasma produced by magnetron source diffusing along static magnetic field, examining effect on particle diffusion perpendicular to magnetic field 19 p3416 A66-36521

Drift-wave instability in weakly inhomogeneous fully ionized plasma confined in strong magnetic field in Q machine 19 p3416 A66-36523

Hydromagnetic, resistive and microinstabilities in plasmas, noting particle collisions and effect and validity of Maxwell-Vlasov equations with Fokker-Planck collision term 19 p3417 A66-36528

Inhomogeneous plasma instability for cylindrical rotational geometry examined, using Vlasov equations 19 p3418 A66-36534

Microinstability-driven losses in energetic proton plasma formed by single transit of 600-keV hydrogen ion beam through magnetic mirror field 19 p3421 A66-36543

Microinstability due to non-Maxwellian velocity distribution in hot electron plasma within magnetic mirror configuration 19 p3422 A66-36545

Ionization excitation of ionic sound in nonequilibrium discharge plasma and resultant instabilities 19 p3433 A66-36777

Magnetic field, microscopic particle distribution function, plasma instabilities and wave-particle interactions of solar wind 20 p3632 A66-38061

Instability of noncollision plasma in strong external field in terms of development of nonpotential oscillations 20 p3611 A66-38133

Magnetospheric plasma instabilities, discussing resistive, flute type, whistler and HF two-energy component electrostatic loss-cone instability 20 p3642 A66-38333

Flute instability in trapped-particle plasma, discussing toroidal plasma discharge 20 p3612 A66-38428

Stabilization criteria for drift instabilities in inhomogeneous plasma with external electric field derived from drift wave frequency variation 20 p3612 A66-38430

Spiral instabilities in semiconducting germanium plasma in radial electric and axial magnetic fields 21 p3797 A66-38757

Flute instability in trapped-particle plasma, discussing toroidal plasma discharge 21 p3777 A66-38961

Stabilization criteria for drift instabilities in inhomogeneous plasma with external electric field derived from drift wave frequency variation 21 p3777 A66-38963

Plasma-particle interaction in absence of magnetic field, leading to electrostatic and transverse electromagnetic waves instability 21 p3783 A66-39025

Ion beam interaction with electron plasma and resultant parameter changes and cyclotron instability 21 p3783 A66-39026

Instability of wave of given frequency in plasma creates waves of different frequency, velocity and oscillations and leads to energy transfer between waves 21 p3784 A66-39027

Charged particle diffusion in plasma discharge in chamber with nonconducting walls, noting relations of various parameters 21 p3784 A66-39030

GVL-2 magnetic trap filling with plasma, considering possibilities of suppressing instabilities in trap and intensifying process of plasma accumulation 21 p3789 A66-39061

Instability of three-component plasma system studied to analyze beam-plasma interaction, noting restraining effect of electrons on instability of beam-ion coupling 21 p3792 A66-39188

Plasma filament instability suppression by applying external magnetic field 21 p3792 A66-39307

Nonlinear thermomagnetic wave theory and amplification in case of plasma instability 21 p3792 A66-39310

Solid state plasma microwave oscillations and dispersion conditions for ion-cyclotron instability excitation in semiconductor 21 p3804 A66-39335

Quasi-linear current instability in two-temperature plasma for Coulomb collision and free electron acceleration 21 p3794 A66-39551

Homogeneous rotating low density plasma permeated by magnetic field with anisotropic velocity distribution may exhibit hose instability as well as gravitational instability 21 p3794 A66-39562

Electron-collision-induced magnetoplasma instability, using Boltzmann equation for wave dispersion 21 p3794 A66-39571

Solid state plasma microwave oscillations and dispersion conditions for ion-cyclotron instability excitation in semiconductor 22 p3959 A66-39705

Stabilization of drift instability in traps with magnetic field increasing toward plasma boundary, taking into account Taylor instabilities 22 p3952 A66-39712

Plasma instability in HF electric field perpendicular to given magnetic field under low pressures 22 p3952 A66-39754

Nonlinear theory on effect of drifting cone plasma instability on particle drift from adiabatic trap 22 p3955 A66-40191

Charged particle collisions effect on drift instability of low pressure plasma studies, using Landau collision integral as model collision integral 22 p3956 A66-40192

Rayleigh-Taylor instability of plasma is unaffected by inclusion of Hall current and electron-inertia terms in generalized Ohm law 22 p3956 A66-40420

LF plasma instabilities causing pumpout losses prevented by scaling law determination for stable confinement in toroidal magnetic wells 23 p4102 A66-41482

Resistive ballooning mode relation to universal instability in gravitational field and role in toroidal plasma with rotational transform 23 p4102 A66-41483

Interaction models, negative energy waves and electrostatic instabilities 23 p4103 A66-41489

Instabilities resulting in loss of energetic electrons and fast electrons analyzed in electron cyclotron plasma confined by magnetic mirrors 23 p4103 A66-41490

Electric and thermal conductivity effects on MHD instabilities in diffuse linear pinch 23 p4105 A66-41706

Potential oscillations in neutral completely ionized plasma-neutral charged-particle beam

system in HF electric field and growth rate of plasma instability 23 p4106 A66-41707

Diffusion in potassium plasma in presence of universal instability, examining dependence of diffusion coefficient on magnetic field for given density range 23 p4106 A66-41708

Finite resistivity instabilities of sheet pinch examined, using numerical analysis in terms of normal modes 23 p4106 A66-41709

LF drift waves observed in thermally ionized cesium plasma in magnetic field with variable curvature 23 p4106 A66-41710

Drift cyclotron instability observed in toroidal plasma 23 p4109 A66-42064

Time of confinement of hot plasma in magnetic bottle without touching material walls, examining instability types, pinch configurations, etc 24 p4246 A66-43113

PLASMA JET

SA ARC JET

Chemical reaction occurring between low temperature plasma jet and nearly inviscid fluid/water/ 02 p0264 A66-11388

DC plasmatron operation for plasma jet at high velocity 03 p0400 A66-12832

Velocity distribution in plasma jet by Doppler shift on spectral lines 03 p0403 A66-12972

Temperature of hydrogen plasma jet at atmospheric pressure by measuring electric field on profile of Stark broadened line 03 p0403 A66-12973

Electrical characteristics of plasma torch types with plasma jets used in buildup welding 03 p0374 A66-13120

Stabilizing flute and sausage instabilities of plasma jets by transversed magnetic field 03 p0406 A66-13192

Heating processes in plasma jet with hot interior and colder sheath, determining velocity and temperature 04 p0554 A66-14297

Heat transfer from plasmas to water-cooled tubes, using nitrogen, hydrogen and argon with Reynolds number range of 400 to 3500 and various power levels 06 p0971 A66-16432

Low temperature arc plasma, formed in plasmatron by passing plasma-forming gas through electric arc, applied to powder metallurgy 06 p0887 A66-16695

Distribution of specific thermal flux on body surface heated by plasma jet 09 p1407 A66-20139

Low density plasma jet wind tunnel for investigation of low density high-enthalpy high-speed flow 09 p1364 A66-20253

Vapor jet pressure and velocity in heavy-current arc between two graphite electrodes, comparing results from universal 09 p1368 A66-20826

Variation of thermal radiation emitted with mass flow rate of argon plasma torch 10 p1621 A66-21798

Spectroscopic investigation of argon jet temperature at outlet of plasmatron nozzle, measuring temperature of plasma jet 11 p1745 A66-22589

Microwave plasma torch noting design, operation and application 12 p1857 A66-23813

Excitation temperature measurement of arc-heated argon plasma jet by spectroscopic method at supersonic nozzle outlet 12 p1920 A66-23854

Lithium, ammonia and hydrogen-fueled MPD arc jets 12 p1936 A66-24520

[AIAA PAPER 66-239] 12 p1936 A66-24520

Treatment of steel with laser beam, obtaining precision holes without affecting microhardness of metal 12 p1888 A66-24898

Calorimetric measurement of local temperatures in nitrogen plasma jet at atmospheric and subatmospheric pressures [DGRN PAPER 66-002] 13 p2082 A66-26493

Resonance peaks due to electromagnetic scattering by argon plasma jet observed during change in electron concentration, noting dependence of scattering on argon flow rate and electric power of arc 14 p2341 A66-27151

Calorimetric measurement of local temperatures and velocities in weakly ionized nitrogen plasma at subsonic velocity and thermodynamic equilibrium 14 p2294 A66-27487

Velocity of plasma jet ejected from electric-arc device measured through jet brightness fluctuation 14 p2344 A66-27834

Arc discharges in supersonic flows,

discussing problem of obtaining stable transverse electric arc in supersonic plasma jet 14 p2375 A66-28177

Nature of forces causing adhesion of coatings produced by plasma jet sputtering techniques 15 p2505 A66-28752

MHD approximation of solar plasma fluxes observed by Mariner II as free rotating jets 15 p2574 A66-29077

Deuterium plasma jet injection into simple biconical cusped magnetic field, noting ion energy transfer to electrons and plasma potential variations 15 p2554 A66-29748

Interaction of plasma jets ejected from electrode spots with accelerating magnetic field as possible cause of electrode polarity effect on flat-electrode-type plasma acceleration 16 p2757 A66-30106

Scattering of light from pulsed ruby laser by plasma jet, noting cross section, electron-phonon interaction, etc 16 p2716 A66-30139

High intensity fast molecular beams obtained by skimming and collimating core of supersonic plasma jet from arc-heated source 16 p2760 A66-30431

Interplanetary plasma stream analysis using bistatic radar transmissions, considering wave propagation in presence of uniform magnetic field, stream velocity, Faraday rotation, etc 16 p2801 A66-30716

Spectroscopy of plasmajets and electric arcs, noting spectral intensity, line width, etc 16 p2707 A66-31188

Spectroscopic data from argon and nitrogen supersonic plasma jets, noting line width, intensity, temperature, etc 16 p2763 A66-31189

Velocity distribution in laminar plasma jet determined from energy equation and spectroscopic measurement of temperature distribution 17 p2967 A66-32459

Laminar, transitional and turbulent flow regions in laminar plasma jets, noting variation of noise level and mixing length with Reynolds number at 400 amp 17 p2968 A66-32460

HF electrodeless plasmatron working at atmospheric pressure, noting plasma discharge and temperature distribution characteristics, obtaining constricted plasma jet 18 p3142 A66-34021

Ionization of low temperature supersonic plasma jets, noting kinetics of elementary processes, gas dynamic parameters and effects of combustion and alkali metal admixtures 18 p3143 A66-34030

Plasma jet electrical conductivity, using inductances with different diameters as measurement device 18 p3144 A66-34101

Radiation spectra of plasma jets from IR to UV, determining electron density and argon excitation temperature, noting bremsstrahlung 18 p3144 A66-34103

Plasma jet deflection in magnetic field set up by current flowing through four bars so that directions of flow were opposite in adjacent bars 19 p3426 A66-36569

Applications of plasma jets with enclosed flames in space industry, noting design of burners 19 p3281 A66-36601

DC plasmatron operation for plasma jet at high velocity 19 p3433 A66-36774

Heat-flux density transmitted by relatively broad low-velocity argon plasma jet to vertical cold plate 20 p3608 A66-37461

Deflection of plasma jet generated by coaxial gun and injected along axis of quadrupole magnetic field eliminates neutral gas, producing complete ionization 20 p3610 A66-38058

Metal plasma jet injection into vacuum, determining mean time-dependent parameters of motion 21 p3791 A66-39083

Distribution of specific thermal flux on body surface heated by plasma jet 21 p3793 A66-39411

Simulated meteor ablation tests using artificial meteors of gabbro, basalt and steel in ultrahigh enthalpy plasma jet [ICAS PAPER 66-40] 23 p4147 A66-41009

Plasma jet motion in inhomogeneous transverse magnetic field, noting drift velocity 23 p4099 A66-41130

Spectroscopic measurements of electron densities and temperatures in argon-hydrogen plasma jet 23 p4068 A66-41290

Collisions between plasma jets in homogeneous and longitudinal magnetic

- field 23 p4105 A66-41704
- Resonance peaks due to electromagnetic scattering by argon plasma jet observed during change in electron concentration, noting dependence of scattering on argon flow rate and electric power of arc 24 p4244 A66-42971
- PLASMA LAYER**
- Wave attenuation with phase velocity greater than speed of light in infinite plasma layer between ideal metallic plates 02 p0268 A66-11785
- Discharge in large radius cylindrical hollow cathodes with uniform plasma layer above flat end face investigated experimentally 02 p0199 A66-11812
- Surface impedance of nonhomogeneous plasma with sharply varying parameters, noting skin effect and permittivity gradient 02 p0192 A66-11840
- Effective thickness of space charge layer at surface of cylindrical body immersed in plasma 08 p1264 A66-19185
- Source function of inhomogeneous optically dense plasma layer determined, using Ritz method 08 p1265 A66-19309
- Electromagnetic wave propagation characteristics of plasma slab on surface of arbitrary impedance, using simplified approach 09 p1342 A66-20257
- Collective energy losses by plasmas in crystals caused by excitation of volume or surface plasmons 09 p1427 A66-20350
- Inhomogeneous thick plasma layer formed above metallic surface, effect on reflection and absorption of electromagnetic waves 09 p1347 A66-20788
- Radar cross section of metal bodies covered by thin plasma calculated, using computer technique, noting modification of TE and TM mode reflection coefficients 10 p1503 A66-21645
- Kinetic approximation of passage of electromagnetic wave through plasma layer, noting angle of incidence of wave on layer 10 p1506 A66-21993
- Kinetic theory of passage of electromagnetic waves through plasma layer 10 p1506 A66-22004
- Surface waves supported by plane boundary of semiinfinite region of gyrotropic plasma analyzed when magnetostatic field direction is parallel to interface and propagation direction 14 p2241 A66-27961
- Large annular steady state stable hot-electron plasma blanket formed by magnetically trapping electrons originating in intense arc gas discharge 14 p2347 A66-28304
- Electromagnetic waves in isotropic plasma layer and in plasma layer in magnetic field, determining second harmonics of wave and obtaining nonlinear dispersion equation 14 p2348 A66-28470
- Reflection, transmission and absorption coefficients of circularly polarized electromagnetic wave incident on plasma layer situated in stationary magnetic field 14 p2348 A66-28471
- Algorithm for SHF diagnostics of plane-laminar plasma 15 p2549 A66-28669
- Electron component of plasma sheet of terrestrial magnetic trail, noting energy distribution and densities 16 p2792 A66-30142
- Model of reentry plasma layer consisting of magnetic line source in ground plane, determining plasma temperature effect, computing radiation pattern of far-zone field 17 p2875 A66-32387
- Kinetic approximation of passage of electromagnetic wave through plasma layer, noting angle of incidence of wave on layer 18 p3072 A66-34970
- Kinetic theory of passage of electromagnetic waves through plasma layer 19 p3303 A66-36088
- Inhomogeneous thick plasma layer formed above metallic surface, effect on reflection and absorption of electromagnetic waves 22 p3862 A66-39847
- Chapman-Ferraro hollows for system of parallel line currents enveloped by stratified corpuscular flux 22 p3975 A66-40806
- PLASMA LIFETIME**
- Plasma injected into magnetic trap with aid of conical theta pinch investigated to determine ion and electron energy, lifetime and charged particle concentration variation 17 p2969 A66-32546
- PLASMA LOSS**
- Collective energy losses by plasmas in crystals caused by excitation of volume or surface plasmons 09 p1427 A66-20350
- Probe and microwave interferometric measurements performed on plasma in Q devices for data on plasma losses 11 p1744 A66-22444
- Reflection and loss of particles in collisionless plasma in one-dimensional magnetic mirror field in presence of parallel electric field 18 p3148 A66-34910
- Transient axial flow of plasma to ends of coils in causing loss in theta pinch 19 p3413 A66-36506
- Plasma confinement, heating and losses in theta pinch experiment /Pharos/ with extended current pulse 19 p3414 A66-36509
- Microinstability-driven losses in energetic proton plasma formed by single transit of 600-keV hydrogen ion beam through magnetic mirror field 19 p3421 A66-36543
- Plasma confinement and loss rate in low-density C stellarator discharges under zero ohmic heating current 19 p3428 A66-36579
- Loss rate comparison for alkali plasma produced by contact ionization in stellarator and toroidal device with minimum mean-B properties 19 p3428 A66-36581
- End loss mechanism of slow theta pinch plasma analyzed, using mirror coil in which plasma did not drift to wall 21 p3795 A66-39582
- Toroidal plasma equilibrium prevailing in Q device with curved magnetic lines analyzed from two-fluid equations 23 p4106 A66-41711
- PLASMA OSCILLATION**
- Perturbation theory of nonlinear oscillations in collisionless plasma 01 p0109 A66-10256
- Coronal shock waves causing type II bursts of solar radiation, determining amplitude of plasma oscillations and radio emission intensity 01 p0131 A66-10266
- Current-current and current-density correlation functions for longitudinal oscillations of plasma in uniform magnetic field 01 p0109 A66-10319
- Linear oscillations in relativistic Maxwellian plasma, detailing dispersion relations in collisionless cold electron-beam system 01 p0110 A66-10326
- Oscillation frequency and amplitude variation with parameters of contact-ionization cesium plasma device 01 p0111 A66-10391
- Propagation of longitudinal oscillations in plasma with thermal velocity spread 01 p0029 A66-10576
- Microwave oscillations in plasma-beam systems 01 p0113 A66-10595
- Oscillations of electron-ion plasma in external electric field assuming uniformly accelerated motion of plasma components 02 p0268 A66-11784
- Transient uniformity modification of plasma inhomogeneity may control location and growth of plasma electron oscillation 02 p0269 A66-11975
- Spectral analysis of drift oscillations expanding crosswise in external magnetic field of inhomogeneous plasma, based on perturbation theory 03 p0396 A66-12380
- Static force factor introduced into kinetic longitudinal plasma oscillation equation, noting Landau damping factor 03 p0397 A66-12382
- Nonlinear oscillations of plasma behind formation front of charged particles 03 p0397 A66-12383
- Radio galaxies contribution to kinetic temperature of intergalactic gas on basis of cosmological model 03 p0426 A66-12909
- Oscillations of plasma column with electromagnetic field retardation effect 03 p0401 A66-12955
- Longitudinal nonlinear traveling oscillations in hot electron plasma 03 p0401 A66-12956
- Resonance probe noting HF voltage to excite plasma oscillation for electron density 03 p0403 A66-12971
- Contribution of nonlinear interaction of surface oscillations in plasma to emission of electromagnetic radiation from plasma 04 p0552 A66-13882
- Penetration of external longitudinal electric field into semibounded plasma containing electron beam in absence of instabilities in system 04 p0556 A66-14416
- One-dimensional self-consistent problems involving interaction between Langmuir and ionic-acoustic plasma oscillations caused by induced combination scattering of former on latter 04 p0556 A66-14418
- Coulomb collision effect on transverse electron oscillations in fully ionized hot plasma determined by Fokker-Planck equation 05 p0721 A66-14715
- Plasma ion and electron oscillation 05 p0725 A66-15235
- Oscillation frequency of plasma and corresponding collision frequency calculated, using Vlasov equation 05 p0725 A66-15242
- Excitation of oscillations in interacting flows of inhomogeneous plasma moving along external magnetic field with velocity varying over flow cross section 06 p0913 A66-16138
- Particle distribution of charged-particle beam injected into semiinfinite plasma 06 p0913 A66-16139
- Stability of monoenergetic ion beam injected across magnetic field into plasma-filled magnetic trap, noting oscillation excitation 06 p0914 A66-16142
- Combination scattering of HF electromagnetic and plasma oscillations propagating over longitudinal standing waves of ionic sound 06 p0914 A66-16145
- Initial value problem for Boltzmann-Vlasov and Poisson equation for one-dimensional plasmas 06 p0915 A66-16161
- Simultaneous electron and ion oscillations on discharge gap of four-electrode chamber 06 p0919 A66-16881
- Magnetic field effect on gravity and sound waves in nonuniform plasma 06 p0956 A66-17046
- Lagrangian formulation of wave kinetics in weakly turbulent plasma, taking into account interaction of plasma oscillations 07 p1085 A66-17647
- Flute oscillations of rarefied plasma situated in cylindrically symmetric magnetic field with nonzero shear 07 p1086 A66-17650
- Helical oscillations of plasma immersed in time-varying static magnetic field, measuring frequency, amplitude and transition modes 07 p1103 A66-18216
- Landau solution of plasma oscillation problem, discussing dielectric function, Lorentzian distribution and cut-off distribution 08 p1260 A66-18536
- Collisionless damping of nonlinear plasma oscillations, with exact solution of Vlasov equation for resonant electrons 08 p1260 A66-18537
- Parametric resonance excitation of plasma oscillation 08 p1262 A66-19013
- Time dependent frequency spectra variations of plasma oscillations induced by electron beams during instability onset 08 p1263 A66-19177
- Electromagnetic wave scattering due to plasma oscillations in plane plasma layer used as evidence of noise existence in turbulent plasma 08 p1184 A66-19273
- Interaction of drift oscillations in homogeneous weakly turbulent plasma which tends to develop flute instability along magnetic field 08 p1264 A66-19274
- Geometrical optics method for differential equations of fourth order in applications to LF plasma oscillations 08 p1265 A66-19472
- Spatial dispersion of long-wave optical oscillations of lattice in polar semiconductor 08 p1276 A66-19610
- Plasma oscillation of electrons in Be, Mg, Al, Si, Ge, Sn, Sb and Bi studied by electron bombardment of thin foil of these solids 09 p1429 A66-20842
- Plasma oscillation of electrons in aluminum compound eutectoids studied, using energy analysis of electrons passed through thin foil of eutectoid, noting dependency of oscillation energy on component grain size 09 p1429 A66-20843
- Plasma oscillation of valence electrons and exciton in alkali halides, measuring differential cross section, dispersion relation and loss peak in spectrum 09 p1430 A66-20844
- Plasma oscillation of conduction electrons in sodium 09 p1430 A66-20845

- Solar radiation effect on Langmuir frequency, noting ionization of cesium vapor at low potential 09 p1409 A66-20925
- Spontaneous LF oscillations in alkali plasma when applying DC voltage 10 p1559 A66-21196
- Varying instability frequency in simulated arc jet-Hall accelerator [AIAA PAPER 66-156] 10 p1559 A66-21422
- Landau damping and velocity Fourier transform of initial perturbation in longitudinal plasma 10 p1567 A66-21817
- Unified theory of cold plasma nonlinear oscillations /Dolph/ fails to apply to traveling wave solutions 10 p1569 A66-21921
- LF plasma oscillations in constant external static electrical and magnetic fields 10 p1570 A66-22002
- Linear theory of resonance excitation of oscillations in plasma by fast-charged particle beam 10 p1571 A66-22015
- Collective processes in rarefied plasma, analyzing nonlinear undamped oscillations and shock waves 10 p1572 A66-22036
- Amplification of electromagnetic waves in solid state plasma in presence of carrier drift in external electric and magnetic fields 10 p1586 A66-22147
- Contribution of electron-electron correlations to longitudinal dielectric constant for case of one-component plasma, noting resonance effect and formula for plasma oscillation damping 11 p1744 A66-22446
- Electrostatic waves in uniform plasma without collisions in linear approximation, presenting normal oscillation mode as model for damped and unstable waves 11 p1744 A66-22447
- Effect of electric field on LF oscillations of nonhomogeneous plasma contained by magnetic field, using geometrical optics approximation 11 p1744 A66-22449
- Longitudinal plasma oscillations excited in warm plasma column at microwave frequencies in presence of magnetic field, manifest themselves as absorption peaks near harmonics of electron cyclotron frequency 11 p1748 A66-23395
- Statistical aspects of plasma oscillation, examining plasma evolution in terms of Landau theory, particularly after instability onset 12 p1918 A66-23554
- Kinetic oscillation of nonhomogeneous collision plasma, discussing drift instability, ionization, longitudinal current effect, etc 12 p1921 A66-24204
- Excitation of LF ionic plasma oscillations by HF electronic Langmuir waves 12 p1921 A66-24205
- MHD approach to axisymmetric perturbations in plasma permeated by static dipole field 12 p1951 A66-24574
- Harmonic generation in short magnetized plasma column from helical oscillation near critical magnetic field for helical instability 12 p1925 A66-24815
- Hydromagnetic waves in plasma in external magnetic field 12 p1925 A66-25033
- Rapid electron-density oscillations on axis of imploding plasma annulus with radial oscillations 13 p2137 A66-25055
- Plasma oscillations in metallic single crystal films induced by fast electrons 13 p2139 A66-25330
- Spectral analysis of drift oscillations expanding crosswise in external magnetic field of inhomogeneous plasma, based on perturbation theory 13 p2139 A66-25385
- Nonlinear oscillations of plasma behind formation front of charged particles 13 p2139 A66-25388
- Hydrodynamic approximation of interaction between charged particle beam and plasma confined by ideally conducting sheath 13 p2139 A66-25389
- Langmuir probe measurement of electromagnetic field present in cyclotron ion oscillations 13 p2140 A66-25426
- Transmission factor of rectilinearly polarized light as affected by plasma oscillations in granular films of gold 13 p2163 A66-25440
- Landau damping of transverse oscillations in collisionless plasma at ion cyclotron resonance and collisional damping in zero-temperature plasma 13 p2142 A66-25706
- Decay of electron Langmuir waves in plasma in presence of magnetic field into electromagnetic waves 13 p2143 A66-25712
- Anomalous damping of helicon waves propagating in cylinder of hot plasma 13 p2143 A66-25717
- Perturbation theory of nonlinear oscillations in collisionless plasma 13 p2148 A66-25973
- Extension of three-field mixing theory to include effects of convective nonlinearities on excitation in plasma, using correlation function of spectral densities for interpretation of thermally enhanced light-by-light scattering 13 p2132 A66-26151
- Transverse plasma injection into magnetic field, noting plasma-particle collision 13 p2151 A66-26507
- Energy loss of fast-charge particle passing through weakly turbulent magnetoactive plasma 14 p2340 A66-27136
- Radio galaxies contribution to kinetic temperature of intergalactic gas on basis of cosmological model 14 p2380 A66-27257
- Contribution of nonlinear interaction of surface oscillations in plasma to emission of electromagnetic radiation from plasma 14 p2343 A66-27580
- Excited electron plasma nonlinear oscillations, beam-plasma interaction, Langmuir probe measurement of frequency and density, amplification of superimposed RF electric field, etc 15 p2552 A66-29400
- Bounds on density fluctuations and electrostatic oscillation spectrum for homogeneous collisionless plasma according to Maxwell-Vlasov equation 15 p2554 A66-29749
- Microwave scattering from large amplitude oscillations in cesium plasma, noting cross section magnitude and nonlinear effects 15 p2556 A66-29810
- Excitation of oscillations in interacting flows of inhomogeneous plasma moving along external magnetic field with velocity varying over flow cross section 15 p2556 A66-29868
- Particle distribution of charged-particle beam injected into seminfinit plasma 15 p2556 A66-29869
- Stability of monoenergetic ion beam injected across magnetic field into plasma-filled magnetic trap, noting oscillation excitation 15 p2556 A66-29872
- Combination scattering of HF electromagnetic and plasma oscillations propagating over longitudinal standing waves of ionic sound 15 p2556 A66-29875
- Oscillation spectra of plasma in quasi-steady state characterized by self-consistent distribution of plasma particles and turbulent pulsation 16 p2755 A66-30090
- Ion motion effect on spectral region and energy density of Cerenkov excitation produced by charge moving in cold magnetoactive plasma 16 p2755 A66-30091
- Oscillations of plasma composed of ions at rest and relativistic velocity electrons moving along external magnetic field analyzed in linear approximation 16 p2756 A66-30097
- Excitation of longitudinal electron plasma oscillations by nonlinear resonance of two TEM waves with frequencies differing by plasma frequency 16 p2757 A66-30195
- Excitation and thermalization of plasma oscillations in stellarator 16 p2758 A66-30292
- Raman scattering of microwaves by plasma oscillations 16 p2758 A66-30296
- Intrinsic electric field of rarefied ion-electron plasma in external magnetic field and plasma stability, noting use of Galerkin method to determine plasma layer slippage 16 p2760 A66-30790
- Physical principles in plasma application for amplification and generation of electromagnetic oscillations 16 p2760 A66-30797
- Trapped electron effect and stationary longitudinal wave propagation in Maxwellian hot plasma based on exact solution of nonlinear collisionless Boltzmann equation compatible with equilibrium electron distribution 16 p2761 A66-31009
- Quasi-linear equations for inhomogeneous plasma in magnetic field applied to pumping of energy of Langmuir oscillations 16 p2762 A66-31176
- Unstable transverse potential oscillations in plasma with beam anisotropy and initial density modulation and analogy with known electrostatic oscillations 16 p2764 A66-31365
- Ultrahigh frequency plasma oscillations, noting Maxwellian equilibrium between plasma electrons and primary, monoenergetic electrons 16 p2766 A66-31651
- Plasma plate and cylinder oscillation compatibility with radiation from positive argon column at four discrete frequency bands and low pressure 17 p2962 A66-31815
- Nonlinear conversion of HF transverse electromagnetic waves into plasma ion-acoustic oscillations 17 p2964 A66-31897
- Quasi-linear relaxation of longitudinal oscillations of plasma 17 p2965 A66-32320
- Magnetospheric suprathermal-electron scattering in oscillating electrostatic plasma and diffusion of subthermal electrons across magnetosphere, using ion-wave propagation theory for electroconductive plasmas 17 p2993 A66-32521
- Convective excitation of ionic oscillations in plasma by inhomogeneous electron beam as result of spatial gradient of distribution function 17 p2968 A66-32537
- Convective effects role in exciting axisymmetric oscillations in plasma cylinder in magnetic field with aid of radius restricted electron beam 17 p2968 A66-32538
- Transverse electromagnetic wave transformation into ion-acoustic plasma oscillations with formation of intermediate Langmuir electron wave 17 p2969 A66-32542
- Oscillations of nonuniform plasma column 17 p2969 A66-32545
- Stability of weakly ionized plasma in strong electric field against formation of longitudinal waves, examining hydrodynamic equations 17 p2970 A66-32715
- Plasma-ion oscillations in drifted plasma effected in diode-type discharge tube by varying longitudinal magnetic field or cathode temperature 17 p2972 A66-32974
- Spatial dispersion of long-wave optical oscillations of lattice in polar semiconductor 17 p2983 A66-33124
- Plasma oscillation theory of nonlinear deceleration effect and thermal conversion of electron beams upon passage through plasma 17 p2974 A66-33284
- Plasma oscillations of electron shell of atom, discussing natural frequency, damping, probability and participation of plasmon in atomic reactions 17 p2962 A66-33505
- Dispersion of ion waves in mercury vapor discharges, carrying out spectral analysis of acoustic and plasma oscillations 18 p3146 A66-34234
- Transverse and longitudinal oscillations in low density relativistic plasma in constant magnetic field 18 p3147 A66-34725
- Landau damping in inhomogeneous plasmas indicated by solution of Vlasov equation 18 p3150 A66-34936
- LF electromagnetic field behavior in cold magnetoactive plasma near resonance layer, noting condition for energy absorption increase 18 p3151 A66-35064
- Oscillations of inhomogeneous weakly ionized plasma situated in external electric and magnetic field, noting causes and conditions of plasma instability 18 p3151 A66-35066
- Stabilization of hydrodynamic drift oscillations in rotating nonuniform cylindrical plasma 18 p3152 A66-35078
- Perturbation method solution of rectangular waveguide boundary value problem filled with transversely magnetized semiconductor or plasma 19 p3317 A66-35716
- Amplification of electromagnetic waves in solid state plasma in presence of carrier drift in external electric and magnetic fields 19 p3440 A66-35761
- LF plasma oscillations in constant external static electrical and magnetic fields 19 p3407 A66-36086
- Linear theory of resonance excitation of oscillations in plasma by fast-charged particle beam 19 p3407 A66-36101
- Collision damping of transverse electron plasma oscillations 19 p3408 A66-36273
- Turbulence of inhomogeneous plasma in strong magnetic field, deriving turbulence equations from two-component MHD by

diagram technique 19 p3408 A66-36274
 Plasma instability in toroidal discharges and macroscopic effects resulting from nonlinear plasma oscillation 19 p3415 A66-36515
 Plasma oscillation and stability in HF external electric field 19 p3417 A66-36531
 Quasi-oscillations of cold sharply bounded plasmas, noting surface charge role in scattering and AC probe resonances 20 p3611 A66-38361
 Resonance excitation and Cerenkov damping of HF plasma oscillations 21 p3780 A66-39004
 Langmuir electron oscillation behavior in inhomogeneous plasma in magnetic field when applied at angle to oscillation axis 21 p3781 A66-39012
 Plasma electron thermal motion influence on propagation of plane oscillations of plasma which are adiabatic 21 p3781 A66-39014
 Microwave and X radiation from plasma produced by electrodeless discharge in hydrogen, showing presence of accelerated electrons leading to plasma oscillations 21 p3783 A66-39023
 Sturrock criteria for differentiating between absolute and convective instability and between amplification and nontransmittance of oscillations 21 p3770 A66-39028
 Externally imposed oscillating electric field excites transverse electromagnetic waves propagating perpendicular to it in cold plasma 21 p3791 A66-39176
 Solid state plasma microwave oscillations and dispersion conditions for ion-cyclotron instability excitation in semiconductor 21 p3804 A66-39335
 Solid state plasma microwave oscillations and dispersion conditions for ion-cyclotron instability excitation in semiconductor 22 p3959 A66-39705
 Gas laser alignment, obtaining oscillation on three lines of He-Ne laser 22 p3930 A66-39718
 Standing ion acoustic waves between cathode and electrically floating auxiliary metal electrode, noting discharges in mercury vapor between plane oxide-coated cathode and nickel anode 22 p3954 A66-39817
 VLF electric fields in magnetosphere surveyed with polar orbiting spacecraft 1964-45A may produce large amplitude plasma oscillations 22 p3903 A66-39937
 Plasma lines caused by radar incoherent scattering from longitudinal electrostatic plasma oscillations in ionosphere 22 p3910 A66-39982
 Kinetic oscillation of nonhomogeneous collision plasma, discussing drift instability, ionization longitudinal current effect, etc 22 p3956 A66-40568
 Excitation of LF ionic plasma oscillations by HF electronic Langmuir waves 22 p3956 A66-40569
 Steady state beam induced plasma parameters and behavior when affected by HF noise oscillations and effect on electron concentration in plasma 22 p3958 A66-40933
 Nonsymmetric oscillations in plasma in magnetic field arising from electron beam passage through plasma, deriving dispersion equation 22 p3958 A66-40939
 Electrostatic oscillations in dielectric, semiconductor and plasma in presence and absence of external magnetic field 22 p3968 A66-40947
 Plasma fluctuation effect on gas laser noise, noting relation between modulation amplitude of light output and frequency noise and oscillation spectrum 23 p4077 A66-41294
 Frequency dependence of electrostatic energy density in undamped longitudinal plasma oscillation, noting contribution of kinetic and thermal energy 23 p4104 A66-41507
 Potential oscillations in neutral completely ionized plasma-neutral charged-particle beam system in HF electric field and growth rate of plasma instability 23 p4106 A66-41707
 Spectral energy density of turbulent plasma determined from spatial autocorrelation functions of electric fields of HF oscillations 24 p4240 A66-42132
 MHD stability of ideally conducting plasma,

discussing small oscillations equation, energy principle, pinch effects and stabilization of various current instabilities 24 p4241 A66-42331
 Drift cyclotron oscillations of inhomogeneous collision plasma propagating across magnetic field, taking into account particle collisions with aid of Landau collision integral 24 p4243 A66-42530
 Electromagnetic wave propagation across plasma boundary for broad and narrow spectra 24 p4244 A66-42869
 Plasma waves and oscillations, examining HF response of laboratory plasma to electromagnetic waves 24 p4246 A66-43116
PLASMA-PARTICLE INTERACTION
 Effect of nonzero plasma electron temperature considered in electron beam-plasma interaction wave growth computation 01 p0112 A66-10531
 Elastic collision effects on harmonic current amplitudes and energy conversion process in double beam and beam-plasma interactions 01 p0112 A66-10585
 Probability equations for scattering and decay of normal waves in nonlinear interaction with plasma electrons and ions 01 p0114 A66-10720
 Interaction between Rayleigh waves in Cds-type piezoelectric crystal and charged particle beam traveling within crystal, system becoming unstable during wave resonance in beam 01 p0125 A66-10775
 RF electric field in electron beam/plasma interaction measurement, using nonperturbing probing technique 02 p0265 A66-11432
 LF monochromatic plasma wave attenuation from plasma-particle interaction 02 p0268 A66-11769
 Alfvén waves and fast magnetosonic waves in nonisothermal plasma with molecular ions traversed by charged particle flux 02 p0268 A66-11771
 Charged particle interaction with magnetic field of toroidal solenoid, taking into account self-consistent polarization fields and short-circuit currents 02 p0268 A66-11777
 Hydrodynamic approximation of interaction between charged particle beam and plasma confined by ideally conducting sheath 03 p0397 A66-12384
 Relationship between laws of electron temperature and charged particle concentration fall-off in helium plasma diffusion flow 03 p0398 A66-12520
 Electron beam-hot plasma interaction at low frequencies, explaining cesium discharges and gas noise 03 p0398 A66-12539
 Electron beam-plasma interactions used to predict occurrence of amplifying waves having growth rates maximizing near to electron plasma frequency 04 p0552 A66-14036
 Cylindrical plasma rotational velocity formulas derived by calculating Boltzmann collision integral in stationary momentum equation 04 p0556 A66-14339
 Penetration of external longitudinal electric field into semibounded plasma containing electron beam in absence of instabilities in system 04 p0556 A66-14416
 Unstable precession of plasma particles in gradB under influence of drag forces associated with viscous or resistive energy dissipation in background plasma 05 p0721 A66-14711
 Scattering of test particle by enhanced electric field fluctuations in plasma containing nonthermal electrons 05 p0721 A66-14713
 Frequency oscillation role as drift waves excited during interaction of electron beams with plasma, made impossible by ion transverse motion 05 p0722 A66-14723
 Interaction between charged particle beams and plasma in linear stage and saturation stage, using spectroscopic method 05 p0722 A66-14896
 ELF emission from electron and proton beams injected into magnetospheric plasma 05 p0748 A66-15043
 Classification of possible gyroresonance interactions between plasma and proton beam for strictly longitudinal propagation and comparison with TWT terminology 05 p0748 A66-15044
 Ion-electron interaction in

plasma 05 p0725 A66-15243
 Particle distribution of charged-particle beam injected into seminfinit plasma 06 p0913 A66-16139
 Stability of monoenergetic ion beam injected across magnetic field into plasma-filled magnetic trap, noting oscillation excitation 06 p0914 A66-16142
 Electromagnetic waves from plasma penetrated by pulsed electron beam in magnetic field 06 p0914 A66-16147
 Plasma interaction of rapid movement of object with electrically conducting surface through ionized gas, representing particle motion by Schroedinger equation 06 p0917 A66-16400
 Kinetic theory approach to plasma fluctuations taking particle pair collisions into account 06 p0918 A66-16778
 Current noise of gas-discharge plasma reduced by adding grid with negative bias 06 p0837 A66-17200
 Scattering and conversion cross section for inhomogeneous plasma in presence of electron collision 07 p1084 A66-17529
 Fluctuations and particle scattering in turbulent plasma 07 p1087 A66-17871
 Interaction of helicons with cyclotron resonance of single particles, other helicons, phonons, optical phonons and magnetons 07 p1102 A66-18207
 Instability of cold plasma interacting with helical proton beam in magnetic field 07 p1091 A66-18428
 Equivalence of oscillating electric field on plasma boundary, with specularly reflecting bounding wall, to unbounded plasma with planar oscillating grid at wall position 08 p1261 A66-18546
 Reflection of radio waves incident on boundary surfaces, noting application to Kraus effect theory 08 p1182 A66-18753
 Kinetic equation for fast electrons in plasma in stationary electric field, taking into account electron interaction 09 p1407 A66-19963
 Collision effects taken into account in determining conductivity tensor of quantum plasma in uniform magnetic field 09 p1407 A66-20077
 Kinetic equation for plasma in strong static magnetic field derived, using Bogolubov method 09 p1408 A66-20371
 Discrete plasma model describing particle behavior by classical mechanics equations, used for interaction between fast moving bodies and rarefied plasma 09 p1378 A66-21020
 Electron beam/nonisothermal plasma interaction and nonlinear stabilization of beam instability 10 p1569 A66-21973
 Large transverse velocity components imparted to charged particles by passing particles through magnetic field prior to injection into trap 10 p1570 A66-22000
 Instability of axially symmetric inhomogeneous plasma with flowing current 10 p1570 A66-22006
 Plasma production by optical irradiation of gases and by solids, considering interaction of laser radiation with surfaces and irradiation of particles of solid material in vacuum [AIAA PAPER 66-174] 11 p1742 A66-22212
 Interaction between Rayleigh waves in Cds-type piezoelectric crystal and charged particle beam traveling within crystal, system becoming unstable during wave resonance in beam 11 p1749 A66-22287
 Separation of electromagnetic and plasma modes in two-fluid lossy compressible plasma, deriving field qualities from two Helmholtz equations 11 p1653 A66-22561
 Kinetic equation with collision frequency operator used to represent high-temperature plasma instabilities induced by particle collisions 12 p1918 A66-23555
 Linear spatial response of electron plasma to localized one-dimensional electric field, whose frequency is low compared with electron-collision frequency 12 p1923 A66-24575
 Hydrodynamic approximation of interaction between charged particle beam and plasma confined by ideally conducting sheath 13 p2139 A66-25389
 Partially ionized plasma drift across toroidal magnetic field arises from collision

- with neutral gas molecules 13 p2146 A66-25744
- Detection and analysis of oscillations excited in electron beam and plasma as result of interaction, noting frequency spectrum, phase velocities, etc 13 p2146 A66-25745
- Multicomponent transport theory to compute cesium plasma transport properties over range of conditions wherein it changes from pure single component gas to mixture and then to completely charged particle gas 13 p2147 A66-25751
- Triple correlative function solution for plasma system of charged particles and collision integral for pair correlative function 13 p2148 A66-25941
- Transverse plasma injection into magnetic field, noting plasma-particle collision 13 p2151 A66-26507
- Hydrogen plasmoid density, ionization and electron temperature measured by fast-particle probing 13 p2153 A66-26526
- Energy loss of fast-charge particle passing through weakly turbulent magnetoactive plasma 14 p2340 A66-27136
- Microwave amplification by interaction of electron beam with cesium plasma 14 p2345 A66-28045
- Solar wind magnetic field as medium for plasma-magnetosphere interaction 15 p2575 A66-29078
- Excited electron plasma nonlinear oscillations, beam-plasma interaction, Langmuir probe measurement of frequency and density, amplification of superimposed RF electric field, etc 15 p2552 A66-29400
- Particle distribution of charged-particle beam injected into semiinfinite plasma 15 p2556 A66-29869
- Stability of monoenergetic ion beam injected across magnetic field into plasma-filled magnetic trap, noting oscillation excitation 15 p2556 A66-29872
- Electromagnetic waves from plasma penetrated by pulsed electron beam in magnetic field 15 p2557 A66-29877
- Injection of helical electron beams into magnetic mirror trap, examining plasma lifetime, density and electron and ion energies produced 16 p2755 A66-30092
- Effective capture of electrons in magnetic mirror trap with stationary field by pulse-type injection of helical electron beam 16 p2755 A66-30093
- Physical principles in plasma application for amplification and generation of electromagnetic oscillations 16 p2760 A66-30797
- Quasi-linear approximation of Cerenkov and cyclotron damping of electromagnetic waves in magnetoactive plasma, considering collisions of wave-absorbing resonance particles with plasma 16 p2762 A66-31173
- Balance equations derived from kinetic equations for nonequilibrium plasma, considering radiative processes and inelastic collisions between electrons and atoms 16 p2766 A66-31603
- Secondary electron interaction with solid state plasma, noting energy distribution, Boltzmann equation solution, etc 16 p2789 A66-31783
- Interaction of modulated high current pulsed electron beams with plasma in longitudinal magnetic field 17 p2963 A66-31826
- Longitudinal wave excitation in modulated electron beam interacting with plasma 17 p2963 A66-31830
- Conduction-electron plasmons interaction with longitudinal optical phonon in Raman spectrum of gallium arsenide 17 p2975 A66-31888
- Instability of three- or four-component beam plasma for various coupling waves, graphically analyzing dispersion equation derived from Boltzmann-Vlasov equations 18 p3146 A66-34472
- Center-to-center collisions of cosmic radiation nuclei with heavy nuclei of Ag, Br plasma emulsions 18 p3170 A66-34578
- Charged Bose gas, discussing ground-state energy, excitation spectra and plasmon-particle interactions, using Bohm-Pines and Bogoliubov approximations 18 p3140 A66-34729
- Unifield field theory equation for energy loss rate of charged particle moving in plasma, considering screened Coulomb potential and dielectric permeability 18 p3150 A66-34937
- Large transverse velocity components imparted to charged particles by passing particles through magnetic field prior to injection into trap 18 p3151 A66-34977
- Charged particle beam interaction with plasma, determining electron-ion temperatures and HF field 18 p3152 A66-35074
- Energetic particle interaction with hydromagnetic shock wave, noting case of particle in radiation belt 19 p3451 A66-35250
- Charged particle motion and penetration of magnetosphere in proximity of neutral point as result of solar wind-geomagnetic field interaction 19 p3405 A66-35281
- Kinetic theory approach to plasma fluctuations taking particle pair collisions into account 19 p3405 A66-35375
- Current noise of gas-discharge plasma reduced by adding grid with negative bias 19 p3297 A66-35558
- Excitation and ionization of hydrogen plasma under influence of two electron groups with different temperatures and densities, using coupled system of rate equations 19 p3407 A66-36063
- Instability of axially symmetric inhomogeneous plasma with flowing current 19 p3407 A66-36090
- Collective interactions of charged particle beams with plasma produced by electron beam, noting power loss of electron beam coincides with power of HF oscillations caused by interaction 19 p3416 A66-36524
- Nonlinear plasma wave interaction, discussing Langmuir wave scattering on particles and energy transformation 19 p3418 A66-36532
- Induced scattering of electromagnetic waves from magnetoactive plasma particles 19 p3418 A66-36533
- Stability of confined plasma in mirror machine depending on proper coordination of magnetic field geometry with particle distribution function 19 p3422 A66-36548
- Plasma confinement experiments with electron injection parallel to cusped magnetic field axis in nonadiabatic regime 19 p3422 A66-36549
- Astron facility experiments on injection of very intense pulses of relativistic electrons into cylindrical azimuthally symmetric magnetic trap 19 p3423 A66-36551
- Electron injection and E-layer buildup in Astron device theoretically studied by one-dimensional model, using Green functions for self-electric and self-magnetic fields 19 p3423 A66-36552
- Electron beam interaction with plasma in mirror magnetic fields and heating of plasma components under beam instability, noting oscillation spectrum and thermal energy 19 p3430 A66-36586
- Plasma stability, density, energy, etc, resulting from electron beam/plasma interaction which excites microwave oscillations, creating microwave discharge 19 p3430 A66-36587
- Neutrino processes in stellar evolution, discussing pair annihilation, plasma, photoneutrino, URCA, bremsstrahlung, photo-beta, photon-photon and electron-electron bremsstrahlung processes 19 p3454 A66-36790
- Cosmic ray isotropy mechanism, examining plasma beam instability and cosmic ray scattering at plasma turbulent pulsations 20 p3629 A66-37032
- Electron and ion acceleration by cosmic plasma waves, examining contribution of these processes to radiation belt formation 20 p3647 A66-37033
- Probability equations for scattering and decay of normal waves in nonlinear interaction with plasma electrons and ions 20 p3609 A66-37658
- Nonequilibrium ionization phenomena interaction with nonuniform flow of plasma, reviewing nonequilibrium characteristics for uniform flow with electric and magnetic fields 20 p3610 A66-37982
- Book on space electrodynamics noting application of MHD, plasma properties, waves, interaction with magnetic field, shock waves, solar atmospheric motion, etc 20 p3631 A66-37984
- Charged particle and electromagnetic wave interaction with nonequilibrium plasma, noting conversion of transverse into longitudinal waves and angular distributions of scattered radiation 21 p3781 A66-390113
- Electron beam interaction with plasma in magnetic field, obtaining stronger interaction when beam has initial modulation 21 p3782 A66-39018
- Plasma generation by electron beam with developing instability, noting plasma parameters 21 p3782 A66-39019
- Longitudinal and transverse electric fields in electron beam due to interaction with plasma, showing that both fields are components of same wave 21 p3782 A66-39020
- Plasma-particle interaction in absence of magnetic field, leading to electrostatic and transverse electromagnetic waves instability 21 p3783 A66-39025
- Ion beam interaction with electron plasma and resultant parameter changes and cyclotron instability 21 p3783 A66-39028
- Energy spectra of fast particles of moving plasmoids obtained in Bostick plasma source examined by mass spectrometer 21 p3786 A66-39042
- Plasma flux reflection from magnetic surface for nonlinear reflected plasma in region of particle trajectory rotation 21 p3787 A66-39049
- Fast charged particle and electromagnetic field fluctuations interaction with nonequilibrium plasma 21 p3791 A66-39155
- Atomic collisions, excitation transfer processes and energy level transition probabilities in plasma of gas lasers 21 p3748 A66-39305
- Electron beam/nonisothermal plasma interaction and nonlinear stabilization of beam instability 21 p3794 A66-39552
- Wave theory calculation of moments of a velocity change of charged particle in magnetoplasma 21 p3794 A66-39573
- Electron-ion beam interaction with confined plasma in strong magnetic field, noting ion-sound excitation 22 p3953 A66-39764
- Stationary effective interaction between particles in quantum Vlasov plasma for particular model 23 p4104 A66-41509
- Potential oscillations in neutral completely ionized plasma-neutral charged-particle beam system in HF electric field and growth rate of plasma instability 23 p4106 A66-41707
- MHD stability of ideally conducting plasma, discussing small oscillations equation, energy principle, pinch effects and stabilization of various current instabilities 24 p4241 A66-42331
- Plasma neutrino process of Adams, Ruderman and Woo dependent on direct electron-neutrino interaction and connected with stellar evolution 24 p4279 A66-42835
- ### PLASMA PERTURBATION
- Book on satellite-caused ionospheric disturbances, particularly in particle density and electric and magnetic fields in vicinity of artificial body 01 p0138 A66-10975
- Effect produced by nonhomogeneous HF field on distributed plasma parameters 01 p0115 A66-11050
- Electric field intensity in disturbed quasi-neutral plasma homogeneity when problem is formulated as one-dimensional 01 p0115 A66-11107
- Structure of disturbed plasma in thermodynamic equilibrium situated near charged solid surface ideally reflecting incident particles 03 p0397 A66-12381
- Structure of disturbed plasma in thermodynamic equilibrium situated near charged solid surface ideally reflecting incident particles 13 p2139 A66-25386
- Electron energy losses in diamond, noting correlation between plasma excitation energy and interband transition energies 15 p2564 A66-28876
- Perturbations caused by cylindrical body in plasma, obtaining electric field and electron and ion concentration dependences on distance 15 p2595 A66-29086
- Plasma perturbation by large probe, determining electron density and

- temperature and plasma potential as function of distance from 15 p2555 A66-29754
- Perturbation of electron density at large distances from body at high velocity in collisionless plasma under steady external magnetic field 16 p2762 A66-31181
- Steady state beam induced plasma parameters and behavior when affected by HF noise oscillations and effect on electron concentration in plasma 22 p3958 A66-40933
- PLASMA PHYSICS**
- SA CYCLOTRON RESONANCE
- SA LIOUVILLE EQUATION
- SA MAGNETOHYDRODYNAMICS
- SA MAGNETOHYDROSTATICS
- SA NUCLEAR PHYSICS
- SA THERMODYNAMICS
- Laser interferometer to measure time and spatial variation in repetitively pulsed plasma 01 p0079 A66-10243
- Schlieren photographic technique using photoelectric scanning device with photomultiplier, rotary mirror and oscillograph 01 p0967 A66-10372
- First approximations of kinetic theory for homogeneous and unstable plasma obtained from generalized Bogolubov method 01 p0111 A66-10389
- Superconducting magnet with coils in variable-spacing horizontal-axis split pair configuration for plasma physics studies 01 p0054 A66-10853
- Graduate-level text on engineering MHD establishing bridge with plasma physics, using particle /microscopic/ and continuum approaches 01 p0114 A66-10978
- Electromagnetic problems in anisotropic and compressible plasma solved by characterizing compressibility as compressivity tensor 02 p0266 A66-11447
- Large amplitude MHD flow with magnetic lines coincident with streamlines 02 p0269 A66-11950
- Annual Review of Nagoya University Institute of Plasma Physics 03 p0351 A66-12296
- Ionospheric plasma density measurement utilizing variable frequency impedance probe, dispersive Doppler measurements and RF spectrometer field strength detection theory 03 p0398 A66-12644
- Particle-field interaction in magnetosphere discussing categories, properties, scale model experiments, etc 03 p0363 A66-12646
- Macroscopic equations of plasma physics noting one-and two-fluid MHD approximation 03 p0400 A66-12851
- Physics of ionized media - French Society of Physics, National Colloquium, Toulouse, France, May 1965 03 p0401 A66-12965
- Plasma electron density measurements, interferometric and spectroscopic techniques compared with Stark H-beta line and absolute continuum intensity method 03 p0405 A66-13136
- Wing broadening in plasma of hydrogen Lyman-alpha line by local electron and quasi-static ion fields calculated, considering impact theory of electron collisions, quadrupole and dipole interactions and existent asymmetries 03 p0405 A66-13138
- Plasma waves propagating transverse to uniform external magnetic field discussing electron motion, wavelength magnitude, frequencies and application of results 03 p0406 A66-13358
- Kinetic theory of unstable plasma covering growth and stabilization of spatially homogeneous electron plasma in uniform neutralizing positive charge field, Pines-Schrieffer and formally equivalent kinetic equations and Balescu theory 03 p0406 A66-13359
- Definition of plasma, physical description, theory, devices and problems 04 p0550 A66-13381
- Plasma behavior in MHD accelerators and electrical nonequilibrium conductivity, noting energy loss mechanisms and techniques for improving cross field accelerators 04 p0550 A66-13543
- Equilibrium statistical mechanics of electron-ion plasma developed in terms of Wigner distribution 04 p0551 A66-13713
- Characteristics of solid state plasma conditions necessary for existence of plasma in semiconductor or semimetal 04 p0563 A66-13943
- Theory of antimatter applied to cosmology and development of metagalactic system, discussing ambiplasma 04 p0578 A66-14009
- Basic techniques for measuring macroscopic plasma properties 04 p0521 A66-14189
- Line broadening from Stark effect and Doppler effect for plasma 04 p0553 A66-14193
- Microfield of plasma isolated in cube 04 p0553 A66-14282
- Scattering of microwaves from bodies smaller than one wavelength used for plasma diagnostics 04 p0487 A66-14368
- Book on data for plasma in local thermodynamic equilibrium, containing tables on numerical values of reduced Saha-Eggert equations, partition functions, etc 04 p0557 A66-14457
- General 13-moment approximation to Fokker-Planck equation for plasma 04 p0558 A66-14493
- Transport coefficients derivable from 13-moment approximation for two-component plasma in satisfying Onsager relationship 04 p0558 A66-14494
- Plasma physics - Seminar, Trieste, Italy, October 1964 05 p0724 A66-15233
- Properties of plasmas and methods of investigation 05 p0725 A66-15234
- Motion of charged particle in plasma electric and magnetic field 05 p0725 A66-15237
- Statistical derivation of equations for fully ionized plasma 05 p0725 A66-15239
- MHD generators and physical principles, noting problems in region of collision-free regime 05 p0612 A66-15246
- Related phenomena in plasmas, solids and gases, noting screw instabilities and helicon whistlers 05 p0726 A66-15249
- Unique solvability of certain initial boundary problems with equations of mixed type 05 p0727 A66-15309
- Arc mode thermionic converter output characteristics relationship to neutralization plasma properties 05 p0620 A66-15570
- One-dimensional flow analysis of MHD generator for thermodynamic-transport properties and total current-power output 05 p0625 A66-15812
- Open-ended cylindrical resonators for plasma study, determining charged-particle concentration 06 p0915 A66-16148
- Ionizing shock wave theory and recent laboratory experiments 06 p0872 A66-16363
- Electrodynamic jump conditions and momentum-energy laws at arbitrary moving boundary derived three-dimensionally 06 p0917 A66-16435
- Electron temperature in plasmas measured using pressure broadening by electron impacts of isolated spectral lines, i.e., temperature dependence of shift to width ratio 06 p0920 A66-17041
- Initial data for homogeneously expanding or contracting plasma with Landau collision integral 07 p1085 A66-17618
- Partition functions in equilibrium chemical composition and thermodynamic properties of nitrogen and oxygen plasmas 07 p1087 A66-17936
- Growth and excitation of surface waves on capillary liquid jet stressed by electric field 07 p1087 A66-17946
- Current density and heat flux expressions in terms of transport coefficients of partially ionized gas, noting thermoconductivities 07 p1088 A66-17950
- Plasma space science Symposium, Catholic University of America, Washington, D.C., June 1963 07 p1137 A66-18072
- Plasma effects in solids - Conference, Paris, July 1964 07 p1100 A66-18197
- Pronounced quantum effects of solid-bismuth plasma properties at quantum limit and low temperature 07 p1082 A66-18212
- Nonisothermal gaseous transport of hot injected plasma in semiconductor 07 p1103 A66-18213
- Millimeter wavelength radar to investigate plasma effects associated with ionized flow fields of projectiles launched at hypersonic speeds into free-flight ballistic range 08 p1222 A66-18710
- Monograph on microwave and IR techniques to investigate plasmas 09 p1402 A66-20328
- Microwave scattering theory applied to underdense cylindrical plasma measurements 09 p1409 A66-20851
- Controlled thermonuclear fusion, international developments 10 p1555 A66-21267
- Superposition and geometrical optics techniques for approximations of radar cross section of nonconducting bodies 10 p1498 A66-21598
- Soviet and foreign papers on plasma diagnostics by scattering of laser beams at plasma electrons 10 p1569 A66-21990
- Plasma in toroidal Tuman device, noting ionization and effect of varying field 10 p1571 A66-22008
- Hydrogen arcs, sulfur hexafluoride arcs, decaying nitrogen arcs and nitrogen arcs with forced convection 13 p2137 A66-25110
- Iterative method solution of kinetic equation with functional derivatives for ionized plasma 13 p2141 A66-25476
- Soviet high-temperature plasma physics and controlled nuclear fusion 13 p2145 A66-25736
- Compressivity tensors as parameters to characterize two-fluid compressible plasma in external magnetic field 13 p2149 A66-26273
- Soviet studies of plasma blobs 13 p2150 A66-26506
- Plasma physics, noting collective behavior of particles, anisotropic conductivity, magnetic interaction, generator and plasma frequency 14 p2339 A66-26917
- Properties and utilization of solid state plasma 14 p2355 A66-26923
- Wave equation for inhomogeneous isotropic hot plasma 14 p2340 A66-27044
- RCA plasma physics research and engineering 14 p2342 A66-27502
- Introduction to plasma phenomena 14 p2342 A66-27503
- Various applications of plasma transport coefficients 14 p2343 A66-27505
- Comparison between microwave and Langmuir probe plasma diagnostic techniques 14 p2343 A66-27506
- Information theory for describing electric and magnetic fields of one-dimensional collisionless plasma 14 p2346 A66-28274
- Plasma diagnostics in terms of response times, noting conversion of phase frequency deviations of probing signal, data recording for plasma in motion and expression for waveguide frequency band 14 p2298 A66-28472
- Plasma ionization associated with thermal electron or nonthermal distribution of electron velocities for various gas densities 15 p2554 A66-29751
- Open-ended cylindrical resonators for plasma study, determining charged-particle concentration 15 p2557 A66-29878
- Book on electronics and electron physics advances including fast ion scattering, kinetic ejection of electrons, plasma application in microwaves, etc 16 p2747 A66-30794
- Semi-automatic data system for Model C stellerator, noting oscilloscope/camera modifications 16 p2706 A66-30829
- Ionization equation for optically thin plasma, considering collisional ionization and recombination 16 p2763 A66-31350
- Plasma physics and nature of plasma as fourth state of matter, with major astrophysical and industrial applications 16 p2766 A66-31566
- Explosive driven magnetic generator applied to investigate electric, optical and elastic properties of various substances, plasma physics and charged particle accelerator 16 p2637 A66-31585
- Virial expansions for plasma free energy in method of collective variables 16 p2767 A66-31728
- Representation of cone group of zero-mass particle with complex spin 16 p2767 A66-31736
- Nonlinear effects in homogeneous Lorentz plasma, calculating anisotropies of electron distribution function 17 p2963 A66-31842
- Shock tube in studying high temperature plasma, noting other experimental devices 17 p2904 A66-33038

Maximum beam displacement parallel to plane of incidence in plasma reflection of linear or elliptically polarized waves 17 p2974 A66-33286

Group velocity and power flow of surface waves on uniaxial plasma slab 18 p3066 A66-33540

Elementary processes in low-temperature plasma 18 p3143 A66-34029

Equilibrium thermodynamic and gas dynamic parameter calculation for low temperature plasma, using electromagnetic and diaphragm-type shock tubes 18 p3144 A66-34037

Book on glow discharge and plasma physics including collisional processes, ionization, vacuum systems, application in electronics, etc 18 p3150 A66-34946

Soviet and foreign papers on plasma diagnostics by scattering of laser beams at plasma electrons 18 p3150 A66-34967

Optimum MHD generators using anisotropic plasma, discussing conducting-gas MHD flow, Hall effect, ion slip effect, etc 18 p3152 A66-35075

Discontinuities in plasma parameters of solar wind satisfy conditions of Mhd and can be treated as shock waves and stationary contact surfaces 19 p3452 A66-35980

Plasma in toroidal Tuman device, noting ionization and effect of varying field 19 p3407 A66-36092

Plasma physics and controlled nuclear fusion research - Conference, International Atomic Energy Agency, England, September 1965 19 p3410 A66-36494

MHD stabilization of open-ended systems including minimum-magnetic-field configurations in plasma stabilization 19 p3411 A66-36495

Plasma physics and controlled nuclear fusion research - IAEA Conference, England, September 1965, Volume 2 19 p3419 A66-36539

Plasma radiative processes theory with conservation principles derivation and H-theorem proof 20 p3607 A66-37012

Plasma physics and problems of controlled thermonuclear fusion - Conference, Kharkov, Ukrainian SSR, May 1963 21 p3777 A66-39002

RF behavior of one-dimensional plasma in electrical circuit analog with coupled resonant circuits representing normal modes 22 p3884 A66-39816

Book on particle kinetics of plasmas 22 p3954 A66-39855

Plasma concentration diagnostics in exosphere from delay time of forward frequency as function of parameter of whistler trajectory 22 p3915 A66-40774

Construction of model for chromospheric magnetic field over sunspot 22 p3985 A66-40951

Soviet papers on problems of astrophysics 23 p4125 A66-41072

Electric microfields in plasma taken as system of charged particles moving in uniform neutralizing background, using approximations and Monte Carlo study 23 p4101 A66-41363

Multiparametric diagnostic technique for optically dense plasma 23 p4102 A66-41451

Higher order corrections to Chew-Goldberger-Low theory, with attention to Vlasov equation 23 p4103 A66-41487

Design of models of continuum media for research in plasma physics, aerodynamics, polymeric structures, motion, creep, etc 23 p4096 A66-41935

Discontinuity gas model for high pressure plasmas and application to DC confined arc and AC impedance 23 p4108 A66-42032

Book on instrumentation for high speed plasma flow including magnetic field balance, transducers, flow angle indicator, MHD profile meter, etc 24 p4211 A66-42487

Book on theory and application of plasma physics including adiabatic charged particle motion, MHD characteristics, shock waves and hydromagnetic flow 24 p4246 A66-43109

PLASMA PINCH

SA PINCH EFFECT

SA THETA PINCH

Electron density distribution in linear pinch discharge with transverse rotating magnetic field 02 p0266 A66-11471

Exhaust of pinched plasma from axial orifice involves electromagnetic current

profile diffraction and thermal expansion of gas column 02 p0267 A66-11536

[AIAA PAPER 65-92] 02 p0267 A66-11726

Stabilization of pinch discharge in hydrogen 02 p0267 A66-11726

Structure of shock wave propagating through plasma perpendicular to initial magnetic field 02 p0269 A66-11799

Inverse pinch suitable for cylindrical shock wave generation having well defined and reproducible luminous fronts 04 p0555 A66-14322

Z-pinch discharge in rare gases and light phenomena as described by model of converging cylindrical shock waves impelled by magnetic piston 04 p0558 A66-14495

Topology of stationary plasma configurations in transverse self-consistent fields, comparing smooth and periodic structures in terms of useful power 07 p1085 A66-17645

Stability of rotating plasma pinch with HF radial oscillations and situated in longitudinal magnetic field 08 p1263 A66-19175

Growth rate of sheet pinch instability calculated in small Larmor radius limit, using integration along unperturbed orbits, finding instability driven by resonant electrons 12 p1951 A66-24573

Transforming radial compression of hot plasma into axial component for formation of almost spherical plasma of high density 13 p2140 A66-25435

Force-free paramagnetic model and force-free Bessel function model of stability of feeble pinch, presenting numerical calculations using Newcomb criterion 13 p2144 A66-25720

Transverse magnetic field effect on toroidal discharge in strong axial magnetic field 13 p2144 A66-25722

Cylindrical wave propagation across strong magnetic field in cold rarefied plasma analyzed, using Maxwell equations, for experiments on plasma pinch 14 p2339 A66-26781

Electrostatic and magnetic pinch effects in electron beam-generated plasmas 15 p2549 A66-28717

Transfer efficiency of theta pinch in converting capacitively stored electrical energy to plasma energy measured, using calorimeter technique 16 p2761 A66-31090

Viscous forces influence on instability of liquid conductor model of hard-core pinch 17 p2964 A66-32032

Isar I, fast megajoule theta pinch experiment with extremely high compression magnetic fields 19 p3414 A66-36508

Interchange instabilities at general Meyer and Schmidt surfaces in plasma pinch model, noting magnetic field role 19 p3418 A66-36537

Hollow medium size linear Z pinch producing very high densities and high temperatures 19 p3424 A66-36559

Phenomena associated with buildup of noncylindrical focused Z pinch 19 p3425 A66-36562

Nonequilibrium plasmas produced in InSb by both impact ionization and injection, examining instabilities due to HF oscillations and negative resistance 23 p4114 A66-41582

Magnetic pinch formation in indium antimonide and possibility of population inversion in pinch, using strong current supported by electron-hole plasma 24 p4249 A66-42224

PLASMA POTENTIAL

Confinement of slow ions by magnetic mirror trap in plasma with positive potential 01 p0109 A66-10258

Penetration of electric field into metallic sphere located in stationary plasma as prototype of electric fields about Earth-Sun system 02 p0267 A66-11656

Ion recombination effects on inhomogeneous cylinder deceleration in rarefied plasma 04 p0551 A66-13858

Potential distribution over arc in vortex-type plasmatron determined from voltage data and direct measurement by electrostatic voltmeters 04 p0557 A66-14435

Cesium plasma thermionic converter, calculating voltage drop in emitter, collector

and plasma 05 p0615 A66-15536

Cesium plasma created in thermionic converter investigated by Langmuir probe to determine potential, gain, velocity and oscillations 05 p0620 A66-15571

Emissive probe to investigate plasma synthesis 08 p1261 A66-18643

Electric polarization of plasmoid moving in curvilinear magnetic fields with different signs of curvature of lines of force 11 p1747 A66-23306

Transient processes resulting from instantaneous application of constant potential difference to plasma capacitor plates 12 p1922 A66-24216

Confinement of slow ions by magnetic mirror trap in plasma with positive potential 13 p2148 A66-25975

Hot wire electron emissive probes for potential measurements in quiescent plasmas, noting plasma densities, emission levels, etc 13 p2154 A66-26554

Solar thermionic power conversion, discussing converters, flux and temperature controls, energy storage generators, support structures, etc 13 p2006 A66-26641

[AIAA PAPER 64-734] 13 p2006 A66-26641

Tangential electrode forces on cathode and anode electrode for arc moving in magnetic field are not negligible in plasma driving 15 p2428 A66-28687

Hall effect in collision dominated gaseous plasma immersed in uniform magnetic field 17 p2969 A66-32629

Electrostatic potential near nucleus immersed in plasma evaluated, using finite-temperature Thomas-Fermi model 18 p3230 A66-34152

Potential of average force experienced by charge in plasma calculated from Bogoliubov-Born-Green-Kirkwood-Yvon equations of classical statistical mechanics without linearization 19 p3406 A66-35996

Transient processes resulting from instantaneous application of constant potential difference to plasma capacitor plates 22 p3878 A66-40580

Electrostatic probe in collisionless plasma wherein sheath joins region of ambipolar diffusion 23 p4104 A66-41494

Plasma potential and ion energy determination via ion extraction and energy analysis 24 p4247 A66-43209

PLASMA POWER SOURCE

Thermionic converters with two alkaline using graphite insertion composites for imparting supplementary degree of freedom to cesium plasma diode 05 p0617 A66-15554

Influence of plasma on efficiency of thermionic converter filled with krypton, noting current-voltage characteristics 05 p0621 A66-15574

Solar energy powered cesium-plasma thermionic converter, noting development, output and application 09 p1333 A66-20924

Plasma as energy source for thermoelectric and electromagnetic propulsion systems 13 p2173 A66-26579

Solar wind engine for generating electric power and for propulsion of space vehicles [AIAA PAPER 66-596] 18 p3165 A66-34446

Prelonization and shock wave ionization in cylindrical crossed-field plasma source, using microwave diagnostic methods including interferometry 19 p3408 A66-36277

PLASMA PROBE

SA LANGMUIR PROBE

SA MICROWAVE PLASMA PROBE

Hot glow probe determination of plasma space potential noting disturbance due to contact potential drift and probe construction, accuracy and applicability 01 p0113 A66-10639

Physical description, module fabrication, sensor construction and calibration details of plasma probe carried on Mariner IV 01 p0073 A66-11116

Plasma resonance modifications in magnetic field used for electron density finding 02 p0265 A66-11434

Plasma diagnostics by relativistic electron beam consisting of separate electron clusters emitting ultrashort electromagnetic waves 03 p0396 A66-12291

Plasma electron concentration measured by Fabry-Perot interferometer partially filled with gas-discharge plasma and incorporating ruby laser 03 p0375 A66-12294

- Monographs on plasma diagnostic techniques 04 p0521 A66-14188
- Magnetic probes of inductive loop type for plasma measurements 04 p0521 A66-14190
- Electric and electrostatic probes for plasma measurement 04 p0522 A66-14191
- Optical and UV instruments and calibration methods for spectral intensities and line broadening in plasma diagnostics 04 p0522 A66-14194
- X-ray spectroscopy in high energy plasma, noting similarity to standard techniques 04 p0522 A66-14195
- Far IR observation of plasma emitted radiation and observation of plasma effect on propagation of externally generated radiation 04 p0522 A66-14196
- Optical interferometry theory, application and verification in plasma study 04 p0522 A66-14197
- Microwave diagnostics of nonperturbing plasma, noting wave propagation characteristics in various plasmas 04 p0522 A66-14198
- Plasma diagnostic techniques for direct measurements of electron, ion and neutral particles 04 p0522 A66-14199
- Light beams used as plasma probes, considering scattering effect of refraction 05 p0726 A66-15248
- Detection of ionized gas front passage and differentiating it from current sheet in magnetically driven shock tube 07 p1020 A66-17956
- Magnetospheric perturbations to probe interplanetary plasma, noting sudden and gradual commencement of geomagnetic storms 07 p1121 A66-17984
- Emissive probe to investigate plasma synthesis 08 p1261 A66-18643
- Water-cooled electrostatic probe capability of measuring local electron temperature, electron density, floating potential and saturation current ratio in dense plasmas [AIAA PAPER 66-73] 08 p1262 A66-18956
- Magnetic field measurement in shock tube when plasma moves with respect to probe 08 p1226 A66-19695
- Space charge effects on electrical field and plasma structure in vicinity of charged cylinder of small radius 08 p1299 A66-19790
- Messiaen theory for resonance effect in plasma electron density probe 09 p1406 A66-19856
- Plasma and electron gyroresonance effects on admittance of RF plasma probe surrounded by ion sheath 09 p1381 A66-20373
- Stagnation pressure measurement in high temperature high-current plasmas, using small uncooled Pitot tube [AIAA PAPER 66-179] 10 p1561 A66-21429
- Radial distributions of number density, electron temperature and plasma potential measured in electrodeless discharge, using symmetric and asymmetric double probes [AIAA PAPER 66-194] 10 p1562 A66-21440
- Single and double Langmuir probe for low density plasma, noting measurement of electron temperature and density 10 p1535 A66-21514
- Guarding probes in hot-cathode mercury vapor discharge 10 p1564 A66-21552
- Local magnetic field, ion density flow and electric field in plasma measured downstream of theta-pinch accelerator in presence of uniform guide field [AIAA PAPER 66-155] 10 p1565 A66-21684
- Electron temperatures in hot argon-potassium discharges determined, using ratio of electron energy slopes from floating double-probe curve 10 p1568 A66-21880
- Spatial density distribution of cold plasma probed by electromagnetic field 10 p1570 A66-22005
- Hot plasma probed with atomic beam in presence of intense self-radiation flux and magnetic field impulse 10 p1571 A66-22011
- Probe and microwave interferometric measurements performed on plasma in Q devices for data on plasma losses 11 p1744 A66-22444
- Relationship between AC probe resonance and resonant scattering used to calculate probe response from Vlasov equation, employing model of plasma 11 p1707 A66-22974
- Response of spherical plasma probe to alternating potentials determined by Boltzmann-Vlasov equation together with Maxwell equations 11 p1746 A66-23070
- Electrostatic double probe consisting of two parallel plates for plasma diagnostics [AIAA PAPER 65-542] 12 p1876 A66-23579
- Feasibility of using Langmuir probe for measuring statistical properties of unsteady or turbulent electron-rich plasmas [AIAA PAPER 65-544] 12 p1919 A66-23580
- Laser application and techniques noting amplification, modulation, interferometry, scattering, plasma diagnostics, nonlinear optics, etc 12 p1889 A66-23931
- Low pressure plasma electron temperature inferred from Langmuir probe measurements differs from plasma mean electron energy 12 p1920 A66-23959
- Plasma edge phenomena in unified Langmuir treatment for probe in collisionless plasma 12 p1925 A66-24816
- Triple-probe measurement of electron temperature of transient plasma from plasma gun 13 p2149 A66-26242
- RF impedance of absorptive surface plasma probe for case of collapsed ion sheath 13 p2136 A66-26294
- Fast-particle beam plasma probing of plasmoid interacting with axisymmetric magnetic field 13 p2152 A66-26516
- Resonance probe with variable HF voltage superimposed on DC voltage applied to conventional Langmuir plasma probe 14 p2289 A66-26820
- Polarized pyrometric probe for direct measurement of ion and electron energy in hot dense plasma 14 p2290 A66-26825
- Split Teflon shield to delay exposure of plasma arc probe to air jet until equilibrium conditions have been attained 14 p2412 A66-27448
- Particle distribution in low density collisionless plasma in vicinity of moving charged body smaller than Debye radius 14 p2284 A66-27556
- Electrostatic probe measurements of velocity displacement and electron density of plasma using laser compared with measurements using microwave interferometer 14 p2346 A66-28269
- Waveguide system using Chebyshev filters for channel separation in wide frequency ranges, applied for sounding plasmas with various electron concentrations 14 p2298 A66-28473
- Potential on hot body in plasma as function of surface temperature and plasma characteristics, considering case where photoemission is present 15 p2595 A66-29087
- Electrical discharge in air, mercury vapor and nitrogen, using RF signal probe, determining electron density and temperature and random velocity in plasma 15 p2548 A66-29715
- Electron saturation current at plane probe in magnetized plasma, considering electron temperature 15 p2554 A66-29753
- Plasma perturbation by large probe, determining electron density and temperature and plasma potential as function of distance from probe 15 p2555 A66-29754
- Ionospheric electron density measurement by gyroplasma probe, using sweep frequency impedance technique 15 p2604 A66-30047
- Plasma probe for dense isothermal cesium plasma, noting electron concentration and temperatures, potential distribution, etc 16 p2756 A66-30102
- Plasma probe in thermal emission converter with high cesium vapor, noting parameters of diffusion, electron concentration, etc 16 p2756 A66-30103
- Conical induction plasma gun construction in strongly preionized regime and results of electrostatic probe measurements made with discharge camera 17 p2969 A66-32547
- Scaling procedure for deriving approximate closed-form expression for impedance of spherical probe immersed in cold magnetoplasma 18 p3109 A66-33546
- Plasma behavior in laminar and turbulent hydrocarbon-arc flames, discussing flame ionization, electron concentration and recombination, detonation wave ionization data, ignition, etc 18 p3143 A66-34027
- Electrodeless probe, consisting of single-layer coil enclosed in insulating tube, for plasma conductivity measurements 18 p3112 A66-34110
- Various experiments explaining fundamental properties of probes used in measurements of plasma arc columns 18 p3112 A66-34115
- Asymptotic theory of spherical electrostatic probe in collision-dominated partially ionized gas by quasi-linearization 18 p3146 A66-34583
- Plasma diagnostics by Thomson scattering of laser beam, investigating difficulties from particle scattering, absorption, etc 19 p3405 A66-35412
- Resistance and frequency response range of sheath surrounding electrostatic probe floating in tenuous plasma 19 p3357 A66-35808
- Spatial density distribution of cold plasma probed by electromagnetic field 19 p3407 A66-36089
- Hot plasma probed with atomic beam in presence of intense self-radiation flux and magnetic field impulse 19 p3407 A66-36095
- Polarized pyrometric probe with thermal insulation, comparing probe radiation with volt ampere characteristics of plasma to obtain particle density and energy 19 p3409 A66-36280
- Instrumentation for plasma diagnostics noting electron density profile, temperature, ion-atom and electron-atom interaction, etc 20 p3556 A66-36964
- Pioneer VI MIT experimental results on interplanetary plasma 20 p3657 A66-38210
- Higher harmonics generation of ion cyclotron frequency in longitudinally magnetized plasmas, noting experimental setup and pressure effects 21 p3777 A66-38766
- Space charge effects on electrical field and plasma structure in vicinity of charged cylinder of small radius 21 p3812 A66-38786
- Book on plasma diagnostics covering measuring devices and techniques, SHF antenna and waveguide system, emission measurements, etc 21 p3737 A66-38949
- Plasma diagnostics method, measuring parameters of hydrogen plasma with beam of fast hydrogen atoms and ions 21 p3784 A66-39032
- Total energy and radial energy distribution of plasmoids, examining error in measurement by probe consisting of heat sensor and thermocouple 21 p3785 A66-39034
- Plasmoids reflection from metallic surface, using fast particle beam-probing techniques 21 p3787 A66-39050
- Polarization interaction of plasma fluxes moving in transverse magnetic field, using plasma diagnostic techniques including superhigh-speed photography and double electrostatic and magnetic probes 21 p3787 A66-39053
- Microwave and optical range electromagnetic wave scattering in plasma, noting frequency and power of probing signal 21 p3789 A66-39066
- Shock wave propagation in plasma across magnetic field, solving problem via two-component hydrodynamic equation 22 p3953 A66-39765
- Spherical plasma probe behavior in AC potential with frequency near plasma frequency 22 p3954 A66-39811
- Electron collection from VLF receiving antennas and plasma-density probe on board FR-1 satellite, using cathode-grid device 22 p3876 A66-40162
- Stagnation pressure measurement in high temperature high current plasmas, using small uncooled Pitot tube [AIAA PAPER 66-179] 22 p3956 A66-40372
- Radial distributions of number density, electron temperature and plasma potential measured in electrodeless discharge, using symmetric and asymmetric double probes [AIAA PAPER 66-194] 23 p4107 A66-41907
- Electrostatic probe and VHF microwave reflectometry study of nitrogen flow around models in hotshot wind tunnels, determining plasma sheath physical characteristics 24 p4191 A66-42193
- Book on instrumentation for high speed plasma flow including magnetic field balance, transducers, flow angle indicator, MHD profile meter, etc 24 p4211 A66-42487

Monte Carlo analysis of plasma of heavy ions, obtaining thermodynamic properties, potential energy and pair distribution 24 p4245 A66-43036

PLASMA PROPULSION

Electric drive operating parameters and design, using exploding wire type device and electromagnetic apparatus for plasma production and acceleration 06 p0942 A66-15917
Discharge and exhaust beam of small low-power DC magnetic expansion thruster [AIAA PAPER 66-195] 11 p1743 A66-22216
Electron cyclotron resonance plasma thruster for spacecraft electric propulsion systems 14 p2374 A66-27520
Efficiency of two-stage repetitively pulsed coaxial plasma engine calculated from engine thrust and total mass flow [AIAA PAPER 66-342] 17 p2990 A66-32448
Dielectric-walled vacuum vessel for space simulation testing of plasma propulsion devices 17 p2903 A66-32487
Solar wind engine for generating electric power and for propulsion of space vehicles [AIAA PAPER 66-596] 18 p3165 A66-34446
Advantages of plasma propulsion include zero energy consumption when stopped and functioning by pulses, thus facilitating telecommands 20 p3628 A66-37396
Electrical propulsion devices for space vehicles related to plasma physics, ion-beam generation and particle dynamics 24 p4262 A66-43120

PLASMA RADIATION

Transition and bremsstrahlung spectrum from measurement of energy dependence on visible and UV radiation emitted from electron bombarded Ag targets 01 p0108 A66-10195
Spectral radiance measurements for vortex stabilized arcs in argon, oxygen, air and nitrogen 02 p0263 A66-11232
Cerenkov radiation by charge moving lengthwise in magnetic field of cold plasma, determining radiation spectrum range and total radiation energy 03 p0397 A66-12389
Optical processes effect on integral water plasma radiation to determine atmospheric pressure and temperature 03 p0399 A66-12824
Enhanced bremsstrahlung from thermal plasmas containing nonthermal electrons 03 p0401 A66-12953
Radiation of finite volume of nonequilibrium plasma, discussing integral flux parameters 04 p0552 A66-13873
Hard X-ray emission during few half-cycles of theta pinch discharge before breakdown explained by bremsstrahlung of free accelerated electrons colliding with tube wall 04 p0555 A66-14326
Local electron temperature and electron density in theta pinch measured by means of scattering of laser beam 04 p0555 A66-14334
Longitudinal and transverse emissivities of neutrino-pairs from stellar plasma 07 p1131 A66-18237
Steady state radiative transport through homogeneous spherical medium, applying invariance principles of Ambartsumian and Chandrasekhar 07 p1155 A66-18339
Stimulated Raman effect in gaseous plasma analyzed by coupled-mode method, noting plasma optical pumping 07 p1091 A66-18427
Anomalous bremsstrahlung and anomalous cyclotron radio emission from partially ionized gases in 20 to 1000 mc range 08 p1263 A66-19015
Microwave radiation from high voltage plasma with oscillating electrons and resulting cyclotron frequency harmonics 08 p1264 A66-19180
Contact-making process in cadmium sulfide crystals, examining influence on plasma electron efficiency in glow discharge effect 08 p1272 A66-19243
Characteristics of lines exhibited in structure of microwave radiation from bounded plasma column 09 p1409 A66-20850
High density plasma with high optical emissions produced by wall stabilized pulsed arc discharge in xenon, noting absorptivity and electric conductivity [AIAA PAPER 66-184] 10 p1561 A66-21433
High voltage vortex arc radiation source for producing reliable quantifiable plasmas, noting argon spectral distribution

[AIAA PAPER 66-186] 10 p1561 A66-21434
Bremsstrahlung, recombination radiation and electromagnetic emission from high-temperature high density plasmas 10 p1566 A66-21705
Cerenkov radiation from charge spiralling in warm plasma under action of infinite magnetostatic field 11 p1745 A66-22494
Continuous emission and absorption of plasmas by calculating radiation of hydrogen plasma, deriving temperature and pressure conditions under which plasma radiates as black body 12 p1919 A66-23750
Boundary value problem of acoustic point source antenna within compressible plasma region with assumed rigid boundary, noting acoustic power conversion into electromagnetic waves 12 p1920 A66-24116
X radiation in discharge of TA 2000 torus 13 p2138 A66-25123
IR emission and electrical resistivity measurements of TA 2000 plasma by interference spectrometer 13 p2138 A66-25124
Nonlinear optical effects in plasma, optical mixing of three light beams and scattering of light-by-light, noting dominant Raman scattering 13 p2132 A66-26152
Plasma temperature determination from emitted UV radiation in metallic plasma formed by laser heating 13 p2154 A66-26592
Operation and performance characteristics of shock tube using arc discharge heating of driver gas, noting results on radiative emission from aerodynamic plasmas 13 p2059 A66-26711
Magnetic effect on emission spectrum of negative glow plasma in hollow-cathode discharge, noting pressure effect 14 p2340 A66-27024
Radiation of finite volume of nonequilibrium plasma, discussing integral flux parameters 14 p2343 A66-27575
Electron temperature in helium plasma determined from intensity ratios of spectral lines 14 p2344 A66-27643
Emission from hot low-density plasma due to bremsstrahlung, radiative recombination and electron collision-induced line emission 14 p2345 A66-28120
New inner-shell resonance lines in highly ionized sulfur and chlorine from high-energy theta-pinch plasma light source 14 p2338 A66-28130
Intensities of optically thick lines emitted by hydrogen-like ions in steady state plasma for various electron temperatures and densities 16 p2758 A66-30276
Decaying gaseous plasma ion densities, metastable atom densities and light emission simultaneously measured by mass spectrometer and light spectrometer 16 p2759 A66-30422
Cyclotron harmonic radiation from rare gas discharge in magnetic field 16 p2764 A66-31351
Wave radiation of current-carrying plane of magnetoactive low density plasma layer, assuming that magnetic field is stable and normal to layer 16 p2655 A66-31545
Forbidden transitions in atomic systems induced by uniform and nonuniform intermolecular electrical fields in plasma 16 p2786 A66-31562
Free-free galactic X-ray emission from hot fully-ionized hydrogenic plasma 17 p2992 A66-31916
Plasma bremsstrahlung power derived for relativistic, nonrelativistic and electron beams 17 p2965 A66-32256
Intense microwave radiation from high density plasma confined by magnetic mirror 18 p3145 A66-34114
Flute stability characteristics and cyclotron frequency microwave emission from low-energy plasma confined in magnetic mirror 19 p3426 A66-36566
Power balance measurements and particle loss rate of ohmically heated helium and hydrogen discharges in C stellarator 19 p3428 A66-36578
Plasma radiative processes theory with conservation principles derivation and H-theorem proof 20 p3607 A66-37012
Visible and UV transition radiation, bremsstrahlung and plasma due to electron bombardment of metal

surfaces 20 p3604 A66-37280
Scintillation analysis of hard X-radiation from high power pulse discharges 22 p3952 A66-39753
Coherent radiation generation in electron-hole indium antimonide plasma, discussing emission spectrum 22 p3965 A66-40319
Interference filter of Fabry-Perot interferometer-type for studying millimeter and submillimeter plasma radiation 22 p3958 A66-40936
Radiation in relativistically moving anisotropic plasma medium, noting Lorentz type transformation of plasma electron volume density 23 p4105 A66-41638

PLASMA RESONANCE

Frequency and collisionless damping rate of electronic resonances of one-dimensional plasma in potential distribution 01 p0112 A66-10511
Resonance in plasma column applied to waveguide filter 01 p0041 A66-10572
Resonance effect on surface wave propagation in plasma with varying density, noting absorption and spatial plasma dispersion 03 p0396 A66-12287
Resonance and response characteristics of unbounded one-dimensional plasma immersed in nonuniform static field 03 p0400 A66-12951
Space shift between electron density and luminous intensity of plasma in stationary striation by microwave resonator 03 p0372 A66-13282
Plasma resonance of cylindrical plasma in absence of magnetic field noting conductivity kernel, scattering of radiation, nonuniformity of plasma sheath and Landau damping 04 p0474 A66-13425
Plasma electron concentration, using nonlinear light scattering on geometrical optical path 04 p0554 A66-14295
Space and time dependence of decaying resonant oscillations excited in collisionless plasma by infinitesimally small pulsed dipole 05 p0721 A66-14714
Helicons in n-type silicon and germanium, calculating collective modes of electrons in external magnetic field from frequency and wavelength-dependent conductivity tensor 06 p0923 A66-16275
Nonlinear harmonic generation by plasma cylinder 06 p0916 A66-16377
Electron density measurement using plasma resonance excited by swept frequency signal 06 p0917 A66-16759
Refractive index of plasma in vicinity of hybrid ion-electron resonance determined within three-fluid model, including collisions and pressure terms 07 p1084 A66-17206
Noncollisional damping modifies HF plasma resonance 08 p1261 A66-18644
Paramagnetic resonance occurring in plasma located in external electric field, noting relation between oscillation amplitude and electron frequency 08 p1262 A66-18976
Plasma resonance excitation by small dipole antenna operating in pulsed mode in presence of and in absence of external magnetic field 09 p1340 A66-19849
Plasma and electron gyroresonance effects on admittance of RF plasma probe surrounded by ion sheath 09 p1381 A66-20373
Resonance conditions in accelerating plasma clusters between parallel conductors in strong transverse magnetic field 09 p1410 A66-20982
Resistance effect on resonance conditions in accelerating plasma clusters of constant mass in external magnetic field 09 p1410 A66-20983
Axial magnetic field effect on resonance of surface waves propagating along cylindrical plasma column 10 p1497 A66-21559
Laser induced gas breakdown at high pressures, noting effect of plasma density on index of refraction via optical frequency resonance measurement 10 p1542 A66-21564
Nonlinear theory of dipole resonance of cylindrical plasma blob to examine coherent acceleration of plasma 10 p1571 A66-22016
Transverse motion modification of longitudinal frequency spectrum resonances of light scattered from plasma 11 p1745 A66-22973
Thermal radiation resonance of plasma cylinder in presence or absence of magnetic

- Field 12 p1919 A66-23774
Dipolar resonances when axially uniform warm plasma column is subjected to transverse RF electric field 12 p1815 A66-23962
Transverse magnetic field effect on drifting hot plasma resonance peaks, noting oscillation mechanism and application of successive moments of Boltzmann equation 13 p2144 A66-25725
Plasma resonance and scattering, threshold variation and optical reflectivity in pulsed laser beam-induced gas breakdown 13 p2134 A66-26192
Explorer XX satellite observations of plasma resonances at fixed frequencies in topside ionosphere, noting patterns, effect of geomagnetic field, electron concentration, etc 13 p2074 A66-26352
Magnetic toroidal resonances and vibrating field lines, using basic toroidal equation in determining validity of heuristic vibrating string model 13 p2074 A66-26359
Plasma oscillation resonance phenomena of ionospheric antenna excitation near lower hybrid resonant frequency 14 p2340 A66-27127
Ringing phenomena in ionospheric magnetoplasma as evidenced by spikes on ionograms from Alouette satellite 14 p2283 A66-27513
Parametric resonance in plasma situated in magnetic field, noting oscillation, frequency stability, kinetic equations, electric field effect, etc 16 p2762 A66-31170
Nonlinear theory of dipole resonance of cylindrical plasma blob to examine coherent acceleration of plasma 19 p3408 A66-36102
Second-harmonic electron cyclotron resonance in hydrogen plasma from HF ion source with inductive coupling situated in transverse magnetic field 20 p3607 A66-37407
Quasi-static approximation of dipolar resonance of cold homogeneous cylindrical magnetoplasma column, examining magnetic splitting of Herlofson-type resonances 20 p3528 A66-37451
Resonance interaction indicated by mass spectroscopic studies of energy spectra of plasmoid protons with spatially-periodic magnetic field 21 p3786 A66-39044
Nonadiabatic magnetic trap energy redistribution during charged particle motion in spatially periodic magnetic field 21 p3788 A66-39058
Explorer XX topside sounder observations of ionospheric irregularities in electron density and plasma wave electrostatic resonances 22 p3909 A66-39972
VLF resonances in conjunction with topside sounder provide information about composition and temperature of terrestrial ionosphere 22 p3909 A66-39975
Resonant frequencies of VHF Lecher line coupled to mercury arc plasma via split cylinder coupler measured as function of electron density 23 p4100 A66-41155
Flute type oscillations of hot ion plasma in homogeneous magnetic field with wave-plasma resonances 23 p4105 A66-41705
Inverse cold-plasma resonance in cylindrical hole and applicability to plasma density measurement 24 p4242 A66-42402
- PLASMA SHEATH**
Radiation from dielectric coated cylindrical core loop antenna surrounded by lossy plasma sheath 01 p0040 A66-10552
Reducing setting time of phase shifters in phase control of microwave signals using space charge sheaths 01 p0028 A66-10564
Double sheath presence in front of hot cathode in low pressure DC discharge 02 p0265 A66-11433
Electromagnetic field and radiation pattern of Hertzian electric dipole antenna in conical sheath 02 p0191 A66-11803
Charge separation into film about symmetrically gravitating body at high temperatures and small Debye radius 03 p0396 A66-12290
Effective thickness of plasma sheath at cold electrode determined from electrode-plasma system capacitance 03 p0406 A66-13281
Plasma resonance of cylindrical plasma in absence of magnetic field noting conductivity kernel, scattering of radiation, nonuniformity of plasma sheath and Landau damping 04 p0474 A66-13425
Plasma sheaths on radiation patterns of antennas on hypersonic vehicles, noting permittivity and transmission loss 04 p0474 A66-13426
Microwave transmission from reentry vehicle surrounded by plasma sheath with inhomogeneities 04 p0479 A66-13624
Asymptotic theory of photolization chamber noting charged particle densities, sheath equations and quasi-neutral plasma 05 p0721 A66-14717
Neutralizer configurations, immersed and withdrawn filaments, for given ion gun based on two-dimensional computer simulation of ion-beam neutralization [AIAA PAPER 65-380] 05 p0723 A66-15168
Disturbances caused by bodies moving through plasma and solar wind-interaction 06 p0869 A66-16907
Papers on interactions of space vehicles with ionized atmosphere 08 p1302 A66-18742
Potential and charge density distributions derived for stationary charged sphere and charged body moving through plasma 08 p1261 A66-18744
Plasma sheath effects on antenna impedance probe and retarding potential probe installed on two Aerobee 150 rockets 08 p1181 A66-18746
Radar echo effects of satellite disturbance in plasma medium, noting electron and positive ion density distribution 08 p1302 A66-18755
Antenna gain cut-off effect at high altitude for monopole antenna 09 p1350 A66-19853
Performance capabilities of Hall current accelerators determined from parameters influencing anode power loss [AIAA PAPER 66-201] 10 p1563 A66-21443
Plasma column end effects of Q-1 device on density and volt-ampere characteristics 10 p1567 A66-21822
Plasma sheath properties near discharge tube anode, noting relation of electron current distribution along discharge radius and ion energy spectrum to pressure 10 p1558 A66-21999
Kinetic approximation of electromagnetic surface wave propagation in infinite plasma sheath solved by Fourier method, noting resulting dispersion 11 p1743 A66-22441
Faust 1, hardcore discharge stability experiment with final configuration obtained from radial inward collapse of plasma sheath from tube wall 11 p1744 A66-22451
Plane electromagnetic wave scattering by conducting cylinder surrounded by hot magnetoplasma sheath 11 p1657 A66-23112
Behavior of electric field of expanding wave in magnetically active plasma 12 p1921 A66-24213
Plasma potential and sheath radius of positive cylindrical and spherical Langmuir probes 14 p2339 A66-26829
Slot admittance for two-layer compressible plasma sheath-ion sheath in plasma half-space 14 p2235 A66-27128
Prolate spheroidal antennas, discussing spheroidal wave functions, confocal plasma sheath effects and influence of DC magnetic field 14 p2249 A66-27129
Neutralizer configurations, immersed and withdrawn filaments, for given ion gun based on two-dimensional computer simulation of ion-beam neutralization [AIAA PAPER 65-380] 14 p2342 A66-27411
Permanent magnetized ferrite antenna waveguide windows for improving EM wave transmission through plasma and reducing transmission losses during reentry 14 p2241 A66-27930
Quantitative comparison of experimental studies of resonant probe, obtaining resonant frequencies and antiferquencies 14 p2347 A66-28306
Calculation of electromagnetic field within two-dimensional plasma sheath with static magnetic field, noting effect of electron-cyclotron frequency on refractive index of medium 15 p2549 A66-28707
HF magnetic fields within homogeneous plasma sheath measured as function of plasma parameters and perpendicularly superimposed static magnetic field, noting resonance of electron cyclotron wave 15 p2549 A66-28708
Radiation pattern of dielectric coated cylindrical core loop antenna in lossy plasma sheath 15 p2452 A66-29712
Laminar boundary layer of low temperature plasma on isolator walls in channel of MHD generator in presence of transverse magnetic field 16 p2758 A66-30327
Plane wave propagation across thin stratified plasma sheaths, noting polarization and reflection [AIAA PAPER 66-481] 16 p2655 A66-31492
Radiation fields of center-fed cylindrical antenna surrounded by plasma sheath, graphically presenting far-field patterns and surface wave fields 18 p3141 A66-33538
Plasma sheath properties near discharge tube anode, noting relation of electron current distribution along discharge radius and ion energy spectrum to pressure 18 p3140 A66-34976
Resistance and frequency response range of sheath surrounding electrostatic probe floating in tenuous plasma 19 p3357 A66-35808
Thermal radiation of nonhomogeneous plasma sheath, obtaining radiation intensity formula via fluctuation theory 19 p3409 A66-36281
Electric dipole radiation through finite conical plasma sheath about reentry vehicle, calculating radiation pattern 19 p3304 A66-36403
Axially oriented point source current and filament with triangular current distribution in magnetotonic medium, examining ion sheath effect on radiation characteristics 20 p3516 A66-37624
Mathematical analysis of radiation from slotted magnetic line source on conducting cylindrically capped wedge covered by dielectric layer or plasma sheath 21 p3705 A66-39349
FR-1 satellite contact with surrounding plasma ensured by cathode device tested on Aerobee rocket 22 p3876 A66-40163
Behavior of electric field of expanding wave in magnetically active plasma 22 p3957 A66-40577
Electrostatic probe and VHF microwave reflectometry study of nitrogen flow around models in hotshot wind tunnels, determining plasma sheath physical characteristics 24 p4191 A66-42193
Radiation characteristics of filament with triangular current distribution situated along axis of magnetized plasma column, noting guided and space waves excited by filament 24 p4240 A66-42291
Self-impedance of electric dipole immersed in plasma half-space with finite temperature 24 p4243 A66-42625
Propagation and radiation of radio waves from dielectric coated prolate spheroidal core loop antenna surrounded by plasma sheath 24 p4184 A66-42745
- PLASMA SLAB**
Nonlinear microwave breakdown induced in thin high-density plasma slab when plane wave is normally incident upon it 06 p0844 A66-16038
Dispersion relations of plane surface waves on grounded anisotropic magnetoplasma slab immersed in free space 18 p3068 A66-34084
Dispersion characteristics of duct propagation of whistler radio waves along depressed magnetoplasma slab 18 p3072 A66-34568
Matrix technique used for derivation of reflection and transmission coefficients of bounded plasma slab, noting wave propagation 19 p3305 A66-36419
Fluid equations used in describing electron and ion motion perpendicular to field lines in slab of plasma supported against gravitational field by sheared magnetic field 19 p3417 A66-36527
Hydromagnetic, resistive and microinstabilities in plasmas, noting particle collisions and effect and validity of Maxwell-Vlasov equations with Fokker-Planck collision term 19 p3417 A66-36528
Plasma slab resistance between juxtaposed disk electrodes, obtaining exact two-and approximate three-dimensional solution 21 p3776 A66-38546
Electromagnetic wave radiation from dipole source in thin plasma slab becoming weak

outside plasma, considering total reflection 21 p3703 A66-38759

PLASMA SOUND WAVE

Tonks-Dattner resonances of plasma column irradiated by RF electric field due to plasma acoustic wave propagation 01 p0025 A66-10536

Magnetosonic wave emission from AC ring current and acoustic monopole passage through magnetoactive plasma 02 p0268 A66-11770

Ionization excitation of ionic sound in nonequilibrium discharge plasma and resultant instabilities 03 p0400 A66-12835

Coupled optical and acoustic wave propagation in bounded compressible isotropic plasma with admittance boundary condition 07 p1084 A66-17526

Collision effect on coupling of ion-acoustic waves to neutral acoustic waves at diffuse boundary consisting of partially ionized gas 07 p1088 A66-17955

Electromagnetic and acoustic wave coupling in homogeneous compressible isotropic plasma and diffraction by half-plane due to sharp structural discontinuities in antenna configurations 15 p2448 A66-28591

Ionization excitation of ionic sound in nonequilibrium discharge plasma and resultant instabilities 19 p3433 A66-36777

Power conversion enhancement of acoustic-electromagnetic wave coupling across plasma-air boundary by suitable thickness and charged particle density 24 p4241 A66-42304

PLASMA SPECTRUM

Ion direct heating in nonlinear absorption of transverse waves during scattering on plasma ions, noting equation for ion distribution function 03 p0396 A66-12283

Spectral line energy emitted by homogeneous argon plasma 03 p0399 A66-12715

Spectral intensities in theoretical plasma models, noting astrophysical spectra and atomic data 04 p0553 A66-14192

Spectroscopic measurements using membrane-type shock tube for absolute determination of continuous absorption coefficients of negative hydrogen ions 04 p0553 A66-14279

Ion direct heating in nonlinear absorption of transverse waves during scattering on plasma ions, noting equation for ion distribution function 05 p0727 A66-15455

Interferometer for measurement of ratio of small changes in wavelength of spectral line to linewidth, as basis for measuring plasma electron temperature 06 p0883 A66-16943

Tonks-Dattner resonances, describing frequency modulated technique to study microwave energy irradiated plasma column 06 p0920 A66-16993

Ion motions in theta pinch discharge studies from time-resolved profile measurements of impurity lines 06 p0921 A66-17050

Doppler broadened Cv spectral line from theta pinch and microscopic plasma velocities by reducing axial motion effect 07 p1086 A66-17654

Temperature and plasma-composition determination for pure thermal carbon plasma 07 p1086 A66-17734

Spectral line energy emitted by homogeneous argon plasma 09 p1406 A66-19946

Spectroscopic analysis of helium plasma heated by reflected shock in T-tube, discussing luminous front and preceding shock 09 p1409 A66-20854

Zeta/solar lines between 170 and 220 angstroms, examining similarity of iron spectra 10 p1602 A66-21089

Spectroscopic and optical studies of high pressure underexpanded jet produced by expanding DC arc plasma generator through sonic orifice [AIAA PAPER 66-164] 10 p1565 A66-21688

Electron density and temperature measured in exhaust of magnetoplasma dynamic (MPD) source, using Langmuir probe and spectrometry [AIAA PAPER 65-298] 10 p1594 A66-21780

Spectral line intensities variation in ionization of hydrogen and impurities in TA 2000 device 13 p2138 A66-25125

Plasma diagnostics from self-reversible

profiles of spectral lines emitted by inhomogeneous layers 15 p2552 A66-29344

Spectrum of plasma fluctuations in ionized turbulent gas explained by statistical turbulence theory, noting that electron temperature is larger than gas temperature 16 p2757 A66-30173

Spectroscopy of plasmajets and electric arcs, noting spectral intensity, line width, etc 16 p2707 A66-31188

Continuous-emission coefficient of argon plasma in 2500 to 7500 angstrom range at temperatures from 11,500 to 12,500 degrees K 16 p2766 A66-31602

Quantitative measurement of electron correlation spectrum for deuterium plasma in thermal equilibrium 17 p2963 A66-31885

Plasma electron temperature measurement by intensity ratio of two lines 17 p2965 A66-32284

Emission line profiles of helium plasma formed by laser heating 17 p2933 A66-32285

Doppler shift, velocity and line width measurements for mass motion in plasmas 17 p2925 A66-32488

Profile of ionized calcium resonance lines radiated from arc plasma jet observed by Fabry-Perot etalon 17 p2970 A66-32714

Frequency spectrum of continuous thermal radio emission of plasma layer 17 p2974 A66-33285

Spectroscopic measurements of cold plasma charged particle concentrations, specifically spectral broadening due to Stark effect, forbidden-line intensities affected by internal electric fields and autoionization line intensities 18 p3143 A66-34032

Plasma diagnostics from self-reversible profiles of spectral lines emitted by inhomogeneous layers 20 p3607 A66-37349

Energy spectra of plasmoids produced in conical organic-glass plasma source, establishing various ions 21 p3786 A66-39041

Energy spectra of fast particles of moving plasmoids obtained in Bostick plasma source examined by mass spectrometer 21 p3786 A66-39042

Plasma spectrography in shock tube, determining charged particle concentration 22 p3953 A66-39760

PLASMA SPRAYING**SA FLAME SPRAYING**

Molybdenum machine parts produced by plasma powdering process, noting improvement due to annealing 04 p0525 A66-13434

Plasma and carbide coatings for protecting graphite surfaces at high temperatures obtained by sputtering or deposition and thermal treatment to induce diffusion 10 p1548 A66-21508

Plasma sprayed and detonation-flame-plated protective wear-resistant coatings to extend life of aircraft jet engine parts [SAE PAPER 660310] 14 p2301 A66-27292

Molybdenum machine parts produced by plasma powdering process, noting improvement due to annealing 20 p3575 A66-38136

Plasma arc spraying equipment, techniques, materials and applications 22 p3922 A66-39700

Plasma and carbide coatings for protecting graphite surfaces at high temperatures obtained by sputtering or deposition and thermal treatment to induce diffusion 23 p4083 A66-41528

Fabrication of thermoelectric elements by arc plasma spraying 24 p4216 A66-42118

PLASMA STABILITY

First approximations of kinetic theory for homogeneous and unstable plasma obtained from generalized Bogoliubov method 01 p0111 A66-10389

Dynamic behavior of beam-plasma amplifier 01 p0038 A66-10516

Hydromagnetic stability of interface formed by two superposed columns of dilute plasmas with anisotropic pressure 01 p0116 A66-11198

Hydromagnetic oscillation in toroidal discharge with external magnetic field distorting plasma column into helical form 02 p0266 A66-11444

Cyclotron instability dependence on nonmonotonic ion distribution function of plasma with cyclotron resonance 03 p0396 A66-12289

Positive gas discharge column equilibrium

and instability factors, noting increase in ionization and plasma conductivity from decreased electron heating 03 p0398 A66-12509

Stability and energy decrease caused by plasma captured by collision in magnetic mirror bottle 03 p0403 A66-12967

Toroidal drift effect on motion of plasma injected across transverse toroidal magnetic field 04 p0550 A66-13432

Criteria for occurrence of spatially periodic solutions of self-consistent problem in steady state rarefied plasma 04 p0556 A66-14419

Hydromagnetic stability of plasma 05 p0725 A66-15241

Linearized equation and energy principle for plasma stability problems 05 p0726 A66-15254

Instability of plasma supported under gravity by magnetic field, considering collisions between charged and neutral particles dominate over charged particle interaction 06 p0915 A66-16180

Current convection modification in low pressure plasma in magnetic field when collision frequency is less than all other characteristic frequencies 06 p0917 A66-16627

HF stabilization of screw instability in semiconductors 06 p0928 A66-16776

Nonlinear effects of induced scattering of oscillations of plasma particles, examining influence on dynamics of beam instabilities 07 p1086 A66-17649

Flute instability of plasma of finite pressure and zero pressure, examining stabilizing effect of finite larmor radius 07 p1086 A66-17651

Slow instability caused by dissipation of negative oscillation energy in mirror-type plasma-containment device 07 p1089 A66-17959

Current driven instabilities slowed down by increasing electron-ion collisions in configurations with sheared magnetic fields 08 p1260 A66-18539

Negative double derivative in vacuum magnetic field in terms of flux surfaces about magnetic axis of arbitrary shape 08 p1260 A66-18543

Stability of rotating plasma pinch with HF radial oscillations and situated in longitudinal magnetic field 08 p1263 A66-19175

Approximation error on interchange stability of Van Allen belt corrected 08 p1284 A66-19421

MHD models used for analysis of stability of nonhomogeneous magnetized plasma with regard to perturbations whose electrical field is calculated from potential 08 p1265 A66-19469

Drift and flute instability of rarefied inhomogeneous plasma in short traps 08 p1266 A66-19636

Stationary state of plasma in magnetostatic and HF fields used to derive solution for corresponding Vlasov equation 09 p1410 A66-20981

Spacecraft motion in rarefied plasma in ionosphere and space, considering plasma stability and effects of magnetic and electric fields 09 p1464 A66-21015

Coherent radiation effect on stability of crossed field electron beam, noting raising of potential of space vehicle 10 p1564 A66-21544

Relativistic effects on plasma stability 10 p1567 A66-21818

Boundary condition effects in magnetic mirror compression experiment, noting dependence of transition from unstable to quasi-stable plasma containment on density and lifetime 10 p1568 A66-21824

Plasma column equilibrium in toroidal chamber maintained by pressure of HF traveling magnetic field and DC magnetic field of longitudinal surface currents 11 p1743 A66-22442

Effect of cold plasma admixture on LF oscillation spectrum and stability of nonhomogeneous hot plasma contained by magnetic field 11 p1744 A66-22450

Faust 1, hardcore discharge stability experiment with final configuration obtained from radial inward collapse of plasma sheath from tube wall 11 p1744 A66-22451

Current vortices and critical surface shape

- for stationary axisymmetric plasma flow in azimuthal magnetic field 12 p1922 A66-24341
- Variational formulation for equilibrium and stability of plasma with particle orbits described by guiding center 12 p1923 A66-24569
- Convective stability in plasma with horizontal magnetic fields, obtaining stability conditions 12 p1924 A66-24591
- Electrostatic stability of cylindrical plasma beams composed of high velocity electrons rotating along magnetic lines of force in perpendicular direction and ions displaced long length of magnetic field 13 p2141 A66-25446
- Plasma stability problem, discussing macroscopic and microscopic approaches and application of Liapunov method 13 p2141 A66-25583
- Plasma stability in magnetic field where disordered energy of particles may be liberated so as to cause collective evolution of plasma, using formalism describing particle diffusion, noting distribution function role 13 p2144 A66-25719
- Force-free paramagnetic model and force-free Bessel function model of stability of feeble pinch, presenting numerical calculations using Newcomb criterion 13 p2144 A66-25720
- Plasma stability with plane boundary, noting effect of perturbed electric field, particle trajectory and equilibrium distribution 13 p2144 A66-25726
- Instability of unbounded anisotropic plasma containing beam 13 p2149 A66-26039
- Boundary stabilization for plasma blobs moving in corrugated magnetic field 13 p2152 A66-26519
- Necessary conditions for stability of collisionless guiding center plasma, sufficient for stability of equilibrium configurations whose distribution functions are bell shaped 13 p2154 A66-26671
- State equation and equilibrium correlations for hydrogen type plasma 13 p2157 A66-26756
- Synthesis of plasma by ion beam bombardment, discussing electrostatic instabilities and collisional and noncollisional damping 14 p2339 A66-26816
- Stabilization of gas conductor carrying HF current with aid of steady state magnetic field, noting MHD perturbations role 14 p2341 A66-27149
- Critical plasma pressure for equilibrium in toroidal system, noting close relationship between equilibrium and stability problems 14 p2347 A66-28303
- Equilibrium conditions for long containment time derived for plasmas in toroidal vessels 14 p2347 A66-28311
- Optimal controllability and stability criteria for viscous and inviscid fluid dynamics 14 p2348 A66-28463
- One-dimensional flow through nozzle and stability of weakly ionized plasma with induced Hall current 15 p2550 A66-28958
- Boundary of magnetic field of two arbitrary line currents immersed in plasma at uniform pressure 15 p2553 A66-29687
- Flute stabilization of hot electron plasma by cold plasma which contributes to dielectric coefficient 15 p2555 A66-29759
- Electron-cyclotron-heated plasma stability in mirror containment systems possessing shear, minimum-B properties or both 15 p2555 A66-29760
- Intrinsic electric field of rarefied ion-electron plasma in external magnetic field and plasma stability, noting use of Galerkin method to determine plasma layer slippage 16 p2760 A66-30790
- Instability arising as overstability in magnetohydrodynamic Benard problem 16 p2761 A66-31104
- MHD theory of stability reduced to fourth-order differential equation with arbitrary parameter for highest order derivative 17 p2964 A66-31893
- Circular toroidal plasma stability under average magnetic well 17 p2966 A66-32424
- Charged particle distribution in hollow cylinder shaped positive plasma column during diffusion and helical instability in longitudinal magnetic field 17 p2969 A66-32548
- Response of finite relativistic beam plasma system to small disturbances analyzed, using coupled Vlasov-Maxwell equations 17 p2970 A66-32640
- Stability of weakly ionized plasma in strong electric field against formation of longitudinal waves, examining hydrodynamic equations 17 p2970 A66-32715
- Minimum B as toroidal plasma stability criterion 18 p3141 A66-33670
- Apparent HF stability of highly anisotropic plasma, noting charge exchange and trapped proton energy spectrum 18 p3142 A66-33671
- Electrostatic stability of fully ionized non-Maxwellian electron-ion plasma 18 p3142 A66-33953
- Drift and flute instability of rarefied inhomogeneous plasma in short traps 18 p3146 A66-34179
- Stabilization of hydrodynamic drift oscillations in rotating nonuniform cylindrical plasma 18 p3152 A66-35078
- HF stabilization of screw instability in semiconductors 19 p3434 A66-35373
- Solution of Boltzmann and rate equations for electron distribution function and state populations in nonequilibrium MHD plasmas 19 p3406 A66-35801
- Dielectric function for homogeneous plasma calculated, using fluctuation dissipation theorem 19 p3409 A66-36289
- Rosenbluth diagram for cylindrical plasma stability 19 p3410 A66-36338
- MHD stabilization of open-ended systems including minimum-magnetic-field configurations in plasma stabilization 19 p3411 A66-36495
- Plasma stability in magnetic mirror machine with stabilizing rods of various size and number 19 p3412 A66-36500
- Stabilization by shear and negative second-derivative of volume against gravitational interchange of toroidal system 19 p3412 A66-36501
- Magnetic well stable to pure interchange instability and ballooning mode 19 p3412 A66-36502
- Instability 19 p3412 A66-36502
- Closed toroidal magnetic field configurations satisfying stability criterion of low-pressure plasma of minimum-B 19 p3413 A66-36504
- Deuterium plasma containment and stability in theta pinch configuration using megajoule capacitor banks, studying density, temperature and radial distribution 19 p3413 A66-36505
- Stability, heating and end loss of 3.5-MJ theta pinch measured by various methods 19 p3413 A66-36507
- Stable and unstable behavior of preheated hydrogen plasma in linear and cusped theta pinches 19 p3414 A66-36511
- Plasma instability in toroidal discharges and macroscopic effects resulting from nonlinear plasma oscillation 19 p3415 A66-36515
- Stability of low pressure confined plasma taking into account effect of particle collisions, analyzing equilibrium configuration stability 19 p3417 A66-36529
- Nonuniform plasma stability in magnetic field gradient 19 p3417 A66-36530
- Plasma oscillation and stability in HF external electric field 19 p3417 A66-36531
- Drift instabilities calculated in beta limit, examining influence on electron cyclotron harmonic waves, Larmor radius flute, structure of infinite plasma in magnetic field, etc 19 p3418 A66-36535
- Relation of kinetic theory to unstable plasmas /weak turbulence/, noting expansion parameters and extension to include discrete particle effects 19 p3418 A66-36536
- Rotation and subsequent instability of plasma based on two-fluid equations, including finite radius of gyration effects for ions in pressure tensor 19 p3419 A66-36538
- Livermore neutral-injection experiment for studying stability of steady state 20-kev hydrogen plasma in various confining magnetic fields 19 p3421 A66-36540
- Stability of confined plasma in mirror machine depending on proper coordination of magnetic field geometry with particle distribution function 19 p3422 A66-36548
- Plasma with relativistic electrons in magnetic mirror trap, discussing stability and fast pulsed heating of ions 19 p3423 A66-36553
- Dynamic stabilization of plasma column by HF magnetic field 19 p3424 A66-36557
- Plasma gun and injection techniques for establishing hot field-free cusped plasmas that are MHD stable in equilibrium configuration 19 p3425 A66-36564
- Flute stability characteristics and cyclotron frequency microwave emission from low-energy plasma confined in magnetic mirror 19 p3426 A66-36566
- Plasma column equilibrium in Tokamak-5, noting effect of short-circuiting of drift current by conducting diaphragm 19 p3427 A66-36573
- Plasma stability increase in Zeta discharge as affected by such initial conditions as pressure and theta pinch parameter 19 p3429 A66-36583
- Plasma stability, density, energy, etc, resulting from electron beam/plasma interaction which excites microwave oscillations, creating microwave discharge 19 p3430 A66-36587
- Equilibrium deviation occurring in plasma with variable kinetic temperature due to radiation transport within plasma volume and outflow beyond limits of volume 20 p3606 A66-36973
- Stabilizing effect of vertical uniform magnetic field on Rayleigh-Taylor instability for electrolyte solutions 20 p3608 A66-37458
- Gravitational stability of uniformly rotating cylindrical plasma with finite radius investigated in terms of normal modes 20 p3610 A66-38069
- Crossed-field electron beam stability for arbitrary values of Q /ratio of plasma frequency to cyclotron frequency/ 20 p3606 A66-38404
- Stabilization of long high-pressure argon arc achieved by rotation of gas for radiation measurement 21 p3783 A66-39022
- Excitation of collective motions in collisionless plasma in magnetic field for case of large temperature anisotropy 21 p3783 A66-39024
- Sturrock criteria for differentiating between absolute and convective instability and between amplification and nontransmittance of oscillations 21 p3770 A66-39028
- Short-circuit effects by metal walls and influence on plasma boundary stability 21 p3791 A66-39177
- Cesium plasma of Q device used in study of stability of plasma devices with slanted nonconducting end plates 21 p3792 A66-39187
- Bending effect of spectral lines in plasma created by rotating HF dipole in quasi-steady magnetic field 22 p3953 A66-39761
- MHD and velocity space instabilities of plasma in ring vortex confined by cold gas blanket in toroidal magnetic field 22 p3954 A66-39931
- Model of plasma state prior to flare satisfying thermal equilibrium conditions by acoustic heating and radiation 23 p4127 A66-41082
- Equilibrium of toroidal magnetically confined plasma, using segmented circular aperture limiter 23 p4102 A66-41484
- External control of radial distribution of plasma density for magnetoplasma stabilization against helical instability 23 p4103 A66-41486
- Equilibrium theory of plasma stability in EM field, applying virial theorem and variational principle to random infinitesimal plasma perturbations 24 p4241 A66-42330
- Equilibrium distribution function of particles in phase space applicable to collisionless rarefied plasma confined by magnetic mirror, using first integrals of motion 24 p4242 A66-42399
- Stability criterion for plasma with anisotropic pressure in magnetic mirror system with stabilizing rods 24 p4242 A66-42403
- Plasma stabilization by HF electromagnetic fields, noting mode spectrum spacing along sample axis and dependence on field strength 24 p4242 A66-42517
- Stabilization of gas conductor carrying HF current with aid of steady state magnetic field, noting MHD perturbations 24 p4244 A66-42969
- Effect of ion motion along magnetic field

on plasma stability 24 p4245 A66-43052
 Statistical mechanics methods applied to plasma, deducing kinetic equation 24 p4246 A66-43111

PLASMA TEMPERATURE
 Excitation of ruby lasers using double-pumped high-intensity helical flash tubes, obtaining time-resolved spectra of electrical discharges and plasma temperatures 02 p0240 A66-11446
 Electron and ion temperatures
 Determination for helium plasma produced by theta-pinch with azimuthal magnetic field, using Doppler broadening and X-ray absorption 03 p0396 A66-12292
 Stark profiles of singly ionized nitrogen lines from T-tube plasma, measuring shifts and half-widths of N-ion lines, plasma temperature and electron densities 03 p0405 A66-13137
 Temperature in toroidal theta pinch discharge with image converter camera 04 p0553 A66-14284
 High uncertainty in measurement of helium plasma temperature by two-line relative intensity method 05 p0722 A66-14913
 Plasma measurements including temperatures, electron density, current density, etc, noting behavior of probes in magnetic fields 05 p0726 A66-15247
 Plasma diode analog, determining behavior of unsteady state series-parallel systems for thermionic reactor control 05 p0615 A66-15537
 Temperature and electron concentration in argon and nitrogen arc plasmas by photometering plasma cross sections and comparing with reference image 05 p0729 A66-15855
 Heat transfer from plasmas to water-cooled tubes, using nitrogen, hydrogen and argon with Reynolds number range of 400 to 3500 and various power levels 06 p0971 A66-16432
 Argon plasma temperatures measured by spectral method in internal and external arc plasmatrons, using copper impurity line 06 p0918 A66-16837
 HF electrodeless discharge in argon and krypton at high pressure noting energy radiation losses, electron density and plasma temperature 06 p0919 A66-16873
 Brightness dependence of pulse arc on power per unit length of arc, estimating charged particle density and plasma temperature 06 p0919 A66-16875
 P-n junctions and vacuum diodes used to demonstrate that thermal and shot noise are produced by nonuniform velocity distributions in charge-carrier plasmas 06 p0858 A66-16989
 Simplification of equations for two-temperature plasma composed of electrons, singly charged ions and neutral atoms, noting effect of viscosity and thermal force 08 p1265 A66-19468
 Spark discharge in air induced by focusing laser radiation, determining temperature of plasma produced near focus 09 p1386 A66-19959
 Ion temperature measurement of streaming helium plasma by Langmuir double probe method, discussing effect of stream velocity 10 p1558 A66-21071
 Electron density and temperature measured in exhaust of magnetoplasma dynamic (MPD) source, using Langmuir probe and spectrometry [AIAA PAPER 65-298] 10 p1594 A66-21780
 Electron temperature measurement by relative intensity of He I lines shown as inapplicable for high plasma densities 10 p1571 A66-22021
 Effect of cold plasma admixture on LF oscillation spectrum and stability of nonhomogeneous hot plasma contained by magnetic field 11 p1744 A66-22450
 Temperature and electron concentration in HF induction discharge argon plasma investigated by optical method 11 p1745 A66-22585
 Spectroscopic investigation of argon jet temperature at outlet of plasmatron nozzle, measuring temperature of plasma jet 11 p1745 A66-22589
 Electron temperature determination from intensity ratio of singlet and triplet lines of neutral helium used in plasma diagnostics, noting complications from metastable levels

and coupling of singlet and triplet systems 12 p1924 A66-24592
 Cylindrically symmetric plasma column produced by wall-stabilized arc constrained to operate within transparent tube 13 p2148 A66-25822
 Plasma temperature determination from emitted UV radiation in metallic plasma formed by laser heating 13 p2154 A66-26592
 Spatial variations in electron temperature produced in steady state plasma by electromagnetic standing wave 13 p2155 A66-26678
 Pulsed type radiometer, which samples noise emitted by ionized medium, used to measure electron temperature of nonpermanent plasmas 14 p2290 A66-26823
 Excitation of Alfvén waves in semimetal plasma at low temperature, noting wave propagation below plasma or cyclotron frequency in magnetic field 14 p2363 A66-27516
 Perturbation method analysis of thermodynamic equilibrium properties of multicomponent plasma 14 p2345 A66-27984
 Law of mass action derivation of chemical equilibrium ionization of multitemperature system when electron and heavy particle temperature differ 15 p2551 A66-29218
 Electron saturation current at plane probe in magnetized plasma, considering electron temperature 15 p2554 A66-29753
 Plasma electron temperature measured from soft X-ray bremsstrahlung absorption by beryllium foil 16 p2756 A66-30096
 Electron temperature measurement by relative intensity of He I lines shown as inapplicable for high plasma densities 16 p2760 A66-30840
 Temperature gradient of microplasma in silicon p-n junction 16 p2781 A66-31404
 Emission spectrum of copper atom used to measure temperature and concentration of charged particles in DC-arc plasma burning under water 16 p2766 A66-31600
 Plasma temperature measurement from 3000 to 4000 C using platinum thermocouple with heating-curve time analyzer 18 p3111 A66-34031
 Hollow medium size linear Z pinch producing very high densities and high temperatures 19 p3424 A66-36559
 Temperature and pressure of cesium plasma in wake of incident and reflected shock wave 21 p3790 A66-39075
 Electron-ion recombination process due to electron collision in plasma with capture electrons transferred to ground level 22 p3954 A66-39767
 HF conductivity of quasi-equilibrium isotropic fully ionized two-temperature plasma 23 p4102 A66-41367

PLASMA THEORY
 Bogolubov adiabatic hypothesis in quasi-linear theory of plasma 01 p0115 A66-11088
 Russian monograph on turbulent plasma theory covering turbulence formation, hysteresis, plasma oscillations, self-consistent wave interactions, etc 03 p0406 A66-13283
 Nonrelativistic motion of charged test particle in plasma 05 p0725 A66-15238
 Derivation of plasma transport equation 05 p0726 A66-15244
 Collisionless plasma theory, discussing characteristics and mechanisms of magnetosphere 05 p0674 A66-15250
 Polarization of plasma moving in magnetic field of toroidal solenoid 06 p0919 A66-16890
 Capacitor spark discharge theory, assuming channel resistance depends only on channel expansion during quasi-stationary plasma conductivity 08 p1264 A66-19184
 Book on problems in plasma theory 10 p1572 A66-22034
 Energy transfer equations for fully ionized/deuterium/ plasma including dominant and nondominant terms 13 p2143 A66-25713
 Two-time probability distribution function, autocorrelation function, Liouville equation and fluctuation theory of plasma kinetics 13 p2156 A66-26685
 Finite Larmor radius equations for plasma, noting pressure tensor modification and approximate moment 15 p2555 A66-29757
 Dielectric constant obtained by bound electron theory is not distinguished from

one obtained by warm plasma theory when considering main resonance and related phenomena 16 p2758 A66-30277
 Operation of Q-switching device based on Faraday effect and used with ruby laser for application to plasma diagnostics 19 p3375 A66-36079
 Bomb debris motion following Star Fish test, noting formation of MHD shock wave, production of stationary plasma through X-ray ionization and collision in neutral air 20 p3644 A66-38345

PLASMA TURBULENCE
 Weak turbulence in media with decay spectrum, analyzing second component of collision term with isotropic model 02 p0264 A66-11385
 Nonlinear equation for distribution function of particles in plasma in electromagnetic field 02 p0267 A66-11729
 Attenuation of uniform turbulent motion in incompressible fluid located in magnetic field 02 p0270 A66-12179
 Wave propagation in random plasma stressing energy transfer between wave modes 03 p0404 A66-12982
 Russian monograph on turbulent plasma theory covering turbulence formation, hysteresis, plasma oscillations, self-consistent wave interactions, etc 03 p0406 A66-13283
 Quasi-linear theory of unstable oscillation decay in low-pressure collisionless plasma in large magnetic field 05 p0726 A66-15255
 Perturbation theory used to distinguish between weak and strong thermal turbulence in plasmas 05 p0726 A66-15256
 Turbulence in hydrodynamics and plasma physics 05 p0727 A66-15260
 Fluctuations and particle scattering in turbulent plasma 07 p1087 A66-17871
 Transformation of longitudinal waves into transverse waves in weakly turbulent plasma 08 p1262 A66-18979
 Quasi-linear theory of weakly turbulent plasma taking into account correlation of electric and magnetic microfields 09 p1407 A66-19966
 Combination scattering of UHF electromagnetic waves in turbulent plasma in external electromagnetic field 09 p1347 A66-20767
 Variations of turbulent plasma electric conductivity with input oscillation intensity and with square of RF input voltage 09 p1409 A66-20853
 Electric field intensity and plasma perturbation near charged infinite cylindrical body 09 p1465 A66-21018
 Electromagnetic scattering model of turbulent plasma wake behind reentry vehicle 10 p1502 A66-21634
 Approximate equality of drift and random currents at boundary between Faraday dark space and head of striated positive column in discharges through neon 12 p1920 A66-23961
 Microwave scattering enhancement in turbulent magnetoplasma 12 p1824 A66-24810
 Ray-optic theory to determine microwave transmission through collisionless turbulent plasma in Fraunhofer and Fresnel regions 13 p2147 A66-25753
 Random phase approximation of electron conductivity of turbulent plasma and effects of random static inhomogeneities 13 p2149 A66-26245
 Combination scattering of UHF electromagnetic waves in turbulent plasma in external electromagnetic field 14 p2236 A66-27302
 Plasma turbulence in terms of nonlinear wave interactions, discussing heating, diffusion in magnetic field and drift instability 16 p2767 A66-31741
 Transverse wave propagation through bounded plasma in which strong plasma waves or ion acoustic waves are excited 17 p2965 A66-32323
 Weak turbulence model incorporating three types of interacting waves having dispersion laws to permit transition to diffusional approximation in K-space 19 p3340 A66-35735
 Turbulence of inhomogeneous plasma in strong magnetic field, deriving turbulence equations from two-component MHD by diagram technique 19 p3408 A66-36274
 Turbulent plasma and UHF radiation

interaction, determining conductivity and density 19 p3417 A66-36526
 Relation of kinetic theory to unstable plasmas / weak turbulence/, noting expansion parameters and extension to include discrete particle effects 19 p3418 A66-36536
 Plasma turbulent heating by direct current discharge in magnetic mirror trap, analyzing adiabatic compression 19 p3430 A66-36589
 Cosmic ray isotropy mechanism, examining plasma beam instability and cosmic ray scattering at plasma turbulent pulsations 20 p3629 A66-37032
 Energy loss of charged particles during passage through weakly turbulent plasma in magnetic field with HF oscillations 22 p3952 A66-39751
 Ion oscillations in high temperature electron-ion plasma with HF fluctuations 23 p4102 A66-41485
 Quasi-linear approximation for turbulent plasma obtained via Wiener-Hermite functional expansion for electric field and distribution function 23 p4104 A66-41504
 Turbulence in conducting medium treated by fluid mechanical approach and kinetic theory, noting energy transfers between eddies 23 p4108 A66-42033
 Four-plasmon hydrodynamic equations describing weak turbulence spectrum in universal equilibrium region of plasma without magnetic field 24 p4243 A66-42532
PLASMA WAVE
 Jupiter radio emission, with plasma waves in planet ionosphere as source of radiation 01 p0131 A66-10273
 Nonlinear effect of modulation by propagating wave in arc discharge 01 p0110 A66-10349
 Microwave polarization changes during passage through low pressure plasma 01 p0110 A66-10371
 Dispersion characteristics of perpendicularly-propagating cyclotron harmonic wave modes in plasma 01 p0025 A66-10518
 Slow wave propagation along plasma column imbedded in dielectric medium 01 p0026 A66-10542
 Attenuation of surface waves in plasma columns in weak axial magnetic field 01 p0026 A66-10543
 Whistler mode propagation in plasma in decreasing static magnetic field 01 p0026 A66-10544
 Field controlled plasmas in doped semiconductors and modulation of millimeter and submillimeter waves, noting method based on Franz-Keldysh shift in intrinsic absorption edge 01 p0121 A66-10562
 Nonlinear interaction between transverse gyro wave and longitudinal temperature dependent wave propagating in magnetized plasma 01 p0028 A66-10563
 Cyclotron waves, space charge waves and LF plasma waves and interactions in plasma waveguide, using neon or argon 01 p0029 A66-10574
 Node in radial velocity as boundary condition for ion waves in low pressure plasma and dispersion relations for space charge sheath 01 p0113 A66-10622
 Acceleration and dynamics of argon plasma in inductive hydrodynamic shock tube 01 p0113 A66-10638
 Radio noise measurements at high altitudes using rocket probe, suggesting electromagnetic radiation from plasma waves as source mechanism 02 p0288 A66-11506
 Plasma wave generation by transverse wave beam, noting wave interaction effects and instability 02 p0268 A66-11768
 LF monochromatic plasma wave attenuation from plasma-particle interaction 02 p0268 A66-11769
 Damping of longitudinal plasma waves emitted by artificial Earth satellite moving in ionosphere 02 p0269 A66-12132
 Fabry-Perot resonators compared with cavity resonators and microwave interferometers for plasma diagnostics, noting electron density application 03 p0398 A66-12525
 Macroscopic theory for fully ionized plasma waves 03 p0399 A66-12785
 Microinstability of mirror-confined plasma with non-Maxwellian particle distribution and propagating unstable

waves 03 p0401 A66-12952
 Third harmonic current in plasma due to velocity-dependent collision frequency of electron 03 p0401 A66-12954
 Collisionless electron plasma in uniform field possessing unperturbed distribution function for electrons not considered isotropic in plane of velocity space 03 p0401 A66-12963
 Velocity and attenuation of Alfvén waves in hydrogenous plasma at LF and HF by experiment 03 p0406 A66-13177
 Waveguide surface waves launched onto glass-clad plasma column to test validity of quasi-static analysis when small column condition is not satisfied 04 p0551 A66-13737
 Small amplitude LF waves in ionosphere covering momentum and energy dissipation, zero temperature plasma and waves in nonuniform plane-stratified medium 04 p0516 A66-13961
 Helical wave excitation in weakly ionized cylindrical plasma discussing experimental techniques, apparatus and results 04 p0552 A66-13986
 Continuous absorption coefficients for x-factors of neutral argon, krypton and xenon by spectroscopic measurements using shock tube with membrane 04 p0553 A66-14280
 Nonsteady cylindrical waves propagating in cold rarefied plasma situated in strong magnetic field 04 p0557 A66-14430
 Plane plasma wave expansion in anisotropic and inhomogeneous medium composed of multiple plasma component 05 p0719 A66-14502
 Small amplitude wave propagation in hot ionized gases, noting magnetic field presence 05 p0721 A66-14716
 Quasi-linear theory of unstable oscillation decay in low-pressure collisionless plasma in large magnetic field 05 p0726 A66-15255
 Dissipative mechanisms in laminar shocks in collisionless plasmas, using analogy between shocks and hydraulic jumps in water 05 p0727 A66-15258
 Current-convective and flute instabilities of spatially inhomogeneous current in plasma, noting effect of current density and temperature 06 p0914 A66-16140
 Cyclotron harmonic amplification of wave propagation in electron beams and plasmas with internal motions in presence of static magnetic field 06 p0920 A66-17013
 Magnetoacoustic wave in rarefied plasma, examining nonstationarity of motion, wave front behavior, wave energy absorption and magnetic field profile 06 p0921 A66-17056
 Transducers for exciting and detecting acoustic waves in discharge tube plasmas, discussing requirements, specifications and construction techniques 07 p1032 A66-17496
 Wave reflection and refraction across density discontinuity in two-fluid fully ionized plasma studied by coupled linearized hydrodynamic equations and Maxwell equations 07 p1088 A66-17948
 Helicon and Alfvén wave propagation in solid state plasma 07 p1101 A66-18198
 Microwave emission from InSb in magnetic fields, explaining experimental results via modified traveling wave helicon model 07 p1104 A66-18219
 LF electromagnetic wave excitation in electron-ion and electron-hole plasmas situated in external electrical field 08 p1262 A66-18975
 Surface oscillations in bounded cold plasma with charged particle fluxes along stationary magnetic field 08 p1262 A66-18982
 Surface wave propagation in magnetoactive plasma along plasma-vacuum boundary, plasma layer and plasma cylinder 08 p1263 A66-19173
 Structure of plane shock wave of arbitrary force propagating across magnetic field in hot rarefied plasma 08 p1265 A66-19467
 Wave propagation equations in inhomogeneous warm plasma, emphasizing separation into quasi-electromagnetic and dynamic components 08 p1266 A66-19736
 Resonant ohmic damping of linearized magnetoacoustic waves in incompressible infinite homogenous resistive plasma in static equilibrium 09 p1408 A66-20423
 Equatorial sporadic E layer instability explained by ion inertia and plasma inhomogeneities 10 p1527 A66-21129

Vlasov equation of particle orbits in plain magnetic fields, with application to shock wave at geomagnetopause 10 p1606 A66-21242
 Surface and interface waves in plasma gaps, discussing backward wave 10 p1564 A66-21584
 Influence of boundaries on wave propagation in compressible warm plasma 10 p1566 A66-21730
 Perpendicular shock wave structure in plasma, using Boltzmann ionized gas equations 10 p1566 A66-21812
 Stagnation layer of rigid plate resulting from cool energetic plasma stream interaction 10 p1567 A66-21820
 Nonpotential Alfvén drift waves and magnetic noise in magnetosonic stationary hydrogen plasma 10 p1569 A66-21964
 LF electromagnetic wave propagation peculiarities of semiconductor and negative differential conductivity effects 10 p1582 A66-21967
 Electromagnetic wave propagation in plasma located in magnetic field of linear direct current 10 p1506 A66-22003
 LF waves induced by superimposed electric and magnetic fields in semiconductor plasma 12 p1927 A66-23781
 Dipolar resonances when axially uniform warm plasma column is subjected to transverse RF electric field 12 p1815 A66-23962
 Intense HF electromagnetic wave propagation in isothermal isotropic nonhomogeneous plasma, noting interaction with electrons of Langmuir frequency 12 p1921 A66-24212
 Boltzmann transfer equation for electrons and generation of nonlinear second harmonic of current density in inhomogeneous plasma 12 p1924 A66-24806
 Scattering of incident beam of microwaves by self-excited plasma waves in mercury arc column, deriving dispersion curve for plasma waves, identifying propagating electroacoustic waves as responsible for scattering 12 p1825 A66-24964
 Nonlinear kinetic equation for waves and particles in nonisotropic plasma where anisotropy is due to magnetic field, noting probability of wave absorption-emission by particles 13 p2140 A66-25409
 High refractive index at electron cyclotron harmonics from nonrelativistic plasma immersed in external magnetic field 13 p2145 A66-25728
 Amplification and attenuation of plasma wave by quasi-neutral charged particle flux on boundary between two plasmas 13 p2148 A66-26035
 Wave propagation along magnetic field in collisionless plasma taking charge separation effect into account 13 p2148 A66-26036
 Surface wave propagation in circular waveguide containing axial plasma column 13 p2026 A66-26102
 Propagation of circularly polarized electromagnetic waves in circular semiconductor cylinder surrounded by metal tube and immersed in DC magnetic field 13 p2169 A66-26238
 Amplification of helicon waves in single-component solid state plasma 13 p2169 A66-26277
 Microwave helicon interferometer bridge technique for studying helicon wave propagation and related transmission phenomena in semiconductor plasma 13 p2083 A66-26555
 Generalized Penrose condition for wave modes in plasma 13 p2156 A66-26687
 Electro-magnetoplasma-gas-dynamics /EMPGD/ equations for warm compressible electron gas drifting at constant velocity, finding equation for refractive index of plasma waves 14 p2339 A66-26862
 Behavior of asymmetric waves in free channel in plasma waveguide models 14 p2341 A66-27152
 TE surface wave determined by propagation and external magnetic field directions used in microwave circuits 14 p2363 A66-27518
 Propagation and amplification of helical waves in germanium bar solid state plasma in magnetic field parallel to bar current at room temperature 14 p2363 A66-27519
 Book on electromagnetic wave propagation,

noting wire antenna radiation, radio astronomical antennas and plasma EM wave 14 p2239 A66-27719

Radiation from vertical dipole in warm plasma determined by asymptotic series expansion of integral solutions, noting surface wave propagation, transformation from acoustic to electromagnetic mode on boundary, etc 14 p2240 A66-27917

Damping of longitudinal plasma waves emitted by artificial Earth satellite moving in ionosphere 14 p2345 A66-28089

Nonlinear conduction tensor of magnetoactive plasma, measuring effectiveness of generation of longitudinal and transverse fields during resonance merging of waves 14 p2348 A66-28469

Electromagnetic and plasma wave propagation in inhomogeneous compressible isotropic collisionless electron plasma bounded by closed surface in free space 15 p2449 A66-28592

Radio wave emission due to shock wave propagation in magnetospheric boundary and electromagnetic scattering in plasma wave field 15 p2575 A66-29083

Excitation of ion-acoustic waves in potassium-cesium plasma, when passing current through it, finding natural frequencies of system when plasma is drifting along axis 15 p2550 A66-29214

LF wave in cylindrical plasma in magnetic field where ion beam is flowing and modes are nonaxisymmetric 15 p2553 A66-29629

Acoustic wave generation and amplification in weakly ionized plasma, explaining sound emission in glow discharge and modulation in plasma afterglow 15 p2556 A66-29808

Propagation behavior of circular waveguide enclosing column of isotropic plasma, considering effect of glass walls for microwave device application 15 p2467 A66-29859

Current-convective and flute instabilities of spatially inhomogeneous current in plasma, noting effect of current density and temperature 15 p2556 A66-29870

Mathematical model for analysis of wave propagation in linearized vertically nonuniform partially ionized gas, proceeding from Maxwell and Boltzmann equations 16 p2761 A66-31005

Diffraction by wide slit in uniaxially anisotropic plasma solved by multiple scattering technique 16 p2761 A66-31006

Scattering of electromagnetic waves in plasma, noting effect of eddy current fluctuations 16 p2654 A66-31179

Detection of centimeter waves in glow discharge plasma feasible as result of processes generated in cathode irradiated by UHF field 16 p2765 A66-31560

Excitation of electroacoustic lateral waves in compressible plasma in contact with conducting boundaries 17 p2962 A66-31817

Stationary nonlinear waves propagating across magnetic field in cold rarefied three-component plasma consisting of electrons and light and heavy ions 17 p2964 A66-31889

Interstellar plasma wave damping by relativistic suprathermal particles, noting magnetosonic and Alfvén waves 17 p2996 A66-31915

Transverse wave propagation through bounded plasma in which strong plasma waves or ion acoustic waves are excited 17 p2965 A66-32323

Induced Raman scattering of longitudinal waves in homogeneous unbounded plasma in homogeneous magnetic field 17 p2965 A66-32324

Harmonic generation in microwave emission from InSb, attributing resonance type radiation to stimulated cyclotron radiation and plasma wave excitation 17 p2978 A66-32410

Plasma wave quasi-linear theory, noting nonlinear effect treatment via distribution function, electric field, Fourier component decay, etc 17 p2966 A66-32422

Kinetic theory of electromagnetic propagation in confined magnetoactive plasma 17 p2968 A66-32539

Frequency range in which Vavilov-Cerenkov surface wave exists in plasma-vacuum boundary 17 p2968 A66-32540

Standing ion acoustic waves in mercury vapor discharges 17 p2973 A66-32983

Electromagnetic wave propagation in cylindrically stratified plasma, noting ODE describing transverse propagation of axial component 17 p2876 A66-33279

Coupled electromagnetic and electroacoustic wave propagation in inhomogeneous compressible plasma 18 p3069 A66-34089

High magnetic field limit of shock wave in steady state model plasma moving along x axis studied transverse to magnetic field 18 p3148 A66-34905

Linearized equations describing transverse waves in relativistic plasma embedded in magnetic field and in presence of nonrelativistic plasma 18 p3148 A66-34907

Plasma waves at singular turning points 18 p3150 A66-34939

Shock wavefront structure in plasma, noting use of SHF diagnostics, electron concentration growth, etc 18 p3104 A66-35063

Small-amplitude wave propagation in incompletely ionized plasma, based on continuum theory 19 p3406 A66-35465

Plateau formation mechanism for electron velocity distribution function during damping of monochromatic plasma waves 19 p3406 A66-35737

Electromagnetic wave propagation in plasma located in magnetic field of linear direct current 19 p3303 A66-36087

Growth of unstable collisionless plasma waves to turbulent state, decay of turbulent state and concomitant anomalous diffusion 19 p3415 A66-36519

Verification of Landau theory that longitudinal electron waves in plasma of finite temperature are damped even in absence of collisions 19 p3416 A66-36522

Inhomogeneous plasma instability for cylindrical rotational geometry examined, using Vlasov equations 19 p3418 A66-36534

Electrostatic-wave propagation in collisionless plasma, noting Landau damping 19 p3432 A66-36760

Electrostatic wave dispersion characteristics in one-dimensional plasma exhibiting Landau damping 19 p3432 A66-36761

Behavior of transverse wave numbers /separation constant/ for electromagnetic wave propagation in anisotropic homogeneous cold plasma of arbitrary cross section 20 p3608 A66-37454

Blast waves in inviscid gaseous medium devoid of heat conduction and viscosity but with finite conductivity 20 p3609 A66-37536

Wave energy and impulse dependence on interacting waves magnitude in finite plasma 20 p3609 A66-37569

Generation of ion plasma waves in weakly ionized gases with measurement of phase velocity and damping 20 p3609 A66-37597

Recognition and subsequent amplification of difference frequency in plasma-beam system with two electromagnetic waves propagating in opposite direction 20 p3519 A66-38006

Anomalous wave transformation in plasma, analyzing existence of reflected and forward waves 20 p3611 A66-38106

Kadomtsev current-convective instability and damping as affected by current density, wave frequency, resistivity gradient and azimuthal wave number 21 p3791 A66-39178

Nonpotential Alfvén drift waves and magnetic noise in magnetosonic stationary hydrogen plasma 21 p3794 A66-39543

LF electromagnetic wave propagation peculiarities of semiconductor and negative differential conductivity effects 21 p3804 A66-39546

Plasma waveguide parameter changes due to additional gas ionization from microwave field 22 p3952 A66-39651

Three-dimensional electric field wave equation for homogeneous gyrotropic compressible drifting plasma derived for case having magnetostatic field and drift velocities in arbitrary directions 22 p3865 A66-40099

Landau damping of longitudinal electron plasma waves in finite-diameter uniform-density cylindrical plasma, assuming Maxwellian velocity distribution 22 p3955 A66-40104

Backscattering characteristics of overdense essentially collisionless spherical plasma

explained by surface wave interference 22 p3955 A66-40108

Magnetospheric and ionospheric plasma wave model based on theory for MHD waves in slightly ionized gas 22 p3912 A66-40426

Intense HF electromagnetic wave propagation in isothermal isotropic nonhomogeneous plasma, noting interaction with electrons of Langmuir frequency 22 p3956 A66-40576

Fresnel formulas for transformation of transverse electromagnetic wave into longitudinal plasma wave at dielectric-plasma interface, using Laplace transforms 22 p3869 A66-40929

Kinetics of nonuniform generation of longitudinal plasma waves by transverse wave beam with narrow spectrum, noting effect of magnetic field 22 p3958 A66-40931

Ion-acoustic wave propagation and damping in plasma with negative ions 23 p4104 A66-41505

Electrostatic plasma wave propagation in hot inhomogeneous media, obtaining WKB solution for Vlasov equation 23 p4104 A66-41506

Spiral patterns of disk-like galaxies explained in terms of density waves that are collective modes of stellar system analogous to plasma waves 24 p4273 A66-42266

Exact solution for eigenfrequencies of cylindrical microwave cavity partially filled with magnetized plasma 24 p4240 A66-42303

Linearly polarized incident electromagnetic waves propagated along static magnetic field through plasma in region of electron cyclotron frequency, noting wave modes behavior 24 p4242 A66-42400

Behavior of asymmetric waves in free channel in plasma waveguide models 24 p4244 A66-42972

Fourier analysis of Riemann-Hilbert problem of diffraction of normally incident plane electromagnetic wave by plane metallic grid above dielectric sheet and semiinfinite plasma 24 p4175 A66-42978

Allowed bands for wave generation by nonlinear effects in plasma with varying electron density 24 p4245 A66-43005

PLASMAGUIDE

Coupling between coaxial line and plasma waveguide for three configurations, step, abrupt and tapered transitions 01 p0038 A66-10521

Potentialities of cylindrical plasma structures considering electron beam interaction and microwave devices, noting dispersion of waveguide containing plasma 01 p0039 A66-10526

Parallel plate or circular waveguide geometry for analyzing plasma propagation in presence of magnetic field 01 p0039 A66-10534

Properties of partially filled plasma waveguide in external longitudinal magnetic field 01 p0039 A66-10535

Cyclotron waves, space charge waves and LF plasma waves and interactions in plasma waveguide, using neon or argon 01 p0029 A66-10574

Phase shifters for UHF waves using plasmas 01 p0042 A66-10593

Propagation constant of electromagnetic waves in laminated waveguide containing inhomogeneous isotropic plasma 02 p0265 A66-11410

Fast wave quasi-TE-11 mode behavior of two circular guides of different size containing same discharge plasma 02 p0197 A66-11450

Electromagnetic wave propagation in plasma filled disk-loaded waveguide, obtaining plasma densities 03 p0332 A66-12426

Finite and infinite H-plane bifurcation in parallel-plate waveguide filled with homogeneous anisotropic incompressible plasma 06 p0848 A66-16272

Interaction between circular waves and density fluctuation in cold electron plasma filling waveguide leads to formation of overtones of HF and LF 06 p0918 A66-16869

Variational method for dispersion curve of electromagnetic slow wave propagation in nonuniform plasma 06 p0836 A66-16983

Planar gap in plasma medium as idealized model for studying electromagnetic and

asma waves in plasma sheaths and
ospheric layers 06 p0920 A66-17015
ropagation mode in waveguide filled with
rtially ionized magnetoplasma, obtaining
ersion relations for hydromagnetic and
oustic waves by three-fluid
ethod 07 p1091 A66-18408
Discrete spectrum of electromagnetic
ves caused by excitation of dielectric
ver on ideally conducting plane in
omogeneous absorbing
asma 09 p1344 A66-20354
Surface and interface waves in plasma
ps, discussing backward
ave 10 p1564 A66-21584
Dispersion in longitudinally magnetized
asma guide, studied by resonance change
th magnetic field and plasma
ensity 10 p1537 A66-21908
Electromagnetic waves in isotropic laminar
asma waveguide 12 p1919 A66-23779
Electric and magnetic field components for
asma waveguide in axially directed DC
magnetic field 12 p1925 A66-24858
Quasi-linear approximation method and
isson equation used in determining static
elds and electron redistribution in plasma
waveguides 13 p2039 A66-25678
Two-fluid approach for solutions to
ydromagnetic waves including pressure,
cosity, heat conduction, etc, using partial
ifferential equations 13 p2146 A66-25741
Electromagnetic fields guided by plasma
ralls in waveguide, determining reflection
efficients and surface
mpedance 13 p2148 A66-26037
Slot admittance for two-layer compressible
asma sheath-ion sheath in plasma half-
pace 14 p2235 A66-27128
Problems in theory and design of plasma
waveguides 14 p2343 A66-27511
H-plane bifurcation of parallel plate
waveguide filled with anisotropic
asma 15 p2457 A66-28597
Electric field in hot plasma waveguide with
infinite magnetostatic field due to
armonically varying slot and double-grid
xcitation 15 p2549 A66-28712
Electromagnetic wave propagation in
ircular waveguide with axially-placed
ischarge tube 15 p2555 A66-29785
Longitudinal wave propagation in plasma
waveguide, observing lower and higher
modes 18 p3072 A66-34567
Reflection coefficients of plasma
waveguide measured by determining wave
modulation coefficients 18 p3151 A66-35069
Plasma jet deflection in magnetic field set
up by current flowing through four bars so
that directions of flow were opposite in
adjacent bars 19 p3426 A66-36569
Propagation constants of quasi-transverse
electric modes measurement in cylindrical
waveguide partially filled with anisotropic
plasma 20 p3525 A66-37116
Power flow of cyclotron modes propagating
in waveguide filled with cold collisionless
axially magnetized plasma studied by
Brillouin diagram 20 p3612 A66-38398
Microwave transmission power loss for
electromagnetic propagation through
bounded solid state plasma waveguide in
transverse magnetic field 21 p3703 A66-38755
Instability of wave of given frequency in
plasma creates waves of different frequency,
velocity and oscillations and leads to energy
transfer between waves 21 p3784 A66-39027
Electron density distribution in
electromagnetic shock tube measured, using
transverse microwave cavity and radiating
slots in oversize plasma
waveguide 21 p3739 A66-39382
Self-focusing of TM-type electromagnetic
waves in isotropic plasma and formation of
waveguide channel 22 p3952 A66-39650
Plasma waveguide parameter changes due
to additional gas ionization from microwave
field 22 p3952 A66-39651
Variation of phase constant and damping
constant of SHF wave propagating in
waveguide incorporating coaxial plasma-filled
dielectric tube 22 p3870 A66-40935
PLASMATRON
SA DUOPLASMATRON
DC plasmatron operation for plasma jet at
high velocity 03 p0400 A66-12832
Potential distribution over arc in vortex-
type plasmatron determined from voltage

data and direct measurement by
electrostatic voltmeters 04 p0557 A66-14435
Low temperature arc plasma, formed in
plasmatron by passing plasma-forming gas
through electric arc, applied to powder
metallurgy 06 p0887 A66-16695
Argon plasma temperatures measured by
spectral method in internal and external arc
plasmatrons, using copper impurity
line 06 p0918 A66-16837
Spectroscopic investigation of argon jet
temperature at outlet of plasmatron nozzle,
measuring temperature of plasma
jet 11 p1745 A66-22589
HF electrodeless plasmatron working at
atmospheric pressure, noting plasma
discharge and temperature distribution
characteristics, obtaining constricted plasma
jet 18 p3142 A66-34021
DC plasmatron operation for plasma jet at
high velocity 19 p3433 A66-36774
Plasma velocity measurements in and
outside plasmatron nozzle and free stream
from combustion chamber as function of
flow rate of stabilizing gas and combustion
chamber 20 p3609 A66-37567
PLASMOID
Magnetic moment of plasmoid impinging on
uniform longitudinal magnetic field as
function of particle
density 02 p0268 A66-11776
Charged particle interaction with magnetic
field of toroidal solenoid, taking into
account self-consistent polarization fields
and short-circuit currents 02 p0268 A66-11777
Pressure range determination where stable
plasmoids exist in electric field discharge,
with measurements made on rare
gases 03 p0405 A66-12987
Striation on photoscans of plasma jet
formed by pulse discharge in
vacuum 06 p0919 A66-16889
Topology of stationary plasma
configurations in transverse self-consistent
fields, comparing smooth and periodic
structures in terms of useful
power 07 p1085 A66-17645
Compensation magnetic probe and
plasma-scope study of plasmoid motion in
uniform axisymmetrical magnetic
field 08 p1264 A66-19182
Earth daily diurnal rotation rate variation,
assuming solar corpuscular flux composition
of plasmoids possessing quasi-force-free
magnetic fields 08 p1220 A66-19787
Radio locator for position of plasmoids
from coaxial injector 10 p1570 A66-22007
Plasmoid acceleration by coaxial
accelerator 10 p1571 A66-22009
Sufficiently pure plasmoids obtained, using
coaxial plasma gun operating in waiting
regime 10 p1571 A66-22010
Direction and magnitudes of electric
polarization vectors for plasma moving
through helical and toroidal magnetic
fields 11 p1747 A66-23304
Electric polarization field components
appearing in plasmoid moving in toroidal
magnetic field 11 p1747 A66-23305
Electric polarization of plasmoid moving in
curvilinear magnetic fields with different
signs of curvature of lines of
force 11 p1747 A66-23306
Soviet studies of plasma
blobs 13 p2150 A66-26506
Plasmoid interacting with axisymmetric
magnetic field 13 p2152 A66-26515
Plasmoid passage through spatially
inhomogeneous magnetic field, noting losses
of different components 13 p2152 A66-26518
Velocities of incident and reflected shock
wave colliding with plasmoid as affected by
initial xenon pressure in induction discharge
shock tube 13 p2153 A66-26525
Hydrogen plasmoid density, ionization and
electron temperature measured by fast-
particle probing 13 p2153 A66-26526
Plasmoid impact effects on metallic surface
studied by corpuscular plasma
diagnostics 13 p2153 A66-26527
Plasmoid propagation in field-free space,
discussing thermal expansion, velocity
distribution, charged particle density
distribution, energy distribution in absence
of thermodynamic equilibrium,
etc 13 p2154 A66-26528
Production of neutral or ionized gas
plasmoids by focusing beam of coherent

light emitted by ruby laser on target of
pure metal or metal containing
gas 14 p2339 A66-26819
Plasmoid structure produced by coaxial
plasma gun with interchangeable polarity
electrodes, noting experimental setup,
particle velocity, density, energy,
etc 18 p3151 A66-35071
Radio locator for position of plasmoids
from coaxial injector 19 p3407 A66-36091
Plasmoid acceleration by coaxial
accelerator 19 p3407 A66-36093
Sufficiently pure plasmoids obtained, using
coaxial plasma gun operating in waiting
regime 19 p3407 A66-36094
Plasmoid interaction with magnetic field
barrier, explaining acceleration and
penetration processes 19 p3408 A66-36279
Plasmoid motion in magnetic field of
toroidal solenoid, examining contribution to
closing currents and decontamination from
heavy ions 19 p3427 A66-36571
Plasmoid in shock tube with electrical
discharge, measuring pressure, velocity and
conductivity with magnetic
probe 20 p3611 A66-38119
Earth daily diurnal rotation rate variation,
assuming solar corpuscular flux composition
of plasmoids possessing quasi-force-free
magnetic fields 21 p3733 A66-38783
Total energy and radial energy distribution
of plasmoids, examining error in
measurement by probe consisting of heat
sensor and thermocouple 21 p3785 A66-39034
Fast plasmoid produced by coaxial plasma
accelerator, examining mass and energy
spectra of plasma ion
component 21 p3785 A66-39035
Energy-and mass-spectrum measurements
of ions from plasmoids from coaxial plasma
source, examining plasma acceleration
mechanism inside source 21 p3785 A66-39036
Plasmoid composition effect on electrode
geometry in coaxial plasma gun, decreasing
impurity concentration by gun design and
electrode material choice 21 p3785 A66-39037
Conical electrode plasma source consisting
of organic-glass discharge chamber with
cylindrical electrode at apex, examining
performance characteristics with pulsed gas
admission 21 p3786 A66-39040
Energy spectra of plasmoids produced in
conical organic-glass plasma source,
establishing various ions 21 p3786 A66-39041
Resonance interaction indicated by mass
spectroscopic studies of energy spectra of
plasmoid protons with spatially-periodic
magnetic field 21 p3786 A66-39044
HF energy absorption effect on plasmoid
passing through magnetic barrier with
superimposed HF field 21 p3786 A66-39045
Fast neutral hydrogen atom beams used to
probe plasma density and time- and space-
dependent plasma distribution in
longitudinal magnetic
field 21 p3786 A66-39046
Plasmoid motion and purification in helical
magnetic field and mass spectrograms of
pure dense hydrogen
plasmoids 21 p3787 A66-39048
Plasmoids reflection from metallic surface,
using fast particle beam-probing
techniques 21 p3787 A66-39050
Self-induction of ellipsoidal plasmoid,
deriving relevant
equations 21 p3787 A66-39051
Plasmoid-like RF helium plasma, noting
molecular ion formation and destruction
leading to evaluation of lower limit for
molecular collisional-radiative recombination
coefficient 22 p3957 A66-40908
Plasmoid density, electron temperature and
radius variation during propagation through
magnetic field, using electric and magnetic
probes 22 p3958 A66-40932
Plasma in flat-electrode accelerator,
examining optimum accelerator length
associated with equilibrium between
acceleration processes in plasma and
diffusive scattering of
plasmoid 22 p3958 A66-40937
PLASMON
Plasmon dispersion relation and damping
constant derived from Green function
formulation of random approximation for
inverse dielectric function of electron
gas 07 p1090 A66-18211
Four-plasmon decay effects for longitudinal

waves show broadening of noise spectrum 09 p1407 A66-19964

Collective energy losses by plasmas in crystals caused by excitation of volume or surface plasmons 09 p1427 A66-20350

Cross section for inelastic scattering of electromagnetic radiation by electron density fluctuations in anisotropic solids, using laser sources, investigating Landau and collision damping of plasmons 13 p2132 A66-26153

Conduction-electron plasmons interaction with longitudinal optical phonon in Raman spectrum of gallium arsenide 17 p2975 A66-31888

Charged Bose gas, discussing ground-state energy, excitation spectra and plasmon-particle interactions, using Bohm-Pines and Bogoliubov approximations 18 p3140 A66-34729

Coupling between plasmons and polar phonons in degenerate semiconductor gallium antimonide analyzed, starting from electron-phonon Hamiltonian 19 p3447 A66-36400

Plasmon decay-type interactions in plasma with intensive transverse Langmuir waves, analyzing induced scattering 20 p3512 A66-37136

Four-plasmon hydrodynamic equations describing weak turbulence spectrum in universal equilibrium region of plasma without magnetic field 24 p4243 A66-42532

PLASTIC

SA REINFORCED PLASTIC

Society of Plastics Engineers, Conference, Montreal, March 1966 13 p2111 A66-25301

Stress transducer used as piezoresistive physical sensing element in structural design of plastics 13 p2077 A66-25302

PLASTIC AIRCRAFT CONSTRUCTION

Aerodynamically conventional low-wing monoplane design for high-performance light aircraft stressed to 8g limit loads, utilizing fiberglass reinforced plastic primary structure 04 p0588 A66-13633

Aerodynamically conventional low wing monoplane design for high performance light aircraft stressed to 8g limit loads, utilizing fiberglass reinforced plastic primary structure [AIAA PAPER 65-771] 23 p4015 A66-40980

PLASTIC COATING

Effect of plastic coatings on fatigue strength of steel and welded steel samples subjected to concentrated stress 08 p1231 A66-19171

PLASTIC DEFORMATION

SA CRYSTAL STRUCTURE DEFECT

Hot plastic deformation effect on gas content, structure and mechanical properties of industrial molybdenum, niobium and titanium 01 p0086 A66-10451

Diffusion process of plasticity in metals, noting Frenkel vacancy mechanism 01 p0158 A66-11018

Constrained stress-strain test of Ni-Cr-Mo steel carried out on plane bending plastic fatigue testing machine 02 p0243 A66-11580

Spectral responses of photoconductivity in plastically deformed germanium at liquid nitrogen temperature 02 p0274 A66-11720

Dynamic plasticity of metals at high strain rates in quasi-static impact, indirect dynamic impact and direct dynamic experiments 02 p0300 A66-11851

Plastic deformation of metals under uniform range in strain rate 02 p0245 A66-11852

Charpy test modification using ram to deform sample, obtaining data on elastic limit corresponding to high stress rates 02 p0246 A66-12005

Determination methods for various types of dislocation in germanium lattice and influence on physical properties of germanium 02 p0276 A66-12066

Hollow spherical media under uniform radial loading solved by practical iterative method over elastic-plastic strain-hardening range 03 p0435 A66-12670

Plastic deformation splitting and evolution of spectral lines and excited level structure of europium ion in alkaline-earth fluoride crystals 03 p0409 A66-12717

Fracture propagation in steels discussing macrostructure analysis, differences in intercrystalline and transcrystalline mechanism, plastic surface stresses and

strains, etc 03 p0384 A66-13163

Temperature effect of plastic deformation on aging kinetics of heat resistant austenitic steels 03 p0385 A66-13171

Plastic conditions arising near circular hole in plate during uniaxial stretching, with equations describing zones of plasticity 03 p0441 A66-13299

Large axisymmetric nonlinear elastic or plastic deformations of zero-moment circular conical shells 04 p0590 A66-14160

Detailed account of dislocation loops according to continuum theory 04 p0590 A66-14164

Wave propagation in elastic-viscoplastic semispace generated by thermal shock 04 p0511 A66-14205

Symmetric deformation of viscoelastic-plastic hollow circular cylinder under internal pressure [ASME PAPER 65-APMW-24] 04 p0592 A66-14225

Clamped circular rigid-plastic plates under blast loading distributed over surface [ASME PAPER 65-APMW-34] 04 p0593 A66-14234

Measurement of temperature at which silicon begins to undergo plastic deformation 04 p0565 A66-14272

Cyclic twinning deformation in fatigued close-packed cadmium, zinc, magnesium and titanium 04 p0537 A66-14309

Cyclic plastic strain energy and metal fatigue shows hysteresis loop develops under cyclic conditions 05 p0772 A66-14549

Strength of fiber reinforced metals; examining fracture mode 05 p0700 A66-14813

Tensile tests and strain rates at various temperatures on palladium hydrogen alloys, noting plastic deformation and strain aging 05 p0701 A66-14966

Plastic deformation of metals by high intensity ultrasonic waves, with application to industrial forming processes [SAE PAPER 650760] 05 p0773 A66-15003

Behavior of aggregate under moderate loads with plastic deformation occurring in favorably oriented crystals on single active slip systems [ASME PAPER 65-WA/APM-9] 05 p0776 A66-15431

Transmission electron microscopy to determine white etching alteration around inclusion in cyclically stressed bearing steel due to cellular grain formation [ASME PAPER 65-WA/CF-1] 05 p0703 A66-15614

Plastic deformation effect on strain energy release rate, examining axial rigidity of plate with central propagating crack under uniaxial tension [ASME PAPER 65-WA/MET-9] 05 p0780 A66-15687

Lithium transformation by plastic deformation from bcc to fcc lattice analyzed by measuring damping of free torsional oscillations of samples, noting role of internal friction 05 p0740 A66-15822

Plastic strain fatigue in air and vacuum, discussing strain-life relation for ductile materials and cold reweldment of fractures in vacuum [ASME PAPER 65-MET-5] 06 p0895 A66-16203

Slow-bend impact testing of embrittlement of zirconium by hydrogen 06 p0895 A66-16356

Fracture of metals at different loading conditions by energy analysis of plastic deformation and fracture 06 p0963 A66-16465

Elastic-plastic material, calculating stress concentration and deformation for planes weakened by circular holes 06 p0964 A66-16476

Plastic deformations for cyclically alternating loads, determining cycle number at which fracture occurs 06 p0965 A66-16484

Effect of geometry changes on carrying capacity of cylindrical shell directly after reaching plastic state 06 p0966 A66-16501

Decay of K-state in Ni-Cr, Ni-Cr-Mo and Fe-Ni-Cr-Mo alloys studied in terms of elastic conductivity during plastic deformation 06 p0896 A66-16606

Full plastic moments in struts, analyzing problem of member subjected to combined axial stress and unequal major-axis bending moments at ends 07 p1142 A66-17257

Plastic deformation in body under uniform

pressure, establishing necessary condition for existence of uniform stressed state in inhomogeneous body 07 p1142 A66-17261

Elastically nonhomogeneous sphere under uniform pressure, determining parameters of plastic deformation 07 p1142 A66-17262

Extension of Coffin formula for cyclic strength in finite regions of plastic deformation for symmetric strain cycles 07 p1143 A66-17856

Plastic deformation effect on physical and mechanical properties of hard cylindrical samples of tungsten-cobalt alloy 07 p1049 A66-17905

Analytical derivation of formula relating plastic deformation per cycle and number of cycles to failure for metals 07 p1050 A66-18062

Plastic deformation effect on accuracy of stress measurements, based on magnetoelastic method 07 p1036 A66-18384

Sample deformation measuring device for short duration heat resistance tests 07 p1148 A66-18390

Brittle fracture in ceramic materials, noting Griffith theory on crack propagation, plastic deformation occurrence, stress distribution effect, etc 07 p1054 A66-18499

Variational analysis of stability of infinitely long cylindrical panel under constant evenly distributed lateral loading 08 p1308 A66-18890

Binary, ternary and quaternary niobium alloy mechanical properties such as resistance to heat, plastic deformation, relation between hardness and rupture strength, etc 08 p1239 A66-18905

Dislocation interaction with coherent ordered zones, noting onset of plastic deformations in alloys 08 p1240 A66-19250

Inhomogeneity effect of plastic deformation distribution during torsion on locking of macroshear during alternating torsion of tubular specimens 08 p1311 A66-19313

Approximation method solution for elastoplastic distribution of stresses in infinite plane with square hole for case of compressive force plane deformation 08 p1313 A66-19444

Spherical shell bending examined, using quasi-linear stress-strain relationship 09 p1465 A66-19857

Finite bending of cylindrical plates, evaluating numerical values of stress distribution in baryte sheet 09 p1465 A66-19861

Book on compound plastic deformation of layers of different metals during mechanical processing 09 p1465 A66-19948

Formulation and iterative solution of small strain plasticity problems, using Hencky-Nadai hardening law as mathematical model for material behavior 09 p1466 A66-20263

Plastic deformation effect on critical temperature and magnetic field of superconducting junctions in titanium under uniform high compression loads 09 p1428 A66-20591

Brittle fracture characteristics and fine structure parameters in steel 09 p1391 A66-20864

Plastic deformation by slip in Mo alloy containing 35 atomic percent Re 10 p1546 A66-21239

High-temperature plastic deformation of single crystals, noting creep and dislocation 10 p1613 A66-21244

Stress and strain distributions around cracks in sheet materials having various work-hardening characteristics 10 p1614 A66-21340

Changes in fine structure of powdered copper during compression, determining dislocation density and disorientation angles, noting plastic deformation cause as packing defect occurrence 10 p1546 A66-21505

New parameter, dimensionless fraction of particle volume irreversibly dislocated by plastic deformation during compression, permits calculation of powder compression process and constants 10 p1540 A66-21507

Plastic deformation effect on heat conduction of crystal lattice of sodium and potassium chlorides single crystals 10 p1587 A66-22148

Uniform deformation of bimetal as function of uniform deformation of component metals, analyzing stress-strain

- agrams 11 p1780 A66-22599
- Permanent deformations in circular plates subjected to uniformly distributed impulses compared with predictions of bending theory of rigid-plastic plates 11 p1781 A66-22612
- Successive approximation method for plastic-plastic plane stress-strain analysis 11 p1781 A66-22690
- Effect of plastic bending on indium antimonide electrical properties, measuring crystal dislocations, Hall coefficient, etc 11 p1751 A66-22698
- Plastic deformation preceding fracture in tungsten carbide-cobalt alloys 11 p1717 A66-22994
- Vacuum effect on fatigue life of aluminum under constant stress cyclic bending deformation 11 p1717 A66-22995
- Changes in mechanical and electrical properties of thin Zn, Cd and Cu films during machining and thermal treatment 11 p1758 A66-23322
- Elastoplastic deformation of bodies exposed to random forces 11 p1784 A66-23328
- Changes in microhardness, elastic modulus and shear orientation at boundary between elastic and plastic deformation in steel under tensile stress 11 p1719 A66-23387
- Membrane creep and plastic deformation of annular flat plate bounded by concentric circles and subjected to evenly distributed pressure 12 p1958 A66-23710
- Uniqueness theorem for dynamically loaded rigid-plastic and rigid-viscoplastic idealizations of deformable bodies 12 p1962 A66-23999
- Ultrasonic stress waves effect on physical properties of metal, particularly acoustic softening and hardening, plastic deformation, photoelasticity, dislocations, etc 12 p1894 A66-24105
- Plastic band propagation near circular hole for biaxial tension of plate consisting of strain hardening material 12 p1967 A66-24114
- Ring formation and expansion in cold drawn polymeric material related to oriented deformation of supermolecular structural elements 12 p1899 A66-24348
- Plastic deformation of Charpy specimens under plane stress-strain conditions, noting low temperature brittle fracture behavior, effects of notch geometry and loading, etc 12 p1969 A66-24532
- Plastic deformation effect on strain energy release rate, examining axial rigidity of plate with central propagating crack under uniaxial tension [ASME PAPER 65-WA/MET-9] 12 p1970 A66-24539
- Plastic flow peculiarities analysis based on X-ray diffraction effects obtained by deforming single crystal molybdenum of various orientations 12 p1898 A66-25026
- Thermocouple emf, noting pressure dependence and effects of contamination, plastic deformation, electrical shunting, temperature gradients, etc 13 p2076 A66-25042
- Plastic deformation of single crystals of titanium carbide with cube orientation in compression from 900 to 1250 degrees C 13 p2106 A66-25059
- Deflections, moments and shears of circular ring plate under transverse load, comparing classical and improved theory of deformation 13 p2195 A66-25180
- High temperature plastic deformation and hardening effects on brittleness, strength and viscosity of austenitic steel and alloys 13 p2106 A66-25328
- Rational compression curves and plastic deformation mechanism of cast and drawn polycrystalline beryllium 13 p2106 A66-25356
- Cyclic residual plastic deformation method for determining metal fatigue which is independent of stress mode 13 p2195 A66-25442
- Cold forming of metals, noting thin tube flow boundary variation with permanent deformation due to torsion and tension 13 p2195 A66-25455
- Surface orientation effect on twin accommodation in hcp metal magnesium and relation to twin boundary movement 13 p2107 A66-25585
- Ausforming, process of plastically deforming austenitic steel at high temperatures, without recrystallization and prior to transformation 13 p2107 A66-25639
- Mechanism of plastic deformation in crystalline bodies, discussing static and dynamic frictional forces in relation to dislocation structure of bodies in contact 13 p2110 A66-25887
- Plastic deformation effects on preaged aluminum-copper alloy structure subjected to 40-75 percent compression 13 p2110 A66-25965
- Johnston-Gilman concept of yielding and plastic flow and strain rate effect on dynamic dislocation 13 p2197 A66-26106
- Motion equation for plastic deformation of simply supported beam under impulsive loading 13 p2198 A66-26113
- Plastic behavior of notched bars pulled in tension 13 p2199 A66-26378
- Soviet monograph on structural mechanics, describing calculation of strength, rigidity, stability and oscillations 13 p2206 A66-26494
- Breaking pressure in pipes determined, using plastic deformation theory, approximating stress-strain distribution curve of material 13 p2207 A66-26496
- Plastic deformation effect on carrier capture in silicon 14 p2358 A66-27090
- Shell resistance of metal adhesive joints, noting notch strength and plastic deformation 14 p2301 A66-27253
- Stability of plastic shell under tension 14 p2396 A66-27380
- Tensile strength and deformation resistance increase with increasing test rate 14 p2401 A66-27832
- Matrix methods for stress and deformation analysis for structures subject to plasticity and creep 14 p2402 A66-27867
- Deformation and state of stress of contiguous cylindrical rotationally symmetrical hubs and shafts of various lengths 14 p2409 A66-28459
- Transient and steady state photoconductivity in plastically bent germanium, noting logarithmic decay of photocurrent and logarithmic lux-ampere characteristics 15 p2558 A66-28608
- Plastic deformation effect on resistivity and Hall constant of silver-palladium alloys, noting decreasing rate of change for increasing strain 15 p2560 A66-28648
- Surface and internal structural formation mechanism of metallic contact from plastic deformation of SAP type alloys under compression 15 p2520 A66-28750
- Solution of plane problem of physically nonlinear bodies by method of finite differences 15 p2608 A66-28772
- Plastic strain hysteresis energy required for fatigue in ferrous and nonferrous metals 15 p2609 A66-29070
- Hydrogen effect on strength, plastic deformation and microstructure of hardened titanium alloys 15 p2522 A66-29179
- Effect of annealing and aging on structure, hardness, strength and plasticity of VT15 alloy welds 15 p2523 A66-29192
- Collapse loading of rotationally symmetric cylindrical shell 15 p2609 A66-29253
- Ballistic pendulum technique to measure permanent plastic deformation of shallow circular arches subject to explosive impulse loading 15 p2610 A66-29294
- [AIAA PAPER 65-408] Metal hardening by explosive loading under near triaxial compression determined by charged power and independent of plastic deformation 15 p2523 A66-29599
- Elastic and plastic deformation of polycrystalline metals exposed to ultrasonic load and high temperatures 15 p2523 A66-29601
- Soviet papers on plastic deformation of metals 15 p2510 A66-29776
- Plastic deformation waves effect on stress-strain state at various process rates of sheet metal drawing 15 p2510 A66-29777
- Mechanical strength of plastic buckling of sheet metals under lateral hydraulic loads 15 p2510 A66-29778
- Plastic deformation problems for metals solved by energy method 15 p2510 A66-29782
- Nonlinear deformation theory of plasticity for plane strain which approximates isotropic hardening of von Mises loading surface by isotropic hardening piecewise linear loading surface 16 p2812 A66-30260
- Underwater explosive stretch forming of clamped circular mild-steel blanks as affected by clamping ring and reflecting plate 16 p2709 A66-30268
- Plastic strain effect on fatigue strength of aircraft skin sheets with hole subjected to constant loading, noting stress concentration at hole 16 p2815 A66-30678
- Dynamic plastic bending of cantilever and variation in strength of mild steel with strain rate, considering shear force at hinge 16 p2815 A66-30808
- Soviet monographs on mechanism of plastic deformation of metals 16 p2726 A66-31526
- Lattice defect distribution effect on degradation of solid solution of interstitial impurities in cast molybdenum 16 p2727 A66-31530
- Vibrational and static plastic deformation effect on structure of 40KhNMA steel and VD 17 aluminum alloy 16 p2728 A66-31800
- Mechanical twinning, sliding and plastic deformation of alpha and beta titanium alloys at low temperatures 17 p2939 A66-31972
- Stress-strain law and finite torsion of homogeneous circular cylinder, noting deformation and force needed to keep final state of body in equilibrium 17 p3025 A66-32499
- Plastic expansion in metals due to alternating torsional and static tensile loading 17 p3029 A66-32808
- Clamped circular rigid-plastic plates under blast loading distributed over surface [ASME PAPER 65-APMW-34] 18 p3247 A66-33569
- Model-forming process in which plane flat sheet is stretched by pair of loads producing biaxial principal stresses, examining stress ratios, loads and plastic strains 18 p3247 A66-33573
- Symmetric deformation of viscoelastic-plastic hollow circular cylinder under internal pressure [ASME PAPER 65-APMW-24] 18 p3248 A66-33579
- Behavior of aggregate under moderate loads with plastic deformation occurring in favorably oriented crystals on single active slip systems [ASME PAPER 65-WA/AMP-9] 18 p3248 A66-33584
- Stress analysis and load induction of small plastic deformations in machine structural elements 18 p3252 A66-33706
- Polycrystalline nickel aluminate lightly deformed at 77, 298 and 900 degrees K exhibit fine slip band structure with mostly screw dislocations 18 p3121 A66-33747
- Deformation characteristics of 0.90 percent carbon steel wire studied for structures and strengthening mechanisms 18 p3122 A66-33754
- Solutions for large plastic deformations of cylindrical membrane shells under internal pressure 18 p3252 A66-33764
- Limit analysis of conical shells under uniform internal pressure in correcting membrane solution 18 p3259 A66-35017
- Simple model for idealized form of plastic deformation of randomly excited single-degree-of-freedom oscillator 18 p3259 A66-35027
- Time dependence of dislocation density in single crystal MgO undergoing plastic deformation at elevated temperatures 19 p3387 A66-35421
- Plastic deformation effect on heat conduction of crystal lattice of sodium and potassium chlorides single crystals 19 p3440 A66-35762
- Plastic deformation by slip in Mo alloy containing 35 atomic percent Re 19 p3381 A66-35862
- Stress field on epitaxial dislocation line in weakly alloyed titanium, calculating energy of phase boundary and contribution of latter to plastic deformation 19 p3381 A66-35929
- Hardening during deformation in stoichiometric nickel manganite alloy noting temperature effect, surface characteristics and electric resistance 19 p3381 A66-35930
- Fabrication process parameters for producing solid-rocket nozzles by shear and conventional spinning of tungsten plate 0.250-inch thick and

thicker 19 p3369 A66-36130
 Stresses in spherical planet during accretion due to finite deformation of matter and subsequent change of distance from center of sphere 19 p3348 A66-36260
 Elastic-plastic antiplane problems for bonded dissimilar media containing cracks and cavities on interface and subjected to longitudinal shear loads 19 p3475 A66-36430
 Plastic deformation in hollow metal cylinder by rapidly varying axial magnetic field, calculating time dependence assuming substance is rigid and plastic 19 p3475 A66-36602
 Stress relaxation technique applied to plastic deformation prior to yielding or fracture in molybdenum above and below ductile-brittle transition 19 p3387 A66-36724
 Formation of cleavage crack in crystalline solid, examining crack stability by study of equilibrium dislocation distribution in terms of operative stresses 19 p3475 A66-36728
 Dynamic effects on satellite motion of mechanical deformations in stabilizing system, deriving equations for rotational motion about center of inertia 19 p3472 A66-36831
 Spherical shell stability under external pressure for nonlinear elastic and plastic deformation 20 p3668 A66-37528
 High strain rate deformation of solids under liquid impact examined via photographic methods 20 p3588 A66-37802
 Inelastic shell theory based on principle of virtual work 20 p3670 A66-37817
 Plastic deformation effect on critical temperature and magnetic field of superconducting junctions in titanium under uniform high compression 20 p3622 A66-38124
 Shell theory, discussing relationship between stress function tensors and shell stress function 20 p3673 A66-38275
 Clamped circular plates of rigid plastic material under uniformly distributed blast loading, noting parameters of permanent central deflection 20 p3673 A66-38277
 Relationship between plasticity characteristics for metals in tension, determining uniform elongation 21 p3827 A66-38617
 Thermodynamics of irreversible processes methods applied to stress-strain relations of single-phase, nonelastic continuous medium 21 p3830 A66-38986
 Surface alterations in manufacturing, discussing effects of electrochemical grinding and electrical discharge grinding in comparison with abrasive grinding and face milling 21 p3744 A66-39194
 Plastic deformation effect on physical and mechanical properties of hard cylindrical samples of tungsten-cobalt alloy 21 p3752 A66-39405
 Die friction effects on plane stress and plane strain in plastic bending of steel and titanium alloy beams 21 p3745 A66-39528
 Crystal dislocation distribution effect on low temperature electrical transport properties in plastically deformed metals 21 p3753 A66-39587
 Complex load effect on shell buckling, determining compliance tensor components during stability loss 22 p3989 A66-39820
 Rheology theories of material deformation and flow including classical theories of elasticity and hydrodynamics covered by nonlinear viscoelasticity 22 p3898 A66-40019
 Residual stresses and strains for cases with/ without secondary plastic deformations during unloading under nonuniform heating 22 p3990 A66-40144
 Temperature dependence of relaxation-type ultrasound attenuation maxima in plastic deformation of molybdenum and niobium single crystals 22 p3965 A66-40322
 Progressive plastic buckling of cylindrical shells under axial compressive load, noting nonsymmetric patterns 22 p3994 A66-40432
 Plastic deformation effect on carrier capture in silicon 22 p3967 A66-40846
 Material strength determination based on elastoplastic and rigid-plastic theory of solid bodies 23 p4137 A66-41006
 Lithium transformation by plastic deformation from bcc to fcc lattice analyzed

by measuring damping of free torsional oscillations of samples, noting role of internal friction 23 p4113 A66-41387
 Changes in fine structure of powdered copper during compression, determining dislocation density and disorientation angles, noting plastic deformation cause as packing defect occurrence 23 p4081 A66-41526
 Relaxation of temperature stresses in thin walled pipe under conditions of elastoplastic deformation 23 p4140 A66-41797
 Time dependent stress distribution in elastoplastic cyclic deformation, emphasizing cycle hardened stainless steels 23 p4144 A66-41971
 Generalized strain and transition concepts for elastic-plastic deformation creep and relaxation 23 p4144 A66-41973
 Relation between transfer functions and experiment in mechanics of deformable solids, noting time factor 23 p4146 A66-41988
 Compressive strain rate testing of Al, Ti, pyrolytic graphite, lucite and micarta, noting techniques and results 24 p4227 A66-42138
 Wave propagation in thermoplastic media, discussing dynamic behavior, formation of wave fronts, velocity, etc 24 p4284 A66-42139
 Inelastic buckling of rib-cored orthotropic sandwich cylinders under external hydrostatic pressure evaluated by deformation theory of plasticity 24 p4285 A66-42147
 Plastic theory of structures for collapse under highly localized loading 24 p4286 A66-42152
 Stress wave propagation, particularly dilational waves in high polymers, rate-of-strain effects in metals and wave propagation in nonlinear time dependent solids 24 p4287 A66-42268
 Energy method applied in determining upper bounds on displacements due to static and dynamic loading 24 p4288 A66-42273
 Microscopic strain rate equation interpreting macroscopic creep, stress-strain and impact test results 24 p4288 A66-42274
 Magnetic transformation and effect of plastic strain on shear modulus of Fe-Cr-Ni alloys 24 p4227 A66-42310
 Plasticity postulates for stress-strain state variations during plastic deformation cycle 24 p4290 A66-42439
 Successive approximation analysis of large deflections of elastoplastic shell under bending deformation and load carrying capacity 24 p4290 A66-42440
 Critical loading and stability of three-layer sloped asymmetric shells beyond elastic limit for arbitrary stress-strain diagram 24 p4290 A66-42442
 Vibrational creep of Al alloy at normal temperature, noting plastic deformation magnitudes creep limit equations, etc 24 p4228 A66-42864

PLASTIC FILM

Fabrication of solar concentrator, investigating plastic film reflector shaping and rigidization, using urethane foam [AIAA PAPER 64-733] 13 p2005 A66-26632
 Test for stiffness of fabrics used to measure flexural stiffness of thin plastic films and metal-plastic laminates for spacecraft application 20 p3588 A66-37793
 Aluminum foil and plastic film compared for wrapping aerospace hardware for moisture-vapor protection 22 p3922 A66-40038

PLASTIC FLOW

Conditions for existence of weak discontinuity surfaces for general case of stress-strain state of ideal isotropic incompressible rigid plastic body 02 p0301 A66-12021
 Sheet metal testing covering one- and two-axial static and dynamic tensile methods, defect detection, elimination, effect of anisotropy, etc 03 p0439 A66-13159
 Increasing plastic buckling resistance of thin cylindrical /Mg and Al/ shell by means of elastic core /polyurethane foam/ [ASME PAPER 65-APMW-18] 04 p0592 A66-14219
 Dynamic flexural buckling of rods within axial plastic compression wave, noting strain-hardening law [ASME PAPER 65-APMW-32] 04 p0593 A66-14232
 Brittle and plastic behavior of hot-pressed polycrystalline BeO noting stress corrosion,

fractography and X-ray rocking curves 05 p0701 A66-1493
 Structural analytic basis for high rate sensitivity and superplasticity in metals using strain rate dependence of viscous flow stress 08 p1236 A66-1876
 Plastic flow of Bingham material upon moving plane with free surface 08 p1309 A66-1901
 Completely plastic torsion of cylindrical bar with simply connected cross section, examined, using ridge of Jordan domain analogy 09 p1466 A66-2013
 Low speed flow visualization technique using light-pulse illuminated plastic particles suspended in revolving bowl of brine 09 p1364 A66-2039
 Increasing plastic buckling resistance of thin cylindrical /Mg and Al/ shell by means of elastic core /polyurethane foam/ [ASME PAPER 65-APMW-18] 10 p1615 A66-2147
 Evaluation of model of strain hardening in fatigue with crack propagation occurring by plastic flow away from crack tip during tensile part of cycle 12 p1898 A66-24971
 Plastic flow peculiarities analysis based on X-ray diffraction effects obtained by deforming single crystal molybdenum of various orientations 12 p1898 A66-25026
 Conditions for existence of weak discontinuity surfaces for general case of stress-strain state of ideal isotropic incompressible rigid plastic body 14 p2399 A66-27582
 Solution of boundary value problems describing two-dimensional flow in plastic regions 16 p2815 A66-30789
 Dynamic flexural buckling of rods within axial plastic compression wave, noting strain-hardening law [ASME PAPER 65-APMW-32] 18 p3247 A66-33567
 Temperature and strain rate effects on yield and flow stresses of alpha titanium determined, using continuous and differential testing 18 p3122 A66-33748
 Linear and nonlinear nonassociated flow laws analyzed for elastoplastic work-hardenable solids 18 p3255 A66-34392
 Complex loading problems in plastic flow theory solved by analogy with elastic solutions in elastoplastic theory 19 p3473 A66-35755
 Serrated yielding by metals during tension tests at temperatures near absolute zero 19 p3380 A66-35846
 Calibration test for photorheological method of stress analysis in plastically flowing body under plastic work or creep deformation 20 p3671 A66-38101
 Prandtl-Reuss flow law for stresses rather than stress deviators of ideally elastic-plastic bodies 21 p3829 A66-38818
 Plastic equilibrium flow equations of thin walled shells 21 p3830 A66-38982
 Fatigue fracture and crack propagation in ordered alloys due to plastic flow 22 p3989 A66-39891
 Stress distribution analysis on contracted section of cylindrical tensile test pieces based on Stassi plasticity condition 23 p4142 A66-41950

Elastoplastic bending of rigid plates under transverse loading noting compressibility 03 p0441 A66-13292

Natural oscillations of elliptic plates and membranes calculated by approximate method 03 p0441 A66-13296

Plastic conditions arising near circular hole in plate during uniaxial stretching, with equations describing zones of plasticity 03 p0441 A66-13299

Bending of rigidly fastened square plate with deflections 03 p0442 A66-13300

Monograph on Levy method for deflection of loaded simply-supported infinite plate strip, introducing class of real functions 04 p0589 A66-14011

Bending of plate of arbitrary trapezoidal planform for various support conditions and combinations thereof 04 p0589 A66-14146

Linearized version for isotropic elastic plates and shells by series expansion method obtained as Euler equations 04 p0591 A66-14201

Poisson-Kirchhoff plate theory for axisymmetric motions of circular elastic plates [ASME PAPER 65-APMW-7] 04 p0591 A66-14213

Contact of two axisymmetric plates, showing ability of Reissner theory to overcome classical theory problems [ASME PAPER 65-APMW-26] 04 p0593 A66-14226

Two- and three-dimensional plates undergoing limit cycle oscillations in supersonic flow treated by Von Karman large deflection theory and quasi-steady aerodynamic theory 05 p0774 A66-15038 [AIAA PAPER 66-79]

Finite-difference equations derived and applied at or near flexural discontinuities in plates subjected to bending 05 p0774 A66-15063

Stress and strain analysis of sandwich plates, formulating and solving problem of bending for transversally isotropic layers and light core 06 p0964 A66-16477

Influence of edge displacements on vertical deflection of semiinfinite isotropic elastic plate 06 p0966 A66-16502

Free flexural fundamental vibrations of simply supported isosceles triangular, rhombic and parallelogram plates using special adaptations of point-matching method 06 p0967 A66-16950

General instability and face wrinkling of sandwich plates with ideally orthotropic cores, deriving equations and boundary conditions [AIAA PAPER 66-138] 06 p0968 A66-17088

Higher order approximations derived for bending equations of isotropic homogeneous thermoelastic plates 07 p1142 A66-17266

Pressure gradient influence on velocity profile in boundary layer of plate with semicircular transverse ribs 07 p0979 A66-17449

Asymptotic derivation for viscous decay of wake behind plane plate in fluid with power law 07 p1019 A66-17841

Karman equation for bending of flexible plate solved by Kantorovich method, taking into account geometrical nonlinear deformations 07 p1143 A66-17860

Classical theory of bending of anisotropic plates, using asymptotic integration method and expressing stressed state as sum of three stressed states 07 p1145 A66-18252

General relation between third-order approximation stress function and complex displacement function in problem of finite plane deformations of incompressible materials 08 p1304 A66-18593

Limiting equilibrium state of round infinite plate with circular arc-shaped cracks subject to plane tensile loads 08 p1305 A66-18596

Error estimates in application of linear plate theory to deflection and stress determination as function of boundary conditions, correlation between geometric plate parameters and load distribution 08 p1305 A66-18599

Symmetrical loading of infinite plate weakened by three circular holes 08 p1306 A66-18704

Convergence of Galerkin method in nonconservative stability problems of thin elastic plates and thin elastic rods 08 p1311 A66-19339

Elastic bending of isotropic plane supported by doubly periodic system of point supports under doubly periodic transverse load 08 p1311 A66-19373

Transition process whereby plate approaches limiting load state under effect of transverse load that creates torques and bending moments in plate cross sections 08 p1312 A66-19436

Simplified calculation of axisymmetric bending of annular three-layer plates with lightweight filler by use of initial parameter method 08 p1313 A66-19437

Dynamic thermal stresses in infinite plate resulting from cosine-law variations in temperature at one boundary 08 p1313 A66-19443

Stresses and elongation of U-shaped bellows subjected to axial load solved by elastic theories of plates and shells 08 p1314 A66-19549

Dynamic flexural rigidity of polymer plates, measuring elastic modulus, noting variation of Young's modulus, Poisson ratio with temperature and rate of loading 09 p1466 A66-20183

Flexure of semiinfinite nonsymmetric three-layer plate under steady transverse compression, using state equation to determine load values impairing equilibrium of plate 09 p1468 A66-20760

Griffith theory of brittle fracture and

dependence on stress and load 10 p1614 A66-21398

Poisson-Kirchhoff plate theory for axisymmetric motions of circular elastic plates [ASME PAPER 65-APMW-7] 10 p1616 A66-21485

Transformation of sandwich plate equations, and deformation of rectangular simply supported sandwich plate 10 p1618 A66-22177

Approximate analysis of onset of undamped oscillations in plate on which impinges ideal compressible fluid flow 11 p1779 A66-22234

Flexural waves propagating over plate with thin obstacles exerting both head-on and moment impedance 11 p1780 A66-22602

Free and forced vibrations, static and dynamic stability and aeroelasticity of orthotropic shells and plates in variable temperature field 11 p1781 A66-22614

Cylindrical bending theory for rectangular three-layer sandwich plate supported at opposite ends under variable load 11 p1783 A66-23019

Mass matrix to solve rectangular plate vibration problems 12 p1957 A66-23610

Quantitative information regarding validity of certain approximations applicable to sandwich plate analysis 12 p1960 A66-23972

Influence of homogeneous state of initial stress on frequency of three-dimensional vibrations of plates and rods 12 p1961 A66-23984

Creep laws in terms of generalized stress-strain rates formulated, noting secondary deformation, Tresca criterion and associated flow rule 12 p1963 A66-24037

Russian studies of elasticity and plasticity 12 p1965 A66-24056

Elastoplastic behavior of anisotropic plates elastically uniform in depth, using asymptotic integration for bending problem 12 p1966 A66-24057

Plate loaded over ring-shaped zone, determining bending moment, torque and shearing force 12 p1967 A66-24111

Inner boundary layer existence in circular plate under symmetric tensile stress obtained by asymptotic method 12 p1968 A66-24345

Elastic bending of anisotropic plates with stresses represented by Legendre polynomial series 12 p1968 A66-24346

Von Karman equations for axisymmetric nonlinear bending circular plates 12 p1969 A66-24363

Deflections, moments and shears of circular ring plate under transverse load, comparing classical and improved theory of deformation 13 p2195 A66-25180

Heat exchange between axisymmetric jet flow and plate situated normal to flow 13 p2208 A66-25313

Stability of membrane solution in nonlinear plate and shell theory 13 p2196 A66-25631

Bonded-wire, foil and semiconductor strain gauges, noting design, operation, application gauge materials, temperature effect etc 13 p2081 A66-26100

Stress concentration - Symposium, Kiev, Ukrainian SSR, May 1964 13 p2199 A66-26401

Equilibrium cracks in half-space and elastic layer with two rigid clamp supports 13 p2201 A66-26403

Limiting equilibrium of plate weakened by system of cracks along straight line at angle to tensile force 13 p2201 A66-26404

Slip bands in thin plates with rectilinear cuts under tension 13 p2201 A66-26408

Approximate solution for stress-strain concentration in plate with central circular orifice during uniaxial tension by distributed load calculated, using Timoshenko method 13 p2207 A66-26495

Potential flow past plate below free surface at high speed 13 p2067 A66-26537

Derivation of approximate two-dimensional equations for thin elastic plates without resorting to Kirchhoff-type hypothesis 14 p2408 A66-28061

Buckling characteristics of eccentrically stiffened cylindrical shells under hydrostatic pressure loading and vibration, buckling and flutter characteristics of stiffened flat plates [AIAA PAPER 65-370] 15 p2610 A66-29285

Soviet papers on elasticity theory problems concerning stress concentrations,

equilibrium and oscillation 15 p2611 A66-29423

Pure bending of orthotropic plate with parabolic hole reinforced by rigid ring 15 p2612 A66-29425

Stress concentration of isotropic plate weakened by infinite row of elliptical holes 15 p2612 A66-29426

Stress distribution of isotropic plate with infinite row of circular holes with elastic cores or elastic ring reinforcement 15 p2612 A66-29428

Approximation method for solution of bending problem of isotropic plate resting on rigid columns to cover case of anisotropic plate with reinforced elliptic hole 15 p2613 A66-29434

Plate under plane stress solved in terms of stiffness properties of finite sized model element 15 p2614 A66-29611

Bending equations of orthotropic three-layer plates with rigid filler 16 p2818 A66-31055

Asymptotic integration of three-dimensional equations of linear elasticity to analyze small deformations of plate which is initially stressed 16 p2818 A66-31106

Deflection of uniformly loaded circular plate supported at discrete points equally spaced along circumference of concentric circle 16 p2820 A66-31274

Free vibration of trapezoidal cantilever plates with swept-back leading edge 16 p2823 A66-31666

Stress distribution in anisotropic plate with form of infinite wedge loaded at vertex by concentrated force 17 p3018 A66-31834

Stability of elastic thin plate subjected to self-equilibrating stresses acting in its plane with random intensity and distribution 17 p3018 A66-31835

Vibration analysis of static plates and shells by finite element method 17 p3019 A66-31950

Complex variable method to solve problem of circular elastic plate elastically restrained at edge and subjected to arbitrary concentrated force 17 p3020 A66-32000

Stress concentration factor for infinite plate in tension containing doubly symmetrical hole with three intersecting circles forming boundary 17 p3023 A66-32081

Finite element method using stability coefficient matrices in conjunction with stiffness matrices for problem of stability of plates 17 p3024 A66-32360

Assessment of error of method of successive approximations in determination of circular plate deflections 17 p3026 A66-32598

Rotatory inertia and transverse shear effects on quasi-stationary response of elastic strip plates to uniformly moving harmonic line loads 17 p3027 A66-32663

Thermal stresses of infinite thin plate with given temperature at one edge 17 p3027 A66-32713

Compressibility of material in stability problems of elastoplastic plates and shells 17 p3029 A66-32809

Contact of two axisymmetric plates, showing ability of Reissner theory to overcome classical theory problems [ASME PAPER 65-APMW-26] 18 p3248 A66-33581

Stress calculation for infinite strip containing straight semiinfinite crack when clamped boundaries are displaced normal to crack 18 p3248 A66-33583

Surface shear traction and torsional compliance of elastic plate pressed between identical elastic spheres 18 p3249 A66-33586

Fluid loading effect on acoustic radiation from point-driven infinite orthotropic plate 18 p3251 A66-33677

Vlasov variational analysis of stress-strain state of plates and shallow shells under large deflections 18 p3252 A66-33707

Natural nonlinear oscillations of plate studied by Kichevskii extension of work-reciprocity theorem to problems in nonlinear mechanics 18 p3252 A66-33713

Vibration analysis method for plate-like wings with variable thickness whose shape may be either parallelogram, trapezoid or triangle 18 p3253 A66-33784

Elastic bending of isotropic plane supported by doubly periodic system of

point supports under doubly periodic transverse load 18 p3254 A66-34183

Panel flutter at high Mach numbers, using linear plate theory and first-order aerodynamics, noting damping, relation between traveling and standing wave theories, etc 18 p3257 A66-34592

Two-and three-dimensional plates in high supersonic flow undergoing limit cycle oscillations analyzed, using aerodynamic theory and von Karman large deflection plate theory 18 p3257 A66-34593

Approximate solution of unsteady thermal conductivity for plate with unlimited number of layers 20 p3674 A66-36906

Stress concentration factors at notches, fillets and circular holes in plates under uniaxial load obtained from equations for elastic stress distribution 20 p3667 A66-37481

Postbuckling behavior of clamped infinite flat strip under action of shearing forces analyzed based on von Karman equations 20 p3669 A66-37531

Stability of annular plate with small hole 20 p3669 A66-37669

Plate fixed on two opposite sides and simply supported on other two sides treated by method based on generalized Goursat theorem to lattice function 20 p3674 A66-38295

Rotary inertia and shear deformation as finite approach of kinetic beam and plate problems 21 p3826 A66-38585

Stability of circular transversely isotropic plates under various attachment conditions along contour based on Ambartsumian plate theory 21 p3826 A66-38611

Boundary layer equations of MHD free convection from heated horizontal plate in vertical uniform magnetic field 21 p3776 A66-38707

Bending problems of transversely isotropic circular plates based on Ambartsumian theory of anisotropic plates 21 p3830 A66-38980

Mixed bending problem of eccentric ring solved by coordinate system with origin at center of outer boundary of cut 21 p3831 A66-39290

Matrix displacement method applied to anisotropic plate and shell theory, including parallelogram and triangular configurations under bending, membrane forces and shear strains 21 p3831 A66-39352

Critical buckling load at middle plane of variable-rigidity plate 21 p3832 A66-39376

Torsional oscillations of infinite plate in elasticoviscous fluid solved by motion equation expansion of velocity profile in powers of amplitude 21 p3730 A66-39457

Stress-distribution in wedge-shaped plate with stiffener on one of edges loaded by axial force, reduced to difference equation solution for shear-stress transform along stiffened edge 21 p3832 A66-39460

Stress analysis of difference equations for bending and shear effects in elastic grids 21 p3832 A66-39536

Plane stressed state of nonlinear plate with opening reinforced by thin elastic rod in case of small deviations from Hooke law 22 p3991 A66-40152

Sum determination of principal stresses in plates by measuring thickness changes, applied to frozen plates and models deformed inside frames 22 p3994 A66-40438

Initial buckling under shear stress of long clamped plate with parallel edges reinforced by stiffener mesh, noting flexural and torsional rigidity of stiffeners 22 p3995 A66-40495

Linearized potential theory for forced vibration of continuous self-exciting plate on hinged support in supersonic flow, investigating parametric resonance frequencies relation to coupling of eigenfunctions 22 p3995 A66-40508

Elasticity theory and passing of three-dimensional problems to two-dimensional problems 23 p4136 A66-40995

Approximate solution of boundary value problems in elasticity theory as applied to thin plate theory, using homogeneous equations 23 p4136 A66-41000

Material strength determination based on elastoplastic and rigid-plastic theory of solid bodies 23 p4137 A66-41006

Bending of anisotropic elliptical plate

weakened by elliptical hole solved by infinite system of linear algebraic equations 23 p4138 A66-41447

Vibrations of transversal-isotropic circular plates solved, using refined theory of anisotropic plates 23 p4138 A66-41448

Applied mechanics - International Congress, Munich, August-September 1964 23 p4092 A66-41934

Plate or shell theory analysis reduced from three-dimensional elasticity to two-dimensional problem, using power series or iterative method 23 p4143 A66-41962

Minimum-weight design of sandwich shells subjected to fixed and moving loads, determining variable thickness of two thin face sheets 23 p4144 A66-41967

Linear viscoelastic bending analysis of anisotropic plates 23 p4145 A66-41975

Instability of rectangular solid in plane strain subjected axially to constant pressure and laterally to constant hydrostatic pressure 24 p4286 A66-42150

Mathematical demonstration that deflection of sandwich plate can be obtained from Reissner theory of plates if deflection function is known 24 p4286 A66-42159

Griffith and bond fracture with singular stresses near crack point examined via numerical analysis 24 p4288 A66-42276

Stability of ideal plate under compression loading beyond elastic limit 24 p4290 A66-42437

PLATFORM

S FLYING PLATFORM

S INERTIAL PLATFORM

S STABILIZED PLATFORM

PLATING

SA ELECTROPLATING

SA FINISH

SA FLAME SPRAYING

Properties of dispersion-hardened gold, copper and platinum alloys made by chemically and vapor plating metal onto particles of metal oxides 03 p0381 A66-12550

Film thickness measurements on printed circuit-board material plated with gold over copper, using X-ray emission and absorption and beta ray backscatter test methods 06 p0886 A66-16429

PLATINUM

Reference tables for 0 to 1880 degrees C established for platinum-rhodium thermocouples 03 p0371 A66-13251

Pressure dependency in oxidation of platinum above 800 degrees C explained by boundary layer diffusion mechanism 07 p1000 A66-17476

Electric resistivity change in Pt produced by electron bombardment 08 p1275 A66-19364

Kinetics and mechanism of enhanced oxidation of platinum in activated oxygen as function of partial pressure of oxygen atoms 09 p1339 A66-20946

JP-5 fuel-air mixture ignition by platinum catalytic igniters, using ramjet engine baffle combustors 13 p2171 A66-25594

Hydrocarbon fuel cell anodes containing boron carbide as support for platinum electrocatalyst 14 p2226 A66-27902

Overheating of platinum resistance thermometers resulting from measuring current for various temperatures and wire diameters 16 p2709 A66-31615

Periodic volt-ampere curves of anode oxidation mechanism of hydrocarbons, alcohols, ketones, aldehydes and carboxylic acid to carbon dioxide, using Raney platinum catalyst 19 p3295 A66-36291

PLATINUM ALLOY

Platinum metal as electrocatalyst for oxidation of methanol and number of saturated hydrocarbons 02 p0188 A66-11870

Geometrically ordered gas-diffusion electrodes for fuel cells consisting of platinum steel with funnel-shaped cavities 09 p1333 A66-20424

Thermocouple emf pressure dependence measured for Chromel/Alumel and platinum/platinum-10 percent rhodium and platinum/platinum-13 percent rhodium 13 p2076 A66-25073

Performance analysis of carbon-supported platinum-ruthenium alloy catalysts with respect to anodic oxidation of methanol in acid electrolyte 17 p2870 A66-31898

Plasma temperature measurement from 3000 to 4000 C using platinum thermocouple

with heating-curve time analyzer 18 p3111 A66-34031

PLATINUM COMPOUND

Optical properties of complex compounds of divalent platinum, noting absorption spectra, forbidden transitions, etc 15 p2569 A66-29730

PLENUM CHAMBER

Recent developments in vectored-thrust Pegasus turbofan engine used in V/STOL subsonic strike fighters 04 p0573 A66-13931
Gimballed jet engine development, noting application to V/STOL aircraft and design of plenum chamber burning 10 p1591 A66-21366
Hovering performance of plenum chamber type of ground effect machine over land and water, showing single nondimensional parameter controlling phenomena of overwater operation 19 p3279 A66-36487

PLOTTING

Plotting Burmeister curves and points from given position, velocity and acceleration of first 3-orders of Ball point for constant angular velocity of mobile plane 03 p0324 A66-13297
Carpet plotting technique for increased interpolation accuracy 13 p2031 A66-25363
Computer-derived contour plots of electric and magnetic fields for acoustic electromagnetic plane wave pulse incident on wedge 17 p2875 A66-32390

PLOTTING INSTRUMENT

Radiogeodetic plotting device for piloting aircraft on assigned track 03 p0389 A66-12507
Curve tracer adapter for junction field effect transistors and manufacturing operations system, discussing basic circuitry and uses 03 p0348 A66-13345
Plotting oriented graph of two-stage electronic circuit with cathode coupling 08 p1200 A66-18923
Accuracy and applicability of Hilger and Watts radial-line plotter and Morin-Secretan Radial Plotter compared for medium-and large-scale mapping 11 p1705 A66-22663

**PLOW
S SNOWPLOW**

PLUG
Metal combustion in porous plug configuration for application to solid propellants, noting aluminum porous plug fabrication [WSCI 66-7] 18 p3161 A66-34420

PLUG NOZZLE

Test program for data on plug nozzle behavior especially for solid propellant rockets, noting similarity with de Laval type nozzles 17 p2990 A66-32373
Primary and secondary flow interaction in plug nozzle, obtaining solutions by iteration and isentropic relation 17 p2839 A66-32476

PLUM BROOK REACTOR

Irradiation system for experiments with Plum Brook Reactor in nuclear rocket program, noting cryogenic system, dynamic testing, etc 17 p2956 A66-32045

PLUME

S JET PLUME

PLUTO /PLANET/

Diameter and density of Pluto determined by observation of occultations of faint stars 12 p1945 A66-23505
Motion of planet Pluto, noting first-order perturbations with respect to planetary mass and giving tables of Newcomb operator coefficients 17 p2998 A66-32046
Mass and diameter of planet Pluto determined by gravitational effects on orbits of Neptune and Uranus and photometric detection of occultations 19 p3463 A66-35945
Diameter and density of Pluto determined by observation of occultations of faint stars 20 p3646 A66-37018

PLUTONIUM

Ambiphasa sources of positronium, protonium and muonium radiation, theorizing that quasars may be ambiphasas containing admixtures of matter and antimatter 24 p4280 A66-43027

PLUTONIUM 238

Plutonium-238 radioisotope Brayton cycle power system design and vehicle integration 23 p4021 A66-41754

PME EFFECT

S PHOTOELECTROMAGNETIC /PEM/ EFFECT

PNEUMATIC CIRCUIT

Transfer function of pneumatic capacitance of fixed gas mass in rigid walled container, taking into account heat transfer during compression and expansion [ASME PAPER 65-WA/AUT-18] 05 p0624 A66-15618

Pneumatic logic elements for sequential control of machines and individual processes 07 p0991 A66-17416
Flow characteristics of pneumatic resistors determined by three-point method 16 p2636 A66-30633
Electropneumatic transducer using principle that heating moving gas increases velocity 19 p3362 A66-36811
Binary adder and other pneumatic logic elements producing any two-valued function of three two-valued input parameter by proper arrangement of input jet nozzles 20 p3496 A66-36862
Cascade free jet logical element interactions and application to multiple-parameter logical function synthesis 20 p3496 A66-36863

PNEUMATIC CONTROL

Two-axis fluid control system for artillery type missile performs best with spinning attitude system when wind and thrust misalignment disturbances are considered 01 p0140 A66-10022
Operating characteristics of torque motors and application to actuating pneumatic and hydraulic control 03 p0323 A66-12906
Proportional pneumatic actuation system reliability using variable hydraulic damping, noting role of error and error rate signal 03 p0324 A66-13219
Fluid squeeze-film damping, presenting linear analysis and approximate design equations for several damper configurations [ASME PAPER 65-WA/AUT-6] 05 p0664 A66-15706

Pneumatic control systems, discussing turbulence amplification method and system with miniaturized elements with moving parts 16 p2636 A66-31063
Pneumatic control system based upon dual membrane relay permitting all fundamental logic operations 19 p3282 A66-36808
AEI Airlong system for exploiting pneumatic techniques for sequential control and interlock protection of process plant and machinery 20 p3502 A66-37654
Pneumatic servomotor synthesis by root loci technique providing direct insight into effects of parameter changes on system response 21 p3697 A66-39216
Continuous pneumatic mixing of liquid and solid propellant ingredients into composite type propellant 22 p3968 A66-39869
Temperature loop operation and transient response performance of pneumatic temperature control consisting of sensor and valve 22 p3853 A66-40540

PNEUMATIC EQUIPMENT

Comparison of feedback arrangements using pneumatic amplifiers for static accuracy and dynamic performance improvements of control systems 03 p0323 A66-12374
Pneumatic fluid elements used in automatic control systems, noting viscous fluid properties and application to turbine rpm control 10 p1486 A66-21753
Hydraulic and pneumatic power equipment for ground support of space vehicles and support in space environment [AIAA PAPER 65-524] 12 p1804 A66-24717
Physical phenomena occurring within fluid devices, particularly pneumatic devices, considering Maxwellian distribution of velocities, ideal gas law and mean free path 18 p3098 A66-34118
Fluid circuit theory, discussing setting up of electrical analogs, transfer functions, transmission line equations, wave propagation speed, etc 18 p3099 A66-34127
Control of pneumatic tire tread design parameters to limit or delay hydrodynamic pressure buildup 18 p3052 A66-34199
Characteristics of pneumatic logical elements including membrane-type elements, noting design and construction in Eastern Europe 19 p3280 A66-35723
Amplitude frequency response of blocked pneumatic lines used in fluidic systems,

noting correlation to electric-pneumatic analogy prediction 19 p3372 A66-36684
Realization of arbitrary storage structures using newly developed pneumatic logic system as elements 19 p3310 A66-36809
Digital computers used in error calculation in calibration curves of turboengines and other pneumatic devices 20 p3555 A66-36923
Operating characteristics of pneumatic bistable element using Coanda effect, examining correlation between outlet flow and pressure and feed pressure 21 p3697 A66-38802

PNEUMATICS

Fluid power, Reference issue 23 p4018 A66-41715

POCKEL EFFECT

HF optical modulator using Pockel effect in ammonium and potassium dihydrophosphate single crystals 06 p0889 A66-15899
Spatial variation of electric field in amplifying CdS measured, using electro-optic effect to study acoustic flux from thermal noise 11 p1758 A66-23356
Laser light modulation by Pockels or Kerr effect for application to telecommunications system, examining electrical birefringence modulation 19 p3304 A66-36262
Electro-optic light modulation using Pockel and Kerr effects in crystals for communications applications, using lasers 24 p4225 A66-42811

POGO

Measurement of differential energy spectra of protons, helium nuclei and heavy nuclei by cosmic radiation telescopes mounted on POGO and Pioneer satellites 12 p1877 A66-23684

POHLHAUSEN SOLUTION

SA LAMINAR BOUNDARY LAYER

SA VELOCITY DISTRIBUTION

SA VISCOUS FLOW

Pohlhausen method application to stagnation point flow, noting failure for case of stretch wall caused by exclusion of MHD boundary layer compatibility condition 03 p0356 A66-12807
Pohlhausen method applied to shock wave/boundary layer interaction, calculating flow characteristics of laminar separation region 04 p0455 A66-14138
Modified Pohlhausen method applied to velocity profile for MHD boundary layer problems 17 p2968 A66-32490
Heat transfer problems solved, using Pohlhausen solution for phase-space trajectory, noting effect of boundary conditions and application of analog computer 17 p3034 A66-32497
Laminar boundary layer on cylinder with symmetric cross section bounded by two equal circular arcs treated by Pohlhausen method 17 p2911 A66-32836

POINCARÉ PROBLEM

Series expansion solutions of Dirichlet and Poincaré problems for systems of elliptical PDEs 09 p1397 A66-20934
Poincaré-Liapunov systems of ordinary differential equations, qualitatively investigating plane and rough systems, singular points, periodic solutions, etc 18 p3128 A66-34966
Existence and uniqueness theorems in Poincaré-Liapunov theory for multipoint control boundary value problems 23 p4085 A66-41539

POINT

S CRITICAL POINT
S FIXED POINT
S FREEZING POINT
S LATTICE POINT
S MELTING POINT
S MIRROR POINT
S SINGULARITY /MATH/
S STAGNATION POINT
S TRANSITION POINT
S YIELD POINT

POINT DEFECT

Point defect mobility and annealing in irradiated germanium and silicon by electron or gamma ray irradiation 06 p0937 A66-17140
Nature and mobility of point defects present in silicon at high temperature and interactions between them 06 p0937 A66-17142
Electron beam welding of maraging steel, noting tensile test results on efficiency,

fect formation, region of fracture nucleation, etc 19 p3371 A66-36632

POINT MATCHING METHOD

Laminar flow heat transfer in polygonal ducts, covering analog solution by Moire and point matching method

[ASME PAPER 65-HT-27] 05 p0784 A66-14746

Book on point matching technique for solving boundary value problems of elasticity theory for multiply connected regions 06 p0962 A66-16249

Free flexural fundamental vibrations of simply supported isosceles triangular, rhombic and parallelogram plates using special adaptations of point-matching method 06 p0967 A66-16950

Point-matching method, approximate technique for wave equations of uniform waveguides with very general cross sections 07 p1007 A66-17510

Laminar flow heat transfer in polygonal ducts, covering analog solution by Moire and point matching method

[ASME PAPER 65-HT-27] 16 p2828 A66-30985

Point matching method calculation of cut-off frequencies and field configurations of waveguides with general cross section 17 p2896 A66-33278

POINT SOURCE

Diffusion from elevated point source into turbulent atmosphere flow over horizontal ground 01 p0061 A66-10483

Isotropic scattering of radiation from point source in finite atmosphere bounded by totally absorbing spherical shell, deriving iterative series solution 04 p0548 A66-13828

Surface conditions constituting front of electromagnetic field analyzed by Maxwell equations from point of view of generalized functions 11 p1654 A66-22636

Unbounded isothermal atmosphere response to time harmonic point disturbances, exact solutions obtained for frequency ranges of acoustic waves, trapped oscillations and gravity 13 p2183 A66-25613

Amplitude and phase selection for maximization of directivity of scalar radiation point source 16 p2745 A66-30266

Pulsed von Ardenne sources having filament substituted by point sources of emission 19 p3406 A66-35585

POISEUILLE FLOW

Separating flow determined for boundary layer of nonsedimentating suspension of various configurations 01 p0060 A66-11092

Numerical solution of two-dimensional Navier-Stokes equations for confined wake formed by merging of two-plane Poiseuille flow streams 04 p0511 A66-13936

Velocity profiles of transitional viscous boundary layer for plane Poiseuille flow 07 p1023 A66-18120

Stability of plane Poiseuille flow between elastic boundaries 07 p1026 A66-18194

Stability of frictionally heated Couette and Poiseuille flows, specifically Couette flow in inviscid limit 08 p1204 A66-18527

Plane Poiseuille flow analyzed by method of elementary solution 09 p1365 A66-19967

Cylindrical Poiseuille flow of rarefied gas for inverse Knudsen number from zero to 10 10 p1524 A66-21806

Stability of two-dimensional Couette-Poiseuille flow 12 p1866 A66-24951

Variational principle extended to problems of nonself-adjoint differential equations, with application to slow viscous incompressible Poiseuille flow 14 p2273 A66-26935

Spreading of injected miscible additive caused by convection and diffusion in Poiseuille flow 14 p2278 A66-28147

Thermal radiation from argon plasma arc of wall-stabilized type with Poiseuille flow, comparing experimental measurements with theoretical reentry predictions [AIAA PAPER 65-546] 15 p2551 A66-29274

Critical Reynolds number for pulsating Poiseuille flow determined by studying stability under harmonically and nonharmonically varying pressure gradient [ASME PAPER 66-FE-5] 17 p2914 A66-33260

Atmospheric argon Poiseuille plasma arc instability in axial magnetic field examined, noting frequency and shapes of stability curves 18 p3149 A66-34916

Variational principle applied to boundary value problems in kinetic theory, specifically

examining Kramer problem, plane Couette flow and plane Poiseuille flow 18 p3102 A66-34919

Poiseuille flow of rarefied gas in annular tube analyzed numerically for inverse Knudsen number, using Bhatnagar-Gross-Krook model and transport integro-differential equation 18 p3102 A66-34920

Distribution of permeable solute during Poiseuille flow in capillary tubes, deriving equations, noting flow dependence on permeability but not on diffusion constant 19 p3285 A66-35711

Couette and Poiseuille flow and temperature distribution of fluids with two viscosity ranges, including viscoplastic and dilatant fluids 19 p3341 A66-36304

Modified Poiseuille equation for gas flow through capillaries, applicable to flow regimes extending from molecular to viscous flow 21 p3725 A66-38943

Critical Reynolds number for pulsating Poiseuille flow determined by studying stability under harmonically and nonharmonically varying pressure gradient [ASME PAPER 66-FE-5] 24 p4195 A66-42578

POISSON

S TOXICITY

POISONING

S BERYLLIUM POISONING

S OXYGEN TOXICITY

POISSON DISTRIBUTION

Poisson pseudokernel and pseudodifferential operators on manifold with boundary 05 p0708 A66-15093

Stationary queue length Poisson distribution in single channel service system, considering reliability of device 07 p1003 A66-17862

Inaccuracy in normalized space factor of nonuniformly excited and spaced linear antenna array expressed in terms of Poisson sum formulation 11 p1663 A66-22555

Standard redundancy techniques for determining reliability of series elements and interchangeable stand-by components in digital circuits 12 p1888 A66-24821

Probability assessment of reliability effect on sortie of patrolling aircraft 13 p1996 A66-26695

Optimum mean square linear interpolation for random sampling, discussing periodic and Poisson sampling 15 p2474 A66-29731

Replacement of Poisson by Polya distribution in calculating laser intensity threshold necessary to induce ionization breakdown in gases 22 p3929 A66-39715

Frequency meter for measuring center frequency of random pulses distributed according to Poisson law, consisting of integrating circuit with high time constant 22 p3918 A66-40404

Quantum theory of Q-spoiled laser, noting statistics of number of photons in mode bear qualitative resemblance to Poisson statistics 23 p4077 A66-41373

POISSON EQUATION

Internal electric field induced by ionized particles and current carriers on impurity diffusion in semiconductors, noting diffusion and Poisson equation 04 p0568 A66-14349

Dispersion equation for LF electronic oscillations in electron beam Maxwell collision-free plasma 05 p0722 A66-14722

Initial value problem for Boltzmann-Vlasov and Poisson equation for one-dimensional plasmas 06 p0915 A66-16161

Uniqueness theorem for Cauchy problem for heat equation, using Poisson representation 07 p1153 A66-17839

Unified theory of cold plasma nonlinear oscillations /Dolph/ fails to apply to traveling wave solutions 10 p1569 A66-21921

Goedel universe analyzed, noting generalized Poisson equation, angular velocity in perturbed metric, equations of motion in inertial frame of reference, etc 13 p2183 A66-25609

Quasi-linear approximation method and Poisson equation used in determining static fields and electron redistribution in plasma waveguides 13 p2039 A66-25678

Generalized Penrose condition for wave modes in plasma 13 p2156 A66-26687

Abrupt p-n junction irregularities in barrier layer where Poisson equation is reducible to quadrature 14 p2348 A66-26798

Internal electric field induced by ionized particles and current carriers on impurity diffusion in semiconductors, noting diffusion and Poisson equation 14 p2368 A66-28246

Convergence of discrete analogs of Dirichlet problems for Poisson equation in two dimensions, describing finite difference method for producing algorithms 16 p2731 A66-30235

Noniterative finite-difference method for solution of Poisson and Laplace equations for linear boundary conditions, discussing slow viscous flow results [ASME PAPER 66-FE-1] 17 p2914 A66-33258

Energy band structure, carrier behavior and characteristic curve of p-n junction diode at high-current level, solving transport and Poisson equations 19 p3312 A66-35346

Potential of average force experienced by charge in plasma calculated from Bogoliubov-Born-Green-Kirkwood-Yvon equations of classical statistical mechanics without linearization 19 p3406 A66-35996

Estimation of Poisson kernels of elliptic operator with variable coefficients by using maximum principle and Fatou theorem 19 p3390 A66-36248

Critical parameters in Poisson-Boltzmann equation of steady state thermal explosion theory, noting temperature gradient 20 p3680 A66-38047

Flow of strongly rarefied ionized plasma past electrically charged body solved by kinetic and Poisson equations in absence of magnetic field 21 p3795 A66-39604

Poisson representation of solutions to Cauchy problem for heat equation, showing applicability of Nicolescu method of imaginary reflection 21 p3837 A66-39612

POISSON PROCESS

Poisson representation and Cauchy problem for heat equation, with improved results over previous paper 07 p1153 A66-17843

Higher order correlation function evaluated for shot noise statistics 09 p1342 A66-19925

Optimum signal to noise ratio photon detector and relation to high background radiation 10 p1505 A66-21842

Averaging controls of discontinuous stochastic system with sequence of discontinuities forming Poisson flow of events 23 p4051 A66-41782

POISSON RATIO

SA AIRYS STRESS FUNCTION

Poisson ratio for viscoelastic materials undergoing large strains measured, using compression test [ASME PAPER 65-WA/RP-8] 05 p0706 A66-15629

Dynamic flexural rigidity of polymer plates, measuring elastic modulus, noting variation of Youngs modulus, Poisson ratio with temperature and rate of loading 09 p1466 A66-20183

Theoretical determination of elastic constants, Youngs moduli and Poisson ratios of filament-wound cylinders, using strain measurements in longitudinal uniaxial loading and internal pressure loading 19 p3472 A66-35355

Approximation of elastic constants of unidirectional fiber reinforced composite material from constituent material properties, including longitudinal modulus, transverse modulus and Poisson ratio 22 p3993 A66-40342

POLAND

Aerospace research in Poland using satellite observations for geodesy, geophysics and atmospheric dynamics 09 p1459 A66-20721

Aerospace medical advances in Polish military aviation and pilot testing procedures and equipment, particularly low pressure chamber and centrifuge 14 p2271 A66-28365

Polish space program noting international cooperation, satellite observation, radio astronomy, rocket sounding, etc 15 p2601 A66-29932

POLAR AURORA

Spatial distribution of rays of light and pencils of rays in polar aurorae 02 p0220 A66-11342

Polar aurorae as radar targets and calculation of ionospheric-tropospheric conditions for interpretation of radio observation results 02 p0189 A66-11343

Ocean current effects on geomagnetic field and aurora borealis 02 p0221 A66-11344

Aurora position and brightness determination by S-180 camera as affected by such factors as distortion and vignetting 02 p0226 A66-11345

Aurora heights determined from wide-angle photographs at Tiksi Bay in 1964 support existence of coastal effect 02 p0224 A66-12121

Aurora heights determination from wide format photographs, presenting data concerning upper and lower edges and vertical length of homogeneous arcs 08 p1213 A66-19029

Occurrence frequency of midlatitude geomagnetic transition bays and relation to spatial movement of overhead electrojet current systems 08 p1218 A66-19395

Vertical distribution of heights of lower boundary of polar auroras, examining dependence on intensity and lunar hour angle 08 p1220 A66-19782

Upper atmosphere physics including heating, circulation, ionization, composition, emissions, geomagnetic variations, polar auroras, etc 09 p1375 A66-20987

Emission spectra of nitrogen excited by electron beam of 0.1 to 20 kev and oxygen and air bombarded by 13-kev electrons 11 p1740 A66-23040

Satellite observation of radiation belt and absorption of cosmic noise in polar aurora during magnetic storms of February 1964 12 p1943 A66-24267

Pitch-angle distribution and differential energy spectrum of polar aurora protons penetrating Earth atmosphere 12 p1870 A66-24283

Ionization structure of polar auroras from spatial distribution of radar-reflecting zones, taking into account magnetic field variations 12 p1871 A66-24293

Aurora heights determined from wide-angle photographs at Tiksi Bay in 1964 support existence of coastal effect 14 p2287 A66-28080

Elementary geomagnetic polar disturbances, lip-shaped auroral ionization patterns and existence of energetic electrons on night side of magnetosphere 15 p2485 A66-28909

Polar glow aurora, discussing optical emissions generated by solar cosmic ray protons and alpha particles, energy spectrum, atmospheric and ionospheric absorption effect, etc 15 p2492 A66-30026

Polar magnetic substorms associated with westward traveling surge 16 p2693 A66-30334

Vertical distribution of heights of lower boundary of polar auroras, examining dependence on intensity and lunar hour angle 21 p3732 A66-38778

Polar auroral radar system using ionospheric propagation effects for aspect sensitive backscatter 22 p3916 A66-40811

Comparison of various geomagnetic variations associated with corpuscular precipitation at South Pole, noting day-night effect 23 p4064 A66-41688

Magnetospheric phenomena related to geomagnetic tail noting F region, polar auroras and solar Lyman alpha radiation scattering in night sky 24 p4203 A66-43029

Auroral radio reflections in analysis of polar current eddy structure, noting effect of geomagnetic and solar activity 24 p4205 A66-43157

Shoreline bending of homogeneous arcs of polar aurora passing perpendicular to shore 24 p4205 A66-43158

POLAR CAP

Probe techniques in polar ionosphere covering cylindrical Langmuir, RF and mobility probes, Gerdien condensers, error sources, techniques, etc 03 p0362 A66-12641

Satellite probe measurements of irregularities of electron density distribution above F-2 layer in polar region 03 p0363 A66-12642

Diurnal phase variation of VLF signal propagated through Arctic polar cap as affected by solar plasma and associated ionospheric activity 11 p1657 A66-23107

Solar wind particle diffusion into geomagnetic tail and then down field lines to polar cap 11 p1700 A66-23142

Poleward motion of auroral bands in

midnight sector during early phase of auroral substorm and cause of planetary scale auroral displays 16 p2693 A66-30335

Dust flux in upper atmosphere and on polar ice sheets 16 p2696 A66-30931

Sudden impulses and pc5 variations resulting from magnetospheric deformations and solar wind pressure changes 20 p3657 A66-38223

Magnetosphere tail, annual magnetospheric configurative variation and seasonal variation in polar cap magnetic intensity 20 p3657 A66-38229

Spatial distribution of sporadic E layer over Arctic ice cap, noting negative dependence between illumination of ionosphere and frequency of layer 24 p4204 A66-43152

POLAR CAP ABSORPTION

Anomalous absorption in polar cap observed April 1958 not linked with any solar or geophysical phenomena 02 p0224 A66-12135

Anomalous polar cap absorption during chromospheric flare of July 7, 1958 02 p0285 A66-12247

Precipitation of solar cosmic ray particles in polar cap regions detected, using test network for reliability of VLF phase recordings on transpolar propagation-paths 03 p0417 A66-12655

Untampered solar cosmic ray data obtained when polar cap absorption events removed toward magnetic poles from auroral zones 03 p0418 A66-12662

Behavior patterns exhibited by polar ionospheric phenomena indicated by statistical analysis of IGY data 03 p0364 A66-12664

Polar cap absorption riometer data compared for Thule, Greenland and College, Alaska for determining geomagnetic activity influence 05 p0670 A66-14951

Ionospheric research from space vehicles, comparing experimental data with theoretical models of D, E and F regions 07 p1029 A66-18089

Polar absorption and increased magnetic disturbance effect on performance of radio communication links crossing auroral zones 08 p1186 A66-19794

Solar cosmic rays and interplanetary magnetic field, showing polar cap absorption 09 p1439 A66-20218

Polar cap absorption effect on polar VLF emissions used for analysis of solar proton events 09 p1374 A66-20880

Effects of AZA and PCA on radio wave propagation in Antarctic, noting reliability and radiation power requirements 12 p1817 A66-24275

Radio wave absorption at high latitudes dependent on frequency, noting AZA and PCA are inversely proportional to powers of frequency 12 p1817 A66-24276

Onset patterns of PCA analysis using corrected geomagnetic coordinates, with results analyzed through solar cosmic radiation, Earth magnetosphere structure and D region 12 p1944 A66-24470

Anomalous polar type radio emission absorption in ionosphere on April 4, 1965 measured, using radio astronomy 14 p2377 A66-28476

Polar-based riometric observations of solar cosmic ray events during IQSY 15 p2592 A66-30034

Strong PCA events relation to phase of solar activity from 1966 to 1968 17 p2993 A66-32342

Time lag of beginning of polar cap absorption effect or cosmic ray increase after occurrence of Y-shaped phase development in solar flare 19 p3453 A66-36298

Negative ion density and composition in lower ionosphere 19 p3350 A66-36355

Ionospheric absorption relation to solar activity, considering sudden ionospheric disturbances, polar cap absorption and sudden storm commencement 19 p3453 A66-36362

Solar cosmic ray alpha particle relation to PCA and lowest latitude of enhanced ionization 20 p3635 A66-38224

Non-Stoermer cut-off variation with geomagnetic latitude of PCA during quiet Sun period 20 p3635 A66-38225

Polar cap absorption and upper atmosphere solar-terrestrial disturbances due to solar flare and type IV outburst 20 p3636 A66-38227

Polar geomagnetic and solar terrestrial disturbances related to PCA and solar flare 20 p3636 A66-38228

Precipitation of electrons and protons into atmosphere from inside magnetosphere, within auroral zone and at polar caps 20 p3640 A66-38320

Polar absorption and increased magnetic disturbance effect on performance of radio communication links crossing auroral zones 21 p3703 A66-38790

Initial phase of polar cap absorptions analyzed by use of corrected geomagnetic coordinates and compositions of solar cosmic radiation 24 p4262 A66-42461

Sudden cosmic radio noise absorption, polar cap absorption and auroral absorption 24 p4202 A66-42832

Absorption of solar energy by polar cap, noting electron concentration 24 p4204 A66-43153

POLAR COORDINATE

Resistance due to viscous shear on circular cylinder in oscillating stream calculated by boundary layer equations formulated in polar coordinates 09 p1367 A66-20262

Velocity pattern in turbulent wake behind symmetric body and conservation of temperature and enthalpy in wake in cylindrical polar coordinates when incoming flow is nonuniform 13 p1992 A66-26704

Mayor-Mises method for solution of kinematic and kinetostatic problems of three-dimensional mechanisms [ASME PAPER 66-MD-2] 21 p3741 A66-38475

Oscillatory properties of linear matrix differential system, applying generalization of polar coordinate transformation to certain systems of second order 24 p4233 A66-43100

POLAR GAS

Thermoconductivity measurements of high polar gases and equimolar mixture at various temperature ranges 06 p0968 A66-16121

Polar vapor effects on dielectric properties of barium titanate single crystals with metal admixtures 11 p1749 A66-22292

Measuring and calculating methods for dilute gas transport properties independent of fluid dynamic environment in which they operate 16 p2825 A66-30306

POLAR IONOSPHERE BEACON

S BEACON SATELLITE

POLAR METEOROLOGY

Auroral electrojet index and universal time variations, discussing polar disturbance statistics 10 p1528 A66-21144

Investigation of two cold air fronts of polar origin that occurred in Alpine region in April 1962, using data from Tiros IV 11 p1730 A66-23096

Coupling mechanism correlated between quasi-biennial oscillations in polar and tropical latitudes of stratosphere 18 p3104 A66-33926

Polar vortex breakdown and explosive warming in upper stratosphere in numerical tests based on observed height patterns, noting kinetic energy 21 p3759 A66-39206

Antarctic pack ice boundaries established from TV and IR pictures taken by Nimbus I meteorological satellite 21 p3735 A66-39491

POLAR NAVIGATION

Flight trials of Bendix/Elmott Polar Path compass, discussing accuracy, stability, performance and weakness 07 p1033 A66-17758

Stereographic mapping of plane Cartesian coordinate grid onto sphere for polar navigation use 09 p1401 A66-20914

POLAR ORBIT

Neutron albedo measurements on polar orbiting satellites 07 p1120 A66-17981

Midlatitude trough in F-region ionization of night ionosphere revealed by ion trap on polar-orbiting satellite 11 p1699 A66-23134

High resolution density data from radar observations of low altitude, polar orbiting satellites reveal longitudinal and geomagnetic variation, noting regression analysis 15 p2497 A66-30085

POLAR ORBITING GEOPHYSICAL OBSERVATORY /POGO/

S. POGO

LAR REGION

Current system of solar disturbed diurnal variations of magnetic field at high latitudes in terms of dynamo theory, taking into account forward and Hall conductivities 04 p0516 A66-13854

Migration of north and south poles by angular displacement of Earth mass, explaining geographical distribution of flora and fauna, past and present 05 p0667 A66-14730

Excitation and damping of polar motion created as series of stochastic process in determination of damping coefficients and constants 07 p1028 A66-17420

Coincidence of long-term variation of Chandler period of motion for Earth pole and solar activity cycles 07 p1028 A66-17524

Differential changes between cosmic ray intensity level inside and outside ecliptic plane by comparison of intensities recorded in polar and nonpolar regions 07 p1131 A66-18240

Polar electrojet causing magnetic substorms in high latitudes flows westward along closed oval curve and is connected with auroral activity and outer radiation belt 08 p1216 A66-19216

Transition region magnetic field and polar magnetic disturbances, comparing Explorer III data with ground measurements from Arctic observatories 08 p1218 A66-19399

Geomagnetic diurnal-variation in north polar region with corrected geomagnetic latitude 09 p1373 A66-20385

Geographic distribution of solar daily variations of magnetic field during quiet days determined by coordinate system 11 p1696 A66-22421

Fast variation of geomagnetic field in polar region 11 p1698 A66-22896

Critical ionization frequencies in F-2 layer in near-polar region observed at Northern Hemisphere high latitude stations 15 p2487 A66-29107

Quasi-stationary solar corpuscular fluxes, examining effect on atmospheric pressure in Earth polar cap regions. 15 p2576 A66-29134

Fast variation of geomagnetic field in polar region 21 p3733 A66-38964

Growth and decay of ring current and polar electrojet, using magnetic storm examples 22 p3974 A66-40563

Polar coronal temperature inferred from density gradients and based on solar wind and latitude dependence of coronal composition 22 p3983 A66-40698

POLARIMETER

Mathematical design and development of balloon-borne UV Ebert-Fastie spectrometer with Sekera-type polarimeter 02 p0233 A66-12212

Characteristics of solar radio bursts in microwave region and measurements of atmospheric absorption and solar flux at 17 mc/s 07 p1028 A66-17419

Simple polarization calibrator based upon polarization of specularly reflected light, examining theory, design and performance 19 p3354 A66-35381

Turnstile multiple-probe microwave polarimeter for anisotropic plasma diagnostics 20 p3609 A66-37630

Photoelectric skylight perimter for Stokes parameter measurements in plane polarized light 23 p4066 A66-41029

POLARIMETRY

Organic matter connected with biological activity in Orgueil meteorite, discussing optical rotation 01 p0134 A66-10249

20-inch mirror telescope with photoelectric astrophotometer for photometric, colorimetric and polarimetric measurements 05 p0683 A66-15419

Polar rays of solar corona, discussing distribution, magnetic field approximation, electron density and kinetic temperatures 07 p1133 A66-17418

Absorption and scattering effects on measurements of optical rotation in polarimeters studied to account for optical activity in Orgueil meteorite 21 p3816 A66-39490

POLARIS A3 MISSILE

IR nondestructive testing system for usability analysis in production line inspection of Polaris A-3 motors 03 p0373 A66-12996

Requirements, materials, fabrication and testing of exit nose fairing for A3 Polaris missile, noting use of laminated wood as optimum material 06 p0885 A66-16300

POLARIS MISSILE

HF requirements for measuring and analyzing Polaris missile shock and vibration data [AIAA PAPER 65-223] 03 p0431 A66-12761

Polaris nuclear powered submarine defense capability, noting mobility advantages and command communications system 08 p1322 A66-18559

Nondestructive testing system for Polaris missiles and service correlation 12 p1884 A66-23649

Stellar inertial guidance system composed of integral inertial platform-stellar sensor combination, airborne digital computer and power supply for Polaris missile 18 p3132 A66-34042

POLARISCOPE

Normal incidence reflective polariscope and auxiliary instrumentation used in viscoelastic strain measurements 01 p0070 A66-10922

Dynamic photoelasticity, polariscope and associated instrumentation for transient stress and stain in structures under shock loading 10 p1537 A66-21873

POLARIZABILITY

Vibrationally excited molecular hydrogen effect on mean polarizability 04 p0549 A66-14311

Calculation of approximate expression for van der Waals energy with aid of variationally determined polarizabilities 08 p1178 A66-18937

Ultrasonic piezoelectric investigation of asymmetric polarizability of barium titanate crystal 11 p1757 A66-23252

Minimum internal energy calculation of anisotropic oxygen polarizability and Lorentz correction in barium titanate crystal 11 p1758 A66-23408

POLARIZATION

SA CIRCULAR POLARIZATION

SA DEPOLARIZER

SA DIELECTRIC POLARIZATION

SA ELECTROLYTIC POLARIZATION

SA FERROMAGNETISM

SA MAGNETIC DOMAIN

SA OPTICAL POLARIZATION

SA PYROELECTRICITY

Polarization and exchange effects in slow electron scattering from lithium and sodium 03 p0393 A66-12325

Polarization effects in magnetic and nonmagnetic barium plus bismuth oxide and magnesium-zinc ferrites when subjected to DC low-voltage electric fields 03 p0409 A66-12690

Vibrational excitation cross sections of diatomic molecules calculated, using Born approximation by including polarization interaction between incident electron and molecule 06 p0912 A66-16630

Slow polarization processes of barium titanate in weak field 06 p0927 A66-16718

High sensitivity spinner magnetometer for remnant magnetic polarization measurement of rocks in paleomagnetic research 08 p1223 A66-19081

Target scattering matrix generalized to include dependence upon radar polarization, determining matrix through two successive transmissions at orthogonal polarizations 10 p1499 A66-21603

Polarization of helicons in n-type silicon and germanium 10 p1580 A66-21733

Direction and magnitudes of electric polarization vectors for plasma moving through helical and toroidal magnetic fields 11 p1747 A66-23304

Electric polarization field components appearing in plasmoid moving in toroidal magnetic field 11 p1747 A66-23305

Polarization of atmospheric pulses due to successive reflections at ionosphere in echo type atmospherics 12 p1873 A66-24839

Separation of radio emission of extensive air showers /EAS/ polarized in East-West direction from usual Cerenkov radiation 13 p2175 A66-26023

Values for contribution of core polarization to hyperfine structure of excited states of chromium compared theoretically and experimentally, extracting core contributions

to magnetic field 13 p2135 A66-26268

Plane electromagnetic wave diffraction at two parallel circular cylinders for TM and TE polarization 17 p2879 A66-31862

Equation explaining polarization of solid electrolyte cell with silver plate anode, noting role of current density 18 p3056 A66-34903

Degree and phase of polarization of short-lived features in solar radio emission of spectral type II 18 p3238 A66-35085

One-dimensional cascade theory of photon-electron showers for light and heavy substances, taking into account polarization of medium upon cross section for electron bremsstrahlung 18 p3213 A66-35145

Frequency and spatially variable electric and magnetic polarizations induced in nonlinear media by electromagnetic fields 19 p3399 A66-35594

Venus brightness temperature and polarization of integral radio emission at 3.75 cm wavelength 20 p3648 A66-37044

Depolarization of Crab Nebula produced by Faraday rotation in filamentary shell that surrounds nebula 20 p3648 A66-37261

Polarization interaction of plasma fluxes moving in transverse magnetic field, using plasma diagnostic techniques including superhigh-speed photography and double electrostatic and magnetic probes 21 p3787 A66-39053

Photometry, polarization, structural peculiarities and density distribution of solar corona 21 p3813 A66-39121

Linear polarization of continuum emission from galaxy and discrete sources, detection in radio astronomy, noting relevant synchrotron theories 21 p3815 A66-39488

Solar radio research utilizing two dynamic spectrographs to obtain amplitude polarization of radio bursts with high time resolution, noting frequency splitting 23 p4131 A66-41864

POLARIZATION CHARACTERISTICS

Microwave polarization changes during passage through low pressure plasma 01 p0110 A66-10371

Wave function, polarization and decay of negative ion atoms in electric field 03 p0395 A66-12833

Sampling of independent orthogonally polarized antenna output to increase signal levels at least 10 decibels over one-antenna systems 04 p0481 A66-13729

Hydromagnetic waves in nonisotropic medium in presence of gravitational field 05 p0759 A66-14877

Decameter emission from Jupiter, discussing polarization characteristics such as direction, magnitude, measurement techniques and data 05 p0762 A66-15280

Polarizer operation of rotating-polarization microwave antenna in presence of reflection from emitter 06 p0859 A66-17182

Porous gas-diffusion electrodes analyzed by using four different models, comparing resulting current density-polarization characteristics 07 p0990 A66-17239

Uniaxial strain effects in /100/ junction orientation GaAs laser diodes, discussing photon polarization 07 p1042 A66-17335

Anisotropic transverse magnetoplasma effects in cubic semiconductors, examining reflectance and elliptic polarization 07 p1102 A66-18204

Superconductivity inhibition by normal polarization, noting mechanism of second order suppressive effect 08 p1255 A66-18631

Polarization pattern dependence on phase-amplitude distribution of field at microwave antenna aperture 08 p1190 A66-18912

Smooth plasma polarization obtained by injecting plasma fluxes toward each other across magnetic field 08 p1264 A66-19179

Interband Faraday effect in semiconductors in strong crossed electric and magnetic fields 08 p1277 A66-19619

Frequency and polarization structure of Jupiter decametric emission on 10-msec scale 09 p1450 A66-20104

Interferometric examination of Jupiter decimeter radio emission, noting equipment, polarization characteristics and distribution of nonthermal emission 09 p1450 A66-20106

Relation of Jupiter decimeter radiation intensity and polarization to distribution of synchrotron radiating electrons in Van Allen

belt 09 p1450 A66-20107
 Polarization patterns of microwave antennas with sine-phase /complex/ apertures of rectangular, circular, annular or rhombic form 09 p1356 A66-20771
 Scattering matrix use to determine radar reflectivity independently from polarization, target range and rotation about line of sight 10 p1499 A66-21609
 Radar polarization scattering matrix invariance properties of elliptic and circular polarized antenna 10 p1500 A66-21619
 First order error analysis, radar antenna calibration technique and polarization scattering matrix 10 p1501 A66-21627
 High RF magnetotonic propagation effects on polarization scattering 10 p1501 A66-21628
 Radar scattering matrix measurements, predicting radar cross section of body for arbitrary polarization 10 p1502 A66-21639
 Coherency matrix expression of phenomenological Stokes four-vector describing intensity and polarization of electromagnetic wave 10 p1504 A66-21651
 Elongation of characteristic curve of polarization for interstellar particles due to surface molecular scattering 11 p1769 A66-22535
 Feed polarization incident upon conic reflector in antenna system specified in terms of crossed electric and magnetic dipoles 11 p1663 A66-22544
 Rotation rule added to construction rules for rays determining geometrical optics field, noting that polarization trihedral is not rotational about ray 11 p1735 A66-22554
 Polarization and birefringence of photoelastoplastic medium 11 p1781 A66-22613
 Tropospheric component of twilight brightness determined from observations of intensity and polarization of sky at two symmetrical points of solar vertical 12 p1867 A66-23511
 Approximation of expectation values for nonenergy properties via perturbation theory, obtaining values for molecular polarizability 12 p1917 A66-23935
 Inequality of cross-polarized components of electromagnetic wave reflected from plane surface for arbitrary angle and arbitrary reflector properties 12 p1816 A66-24149
 Antenna orientation effect on polarization components of radio waves reflected from ionosphere, noting occurrence and properties of magnetotonic component of polarization 12 p1869 A66-24273
 Phase variation dependence at receiver output on polarization of wave incident on antenna of phase measuring system 12 p1817 A66-24277
 Time variation of preferential-polarization vector of pearl-type oscillations during course of observations at Lovozero station, U.S.S.R. 12 p1871 A66-24294
 Radar cross polarization measurements for target surface property determination, noting application to lunar studies 12 p1819 A66-24603
 Field intensity and polarization characteristics of turnstile antenna with arbitrary phase and amplitude relationship between two exciting elements 12 p1838 A66-24610
 Polarization of particle counters, noting distortion of internal fields through pre-irradiation spatial polarization 12 p1883 A66-24788
 Interstellar polarization measurement for eight stars 13 p2185 A66-25811
 Noise suppression, signal reception, and polarization measurement in cross correlated antennas as function of dipoles imbedded in random field, surrounding noise field and coherency matrix of cross correlation function 13 p2044 A66-26746
 Flux density, polarization characteristics and position measurements for type IV bursts in meter and microwave range 14 p2378 A66-26933
 Polarization vector in strong electromagnetic field, using two-band semiconductor, calculated from density matrix equation, relaxation times and recombination time 14 p2360 A66-27189
 Polarization characteristics of oxidation electrochemical oxidation-reduction

processes of metallic single crystals in acid chloride solution 14 p2232 A66-27311
 Thin films as possible transmitting and reflecting polarizers in vacuum UV region 14 p2361 A66-27331
 Polarization characteristics of materials in XUV and development of transmitting and reflecting polarizers, using multilayer metal films 14 p2361 A66-27332
 Daylight observations of 1965 f comet, noting influence on solar corona, spectra at various wavelengths, polarization data and results of photoelectric scans 15 p2592 A66-28645
 Polarization characteristics of type IV solar radio bursts noting position, direction and frequency range 16 p2793 A66-30653
 Physical interpretation of type IV bursts, accounting for polarization characteristics, noting gyroresonance radiation due to lower energy electrons 16 p2794 A66-30654
 Space charge polarization in glass films, discussing parameters of shift of capacitance-voltage characteristics, diffusion coefficient in metal-glass-silicon dioxide-silicon double-layer capacitor 16 p2779 A66-31089
 Monograph on intensity distribution and polarization of scattered radiation in ozone absorption bands at selected levels of terrestrial Rayleigh atmosphere 16 p2698 A66-31226
 Night sky and zodiacal light polarization near 5000 angstroms over celestial sphere, noting dependence of zodiacal light distribution on angular distance from sun 16 p2698 A66-31259
 Direct phase technique for studying polarization phenomena associated with reflections of radio waves from meteor trails 16 p2655 A66-31543
 Flux density of nonthermal radio sources at 8000 mc noting measurement correction, correlation between curvature index spectral index and component separation 17 p2995 A66-31911
 Amplitude and phase of complex Kerr magneto-optic coefficients measured, describing technique and results 17 p2958 A66-32623
 Two-phonon Raman scattering in cubic crystals, noting use of polarization effect to determine active irreducible representations 17 p2981 A66-32818
 Horn radiators with high attenuation capabilities, noting design features, application to parabolic antennas, etc 17 p2894 A66-32989
 Interband Faraday effect in semiconductors in strong crossed electric and magnetic fields 17 p2983 A66-33133
 Plane interstellar polarization dependence on wavelength observed in 18 stars with UV and IR filter 18 p3235 A66-34657
 Polarizer operation of rotating-polarization microwave antenna in presence of reflection from emitter 19 p3314 A66-35540
 Gas laser with generalized polarization characteristics, noting role of degenerate atomic energy levels 19 p3374 A66-36005
 Linear polarization and relative intensity variations of skylight measured with aircraft-mounted telephotopolarimeter during solar eclipse 19 p3349 A66-36346
 Wave function, polarization and decay of negative ion atoms in electric field 19 p3404 A66-36775
 Tropospheric component of twilight brightness determined from observations of intensity and polarization of sky at two symmetrical points of solar vertical 20 p3549 A66-37024
 Humidity effect on ferroelectric properties of barium titanate with tantalum oxide admixture, noting growth of dielectric constant and crystal polarization 20 p3617 A66-37553
 Slot antenna research, discussing arrays and polarization characteristics 20 p3530 A66-37710
 Microwave antenna design elements, feed equipment and performance characteristics 20 p3530 A66-37716
 Magnetic intensity distribution, polarity and macrostructure of solar and interplanetary magnetic fields 20 p3635 A66-38218
 Electromagnetic scattering by obliquely

oriented cylinders, noting extinction efficiency, propagation in cylindrical waveguides and polarization reversal 20 p3603 A66-38403
 Diffuse boundary scattering as possible explanation for enhanced field effect in thin metallic films through polarization reversal of ferroelectric substrates 21 p3800 A66-38990
 Potential difference and electric polarization field measurement in plasma moving in combined toroidal and helical magnetic field of stellarator type 21 p3789 A66-39062
 Contrawound helical antenna with independent control of polarization bandwidth and gain used for receiving or low-power transmitting 21 p3714 A66-39496
 Polarization patterns of microwave antennas with sine-phase /complex/ apertures of rectangular, circular, annular or rhombic form 22 p3873 A66-39830
 Cross section of slow neutron scattering in superconductors and polarization of scattered electrons 22 p3964 A66-40308
 Observed Faraday polarization variation of satellite transmission radio signals due to ionospheric irregularities, latitudinal electron density variations and antenna geometry readout error 22 p3867 A66-40556
 Probability densities of geometric parameters of polarization ellipse of quasinomochromatic, partially polarized radio and noise signals in circular and linear-base wave representations 23 p4036 A66-41051
 Zeeman laser interferometer, using axial magnetic field to obtain simultaneous left- and right-hand circularly polarized oscillation modes at upper and lower cavity resonances 24 p4219 A66-42248
 Radar scattering equations for transmitting and receiving circularly polarized waves in terms of characteristics for linear polarization 24 p4171 A66-42374
 Polarization measurements of cosmic ray muons by detection of positrons from muon-to-positron decay 24 p4271 A66-42937
 Polarization vector in strong electromagnetic field, using two-band semiconductor, calculated from density matrix equation, relaxation times and recombination time 24 p4259 A66-43087

POLARIZATION CHART

Photoelectric measurements of twilight sky brightness and polarization and correction of measured values 01 p0138 A66-11103

POLARIZED LIGHT

SA KERR EFFECT

Polarization of light from glass laser doped with two percent positive trivalent neodymium measured with time resolution of less than microsecond 03 p0378 A66-13006
 Laser Q-switch arrangement with roof prism end reflector and electro-optical retarder 04 p0531 A66-13957
 Distance measurement by modulating linearly polarized light with respect to plane of polarization 04 p0546 A66-14393
 Communication system using pulse code modulation with polarized light, deriving bit error probability 05 p0631 A66-14594
 Book on radiative transfer on discrete spaces developed on mathematical and physical basis, covering optical media to geo-optical fields 05 p0716 A66-15084
 Formulas for light passage through planetary atmospheres of finite optical thickness, taking into account polarization 05 p0765 A66-15415
 Intensity of polarized light transmitted through laser amplifier and linear polarizer, as function of axial magnetic field strength 07 p1041 A66-17292
 Light polarization of twilight and daytime sky at various wavelengths, using telescope-polarimeter system with various color filters 08 p1217 A66-19335
 Lifetimes of orientation and alignment of excited atomic states examined in level crossing and optical double resonance experiments employing polarized light 11 p1740 A66-22969
 Formation of oxide films on metals using polarized light to measure film thickness and vibrating capacitor measurements of changes in Volta potential, noting extension of Mott theory 11 p1718 A66-23211
 Model explaining negative polarization of

moonlight at small lunar phase angles 12 p1949 A66-24235
 Edge absorption of indium-doped cadmium in polarized light, noting exchange interaction between current carriers and Fermi level dependence on carrier concentration 12 p1929 A66-24449
 Phase reference beam of two-beam carrier frequency holography method used for polarization reference 12 p1883 A66-24561
 Lunar tidal effect on daily and monthly variation of polarized sky 12 p1874 A66-24844
 Magnetization induced by circularly polarized laser light incident on nonabsorbing material, in absence of external magnetic field, in doped calcium fluoride proportional to light intensity and Verdet constant 13 p2131 A66-26142
 Irregularity of galactic magnetic field structure in vicinity of Sun indicated by starlight polarization, interstellar cloud motion and Milky Way photography 15 p2595 A66-29130
 Static uniaxial compression effect measurement along /100/, /110/ and /111/ on electroreflectance spectrum of gallium arsenide, using electrolyte technique 16 p2777 A66-30951
 Variation in photoelectric output of thin metal layers calculated as function of thickness, determining output for two light polarizations 16 p2780 A66-31211
 Polarization-induced crossed polarization figure in hologram 18 p3111 A66-33997
 Simple polarization calibrator based upon polarization of specularly reflected light, examining theory, design and performance 19 p3354 A66-35381
 Polarized light study of lunar surface dust composition 19 p3457 A66-35445
 Technique for zero or 180-degree phase generation for spatial filters using photographic printing and polarized light 20 p3556 A66-36936
 Directional distribution of light reflected from roughened surfaces with measurements made of plane-polarized components of reflected light as well as of mixed radiation 20 p3598 A66-36941
 Optical constants of silver and gold in various energy regions, measuring relative refractivities of polarized light, analyzing collective motions of conduction electrons 20 p3615 A66-37283
 High time resolution polarimeter for laser analysis, beam intensity after passing through analyzers measured by photomultipliers 20 p3558 A66-37285
 Edge absorption of indium-doped cadmium in polarized light, noting exchange interaction between current carriers and Fermi level dependence on carrier concentration 20 p3619 A66-37681
 Photoelectric skylight perimeter for Stokes parameter measurements in plane polarized light 23 p4066 A66-41029

POLARIZED RADIATION

Cross-polarized radiation beams of rectangular waveguide antennas with slot arrays, determining radiation pattern for center-fed case 02 p0198 A66-11523
 Optimum wavelength and spectral bandwidth for measuring polarization of distributed cosmic RF 02 p0191 A66-11837
 Tuning of lens and mirror antennas with circularly polarized radiation 02 p0192 A66-11848
 Observation of plane interstellar polarization of 22 stars indicates wavelength dependence of position angles and polarization 02 p0292 A66-12188
 Self-acceleration of ionizing particles in electric field of polarized ionization trail 02 p0270 A66-12279
 Polarized OH emission near W3 region 04 p0579 A66-14175
 OH emission in direction of source W49, comparing earlier observations 04 p0579 A66-14176
 Self-acceleration of ionizing particles in electric field of polarized ionization trail 05 p0727 A66-15458
 Wave polarization change passing through grating 06 p0829 A66-16144
 Polarization of plasma moving in magnetic field of toroidal solenoid 06 p0919 A66-16890

Polarization of cosmic ray muons with various residual energies, using hodoscopes and Wilson chamber 07 p1117 A66-17565
 Compton scattering of laser photons, noting transformation into gamma radiation photons upon collision with high energy electrons 07 p1044 A66-17816
 Beat frequency and rotation of polarization plane in He-Ne laser with axial magnetic field 07 p1046 A66-18430
 Cross section measurement for electromagnetic backscattering of laser beams from rough aluminum and magnesium oxide surfaces 08 p1182 A66-18930
 Field polarization of short-period variations /beats/ of Earth electromagnetic field investigated, using correlation analysis 08 p1214 A66-19034
 Cross-polarization radiation of axisymmetric mirror antennas 09 p1353 A66-20448
 Linear polarized plane electromagnetic wave diffraction by two pairs of parallel infinite coaxial cylinders 11 p1654 A66-22645
 RF spectrum of OH radiation in interstellar space, including emission intensity and linear polarization 11 p1774 A66-22963
 Continuum emission from Venus, Mars, Jupiter and Saturn at 21.2 cm wavelength, measuring brightness temperature to determine source of radiation solar activity effects 11 p1776 A66-23491
 Kinetic theory of passage of s-and p-polarized electromagnetic waves through thin inhomogeneous plasma layer 12 p1816 A66-24225
 Nonlinear polarization of radiation during passage through plasma 13 p2137 A66-25105
 Electron scattering responsible for variable polarization in V444 Cygni 13 p2184 A66-25624
 Intensity and polarization of radiation diffusely transmitted and reflected by Rayleigh atmosphere for optical thickness from 1.0 to 10.0 13 p2072 A66-25800
 Polarized ion source yielding current of 0.1 microamperes, with background of unpolarized deuterons of 1-2 percent and of protons 10-15 percent 13 p2134 A66-26244
 Microwave Faraday effect in n-type germanium, discussing Faraday rotation, ellipticity, magnetoabsorption, complex conductivity tensor elements and measurement of microwave polarization anisotropy 14 p2349 A66-26826
 Emission of axisymmetric parabolic antenna with antiphase field distribution at aperture, calculating radiation pattern of principal and cross polarization components of field 14 p2250 A66-27142
 Polarization characteristics of materials in XUV and development of transmitting and reflecting polarizers, using multilayer metal films 14 p2361 A66-27332
 OH emission and narrow spectral features made with circularly polarized field horn on 140-ft radio telescope in November 1965 14 p2384 A66-27901
 Linear polarization of 54 discrete radio sources at 10.6 cm 14 p2385 A66-28118
 Radiation of prescribed polarization from cross-dipole antenna on aircraft carrier 15 p2447 A66-28570
 Cosmic ray muons polarization at various energies and estimation of asymmetry coefficient ratio 15 p2589 A66-29581
 Wave polarization change passing through grating 15 p2452 A66-29874
 Nonlinear polarization of radiation during passage through plasma 16 p2758 A66-30284
 Polarization photography of solar corona, noting apparatus used for separation of K from F component 16 p2705 A66-30827
 Ground reflection effect on polarization of radiation scattered from top of Rayleigh atmosphere, using Fresnel and Lambert models 16 p2699 A66-31498
 [AIAA PAPER 66-514] 16 p2699 A66-31498
 Wave radiation of current-carrying plane of magnetoactive low density plasma layer, assuming that magnetic field is stable and normal to layer 16 p2655 A66-31545
 Measuring solar radio emission polarization produced by integral solar magnetic field 16 p2795 A66-31554
 Origin of polarization of radiation from GaAs diodes, noting intensity dependence on

current density and effect of anisotropic electron velocity distribution 16 p2667 A66-31770
 Origin and propagation of cosmic radiation, discussing interplanetary magnetic fields, plasmas, Faraday rotation of polarized radiation, Zeeman splitting of hydrogen line, etc 17 p2964 A66-32029
 Gas laser emission in weak longitudinal magnetic field assuming Zeeman splitting is much smaller than Doppler linewidth 17 p2934 A66-32319
 Earth surfaces reflecting and polarizing properties in aerial reconnaissance 17 p2918 A66-32611
 Maximum beam displacement parallel to plane of incidence in plasma reflection of linear or elliptically polarized waves 17 p2974 A66-33286
 Galactic magnetic field strength and distribution determined from synchrotron emission of relativistic electrons, noting Faraday rotation of polarized radiation from distant radio sources 18 p3235 A66-34744
 Polarized pyrometric probe with thermal insulation, comparing probe radiation with volt ampere characteristics of plasma to obtain particle density and energy 19 p3409 A66-36280
 Depolarization of electromagnetic waves backscattered from rough surface boundary 20 p3515 A66-37293
 Polarization of pulsed radiation from GaAs laser diode to determine origin of natural oscillations of resonator 20 p3578 A66-37549
 Ground state resonance, noting absence of Doppler broadening of signals in forward scattered light 22 p3931 A66-39810
 Polarization characteristic variations of HF signal received over short-range ionospheric path, noting phase measurement of elliptically polarized wave components, using receiving dipoles 22 p3864 A66-40065
 Polarized EM wave propagation and microwave Faraday rotation in solid state plasma in circular waveguide under strong magnetic field 22 p3964 A66-40170
 Vector scatter theory for backscatter of circularly polarized waves from Moon and Venus 22 p3866 A66-40174
 Kinetic theory of passage of s-and p-polarized electromagnetic waves through thin inhomogeneous plasma layer 22 p3867 A66-40587
 Polarization, periodicity and angular diameter of radiation from Jupiter at 610 mc/s 23 p4125 A66-41064
 Scattering of circularly polarized electromagnetic wave in Coulomb field, noting coalescence of two-wave quanta into one quantum of double frequency 24 p4220 A66-42529

POLE

SA MAGNETIC DIPOLE

SA REGGE POLE

Annual motion of poles of Earth consisting of solid shell and liquid core, considering annual motion of inertia pole due to air mass displacements 08 p1220 A66-19456
 Annual motion of poles of Earth consisting of solid shell and liquid core, considering annual motion of inertia pole due to air mass displacements 18 p3106 A66-34485

POLIOMYELITIS

C and D antigens of coxsackievirus, centrifugation separation and similarity to poliomyelitis 09 p1335 A66-20633

POLISHED METAL

Emissivity-thermoconductivity relationship in polished metals 15 p2616 A66-28764
 Electronic theory of metals applied to study of total hemispheric thermal emission factors of polished metal bodies at temperatures below 800 degrees K 19 p3479 A66-36254

POLISHING

SA ELECTROLYTIC POLISHING

Asperic surface polishing by driven laps and measurement by air gauge 15 p2509 A66-28825
 Supersmooth optical surfaces polished by water-filled bowl feed technique 15 p2509 A66-28850
 Positive ion beam polishing of optical surfaces 17 p2958 A66-32625
 Precision polishing technique for optical and microwave acoustical surfaces with overall flatness of one-eighth wavelength of

- light and parallel to 6
inches 23 p4067 A66-41248
- POLLUTION**
S AIR POLLUTION
- POLYAMIDE**
SA NYLON
Gamma irradiation intermediates of
polyamide MXD-6 examined, using electron
spin resonance and optical
spectroscopy 08 p1243 A66-19065
- POLYATOMIC GAS**
Temperature jump in polyatomic gases,
discussing nonequilibrium energy
distribution on boundary
conditions 11 p1687 A66-22334
Transport properties, thermoconductivity,
molecular collision and viscosity of
polyatomic gas of circular cylindrical
molecules with hemispherical
caps 11 p1741 A66-23215
Existence and properties of double
molecules /dimers/ in unsaturated
vapors 15 p2547 A66-29630
- POLYATOMIC MOLECULE**
Correlation energy effect on dissociation
and binding energies of diatomic and
polyatomic molecules 07 p1000 A66-18343
Molecular acentricity effect on
intermolecular pair potential of n-alkane
homologs and benzene 10 p1495 A66-21803
Unified method for evaluation of electron-
repulsion integrals for Slater-type
orbitals 22 p3949 A66-39912
- POLYBENZIMIDAZOLE**
High temperature structural properties of
polybenzimidazole, polyimide and phenolic
laminates under different loading
conditions 13 p2113 A66-25311
High temperature polyimide and
polybenzimidazole honeycomb material,
measuring shear and compressive strengths
and moduli 14 p2319 A66-28012
Polybenzimidazole adhesives properties
suitable for bonding
metals 22 p3926 A66-40275
Polybenzimidazole adhesive properties for
structural bonding as affected by processing
parameters 22 p3937 A66-40276
- POLYCRYSTAL**
Optical properties of polycrystalline InSb
films noting index of refraction, absorption
coefficient and transmission
curves 05 p0741 A66-15852
Ductility in polycrystalline single phase
ceramics, noting behavior at room and high
temperature of single crystal structure,
dislocation, etc 07 p1054 A66-18498
Thin film FETs including structural
analysis, operating parameters, MOS
transistors, carrier mobility in
polycrystalline films, etc 11 p1672 A66-23469
Polysilicon insulated gate field effect
transistor having active element fabricated
in epitaxially deposited film on oxidized
single crystal silicon
substrate 12 p1845 A66-24831
Rational compression curves and plastic
deformation mechanism of cast and drawn
polycrystalline beryllium 13 p2106 A66-25356
Hall mobility and Hall constant variation
for lead telluride-tin telluride polycrystals at
high temperatures 13 p2163 A66-25419
Infrared 1 to 5 chemical composition and far
IR transmittance measured by vacuum
grating spectrometer 15 p2524 A66-28847
Magnetic relaxation and high temperature
effect of Bloch wall stabilization in ferrite
Mn-Fe 15 p2565 A66-29052
Vacuum thermionic work functions of
polycrystalline Be, Ti, Cr, Fe, Ni, Cu, Pt and
type 304 stainless steel 17 p2979 A66-32633
High temperature diffusion of potassium in
single crystal and polycrystalline
molybdenum 17 p2940 A66-32320
Diffusion parameters of impurities from
polycrystalline Si in hydrogen flux, noting
formula for boundary
conditions 19 p3321 A66-36457
Work hardening and laws of plastic flow
applicable to element of
polycrystal 23 p4145 A66-41986
Vacuum furnace for studying high
temperature fracture of ceramic materials,
noting tests on polycrystalline aluminum
oxide 24 p4192 A66-43220
- POLYESTER**
Rest period effect on fatigue testing of
polyester fiberglass and

- polymethylmethacrylate plastics under static
and intermittent tensile
loads 12 p1899 A66-24039
Brewster coefficient as function of
temperature, number of cross-linking modes
and styrene content for diethylene-glycol
succinofumarates copolymerized with
styrene 14 p2319 A66-28273
- POLYESTER RESIN**
Pyrolysis of diol succino-maleates
copolymerized with styrene at various
temperatures, using gas chromatography
[ONERA TP 251] 02 p0188 A66-11678
Physical properties of 181 glass cloth
laminates of diallyl orthophthalate and
isophthalate in high temperature
range 02 p0248 A66-11689
Nonmonotonicity in sensitivity test data,
noting results of liquid oxygen impact tests
on Mylar-aluminum-Mylar laminate bonded
to polyester foam 12 p1958 A66-23648
Detail parts production out of Flomat,
structural material composed of polyester
resin and woven glass reinforcement for
BAC 111 20 p3562 A66-37424
- POLYETHYLENE**
Polyethylene balloons for atmospheric
research in France 01 p0011 A66-10361
High-reliability microwave printed circuits
using copper-clad polyethylene dielectric
materials 02 p0195 A66-11288
Radiation effect on polyethylene at
cryogenic temperature 05 p0739 A66-15487
Spherically divergent stress pulses in
linear viscoelastic solids, measuring change
in shape of polyethylene polymethyl
methacrylate and polystyrene
blocks 09 p1393 A66-20662
Superheating of linear high polymer and
polyethylene crystals, evaluating time
dependence of melting, differential thermal
analysis and calorimeter
techniques 12 p1899 A66-23937
Friction and lubrication of
polymers 13 p2087 A66-26304
Oscillographic polarography to determine
relation between adsorption characteristics
and molecular weight of polyethylene
glycol 14 p2295 A66-27655
Shear rate at which transition from
Newtonian to non-Newtonian flow occurs for
polystyrene, polyethylene and
polydimethylsiloxane 16 p2730 A66-31022
Superheating crystallization of ethylene-
propylene and ethylene-butene-1 copolymers
and extended chain
morphology 17 p2943 A66-32557
Effect of equilibrium crystal seeds on
supercooled polyethylene melt and o-xylene
solution of polyethylene of same chemical
nature 17 p2944 A66-33466
Radiosonde for high altitude balloon
soundings using large polyethylene balloons
to carry payloads of electronics, cosmic ray
and nuclei counters 23 p4087 A66-42084
- POLYETHYLENE TEREPHTHALATE**
Compression of anisotropic fiber
monofilaments extended to measurements of
expansion of horizontal diametral plane and
contact widths for polyethylene
terephthalate and nylon, as function of
load 13 p2115 A66-26306
Determination of refractive index of
polyethylene terephthalate film necessary in
calculations of surface shape of film
concentrators 20 p3603 A66-37738
UV radiation effect on polyethylene-
terephthalate film tensile strength in
vacuum and air 22 p3937 A66-39818
- POLYISOBUTYLENE**
Polymer degradation dosimeter of
polyisobutylene in heptane noting viscosity
range effects, concentration change and
molecular weight 21 p3739 A66-39383
- POLYMER**
SA COORDINATION POLYMER
SA COPOLYMER
SA VINYL POLYMER
Constants in empirical equation log
evaluated from viscosities and densities for
various n-alkanes 03 p0330 A66-12335
Frictional and viscoelastic properties of
plastics and rubber show relationship to
sliding speed and temperature
[ASME PAPER 65-LUB-15] 04 p0528 A66-14247
Damping properties in terms of dynamic
storage and loss moduli in elastomers,

- thermoset resins and semicrystalline
polymers 05 p0705 A66-14551
Polymeric material deformation under
harmonically varying load action, noting
steady state regime temperature distribution
effects 08 p1243 A66-18879
Regularity of thermoviscoelastic
deformation in polymer binders for glass-
fiber-reinforced plastics 08 p1313 A66-19441
End effects on viscoelastic polymer flow
through capillary tube 08 p1209 A66-19552
Dynamic flexural rigidity of polymer
plates, measuring elastic modulus, noting
variation of Youngs modulus, Poisson ratio
with temperature and rate of
loading 09 p1466 A66-20183
Society of Plastics Engineers, Conference,
Montreal, March 1966 13 p2111 A66-25301
Gaseous diffusion in polymeric foam and
experimental results, using closed cell
polyurethane foam 13 p2112 A66-25304
Formation of supermolecular structures
and relation between characteristics and
mechanical properties of
polymers 13 p2112 A66-25307
Scintillators stable at 110 degrees C from
styrene/divinyl benzene copolymers and
additions of phosphors, establishing optimum
thermal conditions for block polymerization
and determining luminescence
yield 13 p2077 A66-25326
High speed stress-strain testing of
polymers - International Symposium, Boston,
March 1965 13 p2114 A66-26105
Stress relaxation, stress-strain curve and
time-temperature-strain rate equivalence for
thermoplastic and viscoelastic
polymers 13 p2114 A66-26109
Static and high strain rate tensile behavior
of epoxy, polyester and urethane resins
reinforced with 181-S, 184-E and woven
roving glass materials and
nylon 13 p2114 A66-26111
Apparatus for determining dynamic
compressibility, creep behavior and
viscoelastic properties of
polymers 13 p2115 A66-26115
Uniaxial tensile test data on stress-strain
properties of polymers and elastomers as
function of strain rate and
temperature 13 p2115 A66-26118
High speed testing to determine
viscoelastic properties of composite
propellant polymers, for use in solid
propellant rockets 13 p2115 A66-26119
Fracture and mechanical failure of
polymeric solids at high strain
rates 13 p2198 A66-26120
Rain repellent polymers for aircraft
windshields 13 p2116 A66-26544
Lateral creep deflection vs time relations
in nonuniform thermal environments for
linear polymer column described as
combination of Maxwell and Voigt
elements 14 p2396 A66-27355
Shear rate at which transition from
Newtonian to non-Newtonian flow occurs for
polystyrene, polyethylene and
polydimethylsiloxane 16 p2730 A66-31022
Linearity of mechanical behavior and
applicability of yield stress master curve
analyzed for various crystalline-type
polymers 17 p2943 A66-33004
Isotherms and isobars for polymer liquids
using corresponding states principle to
establish function describing dependence of
internal pressure on volume or
temperature 18 p3124 A66-33692
Thermorheological equation of state
derived for fiber-reinforced polymers
indicating dependence of elongation or
contraction on linear expansion
coefficients 18 p3125 A66-33711
Polymer flammability measured in terms of
minimum oxygen content needed for
burning, noting effect of various agents for
reducing flammability 20 p3680 A66-38040
Conjugation breakdown effect on
properties of semiconductor polymer,
showing effect of impedance on current
transfer and intermolecular
interaction 21 p3702 A66-39249
Friction and viscoelastic properties of
polymeric solids 24 p4229 A66-42702
- POLYMER CHEMISTRY**
Polyimide resins for extreme
environments, discussing chemical structure,
application, electrical, thermal and

mechanical properties, radiation resistance, etc 06 p0899 A66-16292

Aromatic/heterocyclic polymers from tetraamines reaction with tetraacids at room temperature, developing potential for aerospace application 06 p0901 A66-16299

Low angle X-ray procedure for investigation of molecular dimensions in bulk polymers 08 p1258 A66-18942

Syntheses of three macromolecular chlorocarbons, studying structure and configuration, noting high thermal stability and chemical inertness 12 p1812 A66-23633

Synthesis of polyimidazopyrrolones, using previous macromolecular synthesis of ladder segments of aromatic-heterocyclic polymers 13 p2017 A66-26290

Thermal conductivity of polytetrafluoroethylene, noting temperature effect, crystal structure, etc 16 p2730 A66-30854

Polytriphenylene synthesis at high temperatures using fused salts 17 p2869 A66-31874

Thermal conductivity cell measurements of depolymerization rate of polytetrafluoroethylene exposed to gamma radiation in flowing helium atmosphere 17 p2942 A66-31880

Polymerization of nucleotides from ADP, noting separation of polymer particles from solution as coacervate drops and relation to life origin 17 p2852 A66-32097

Superheating crystallization of ethylene-propylene and ethylene-butene-1 copolymers and extended chain morphology 17 p2943 A66-32557

Method and equipment effects on shear stability measurements of hydraulic oils, using mechanical and sonic methods 17 p2943 A66-32830

Thermal degradation mechanism of polyether-polyurethanes, analyzing fractionation and measuring molecular weights 17 p2943 A66-32834

Polymer molecular structure, discussing concentration of primary and secondary hydroxyl groups, use of NMR to establish stereo and positional isomeric configuration, etc 17 p2871 A66-33003

Prior gamma irradiation effect on thermal volatilization of vinyl and vinylidene fluoride polymers 20 p3587 A66-37311

Ribonuclease effect on polymerase activity in *Azotobacter vinelandii* used to verify theory that RNA polymerase is inhibited by RNA produced in reaction 20 p3510 A66-37790

Polymer degradation dosimeter of polyisobutylene in heptane noting viscosity range effects, concentration change and molecular weight 21 p3739 A66-39383

Gibbs-DiMarzio theory of glass transition used to derive Simba-Boyer parameter, which is function only of fractional unoccupied volume 22 p3938 A66-40911

Polymer chemistry for solid propellant binder development, examining attempts to introduce oxidants into binder structure 23 p4117 A66-41228

POLYMER PHYSICS

Difference between dynamic and equilibrium tension in macromolecular chain expressed as functional of variation of nonlinear strain function, developed in kinetic elasticity theory 02 p0261 A66-11427

Vibrational creep of polymer materials when small dynamic component resulting from heating of material due to energy dissipation of oscillations is imposed on static load 04 p0538 A66-14426

High temperature resin binders, discussing thermosetting polymer properties, functions, temperature resistivity and application 06 p0900 A66-16294

Viscoelastic behavior of solid polymers including Boltzmann superposition principle, mechanical models, anisotropic elasticity, statistical molecular and structural analytic theories, etc 08 p1244 A66-19219

Vibrocreeper mechanism resulting from polymeric material heating under vibrating load, noting increase of creep rate and structural changes 12 p1958 A66-23665

Ring formation and expansion in cold drawn polymeric material related to oriented deformation of supermolecular structural elements 12 p1899 A66-24348

Equation relating sound velocity in polymer sample with angle between axes of molecules and fibers of sample 13 p2113 A66-25910

Dielectric properties and thermostability of glow-discharge thin organic polymer films for electronic application 16 p2783 A66-31429

Electron transfer from alkali metals to aromatic hydrocarbons, examining rate of chain scission in case of poly/4-vinyl biphenyl/ and poly/alpha/ vinyl naphthalene/ 17 p2870 A66-32300

Temperature range of nonlinear rigid, elastic and viscoelastic behavior in quasi-isotropic polymeric materials and derivation of stress-strain-time relations by method of small parameters 18 p3251 A66-33701

Vibrocreeper mechanism resulting from polymeric material heating under vibrating load, noting increase of creep rate and structural changes 22 p3988 A66-39709

Radiation, molecular orientation, crystallinity and molecular weight influences on thermoconductivity of high polymers 23 p4083 A66-41551

POLYMERIZATION

Polymerization of condensed monomers in shock wave as case of polymer chain formation 07 p1000 A66-17917

Tagaform synthetic hypergolic fuel for hybrid rockets, discussing polymerization, ignition delay, etc 11 p1760 A66-22249

Manufacture of scintillator in form of synthetic sheets differing in area and thickness, polymerizing styrene between metallic or glass sheet 13 p2077 A66-25325

Scintillators stable at 110 degrees C from styrene/divinyl benzene copolymers and additions of phosphors, establishing optimum thermal conditions for block polymerization and determining luminescence yield 13 p2077 A66-25326

Thermal condensation of cytidylic acid from mononucleotides in presence of triphosphoric acid 17 p2852 A66-32096

Radiation-induced solid state explosive polymerization of acetaldehyde 19 p3295 A66-35333

POLYMETHYL METHACRYLATE

Yield stress master curve for polymers below glass transition temperature 05 p0706 A66-15368

Spherically divergent stress pulses in linear viscoelastic solids, measuring change in shape of polyethylene polymethyl methacrylate and polystyrene blocks 09 p1393 A66-20662

Glass transition temperature of polymethyl methacrylate as affected by low concentrations of monomer and diethyl phthalate plasticizers 11 p1720 A66-22977

Rest period effect on fatigue testing of polyester fiberglass and polymethylmethacrylate plastics under static and intermittent tensile loads 12 p1899 A66-24039

Results of crack propagation tests on polymethylmethacrylate flexed at various frequencies under cyclic loading 13 p2112 A66-25308

Thermoplastic surface response to intense surface heating exposure, examining linear pyrolysis of polymethyl methacrylate [WSCI 66-24] 18 p3263 A66-34418

POLYMORPHISM

Strain hardening of high temperature titanium multiphase solid solution by deformation and subsequent rapid cooling 17 p2940 A66-33229

Intermediate phases in alloys of Ti with Ir, Rh and Os indicate possibility of polymorphism 20 p3584 A66-37418

POLYNOMIAL

SA HERMITIAN POLYNOMIAL

SA JACOBI POLYNOMIAL

SA LEGENDRE POLYNOMIAL

Proof of irreducibility of Bernoulli polynomial, using Norlund notation 01 p0093 A66-10386

Algorithm determining best approximation of bounded function in Chebyshev sense adapted to discrete case 04 p0540 A66-14167

Extremum problem connected with simultaneous approximations of some functions analyzed by polynomials and derivatives 04 p0540 A66-14467

Approximation formulas for minimum and maximum roots of nth order

polynomials 05 p0707 A66-14624

Generalized almost periodic sequences generated by ultraspherical polynomials and validity of Parseval theorem 06 p0902 A66-16536

Stability of complex moment problems determined by constructing sequence of interpolation polynomials which converge uniformly to solution in bounded region 07 p1060 A66-18099

Globally convergent iteration function for solution of polynomial equations according to certain algorithms 09 p1395 A66-20624

Markov direct and inverse problems involving complex value functions on bicomact Hausdorff space and polynomials, with coefficients satisfying linearly independent constraints 10 p1549 A66-21235

Approximation of continuous and differentiable functions by algebraic polynomials on closed interval 10 p1551 A66-21976

Polynomials used to solve theoretical cascade problems exemplified by two-dimensional incompressible flow through nonstreamlined blades 12 p1796 A66-23786

Efficiency criteria in synthesis of optimum sampled data systems 12 p1852 A66-24324

Bernstein form of polynomial with algorithm for determining upper and lower bounds for polynomial in x in closed interval /0, 1/ 14 p2320 A66-27114

Minimax polynomial approximation of degree n to continuous function 14 p2323 A66-27779

Motion of solid with fixed point and cavities filled with ideal fluid, presenting three exact polynomial solutions 14 p2335 A66-28050

Polynomial approximation method for determining satellite orbits from large-time-interval trajectory measurements 15 p2592 A66-28488

Complex zeros of exponential polynomial in study of stability criteria for collisionless plane vacuum diode of infinitely heavy ions in interelectrode space 15 p2464 A66-29244

Book on ergodic problems in comparison theory and theory of diophantine, discussing residue distribution of polynomial of nth order modulo p, fractional parts of polynomial and exponential function 15 p2529 A66-29767

Generalized almost periodic sequences generated by ultraspherical polynomials and validity of Parseval theorem 16 p2736 A66-30974

Polynomials orthogonal with respect to contours, examining analytic function representation via Fourier series expansion of such polynomials 16 p2738 A66-31409

Maximum error curves for Lanczos selected point method of polynomial solution to ordinary differential equations, using Chebyshev and Legendre functions 17 p2947 A66-32858

Lacunary interpolatory polynomials and Mth derivatives prescribed in roots of unity, examining Dini-Lipschitz condition for convergence 18 p3127 A66-34638

Reduction of variance by least squares polynomial approximations, noting exact functional dependence of variance on degree of polynomial 19 p3388 A66-35832

Auxiliary polynomials for direct determination of Chebyshev interpolation polynomial 19 p3389 A66-35936

Markov direct and inverse problems involving complex value functions on bicomact Hausdorff space and polynomials, with coefficients satisfying linearly independent constraints 19 p3389 A66-36182

Approximation of continuous and differentiable functions by algebraic polynomials on closed interval 19 p3390 A66-36186

Synthesis parametry of ensemble-averaged second-order polynomial approximation to performance index of optimal guidance linear feedback control system 20 p3589 A66-36858

Monotony principle for linear approximations to determine upper and lower bounds of minimum deviation in approximating functions of real variable by generalized polynomials 20 p3590 A66-37529

Graphic solution for factoring higher-order polynomials of response function resulting

from analysis of linear filter networks 21 p3756 A66-38672

Solution of systems of polynomial equations by elimination procedure, using coding in LISP and FORMAC 21 p3707 A66-38680

Generalized Rolle and Bernstein theorems applied to polynomial approximation of ordinary differential equations over compact linear space 21 p3758 A66-39259

Expansion of function in series of Bernoulli polynomials 22 p3939 A66-40392

Development of family of standard polynomials with adjustable damping, noting first- and second-degree numerators 22 p3884 A66-40514

POLYPHENYL ETHER

Backstreamed fluid analysis via gas chromatography, using polyphenyl ether as diffusion pump fluid 24 p4239 A66-43164

POLYPROPYLENE

Nonlinear creep and recovery behavior of polypropylene fibers and hereditary functionals describing nonlinear viscoelastic behavior 09 p1393 A66-20663

Creep behavior of selected polypropylene monofilament under axial loading 17 p3029 A66-32789

POLYSACCHARIDE

Nonelectrolytes and hydroxy and fluorobenzoates behavior on elution through columns of tightly cross-linked dextran gels 11 p1645 A66-22990

Extracellular polysaccharides biosynthesis by blue-green alga *Anabaena flos-aquae* 13 p2009 A66-25875

POLYSTYRENE

Temperature dependence of viscoelastic behavior of polystyrene analyzed in terms of creep and recovery 02 p0248 A66-11592

Drift mobility induced by pulsed gamma irradiation of polystyrene 05 p0735 A66-14858

Laser-beam scattering by individually introduced charged polystyrene spherical particles and droplets of naphthalene and water in combination 07 p1043 A66-17473

Thermal degradation mechanism of polystyrene, measuring volatilization rate and molecular weight dependence on extent of pyrolysis 08 p1243 A66-19067

Spherically divergent stress pulses in linear viscoelastic solids, measuring change in shape of polyethylene polymethyl methacrylate and polystyrene blocks 09 p1393 A66-20662

Polystyrene exposure to oxygen, causing ignition in shock tube but failing to ignite under surface exposure 14 p2370 A66-27476

Thermal fatigue testing of large cross-linked polystyrene feedhorn window and control specimens 15 p2524 A66-28882

Surface degradation-vaporization characteristics of porous polystyrene under intense surface heating in inert and reactive atmosphere, measuring regression rate [AIAA PAPER 65-58] 15 p2616 A66-29278

Shear rate at which transition from Newtonian to non-Newtonian flow occurs for polystyrene, polyethylene and polydimethylsiloxane 16 p2730 A66-31022

Stress in viscoelastic polystyrene in Aroclor flowing in straight, converging and diverging channels 16 p2686 A66-31043

Combustion rate of ammonium perchlorate-polystyrene and ammonium perchlorate-Plexiglas mixtures related to mixture ratio 18 p3260 A66-33720

Burning rate anomalous dependence on particle size for ammonium perchlorate-polystyrene mixture 20 p3679 A66-37703

Impact of compact mass of tungsten particles on obstacles of polystyrene and steel, as meteoritic impact model 24 p4292 A66-42886

POLYTETRAFLUOROETHYLENE

Polytetrafluoroethylene as material for seal application 04 p0526 A66-13786

Visible and near UV radiation intensity profiles for ablating Teflon boundary layer in hot subsonic arc-jet flow at one atmosphere [AIAA PAPER 66-56] 07 p0983 A66-18450

Effect of crystalline state and structural orientation of polymer on endurance of couplings with polytetrafluoroethylene components, analyzing dry friction and wear on interfaces 13 p2113 A66-25912

Sliding characteristics of polytetrafluoroethylene /PTFE/ dry lubricant, examining effects of time, temperature and environment 16 p2713 A66-30570

Thermal conductivity of polytetrafluoroethylene, noting temperature effect, crystal structure, etc 16 p2730 A66-30854

Thermal conductivity cell measurements of depolymerization rate of polytetrafluoroethylene exposed to gamma radiation in flowing helium atmosphere 17 p2942 A66-31880

Starting friction and kinetic friction of PTFE fabric-lined spherical bearings and deflection and permanent set under static loading 17 p2929 A66-31932

Properties of small tube Teflon heat exchangers noting corrosion resistance, smooth slippery surface, etc, and heat transfer coefficient 18 p3262 A66-34383

Thin insulating Teflon film bonding to internal surface of space cryopanel for increased heat transfer and faster cooling 20 p3677 A66-37100

POLYTROPIC PROCESS

Rotating polytrope structure analyzed, using approximation technique of integrating outwards from center and inward from surface 04 p0578 A66-14018

Polytropic technique for gas turbine performance, prediction and evaluation, noting use of sophistication factor [SAE PAPER 660161] 09 p1434 A66-20161

Exact solutions for triple wave type hydrodynamic equations for confined isothermic gas flow and polytropic gas efflux into vacuum 12 p1863 A66-24360

Equilibrium structure of magnetic fields in stars analyzed, employing perturbation theory for assumed polytropic configuration 17 p3005 A66-33001

General relativistic field equations of compressible fluid sphere with variable polytropic index 20 p3545 A66-37465

POLYURETHANE

SA SYNTHETIC RESIN

Rigid polyurethane foam encapsulation of high-voltage aerospace electronic systems, noting vacuum effect 02 p0248 A66-11292

Urethane rubber for wide range of experimental stress analysis problems 03 p0434 A66-12367

Aircraft fuel tank coating corrosion resistance, discussing polyurethane and epoxy material characteristics and application 07 p1053 A66-17491

Phosgenation procedure for synthesis of carbon-14 labeled isocyanates, noting isotope distribution in compounds 14 p2231 A66-26871

Thermal degradation mechanism of polyether-polyurethanes, analyzing fractionation and measuring molecular weights 17 p2943 A66-32834

Static firing tests of HT-110 engines with high slenderness ratio using slow burning polyurethane propellant 23 p4121 A66-41428

Direct-casting polyurethane-ammonium perchlorate-based composite propellant grain manufacture for small rocket motor, noting inspection methods 23 p4119 A66-41432

Erosive burning in rocket engines of radial burning type, using polyurethane/ammonium perchlorate base propellant grains, examining flow channel constriction 23 p4121 A66-41433

Effect of fuel-binders ingredients and additives on physicochemical properties of polyurethane-ammonium perchlorate base propellant grains 23 p4119 A66-41434

Halides used as burning rate depressants on combustion stability of polyurethane/ammonium perchlorate base propellants, examining acoustic instability 23 p4119 A66-41435

Stress and strain analysis of polyurethane-base solid propellant grains under high internal pressure, determining mechanical characteristics and test procedures prior to rocket launching 23 p4120 A66-41438

Rocket motor burning tests, discussing correlation of mechanical properties of polyurethane solid propellants to combustion characteristics 23 p4120 A66-41439

POLYURETHANE FOAM

Sliding friction and compression testing of

rigid polyurethane foams 13 p2112 A66-25303

Gaseous diffusion in polymeric foam an experimental results, using closed cell polyurethane foam 13 p2112 A66-25303

Fabrication of solar concentrator, investigating plastic film reflector shaping and rigidization, using urethane foam [AIAA PAPER 64-733] 13 p2005 A66-26634

Saturn S-IV and S-IVB liquid hydrogen tank internal insulation, using polyurethane foam reinforced with fiberglass threads 20 p3675 A66-37061

POLYVINYL CHLORIDE

Mechanical and optical measurements of plasticized polyvinyl chloride, photoviscoelastic stress analysis and wave propagation effects 14 p2318 A66-27761

PONDEROMOTIVE FORCE

Electromagnetic field interaction with accelerated material medium, considering ponderomotive forces and finiteness of deformations 14 p2335 A66-28048

Ponderomotive force acting on conducting cylinder in moving magnetic field of cylindrical inductor 16 p2765 A66-31401

PONTRYAGIN PRINCIPLE

SA REVERSE TIME

Control systems optimal with respect to control regime or to transient synthesized with aid of Pontryagin principle or Bellman principle 01 p0051 A66-11001

Current trends in nonlinear control theory 03 p0349 A66-12701

Pontryagin method applied to choice of optimal minimax controls of dynamic systems 03 p0350 A66-13035

Pontryagin maximum principle used for solving optimization problems of space interception and rendezvous 04 p0584 A66-13522

Pontryagin maximum principle to solve zeroing problem for nonsteady linear systems optimum in integral sense 04 p0504 A66-13978

Variational and optimal control theory, discussing extension of McShane and Pontryagin methods to general problem of Bolza 04 p0505 A66-13988

Second order dynamical systems with time lag, negative damping coefficient and/or negative spring constant, employing Pontryagin results [ASME PAPER 65-APMW-11] 04 p0546 A66-14216

Worst case error analysis for systems with bounds on forcing function and time derivatives, using Pontryagin maximum principle 05 p0636 A66-14612

Algorithm for optimum control problem based on Pontryagin maximum principle 06 p0902 A66-16424

Pontryagin principle extended for nonlinear control system whose control laws contain Radon measures 06 p0863 A66-16618

Pontryagin rational classes as topological and homotopic invariants 08 p1246 A66-19712

Optimization of interplanetary transfer between coplanar circular orbits with small thrust acceleration based on Pontryagin maximum principle 09 p1457 A66-20586

Optimal cooperative state rendezvous and Pontryagin maximum principle for two independently controlled systems having common goal 11 p1765 A66-22223

Pontryagin maximum principle applied to Mayer variation problem in dynamics of point of variable mass /rocket/ 11 p1732 A66-22353

Extension of Pontryagin maximum principle for application to optimum discrete control systems 11 p1674 A66-22355

Optimization of systems with stepwise control constraints, using Pontryagin maximum principle to determine special features 11 p1676 A66-22753

Existence theorems for optimal control solutions of Pontryagin and Lagrange problems 11 p1725 A66-23458

Second order dynamical systems with time lag, negative damping coefficient and/or negative spring constant, employing Pontryagin results [ASME PAPER 65-APMW-11] 12 p1913 A66-23981

Deterministic optimal control, discussing Bellman dynamic programming method, Pontryagin maximum principle, orbital transfer, interplanetary guidance,

- etc 12 p1854 A66-24635
- Optimal control system geometry, discussing properties of interior points of limiting surfaces, maximum principle and separability concept 13 p2046 A66-25340
- General theory of optimal processes, discussing general version of maximum principle 13 p2116 A66-25342
- Maximum principle for systems described by difference equations, justifying convexity assumptions for approximation of differential equations 13 p2116 A66-25344
- Sufficient conditions for nonlinear system optimal control derived, imposing state and control-variable constraints and fixed initial and terminal times 13 p2046 A66-25346
- Signal-to-noise ratio maximization using Pontryagin maximum principle, solving matched filter problem and designing signal with constrained energy and amplitude requirements 13 p2048 A66-25940
- Motion of material point in central force field, reducing problem to solution of boundary value problem based on Pontryagin maximum principle, using analog computers 14 p2245 A66-28286
- Field theory, variational calculus, dynamic programming and Pontryagin maximum principle approaches to plasma optimal controllability 15 p2548 A66-28520
- Variational problem in Banach space including optimal control problems, deriving conditions for extremality and Pontryagin maximum principle 15 p2473 A66-29378
- Motion equations and Pontryagin maximum principle applied to space vehicle reentry trajectory optimization through independent control of lift and drag 16 p2809 A66-30884
- Uniqueness of solutions of equations derived from Pontryagin maximum principle for optimal control problem with free right end of trajectory and fixed terminal time 16 p2672 A66-31339
- Pontryagin method applied to choice of optimal minimax controls of dynamic systems 18 p3092 A66-34998
- Analog computer solution of high-order optimal control problem, noting application of Pontryagin maximum principle and extension to two-point boundary value problems 19 p3306 A66-35536
- Optimal and suboptimal design of vehicular control and proportional navigation system based on Pontryagin maximum principle 19 p3397 A66-35882
- Controller synthesis for three-axis reaction-wheel control of space vehicle in negligible gravitational field, using optimization theory and Pontryagin maximum principle 19 p3468 A66-35883
- Nonlinear optimal control problems with control appearing linearly, using Pontryagin maximum principle [AIAA PAPER 65-702] 19 p3468 A66-35905
- Pontryagin principle extended to control systems, computing optimal control laws 19 p3337 A66-36735
- Iterative solution of time optimal control boundary value problem resulting from application of Pontryagin maximum principle 20 p3535 A66-36850
- Minimum fuel transfer between neighboring elliptic orbits for low-thrust power-limited propulsion system, using Pontryagin maximum principle, vehicle motion and fuel consumption 20 p3645 A66-36875
- Closed loop optimization of fixed configuration systems termed specific optimal control solved by applying Pontryagin maximum principle to reduce problem to two-point boundary value problem 21 p3718 A66-38668
- Minimum of maximum overload in braking of vehicle in atmosphere, examining aerodynamic lift on basis of Pontryagin maximum principle 22 p3986 A66-40465
- Pontryagin maximum principle minimization of time frequency transition in white noise driven phase-locked loop 23 p4048 A66-41316
- Optimal feedback control of random discrete-time system using Pontryagin maximum principle 23 p4049 A66-41543
- Pontryagin maximum principle applied to solution of optimal control problems by hybrid computer, using digital parameter optimizer to solve two-point boundary value problem 23 p4042 A66-41601
- Real time computer technique for least squares estimates of current system state for noisy nonlinear system, using Pontryagin maximum principle 23 p4050 A66-41615
- Analog computation of minimum fuel trajectories with soft landings in uniform gravitational field, using Pontryagin maximum principle to reduce two-point BVP with optimal controllers 23 p4133 A66-41618
- ### POPULATION
- Protection standards for population around missile launching sites, noting missile malfunctions, particularly breakdowns of guidance and control systems 09 p1457 A66-20554
- Nonequilibrium population buildup and detection for IR solid state lasers and IR-optical double resonance in lanthanum chloride crystal 13 p2098 A66-26177
- Singlet and triplet populations in helium and electron temperature determination from optical excitation cross sections 23 p4100 A66-41161
- Fractional metastable-state population measurements of Cr ions in ruby crystal under Q-switching operation 23 p4077 A66-41288
- Microscopic model of symmetry between particle and antiparticle populations in expanding universe 23 p4131 A66-42065
- Linearized population rate equations and quantum noise sources used to calculate spectra of intrinsic second moment intensity fluctuations in 3-and 4-level CW laser oscillators 24 p4221 A66-42548
- ### POPULATION INVERSION
- Peak power transients of near confocal helium-neon laser working at 6328 angstroms on pulsed discharge basis 01 p0080 A66-10329
- Atomic beam lasers, particularly for population inversion in levels of optical transition 01 p0082 A66-10448
- Population inversion requirements in paramagnetic amplifiers and generators with optical lighting for steady state and pulsed operation 02 p0239 A66-11403
- Laser transition in vibrational state of ground electronic state of CN from rotational level 8 to 7 with population inversion as result 02 p0240 A66-11451
- Two-and three-step laser cascades detected experimentally in helium-neon mixtures, analyzing two-step cascade starting with density matrix formulation 02 p0241 A66-11477
- Population inversion by thermal dissociation of molecules in shock wave 02 p0263 A66-11730
- Lasing in p-type GaAs in which population inversion is brought about by avalanche breakdown of high resistivity region in material 03 p0378 A66-13008
- Physical fundamentals of lasers such as population inversion, induced emission and principal optical apparatus explained for communications engineers 03 p0379 A66-13233
- Atomic beam lasers, particularly for population inversion in levels of optical transition 03 p0380 A66-13311
- Propagation rate of high power laser light pulse in inversely populated medium 05 p0717 A66-15333
- Energy losses in ruby laser due to heat evolution during optical pumping, noting relation between energy absorption and population inversion 05 p0698 A66-15858
- Laser action on five green lines and six IR lines caused by pulsing manganese discharge of collision laser in atomic vapor of neutral manganese 06 p0892 A66-16763
- Gas laser output and threshold in population inversion from photodissociation of methyl iodide and fluoro iodo methylidyne 06 p0892 A66-16771
- Derivation of two equations for electromagnetic field and population inversion in solid state laser 06 p0893 A66-16773
- Population inversions promoted between electronic-excited states by fluid-mechanical techniques 07 p1083 A66-17937
- Excitation of neon levels in hollow-cathode discharge in neon-hydrogen mixture as result possibly from recombination processes involving dissociation and triple collisions 10 p1558 A66-22023
- Degree of excitation of metastable state determined, using luminescence saturation phenomenon, calculating population of working level of laser substance 10 p1544 A66-22027
- Ruby laser amplifier at liquid-nitrogen temperature treated as three-medium transmission system, noting gain change with negative attenuation 11 p1712 A66-22867
- Steady state value of inverted population, power output, threshold behavior and spiking characteristics for single-mode laser when radiation intensity has spatial dependence 12 p1891 A66-24562
- Depopulation of ground state chromium ions in ruby under optical pumping explained via rate equations 13 p2089 A66-25188
- Transition probabilities and lifetimes in ionized argon gas lasers 13 p2102 A66-26207
- Ionic fluorescence of europium chelates, suitability as laser materials, noting energy transfer role in population inversion 14 p2315 A66-27463
- Radial amplification dependence over discharge cross section of He-Ne laser 15 p2515 A66-29208
- Propagation rate of high power laser light pulse in inversely populated medium 15 p2543 A66-29980
- Excitation of neon levels in hollow-cathode discharge in neon-hydrogen mixture as result possibly from recombination processes involving dissociation and triple collisions 16 p2753 A66-30842
- Degree of excitation of metastable state determined, using luminescence saturation phenomenon, calculating population of working level of laser substance 16 p2718 A66-30846
- Laser operated with saturable filter for Q-switching, noting two modes of excitation /soft and hard regime/ 17 p2934 A66-32314
- Radial amplification dependence over discharge cross section of He-Ne laser 17 p2936 A66-33057
- Type II collision roles in population buildup in zinc vapor and in zinc mercury vapor mixture 17 p2960 A66-33511
- Vibrational excitation, population inversion and coupling out of carbon dioxide-nitrogen-water vapor laser 18 p3118 A66-33758
- Gas laser output and threshold in population inversion from photodissociation of methyl iodide and fluoriodo methylidyne 19 p3372 A66-35368
- Derivation of two equations for electromagnetic field and population inversion in solid state laser 19 p3372 A66-35370
- Laser action in closed molecular system with mixture of carbon dioxide, nitrogen and water vapor, noting coupling-out plate reflectivity and population inversion 19 p3373 A66-35433
- Population inversion in adiabatic expansion of molecular gas mixture with three vibrational levels 19 p3402 A66-36068
- Stimulated emission processes interpreting OH microwave emission from points in sky, using anisotropic UV radiation which leads to molecule alignment and population inversion 20 p3650 A66-37343
- Giant pulse formation theory, measuring shape and duration of neodymium glass laser pulses for various values of inverse population 20 p3577 A66-37367
- Associated nonuniform electron-nucleus oscillations in ferromagnetic substances studied to determine feasibility of maser, using magnetic-reversal nuclear magnetic resonance 20 p3577 A66-37477
- L-band traveling wave maser using chromium doped rutile, discussing inverted susceptibility as figure of merit 20 p3580 A66-38239
- Spontaneous emission noise power added to amplified signal in laser amplifier in He-Xe gas discharge and saturation relation to population inversion 20 p3581 A66-38387
- Degree of population inversion and inverse temperature measurement in medium 22 p3917 A66-39663
- Spontaneous emission in inversely populated medium examined for uniform ruby rod laser with uniform pumping distribution 23 p4078 A66-41450
- Magnetic pinch formation in indium antimonide and possibility of population

inversion in pinch, using strong current supported by electron-hole plasma 24 p4249 A66-42224
 Book on lasers covering optical cavities, gas lasers, solid state lasers, optical pumping, Q-switching, population inversion, etc 24 p4220 A66-42319
 Spectroscopy of IR emission and laser oscillation resulting from transient population inversions on electronic transitions in molecular nitrogen 24 p4221 A66-42550
 Semiconductor laser technology, operating principles, material properties and performance, with emphasis on GaAs junction lasers 24 p4224 A66-42802

POROSITY

SA BOUNDARY LAYER CONTROL
 SA FLUID INJECTION
 SA GAS INJECTION
 Pore formation in decomposition of solid solutions of bivalent impurities in sodium chloride crystals by studying light scattering in these crystals 01 p0125 A66-10777
 Lunar dust layer with protons in solar wind displacing atoms in grains, thus sintering dust through diffusion into porous structure 03 p0429 A66-13338
 Radiographic acceptance standards for setting limits on size and distribution of porosity in steel weldments [ASME PAPER 64-WA/MET-3] 06 p0884 A66-16207

Pore formation in decomposition of solid solutions of bivalent impurities in sodium chloride crystals by studying light scattering in these crystals 11 p1749 A66-22289
 Porosity in titanium arc welds, noting sources of gas evolution and probable causative gases, particularly molecular hydrogen and oxygen 14 p2302 A66-27346

POROUS BOUNDARY LAYER CONTROL

Integration of third-order differential equation of laminar boundary layer on porous surface 15 p2477 A66-28777

POROUS MATERIAL

Heat transfer in porous solids with gas filling 01 p0163 A66-10629
 Drag reduction measurements on porous cylindrical bodies with blunt nose and tail sections, using area suction [AIAA PAPER 65-561] 02 p0175 A66-11564
 Effect of nonuniform distribution of number of pores in cross sections of metal specimens on strength characteristics 02 p0246 A66-12274
 Biot variational method applied to transient heating of porous half-space from which gas escapes [AIAA PAPER 65-118] 03 p0444 A66-12766
 Porous materials by sintering powdered carbides and borides of transition metals 04 p0535 A66-13437
 Laminar boundary layer control wind tunnel results, using perforated plastic reinforced by glass fiber 04 p0453 A66-13513
 Air flow resistance and effective porosity of round wire parachute fabrics with varying wire thickness and mesh width 04 p0538 A66-13532
 Porous blowing and suction for laminar boundary layer during free convection at vertical surface 04 p0597 A66-13820
 Unsteady state heat transfer with flowing fluid through porous solids [ASME PAPER 65-HT-10] 05 p0782 A66-14736
 Heat transfer through porous ceramics and thermally degraded ablation material, discussing conductivity [ASME PAPER 65-HT-46] 05 p0785 A66-14756
 Partial porous metal bearings performance during steady state operation with full film of lubricant, determining pressure distribution [ASME PAPER 65-WA/LUB-3] 05 p0689 A66-15526

Pressure phase angle and frequency for forced oscillations of small porous chamber [ASME PAPER 65-WA/FE-8] 05 p0685 A66-15731

Tungsten disilicide oxidative destruction, discussing porosity induced disintegration upon exposure to air 05 p0704 A66-15818
 Long high-porosity sintered tubes produced from nonspherical stainless-steel powders 06 p0896 A66-16691
 Deformability of porous sintered materials in tension, examining properties of dense

materials, variation in number of pores, pore shape and material loosening during loading 06 p0897 A66-16692
 Porous cermets of iron, bronze and stainless steel efficiently arrest flame of burning gas mixtures 06 p0897 A66-16694
 Production technology of porous titanium tubes 06 p0887 A66-16697
 Porous gas-diffusion electrodes analyzed by using four different models, comparing resulting current density-polarization characteristics 07 p0990 A66-17239
 Highly porous chromium materials prepared by sintering of powdered compacts in hydrogen atmosphere 07 p1049 A66-17901
 Coefficients of viscous and inertial resistance relation to porosity of refractory compounds 07 p1049 A66-17902
 Capillary impregnation for preparing poreless materials from titanium carbide and nichrome 08 p1238 A66-18896
 Effectiveness and heat transfer coefficients with transpiration of distilled water and air examined across porous plate 08 p1320 A66-19558
 Combustion process of isothermal quasi-stationary porous particle for Stokes streamline regime 08 p1321 A66-19773
 Cesium ion emission patterns obtained from rear-fed porous refractory metals, using thermal emission microscope [AIAA PAPER 66-220] 11 p1746 A66-23086
 Ionization characteristics of various porous metal ionizers and suitability for use in cesium contact thrusters [AIAA PAPER 66-218] 11 p1756 A66-23094
 Reflection and transmission of shock waves in porous acoustic absorbers 12 p1913 A66-23822
 Porous structures for ion engine application, discussing ionizer materials preparation, based on powder metallurgy and two-phase tungsten base alloy [AIAA PAPER 66-221] 12 p1896 A66-24528
 Porous blowing and suction for laminar boundary layer during free convection at vertical surface 13 p2209 A66-25319
 Functional mechanism of gas diffusion electrode 13 p1998 A66-25668
 Performance of porous gas diffusion electrode 13 p1999 A66-25669
 Performance of wetted porous electrodes with reactant feed by diffusion 13 p1999 A66-25672
 Operation of porous electrodes where reactant is fed in and reaction product is removed by forced stream of electrolyte, reactant and product mixture 13 p1999 A66-25673
 Capillary equilibrium in gaseous porous electrode 13 p1999 A66-25677

Compression and bending strength of porous materials prepared by sintering spherulized powder refractory compounds increased by addition of cobalt chloride 15 p2520 A66-28755
 Plane rotational motion of incompressible fluids in presence of homogeneous porous circular cylinder 15 p2481 A66-29856
 Sintering of porous products of refractory compounds 16 p2728 A66-31673
 Temperature and pressure distribution for fluid flow through porous matrix, noting chemical reaction, heat transfer, boundary layer flow, etc [AIAA PAPER 66-423] 17 p2910 A66-32752
 Durability of cutting tool alloys for producing porous cermet ball bearings, noting effect of pearlite in cermets 17 p2930 A66-32850
 Thermal conductivity of hydrogen at temperatures up to 4700 degrees F determined indirectly from effective conductivity of porous tungsten specimens filled with pressurized hydrogen 18 p3125 A66-34387
 Porosity zoning and matrix material effect on performance of self-cooled nozzle throat inserts 19 p3450 A66-35629

Fabrication techniques for preparation of ion emitter modules requiring high-temperature leak-free bond between porous tungsten ionizer and refractory metal plenum chamber 19 p3368 A66-36118
 Gaseous diffusion cells to remove carbon dioxide from spacecraft life support system, discussing construction material in terms of permeability coefficients substrate

porosity 19 p3293 A66-36236
 Heat conductivity coefficients of granular materials calculated by cylindrical and spherical models with porosity of 0.215 and 0.476 respectively 20 p3678 A66-37421
 Porous materials by sintering powdered carbides and borides of transition metals 20 p3586 A66-38139
 Shock propagation and attenuation in porous graphite and aluminum foams, noting effects of particle shape and size on materials response to shock loading 20 p3588 A66-38407
 Critical magnetic field and transition temperature measurements of superconducting indium in porous glass, using LF mutual inductance technique 21 p3796 A66-38549
 Highly porous chromium materials prepared by sintering of powdered compacts in hydrogen atmosphere 21 p3752 A66-39401
 Coefficients of viscous and inertial resistance relation to porosity of refractory compounds 21 p3752 A66-39402
 Gaseous dispersion in laminar flow through circular tube with mass transfer to retentive layer 22 p3900 A66-40411
 Powder metallurgy parameters that influence and affect performance and efficiency of porous tungsten ionizers, examining near-isostatic powder compaction technique 23 p4080 A66-41069
 Nuclear magnetic resonance techniques applied to nitrogen tetroxide for determining proton content, noting gas chromatograph with two stainless steel columns packed with porous glass 23 p4032 A66-41240
 Tungsten disilicide oxidative destruction, discussing porosity induced disintegration upon exposure to air 23 p4083 A66-41384
 Systematizing power compaction and energy compaction equations for porous materials, depending on functions and independent variable 23 p4075 A66-41821
 Porous materials prepared from carbides, borides and silicides of refractory metals by oxidation reduction method, with simultaneous sintering of resulting active particles 23 p4075 A66-41828
 Similarity solutions of boundary layer equations for blowing through porous surface, obtaining skin friction 24 p4194 A66-42541

POROUS PLATE

Simultaneous radiation, conduction and convection heat transfer for steady state conditions in one-dimensional spectrally selective, emitting and scattering porous bed [ASME PAPER 65-WA/HT-23] 05 p0789 A66-15642

Effect of initial flow turbulence on optimum suction of fluid from boundary layer of porous plate 06 p0872 A66-16468
 Decreasing secondary flows in spatial boundary layer on porous plate by boundary layer control /BLC/ through suction or blowing, using Prandtl partial differential equations 13 p2065 A66-26460
 Hydraulic resistance of air flow through porous steel plate 13 p2065 A66-26483
 Laminar air flow past porous plate through which fuel and oxidizer mixture is injected, deriving diffusion combustion processes that develop in laminar boundary layer 14 p2371 A66-28318
 Heat and mass transfer process in reacting boundary layer of compressible gas in laminar flow along semiinfinite porous plate 14 p2416 A66-28484
 Critical injection parameter on porous plate with turbulent boundary layer, noting conditions of neutralization reaction 16 p2684 A66-30324
 Simultaneous radiation, conduction and convection heat transfer for steady state conditions in one-dimensional spectrally selective, emitting and scattering porous bed [ASME PAPER 65-WA/HT-23] 16 p2828 A66-30990

Unsteady slip flow of electrically conducting viscous fluid over porous flat plate under transverse magnetic field 17 p2973 A66-32980
 Transient temperature response of transpiration-cooled porous matrix entering

planetary atmosphere with constant velocity and negative entry angle 21 p3821 A66-39455

POROUS WALL

Laminar flow through parallel and uniformly porous walls of different permeability 01 p0057 A66-10425

Laminar boundary layer of nitrogen flow over helium cooled sphere with porous wall 01 p0162 A66-10463

Laminar flow in two-dimensional channel with uniformly porous walls through which fluid is uniformly injected 05 p0662 A66-15057

Pressure response to forced oscillation of shallow cylindrical porous chamber [ASME PAPER 65-WA/FE-9] 05 p0780 A66-15730

Steady flow of incompressible viscous fluid through space between rotating coaxial cones with porous walls, calculating effect of injection and suction on radial flow 06 p0870 A66-16182

Externally pressurized nonrotating porous wall air lubricated journal bearing properties, taking into account surface roughness effects [ASLE PREPRINT 65AM 3A5] 07 p1039 A66-18286

Turbulent flow process in transpiration cooling through study of uniform fluid injection along porous tube [ASME PAPER 65-APM-29] 12 p1862 A66-23969

Differential equation derived for cooling of infinite porous tube by gas injection through wall, determining wall temperature distribution 16 p2827 A66-30674

Temperature and pressure distribution for fluid flow through porous walls of cylindrical and spherical bodies and sectors [AIAA PAPER 66-433] 16 p2829 A66-31489

Velocity measurements in turbulent incompressible boundary layer of porous wall with suction 17 p2913 A66-33167

Steady laminar flow of viscous incompressible fluid through two-dimensional channel with fluid sucked or injected with different velocities through uniformly porous parallel walls 21 p3730 A66-39461

Slow steady viscous flow through annulus between porous circular cylinders with uniform arbitrary injection and suction velocities, calculating wall porosity effect on velocity and pressure distributions 24 p4193 A66-42156

Counterflow diffusion flame in forward stagnation region of porous cylinder with uniformly ejecting fuel gas in analysis by flame sheet model and boundary layer approximation 24 p4294 A66-42542

Leak specifications for gas-filled electronic enclosures, discussing molecular, slow viscous, capillary and ordinary leak patterns 24 p4182 A66-42574

PORPHINE

Crystal structure of porphine determined by X-ray diffraction analysis 04 p0473 A66-13642

Porphine-like substances synthesis from irradiated mixture of pyrrole, benzaldehyde, pyridine and zinc acetate 17 p2851 A66-32092

PORPHYRIN

SA CHLOROPHYLL

SA HEMOGLOBIN

Crystal structure of porphine determined by X-ray diffraction analysis 04 p0473 A66-13642

Thermal degradation of mesoporphyrin, obtaining various alkylpyrroles and hydrocarbons, noting role of controlled pyrolysis as adjunct to mass spectrometry 15 p2446 A66-28865

PORPOISE

S DOLPHIN

POSITION

S SOLAR POSITION

POSITION ERROR

Evaluation of minimum-time courses for aircraft and inherent error 02 p0257 A66-12035

Position of satellite traveling along perpendicular bisector of line joining two fixed points determined by simultaneous observations with accuracy of one inch 03 p0366 A66-13196

Maximum accuracies of parameter estimates for complex signals reflected from

several points 06 p0837 A66-17191

Minimum dispersion of estimate of angular coordinate of target fluctuating in unison with pulse scanning radar 07 p1001 A66-17358

Serviceability and accuracy of Sperry C-12 compass system on Boeing 707-320C aircraft from June to October 07 p1065 A66-17673

Serviceability and accuracy of dual Doppler installation on Boeing 707-320C aircraft 07 p1065 A66-17674

Navigation and air traffic control environment, particularly extent to which lateral and longitudinal separations depend on accuracy of navigation 07 p1065 A66-17676

Effect of Doppler on navigation system accuracy during North Atlantic flights by Air Canada 07 p1065 A66-17677

Gross track-maintenance errors over North Atlantic and Northern Canada from survey of 1717 navigation logs and charts 07 p1066 A66-17678

Project Accordion data to provide information for decisions on horizontal separation standards and navigational accuracy 07 p1076 A66-17790

Accurate and economical determination of static system position errors in pressure altimetry systems by trail cone technique 07 p1034 A66-17792

Motion of orthogonal trihedron, determining accurately angular position in translational motion relative to coordinate system 08 p1249 A66-18878

Gyroscopes, accelerometers and error sources in inertial navigation systems 08 p1249 A66-19056

Error analysis in supersonic transport navigation system 08 p1249 A66-19057

Dynamic Navigation System /Dynav/ for providing aircraft velocity and position-fixing information from VLF Doppler range rates 08 p1252 A66-19507

Error damping procedures for gimballing inertial navigational systems 08 p1253 A66-19528

Height measurement from Doppler navigation, examining accuracy of pressure altimeter 09 p1381 A66-20429

Manual control sextant sighting performance for space navigation, using simulated and real celestial targets 10 p1554 A66-21894

Guidance by parabolic extrapolation of short-range missile toward pre-established target controlling it aerodynamically, noting finder, computer and navigational errors 11 p1734 A66-23500

ESG strapdown inertial navigation system based on double integration of acceleration and analysis of electronic gimballing-induced errors 13 p1214 A66-25653

Effect of Doppler on navigation system accuracy during North Atlantic flights by Air Canada 13 p1215 A66-25864

Aircraft navigational error parameters combined statistically and used to evaluate wander expected in transport aircraft operating in transoceanic environment 15 p2535 A66-29624

E5 low cost self-monitored inertial navigation system for civil aviation 17 p2955 A66-33218

Loran C receiving equipment using micro-circuits, noting error 17 p2955 A66-33220

Inertial navigation system reliability and effects of computer and chart display choice 17 p2955 A66-33222

Maximum accuracies of parameter estimates for complex signals reflected from several points 19 p3297 A66-35549

Optimum control theory applied to shipboard inertial navigation systems with position and azimuth errors because of gyroscope drift-rate fluctuations 20 p3595 A66-36873

Three-station range trilateration for establishing orbit of visible satellite used for calibrating ground tracking network 20 p3514 A66-37223

Observational data obtained in determinations of photographic positions of satellites, noting long wave vibrations of images role in position error 20 p3517 A66-37835

Electronic computation of position of artificial satellites observed photographically, noting processes leading to

elimination of erroneous input data 20 p3517 A66-37836

Influence of errors on geocentric position of satellite calculated in accordance with INTEROBS program 20 p3654 A66-37844

Safe separation standards estimation for analyzing long-range air traffic systems, emphasizing flying errors observation in operational conditions 21 p3760 A66-38452

POSITION INDICATOR

SA ALTIMETER

SA PLAN POSITION INDICATOR /PPI/

SA SEXTANT

SA SPACECRAFT POSITION INDICATOR

Satellite position prediction and display /SPAD/ naval equipment that will predict, display and determine selected satellites 02 p0215 A66-11699

Spectral differences measurement in group delay times of pulses useful for observation and location of storm foci 03 p0335 A66-12894

Real and theoretical accuracy of direction finding discussing phase, frequency and amplitude fluctuation of signal 04 p0544 A66-14412

Modification of Dectra position fixing service in North Atlantic 07 p1063 A66-17446

Eye control in relation to visual process, showing derivation of position information from pointing of eyeball 12 p1807 A66-23645

Low energy electron position detection with composite surface barrier type diode, noting design, fabrication and operation 12 p1879 A66-23705

Worldwide long-range navigation satellite /Navsat/, noting use with inexpensive black box, clear-air turbulence mapping and position definition in relation to high ground 20 p3598 A66-38259

POSITIONING

Positioning and aligning operations for Titan IIIC solid propellant rocket motors 14 p2271 A66-28421

POSITIONING EQUIPMENT

Stabilization and control of Saturn S-II engine actuation system and application to other hydraulic positioning servos, reducing position errors 01 p0015 A66-10669

Satellite navigation systems for marine and aircraft industry global, all-weather position determination and communications noting range measurement, range rate, NASA techniques, etc 02 p0260 A66-12237

MINEAC /new miniature electronic autocollimator/ and PEAC /photoelectric autocollimator/ 04 p0520 A66-13899

Improved resolution of scanning electron microscope used to define geometry of electrode areas during fabrication of solid state devices 06 p0855 A66-16769

Data converter system for conditioning, recovery and display of aircraft position and altitude data permitting real time surveillance by ground observer 16 p2651 A66-30564

Factors affecting determination of selenographic latitude and longitude by astronaut landed on Moon, defining selenocentric system and lunar prime meridian 17 p3001 A66-32344

Star tracking tests to achieve accurate stellar sensor positioning prior to missile launching, considering calibration of critical hardware 18 p3132 A66-34045

Linear drive pedestal for improved antenna positioning 18 p3055 A66-34304

Navigation satellite system providing precise position information of aircraft, noting flight tests 19 p3396 A66-35516

POSITIVE BAND

Radiative lifetime and emission intensity measurements, determining oscillator strength and electron transition moment of first positive band system of nitrogen 23 p4033 A66-42082

POSITIVE FEEDBACK

S REGENERATION

POSITRON

Positron scattering by atomic hydrogen for various incident energies 02 p0262 A66-11476

Positron-helium scattering below positronium threshold, using adiabatic method previously tested in positron hydrogen scattering, presenting phase shifts and momentum transfer cross section computations 13 p2134 A66-26262

Intensity and spectra of cosmic ray

electrons and positrons in determining mean confinement time, density and solar modulation 20 p3630 A66-3703

Artificial radiation belt sources, noting positrons and alpha particles, nuclear explosion, etc 20 p3643 A66-38338

Polarization measurements of cosmic ray muons by detection of positrons from muon-to-positron decay 24 p4271 A66-42937

POSITRON ANNIHILATION

Angular distribution of annihilation gamma quanta in CdS single crystals of high and low resistivity 06 p0928 A66-16921

Angular correlation of photons measured for positrons annihilating in normal and superconducting lead without observing any effect on Fermi surface 07 p1109 A66-18440

Positron annihilation of single oriented crystals of vanadium silicide, measuring angular correlation between gamma rays for calculation of Fermi surface 09 p1419 A66-20046

POSITRONIUM

Three quantum decay of super 1S sub zero state positronium determined via measurement of three quantum coincidence events in Al and oxygen with energy sum of 1.02 Mev 16 p2750 A66-30132

Ambipolar sources of positronium, protonium and muonium radiation, theorizing that quasars may be ambipolar plasmas containing admixtures of matter and antimatter 24 p4280 A66-43027

POSTURE

S ORTHOSTATIC TOLERANCE

POTABLE WATER

Feasibility of using water condensates recovered from heat exchangers of pressure suits as emergency drinking water source 19 p3294 A66-36379

POTASSIUM

SA LIQUID POTASSIUM

Potassium content and K-A ages of 18 amphoteric chondrites determined from isotope dilution 04 p0580 A66-14486

Electron mobility in potassium and cesium DC glow discharges at low electron temperature 05 p0728 A66-15809

Pool boiling potassium, discussing heat flux behavior, experimental setup and results for burnout heat flux 07 p1152 A66-17593

Induced electric conductivity in germanium bombarded by potassium ion in different crystallographic directions 07 p1104 A66-18363

Frequency shift in resonance transition induced in potassium vapor by ruby laser pulse 13 p2089 A66-25103

Motion of slow positive potassium and nitrogen ions in nitrogen, measuring mobility and diffusion coefficients with apparatus whose characteristics are given 14 p2345 A66-28139

Motion of potassium ions in argon, using apparatus for simultaneous measurement of mobility and diffusion coefficients 14 p2345 A66-28140

Frequency shift in resonance transition induced in potassium vapor by ruby laser pulse 16 p2717 A66-30282

Electric conductivity parameters for plasma gap formed by discharge in argon and potassium mixture in electric-arc heater 16 p2766 A66-31601

High temperature diffusion of potassium in single crystal and polycrystalline molybdenum 17 p2940 A66-33230

Resonant birefringence in potassium vapor under influence of electric field of ruby laser emission 19 p3375 A66-36066

Refractory niobium alloy corrosion tests in potassium liquid at 2000 to 2200 degrees F 19 p3383 A66-36137

Kjeldaa absorption edge in cryogenic potassium for shear magnetoacoustic wave propagation in spherical metallic Fermi surface with spin density wave ground state 21 p3800 A66-38991

Conductivity of potassium-seeded argon plasma, assuming variable collision cross sections and Maxwellian distribution for electrons 22 p3951 A66-40363

Diffusion in potassium plasma in presence of universal instability, examining dependence of diffusion coefficient on magnetic field for given density range 23 p4106 A66-41708

Potassium Rankine-cycle space power plant

design for four turbine inlet temperature levels, noting construction materials 23 p4023 A66-41765

POTASSIUM BROMIDE

Epitaxial growth configurations of single-crystal potassium bromide on sodium chloride, using gold decoration method, showing effect of crystal orientation on growth rate 16 p2780 A66-31213

POTASSIUM CHLORIDE

Absorption spectrum sidebands for quasi-local oscillation in KCl-H crystals 05 p0730 A66-14648

Plastic deformation effect on heat conduction of crystal lattice of sodium and potassium chlorides single crystals 10 p1587 A66-22148

IR absorption spectrum of local H-ion oscillations in KCl crystals doped with Na, Rb, Cs, I, Br and F 10 p1588 A66-22158

Absorption spectrum sidebands for quasi-local oscillation in KCl-H crystals 13 p2167 A66-25923

Conduction band structure of KCl calculated by overlapping-plane-wave method 18 p3156 A66-34470

Plastic deformation effect on heat conduction of crystal lattice of sodium and potassium chlorides single crystals 19 p3440 A66-35762

IR absorption spectrum of local H-ion oscillations in KCl crystals doped with Na, Rb, Cs, I, Br and F 19 p3440 A66-35772

POTASSIUM CHROMATE

Raman effect in solutions and in potassium dichromate crystals studied, using helium-neon laser generated exciting line 20 p3580 A66-37824

POTASSIUM COMPOUND

Animal and human test of manned spacecraft life support system consisting of closed system with recirculating air loop, examining potassium superoxide-potassium hydroxide chemistry 02 p0183 A66-11492

Optical range parametric amplification, describing power output experiment with glass-laser-excited potassium dihydrogen phosphate crystal 05 p0697 A66-15352

HF optical modulator using Pockel effect in ammonium and potassium dihydrophosphate single crystals 06 p0889 A66-15899

Optical range parametric amplification, describing power output experiment with glass-laser-excited potassium dihydrogen phosphate crystal 09 p1387 A66-20893

Optical absorption and photoemission of cubic potassium antimonide 10 p1576 A66-21548

Electron temperatures in hot argon-potassium discharges determined, using ratio of electron energy slopes from floating double-probe curve 10 p1568 A66-21880

Neodymium doped YAG crystal and lithium meta niobate as CW laser materials and potassium tantalum niobate as optical modulator material 13 p2164 A66-25518

Inverted susceptibility, inversion ratio, line widths and spin-lattice relaxation times for maser operation point in chromium-doped cobalt potassium cyanate 16 p2718 A66-30934

Ignition and combustion mechanism of liquid propellant consisting of aliphatic alcohols and mixed acid, using calcium and potassium permanganates as catalysts 17 p2989 A66-32458

Three-dimensional X-ray diffraction data to determine structure of crystal of potassium barium hexanitrocobaltate, discussing Jahn-Teller effect 17 p2871 A66-33489

Potassium tantalum niobate crystal growth noting methods applied, potassium oxide evaporation and tantalum absorption rate 23 p4115 A66-41773

POTASSIUM NITRATE

Electrochemical oxidation of p-n junctions on silicon surface in potassium nitrate solution in ethylene glycol, noting electric current 03 p0413 A66-13203

Dielectric properties and lattice parameter dependence on temperature from X-ray studies of rubidium-potassium nitrate mixed crystals 08 p1269 A66-19008

Combustion of solid rocket propellants, using potassium nitrate as oxidizer and phenol formaldehyde as fuel 08 p1319 A66-19201

POTASSIUM PHOSPHATE

Dielectric measurements and optical observation of potassium dihydrogen phosphate /KDP/ crystal 14 p2367 A66-27945

Ruby laser-induced effect of pulsed pressure on KDP crystal surface and thermal bulk effect on excitation of ultrasonic oscillation in crystal 22 p3932 A66-40318

POTASSIUM 40

Relative isotopic abundance of potassium 40 in terrestrial and meteoritic samples 11 p1770 A66-22572

Potential energy curves for bound states of diatomic molecules from spectroscopic constants, using Rydberg-Klein-Rees method 01 p0108 A66-10600

Input initiation energy and potential impact energies available under processing conditions, interpreting test data 05 p0787 A66-15138

Potential curves and spectrum absorption of nitrogen, redetermining spectroscopic constants 05 p0763 A66-15285

Atmospheric energetics during January-February 1963 stratospheric warming investigated, using spectral energy equations for zonal and eddy kinetic and potential energies 07 p1027 A66-17360

Potential fluctuation effect on electron paramagnetic resonance lines in compensated n-type semiconductor 10 p1587 A66-22151

Upper estimate of potential elastic energy of cylinder, using concept of permissible surface forces and boundary conditions 11 p1783 A66-22894

Shock compression of liquid argon at very high pressures and temperatures by reflecting shock wave from tungsten wall for testing interatomic potential 11 p1694 A66-23210

Kinematic computer calculations of energy distribution among products of repulsive, mixed and attractive energy release exothermic reactions 11 p1787 A66-23213

Tri-halogen nitro-methane valence force field and vibrational spectrum, noting sensitivity of potential energy to structural variations, molecular geometry, symmetry, etc 12 p1811 A66-23622

Potential energy surfaces on triatomic hydrogen molecule ion computed with generalized Gaussian orbitals 13 p2130 A66-25371

Quantum mechanical potential energy curve of lowest normal state of diatomic helium computed in valence bond scheme, using 17-term wave function of Slater orbitals 16 p2749 A66-30112

Brittle materials failure theory for cases where presence of plane deformation or plane stressed state is assumed, using Griffith theory 16 p2822 A66-31510

Extrema-effect in total elastic molecular beam scattering cross sections for characterizing potential well 17 p2961 A66-32860

Retarding potential measurement of kinetic energy of electrons released in Penning ionization by excited helium atoms in metastable electron states 18 p3139 A66-34505

Mass-energy relationship in gravitation, correlating Newton and Einstein concepts via acceptance of positive and negative masses and energies 18 p3136 A66-34633

Potential energy in gravitational field, considering relativistic concept of negative mass, two-body motion and gravity effects on atomic nucleus 18 p3136 A66-34722

Lennard-Jones potential application to properties of simple gases, noting values of second and third virial coefficients,

molecular interaction, collision integrals, etc 18 p3140 A66-34926

Potential fluctuation effect on electron paramagnetic resonance lines in compensated n-type semiconductor 19 p3440 A66-35765

Elastic stress field due to spherical inclusion or cavity in infinite exterior region, deriving potential energy dependent on strains, noting skin effects and stress concentration factor 19 p3474 A66-36427

Curves of attractive potential energy in diatomic molecules, noting calculations for Li-Li interactions in power series form 21 p3775 A66-39074

High temperature rate constants for H-atom transfers involving light atoms evaluated, using hard sphere collision theory 22 p3950 A66-39924

Spectral representation for potentially perturbed wave equation 23 p4041 A66-41876

Potential energy and conservativeness of normal pressure field acting on flat plates 23 p4141 A66-41926

Monte Carlo analysis of plasma of heavy ions, obtaining thermodynamic properties, potential energy and pair distribution 24 p4245 A66-43036

POTENTIAL FIELD

Semiconductor devices at high injection levels, discussing electric fields and potential distribution in multilayer structures 04 p0495 A66-13769

Existence and uniqueness of optimum algorithms proven for application to transformation of potential fields 06 p0875 A66-16133

Reducing values of potential magnetic or gravitational field observed on Earth surface with weak profile to values on single horizontal plane in lower half-space 06 p0876 A66-16417

Potential distribution, field intensity and carrier concentration in space charge region under direct bias 06 p0940 A66-17188

Potential distribution in epitaxial p-n semiconductor measured via moving light spot, determining deposition depth 07 p1106 A66-18382

Position of singularities of analytic continuation of potential /geophysical/ fields 09 p1373 A66-20480

Separation formulas of potential fields of constant currents into lower half-space with application to geomagnetic field 09 p1373 A66-20481

Capacitive probe measurements of potential fluctuation in current-oscillating CdS crystals under ultrasonic amplification conditions at room temperature 12 p1931 A66-24812

Quasi-stationary distributions of potential in one-dimensional ion-electron currents near emitting surface, noting unstable regimes regarding slow variations in boundary conditions 14 p2338 A66-26772

Potential equations in homogeneous isotropic moving media derived, using Minkowski theory 14 p2340 A66-27040

Existence and uniqueness of optimum algorithms proven for application to transformation of potential fields 15 p2483 A66-28667

Potential difference across type II superconductor in intermediate state attributed to fields produced by quantized flux lines moving through material 16 p2768 A66-30129

Conduction mechanism in discontinuous metal films involving image forces, potential barrier, activation energies, saturation effect in conductivity, etc 16 p2783 A66-31427

Permanent rotational stability of solid body with fixed point acted upon by potential force field at four points 16 p2749 A66-31522

Stability of permanent rotations of solid body with fixed point in potential force field 16 p2749 A66-31523

Position of singularities of analytic continuation of potential /geophysical/ fields 19 p3345 A66-35498

Separation formulas of potential fields of constant currents into lower half-space with application to geomagnetic field 19 p3346 A66-35499

Potential distribution, field intensity and carrier concentration in space charge region under direct bias 19 p3439 A66-35546

Commutation relations obtained from commutation operator applied to potential and field intensity 21 p3732 A66-38662

Field intensities and electron distribution functions in hollow cathode, graphs show potential distribution along cathode axis 22 p3953 A66-39758

Vector potential function solution to Maxwell-Minkowski equations describing cut-off phenomena for EM wave propagation in wave guide filled with homogeneous isotropic lossless moving medium 22 p3862 A66-39783

Electrostatic probe in collisionless plasma wherein sheath joins region of ambipolar diffusion 23 p4104 A66-41494

POTENTIAL FLOW

SA CARTAN SPACE

Tandem interference effects of supercavitating struts within framework of two-dimensional inviscid irrotational and linearized hydrodynamic theory 01 p0057 A66-10443

Steady state irrotational flow of perfect gas in plane and axisymmetric Laval nozzles 01 p0008 A66-11015

Unsteady forces in turbomachines are due to circulation effect, blade thickness effect, wake effect and wake distortion effect [ASME PAPER 64-WA/GTP-3]

02 p0176 A66-11763

German book on theoretical fluid dynamics covering potential flow of ideal fluids and gases, viscous fluids, boundary layer theory, hydrodynamic stability and turbulent flow 05 p0662 A66-15085

Source flow in analog solution using finite size electrode, noting potential error [ASME PAPER 65-WA/FE-6]

05 p0665 A66-15716

Scalar formulation of ideal charged adiabatic gas flow in presence of gravitational and electromagnetic fields 10 p1524 A66-21814

Stability of vortex-free incompressible fluid flow 11 p1694 A66-23331

MHD flow patterns 12 p1920 A66-23955

Two-dimensional potential flow of polytropic gas with stationary streamlines 12 p1862 A66-24007

Source flow in analog solution using finite size electrode, noting potential error [ASME PAPER 65-WA/FE-6]

12 p1864 A66-24545

Legendre transformation and characteristics of MGD potential equation 13 p2142 A66-25708

Potential flow past plate below free surface at high speed 13 p2067 A66-26537

Electrical analog method used in determining potential gas flow past airfoil lattice, noting components of solution 13 p2068 A66-26541

Potential stabilized two-component supersonic flow of thin body and surface form for given pressure distribution and component separation 13 p1994 A66-26765

Correlations between Lennard-Jones potential parameters and critical and boiling point constants of 28 nonpolar and 17 polar gases 15 p2618 A66-29718

Complex flow-perturbing potential for Joukowski profile in incompressible fluid with parabolic velocity distribution, using Jacob first order approximation to solve Dirichlet problem 16 p2627 A66-30211

Linearized unsteady supersonic potential flow theory formulation of boundary value problem of aerodynamic forces on oscillating cylinder and comparison with two-dimensional quasi-steady and slender body approximations 16 p2628 A66-30259

Airfoil shape construction by conformal mapping and development of analog computer program to plot two-dimensional potential flow about various airfoil sections 16 p2629 A66-31116

Instability of nonlinear stationary oscillations of potential in electron-ion flows useful in distribution functions of ions and electrons 16 p2754 A66-31174

Two-dimensional MHD flow of inviscid incompressible conducting neutral fluid about an insulating cylinder with uniform applied magnetic field 17 p2968 A66-32469

Linearized three-dimensional potential flow equations for response of liquids in

cylindrical containers to slightly off-axis acceleration 17 p2916 A66-33477

Performance of two-dimensional curtain jets of air cushion vehicles based on incompressible flow theory, noting stability criteria 22 p3844 A66-40499

Linearized potential theory for forced vibration of continuous self-exciting plate on hinged support in supersonic flow, investigating parametric resonance frequencies relation to coupling of eigenfunctions 22 p3995 A66-40508

Aerodynamic problem of steady potential flow and added mass in unsteady motion of idealized hemispherical parachute 22 p3845 A66-40591

Lighthill integral transform methods in hodograph transformation theory of plane compressible transonic shock-free potential flows around airfoil sections in solution space of Chaplygin equation [ICAS PAPER 66-26] 23 p4007 A66-41008

POTENTIAL GRADIENT

Cylindrically symmetric tension field covering strain gradient effects on potential energy of elastic body [ASME PAPER 65-WA/APM-14]

05 p0777 A66-15436

Gradient instability of galvanomagnetic and galvanomagnetoacoustic waves in electrical fields 10 p1587 A66-22156

Field effect theory in semiconductors with capture centers, noting basic equation, quadrature expressions, etc 11 p1751 A66-22732

Cylindrically symmetric tension field, covering strain gradient effects on potential energy of elastic body [ASME PAPER 65-WA/APM-14]

12 p1960 A66-23974

Radiation characteristics of vertical dipole in warm plasma, expressing vector potential functions in Fourier integrals 14 p2240 A66-27916

Plasma probe for dense isothermal cesium plasma, noting electron concentration and temperatures, potential distribution, etc 16 p2756 A66-30102

Lattice distortions and field gradients in alkali halide solutions, noting discrepancy in calculation of electric field gradients 16 p2775 A66-30731

Gradient instability of galvanomagnetic and galvanomagnetoacoustic waves in electrical fields 19 p3440 A66-35770

Field effect theory in semiconductors with capture centers, noting basic equation, quadrature expressions, etc 23 p4113 A66-41470

POTENTIAL PROBLEM

Hydrostatic problem of calculating potential on surface of nonconfocal ellipsoid from potential of simple layer on similar ellipsoid 01 p0056 A66-10309

Potential and elasticity theories for solving basic problems for hollow and compound regions 01 p0153 A66-10466

External DC field of long solenoid noting infinite and finite solenoid solutions 03 p0341 A66-12607

Three-dimensional linear elasticity problems in homogeneous transversely isotropic elastic materials like infinite circular cylinder, using potential function method [ASME PAPER 65-WA/APM-26]

05 p0778 A66-15447

State variable selection for equilibrium equations of nonlinear RLC network from potential function analysis 09 p1360 A66-19913

Potential analog synthesis of linear arrays and radiation pattern representation as function of single complex variable 09 p1356 A66-20605

Superconducting film stability under current, noting metastable state near transition point via potential analysis 12 p1930 A66-24787

Theorems associated with surface parabolic potentials 13 p2116 A66-25334

Vector potential representation of planar logarithmic spiral antenna field 14 p2259 A66-28159

Three-dimensional linear elasticity problems in homogeneous transversely isotropic elastic materials like infinite circular cylinder, using potential function

- method
[ASME PAPER 65-WA/APM-26] 18 p3248 A66-33582
- Stability of flexible conductor in longitudinal magnetic field, using scalar potential to determine disturbed state 18 p3152 A66-35081
- Theorems associated with surface parabolic potentials 19 p3390 A66-36195
- Quantitative multivariate statistical analysis of average evoked potentials and application to visual stimulus intensity and duration 20 p3589 A66-37050
- Statistical mechanical predictions of second virial, adiabatic Joule-Thomson, viscosity and diffusion coefficients for intermolecular potential functions 20 p3678 A66-37313
- Continuum mechanical Cartesian tensor analysis theorem on completeness of Beltrami stress function 23 p4139 A66-41544
- ### POTENTIAL THEORY
- Heat potential theories applied to boundary value problem for heat conduction equation 01 p0180 A66-10167
- Solving potentialities of third vertical derivative method for gravity potential 01 p0061 A66-10690
- General properties of periodic orbits in given potential field related to invariant curves in four-dimensional phase space 02 p0291 A66-12185
- Rate of decrease of coefficients in expansion of potential of body of revolution into series of spherical functions 06 p0909 A66-16425
- Monograph on potential methods in theory of elasticity, basing boundary value solution on theory of singular integral equations 09 p1466 A66-20332
- Generalized axially symmetric potentials and stream functions, solid harmonic representations and basic identities 10 p1549 A66-21302
- Potential sweep method for organic and adsorption analyses, showing relation between galvanostatic and fast potential sweep transients, noting mathematical analysis of current-potential transients 12 p1812 A66-25000
- Poincare series using symplectic matrix, showing that automorphic functions derived always exhibit smooth convergence 13 p2116 A66-25082
- Potential profile around negatively biased spherical and cylindrical ion probes in collisionless plasma computed numerically 13 p2142 A66-25707
- Freezing potential for ammonia and sodium chloride solution at constant freezing rates, noting stationary nature of potential under stationary conditions 13 p2121 A66-26124
- Shell with positive curvature and zero moment state examined, determining sufficient condition for secondary potential load 13 p2203 A66-26420
- Position, number and type of potential scattering amplitude as function of complex momentum transfer 14 p2330 A66-27018
- Solving potentialities of third vertical derivative method for gravity potential 14 p2286 A66-28034
- Superpotentials in relativity theory, noting use of Freud identities and finite coordinate transformations 15 p2542 A66-29654
- Certain incorrect Dirichlet and Cauchy problems of potential theory for elliptic and parabolic equations 16 p2733 A66-30744
- Adiabatic invariants and third integrals of motion in periodic potentials in periodically time-dependent Hamiltonian systems of n degrees of freedom 17 p2945 A66-32292
- Surface characteristics of semiconductors with intrinsic conductivity, determining potential distribution electric field, carrier concentrations, etc 17 p2984 A66-33146
- Geoid undulation steady at density discontinuity surface whereas gradient shows instability 18 p3105 A66-34098
- Electric field in MHD channels in presence of near-electrode potential drop 19 p3433 A66-36828
- Solvability and methods of solution of boundary value problems noting uniqueness, potential theory application in solving polyharmonic equations and second-order equation 20 p3591 A66-37757
- Potential functions of molecules and intramolecular forces with redundant coordinates 21 p3775 A66-38801
- Linear flow equation motion of fluid with suspended impurities, noting that under certain assumptions velocity fields can be described by family of potential functions 21 p3729 A66-39448
- Free-atomic pseudopotentials, sizes, s-p splittings and pseudowave functions 22 p3951 A66-40910
- ### POTENTIOMETER
- Phase shifter which includes ring potentiometer and passive network, noting possible frequency division application 01 p0043 A66-10878
- Computation of values for resistances shunting sections of tapped potentiometers from data using two alternative digital computer programs 02 p0200 A66-11884
- Microelectronics and results achieved in relays, switches, variable capacitors and potentiometers 02 p0205 A66-11943
- Various types of acceleration-sensitive transducers such as piezoelectric crystal, potentiometer, strain gauge, variable reluctance and servo force-balance accelerometer 04 p0520 A66-13900
- Automatic potentiometer for recording data of cosmic ray intensity obtained by neutron monitor 06 p0881 A66-16603
- Discrete simulation technique using electrical circuit for finite-difference approximation of initial differential equations, noting functional potentiometers 07 p1055 A66-17201
- Design and operation of contactless photopotentiometer 09 p1382 A66-20819
- Precision DC potentiometer microwave test set for coaxial or waveguide insertion loss measurement 12 p1843 A66-24673
- Hot wire electron emissive probes for potential measurements in quiescent plasmas, noting plasma densities, emission levels, etc 13 p2154 A66-26554
- Money-saving technique to speed up potentiometer in control systems 14 p2267 A66-27804
- Potentiometric type pressure transducer optimization for low static error band 16 p2704 A66-30538
- Precision DC potentiometer test for measuring microwave coaxial or waveguide insertion loss 24 p4182 A66-42577
- ### POTENTIOMETRY
- #### SA ELECTRIC CURRENT
- Semiautomatic potentiometer measurement of nitrogen specific heat at small intervals, noting applicability of logarithmic law for other temperature ranges 16 p2829 A66-31168
- Derivative chronopotentiometry approach to measurement of transition times and study of electrode process 18 p3064 A66-34457
- ### POTTING COMPOUND
- Explosive hazard of gases generated by transformer potting materials of styrene-polyester copolymer, epoxy resin and polyimide resin when subjected to overloads 02 p0247 A66-11286
- ### POWDER
- Low velocity detonation in powder explosives 17 p3036 A66-32829
- Thermal conductivity of gas-charged cryogenic powder 20 p3675 A66-37067
- ### POWDER METALLURGY
- #### SA SINTERING
- Properties of spherical powders of metal carbide and boride compounds and preparation by granulating and sintering techniques 01 p0087 A66-10742
- Vibration compaction of two-component spherical copper powders, noting effects of frequency amplitude and particle sizes 01 p0087 A66-10744
- High temperature dilatometer for shrinkage measurements in sintering of powdered metal compacts 01 p0069 A66-10748
- Powdered or densified nonconductive ceramic materials analyzed by spark source mass spectrography based on use of conducting probe 02 p0188 A66-11294
- Effect of nonuniform distribution of number of pores in cross sections of metal specimens on strength characteristics 02 p0246 A66-12274
- Densification rates for tungsten powder compacts sintered in hydrogen/bromine atmospheres compared with those sintered in hydrogen alone at high temperatures 03 p0385 A66-13207
- Molybdenum machine parts produced by plasma powdering process, noting improvement due to annealing 04 p0525 A66-13434
- Low temperature arc plasma, formed in plasmatron by passing plasma-forming gas through electric arc, applied to powder metallurgy 06 p0887 A66-16695
- Highly porous chromium materials prepared by sintering of powdered compacts in hydrogen atmosphere 07 p1049 A66-17901
- Graphite protection against high-temperature oxidation by making composites with high-resistant metal powders 07 p1055 A66-18505
- Powder metallurgy of beryllium, discussing manufacturing, compacting and sintering 08 p1237 A66-18840
- Relationship between friability of powders and rolling speed in powder rolling, using suspension-system hoppers and smooth rollers 08 p1231 A66-18901
- Powder metallurgy development of sintered alloys of magnesium with MgO and magnesium-beryllium alloys with high oxidation resistance 10 p1544 A66-21200
- Changes in fine structure of powdered copper during compression, determining dislocation density and disorientation angles, noting plastic deformation cause as packing defect occurrence 10 p1546 A66-21505
- Machine parts of complicated form manufactured from powdered materials by vibrational compacting 10 p1540 A66-21506
- New parameter, dimensionless fraction of particle volume irreversibly dislocated by plastic deformation during compression, permits calculation of powder compression process and constants 10 p1540 A66-21507
- Glass as component of metal-based materials in powder metallurgy noting properties, interaction of molten glass with metals, etc 10 p1548 A66-21510
- Nickel-based superalloy Inconel 713C easily forged when made by powder metallurgy methods but not when prepared by casting 11 p1715 A66-22536
- Book on refractory metals and cemented carbides /hard metals/, discussing pressing and sintering techniques, testing methods, properties under stress, etc 12 p1893 A66-23739
- Chemical milling of columbium reentry vehicle skin panels using powdered metallurgy, vacuum processing, refractory alloy sheet rolling and electron beam welding [ASTME PREPRINT MR66-712] 12 p1886 A66-24417
- Porous structures for ion engine application, discussing ionizer materials preparation, based on powder metallurgy and two-phase tungsten base alloy [AIAA PAPER 66-221] 12 p1896 A66-24528
- Explosive compaction of ceramic materials 12 p1900 A66-24720
- Aluminum oxide inclusions effect on radioactive cobalt 60 autodiffusion observed, noting higher diffusion in samples prepared by powder methods 13 p2110 A66-25964
- Conductivity of compressed powdered refractory compounds found to be exponential function of ratio between material/compact densities 15 p2520 A66-28749
- Surface and internal structural formation mechanism of metallic contact from plastic deformation of SAP type alloys under compression 15 p2520 A66-28750
- Carbide-graphite skeleton materials prepared by sintering compressed graphite powder during thermochemical treatment with carbide-forming elements 15 p2524 A66-28751
- Structural, physical and mechanical properties of hard alloys formed by sintering powdered VK 15 tungsten cobalt alloy with nonuniformly distributed carbide phase 15 p2520 A66-28753
- Compression and bending strength of porous materials prepared by sintering spheroidized powder refractory compounds increased by addition of cobalt chloride 15 p2520 A66-28755
- Laboratory press for high temperatures and pressures analyses of hard material

powders, noting carbon dies and measurements of densification vs time 16 p2673 A66-30254

Powder metallurgy methods for obtaining products of complex form from sintered carbides 16 p2715 A66-31679

Tantalum and niobium powder properties effect on plastic characteristics of compacted samples, noting ductility and tensile strength dependence on particle size and chemical composition 17 p2939 A66-32391

Ti-N-Mo cermet production by hot pressing and microstructure and phase composition, noting Ti-N production method 17 p2939 A66-32392

Hardness and microstructure of sintered alloys of molybdenum with oxides of aluminum and zirconium obtained by powder metallurgy methods 17 p2939 A66-32394

Heat resistance in air of dispersion hardened nickel alloys containing certain oxides prepared by powder metallurgy methods 18 p3123 A66-33785

Properties of spherical powders of metal carbide and boride compounds and preparation by granulating and sintering techniques 18 p3124 A66-34979

Vacuum arc cast molybdenum ingots prepared using powder treated in palladium diffused hydrogen and transferred to furnace without air exposure, noting test results 19 p3386 A66-36282

Physical and mechanical properties of cermets obtained by sintering powdered iron at high temperatures under dynamic impact compression 20 p3583 A66-37413

Aluminide-ductile binder composite alloys containing high volume of nickel-aluminum compounds and CoAl prepared by powder blending and hot extrusion 20 p3585 A66-37783

Molybdenum machine parts produced by plasma powdering process, noting improvement due to annealing 20 p3575 A66-38136

Highly porous chromium materials prepared by sintering of powdered compacts in hydrogen atmosphere 21 p3752 A66-39401

Cleaning and stabilization method for dispersion strengthened materials produced from mechanically produced blends of metals plus oxide powders 22 p3935 A66-40117

Alloy additions of Zr, Ta, Nb, Re, Mo and Hf tendency to interact with thorium oxide particles in tungsten base alloys during exposure to greater than 2000 degrees C 23 p4079 A66-41067

Powder metallurgy parameters that influence and affect performance and efficiency of porous tungsten ionizers, examining near-isostatic powder compaction technique 23 p4080 A66-41069

Changes in fine structure of powdered copper during compression, determining dislocation density and disorientation angles, noting plastic deformation cause as packing defect occurrence 23 p4081 A66-41526

Machine parts of complicated form manufactured from powdered materials by vibrational compacting 23 p4073 A66-41527

POWDERED ALUMINUM

Heat transfer at low temperatures, discussing thermal conduction parameters of powdered alumina in helium gas 06 p0969 A66-16282

Photosedimentometer for recording light absorption along entire length of cuvette containing highly dispersed metal powder suspension 11 p1709 A66-23474

Aluminum particle combustion noting changes from preignition to burnout, flame structure, particle geometry, etc 18 p3266 A66-35021

Starting concentration, surface distribution of additive in alumina powder, trajectory distance and growth rate in Verneuil growth of ruby crystals 21 p3795 A66-38527

POWDERED METAL

Specific surface of fine nickel and tungsten powders determined by adsorption of Congo red 01 p0087 A66-10743

Sintered Kh20N80 nichrome powder properties and preparation by simultaneous reduction of chromium and nickel oxides 01 p0087 A66-10746

Surface roughness of metallic powder particles determined by light scattering,

considering iron particles 01 p0069 A66-10747

Spontaneous combustion and pyrophoric properties of some powder materials at high temperature 02 p0305 A66-12276

Effect of varying percentages of constituent elements in alumina dispersion-strengthened copper-nickel alloys, listing creep rupture properties 04 p0534 A66-13378

Porous materials by sintering powdered carbides and borides of transition metals 04 p0535 A66-13437

Spontaneous ignition of zirconium and titanium powders and alloys, noting oxygen diffusion into oxide film and film dissolution 07 p1049 A66-17906

Metal powder behavior during dynamic and static pressing by energy release of high explosives 07 p1038 A66-18160

Beryllium powder forging, working temperatures and use of steel cans 08 p1230 A66-18844

Plasma atomization of molybdenum, discussing variable process parameter effects on size grading of spherical powdered molybdenum 08 p1238 A66-18895

Measured thermal conductivities of magnesium oxide, aluminum oxide and zirconium oxide powders 10 p1546 A66-21538

Theoretical expression for thermal conductivities of magnesium oxide, aluminum oxide and zirconium oxide powder 10 p1546 A66-21539

Ignition temperatures of powdered metals in simulated atmospheres of Venus and Mars suggest potential chemical energy sources 11 p1786 A66-22458

Survey and updating properties available in commercial sintered metals, relating them to engineering design requirements 11 p1716 A66-22538

Powder metal bearings manufacture noting shapes, sizes, tolerances, materials, design, installation, etc 12 p1885 A66-24100

Light output of shock wave interacting with metallic powder in oxidizing atmosphere 13 p2016 A66-25058

Sigmoid oxidation of powdered tungsten at moderate temperature and low oxidation temperature 13 p2106 A66-25357

Electric conductance and capacity of pressed chemically-purified manganese dioxide powder at various temperatures 16 p2781 A66-31340

Oxidation of powdered titanium, zirconium, hafnium, vanadium, niobium and tantalum 16 p2724 A66-31355

Compactibility of iron, stainless steel and titanium powder of various dispersity and bulk density 17 p2940 A66-32847

Specific surface of fine nickel and tungsten powders determined by adsorption of Congo red 18 p3124 A66-34980

Sintered Kh20N80 nichrome powder properties and preparation by simultaneous reduction of chromium and nickel oxides 18 p3124 A66-34982

Powder iron compact properties evaluated by sonic tests, noting elastic modulus dependence on porosity 19 p3376 A66-35328

Fine particle size pure tungsten and thoriated tungsten powder produced by hot pressing in graphite dies at temperatures from 1500 to 1800 degrees C 19 p3382 A66-36120

Permeability of porous sintered tungsten depends on density of specimen and particle size of tungsten powder 19 p3382 A66-36121

Porous materials by sintering powdered carbides and borides of transition metals 20 p3586 A66-38139

Mixing and separation processes of metal powders 21 p3750 A66-38816

Spontaneous ignition of zirconium and titanium powders and alloys, noting oxygen diffusion into oxide film and film dissolution 21 p3752 A66-39406

Fiber composites construction from infiltrated powder compacts 23 p4080 A66-41068

POWER CONVERSION

SA ELECTRIC POWER CONVERSION

SA NUCLEAR POWER CONVERSION

SA TURBOELECTRIC CONVERSION

Western Electronic Show and Convention, San Francisco, August 1965, Part 3, Power electronics 02 p0179 A66-11276

Optimum power conditioning system and electronic circuitry for maximum efficiency and reliability, lowest weight and other performance factors in space-vehicle design 02 p0179 A66-11280

General approach to design of miniaturized power converters and regulators up to 100 kc 02 p0180 A66-11282

Reliability and design factors for space power conditioning equipment examining peak power, component part specifications, integrated circuits and failure analysis 02 p0180 A66-11283

Optimization of design of fossil-fueled thermionic generators using thermionic diodes as basic building blocks 05 p0612 A66-15304

Thyristor equipped DC to DC regulated power converter for voltage range between 43 and 300 v DC based on printed circuit principle 06 p0857 A66-16966

High efficiency lightweight DC-DC power converter with step-width modulating preregulator for use in Apollo Lunar Excursion Module 08 p1169 A66-19496

Gas bearing analysis and design, presenting specifications of European and American turbomachinery 10 p1539 A66-21170

Comparison of various electrostatic thrusters and proposed low pressure colloidal power converter for high payload lunar and planetary missions [AIAA PAPER 66-211] 10 p1592 A66-21448

Ground test verification of SNAP-8 flight reactor design and operation of reactor while coupled to power conversion system 12 p1911 A66-23679

Power, industrial and general applications - IEEE International Convention, New York, March 1966 12 p1803 A66-24658

Three-phase half-wave inverter circuit consisting of ring of three SCRs and converting DC into AC power supplied into zigzag motor load 12 p1804 A66-24662

DC-to-DC nondissipatively regulated converter using inductive energy storage for voltage transformation and regulation 13 p2001 A66-26297

Closed Brayton cycle for onboard generation of space vehicle electric power from solar, isotope and nuclear reactor energy source [ASME PAPER 66-GT/CLC-10] 14 p2224 A66-26983

Design of 500-kwe closed Brayton cycle power conversion system, analyzing various turbomachinery configurations hermetically sealed and operating on gas bearings [ASME PAPER 66-GT/CLC-15] 14 p2225 A66-26985

Solid state linear amplifier noting block diagram, use of synthesized waveform type method and semiconductors in vector sum unit 15 p2429 A66-29604

Accelerated cavitation damage in liquid sodium and mercury of stainless steels and superalloys under consideration for use in liquid metal power conversion systems 19 p3380 A66-35804

RF propagation and absorption calorimetric measurements in magnetoplasma near electron cyclotron resonance, noting power conversion 19 p3305 A66-36420

Lightweight power-conditioning system for ion engines using energy-storage transformers for conversion, nondissipative regulation and protection 20 p3628 A66-37172

Fuel cell power conversion by AC link type static inverter 20 p3498 A66-37173

Solar concentrator technology, discussing design requirements of space power conversion devices and manufacturing methods 23 p4021 A66-41757

Power conversion enhancement of acoustic-electromagnetic wave coupling across plasma-air boundary by suitable thickness and charged particle density 24 p4241 A66-42304

Basic considerations for DC to DC conversion networks, detailing relationship between characteristics of active resistor and maximum AC power generated by active element 24 p4189 A66-43180

POWER DENSITY

Atmospheric turbulence, power fluctuation and radar detection in laser systems design 07 p1041 A66-17294

Numerical method used to compute power density representation for classification of complex nonperiodic signals 08 p1185 A66-19562

Breakdown by neodymium glass laser radiation in atomic and molecular gases, determining power densities, noting relation of pressure to breakdown power 16 p2718 A66-30938

Effect of degree of expansion of ionized gas in nozzle on specific power of MHD generator 16 p2637 A66-31377

General adaptive approach based upon minimizing moments of power density spectrum of system error in feedback control system 20 p3536 A66-36877

Quantitative photographic determinations of laser beam power density distributions and Q-switched ruby oscillator-amplifier system divergence characteristics 23 p4075 A66-41032

POWER EFFICIENCY

Four modes of thermionic-converter operation compared for maximum power output 03 p0396 A66-12295

Resistor stabilized VHF power transistor discussing power output, reliability, bias stability and application 05 p0642 A66-14566

Automatic realization of reactive ladder filters by digital computer, discussing classification and removal techniques, fundamental power equation and network functions 07 p1008 A66-17752

Two operation modes of two-way DC improved efficiency amplifier under active loading 08 p1197 A66-19689

Dielectric cavity maser composed of ruby rod separating metal plates, noting strength saturation behavior, power output, etc 10 p1541 A66-21308

Comparison of piston engine with turbojet engine, noting power-weight ratio, specific fuel consumption, performance characteristics, etc 10 p1591 A66-21392

Aircraft electrical system design, power requirements, instrumentation, excess loads, etc 12 p1803 A66-24387

Direct-to-home TV broadcasting satellite system for upper UHF, describing stabilization, thermal control, antenna, power amplifier, etc [AIAA PAPER 66-309] 12 p1955 A66-24776

Phase shift keying with transmitted reference, obtaining probability of error for m-phase receiver system in presence of additive Gaussian noise 13 p2019 A66-25147

Optical resonator diffraction loss, noting laser oscillations in high loss arrangements, output beam power, field patterns, etc 13 p2090 A66-25195

VHF overlay transistor for lightweight single-sideband equipment, noting design, output and efficiency 13 p2035 A66-25510

HF power transistor delivering 40 watts of RF power at 175 mc at 8 db gain and 75 percent efficiency, noting design and operation 13 p2035 A66-25511

Silicon UHF power transistor performance, showing parameters of amplifier gain, power output and impedance 13 p2036 A66-25512

Germanium alloy transistor for high current and low saturation voltage requirements, noting high efficiency, physical properties, application, etc 13 p2037 A66-25543

High power phase shifting with p-i-n diodes, noting that 1000-v diodes will increase peak power capacity to 10 kw 13 p2165 A66-25547

Vapor-cycle air conditioning for business aircraft, considering weight vs power consumption, compatibility with integrated system and test results [SAE PAPER 660208] 13 p2002 A66-26386

Maximum output power approximated for 6328 angstrom He-Ne gas laser, noting optimum mirror transmission and laser geometry 13 p2105 A66-26571

Mathematical model of GaAs injection laser applied in determining maximum obtainable power output, using rate equations of electron and photon densities and thermal resistance for optimum value 13 p2105 A66-26572

DC liquid-metal MHD generator tested with cold NaK to determine power efficiency 14 p2225 A66-27408

Hydraulic resistance, heat and mass transfer in vortical flow, noting power optimal conditions of operation 16 p2825 A66-30323

Transistor inverter with 80 percent efficiency for 400 mv source voltage, noting simplicity of design 17 p2848 A66-31810

Peak power stresses in semiconductor device testing for space power equipment, using photo methods 17 p2880 A66-31984

Magnetoresistance effect in semiconductors applied to microwave power measurement, noting multiplying action between electric and magnetic field components of wave 17 p2885 A66-32288

Series connection of varactor wafers for higher breakdown voltages without loss of cut-off frequency, noting power output 17 p2887 A66-32698

Optimization of radiation characteristics of satellite mounted antennas 17 p2894 A66-32990

Instant antenna patterns for estimating far field characteristics, noting location of peaks and zeros of radiation patterns, voltage ratios, etc 18 p3077 A66-34063

Approximate theory for estimating effect of manufacturing tolerances on deep parabolic reflector performance 18 p3082 A66-34284

Two operation modes of two-way DC improved efficiency amplifier under active loading 18 p3087 A66-34675

Induction synchronous MGD generator with modulated conductivity, examining electric and gas dynamic characteristics 19 p3281 A66-36308

Twin engine UH-2 Seasprite helicopter, noting increased power availability, advantages and performance characteristics 20 p3495 A66-37046

Silicon solar cell performance, output increase by solar concentration and cost reduction 22 p3851 A66-40245

Traveling wave tubes and klystrons, discussing microwave power generation efficiency, application for satellite communications, etc 22 p3878 A66-40701

GaAs semiconductor quantum generator heating during injection pulse, analyzing temperature effect on external quantum output and generator efficiency 23 p4078 A66-41621

POWER GAIN

Saturation characteristics of ferromagnetic amplifiers 01 p0041 A66-10567

Helium-neon laser amplifier as function of mixture ratio, gas pressure, input signal level and electrical power input to amplifier tube 02 p0242 A66-12206

Gain and bandwidth narrowing in regenerative helium-xenon laser amplifier 03 p0376 A66-12308

Fluid state power amplifier discussing design, construction, operation, advantages and limitations 04 p0460 A66-13783

High power Brewster window laser with gas fills, discussing power output and efficiency parameters 04 p0531 A66-13983

Current and directive gain for maximum directivity of orthogonal antenna array with individual elements possessing directivity 05 p0651 A66-15879

Antenna array excitation for maximum power gain in terms of network parameters defined at input terminals 06 p0843 A66-16022

Gain measurements of Raman amplifier pumped by diffuse ruby radiation 06 p0891 A66-16388

Generalization of Manley-Rowe theorem for case in which one or more pumping generators act on nonlinear reactive element 08 p1197 A66-19603

Antenna gain cut-off effect at high altitude for monopole antenna 09 p1350 A66-19853

Monolithic silicon-transistorized integrated amplifier for use as stabilized gain block element in linear circuit realizations 12 p1842 A66-24656

5 kw LF power amplifier with improved frequency response, noting design and operation 12 p1843 A66-24682

HF power transistor delivering 40 watts of RF power at 175 mc at 8 db gain and 75

percent efficiency, noting design and operation 13 p2035 A66-25511

Linear power amplification with switching techniques, using pulse width modulation 13 p2036 A66-25522

UHF transistor design and performance, noting power gain, stability, low noise figure and correlation between circuit invariants and transistor parameters 13 p2038 A66-25560

Direct-coupled multistage integrated amplifier design for optimum performance under arbitrary cascade configuration, noting power gain and frequency range 13 p2040 A66-25831

Design, power gain and stability of transistorized linear active network HF amplifier 14 p2255 A66-27801

Swept frequency antenna gain measurements, evaluating mismatch losses at feedpoint and obtaining gain-frequency curves 14 p2256 A66-27911

Theoretical gains and current distribution in supergain endfire antenna arrays 14 p2256 A66-27922

Gain optimization problem for antenna arrays responding to quasi-monochromatic periodic signal 14 p2240 A66-27929

Theoretical existence of optimum pitch giving maximum net gain for traveling wave masers, using slow wave structures 14 p2309 A66-27958

Relationship between power gain and HF equivalent circuit constants of diffused-base transistor 14 p2259 A66-28039

Power gain and stability of linear active two-port networks with circuit design equations based on terminal parameters 14 p2268 A66-28371

HF amplifier design, using two-port theory measurement of Si epitaxial mesa transistor y-parameters, discussing power gain, sensitivity and inherent stability 14 p2261 A66-28372

Spontaneous emission and transverse gain measurements in GaAs injection laser at 80 degrees K and for 8466 angstrom wavelength 15 p2511 A66-28627

Antenna tolerance theory, presenting axial loss of gain and pattern degradation as function of reflector surface rms error 15 p2462 A66-29020

Gain improvement to electron multiplier used in mass spectrometers 16 p2702 A66-30430

Varactor frequency doubler response to amplitude and phase modulated signals 17 p2878 A66-31811

Solid state transmitter with triggered Si controlled rectifiers /SCRs/ for high power efficiency in LF and ULF bands 17 p2895 A66-33120

Peak drive power requirements, optimum drive size and torque requirements for large aperture steerable tracking antenna 18 p3055 A66-34295

Input signal power effect on performance of multiresonator paramagnetic quantum amplifier 18 p3120 A66-34699

Generalization of Manley-Rowe theorem for case in which one or more pumping generators act on nonlinear reactive element 18 p3087 A66-34961

Alternating current losses in type II superconductor, showing dependence on magnitude and direction of local magnetic field and transport current 19 p3439 A66-35728

Horowitz root-locus compensation method extended to analysis and design of high-gain linear control systems with variable coefficients 19 p3338 A66-36741

Input admittance, gain and noise performance in dipole antennas with Esaki diodes 20 p3531 A66-37731

Gain factor variation with threshold current in reflective and antireflective films of GaAs laser with photon and current densities 20 p3581 A66-38388

Contrawound helical antenna with independent control of polarization bandwidth and gain used for receiving or low-power transmitting 21 p3714 A66-39496

Mathematical theory of gain mechanisms of acoustic amplification 22 p3862 A66-39745

Intracavity interferometer laser measurements of power gain and output in single-frequency Ar laser and 6328-angstrom Ne isotope shift 22 p3932 A66-40110

- Transverse gain and spontaneous and stimulated emission at 8466 angstroms in GaAs structures 24 p4222 A66-42561
- IR GaAs laser amplifier with gains as high as 2000, output powers of 150 mw and saturation occurring with current increase at low light levels 24 p4223 A66-42562
- POWER GENERATOR**
- Direct and indirect converters emphasizing preconcentration of solar radiation, noting thermophotovoltaic generators of p-i-n type 06 p0807 A66-15918
- Microwave power generation from avalanche diffused and epitaxial silicon and gallium arsenide varactor diodes 06 p0851 A66-16462
- EGD power generation including functioning, coupling, broad and narrow channels, expanding momentum channel, efficiency, etc 07 p0993 A66-18313
- Data analysis of experiments with open-cycle supersonic EGD generator for application as power source and comparison with mathematical model 07 p0993 A66-18314
- Electric power generation using monopolar charged particles in fluid flow 07 p0994 A66-18315
- Microwave power generation by multiplication of direct current and microwave magnetic field, using biased intermetallic semiconductor magnetoresistive element in cavity 08 p1198 A66-19746
- Rheostat-capacitance generators of FM oscillators with multilobe feedback 09 p1354 A66-20452
- Power transistors for RF generation and amplification, discussing operation characteristics and testing methods 10 p1508 A66-21297
- Electrofluid dynamic power generation, high voltage generating device, direct energy conversion and supersonic electrogasdynamic generator 12 p1803 A66-24646
- Oscillations in power generation of n-type GaAs at frequencies far in excess of intrinsic Gunn frequency 15 p2565 A66-29041
- Variable speed constant frequency /VSCF/ generating system for helicopters 16 p2636 A66-30600
- Noncontact liquid and vapor screw-type shaft seals in potassium cooled and lubricated electric power generator for space environment, noting dynamic slinger seal and viscoelastic 16 p2714 A66-30627
- Output power and thermal efficiency of molten salt thermocell, examining applicability as generator for direct conversion of heat into electric energy 16 p2636 A66-30673
- Power enhancement in pulsed He-Ne lasers, noting overshooting for RF discharge modulation with square wave 17 p2935 A66-32963
- Ambipolar potential in magnetoactive cold plasma applied to power generation and effects of electric field on diffusion coefficient 17 p2973 A66-32984
- Electrical energy by direct conversion, noting fuel cell, thermoelectric generator, solar cell, etc 18 p3053 A66-33722
- Alpha emitter actinide element application as heat source for isotopic generators, discussing safety precautions required, economy, etc 18 p3134 A66-34056
- Experiments of internal impedance of MHD generator show wide range of working conditions as slowly varying function of applied current 18 p3053 A66-34112
- Microwave power generation and amplification via transistors, noting optimum source and load impedance for microwave transistors under large signal conditions 19 p3319 A66-36166
- Overlay transistor used for continuous microwave power output of 6.5 watts at 1 gigacycle and over 1 watt at 2 gigacycles 20 p3524 A66-36898
- 60-kw, 400-cps engine-generator system capable of providing reliable high-quality electric power at lower mission weight than presently available engine-generator sets 20 p3498 A66-37169
- Dynamic power generating systems using Rankine and Brayton cycles for space application 20 p3598 A66-37256
- RF induced gas plasma at 250-300 kc/s 22 p3956 A66-40401
- High power microwave frequency multiplier matching very low varactor impedances 22 p3879 A66-40723
- Electric power generator selection for Mars probe/lander 23 p4020 A66-41748
- Pulsed energy turboalternator power generation system, discussing operation principles and performance characteristics 23 p4022 A66-41761
- Isotope power systems for lunar roving vehicles noting fuel, radiation shielding, performance, weight, etc 23 p4024 A66-41770
- POWER-LIMITED VEHICLE**
- Linear theory of optimum variable thrust rendezvous trajectories with power limit propulsion system 04 p0575 A66-13457
- Series power switch for orientation and position computer of small lunar-orbit spacecraft designed to reduce weight and cost 17 p2878 A66-33122
- POWER LIMITER**
- Four passive power limiters based on waveguide devices employing effect of reradiation by ferrites 01 p0042 A66-10587
- Signal power sharing, signal suppression, cross-product magnitude and output distortion in satellite communication system due to hard limiting 06 p0835 A66-16862
- Cross modulation in varactor-tuned limiters 08 p1191 A66-18944
- Method determining variance and correlation function fluctuations on limiter-inertial RC circuit system 09 p1344 A66-20440
- Wideband UHF-power regulator design, based on use of electrically controllable semiconductor attenuator 09 p1358 A66-20795
- NERVA reactor control systems, using limiter circuits to protect nuclear subsystem from controller malfunctions and for pressure control 12 p1912 A66-23701
- Variable efficiency harmonic with shunted varactor diode for microwave power level control 14 p2247 A66-27042
- Wideband UHF-power regulator design, based on use of electrically controllable semiconductor attenuator 22 p3874 A66-39854
- Multiple access to ideal bandpass limiter channel in pseudonoise system 23 p4040 A66-41593
- POWER PLANT**
- SA BY-PASS ENGINE
- SA HEAT ENGINE
- SA NUCLEAR POWER PLANT
- Rotary deployment and stabilization mechanisms for solar collectors [AIAA PAPER 64-732] 13 p2005 A66-26631
- Two-phase flow and material attrition problems for Rankine cycle liquid metal power plants [ASME PAPER 66-GT/CLC-4] 14 p2224 A66-26979
- Gas lubricated bearings used in Brayton cycle closed-loop system turbomachinery in design of two-shaft power plant [ASME PAPER 66-GT/CLC-9] 14 p2300 A66-26982
- Graphical matching solution for gas turbine power plant closed cycle systems [ASME PAPER 66-GT/CLC-14] 14 p2224 A66-26984
- Optimal working fluid for Rankine cycle engine [ASME PAPER 66-GT-84] 14 p2411 A66-26990
- Second thermodynamic law analysis of availability balance for conventional gas turbine and free-piston gasifier [ASME PAPER 66-GT-96] 14 p2372 A66-26999
- McCulloch TSIR-5190 highly compounded two-stroke cycle, turbocharged, direct fuel injection, liquid cooled, radial light plane engine [SAE PAPER 660173] 14 p2373 A66-27283
- Power conditioning and advanced propulsion system of ionic engine, noting high voltage inverter design and vaporizer heater circuit 14 p2375 A66-28416
- Lithium chloride power plant theory and technology, noting application to critical weapons systems 23 p4021 A66-41758
- POWER REACTOR**
- S BOILING WATER REACTOR**
- POWER SERIES**
- Power series expansions as solutions to differential equations, using electronic computers 01 p0091 A66-10163
- Simple semigroup treatment of problems involving powers of nonnegative matrices 02 p0249 A66-11255
- Dielectric prism in bend of plane wide waveguide, considering geometrical optics and calculation electrostatically with power series solution 02 p0196 A66-11411
- Three-body problem solution in form of power series 02 p0289 A66-11634
- Equations of plastic interaction curves for cross section of beam subject to uniaxial stress and under simultaneous bending moment and normal force, using power series 03 p0442 A66-13306
- Small perturbations of parabolic boundary value problem 08 p1245 A66-19114
- Power series solution of F-2 layer diffusion equation, calculating equilibrium electron density from equatorial profile 08 p1216 A66-19215
- Recurrent power series integration used to compute characteristic exponents in planar restricted problem of three bodies 08 p1296 A66-19354
- Nonequilibrium inviscid flow behind blunt body shock wave analysis, using series truncation and reducing truncation error 08 p1166 A66-19816
- Power series drawbacks as tool in numerical solution of differential equations 09 p1395 A66-20620
- Hypergeometric mean value, showing expression for mean of order t of series of positive values with positive weights as limiting case 11 p1722 A66-22953
- Autocorrelation and hypergeometric function applied in evaluating response of nonlinearities to Gaussian noise 14 p2267 A66-27726
- Space-time correlation tensor of turbulent fields by phase space functional Lebesgue-Stieltjes integration, statistical hydromechanics and probability measure theory 15 p2479 A66-29398
- Potential complex and forces in perfect incompressible fluid at rest at infinity with free vortices determined by pointless profiles excited by arbitrary motion 15 p2479 A66-29637
- Motion equations, attitude and ignition time of third and fourth stage of USAF Athena, noting solution derivation using Taylor series constraints, accuracy, etc 16 p2743 A66-30908
- Approximating values of analytic function in form of power series, when region of interest is outside convergence domain of series, using numerical methods, noting detached shock problem 16 p2735 A66-30944
- Fractional powers of linear operators role in linear and nonlinear elliptic and parabolic equations, Fourier series in eigenfunctions of elliptic operators, etc 16 p2736 A66-30978
- Analytic continuation of power series with aid of lower triangular matrices 16 p2740 A66-31797
- Radius of convergence of power series obtained by inversion of universal Kepler equation 17 p3001 A66-32347
- Curves of attractive potential energy in diatomic molecules, noting calculations for Li-Li interactions in power series form 21 p3775 A66-39074
- Expansion of function in series of Bernoulli polynomials 22 p3939 A66-40392
- Thermal transport in channel-gas flow, discussing integral equation and power series solution 23 p4150 A66-41869
- Plate or shell theory analysis reduced from three-dimensional elasticity to two-dimensional problem, using power series or iterative method 23 p4143 A66-41962
- Power series solutions to homogeneous shallow shell equations for point load concentrated on vertex of shell 24 p4285 A66-42145
- POWER SPECTRUM**
- Auroral zone absorption, reporting periodic variation of sporadic E layer in Antarctica, considering magnetospheric time-of-flight spectrometer effect 01 p0061 A66-10497
- Statistics of locally-isotropic turbulent field for gas with density sensitive heating mechanism [AIAA PAPER 65-38] 02 p0302 A66-11532
- Fluctuation-dissipation theorems for relating noise current power spectrum to first and third order conductivity tensors in thermal equilibrium and pumped Raman-active media 04 p0532 A66-14310
- Filter adapting to spectral density of

incoming sampled signal, reconstructing continuous signal from samples 05 p0652 A66-14597

Power spectral density analysis, reviewing signal wave, time, rate and system parameters [ISA PREPRINT 1.5-3-65] 05 p0683 A66-15508

Damping and spring forces acting on single mode oscillator considered as power series, deriving power spectral density of response through perturbation 05 p0717 A66-15738

Output moments of linear system determined in terms of corresponding moments of input and input-output relationship of average correlations and spectra, defining nonstationary processes 06 p0902 A66-16188

Power spectrum of random phase-modulated carrier, assuming rectangular spectrum for modulating signal 06 p0853 A66-16661

Load factor estimation for flights in turbulent conditions by replacing exact transfer function with equivalent statistical model 10 p1482 A66-21385

Turbulence-excited atmospheric velocity, critical frequency of atmosphere, solar atmospheric power spectrum of acoustic field velocity correlation, solar convection zone, etc 11 p1772 A66-22777

Statistical analysis of circuit noise effect on oscillators according to perturbation theory, discussing power spectrum, power and signal phase spectral densities, frequency stability, etc 12 p1834 A66-24127

Power spectra formula of digital FM signals for phase continuous and discontinuous cases, noting results of Anderson and Saltz 13 p2020 A66-25213

Aircraft design for gust loads encounter based on power spectral results 14 p2405 A66-27995

Dynamic analysis of lunar surface vehicle including power spectral density terrain definition, vehicle velocity limiting criteria and nonlinear analysis of vehicle freedom to pitch, bounce and roll 14 p2393 A66-28022

Power spectra computation for testing geomagnetic micropulsation period dependency on latitude 14 p2287 A66-28171

Power spectrum analysis of intensity variation of pulsating aurora from Tromsø during winter 1964/65 15 p2488 A66-29234

High resolution power spectrum of international magnetic character, showing two subsidiary peaks on both sides of 27-day period 16 p2695 A66-30719

Jupiter decametric radio emission spectrum noting power at various frequencies, mean flux density, magnetic pole locations, etc 16 p2801 A66-30922

Oscillatory component in solar granulation continuum brightness fluctuations, secondary maxima in temporal autocorrelation functions and power spectra 17 p2996 A66-31920

Phase-jitter spectrum of oscillators and frequency multipliers, noting additive nature of output 17 p2894 A66-33111

Low rigidity end of differential power spectra of proton and helium components of primary cosmic radiation, considering ionization loss and interaction with interstellar hydrogen 18 p3189 A66-34830

FAA safety research on aircraft reliability, discussing power spectral gust design, structural strength, turbine performance and lightning strike effects 20 p3540 A66-36992

Statistical energy-and power-spectral correlation analysis of signals with nonintegrable spectra 20 p3512 A66-37149

Digital computer synthesis of simulated ground clutter of radar signals produced by noise generator and characterized by power spectral density and probability density functions 20 p3514 A66-37222

Error analysis of area correlation guidance system using parametric analysis of spatial frequency domain-equivalent power spectral density 20 p3597 A66-37237

Transonic buffeting effects on hammerhead shaped payloads analyzed, using power spectral techniques and wind tunnel tests 20 p3672 A66-38170

Phase angle irregularities in scattering of ionospheric radio waves 20 p3521 A66-38357

Gust design procedures based on power spectral techniques, considering atmospheric

turbulence with aircraft as rigid body with single degree of freedom [ICAS PAPER 66-11] 23 p4017 A66-42073

Power spectrum analysis of short-time transient response of one degree of freedom system to random excitation, evaluating error generated, using Laplace method 24 p4286 A66-42164

Grid turbulence for large Reynolds numbers, noting consistency of power spectra values with Kolmogoroff scaling, decay law and Reynolds number effect on turbulence 24 p4194 A66-42408

Photoelectron emission statistics determining probability distribution of photoelectron counts in photomultiplier illuminated by laser below and above threshold of oscillation 24 p4220 A66-42543

Linearized population rate equations and quantum noise sources used to calculate spectra of intrinsic second moment intensity fluctuations in 3-and 4-level CW laser oscillators 24 p4221 A66-42548

Power spectrum analysis of mean daily values of magnetic data for 27 observatories 24 p4201 A66-42597

Subsidiary peaks in power spectra of Ci and Kp /magnetic indices/ attributed to amplitude modulation of 27-day components 24 p4201 A66-42607

POWER SUPPLY

SA AIRCRAFT POWER SOURCE

SA AUXILIARY POWER SOURCE

SA NUCLEAR-ELECTRIC POWER

SUPPLY

SA PLASMA POWER SOURCE

SA SPACE POWER SOURCE

SA SPACECRAFT POWER SUPPLY

Complementary bipolar transistor NAND gate for reducing power dissipation and increasing switching speed 01 p0047 A66-11137

Thermionic energy conversion noting power generation sources like nuclear reactors, solar furnaces, etc 06 p0809 A66-16393

Introduction to fuel cells 07 p0995 A66-18467

Power supply system of OAO consisting of solar cells, energy storage device, power controller, etc, and simulation program via digital computer 08 p1168 A66-19493

Electric propulsion including thrusters, power systems, solar power, hybrids, etc 09 p1434 A66-20247

Integrated circuit for switching-type high-efficiency power supply with feedback regulation 09 p1354 A66-20566

VTOL control power requirements under low speed flight conditions for randomly disturbed mechanical system 09 p1330 A66-20736

Microthruster power conditioning and control system design and ion propulsion [AIAA PAPER 66-215] 10 p1485 A66-21449

Data transmission by continuously-radiating power source moving away from receiver and fluctuation noise of uniform frequency spectrum 11 p1654 A66-22633

Operational characteristics of LC tuned solid state static inverter used as power supply in autopilot gyros of Titan rockets, noting power oscillator circuit 12 p1804 A66-24661

Periodic undamped oscillations in power intensity of two-mode optical maser 13 p2103 A66-26217

Hydrocarbon-air fuel cell power source using reformer to supply hydrogen and producing net output of 5 kw at 110 v and 60 cps [AIAA PAPER 64-745] 13 p2007 A66-26646

Gas shielded metal arc welding, discussing power sources, wire feed mechanism, torch and carbon dioxide cylinders 13 p2088 A66-26764

Optical and microwave instrumentation for exploration of millimeter wave band, determining value for deep space communications, radiometry and spectrometry 14 p2247 A66-26922

Redundant system reliability in aircraft design, noting amplifier and filter arrangements, diode and quadruplex circuits, etc 14 p2247 A66-27015

High power sources for millimeter wavelength oscillator and amplifier design 15 p2461 A66-29008

Model L/C water-cooled DC power supply for short arc lamps, noting SCR selection 16 p2635 A66-30495

Contactless machine with variable current and dual power supply operating with variable rotation rate, determining optimum limits of rotation speed variation 16 p2636 A66-30780

Random noise effects and optimal control of nuclear rocket start-up for rapid and precise attainment of full power 16 p2745 A66-30881

X-band solid state source using chain of frequency multiplier stages and driven by transistor crystal controlled driver unit 17 p2893 A66-32923

Fuel cell systems for generating electricity 17 p2849 A66-33173

Operational methods of semiconductor switching circuits in pulsed powered circuit /PPC/ mode for reduced power consumption 18 p3090 A66-34070

Gas generator systems, discussing applications such as auxiliary power units, servosystem power sources and pressurization devices 18 p3054 A66-34189

Determination of electric power system requirements for short-range missile 20 p3499 A66-37192

Unattended weapons systems operation from rural power systems, emphasizing sensing to determine transfer from primary commercial to alternate source and fault patterns 20 p3542 A66-37242

Power source for image converter tubes /ITC/ with regulated output voltage 20 p3559 A66-37521

Ferroelectric transducers, discussing feasibility of using ceramic transducers as pulsed power supplies 21 p3741 A66-39504

Out-of-pile thermionic power system using inert gas for heat transfer from reactor to converter, noting creep-rupture problem of materials 23 p4023 A66-41767

Primary electrochemical power systems including gas recombination devices, sterilizable battery, fuel cells, alcohol-air units, etc 23 p4023 A66-41768

DC motor without commutator, run by rectified RF energy from antenna pickup probe inside waveguide 24 p4162 A66-42947

POWER TRANSMISSION

Power dissipation as sum of quiescent power and transient power dissipation, considering n-channel metal-oxide-semiconductor and MOS complementary logic circuits 01 p0047 A66-11138

Elliptical waveguide for H-11 modes transmittance, expressed as power transmission along waveguide and square of electric field maximum value 02 p0196 A66-11417

Approximation method for momentary peak shaft loads, computing starting and stalling torques of power transmission system 02 p0238 A66-12266

XC-142A tri-service V/STOL aircraft specifications, considering control and transmission systems and flight test results 03 p0321 A66-12889

High power microwave filters discussing dominant mode and harmonic filters, design, parameters, application and limitation 04 p0493 A66-13677

Double universal joints for transmission of mechanical power 04 p0526 A66-13800

Self-excited torsional vibrations of power transmission drives under boundary lubrication, developing rotating shaft/bearing relations 05 p0772 A66-14643

Band stop filters, determining advantages in high power transmission and rejection, power capacity, Q-factor, etc 06 p0844 A66-16081

Lunar and terrestrial vehicle wheels, frame, steering, suspension, electrochemical energy converters, electric traction power systems and vehicular propulsion [SAE PAPER 660150] 07 p0108 A66-17867

High power semiconductor devices, particularly power handling device 07 p0102 A66-18273

Aircraft engine rotating shaft coupling design, noting splined shafts, correct lubrication, flexible members and test results 09 p1383 A66-19863

Electromagnetic wave deflection where transmitted power is inherently guided by

- stored energy component, noting effect of Sun gravitational interaction 10 p1496 A66-21292
- Ferromagnetic multilayer systems effect on SHF power transmission and variation of resonator parameter 11 p1754 A66-22811
- High voltage DC brushless torpedo propulsion motor using sea water as power return and controlled by thyristors 12 p1804 A66-24660
- Superconductors for mixed AC-DC power transmission and thermal dissipation effect 13 p2030 A66-25219
- Microwave power transmission, noting theoretical loss, power transfer, heliometer operation, etc 13 p2024 A66-25783
- Electronic components for microwave power engineering, employing electromagnetic amplifying lens, microwave rectifiers, etc 13 p2039 A66-25784
- Overrunning clutches in gas turbines, design, performance characteristics and application to A-4D Skyhawk aircraft, UH-2 helicopter and Curtiss-Wright X-19 VTOL drive systems [ASME PAPER 66-GT-92] 14 p2300 A66-26996
- Transmission power of dielectric waveguide 14 p2251 A66-27168
- Double barrier transmission resonance in metal thin film triode 15 p2563 A66-28731
- Automatic level-control systems requirements for powerline carrier engineering 16 p2654 A66-31028
- Transport of AC disturbance /emission noise/ on electron beams magnetically compressed in microwave tubes, deriving power flow invariants 17 p2878 A66-31819
- Continuous wave power ratings of strip transmission lines, noting temperature profile parameters, power limit curves, etc 18 p3077 A66-34062
- Maximum and minimum power absorbed by antenna connected through coaxial transmission line to transmitter under unmatched conditions 18 p3078 A66-34168
- Transmission systems selection for high-speed lightweight applications, including air-cushion vehicles and Bell X-22A V-STOL aircraft [ASME PAPER 66-MD-71] 21 p3743 A66-38499
- Peak power of pulse modulated RF carrier measured by sequential comparison with reference carrier 22 p3872 A66-39726
- Tolerances required on straightness of cylindrical waveguide to prevent excessive power transmission into unwanted high loss modes 22 p3876 A66-40169
- Radiation resistance of antennas in magnetoplasma, considering inapplicability of reversible power concept to steady state mode 23 p4047 A66-41634
- Stochastic model for power transmission systems in aircraft and rocket engine testing 23 p4122 A66-41861
- Saturable dyes noting mode selection properties and absorption spectra in bleached state 24 p4220 A66-42253
- Current measuring device for EHV transmission line, obtaining instantaneous magnetic field by gauging Faraday rotation angle of laser beam in flint glass rod 24 p4222 A66-42556
- POYNTING THEOREM**
- Power and energy relations for open and closed uniform and periodic waveguides supporting complex propagation wave 06 p0843 A66-16021
- Integration of Poynting vector over real and imaginary space to determine input admittance of one slot in infinite planar array as function of beam pointing direction 06 p0827 A66-16041
- PPI**
- S PLAN POSITION INDICATOR /PPI/**
- PPM**
- S PULSE POSITION MODULATION /PPM/**
- PRACTICE**
- S MEMORY**
- S TRAINING**
- PRANDTL-MEYER EXPANSION**
- Nonisentropic simple waves in two-dimensional steady flow of ideal gas 08 p1210 A66-19585
- Flow structure and heat transfer for rearward facing step in supersonic flow, discussing critical Reynolds number, flow through lip shock, etc 17 p2913 A66-33068
- PRANDTL NUMBER**
- Adiabatic heating and temperature recovery factor of tubes carrying liquids of high Prandtl number 01 p0165 A66-10905
- Turbulent shear flow of elastico-viscous fluid in pipe or channel [AIAA PAPER 64-36] 02 p0217 A66-11526
- Condensation in variable acceleration field, especially linear variation occurring in constant cross section rotating thermosyphon [ASME PAPER 64-WA/GTP-2] 02 p0304 A66-11764
- Nonisothermal wall problem for vertical right circular cone in laminar free convection for fluids with low Prandtl numbers 02 p0305 A66-12200
- Injection on surface friction and on parameters of turbulent boundary layer, noting semiempirical Prandtl theory 04 p0509 A66-13655
- Adherence of gas to wall, investigating Boltzmann equations for perfect fluid, Prandtl-type flow and state of rest fluid 05 p0661 A66-14535
- Friction-drag and heat-transfer coefficients of plate in turbulent gas flow, estimating effect of turbulent Prandtl number 06 p0872 A66-16469
- Unsteady, combined free and forced convective MHD channel flow of conducting fluid through transverse magnetic field 07 p1085 A66-17580
- Local heat transfer to immersed cylinder in transonic cross flow for gaseous stream 07 p1150 A66-17581
- Similar solutions to laminar boundary layer equations affected by Prandtl number, viscosity-temperature variation, mass transfer and hypersonic parameter 07 p1023 A66-18136
- Two-dimensional viscous incompressible wedge flow treated by Navier-Stokes equation with Prandtl boundary layer approximation 07 p0982 A66-18138
- Thermal laminar boundary layer formation on semiinfinite isothermal plate during uniform motion in viscous incompressible fluid over Prandtl number ranges 08 p1206 A66-18874
- Turbulent heat transport coefficient of various fluids in pipes measured, obtaining formula from experimental data 09 p1367 A66-20702
- Local boundary layer approximations of first order for steady laminar convection flow produced by nonuniform axisymmetric heating or cooling of infinite horizontal surface 10 p1620 A66-21276
- Turbulent heat transport coefficient of various fluids in pipes measured, obtaining formula from experimental data 11 p1688 A66-22592
- Asymptotic expansions to heat-transfer rate for laminar boundary layer flow at small or large Prandtl number 11 p1786 A66-23012
- Formula determining tubing length in heat exchanger required for steady state heat-transfer coefficient, noting role of Prandtl number 12 p1973 A66-23525
- Maxwellian theory, within classical mechanics of fluids, adapted to material and thermal conductivity in turbulent flows, calculating mass and heat transfer 12 p1973 A66-23529
- Similarity solutions of heated two-dimensional laminar free jets with arbitrary Prandtl number and nonlinear viscosity-temperature energy dissipation relationships 18 p3103 A66-34932
- Stagnation point heat transfer in dissociating or ionizing real gases for case of discontinuous Prandtl numbers 19 p3478 A66-35749
- Digital computer analysis of kinetic equations for CO burning in presence of hydrogen 20 p3679 A66-37702
- Approximate integral method for determining thermal boundary layer and heat transfer on flat plate with insulated surface 23 p4150 A66-41920
- Turbulent heat transfer coefficient in smooth pipes at high Prandtl numbers has higher value than when turbulence is not assumed 23 p4151 A66-42054
- Benard convection between free bounding surfaces for ranges of Rayleigh and Prandtl numbers achieving steady state with motion of single large cell, evaluating eigenfunction amplitudes 24 p4293 A66-42409
- PRASEODYMIUM**
- Laser oscillation in calcium tungstate crystals activated with trivalent praseodymium 05 p0694 A66-14898
- PREAMPLIFIER**
- Miniature high performance high-reliability silicon transistor preamplifier for biological use and space research 03 p0343 A66-12989
- Low noise preamplifier with field effect transistors for use with IR detectors 14 p2249 A66-27116
- Wideband low-noise charge-sensitive preamplifier with n-channel field-effect-transistor input, giving experimental characteristics 19 p3318 A66-35916
- Low-noise charge sensitive preamplifier for semiconductor detectors using paralleled field effect transistors 19 p3318 A66-35917
- PRECESSION**
- Satellite experiments testing precessional formula of general relativity, obtaining optimal orbital condition 10 p1604 A66-21193
- Aerodynamic torque effect on UK-3 satellite precession rate 11 p1777 A66-22966
- Larmor precession of charged particles effect on nonstationary temperature field in plane channel 12 p1922 A66-24361
- Even zonal harmonic coefficients of Earth gravitational potential evaluated by analyzing precessions of satellite orbital planes 16 p2694 A66-30618
- Lorentz invariant space-time gravitational field theory, Maxwellian gravitokinetic field of potential and kinetic components and precession of orbit of Mercury analyzed by Einstein restricted theory of relativity 16 p2802 A66-31011
- Relativistic precession measurement using satellite as precise orbiting gyroscope [AIAA PAPER 65-36] 17 p3001 A66-32450
- Motion of arbitrary gyrostat in central Newtonian force field, applying Liapunov stability conditions for regular precession 19 p3362 A66-36841
- Conservative systems motion stability, generalizing precession and nutation of gyroscope with respect to noncyclic coordinate 22 p3948 A66-40681
- Orbital plane precession due to ellipsoidal shape of Earth, discussing effect on meteorological and geodetic satellites 24 p4279 A66-42963
- PRECIPITATION**
- SA ELECTRON PRECIPITATION**
- SA SNOW**
- Statistical relations between weather conditions and geometry of radio echoes produced by cloud and precipitation fields 02 p0252 A66-11268
- Precipitation formation considering collision efficiency of different-size droplets, noting influence of gravitational and electric fields, space charge, atmospheric turbulence, etc 06 p0905 A66-16269
- IGY and IGC data on atmospheric washout of radioactive fission products by precipitation 14 p2376 A66-27540
- Interrelation between lunar phase and occurrence of precipitation larger than 10.0 mm per day in northern Germany 16 p2742 A66-31113
- Temperature and structure effect on hydride precipitation kinetics in titanium, using resistometric technique, noting nucleation problem 16 p2724 A66-31266
- Precipitation model explaining formation of rain drops from clouds less than several kilometers thick, assuming Gaussian frequency distribution of vertical currents 18 p3130 A66-35015
- Precipitation occurrence in fluctuating updraft 18 p3130 A66-35018
- PRECIPITATION HARDENING**
- Precipitation in 17-7 PH stainless steels analyzed, measuring saturation magnetization, Youngs modulus and hardness as functions of aging time for material in condition T 01 p0086 A66-10412
- Heat treatment cycle effect on mechanical properties of corrosion resistant precipitation hardened steel AM 355 in terms of metallographic structure 02 p0242 A66-11304
- Tensile testing study of hardening

- mechanisms when niobium carbide precipitation occurs during deformation of 18Cr/12Ni/Nb austenitic stainless steel at 650 degrees C 02 p0246 A66-12195
- Quench aging, heat treatment which rationalizes role of vacancy-solute atom association and effect on precipitation hardening aluminum 10 p1545 A66-21218
- Nickel-chromium alloys with niobium in study of precipitation hardening and hardness 11 p1716 A66-22749
- Hardness, coercive force, saturation induction and electric conductivity during precipitation hardening of two Co-Ni alloys with Ti and Al 12 p1894 A66-23967
- Age-hardening of Fe-Ni-Ti alloy martensite associated with formation of ordered Ni-Ti phase 13 p2106 A66-25331
- Precipitation behavior of nickel-molybdenum and nickel-molybdenum-chromium alloys 16 p2722 A66-30310
- Aging temperature ranges for tensile specimens of equiatomic niobium-zirconium alloys, noting phase diagrams, structural changes, mechanical properties, precipitation hardening, etc 17 p2940 A66-33290
- Phase transformation and precipitation processes as function of aging treatment in 15 percent Ni maraging steel 18 p3122 A66-33752
- Grain boundary precipitation and intermediate phase in polycrystalline oxide systems after annealing 19 p3387 A66-35414
- PRECIPITATION PARTICLE MEASUREMENT**
- Behavior of freely falling raindrops during and after intercollision studied, using synchrodropper 03 p0389 A66-12700
- Cloud raindrop sizes and concentration measurement by airborne flow device 06 p0880 A66-16556
- Dependence of horizontal extent of shower cells on vertical wind distribution 08 p1247 A66-18804
- Precipitation distribution in frontal clouds measured from aircraft 11 p1725 A66-22265
- Range height indicator radar observation of bright band, radar reflectivity and dissipating stage of convective precipitation cells 11 p1730 A66-23099
- Cloud raindrop sizes and concentration measurement by airborne flow device 14 p2297 A66-28228
- Precipitation of electrons and protons into atmosphere from inside magnetosphere, within auroral zone and at polar caps 20 p3640 A66-38320
- Aerosol particle precipitation in surface layer of atmosphere measured by modified method of Alexandrova 21 p3760 A66-39366
- Doppler radar applied to atmospheric precipitation processes, noting drop size distribution in widespread rain, height-time sections of vertical air motion and maximum particle velocity, etc 22 p3942 A66-39737
- PRECISION**
- Thermal noise in internal measuring instruments affecting limitations on spacecraft open-loop inertial autonomous control system precision 18 p3132 A66-33872
- PREDICTION**
- S IMPACT PREDICTION
- S LINEAR PREDICTION
- S PERFORMANCE PREDICTION
- PREDICTION THEORY**
- Prediction display based on computer extrapolated data in aircraft piloting 02 p0187 A66-11985
- Prediction error of time series from finite past 03 p0387 A66-12619
- Predicting systems based on first derivative of predicting function or on terms in Kolmogoroff functional expression describing history of time function 04 p0503 A66-13772
- Maximally reliable exponential prediction equations for data rate limited tracking servomechanisms 08 p1183 A66-18931
- Recursive estimation of radar or radio astronomy target parameters, considering functional dependence of covariance function of received signals 10 p1505 A66-21841
- Theoretical and engineering aspects of applying predicting systems to automatic guidance and control 11 p1673 A66-22201
- Numerical dynamic predictor for control systems disturbed by random noise, discussing Fokker-Planck equation, Crank-Nicolson difference model, etc 11 p1680 A66-23279
- Computer program for predicting satellite long-term orbit decay and digital simulation of atmosphere and reentry conditions [AIAA PAPER 66-357] 12 p1951 A66-24491
- Three models of constrained preview control with successive target values of nonuniform importance 16 p2644 A66-31272
- Critical Human Performance and Evaluation /CHPAE/ Program 20 p3509 A66-37893
- Qualitative analytic function-test maintainability prediction equations from regression analyses on hardware 20 p3569 A66-37922
- Learning curve theory used to explain tendency toward decreasing downtime observed in maintenance of many systems 20 p3569 A66-37924
- System effectiveness through reliability prediction, reviewing fundamentals of prediction techniques including time-to-failure, variables data and physics of failure 20 p3572 A66-37952
- Recognition and prediction systems, developing criteria for resolvable arguments 23 p4041 A66-41395
- PREDICTOR**
- Electronic predictor instruments for dynamic control and simulation and possible application to lunar spaceship 13 p2048 A66-25896
- Procurement source and military rank as predictors of success in flight training 15 p2442 A66-28660
- Highly stable predictor-corrector methods for solving systems of differential equations 16 p2658 A66-31348
- Short time prediction display applicable to stabilization problems, discussing extrapolation and accelerated time scale methods 18 p3061 A66-33884
- PREFLIGHT ANALYSIS**
- Feasibility of pure-fluid missile control system demonstrated by systems analyses, preflight tests and flight tests 01 p0140 A66-10020
- Preflight checking of aircraft gyroscopes and accelerometers noting built-in spin detection, torque generator and gimbal check 01 p0070 A66-10956
- Air traffic control transponder performance preflight test set, ground-based equipment for fast and positive checkout 11 p1732 A66-22898
- Simulation testing pilot performance in orbiting Gemini spacecraft based on tracking rate errors and fuel consumption 17 p2872 A66-31963
- PREFLIGHT OPERATION**
- Preflight planning and training stages for Gemini V, considering spacecraft test, mission simulators, planetarium, survival and parachute training, etc 17 p2868 A66-32686
- Rescue teams for manned testing in environmental chamber for Gemini spacecraft noting personnel, chamber and personal equipment, test operations and rescue function and drill 22 p3857 A66-40240
- PRELAUNCH PROBLEM**
- Star tracking tests to achieve accurate stellar sensor positioning prior to missile launching, considering calibration of critical hardware 18 p3132 A66-34045
- PRELAUNCH TESTING**
- Design and development of Diamant launch vehicle, discussing prelaunch testing 10 p1610 A66-21254
- Vertical profile of wind velocity determined, using lifting sensors for prelaunch rocket operations [AIAA PAPER 65-15] 12 p1883 A66-24698
- Facility for sterilization of space flight vehicles permitting sterile access to flight hardware for assembly, checkout and repair 13 p2057 A66-25270
- High reliability digital test command system for use as part of prelaunch acceptance checkout equipment for Apollo program 15 p2460 A66-28989
- Missile prelaunching development stage, detailing countdown and field test preparation 18 p3246 A66-34043
- Systems phenomena representation by time-phased sequence of complementary activities 19 p3467 A66-35398
- PREMIXED FLAME**
- Behavior of excess radical concentrations, H, OH and O as function of height above reaction zone in premixed acetylene-air flames 03 p0414 A66-12488
- Unstable combustion products of glow discharge, discussing effect of propagation rate of hydrogen-oxygen flame 21 p3834 A66-38473
- PRESSING**
- SA COLD PRESSING
- SA HOT PRESSING
- Metal powder behavior during dynamic and static pressing by energy release of high explosives 07 p1038 A66-18160
- Molten metal pressing products as affected by processing parameters 14 p2304 A66-28203
- Form stability of shallow convex skin panels produced by press forging 15 p2615 A66-29781
- PRESSURE**
- S ATMOSPHERIC PRESSURE
- S BASE PRESSURE
- S BLOOD PRESSURE
- S CHAMBER PRESSURE
- S COMPRESSION
- S CRITICAL PRESSURE
- S DYNAMIC PRESSURE
- S ELECTRON PRESSURE
- S FORCE
- S GAS PRESSURE
- S HIGH ALTITUDE PRESSURE
- S HYDROSTATIC PRESSURE
- S IMPACT PRESSURE
- S INTERNAL PRESSURE
- S ISOSTATIC PRESSURE
- S LIGHT PRESSURE
- S NEWTON PRESSURE LAW
- S PARTIAL PRESSURE
- S RADIATION PRESSURE
- S STAGNATION PRESSURE
- S STATIC PRESSURE
- S STRAIN
- S SURFACE PRESSURE
- S TRANSIENT PRESSURE
- S VAPOR PRESSURE
- S WALL PRESSURE
- S WIND PRESSURE
- PRESSURE APPARATUS**
- S LOW PRESSURE CHAMBER
- S VAPOR PRESSURE APPARATUS
- PRESSURE BREATHING**
- Breathing mechanics during transverse acceleration, discussing experiments and measurements made on man 04 p0466 A66-14075
- Physiology of breathing at reduced pressure and design of aircraft oxygen system, noting cabin and mask design 10 p1489 A66-22116
- Physiological effects of pressure breathing and aveolar oxygen tension at high altitude 10 p1489 A66-22117
- PRESSURE BROADENING**
- Absorption contour for fundamental vibration-rotation band of nitrogen oxide compared with pressure broadened spectra 04 p0473 A66-13651
- Line width and shifts in molecular spectra of gases, giving general formulas for pressure broadening, phase shift of rotation, amplitude modulation of radiation and rotationally inelastic collisions 16 p2750 A66-30118
- PRESSURE CABIN**
- Pressure cabin design and utilization, noting relation between air speed and environmental temperature on kinetic heating, contamination of cabin air, pressurization control, sealed cabin advantages, etc 10 p1492 A66-22110
- PRESSURE CHAMBER**
- Simulated space environment testing, discussing limitations due to cost, outgassing, temperature and radiation simulation 13 p2015 A66-25688
- Nervous activity increase, EEG, EKG, gas exchange, respiration, urine, blood pressure, oxygen content and morphological state of humans after prolonged pressure chamber confinement 15 p2443 A66-29444
- PRESSURE COEFFICIENT**
- Center of pressure formulae for cowi shapes at zero incidence having profiles for which drag is minimum in Newtonian flow 01 p0006 A66-10344

- Tabulated values of ratio of cone surface pressure-pressure at shock 02 p0175 A66-11570
- Pressure coefficient of accelerating slender body in terms of body geometry and Mach number for velocity potential, using acoustic theory [ASME PAPER 65-WA/APM-28] 05 p0607 A66-15449
- Relation between flow in separated region and heat transfer for shallow rectangular cavity in subsonic turbulent airflow 05 p0607 A66-15463
- Losses when compressible and constant density fluids flow across abrupt enlargements and contractions [ASME PAPER 65-WA/PTC-1] 05 p0663 A66-15603
- Quasi-steady flow relations to study wave action in duct with gauze 06 p0873 A66-16932
- Wave action in duct with gauze calculated, using steady flow relations including pressure loss coefficients 07 p1026 A66-18281
- Optimum two-dimensional wings for minimum drag subjected to pressure coefficients defined by Busemann second-order theory 11 p1630 A66-22507
- Pressure coefficient of accelerating slender body in terms of body geometry and Mach number for velocity potential, using acoustic theory [ASME PAPER 65-WA/APM-28] 12 p1797 A66-23968
- Tangent cone method extended to determine pressure coefficients of yawed circular cones and ogives at angle of attack 18 p3048 A66-33820
- First-and second-order theory for uniform shear flow past airfoil, obtaining expressions for pressure, lift and moment coefficients 23 p4011 A66-41879
- ## PRESSURE DISTRIBUTION
- ### SA SUPERSONIC PRESSURE DISTRIBUTION
- Fluctuating pressures at surface of Saturn vehicle studied by use of 2.75 percent models in wind tunnel 01 p0005 A66-10125
- Pressure distribution of flare ejected as luminous gas ribbon, with solution for propagation along magnetic field in MHD approximation 02 p0284 A66-12126
- Nonlinear boundary value problem solution as applied to effect of uniformly distributed pressure and concentrated load on spherical dome 02 p0301 A66-12174
- Linearized supersonic theory for favorable thickness distributions and drag reduction for wings in supersonic flow [AIAA PAPER 65-716] 03 p0314 A66-12542
- Pressure distributions on cambered bodies of arbitrary cross section at angle of attack applied to transport fuselage afterbody design [AIAA PAPER 65-718] 03 p0314 A66-12543
- Jet tab system influence on pressure distribution within rocket nozzle for missile control 03 p0431 A66-12749
- Applicability of Pascal law in nonuniformly heated gases verified by measuring pressure anisotropy vs temperature gradient in gas sample 03 p0393 A66-13187
- Pressure distribution and heat transfer for flow over simulated cylindrical parachutes [ASME PAPER 64-WA/HT-7] 04 p0457 A66-13394
- Wind tunnel study of supersonic guide surface parachute considering shock waves, pressure distribution and mass flow 04 p0457 A66-13528
- Externally pressurized foil gas bearings, employing successive approximations method to solve Reynolds equation for fluid and equilibrium equation for foil [ASME PAPER 65-LUB-1] 04 p0526 A66-14237
- Partial porous metal bearings performance during steady state operation with full film of lubricant, determining pressure distribution [ASME PAPER 65-WA/LUB-3] 05 p0689 A66-15526
- Radial pressure distribution on enclosed rotating disk with or without blades and with radial outward or inward throughflow [ASME PAPER 65-WA/FE-10] 05 p0691 A66-15729
- Pressure distribution and skin friction measurements confirming that effects of changing base flow conditions decay with distance upstream along airfoil surface 06 p0801 A66-15999
- Pressure and temperature distribution across contact strip between two elastic cylinders with parallel axes in presence of frictional heating [ASME PAPER 65-LUBS-1] 06 p0961 A66-16201
- Exponential thermodynamic path function to predict pressure distribution and load-carrying capacity of infinite gas-lubricated slider bearing 06 p0885 A66-16223
- Effect of wake of flow past body on pressure distribution over body 07 p0979 A66-17477
- Pressure distribution on oscillating two-dimensional symmetric airfoil in incompressible flow, examining trailing edge angle influence 07 p0982 A66-18133
- Friction stresses in turbulent lubrication film and dependence on Reynolds number and pressure distribution studied, using mixing-length hypothesis [ASLE PREPRINT 65AM 3A1] 07 p1039 A66-18289
- Chamber pressure balanced piston nozzle for fast depressurization to bring about combustion quenching 08 p1281 A66-18833
- Pressure distribution and heat transfer for laminar boundary layer flow over highly swept blunt delta wings in hypersonic free stream [AIAA PAPER 66-130] 08 p1162 A66-18953
- Transition regime mass flow rate and longitudinal pressure distribution along short tube with bellmouth entry 08 p1207 A66-19131
- Variation of mean applied pressure with deformation size when prismatic body slowly indents semifinite block 08 p1311 A66-19294
- Pressure distribution on star-shaped bodies in wind tunnel at Mach 4 and Reynolds number .000006 08 p1165 A66-19480
- Nonstationary supersonic flow in near sonic range, calculating pressure distribution in oscillating profile 09 p1328 A66-20875
- Optimum slender body with variable skin friction coefficient, noting minimal drag design for hypersonic flow under Newtonian pressure distribution 11 p1631 A66-22513
- Shape of nonslender body of revolution for minimum total drag in viscous hypersonic flow at Newtonian pressure distribution and constant friction coefficient 11 p1631 A66-22516
- Pressure and temperature distribution in flow of combustion products in presence of transverse magnetic field 11 p1786 A66-22596
- Leading edge pressure distributions measured on circular cylinders in normal cross flow, obtaining data from tests in arc-heated perfect gas and variable atmosphere wind tunnels 11 p1686 A66-22845
- Hypersonic rarefied gas flow in short ducts, measuring wall static pressure and stream total pressure distributions 11 p1634 A66-22932
- Pressure distribution and air injection effects in transitional separated flow over spiked hemisphere at supersonic speed 11 p1635 A66-23004
- Modified Newtonian-Prandtl Meyer approximation technique to determine pressure distribution over blunt body 12 p1796 A66-23600
- Pressure distribution over slender delta wing, considering thickness effect 12 p1796 A66-23606
- Pressure distribution of viscous electrically conducting fluid in lubricating layer of cylindrical bearing 12 p1887 A66-24425
- Supersonic gas flow past cylindrical obstacle on plate in wind tunnel at Mach number 2.5, noting separation line, pressure distribution and flow orientation 12 p1798 A66-24437
- Flow past elliptic cones in wind tunnels at varying Mach and Reynolds numbers, noting surface pressure distribution, shock wave shapes and flow parameters at supersonic speeds 12 p1798 A66-24439
- Test rig for gas-lubricated journal bearings measuring frictional torque, gas film pressure distribution, static and dynamic eccentricity changes, etc 12 p1859 A66-24929
- Shock waves, pressure distribution and mass flow effects on supersonic guide surface parachute 13 p1994 A66-25589
- Time behavior of 3889 and 5016 angstrom line helium emission during initial transient of RF discharge, noting pressure dependence and signal intensity 13 p2104 A66-26335
- Linearized surface pressure distribution on streamlined ducted bodies in axisymmetric flow, considering aerodynamic loading on annular airfoil 13 p1993 A66-26716
- Water entry cavity for missiles, noting parameters, cavity development and collapse, etc 13 p2071 A66-26722
- Pressure distribution and heat flux on surface of nose cone 14 p2217 A66-27337
- Pressure distribution and shock standoff distance on spherically blunt cones in supersonic wind tunnel 14 p2220 A66-27968
- Pressure distribution along wing and body of wing-body combination 14 p2221 A66-28185
- Pressure distribution of metal on rolls during rolling process 14 p2303 A66-28200
- Failing sphere measurements of atmospheric density, noting temperature and density profiles, pressure distribution, etc 15 p2494 A66-30041
- Radial pressure distribution on enclosed rotating disk with or without blades and with radial outward or inward throughflow [ASME PAPER 65-WA/FE-10] 16 p2710 A66-30343
- Pressure effect on cone caused by spike protruding at angles of attack may provide aerodynamic directional control at supersonic speed 16 p2629 A66-31117
- Local heat transfer rates and pressure distributions over windward half of yawed circular cylinder at Mach 8 16 p2630 A66-31254
- Temperature and pressure distribution for fluid flow through porous walls of cylindrical and spherical bodies and sectors [AIAA PAPER 66-433] 16 p2829 A66-31489
- Pressure distribution, skin friction and heat transfer for sharp-and blunt-nosed slender bodies in hypersonic air flow 17 p2837 A66-32070
- Lift-to-drag ratio attainable by slender, homothetic body at hypersonic speeds, assuming Newtonian pressure distribution and constant skin-friction coefficient 17 p2838 A66-32348
- Supersonic flow over downstream-facing step on circumference of ducted axisymmetric body used in flow reattachment, measuring surface pressure distributions 17 p2839 A66-32440
- Experimental prediction theoretical prediction comparisons of pressure distributions, force and stability coefficients for spherically blunt cone at various angles of attack 17 p2839 A66-32473
- Static pitching moment coefficient determination from location of center of pressure in right circular cone, using Newtonian impact mechanics 17 p2840 A66-32494
- Computer solution using Bubnov-Galerkin method to determine concentrated force effect on shallow spherical dome 17 p3026 A66-32601
- Temperature and pressure distribution for fluid flow through porous matrix, noting chemical reaction, heat transfer, boundary layer flow, etc [AIAA PAPER 66-423] 17 p2910 A66-32752
- Hertzian contact of anisotropic bodies, reducing problem to one of evaluating contour integrals by Fourier transform method 17 p3029 A66-32792
- Flow structure and heat transfer for rearward facing step in supersonic flow, discussing critical Reynolds number, flow through lip shock, etc 17 p2913 A66-33068
- Pressure distribution of gas-lubricated spiral-groove thrust bearing or compressor [ASME PAPER 66-LUBS-1] 17 p2931 A66-33176
- Loading of thin ring airfoil in unbounded spherical source flow field, calculating vortex distribution, strength, etc [ASME PAPER 66-FE-3] 17 p2914 A66-33259
- Laminar flow velocity field and pressure distribution in inlet region of rectangular ducts [ASME PAPER 66-FE-7] 17 p2914 A66-33261
- Wall shape effects on flow regimes and performance in straight two-dimensional

diffusers

- [ASME PAPER 66-FE-13] 17 p2915 A66-33267
Pressure and temperature profiles in turbulent wake behind cone at Mach 5 17 p2842 A66-33472
Aerodynamic stability of slender cone under ablation effect including pressure distribution measurement, ablation-flow field interaction, flow analysis during oscillation, etc
[AIAA PAPER 66-410] 18 p3045 A66-33635
Shock wave velocity and pressure in solids, noting design and construction of measuring device, application and operation 18 p3157 A66-34630
Flow analysis of swept back blades in water tunnel, noting flow patterns, surface pressure distribution, lift-drag ratio, etc 18 p3049 A66-34649
Pressure distribution at low speeds on two-dimensional airfoils with blunt trailing edges at zero incidence, taking into account wake 19 p3278 A66-36751
Jet impact on plane surface at oblique angle, noting transformation from jet to thin sheet and role of stagnation pressure 20 p3546 A66-37805
Asymmetric shear flow of viscous fluid past flat plate, justifying constant pressure assumption and examining flow patterns at lower surface in plate proximity 20 p3547 A66-37978
Supersonic gas flow states in transition regime, discussing change from dynamical to molecular flow, velocity and pressure distribution and conditions for freezing of translational degrees of freedom 20 p3548 A66-38084
Pressure distribution in laminar flow between parallel disks, noting inertia effects 21 p3729 A66-39439
Oblique shock wave formal determination of aerodynamic forces and pressure distribution on delta wings in supersonic or moderately hypersonic flow 21 p3695 A66-39602
Distribution of differential pressure on parachute canopies during inflation using pressure transducers and high speed photography, calculating stress distribution 22 p3846 A66-40600
Pressure variation induced by ignition of air-hydrocarbon mixtures studied by stroboscopic cinematography and simultaneous pressure measurement 23 p4148 A66-41176
Axial pressure asymmetry produced by Hall effect in linear pinch discharge 23 p4104 A66-41512
Pressure distribution of steady flow through cascade of closely spaced circular cylinders 23 p4010 A66-41778
Slow steady viscous flow through annulus between porous circular cylinders with uniform arbitrary injection and suction velocities, calculating wall porosity effect on velocity and pressure distributions 24 p4193 A66-42156
Pressure distribution in slug of shock wave excited in electrical discharge shock tube 24 p4242 A66-42405
Flat plate laminar boundary layer in supersonic wind tunnel, measuring pressure distribution and profiles and heat transfer rates, noting dissociation fraction effects 24 p4194 A66-42411
Pressure distribution on nozzle block of oblique-exit-plane nozzle with supersonic turbulent flow and calculation of thrust, thrust vector and torques 24 p4157 A66-42774
Velocity gradient on blunt axisymmetric bodies in stagnation region if pressure distribution is known, using isentropic flow equations 24 p4158 A66-42798

PRESSURE DRAG

- Slender bodies with minimum inviscid pressure drag derived, using hypersonic small disturbance approximation to shock expansion method
[AIAA PAPER 66-129] 07 p0984 A66-18463
Optimal contours minimizing pressure drag of symmetric wings, assuming zero angle of attack and sharp edges, using Ackert linear flow theory 11 p1630 A66-22503
Minimization of total drag /pressure and friction/ of two-dimensional wing with unspecified chord, finding extremal solutions which include one, two or three subarcs 11 p1630 A66-22504

- Shape determination of bodies of revolution minimizing pressure drag in linearized supersonic flow 11 p1630 A66-22505
Minimizing pressure drag of three-dimensional wing in linearized supersonic flow with Euler equations being partial differential equations 11 p1630 A66-22506
Newtonian flow model minimization of pressure drag of slender axisymmetric two-dimensional body subjected to isoperimetric constraints 11 p1631 A66-22511
Nonslender bodies of revolution with minimum pressure drag, noting derivation of minimizing curves for Newtonian flow 11 p1631 A66-22514
Minimum pressure drag for nonslender hypersonic body calculated, using normalized coordinates 11 p1631 A66-22515
Transversal contour of minimum pressure drag for body with noncircular cross section 11 p1631 A66-22517
Total drag minimization for three-dimensional body in Newtonian flow, assuming two planes of symmetry and constant skin-friction coefficient 11 p1632 A66-22520
Slender bodies with minimum inviscid pressure drag derived, using hypersonic small disturbance approximation to shock expansion method
[AIAA PAPER 66-129] 23 p4011 A66-41880

PRESSURE DROP

- Generalized method for predicting pressure loss of straight and bent flexible sections of metal hose 04 p0459 A66-13640
Pressure drop in entrance region of abrupt inlet circular tube for continuum laminar flow conditions
[ASME PAPER 65-WA/APM-5] 05 p0663 A66-15428
Slip and compressibility effect on velocity and pressure drop characteristics of rarefied gas flows in rectangular and annular ducts [ASME PAPER 65-FE-20] 06 p0871 A66-16218
Loss in pressure of perforated bottoms as function of resistance parameter of single boreholes 07 p1021 A66-18058
Pressure drop in entrance region of abrupt inlet circular tube for continuum laminar flow conditions
[ASME PAPER 65-WA/APM-5] 10 p1523 A66-21471
Losses in vaneless diffusers of centrifugal compressors and pumps due to wall friction and sudden expansion mixing at entrance [ASME PAPER 65-FE-1] 10 p1540 A66-21504
Gas dynamic problems in low pressure microthrust engines, noting parameters such as type of nozzle flow, pressure drop causes, etc 11 p1761 A66-22461
Vacuum effects on lubricants and bearing materials due to reduced ambient pressure and low concentration of oxidizing gases 12 p1885 A66-24383
Radial diffuser using swirl-free incompressible flow between narrowly spaced disks of radial channel and supply-pipe outlet
[ASME PAPER 65-FE-12] 12 p1864 A66-24548
Conditions under which gas bubbles arise in organs and physiological fluids of living organism during pressure drop 13 p2011 A66-26577
Rarefied gas flow in hydrodynamic entrance region of circular tube, noting variation with density level, velocity profile and pressure drop for developing flow 13 p2070 A66-26713
Pressure drop for non-Newtonian flow in inlet length of straight channel 14 p2279 A66-28464
Pressure drop as function of flow rate for helical flow of non-Newtonian polyisobutylene solution 15 p2477 A66-28615
Heat pipe exhibiting very high effective thermal conductivity, showing temperature distribution, boiling heat transfer coefficients, vapor temperature and pressure drop 16 p2827 A66-30914
Turbulent flow field in straight circular tubes of sodium carboxymethylcellulose solutions, measuring pressure drop velocity profile over wide range of Reynolds numbers 17 p2906 A66-32037
Pressure losses in vanned elbows of circular cross section and possibility of gain in efficiency by splitting vanes 24 p4195 A66-42582

PRESSURE EFFECT

- Materials - ASTM International Conference, Philadelphia, February 1964 01 p0085 A66-10291
Crystal chemistry of nonmetallic materials prepared under moderate or high pressure and recovered and retained under ambient conditions 01 p0090 A66-10292
Structural and mechanical properties of metals and alloys subject to high pressure and temperature 01 p0085 A66-10293
Pressure and temperature effects on intermetallic semiconducting compounds 01 p0118 A66-10294
Prismatic slip in polycrystalline titanium diboride subjected to high hydrostatic pressure at room temperature 01 p0086 A66-10489
Fabrication, testing and experimental results for rigid-vinyl plastic monocoque domes subjected to external pressure loads 01 p0156 A66-10918
Pressure dependence of output of helium-neon gaseous laser in high pressure range 02 p0239 A66-11375
Chemical reaction between iron and extreme pressure agents like chlorine and sulfur for corrosion mechanism analysis [ASLE PREPRINT 65-LC-11] 02 p0237 A66-12254
Alveolar nitrogen concentration and environmental pressure influence upon rate of gas absorption from nonventilated lung in dog 03 p0324 A66-12357
Shells and tubes subjected to internal and external pressures including analysis of transition theory for sheet-bending, considering creep rupture and relaxation 03 p0436 A66-12696
Gas phase nonideality and mean column pressure effects on sample retention in gas-solid partition chromatographic systems with real carrier gases 04 p0472 A66-13396
State equation for carbon dioxide describing gaseous and liquid phases and left and right boundary curves at temperatures and pressures 04 p0572 A66-13660
Pressure volume recombination coefficient in oxygen, using capacitor to determine average ion density 04 p0549 A66-14286
Mechanical sapphire-point pressure effect on characteristics of silicon p-n junction 04 p0570 A66-14491
Conductivity dependence of acoustoelectric effect in cadmium sulfide samples 05 p0731 A66-14653
Pressurization effect on fuselage drag of Boeing 720 jetliner based on boundary layer measurement 05 p0606 A66-15077
Minimization of solar radiation pressure effects for gravity-gradient stabilized satellites, primarily attitude errors of pressure torques
[ASME PAPER 65-WA/AUT-2] 05 p0770 A66-15703
Animal exposure to low pressure-high oxygen environment noting pressure control, electronic watering device and constant environmental temperature 06 p0815 A66-15942
Lower body negative pressure used to restore hydration after recumbency diuresis following bed rest 06 p0813 A66-16823
Pressure forming of tungsten, molybdenum, titanium, beryllium and chromium composite 08 p1229 A66-18692
Change in Fermi surface topology, induced in superconductor by external pressure, leads to nonlinear variation of transition temperature with pressure 08 p1269 A66-18978
Liquid oxygen density as function of temperature and pressure 08 p1280 A66-19428
Thermodynamic and kinetic effects of gas pressure on performance of fuel cell using one or two gas electrodes 08 p1172 A66-19654
Inhalation toxicity at ambient and reduced pressures in monkeys, dogs and rodents upon exposure to ozone, nitrogen dioxide and carbon tetrachloride 08 p1176 A66-19724
Wavelength change of spontaneous and stimulated emission with uniaxial pressure under CW operation of GaAs diode laser at 4 degrees K 09 p1385 A66-19922
Pressure effect and superconducting transition temperature effect on thallium and mercury-impure

- thallium 09 p1411 A66-19957
Positive pressure breathing effect on vibration tolerance of 09 p1335 A66-20529
Ablation of blunt metallic body near stagnation point solution using integral equations, noting pressure 09 p1472 A66-20833
Plasma sheath properties near discharge tube anode, noting relation of electron current distribution along discharge radius and ion energy spectrum to 10 p1558 A66-21999
Pressure induced change in energy gap and forbidden bandwidth of lead telluride 10 p1587 A66-22152
Internal or external pressure effect on natural frequencies of conical shell, noting role of inertia forces, using linear shell theory 11 p1780 A66-22330
Chemical reaction between iron and extreme pressure agents like chlorine and sulfur for corrosion mechanism analysis [ASLE PREPRINT 65-LC-11] 12 p1889 A66-24993
Effect of external or internal static pressure on natural frequencies of unstiffened, cross-stiffened and sandwich cylindrical shells 13 p2194 A66-25142
Combustion of composite ammonium perchlorate based propellants near extinction pressure, noting burning rate parameters 13 p2171 A66-25181
Conductivity dependence of acoustoelectric effect in cadmium sulfide samples 13 p2167 A66-25928
Strain rate and pressure effects on tensile behavior of viscoelastic composite solid propellant 13 p2171 A66-26116
Helium-neon gas laser used to study pressure effect on line shape of 2s-2p optical transitions of neon excited states 13 p2100 A66-26198
Pressure effects in Fabry-Perot lossy-cavity gas laser output 13 p2101 A66-26199
Pressure effects of argon on fine structure components of first two members of cesium principal series 13 p2135 A66-26263
Pressure effects of helium on fine structure components of first two members of cesium principal series, noting changes in shift curves 13 p2135 A66-26264
Stability of rectangular transversely isotropic plate hinged at three sides under uniform pressure applied to two opposite hinged sides 13 p2205 A66-26453
Stability loss of shells of revolution under effect of axial compression and radial pressure with no restrictions on generatrix curvature, using strain energy method 13 p2206 A66-26454
Calorimetric measurement of local temperatures in nitrogen plasma jet at atmospheric and subatmospheric pressures [DGRR PAPER 66-002] 13 p2082 A66-26493
High pressure manufacturing methods including fluid-to-fluid extrusion, tube expanding, flange forming, shell drawing, etc [ASTME PAPER MF66-107] 14 p2299 A66-26948
Viscosity of liquid nitrogen and oxygen measured as function of temperature and pressure 14 p2276 A66-27642
Light output of alpha particles in crystalline and vapor anthracene as function of pressure and temperature 14 p2296 A66-27796
Measurement of heat exchange coefficient for heated cylindrical copper wire immersed in sand particles or glass beads at various low pressures 14 p2415 A66-28319
Ambient pressure effect on tolerance of mice to air blast 15 p2430 A66-28655
Long-term lower body negative pressure in supine position effect on deterioration in cardiovascular function of man during prolonged bed rest 15 p2430 A66-28657
Pressure effect on magnetic moment of solids, noting magnetic transition point, ferromagnetic anomalies, etc 15 p2565 A66-29067
Regression rates of metalized hybrid fuel systems applied to lithium hydride butyl rubber-fluorine-oxygen system, oxidizer flow, etc 15 p2569 A66-29289
Liquid hydrazine decomposition process to determine what chemical or physical changes may be occurring that cause breaks in burning rate/ pressure curves, measuring flame temperature and light emission 15 p2570 A66-29610
Pressure effect on transition point of superconductors from Bardeen-Cooper-Schrieffer theory, perturbation theory and electron scattering near Fermi surface 15 p2568 A66-29714
Pressure dependent energy loss process determined in atomic light analysis of helium positive column, noting molecular-ion concentration relation to 3 D super 3 population 16 p2750 A66-30114
Chronic exposure of rats to gaseous environments of varied composition and pressure, noting exposure capsules, gas flow system, respiratory gas analyzer, etc 16 p2643 A66-30650
Measuring aerodynamic heating of wind-tunnel models by temperature sensitive paint, noting ambient pressure effect 16 p2682 A66-30916
Breakdown by neodymium glass laser radiation in atomic and molecular gases, determining power densities, noting relation of pressure to breakdown power 16 p2718 A66-30938
Local pressure effect on forward and reverse current in germanium p-n junction 16 p2779 A66-31081
Hydrostatic pressure effect on energy gap, carrier concentration and electron and hole mobilities of indium antimonide 16 p2784 A66-31447
Rigid revolution paraboloid pressure on plates and membranes with contour consisting of straight line segments 16 p2822 A66-31509
Pressure dependence of burning rate of stoichiometric fuel-oxidizer mixtures 17 p3036 A66-32825
Changes in massive amorphous boron filaments by heat treatments under reduced pressures and in presence of inert gases 17 p2943 A66-32852
Sonic boom phenomena, noting atmospheric dynamic effects, acceleration and lateral spread, variations in pressure signatures, etc 17 p2847 A66-33026
Volt-ampere characteristics, electrical resistivity, and pressure effect on Gunn phenomena in n-type GaAs in high electric fields 17 p2985 A66-33292
Pressure effect on transition temperature of niobium 18 p3152 A66-33553
Asymptotic static analysis of pressurized torus shells, predicting vibratory frequencies and buckling under external pressure [AIAA PAPER 66-445] 18 p3250 A66-33647
Local pressure effect on changes of forward current and stored charge of germanium p-n and p-s-n structures explained by change of energy gap 18 p3153 A66-33759
Impact of propellant heating on nuclear spacecraft insulation and pressurization systems design 18 p3240 A66-33816
Geometric dimensional, plasma temperature and pressure effects on capillary discharge with evaporating wall 18 p3143 A66-34028
Black body radiation, pressure and temperature dependences of equilibrium composition, enthalpy, specific heat and electron density of air-carbon plasmas 18 p3144 A66-34040
Thermodynamic properties of plasmas in pressure and temperature equilibrium, showing evaluation accuracy to 4 percent 18 p3145 A66-34104
Response of burning solid propellant to pressure wave of finite amplitude studied by shock tube [AIAA PAPER 66-601] 18 p3160 A66-34218
Pressure deflagration limit of high energy solid propellants increased to super atmospheric pressures by composition changes [AIAA PAPER 66-679] 18 p3163 A66-34226
Lindemann, Grueneisen and melting laws in theory of normal properties of high pressure solids 18 p3135 A66-34237
Solid rocket propellant quenching by depressurization, noting gas-side heat transfer coefficient 18 p3161 A66-34413
[WSCJ 66-21] Solid propellant ignition, discussing deflagration wave propagation along gas-solid grain surface, flux equilibrium equation, etc 18 p3165 A66-34441
Inertia and pressure effects on energy potential of homogeneous and isotropic turbulence in weakly compressible medium 18 p3100 A66-34608
Cavitation behavior of Herschel-type venturi tube, noting constant flow for varying venturi profile 18 p3114 A66-34646
Plasma sheath properties near discharge tube anode, noting relation of electron current distribution along discharge radius and ion energy spectrum to 18 p3140 A66-34976
Plasma instability in HF electric and constant magnetic field for sufficiently low pressure 18 p3151 A66-35067
Pressure induced change in energy gap and forbidden bandwidth of lead telluride 19 p3440 A66-35766
Hot cathode-gas discharge in equipotential space of magnetic field, noting formation of plasma column with opposite charge and discharge instability 19 p3408 A66-36275
Thermal conductivity measurements for hydrogen via coaxial cylindrical cell noting temperature, pressure effects, residual and conductivity values 19 p3479 A66-36290
Rotation and subsequent instability of plasma based on two-fluid equations, including finite radius of gyration effects for ions in pressure tensor 19 p3419 A66-36538
I-V-P characteristic of p-n junction explained by band gap widening due to mechanical stress exerted by styli, assuming Zener effect 19 p3323 A66-36823
Stability of cylindrical shell of average length with elastic filler under uniform external radial pressure 20 p3665 A66-36911
P-V-T behavior of argon, nitrogen and argon-nitrogen gas mixtures 20 p3677 A66-37089
Ignition analysis of condensed phase fuel suddenly exposed to stationary hot oxidizing gas, noting strong pressure effect due to feedback mechanism 20 p3626 A66-37386
Pressure broadening of microwave lines in semiclassical treatment obtained as limit of quantum impact theory and its limitations 20 p3602 A66-37640
Gas pressure effect on excitation of 4.38-eV level in Pb during hollow cathode discharge in magnetic field 20 p3579 A66-37780
Photodissociation laser system, discussing output energy dependence on pressure, temperature and number of successive optical pumping flashes 20 p3579 A66-37781
Chemi-ionization in reaction zones of hydrocarbon-oxygen or hydrocarbon air flames, noting association with abnormal excitation of hydroxyl radical 20 p3626 A66-38046
Gas sorption and desorption processes at low pressures, discussing molecular adherence to cold solid surfaces, adsorption mechanism of isotherms, vacuum generation via cryotrapping effect, etc 20 p3605 A66-38088
Laplace transform applied to small pressure variations effect on gunpowder burning stability 20 p3681 A66-38121
Hypergolic liquid propellant combinations, noting effect of feed pressure, injection tube diameter and fluid free path on ignition process in combustion chamber 20 p3626 A66-38140
Wind velocity profile for nonstationary atmospheric boundary layer, noting effect of time-dependent variations on turbulence and pressure gradient 20 p3594 A66-38368
Effective electron mass dependence on pressure in InSb determined by measuring electron concentration and thermal emf 20 p3624 A66-38427
Higher harmonics generation of ion cyclotron frequency in longitudinally magnetized plasmas, noting experimental setup and pressure effects 21 p3777 A66-38766
Attitude errors of inertially coupled gravity gradient satellite with solar radiation pressure as dominant disturbance, noting slot problems in stabilized package accommodating damper

motion 21 p3820 A66-38861
Heat transfer between copper sphere and air flow at normal and reduced pressure for various Reynolds numbers 21 p3835 A66-38904
Effective electron mass dependence on pressure in InSb determined by measuring electron concentration and thermal emf 21 p3800 A66-38960
Computer analysis of cylindrical shell stability under uniform external pressure and critical pressure determination for various boundary conditions 21 p3829 A66-38979
Electric field intensity of helium and argon arc column as affected by pressure and current intensity 21 p3783 A66-39021
Vacuum pressure effect on separation distance for arcing of DC current between spacecraft material 21 p3771 A66-39214
Plasma instability in HF electric field perpendicular to given magnetic field under low pressures 22 p3952 A66-39754
Active component of voltage behavior in channel of helium pulse discharge measured, obtaining time dependence of channel resistance, input velocity and energy magnitude 22 p3953 A66-39755
Increased ambient pressure effect on hearing function in divers 22 p3853 A66-39787
Viscoelastic half-space problems with noncommutative operators including solution for equilibrium equation 22 p3989 A66-39821
Pulsed coaxial transmission line nitrogen gas laser, noting pressure effect 22 p3932 A66-40107
McDonnell Martian Environmental Simulation Facility, analyzing sand and dust storm behavior at low pressures 22 p3891 A66-40227
Ruby laser-induced effect of pulsed pressure on KDP crystal surface and thermal bulk effect on excitation of ultrasonic oscillation in crystal 22 p3932 A66-40318
Calculating method for parachute opening forces, system velocity, cloth pressure loading and filling time for horizontal and vertical deployment 22 p3844 A66-40590
High altitude parachute systems test techniques for analysis of inflation, stability variations, porosity, effects at low dynamic pressure, etc 22 p3849 A66-40602
Nose-down pitching of capsule crew escape system observed during track test after separation from test vehicle and due to change in capsule pressure distribution 22 p3850 A66-40603
Instability of long thin circular cylinders under axial compression, bending, torsion, shear and external pressure [ICAS PAPER 66-32] 22 p3996 A66-40663
Spectral analysis of laser discharge in pure and impure He, obtaining spectra of spark at various pressures, determining electron concentration at various stages 22 p3934 A66-40946
Pressure induced flow of elastoviscous electrically conducting incompressible fluid between relatively moving porous walls in presence of transverse magnetic field 23 p4053 A66-41121
Wind tunnel tests determining plume induced flow separation pattern on missile configurations as ratio of nozzle to ambient pressure 23 p4012 A66-41914
Oxygen electrolytic reduction using porous sintered silver electrode, noting effects of gas pressure, current and cathode thickness on potential as applied to fuel cells 24 p4161 A66-42333
Gas pumping effect on output of repetitively pulsed ion lasers 24 p4223 A66-42569
Venus atmosphere noting pressure induced absorption in carbon dioxide-nitrogen atmosphere as indicated in decline of microwave brightness temperature 24 p4277 A66-42668
Argon entropy diagram calculation from sound velocity data and P-V-T relation 24 p4238 A66-42887
Pressure deformation of band structure of HgTe-CdTe alloys determined from measurements of Hall effect and resistivity 24 p4258 A66-43009

PRESSURE FIELD

SA BALANCE EQUATION

Wake pressure of blunt body moving at supersonic speed calculated by analysis of curved half-jet mixing 01 p0007 A66-10630
Measuring apparatus for autoignition times of explosives, propellants and pyrotechnics under various initial vacuum or pressure ranges 01 p0054 A66-10854
Pressure increase in plasma of cylindrical arc column under superimposed axial magnetic field, applying corona equation 04 p0554 A66-14296
Electromagnetic scattering by refractive index distribution characterized by one-dimensional pressure field 05 p0675 A66-14554
Simulation of noise transmission through structures under turbulent boundary layer flow shown to be of doubtful value 10 p1520 A66-21744
Linearization of Rayleigh problem for viscous compressible conducting fluid, considering compressibility effects by evaluating solution of pressure equation 12 p1924 A66-24580
Factors connected with atmospheric dynamic processes, applying hydrodynamic equations to wind field and pressure field variations 12 p1909 A66-24786
Relation between pressure-type fuel supply system and pressure variation in combustion chamber of rocket engine 14 p2373 A66-27382
Digital computer utilization to estimate sonic boom characteristics of complex airplane configuration 17 p2847 A66-33022
Aircraft design to minimize sonic boom pressure field energy 17 p2847 A66-33023
Thermoconductivity through rarefied gases at rest contained between concentric cylinders, varying pressure 19 p3478 A66-36061
Empirical formula for calculating surface wind conditions from barometric field 19 p3394 A66-36453
Vertical velocities in atmospheric front motions, noting pressure and temperature field distributions and application of computer to solve obtained equations 20 p3593 A66-37750
Energy spectral density of ideal sonic boom pressure signatures and equations for HF and LF asymptotic spectral behavior 22 p3848 A66-40301
Wind tunnel tests of sonic boom phenomena, noting weak pressure field measurement, construction of extremely small models, boundary layer effects, etc [AIAA PAPER 66-765] 22 p3894 A66-40646
Potential energy and conservativeness of normal pressure field acting on flat plates 23 p4141 A66-41926
Radiated pressure field due to LF vibration of slender body of revolution expressed as distribution of sources and doublets along body axis 24 p4238 A66-43047

PRESSURE GAUGE

SA IONIZATION GAUGE

SA MANOMETER

SA PIEZOELECTRIC PRESSURE GAUGE
Piston pressure gauge performance characteristics, calculating piston velocity and work and presenting viscosity coefficients for glycerine and oils 04 p0519 A66-13757
Modulation method applied to Bayard-Alpert and suppressor ionization gauges for reducing lower pressure limits 07 p1033 A66-17742
Gauge, using spherical Lucite shell as active element for measuring peak pressures in strong shock waves, designed for underground nuclear explosion 13 p2083 A66-26557
Falling sphere, solar XUV radiation absorption and pressure gauge mass spectrometry for density measurements of thermosphere, comparing results and noting discrepancies 14 p2284 A66-27615
Residual gases total and partial pressures measured, using pressure gauges incorporating hot or cold cathodes, noting omegatron 19 p3361 A66-36616
Drop-weight tester/photographic apparatus for studying impact initiation-explosion process in nitroglycerin 23 p4119 A66-41243

PRESSURE GRADIENT

Hydraulic jump as plane turbulent wall jet

under adverse pressure gradient and finite depth of flow 01 p0056 A66-10314
Hypersonic flow separation over simple geometries and aerodynamic controls, noting pressure gradients and heating-rate distributions [AIAA PAPER 65-753] 03 p0314 A66-12587
Centripetal gas turbine interblade channel without diffuser regions in rotor eliminates pressure gradient buildup in flow core 03 p0315 A66-12698
Wind tunnel contraction study of inviscid incompressible flow using rheoelectrical analogy, discussing experimental techniques, contour velocity distribution, optimum smoke injector and adverse pressure gradient estimation 03 p0352 A66-12719
Pressure range determination where stable plasmoids exist in electric field discharge, with measurements made on rare gases 03 p0405 A66-12987
Intermittency profiles of turbulent boundary layers for various pressure gradients to determine relationship between descriptive quantities and form factor of velocity profile 04 p0508 A66-13516
Cavitation bubble collapse in venturi, discussing flow characteristics under large pressure gradient [ASME PAPER 65-WA/FE-20] 05 p0663 A66-15610
Streamline curvature effect on mixing within boundary layer, deriving magnitude of concentration and pressure 05 p0665 A66-15798
Pressure gradient effect on stability of laminar boundary layer when skin friction at wall vanishes, noting Reynolds number of flow 06 p0874 A66-16999
Self-preserving development in turbulent boundary layer in strong adverse pressure gradient described by two-layer model 06 p0874 A66-17001
Conditions for presence of constant center of pressure in geometrically-complex body immersed in fluid of variable density in stable equilibrium 07 p1031 A66-17408
Pressure gradient influence on velocity profile in boundary layer of plate with semicircular transverse ribs 07 p0979 A66-17449
Incompressible laminar boundary layer equations for flow due to jet against body of revolution extending to infinity in absence of pressure gradient but with axially symmetrical swirl 07 p0981 A66-18045
Compressible turbulent boundary layer as momentum integral and moment-of-momentum integral equations for arbitrary pressure gradient, noting surface heat-transfer effects 08 p1207 A66-19126
Heat transfer through turbulent incompressible boundary layer in presence of moderate pressure gradient 09 p1366 A66-20174
Separation of gas mixture in curved supersonic flow, noting parameters of concentration gradient profile variation 10 p1522 A66-21269
Otitic barotrauma caused by difference between atmospheric pressure and middle ear cavity pressure arising during flight, compression chamber tests, etc, and leading to deafness 10 p1488 A66-22107
Effects and causes of sinus barotrauma/pressure differential between sinuses and outside atmosphere/ noting prevention, treatment and aftereffects 10 p1488 A66-22108
Effective viscosity in defect portion of turbulent boundary layer when flow is under pressure gradients, showing overlapping of wall velocity profiles and defect velocity profiles 11 p1693 A66-23006
Calculating thickness and velocity profile of turbulent boundary layer with pressure gradient 12 p1862 A66-23850
Parametric method of solving equations of laminar boundary layer with longitudinal pressure gradient during equilibrium gas dissociation 12 p1863 A66-24367
Properties of compressible boundary layers with heat transfer and arbitrary pressure gradients calculated, using integral equation and correlation concept for application in hypersonic flows 12 p1865 A66-24581
Blowdown-type high-speed linear cascade wind tunnel with variable exit pressure,

Mach and Reynolds numbers permit boundary layer control 12 p1859 A66-24927

Thermocouple emf, noting pressure dependence and effects of contamination, plastic deformation, electrical shunting, temperature gradients, etc 13 p2076 A66-25042

Thermocouple emf pressure dependence measured for Chromel/Alumel and platinum/platinum-10 percent rhodium and platinum/platinum-13 percent rhodium 13 p2076 A66-25073

Rarefied flow transition at leading edge of flat plate examined, using Navier-Stokes equation, noting new low density jump conditions, viscous layer characteristics, effect of normal pressure gradient, etc 13 p2061 A66-25164

Classical and quantum mechanical turbulence in Helium 2 heat flow, noting transition from laminar turbulent flow of normal and superfluid component, Reynolds number dependence on mutual friction coupling, etc 13 p2128 A66-26275

Velocity profiles of jets and wakes with longitudinal pressure gradient obtained, using polynomial for turbulent shear stress 14 p2217 A66-27276

Unsteady flow of viscous liquid through tube of rectangular cross section under nonuniform pressure gradient assumed to be linear function of time 14 p2279 A66-28462

Longitudinal pressure gradient effect on evolution of finite three-dimensional perturbation in transition boundary layer of upper surface of wing section near critical Reynolds number 15 p2423 A66-28521

Flow pattern and heat transfer distribution in regions of adverse pressure gradient and separated flow over two-dimensional models in Mach 10 airflow 15 p2424 A66-29271

Mellor solutions for linearized wakes and jets in laminar and turbulent flow for class of pressure gradients 15 p2424 A66-29293

Motion of non-Newtonian liquid through two coaxial curved pipes, noting relation between pressure gradient and outflow rate, curvature effect and secondary flow 15 p2479 A66-29397

Finite Larmor radius equations for plasma, noting pressure tensor modification and approximate moment equations 15 p2555 A66-29757

Pressures in incompressible fluid around obstacle for parabolic velocity distribution at infinite distance upstream 16 p2627 A66-30212

Velocity profile in incompressible turbulent boundary layer determined by two methods, noting coincidence of velocity distributions in external portion of layer with velocity defect law 16 p2684 A66-30326

Dynamic law for pressure variation in throttle chamber of hydraulic control booster, taking into account fluid compressibility and change in discharge coefficient 16 p2637 A66-31219

Stationary viscous incompressible fluid flow past rough surface, noting solution stability and friction stress determination for given pressure gradient 16 p2688 A66-31301

Source type hypersonic free stream effects on flow field about axisymmetric cone, obtaining properties in shock layer, boundary layer, pressure gradient, etc 17 p2837 A66-32080

Finite difference method for uniform nonpermanent laminar flow of non-Newtonian fluids between plane, parallel fixed walls, for case of variable pressure gradients 17 p2911 A66-32951

Spiral flow stability of idealized viscoelastic liquid between two rotating concentric cylinders with axial pressure gradient 17 p2914 A66-33171

Critical Reynolds number for pulsating Poiseuille flow determined by studying stability under harmonically and nonharmonically varying pressure gradient [ASME PAPER 66-FE-5] 17 p2914 A66-33260

Laminar, transitional and turbulent boundary layer flows with adverse pressure gradient on axisymmetric blunted conical flared body at Mach 10 [AIAA PAPER 66-493] 18 p3047 A66-33658

Beam deflection type proportional fluid amplifier, noting pressure and flow gain

parameters, transfer characteristics, etc 18 p3054 A66-34129

Two-dimensional non-Newtonian nonisothermal viscous liquid boundary layer flow in stagnation point proximity and flow deviations due to pressure gradient and shearing stress 18 p3266 A66-34637

Velocity and temperature profile for turbulent boundary layers in adverse pressure gradients, including Prandtl number and surface roughness effects in analysis 18 p3101 A66-34667

Altitude distribution of combinations of meridional gradients of pressure, temperature and density 19 p3393 A66-35394

Axial pressure gradient change with geometry in combustion chambers formed by cylindrical and conical sections, using rocket motors burning LOX and JP-5A 19 p3450 A66-35624

Combustion front pressure rise associated with burning of condensed systems with surface pressure greater than ambient pressure 19 p3478 A66-35748

Pressure gradients in F region from model atmosphere, estimating from motion equations variation of magnitude and direction of wind with local time, season and epoch of solar cycle 19 p3352 A66-36626

Nonsteady helical flow of viscoelastic liquid contained in circular cylinder, noting occurrence of oscillations in fluid decaying exponentially with time 21 p3723 A66-38588

Wall flow analysis of logarithmic velocity profile of turbulent boundary layer with zero skin friction throughout region of pressure rise 21 p3729 A66-39449

Mean viscous dissipation and bulk temperature variation in incompressible fully developed duct heat transfer, using Green theorem 22 p3998 A66-40033

Turbulent wakes formed by elliptic disks in low speed wind tunnel, presenting similarity velocity defect profiles, drag coefficients and turbulence 22 p3844 A66-40347

Intermittency in favorable and adverse pressure gradients in turbulent boundary layer measured by modified Corrsin and Kistler method 22 p3900 A66-40384

Pressure gradient elution technique for rapid and quantitative chromatographic separation of purine and pyrimidine bases 22 p3860 A66-40402

Hovercraft difficulty in accelerating through hump, noting wave resistance increase for pressure differential between two compartments of cushion with transverse stability skirt 22 p3901 A66-40678

MHD flow in rectangular channel due to periodic pressure gradient at high Hartmann number 22 p3957 A66-40704

Main parameters of two-stage hydraulic amplifier-actuator system determined with aid of pressure and flow-rate amplification factors 23 p4017 A66-40970

Slow steady flow of viscous incompressible fluid between two coaxial circular cylinders with axial roughness 23 p4054 A66-41122

Heat transfer in entrance section in rectangular duct for incompressible fluid in laminar pulsating flow with periodic pressure gradient 23 p4148 A66-41216

Pressure gradient calculation in three-dimensional laminar boundary layer, using method of local similarity 23 p4009 A66-41724

Regular solutions of laminar boundary layer equations near point of vanishing skin friction, calculating pressure gradient 24 p4194 A66-42413

Critical Reynolds number for pulsating Poiseuille flow determined by studying stability under harmonically and nonharmonically varying pressure gradient [ASME PAPER 66-FE-5] 24 p4195 A66-42578

PRESSURE HEAD

Transient response of truncated conical shell due to traveling pressure front of constant velocity and amplitude approximating vibration 03 p0437 A66-12819

PRESSURE MEASUREMENT

SA IMPEDANCE MEASUREMENT

SA TONOMETRY

Scaling of near field pressure correlation patterns around jet 01 p0010 A66-10123

exhaust 01 p0010 A66-10123

Wind tunnel wall pressure measurements

in sup flow using heated wire as pressure sensor and Wheatstone bridge to record pressure variation 01 p0056 A66-10387

Dynamic pressure and temperature measurements of forward gas expulsion during high speed stall of jet engines [SAE PAPER 650840] 01 p0130 A66-10832

Pressure distribution measurement system for flow field of main turbojet intake of one-eight scale model of Mirage III V aircraft 02 p0210 A66-11206

Contact pressure evaluation, using ultrasonic wave transmission through two surfaces in contact 02 p0235 A66-11688

Optical processes effect on integral wave plasma radiation to determine atmospheric pressure and temperature 03 p0399 A66-12824

Liquids used in manometers for pressure and pressure difference measurement in rarefied gases, considering cadmium boron tungstate, polymethylsiloxanes, etc, noting lack of toxicity, low viscosity, etc 03 p0371 A66-13204

Comparison of relative efficiency of available means of multiple pressure measurement in wind tunnels 06 p0867 A66-15960

Pressure peaks in hydraulic actuator inertia load aggravated in presence of valve overlap, noting cavitation damage [ASME PAPER 65-FE-4] 06 p0808 A66-16213

Pressure, density, temperature and wind measurements in mesosphere resulted from rocket soundings to determine structure 07 p1027 A66-17361

Quasi-conical flow to calculate pressure on wings having curved leading edges 07 p0983 A66-18229

Pressure sensing techniques applied to altimetry in supersonic aircraft 09 p1381 A66-20428

Upper atmosphere temperature and pressure measured with manometers mounted on rockets, using method of successive approximations 09 p1375 A66-20988

Switching device for pneumatic signals, measuring pressure and handling numerous channels simultaneously 10 p1534 A66-21199

General recursion formula for dynamic response of pressure measuring systems considered as series connection of tubes and volumes 10 p1535 A66-21376

Pressure and heat transfer measurement by FM telemetry for models flying freely in hypersonic wind tunnel streams 10 p1538 A66-22041

Pressure distribution and low density effects on sharp flat plates and sharp and blunt cones measured in hypersonic wind tunnel 11 p1634 A66-22930

Thermal transpiration analysis with various gases, testing relation between translocation component of thermoconductivity coefficient and maximum transpiration effect for particular gas, obtaining rotational collision numbers 11 p1787 A66-23214

Rugged micromanometer capable of reliably measuring pressure differences as low as 10 mtorr in flow of gaseous media 12 p1876 A66-23601

Calculation of pressure beneath hovercraft, indicating cushion pressure could be up to 10 percent higher than previous values 12 p1971 A66-24977

Systolic and diastolic blood pressures continuously measured without direct arterial puncture effected, using digital pressure cuff on one arm and brachial cuff on other 12 p1810 A66-25010

Magnetohydrostatic theory of sunspots combined with optical approach to obtain hydrostatic pressure difference 13 p2184 A66-25622

Gauge, using spherical Lucite shell as active element for measuring peak pressures in strong shock waves, designed for underground nuclear explosion 13 p2083 A66-26557

Structure and properties of free supersonic jets including impact pressure and velocity distribution measurements, condensation, etc 16 p2628 A66-30376

Response of impact and static pressure probes in rarefied high speed gas flow 16 p2628 A66-30378

Effect of orifice dimensions and heat transfer to surface with orifice on pressures measured in low density

gases 16 p2628 A66-30379
 Pressure and temperature measurements obtained from closed loop, forced convection boiling and condensing processes under zero gravity 16 p2826 A66-30490
 Pressure measurement for determination of speed of high vacuum pumps based on laws of molecular flow 17 p2929 A66-31976
 Review of experimental capabilities for reaching pressure and temperature conditions prevailing in Earth mantle and core, including bibliography 17 p2918 A66-32661
 Sonic boom effect on people, noting ground overpressure measurement and data obtained from interviews, formal complaints, building damage, etc 17 p2868 A66-33028
 Balloon altitude pressure-temperature measuring device using voltage-controlled oscillator 17 p2927 A66-33149
 Freiberg radiosonde aneroid capsule design modification, using U-shaped axle which is synchronized with capsule deflections 18 p3110 A66-33964
 Sublimation pressure of copper fluoride measured via mass spectrometry, noting dissociation energy 19 p3295 A66-36062
 Pulsed laser action in visible spectrum of singly ionized Ge, Sn, Pb, In, Cd and Zn, listing temperature and pressure ranges 19 p3444 A66-36076
 Residual gases total and partial pressures measured, using pressure gauges incorporating hot or cold cathodes, noting omegatron 19 p3361 A66-36616
 Indirectly heated PTC resistor for measurements of low pressures and high air velocities, noting basic circuit and application to heat exchangers 19 p3362 A66-36824
 Ultrasonic field intensity in liquid measured with microradiometer, discussing instrument design concepts, advantages and operation 21 p3735 A66-38518
 Piezoelectric pressure pickup for measuring pressure of gases and fluids in wake of incident and reflected shock wave 21 p3738 A66-39098
 Mushroom-shaped barium titanate sensor for shock tube pressure recording, noting high acoustic insulation, mechanical strength and vacuum tightness 21 p3738 A66-39099
 Continuous in vivo recording of partial pressure of arterial carbon dioxide and oxygen by mass spectrography 21 p3701 A66-39494
 Interaction between hypersonic wake flow and aerodynamic deployable decelerator, predicting pressure and heat transfer of decelerator 22 p3846 A66-40605
 Shock tunnel external burning experiments to investigate effects of reactive fuel injection into air stream flowing around body [AIAA PAPER 66-744] 22 p3893 A66-40631
 Measurement of partial pressures in ultravacuum, using omegatron and quadrupole mass filter 23 p4071 A66-41872
 Measuring devices and techniques for heat-transfer rate, pressure and force in hotshot tunnels 24 p4206 A66-42168
 Piston manometer calibration for precision pressure measurement 24 p4213 A66-42822
 Ionization gauge for transient gas pressure measurement 24 p4215 A66-43210

PRESSURE OSCILLATION
 Pressure spectrum of turbulent flow assuming flow is generated by random intermittent function 01 p0059 A66-10759
 Turbulent boundary layer pressure fluctuations in subsonic wind tunnel flow and relation to panel vibration response 04 p0509 A66-13535
 Resonant characteristics of hydraulic systems, particularly water or oil-supply lines, using impedance approach [ASME PAPER 65-FE-6] 06 p0885 A66-16214
 Oscillating pressure effect on shock wave detachment and shape at blunt body surface 07 p1023 A66-18108
 Wall pressure fluctuations in subsonic and supersonic turbulent boundary layer flows related to mean shear and turbulence interactions 07 p1023 A66-18113
 Pressure spectrum of turbulent flow assuming flow is generated by random intermittent function 14 p2277 A66-27858
 Wind tunnel analysis of separated flow in

region of several two-dimensional flow perturbations, presenting fluctuating pressure levels as function of Mach number for undisturbed flow [AIAA PAPER 66-456] 17 p2910 A66-32762
 Microbarographic analysis of troposphere-ionospheric storm relationship, ground level pressure fluctuations and polar region traveling pressure waves 17 p2920 A66-33088
 HF pressure fluctuations in heat transfer of diisopropyl hexane seen as caused by shock waves produced by collapsing bubbles 21 p3835 A66-38906
 Optimal control of elastic flight vehicles, describing axis oscillations by equations of beam with variable cross section 21 p3768 A66-39279
 Pressure record of HF combustion oscillations observed in solid propellant rocket motor developed under special small rocket /SSR/ program 23 p4121 A66-41430
 Pressure fluctuations under turbulent boundary layer or in pipe flow, noting surface deflection effect and pressure representation 23 p4061 A66-42027

PRESSURE PROBE
 Impact tube pressure probe response to free molecular rarefied gas flow for arbitrary angle of attack 11 p1692 A66-22939
 Velocity variation along two types of confined jets, with and without lateral flow, in presence of transverse magnetic field 13 p2140 A66-25444
 Experimental boundary layer study on hovering rotors using evaporative chemical films, pressure probes and hot wire anemometers 22 p3843 A66-40249
 Flight testing of laminar flow control on full-scale swept wings, examining total pressure probes, wing wake drag and boundary layer stability utilizing pressure transducer [AIAA PAPER 66-734] 22 p3846 A66-40625
 Bourdon-helix pressure-sensitive switch for air vehicle hydraulic system of XB-70A aircraft and other instruments operating in severe environment 24 p4213 A66-42824

PRESSURE PULSE
 Clamped circular rigid-plastic plates under blast loading distributed over surface [ASME PAPER 65-APMW-34] 04 p0593 A66-14234
 In-flight measurement, describing human pulse wave velocity detection system principles, design and application [ISA PREPRINT 1.2-4-65] 05 p0638 A66-15509
 Mathematical and control operations, utilizing fluoric components such as jet deflection type proportional fluid amplifiers, capillary-tube resistors and tank capacitors [ASME PAPER 65-WA/PID-2] 05 p0624 A66-15679
 Time duration of pressure pulse resulting from intersecting shock waves defined, based on one-dimensional wave interaction 05 p0666 A66-15799
 Dynamic transient response of cylindrical shell to internal pressure pulse generated by blast wave 12 p1959 A66-23799
 Pressure surges, surge accumulators and relief valves studied on Titan I launch vehicle simulator 13 p2056 A66-25131
 Periodic wave phenomenon consisting of concentrated pressure pulses occurring in running turbine stages and responsible for turbine blade failures, noting ratio of nozzle number to blade number for turbine design [ASME PAPER 66-GT-99] 14 p2217 A66-27001
 Clamped circular rigid-plastic plates under blast loading distributed over surface [ASME PAPER 65-APMW-34] 18 p3247 A66-33569
 Periodic wave phenomenon consisting of concentrated pressure pulses occurring in running turbine stages and responsible for turbine blade failures, noting ratio of nozzle number to blade number for turbine design [ASME PAPER 66-GT-99] 19 p3278 A66-36757
 Shock waves and stress from cavity collapse, calculating pressures causing surface damage and jet formation 20 p3547 A66-37812
 Mathematical and control operations, utilizing fluoric components such as jet deflection type proportional fluid amplifiers, capillary-tube resistors and tank capacitors [ASME PAPER 65-WA/PID-2] 21 p3699 A66-39529

PRESSURE RATIO

Pressure dependence of initial recombination of ions in oxygen 04 p0549 A66-14287
 Quasi-linear partial differential equations of transients in liquid rocket engine propellant feed system solved, determining transient pressure ratio [ASME PAPER 65-FE-23] 06 p0942 A66-16217
 Vortex devices, describing Hilsch tube, vortex diode, triode, oscillator, pressure ratio sensor, etc 18 p3054 A66-34130
 Estimation of shock induced pressure rise on wedge or conical body for various Mach numbers, noting variation of blast-induced pressure ratio with incidence angle 19 p3275 A66-35634
 Laval points in ideal gas expansion with energy losses in nozzle or turbine-blade cascade 19 p3276 A66-36305
 Pure fluid absolute pressure ratio miniaturized sensor, noting performance and environmental capabilities [AIAA PAPER 66-748] 22 p3919 A66-40634

PRESSURE RECOVERY
 Model tests on free jet scramjet facility configurations at high Mach numbers, obtaining data on bypass flow pressure recovery and diffusion process [AIAA PAPER 66-745] 22 p3846 A66-40632

PRESSURE REGULATOR
 Hytrol electronic/hydraulic antiskid braking system for automatic braking pressure modulation in BAC one-eleven 400 series aircraft 07 p0992 A66-18165
 Pressure regulation in equalization chamber of model blowdown wing tunnel used at various Mach numbers, calculating compressed-air flow through control valve and characteristics of transfer function 12 p1857 A66-24322
 Fluid interaction devices, noting induction and turbulence amplifiers, impact modulators, logic gates, inverters, etc 18 p3054 A66-34131

PRESSURE TRANSDUCER
 Pressure transducers using miniature semiconductor strain gauges, examining design, temperature effects, diaphragm strain and application 01 p0068 A66-10492
 Thermal shock and wrinkled diaphragms effect on calibration of pressure transducers 01 p0070 A66-10887
 Piezoresistive effect and application to semiconductor silicon pressure transducers, noting diffused silicon beam and diaphragm and Wheatstone bridge 02 p0228 A66-11515
 SNAP-8 instrumentation, emphasizing selection and installation of aerospace type transducers for liquid metal service [ISA PREPRINT 1.11-4-65] 05 p0683 A66-15510
 Pressure transducer with small time constant where pneumatic pulse is transformed into electric signal by means of photoelectric principle 11 p1708 A66-23235
 NERVA reactor instrumentation noting core temperature thermocouples, neutron detectors, vibration and pressure transducers, strain gauges, etc 12 p1912 A66-23703
 Transducer for measuring pressure, temperature, velocity, force, torque and displacement 13 p2082 A66-26312
 Packaging quartz pressure transducers 13 p2084 A66-26565
 Potentiometric type pressure transducer optimization for low static error band 16 p2704 A66-30538
 Slide-wire microbarometer with pressure changes transformed into frequency changes of output signal designed for operation on moving objects 16 p2709 A66-31795
 High speed ferrimagnetic microtransducer capable of embedding in wide variety of materials and sensors to explore stress characteristics and pressure profiles 20 p3555 A66-36851
 Crystal performance and mechanical noise reduction in pressure transducer in shock tube flow 20 p3558 A66-37423
 Miniaturized piezoresistive transducer pressure diaphragm for experimental stress analysis 20 p3559 A66-37501
 Dynamic pressure and flow measurements on small integrated high speed systems, using high speed pressure transducing equipment in integrated circuits and hot-

- wire anemometry 20 p3560 A66-37652
- Miniature transducer assembly for wall-pressure measurements in turbulent boundary layer flows 21 p3736 A66-38651
- Miniature pressure transducer depending on change of resistance across element of conductive rubber 21 p3736 A66-38797
- Cryogenic, flame and nuclear radiation temperature effects on pressure transducers, noting zero and sensitivity shifts and thermal gradients 21 p3740 A66-39427
- Distribution of differential pressure on parachute canopies during inflation using pressure transducers and high speed photography, calculating stress distribution 22 p3846 A66-40600
- Flight testing of laminar flow control on full-scale swept wings, examining total pressure probes, wing wake drag and boundary layer stability utilizing pressure transducer [AIAA PAPER 66-734] 22 p3846 A66-40625
- Simple inexpensive pressure transducer for wave velocity measurement in shock tubes compared to thin film resistance gauge 22 p3921 A66-40900
- Flexensional transducer characteristics investigated, using dynamic and thermal analysis 23 p4067 A66-41206
- Ballistic range blast-traversal testing technique using scale models containing fast response FM telemetry system modulated by capacitance type pressure transducer [AIAA PAPER 66-777] 23 p4053 A66-41333
- Measuring devices and techniques for heat-transfer rate, pressure and force in hotshot tunnels 24 p4206 A66-42168
- Piston manometer calibration for precision pressure measurement 24 p4213 A66-42822
- PRESSURE TUBE**
- Brazier effect and overlap effect in bending of slit thin walled circular tubes [ASME PAPER 65-APMW-20] 04 p0592 A66-14221
- Brazier effect and overlap effect in bending of slit thin walled circular tubes [ASME PAPER 65-APMW-20] 12 p1961 A66-23976
- Natural frequencies and mode shapes of pressurized circular cylinders with flexible stringers and attached point-mass [AIAA PAPER 66-449] 17 p3028 A66-32760
- PRESSURE VESSEL**
- Toroidal pressure vessels discussing volume and weight characteristics of circular elliptic, modified elliptic, circular, equal stress and zero hoop-stress cross sections 03 p0436 A66-12751
- Design and fabrication of air receiver of hypersonic wind tunnel at University of Tokyo 03 p0438 A66-13084
- Shift of gas mass from high pressure to low pressure sides of divided vessel, with communication by bursting diaphragm and by-pass valve [ASME PAPER 65-WA/PID-3] 05 p0664 A66-15638
- Onset of yield in pressure vessels determined by pressure-testing device that prepares plot of pressure vs volume of liquid pumped into vessel [ASME PAPER 65-WA/PET-1] 05 p0779 A66-15641
- Stress distributions in pressure vessel materials due to neighboring spherical and ellipsoidal cavity interactions [ASME PAPER 64-WA/MET-10] 06 p0961 A66-16206
- Radiographic acceptance standards for setting limits on size and distribution of porosity in steel weldments [ASME PAPER 64-WA/MET-3] 06 p0884 A66-16207

- Structure and development of detonation waves in gaseous media 14 p2399 A66-27557
- Response of spherical shell to plane pressure wave, using Timoshenko and membrane theories 14 p2399 A66-27612
- Pressure waves recorded in India associated with Tunguska and Sikhote-Alin meteor explosions 15 p2485 A66-29064
- Pressure wave generation in fissioning gas, examining amplification of pressure pulse with helium 3 as driver 15 p2555 A66-29756
- Energy release effects on unsteady gas flow in explosion 16 p2689 A66-31484
- Effect of sudden enlargements and contractions in flow area on single pressure waves in gases in pipes, covering incident waves of various pressure amplitudes 17 p2841 A66-32890
- Longitudinal elastic-plastic pulse propagation for smooth stress-strain curves concave toward strain axis, applied to long bar loaded at end by short pressure pulse [ASME PAPER 65-WA/APM-29] 18 p3247 A66-33568
- Radiative heat transfer effect on propagation of plane pressure waves in inviscid nonheat-conducting gas applied in theory of angular intensity distribution of integral radiation 20 p3548 A66-38107
- Semidiurnal oscillation in surface pressure as result of strong resonance amplification of small oscillations due to surface heating and gravitational tidal force of Sun 22 p3942 A66-40052
- Generation of pressure wave by explosion of condensed phase fuel particles dispersed in gaseous oxidizer [AIAA PAPER 65-357] 22 p3999 A66-40357
- Oscillating two-phase flow through rigid circular pipe investigated to understand blood cells effects on changes in shape of pressure pulse wave 23 p4058 A66-41916
- Extended explosive charge giving rise to pressure waveform for analysis of sonic boom 24 p4159 A66-42417
- PRESSURE WELDING**
- Correlation of microstructure, microhardness and microchemistry in resistance welded electronic leads 02 p0234 A66-11327
- Resistance microwelding process evaluated by IR energy measurements to determine mechanical strength of joint 02 p0234 A66-11328
- PRESSURIZATION**
- SA FUEL TANK PRESSURIZATION SYSTEM**
- Pressurizing thrust bearings through use of ions and high electric fields [ASME PAPER 65-WA/LUB-1] 05 p0689 A66-15525
- Pressurization systems for high altitude and space flight, discussing pressurized cabins and pressure suits 09 p1336 A66-20243
- PRESSURIZED CABIN**
- Pressurization systems for high altitude and space flight, discussing pressurized cabins and pressure suits 09 p1336 A66-20243
- PRESSURIZED SUIT**
- Three air-cooled and one water-cooled pressure suit evaluated in hot environments 03 p0327 A66-12360
- Rigid articulated pressure suits, discussing design, construction and operation for low external pressure, mobility requirements, etc 06 p0815 A66-15927
- Explosive decompression effects on respiratory system, considering pressurized suits operating at high altitudes 06 p0816 A66-16063
- Body heat storage experiments conducted to physiological limit in pressurized suits 06 p0817 A66-16238
- Metabolic rates in pressurized pressure suit, affecting heat balance of subjects metabolic heat with heat removed by environmental control 07 p0997 A66-17657
- Soviet high altitude pressure-suit development, testing and use, 1934-1955 07 p0999 A66-17666
- Pressurization systems for high altitude and space flight, discussing pressurized cabins and pressure suits 09 p1336 A66-20243
- History, design configurations, construction and materials of pressure suits for human protection at high altitudes 10 p1492 A66-22118
- Acute hemodynamic effects of G-suit inflation, noting elevation of central venous pressure, cardiac output failing due to depressor reflexes and role of ganglionic blockade 12 p1811 A66-25014
- Full pressure suit design for high altitude and space missions, discussing material selection, physiological requirements,

etc 16 p2642 A66-30462
 Instrumentation for biophysical data acquisition for pressure-suited test subjects in space environment simulation 19 p3289 A66-35840
 testing 19 p3289 A66-35840
 Hard shell constant-volume pressure suit affords secure self-contained extravehicular environment capable of fulfilling variety of space maintenance roles 19 p3291 A66-35971
 Man/machine problems in performance of space maintenance, noting conditions for shirtsleeve and pressurized suit, glove-tool interface, etc 19 p3292 A66-35974
 Feasibility of using water condensates recovered from heat exchangers of pressure suits as emergency drinking water source 19 p3294 A66-36379

PRESTON TUBE

Calibration curve for Preston tubes in supersonic flow obtained by reference-temperature method 14 p2294 A66-27452

PRESTRESSING

Natural frequencies and modes of vibration of prestressed toroidal membrane under internal pressure [AIAA PAPER 65-110] 02 p0297 A66-11545
 Total nonelastic strain recovery of copper single crystals after small prestrains, discussing parameters 04 p0535 A66-13400
 Prestressing of skin effect on strength and durability of riveted weld tested under static, repeated static and vibrational loads 11 p1782 A66-22855
 Axially symmetric dynamic response of infinite, circular cylindrical shell to moving pressure load 17 p3021 A66-32009
 Residual stress control in welded structure noting stress reduction by preheat, prestressing by fusion welding and spotweld impact treatment 22 p3924 A66-40262
 Prestressing effect on fiber alignment and strength of glass fiber laminates 24 p4289 A66-42338

PRIMARY COSMIC RADIATION

SA HEAVY COSMIC RAY PRIMARY
 Primary omnidirectional X-ray flux magnitude evaluated by directional detectors at balloon altitudes 01 p0132 A66-10333
 Intensity and energy spectra of low energy primary cosmic ray protons determined aboard Imp-I satellite 01 p0132 A66-10601
 Secular variation in primary cosmic radiation intensity from 1958 to 1960 02 p0282 A66-11341
 Penetration of electric field into metallic sphere located in stationary plasma as prototype of electric fields about Earth-Sun system 02 p0267 A66-11656
 Energy spectrum of cosmic ray muons measured for data on nuclear interactions and characteristics of primary cosmic radiation 03 p0417 A66-12319
 Origin of primary cosmic rays discussing galactic theory, propagation characteristics and measurement results 04 p0574 A66-13807
 Low energy spectrum of cosmic rays corrected for solar modulation and diffusive passage through interstellar matter 04 p0574 A66-14014
 Electrons, hydrogen nuclei and helium nuclei observed in primary cosmic radiation by balloon in 1963, discussing integral intensity and differential energy spectrums 05 p0746 A66-14780
 Synchrotron radiation from primary cosmic ray, describing near field produced by relativistic single charge moving in circle in medium of constant refractive index 05 p0749 A66-15053
 Composition and energy spectra of primary cosmic radiation in low energy regions from observations of Mariner II and Explorer VII 05 p0752 A66-15384
 Stratospheric measurements of electrons and gamma radiation in cosmic rays, using plastic scintillator and lead sheet supplemented Geiger counters 05 p0752 A66-15386
 Spectrum of primary cosmic radiation determined for ultrahigh energies, based on international data on electron and meson air showers 05 p0753 A66-15390
 Primary cosmic rays of superhigh energy using extensive air shower data, noting

Geiger-Muller counters, scintillation counters and muon detector 05 p0753 A66-15391
 Extensive atmospheric showers as means of gaining insight into energy spectrum and composition of primary cosmic radiation 05 p0755 A66-15405
 Flux of alpha component of primary cosmic radiation determined at top of atmosphere, using nuclear emulsion stack exposed near geomagnetic equator 05 p0756 A66-15529
 Flux and energy spectrum of primary electron component measured by balloon at period near solar activity minimum 06 p0944 A66-16075
 Data obtained by satellite and rocket probes on cosmic ray composition, particularly on fluxes on nuclei of elements contained in rays 06 p0946 A66-16569
 Primary cosmic radiation, discussing variations of time and space of intensity, energy spectrum and chemical composition 06 p0947 A66-16573
 Extensive air showers of cosmic radiation, noting flux and energy distribution 06 p0947 A66-16576
 Cosmic radiation measurements in extensive air showers, recording high energy muon fluxes 06 p0947 A66-16577
 Soviet and other literature on diurnal variations of cosmic ray intensity used for analysis of electromagnetic conditions in outer space 06 p0949 A66-16587
 Nuclear emulsions exposed for several days in recoverable satellite scanned for ending tracks of cosmic ray particles, obtaining energy spectra for various nuclei 07 p1111 A66-17464
 Directional intensities of primary cosmic rays near equator by modified scintillator Cerenkov telescopes 07 p1120 A66-17979
 Primary cosmic ray variations and Forbush decrease in solar-cycle change 07 p1122 A66-17988
 Scale and lifetime of magnetic transition region between interplanetary and interstellar space deduced from primary cosmic ray spectrum 07 p1122 A66-17989
 Intensity variations and effective primary spectrum for mesons observed at approximate 40 mwe underground at Hobart, Tasmania, Australia 07 p1122 A66-17991
 Secular trend of cosmic ray intensity in stratosphere and primary cosmic ray energy spectrum based on 3000 radiosonde measurements 07 p1123 A66-17993
 Balloon-borne scintillation counters combined with Cerenkov counter for measuring primary cosmic ray charge and energy spectra during 1963 07 p1123 A66-17994
 Intensity variation of heavy nuclei in primary cosmic radiation during times of solar disturbances 07 p1123 A66-17996
 Cosmic ray intensity measured during geomagnetically quiet and active days from 1959 to 1963 by using balloon flights, noting role of ionization, Forbush effect, etc 07 p1124 A66-18000
 Quantitative comparison of primary cosmic radiation rigidity spectrum during current solar cycle 07 p1124 A66-18001
 Changes in rigidity spectra of primary cosmic radiation during Forbush decreases and 27-day variations 07 p1125 A66-18003
 Hysteresis effect in long term variation in cosmic radiation, investigating whether such effect appears during short term /Forbush/ decreases 07 p1125 A66-18004
 Time variation of primary cosmic ray rigidity spectrum over solar cycle derived by measuring latitude effect of nucleonic components 07 p1127 A66-18016
 Rigidity and energy spectra of primary cosmic rays in nondisturbance and disturbance periods during past 12 years 07 p1128 A66-18021
 South latitude cosmic-ray plateau determined by measuring cosmic radiation-caused charged particle and neutron fluxes 08 p1284 A66-19415
 Primary ultrahigh energy cosmic radiation composition analyzed, using Cerenkov flash 09 p1437 A66-20205
 Ultrahigh energy primary cosmic ray energy spectrum calculated from EAS particle-number spectrum 09 p1437 A66-20206
 Secular variation in intensity of cosmic

rays in stratosphere and energy spectrum of primary cosmic rays correlated with solar activity 09 p1437 A66-20208
 Primary cosmic radiation intensity determined from stratospheric intensity fluctuation at various latitudes 09 p1440 A66-20225
 Light nucleus content of primary cosmic radiation from Soviet flight observations, noting production mechanisms 09 p1440 A66-20229
 Cosmic ray intensity variation with time and geographical location from single-shielded STS-5 gas counter data 09 p1441 A66-20230
 Primary cosmic radiation and terrestrial radiation belt measurement by Cosmos XVII satellite, noting instrumentation, equipment operation and results 09 p1441 A66-20232
 Proton-nuclear and electron-positron component of primary cosmic rays 09 p1446 A66-21040
 Primary cosmic radiation investigated by Elektron II and IV satellites 10 p1595 A66-21041
 Radiation hazards to astronauts in interplanetary flight from primary cosmic rays, Van Allen belts and chromospheric bursts 10 p1595 A66-21047
 Intensities and ratios of intensities of Be, B and S nuclei determined near geomagnetic equator in India, using nuclear emulsion stack 10 p1600 A66-21844
 Photometric measurements of tracks of heavy primary particles found in emulsion stack near geomagnetic equator, noting ratio of C and N nuclei to O nuclei 11 p1762 A66-22654
 High-altitude solar X-ray burst and increase in ground-level flux of heavy nuclei 11 p1764 A66-23054
 Model of high energy collision processes, based on terms of four-momentum transfer and spectra variation, used for calculation of atmospheric diffusion of heavy triplets produced by primary cosmic radiation 11 p1741 A66-23190
 Primary cosmic ray energy spectrum, including primary flux of protons and heavier nuclei, and EM cascade pair production rates 11 p1765 A66-23192
 Ionization calorimeter for measuring primary cosmic ray components, discussing nuclear interactions, energy spectra, EM cascades, etc 13 p2175 A66-26011
 Primary cosmic ray charge and energy spectra for helium through oxygen during 1965 minimum solar modulation effect 13 p2175 A66-26348
 Satellite observations of primary cosmic rays compared with predictions of solar wind and electric field models of long-term intensity modulation 15 p2576 A66-29233
 Extensive air shower generation by high energy primary rays over Bolivia studied by methods of fast timing and density sampling 15 p2577 A66-29515
 Energy spectrum of high energy cosmic rays from EAS observations 15 p2578 A66-29517
 Energy spectrum and arrival directions of high energy primary cosmic rays 15 p2578 A66-29518
 Nucleon-initiated air shower fluctuations and random variations in FA approximation theory 15 p2581 A66-29539
 Two large air shower studies of spectrum and isotropy of primary particles 15 p2582 A66-29540
 Collision cross sections of high energy nucleon-nucleon interactions in nuclear emulsion 15 p2583 A66-29545
 Nuclear radii for electromagnetic interactions of primary cosmic ray particles in nuclear emulsions 15 p2545 A66-29546
 Experimental data analysis of cosmic ray showers, secondary particle production by nucleon-nucleon collision at high energy, momentum distribution in pions and primary energy-inelasticity relation 15 p2583 A66-29547
 High energy primary cosmic radiation research at Bristol, England, including energy spectra for nuclear interactions, nuclear emulsion stack measurements, alpha production, etc 15 p2583 A66-29550
 Electron-photon cascades caused by nuclear active component in atmosphere and on

- gamma rays, atmospheric absorption spectrum of primary nucleons and generation of pions 15 p2584 A66-29556
- Danish space program, emphasizing polar ionosphere and high energy primary cosmic radiation studies 15 p2601 A66-29936
- Flux and energy spectra of primary cosmic K and gamma rays between 20 kev and 1 mev from balloon-rocket measurements 15 p2591 A66-30020
- Isotopic composition of low-energy helium nuclei in primary cosmic radiation at solar minimum 16 p2792 A66-30138
- Telescopic measurements of primary energy spectra and abundances of He 3 and He 4 in galactic cosmic radiation 16 p2793 A66-30198
- Flux of primary cosmic ray heavy nuclei measured with sandwich of C.2 and G.5 emulsions at magnetic latitude 42 degrees N, noting solar modulation as shown by neutron monitor data 16 p2794 A66-30720
- Fragmentation probabilities, charge spectrum and interaction mean free paths of relativistic heavy nuclei in primary cosmic radiation investigated in stack of nuclear emulsions 16 p2795 A66-31010
- Error correction of recent work on modulation of primary spectrum during solar cycle for rigidities between 4 and 12 billion volts 17 p2994 A66-32536
- Differential rigidity spectra model of nuclear component of primary cosmic radiation under various environmental influences 17 p2994 A66-33431
- Primary cosmic ray energy spectrum measurements via Proton I satellite, noting inelastic interaction cross sections, chemical composition, etc 18 p3175 A66-34746
- Electron-positron components of primary cosmic radiation, noting energy spectrum, flux, charge composition, origin, etc 18 p3176 A66-34748
- Rigidity response of ionization chambers in high atmosphere and deep space for study of rigidity dependence of solar cycle modulation of primary cosmic ray 18 p3179 A66-34768
- Primary cosmic radiation modulation study by Ariel I and airborne detector 18 p3180 A66-34770
- Rigidity spectra of primary cosmic rays in last solar cycle from observations of balloon-borne ion chambers and GM counters 18 p3180 A66-34775
- Cosmic radiation measurements at balloon altitudes during solar minimum 18 p3185 A66-34801
- Integral rigidity spectrum of primary cosmic rays, considering solar active days 18 p3186 A66-34807
- Flux and energy spectrum of primary electron component measured by balloon at period near solar activity minimum 18 p3187 A66-34814
- Balloon observation of high energy primary electrons with counter system 18 p3187 A66-34816
- Flux and East-West asymmetry of primary electrons at geomagnetic rigidity cut-off of about 4.5 gv 18 p3187 A66-34817
- Electron component of primary cosmic radiation at energies greater than or equal to 15 gev studied, using nuclear emulsion stack 18 p3187 A66-34818
- Electrons, hydrogen and helium nuclei of cosmic radiation as observed in 1964 at average residual pressure of 2.4 mb compared with 1.8 mb obtained in 1963 18 p3187 A66-34819
- Balloon-borne Cerenkov scintillation counter for measurements of primary proton and helium spectra and modulations 18 p3188 A66-34822
- Differential rigidity spectrum of alpha particles for R less than 2.5 gv at solar minimum 18 p3189 A66-34827
- Abundance of isotopic helium 3 nuclei in primary cosmic radiation, using nuclear emulsion stack 18 p3189 A66-34828
- Low rigidity end of differential power spectra of proton and helium components of primary cosmic radiation, considering ionization loss and interaction with interstellar hydrogen 18 p3189 A66-34830
- Balloon flight data obtained at 50 and 65 degrees N geomagnetic latitude on spectra of primary cosmic ray hydrogen and helium nuclei, using Cerenkov scintillator technique 18 p3190 A66-34831
- Solar modulation and time variation of differential energy spectrum and flux of primary helium nuclei in 30 to 90 mev/nucleon energy range 18 p3190 A66-34832
- Detection of low energy multiply charged primary cosmic ray nuclei in nuclear emulsions and relation of nuclei to solar cycle 18 p3190 A66-34834
- Nuclear emulsion stack investigation of composition and differential energy spectra of primary cosmic ray heavy nuclei fluxes 18 p3191 A66-34837
- Balloon-borne Cerenkov scintillation counter measurements of energy spectra of primary cosmic radiation heavy nuclei at various geomagnetic latitudes 18 p3191 A66-34840
- He-3-He-4 isotopic composition of primary cosmic ray helium flux in terms of energy, rigidity and solar modulation 18 p3192 A66-34841
- Tracks of nuclei of primary cosmic rays that ended within nuclear emulsions and possibility of separating isotopes 18 p3192 A66-34842
- Relative abundance of carbon isotopes in primary cosmic radiation estimated by separation of isotopes method in nuclear emulsion 18 p3192 A66-34843
- Landau-Symon theory extension, semiconductor telescopes in primary cosmic particle charge and energy spectrometry, and capabilities of Si as cosmic particle detector 18 p3114 A66-34844
- COSPAR research on heavy primary cosmic ions in nuclear emulsions exposed in polar satellite 18 p3192 A66-34846
- Balloon-borne scintillation counter measurements of isotopic composition, energy/nucleon and rigidity spectra of primary cosmic helium nuclei 18 p3193 A66-34848
- Energy spectrum of primary galactic X-rays between 20 and 50 kev observed during night with NaI crystal 50-channel spectrometer 18 p3193 A66-34851
- Cerenkov counter using sulfur hexafluoride gas as radiator developed for study of isotopic composition of helium nuclei in primary cosmic radiation 18 p3193 A66-34853
- Primary proton and helium nuclei flux and East-West and North-South asymmetries measured near geomagnetic equator 18 p3193 A66-34854
- Spectral composition including X-ray and gamma ray astronomy, electrons in primary cosmic radiation, protons and helium nuclei, isotopic composition and heavy nuclei 18 p3194 A66-34855
- Modulation data for primary cosmic ray spectrum at low rigidities determined from daily latitude curves of cosmic ray nucleonic component obtained from IGY neutron monitors 18 p3194 A66-34860
- Cosmic ray intensities in stratosphere over Antarctica and Murmansk, noting differences not due to low energy primary particles or temperature 18 p3196 A66-34869
- Variation in radiocarbon content in atmosphere studied from measurement of concentration in wood sample nearly 2000 years old 18 p3199 A66-34889
- Extensive air shower research aimed at study of composition of primary cosmic rays and component properties 18 p3204 A66-35090
- Decrease in distribution of arrival directions of muon-rich air showers between 15 h and 21 h in right ascension confirmed by analysis of EAS 18 p3205 A66-35097
- Primary gamma ray production, arrival directions, particle collisions and distribution of EAS penetrating particles in intergalactic space 18 p3209 A66-35120
- Electronic data on electromagnetic core structure of extensive air showers 18 p3211 A66-35130
- Lateral distribution of high energy gamma rays, successive interactions and core structure of EAS, using emulsion chambers at mountain altitudes 18 p3211 A66-35132
- Extensive air showers /EAS/, discussing lateral distribution function variation with atmospheric density, primary energy dissipation, shower front radius of curvature, etc 18 p3211 A66-35133
- Muon component of air showers, discussing total number of muons relation to shower size 18 p3212 A66-35139
- Energy spectrum, possible chemical composition and anisotropy of ultrahigh energy primary cosmic radiation 18 p3213 A66-35147
- Extensive air showers of energies about one trillion ev 18 p3214 A66-35151
- Primary intensity and primary spectrum at energies of trillion ev determined from atmospheric Cerenkov light 18 p3217 A66-35173
- Energy spectra of nucleons, muons and gamma rays for truncated power law primary energy spectra calculated, using model for nucleon and meson production 18 p3217 A66-35174
- Interaction of high energy cosmic ray neutrinos produced in atmosphere measured with detector array operated underground 18 p3224 A66-35225
- Cosmic radiation theories and experimental supporting evidence, origin of cosmic ray particles and relation between cosmic ray sources and radio wave sources 20 p3631 A66-37436
- Solar cycle effects on random variation in attenuation length of primary cosmic ray nucleon component 20 p3632 A66-38080
- Primary cosmic radiation composition, discussing abundance of protons, He nuclei and heavier nuclei 20 p3632 A66-38098
- Radio electron density and magnetic field in galactic halo from primary cosmic ray and radio brightness measurements 21 p3817 A66-39563
- Underground telescopes confirm two-way sidereal anisotropy in charged primary cosmic radiation 22 p3973 A66-40534
- Flux and energy spectrum of low energy heavy nuclei of primary cosmic radiation measured by balloon-mounted nuclear emulsion stacks 24 p4264 A66-42608
- Elemental abundances of low energy cosmic rays in July 1964 observed by sounding rocket, noting components 24 p4264 A66-42715
- Matter traversed by low energy cosmic ray nuclei in space determined, using spallation cross sections with proton beams from accelerators and Li/M ratios 24 p4265 A66-42718
- Errors effect in determining primary energy on measurement of characteristics of nuclear interactions in cosmic radiation, considering energy spectrum 24 p4267 A66-42906
- Soviet ground station for observation of energy spectrum, composition and anisotropy in arrival directions of primary cosmic ray particles 24 p4269 A66-42917
- Monte Carlo calculations of simultaneous distribution of extensive air showers with respect to several fluctuating parameters for elementary event models 24 p4269 A66-42919
- Ionization calorimeter measurement of number of particles in electron photon cascade with energy transferred from ionization calorimeter 24 p4269 A66-42924

based on flow soldering components through printed wiring boards to be used in digital computer design 02 p0204 A66-11940

High-speed reliable cost-orientated integrated circuits, detailing element design and logic and circuit form 02 p0205 A66-11941

Thin copper clad laminates and problems arising in application to multilayer printed circuit boards 03 p0347 A66-13330

Thyristor equipped DC to DC regulated power converter for voltage range between 43 and 300 v DC based on printed circuit principle 06 p0857 A66-16966

Printed circuit laminate measing, definition, origin, effects and control 11 p1664 A66-22673

Multilayer circuit laminate fabrication and comparison of glass-base laminates with phenolic-paper-base and epoxy-paper-base grades 11 p1664 A66-22675

Stick module interconnection of flat packs into single-axis motherboard 11 p1665 A66-22678

Protective coating of printed circuit assemblies against humidity, salt spray and other adverse environmental factors 11 p1665 A66-22679

Mechanical-electrical components for printed circuits including rheostat with step-by-step mechanism, connectors, push buttons, etc 11 p1665 A66-22684

Packaging VHF/UHF circuits involved in design of RF equipment used in air and spaceborne vehicles 13 p2041 A66-25844

Table of interconnecting device for use with printed circuit board 13 p2043 A66-26309

Tradeoff for high reliability program, discussing development of satellite equipment for Telescope project 15 p2507 A66-28796

Multilayer printed circuits and interconnection methods 15 p2465 A66-29668

Printed circuit processing, state of the art 17 p2896 A66-33365

Printed circuitry, discussing fabrication, reliability, circuit board materials, electrodes and protective coatings 19 p3320 A66-36323

Gold-plated nickel used for printed wiring in parallel-gap welding of integrated circuits to provide visual criteria for acceptable welds 20 p3562 A66-37621

Fired circuitry application to ceramic substrates by thick film process and use of thin films on ceramic and glass substrates by vapor deposition 23 p4043 A66-41126

Microbonding difficulties in joining flat pack circuits to printed circuit boards, examining parallel gap welding connections with board material and use of dissimilar metals 23 p4043 A66-41189

Adhesive backed birefringent tape for separation of thin film and printed circuit master drawings with near perfect registration for microelectronic production masking purposes 24 p4180 A66-42312

PRISM

SA QUARTZ

Dielectric prism in bend of plane wave waveguide, considering geometrical optics and calculation electrostatically with power series solution 02 p0196 A66-11411

Elastic equilibrium of rectangular prism with given stress-vector components at lateral surfaces and displacements at faces 03 p0435 A66-12635

Constant structural parameters of prism monochromator 05 p0682 A66-15220

Polarizing properties of laser reflector consisting of two identical rectangular prisms 16 p2721 A66-31803

Rotating prism design for continuous image compensation cameras, application to UV and IR regions of spectrum 19 p3354 A66-35384

Radial velocity measurements with objective prisms, discussing error sources, luminosity, etc 21 p3737 A66-38821

Polarizing properties of laser reflector consisting of two identical rectangular prisms 21 p3747 A66-39105

PRISMATIC BAR

Couple stresses in problems of torsion covering prismatical bars, linear isotropic and hyperelastic bodies 04 p0591 A66-14210

Torsional buckling of thin walled prismatic

bars of arbitrary cross section, considering buckling shear resilience 08 p1311 A66-19343

Bending center of prismatical anisotropic rod of arbitrarily asymmetrical cross section 15 p2608 A66-28774

Laser oscillation with totally reflecting roof prism as cavity, noting output vs mirror alignment for two rotation axes 15 p2517 A66-29414

Thermoelastic problem for plate with prismatic inclusion of rectangular cross section discussing stress, elastic deformation, displacement potential, etc 16 p2818 A66-31108

Shock wave, plane loading and unloading wave propagation in prismatic rod with variable cross section and curvilinear stress-strain relation 17 p3081 A66-33329

Torsion of prismatic rods of triangular or trapezoidal cross section, using Green function to obtain exact solution 18 p3256 A66-34395

PRIVATE AIRCRAFT

Supersonic business aircraft design problems related to payload and range 12 p1800 A66-23643

Private aircraft characteristics and economies in U.S. 14 p2224 A66-28108

PROBABILITY

SA DUFFING EQUATION

SA STATISTICAL PROBABILITY

SA TRANSITION PROBABILITY

Probable reliability of measurement accuracies and decision limits for system checkout 03 p0347 A66-13336

Russian text on mathematical methods in reliability theory 12 p1903 A66-24068

Allotment of probability shares method applied to improving safety in design by diagnosing failure and probability of accident 20 p3494 A66-36999

Product performance model for predicting system effectiveness satisfying restrictions on time, money and input data 20 p3566 A66-37884

Series form of failure probability for systems with spares 22 p4001 A66-40516

Maximum probability criterion on output coordinates of system for selection of parameters of optimal nonlinear control system 24 p4188 A66-42477

PROBABILITY DENSITY

Dirichlet problem solved by probability density for Brownian particle, using Fredholm integral 01 p0094 A66-10730

Probability density of angular fluctuations of phase front of wave reflected from complex target 02 p0190 A66-11407

Statistical characteristics of various uniform phase distribution processes and their envelopes 02 p0193 A66-12269

Random motion of rarefied gas described by probability densities 03 p0359 A66-13182

Posterior probability density of parameters of signals modulated by Gaussian random processes, noting radar signals 04 p0502 A66-13700

Approximate determination of correct detection probability in optimum signal reception of unknown phase 04 p0482 A66-13913

Parabolic differential equations connected with optimal pursuit, discussing analysis and solution of problem of two moving points, with application of maximum principle 04 p0539 A66-13991

Probability density and distribution functions associated with noise and signal plus noise in radar IF, after linear and square law detector, and after these detectors with subsequent video integration 04 p0485 A66-14115

Approximate formula for probability density of time lapse between wind gusts 08 p1247 A66-18803

LF random signal generator with output stationary voltage having Gaussian amplitude probability density function, zero mean value and constant power spectral density 09 p1356 A66-20666

One-dimensional probability density of phase derivative of mixture of radio signal and Gaussian noise 11 p1658 A66-23222

Statistical properties of receiver output under interference conditions, obtaining first order output, probability densities, second harmonic and intermodulation

interference terms 11 p1658 A66-23484

Statistical characteristics of various uniform phase distribution processes and envelopes 12 p1813 A66-23872

Improvement on Montgomery prediction of error probability in intermittent system operating during short intervals when SNR is above certain threshold 12 p1816 A66-24138

Amplitude probability density of random stationary signal potential and variation of free carriers in germanium semiconductor at near-ambient temperature 13 p2170 A66-26758

Posterior probability density of parameters of signals modulated by Gaussian random processes, noting radar signals 15 p2469 A66-28541

Probability methods in analysis of oscillations of nonlinear mechanical systems 15 p2541 A66-29162

Statistical analysis of light fields created by superposition of laser light and chaotic light 15 p2519 A66-29815

Small parameter problem for parabolic differential equations examining motion of Markov-type random point in Euclidean space 16 p2733 A66-30737

Theoretical probability densities of amplitude-comparison, and phase-comparison, monopulse radars excited by Gaussian signals and Gaussian noises 17 p2872 A66-31962

Optimum estimate of nonlinear process in presence of non-Gaussian noise and disturbances, deriving algorithm for correcting approximation 19 p3323 A66-35340

Automatic system with stored experience, examining probability density of useful signal 19 p3325 A66-35941

Performance criterion for adaptive pattern classification system, noting approximation to optimum Bayes discriminant function 19 p3333 A66-36665

Digital computer synthesis of simulated ground clutter of radar signals produced by noise generator and characterized by power spectral density and probability density functions 20 p3514 A66-37222

Distribution function for probability density of random process at output of multiplier acted upon by envelopes consisting of Gaussian noise and pulse signal 20 p3515 A66-37380

Adaptive pattern classification system, based on typical patterns or training samples used by system to determine decision procedure that does not require a priori knowledge of probability density of class pattern vectors 20 p3522 A66-37666

Approximate determination of correct detection probability in optimum signal reception of unknown phase 20 p3518 A66-37871

Addition of uniform and Gaussian distributions, exact and approximate solutions 22 p3939 A66-40171

Probability densities of geometric parameters of polarization ellipse of quasinonochromatic, partially polarized radio and noise signals in circular and linear-base wave representations 23 p4036 A66-41051

Piecewise linear transformations to simplify multiple threshold rules in statistical decision theory of pattern recognition systems 23 p4040 A66-41595

Probability of overlapping intercept by system of random intercepts and application to detection of flying objects in cloudy skies 24 p4231 A66-42472

Dirichlet problem solved by probability density for Brownian particle, using Fredholm integral 24 p4232 A66-42748

Combination of probability density functions for system error analysis, using convolution or transformation methods 24 p4189 A66-42827

Unambiguous transition probability densities describing inhomogeneous stochastic continuous-to-right Markov processes with finite number of states 24 p4232 A66-43021

PROBABILITY DISTRIBUTION

Truncated simple random sampling program application and distribution function 01 p0092 A66-10197

Photoelectric measurement of probability distribution of subsonic signals in form of

Electrical voltage 02 p0230 A66-11814
 Probability analysis of finite automata with unreliable binary elements and regular structural design 03 p0350 A66-13038
 Stochastic differential equations specifying dynamical structure of filters generating posterior probability distribution when inputs are time functions 03 p0351 A66-13259
 Gaussian probability distribution of bilinear single-degree of freedom system response to impulse excitation
 [ASME PAPER 65-APMW-29] 04 p0593 A66-14229
 Fatigue test of 1000 aluminum specimens in order to assess accuracy with which lower tail of probability distribution of failure curve fits experimental results 05 p0774 A66-15056
 Comparative evaluation of gamma, lognormal and Weibull probability distributions for reliability engineering application 06 p0902 A66-16333
 Signal separation and phase measurement device using phase probability distribution function of signal-noise mixture 07 p1005 A66-17352
 Decomposition of mixed-set distributions into normal distributions using graphing and analog computer methods 07 p1003 A66-17381
 Probability characteristics of distributed parameter system subjected to parametric and additive noises, obtaining mathematical expectation and correlation function expression 07 p1014 A66-17433
 Partial differential equations for conditional Markov process distribution for noisy observations 07 p1059 A66-17968
 Two-dimensional probability distribution for simultaneous turbulent velocities at two points in plane perpendicular to mean velocity of wind tunnel 08 p1205 A66-18542
 Optimum /in Shannon sense/ truncated probability of signal for case of constant power and other conditions 08 p1182 A66-18915
 Probability distribution of number of system failures and generating function for compound probability distribution of required launches 09 p1463 A66-19911
 Monte Carlo method analysis of electron photon cascade 09 p1436 A66-20134
 Optimal control by random sequences, dynamic programming and Wald sequential analysis 09 p1362 A66-20644
 Asymptotic behavior of probability distributions and density functions of processes with independent increments 09 p1397 A66-20645
 Summation of errors with variable distribution parameters in finishing and assembling of batches of parts 09 p1384 A66-20766
 Gaudin-Meloy distribution parameter estimation from fracture data, based on moments about origin
 [AICE PREPRINT 17E] 10 p1613 A66-21180
 Sufficient statistics in optimum control of stochastic systems, considering two classes of loss functions 10 p1518 A66-21925
 Detection of fluctuating signal packets from noise background with unknown parameters 11 p1658 A66-23223
 Probability distribution data analysis in real time, using delay-line time-compression storage as information source in analog and digital form 12 p1825 A66-23760
 Probabilistic stability of random processes with distributed parameters 12 p1904 A66-24340
 Programming and control - International Conference, Air Force Academy, Colorado Springs, April 1965 13 p2046 A66-25339
 Generalized quadratic detection system with n entries, evaluating probability law of output function by derivation of cumulants from second characteristic function 13 p2027 A66-25450
 Amplitude probability distribution of atmospheric noise, noting effect of bandwidth change 13 p2026 A66-26567
 Two-time probability distribution function, autocorrelation function, Liouville equation and fluctuation theory of plasma kinetics 13 p2156 A66-26685
 Noise stability for wideband analog methods of information transmission based on analysis of probability distribution density, using normal rms error and

anomalous error
 probability 15 p2451 A66-29119
 Near-Bose-Einstein probability distribution of photoelectron counts produced by He-Ne gas laser narrow band Gaussian light source operating slightly below oscillation threshold 16 p2717 A66-30645
 Exact solutions derived for problems of mathematical expectation and density distribution of maxima for two types of nonstationary random processes 17 p2945 A66-31852
 Probability distribution of phase difference between two spaced antennas excited by random fan of rays plus specular component 17 p2874 A66-32385
 Hyperbolic comets and Oort hypothesis of cometary cloud, discussing probability distribution and existence of interstellar source 17 p3013 A66-33406
 Gaussian probability distribution of bilinear single-degree of freedom system response to impulse excitation
 [ASME PAPER 65-APMW-29] 18 p3249 A66-33587
 Easily mechanized method of using stored samples to approximate set of distributions for adaptive pattern recognizer 18 p3073 A66-34073
 Distribution law for collective coordinates established via probability methods, noting application to Ising model and to problems of absorption 18 p3135 A66-34632
 Probability analysis of finite automata with unreliable binary elements and regular structural design 18 p3092 A66-35001
 Summability of independent random variables, discussing convergence properties of sequence 19 p3389 A66-35982
 Amplitude and wave shape of averaged evoked responses in awake animals including man 20 p3505 A66-37055
 Monte Carlo technique of importance sampling applied to estimating probability of occurrence of rare event in complex system by fault tree simulation 20 p3543 A66-37912
 Nonlinear transformations of probability measures in functional spaces, noting application of random-process theory 21 p3757 A66-38952
 Radar detection probability in presence of unknown parameters, covering pulse-to-pulse, partial and fully coherent cases 21 p3707 A66-39639
 Stochastic form of decaying isothermal second-order reactions, comparing exact solution with various closure approximations 23 p4055 A66-41498
 Data analysis on probability papers for gamma, normal and Weibull /including exponential/ distributions 24 p4230 A66-42088
 First passage problems for lightly damped linear oscillator excited by white noise, discussing time probability distribution, densities, application of computers to obtain numerical solutions, etc 24 p4284 A66-42140
 Nonlinear behavior of second-order phase locked loop in presence of noise, discussing probability distribution of phase error, statistical properties of loop behavior, etc 24 p4172 A66-42618
 Exact sample size probability distributions for biased square law sequential detector with signal absent 24 p4173 A66-42637
 Maximum likelihood estimate with exponent m 24 p4271 A66-42944

PROBABILITY THEORY

Evaluation of alternatives which involve risk-taking decisions under numerous uncertainties for planning and system selection 01 p0167 A66-10050
 Missile and spacecraft countdown and meeting prespecified launch window probabilities by Markov chain techniques 01 p0140 A66-10087
 Data analysis and estimation of probability of finding sought magnitude within experimental error limits 02 p0261 A66-11810
 Book on probability theory covering mathematical models, randomness concepts, switching logic concepts, integration on abstract space, etc 03 p0386 A66-12369
 Textbook on communication engineering emphasizing random processes, information and detection theory, statistical communication theory, applications, etc 03 p0335 A66-12992
 Probabilistic model for analyzing changes

through time in binary dyadic relation on finite set of points 04 p0540 A66-14001
 Probability method for fatigue strength, assessing damage from random values, time variation of stress range and statistical relationships of addition 04 p0594 A66-14400
 Book on theory of random functions in probability methods for automatic control systems 05 p0657 A66-15066
 Dimensionless parameter reliability analysis, deriving system reliability functions as applied to mechanical creep
 [ASME PAPER 65-WA/MET-6] 05 p0780 A66-15689
 Reliability of electronic systems, discussing redundant systems, series and parallel grouping and exponential survival law 06 p0839 A66-15950
 Mission success probability maximization by selecting trajectory parameters via approximate probability density function [AIAA PAPER 66-95] 06 p0953 A66-16263
 Classification of unknown observations into one of two categories when decision boundary is determined from independent samples in each category 06 p0833 A66-16660
 Limit theorems for sum of sequence of independent random variables 06 p0903 A66-16914
 Fellerian character invariant by passage to product of kernels, noting separately excessive and separately superharmonic functions 06 p0904 A66-17060
 Decomposition of probability laws that possess specific type of characteristic function 07 p1061 A66-18511
 Spherical harmonic analysis of main part of Earth magnetic field from standpoint of probability theory 08 p1214 A66-19037
 Theorems for uniform approximations by algebraic and trigonometric rational functions, noting application in determining functional properties 10 p1552 A66-21984
 Probability theory to calculate technological deviations in dimensions effect on strength and rigidity of thin walled structures 11 p1782 A66-22858
 Reliability of electronic systems, discussing redundant systems, series and parallel grouping and exponential survival law 12 p1831 A66-23792
 Russian monograph on random processes covering measure and probability theory, Markov processes, limiting functions, etc 12 p1903 A66-24067
 Probabilistic automata as generalization of deterministic and nondeterministic finite model, theorems and concept of definiteness 12 p1853 A66-24338
 Dimensionless parameter reliability analysis, deriving system reliability functions as applied to mechanical creep
 [ASME PAPER 65-WA/MET-6] 12 p1970 A66-24540
 Reliability in optimal control problems in terms of probability of faultless operation 13 p2047 A66-25626
 Residual error probability for cyclic binary code data transmission on symmetrically random noise channels 14 p2245 A66-26795
 Rejection criteria for doubtful measurement [PST PAPER NT-147] 14 p2323 A66-27794
 Atmospheric noise FSK error probabilities for envelope detection receiver 14 p2243 A66-28352
 Generalized maximum likelihood estimators with proof of asymptotic efficiency, considering Markov chain and stochastic difference equations 15 p2525 A66-28604
 Dependent random variables containing independent variables, m-dependent variables, stationary and nonhomogeneous Markov processes, etc 15 p2529 A66-29849
 Quasi-redundant system reliability, solving differential equations for repair environment via computer 16 p2714 A66-30665
 Limit properties of uniform process with independent increments 17 p2946 A66-32299
 Optimal system determined from maximum probability criteria of target hitting 17 p2901 A66-32571
 Computation of theoretical maximum probabilities of geostrophic wind components using network sampling theory 17 p2949 A66-33347
 Mission success probability maximization

by selecting trajectory parameters via approximate probability density function [AIAA PAPER 66-95] 18 p3234 A66-34597

Theorems for uniform approximations by algebraic and trigonometric rational functions, noting application in determining functional properties 19 p3390 A66-36189

Random variable-dependent probability measures induced in Borel body from uniform catenaries and related to Lebesgue measures 19 p3391 A66-36434

Low error probabilities in binary communication systems estimated by statistics of bivariate extreme-value theory 20 p3514 A66-37211

Probabilistic model equations relating column height, feed location, degree of separation and flow rates for continuous chromatographic column 20 p3510 A66-37363

Incorrect problems of mathematical physics examined and illustrated by classical Cauchy problem for Laplace equation 20 p3591 A66-37756

Free molecular flow as Markov chain, describing motion via probability function in multireflection system 22 p3951 A66-40454

Reliability criteria of systems with recovery, noting mean time to failure of system and mean time of system operation between failures 24 p4217 A66-42473

Stochastic process explaining statistical properties of radar echo patterns 24 p4175 A66-42987

PRODUCTION ENGINEERING

Reliability prediction and production control of electrical connection by combination of stress survival matrix test and special strength control chart 01 p0076 A66-10067

Producibility of electronic hardware for Pershing weapon system ground support program 02 p0198 A66-11463

Recent trends in microelectronics manufacturing techniques emphasizing production capabilities 02 p0202 A66-11915

Contractor-customer responsibilities for Model A-7 aircraft design in firm fixed price environment [AIAA PAPER 65-758] 03 p0320 A66-12589

Molybdenum machine parts produced by plasma powdering process, noting improvement due to annealing 04 p0525 A66-13434

Introduction of programmed milling machines to production of aircraft engines for Czechoslovakian FB series 04 p0525 A66-13763

Manufacturing large production quantities of precise solid propellant mixtures to meet space booster propulsion system [SAE PAPER 650766] 05 p0743 A66-15005

Processing techniques in aircraft fabrication including explosive, electrohydraulic and magnetic forming 05 p0688 A66-15195

Production technology of porous titanium tubes 06 p0887 A66-16697

Accessibility as factor in reducing production cost and maintenance time and

increasing reliability in electronic equipment 08 p1197 A66-19526

Normal startup time for aircraft series production run and practical rate gradient 09 p1383 A66-19865

Ty-Block injection-molded nylon cable-anchoring device with adjustable nylon strap for clamping cables 11 p1709 A66-22674

Value analysis as cost reduction factor, using production of Bulpup A and B missiles as example 11 p1711 A66-23060

Developments in use of line of balance charts in production management [ASTME PREPRINT MM66-703] 12 p1886 A66-24414

Selection of parts for numerically controlled manufacturing, noting periodical necessity of intermixing with conventional machining operations [ASTME PREPRINT MM66-724] 12 p1887 A66-24422

Reliability problems associated with producing to specification from viewpoint of aircraft manufacturer 13 p2088 A66-26693

Component and pyrotechnic production sampling applied to reentry vehicle program, noting technique for selecting size, frequency and quantity of components for testing 15 p2507 A66-28798

Specified product quality through systems quality control program, noting determination of critical parameters, rejection occurrence, process and capability control and preventive maintenance 15 p2507 A66-28802

Book on titanium covering extraction processes, commercial manufacture and fabrication, cost estimates, marketing, etc 15 p2521 A66-28883

Maximizing aircraft production and critical weapons systems schedule for industrial readiness programs [SAE PAPER 660287] 15 p2621 A66-29829

Manufacture engineer role in producing space vehicles, noting S-IC stage of Saturn V launch vehicle 15 p2511 A66-29834

Manufacturing engineering contributions to design development in new materials and processes [SAE PAPER 660325] 15 p2511 A66-29844

Military aircraft procurement, discussing equipment supply, management control, development procedure and value engineering 17 p3040 A66-32797

Production management principles in implementation at Nord Aviation, considering use of electronic equipment for data processing 20 p3562 A66-37398

Electrochemical machining techniques, noting PERA die-sinking system 20 p3562 A66-37426

Molybdenum machine parts produced by plasma powdering process, noting improvement due to annealing 20 p3575 A66-38136

Supersonic transport production problems, discussing Concorde, Lockheed and Boeing projects, machining, shaping and assembling 23 p4073 A66-41643

Machining conditions and techniques used in producing tungsten jet pipe neck, detailing equipment 23 p4074 A66-41651

Problems arising in production and implementation of ballistic missiles and spacecraft programs 23 p4074 A66-41652

Wound glass-fiber material used in reinforced plastic construction for production of solid fuel heavy missiles 23 p4074 A66-41653

PROFICIENCY MEASUREMENT

Helicopter pilot proficiency based on performance of separate maneuvers in primary and basic training phases 12 p1809 A66-23929

Helicopter pilot proficiency based on performance of 151 tasks in primary and basic training phases 12 p1809 A66-23930

PROGRAM MANAGEMENT
AFSC 375 series of systems management manuals with emphasis on specification programs 01 p0168 A66-10060
Pratt and Whitney Aircraft system for achieving reliability assurance in gas turbine engines, discussing management, failure modes, product development and tests 01 p0128 A66-10062
Cost factors in launch operations controlled by management techniques and tools used in other facets of research and development 01 p0141 A66-10105
Objectives, effectiveness and results of reliability program at Kennedy Space Center /KSC/ referring to Saturn launches 01 p0141 A66-10106
PERT programming applied to design and manufacture of joint Anglo-French Concorde aircraft 02 p0305 A66-11599
NASA reliability program provisions for space system contractors, detailing program management, reliability engineering, testing and evaluation 05 p0687 A66-14960
Planning European space projects in industry 06 p0973 A66-16497
XC-142A Flight Test Program, program statistics, aircraft instrumentation and flying qualities in hover and transition flight regimes 06 p0807 A66-16820
Development management and cost control in British defense economy 07 p1156 A66-17487
Factors in shaping policy for aerospace activity, stressing role of scientist 08 p1321 A66-18551
Difficulties encountered in applying system of overall project management to ELDO initial program, noting PERT use, costs plans, etc 09 p1473 A66-20657
Systems effectiveness Conference, Electronic Industries Association, Washington, D.C., October 11 p1788 A66-23434
Manned space flight program management noting system efficiency, cost factors, reliability and performance reports based on Apollo project 11 p1789 A66-23437
Reliability feasibility evaluation of Voyager spacecraft, determining launches necessary, chances of success and program cost 13 p2192 A66-25509
Capability management in selling research and development to defense/space market 14 p2417 A66-28435
Atlas E/F launch vehicle, discussing structure, mission capabilities, launch facility, reentry, etc 18 p3245 A66-33890
[SAE PAPER 660444]
R and D problem solving and information gathering in engineering design, reviewing M.I.T. research program on management of science and technology 18 p3268 A66-34064
Total value concepts applied in system effectiveness analysis are helping Contract Definition type contracts meet cost effectiveness requirements 18 p3268 A66-34251
Program management at subsystem subcontractor level for product reliability and maintainability in developing AN/APQ-110 terrain following radar for F-111A 20 p3685 A66-37914
Subsystem interfacing in Titan III space launching system, discussing contractual requirements, interface program timing, interface documentation and coordination, review and approval procedures 20 p3687 A66-38186
LEM program history and management in RCA, discussing Apollo mission studies and initial assignments 21 p3822 A66-39516
NASA management, budgetary problems, controversy of incentives system, etc 23 p4151 A66-41047
ESRO mission, organizational structure, plans and programs 23 p4151 A66-41048
Project management of Jaguar Anglo-French military aircraft in design, test and production phases 23 p4151 A66-41217
Generalized system for project control and evaluation, considering cost, time, performance and reliability 23 p4152 A66-41777
U.S. long-range planning for space exploration 24 p4274 A66-42512
Reliability audit in military and space electronics 24 p4218 A66-42714
PROGRAMMER
Single-chip decade counter as fuse timer and programmer for weapon system 17 p2883 A66-32125

PROJECTILE
SA HIGH ALTITUDE SOUNDING PROJECTILE /HASP/
SA HYPERVELOCITY PROJECTILE
SA MISSILE
Yaw force /Magnus/ of spinning projectile at angle of attack measured, using balance device in wind tunnel [AIAA PAPER 66-753] 22 p3893 A66-40638
PROJECTILE CRATERING
Hypervelocity impact cratering materials and impact conditions 02 p0300 A66-11855
Cratering in materials analysis, considering transient, primary, secondary and recovery phases, using rod projectiles at high velocity impact 15 p2607 A66-28702
PROJECTILE PENETRATION
Dynamic indentation of metals with conical projectiles and dynamic tip flattening of projectiles, noting inertia and strain rate effect 02 p0243 A66-11691
Wide wedge penetration into thick aluminum target, noting adiabatic heating and softening 02 p0300 A66-11854
Micrometeroid impact effect on candidate skin materials, determining change in optical properties 03 p0382 A66-12793
Hypervelocity particle penetration of manned space station structure, discussing hole formation and repair 10 p1612 A66-21931
Depth of penetration of projectiles impacting at hypervelocities predicted, using dynamic yield strength of material with phenomenological model 12 p1957 A66-23592
Creep compliance testing apparatus for surface penetration of low modulus viscoelastic plate by 1/4-inch steel sphere 13 p2115 A66-26288
Hypervelocity projectile impact cratering from Ranger photographs of lunar surface 19 p3457 A66-35443
High-speed photographic techniques, recording impact and postimpact phenomena, used in prediction of flow resulting from hypervelocity impact of pellet with thin plate 20 p3560 A66-37740
PROJECTION
Projection method for obtaining upper and lower bound estimates of solutions to elliptic equations 22 p3942 A66-40914
PROJECTIVE-DIFFERENTIAL GEOMETRY
Integral curves described by nearly homogeneous differential equation and behavior in neighborhood of singular point 07 p1057 A66-17854
Nearly ideal cartographic projections of variable type and reduction of certain functional to minimum 08 p1217 A66-19346
Stereoscopic mapping on revolving base, describing process where size of scale is independent of length of half-base 10 p1534 A66-21282
Complete classification of fourth-order nondecomposing curves 12 p1901 A66-23641
Equiaffine geometry of double field and application to steady fluid flow theory 14 p2275 A66-27592
Transformation equivalency of various forms of partial differential equations of motion of nonholonomic systems 16 p2747 A66-31144
Axiomatic theory of Dirichlet problem applicable to nonlinear PDEs and to systems of PDEs 16 p2738 A66-31704
Nearly ideal cartographic projections of variable type and reduction of certain functional to minimum 19 p3348 A66-36054
Equiaffine geometry of double field and application to steady fluid flow theory 22 p3900 A66-40441
Probability densities of geometric parameters of polarization ellipse of quasi-monochromatic, partially polarized radio and noise signals in circular and linear-base wave representations 23 p4036 A66-41051
Probability of overlapping intercept by system of random intercepts and application to detection of flying objects in cloudy skies 24 p4231 A66-42472
PROLATE SPHEROID FUNCTION
High accuracy nonspherical reflectors fabricated for millimeter and submillimeter wavelength region 10 p1540 A66-21865
Backscattered and surface fields for acoustically hard and soft prolate spheroids at end-on incidence computed, using tabulation of spheroidal functions 12 p1815 A66-24119
Prolate spheroidal antennas, discussing spheroidal wave functions, confocal plasma sheath effects and influence of DC magnetic field 14 p2249 A66-27129
Perfectly conducting prolate spheroid illuminated by plane wave at arbitrary incidence with LF solution and expansion terms predicted from symmetries 20 p3516 A66-37622
Thermal transient characteristics of prolate spheroidal solid, using diffusion equation for heat conduction 22 p3998 A66-40034
Propagation and radiation of radio waves from dielectric coated prolate spheroidal core loop antenna surrounded by plasma sheath 24 p4184 A66-42745
PROMINENCE
Heating of solar prominence by surrounding corona, considering nonlinear

dependence of thermoconductivity coefficient on temperature 01 p0131 A66-10268

Coronal condensation observation indicates existence of long-lived quiescent prominences due to continuous accretion of new coronal gases 05 p0761 A66-15092

Photometric measurements of solar flares and prominences for central intensities in hydrogen alpha 16 p2804 A66-31397

Solar prominence in color photography, using filtering system for H and D lines 20 p3648 A66-37284

Total intensities of continuum and of red, green and yellow coronal lines emitted by sporadic coronal condensation shown to yield lower limits to Fe and Ca abundances 20 p3649 A66-37332

Diffusion emission of solar prominences in hydrogen alpha Balmer line, noting luminescence due to resonance scattering of solar emission 23 p4126 A66-41073

Comparison of faint and bright solar prominences, analyzing hydrogen and metallic spectra of three bright and four faint prominences 23 p4126 A66-41074

Spectrophotometry of four bright prominences with respect to kinetic temperature, Doppler half-widths and population levels 23 p4126 A66-41075

Hydrogen excitation mechanism in surge prominences determined, using stationary equations for energy levels of hydrogen 23 p4126 A66-41076

PROPAGATION MODE

Confocal multimode resonator with open-walled structure formed by two spherical reflectors spaced by their common radius of curvature 01 p0081 A66-10370

Geometrical acoustics in magnetic materials, examining control of direction and shape of beam by introducing inhomogeneities in medium 01 p0120 A66-10508

Radiation characteristics of point charge moving along direction of external magnetostatic field in warm anisotropic plasma 01 p0111 A66-10509

Energy considerations for transverse electric modes in ferrite loaded rectangular waveguides and associated thermodynamic paradox 01 p0037 A66-10510

Coupling between coaxial line and plasma waveguide for three configurations, step, abrupt and tapered transitions 01 p0038 A66-10521

Electromagnetic wave propagation through multilayer isotropic and anisotropic structure 01 p0025 A66-10525

Eigenvalues, considering losses, of modes propagating by successive reflections in infinite slab of magnetized ferrite 01 p0121 A66-10530

Properties of partially filled plasma waveguide in external longitudinal magnetic field 01 p0039 A66-10535

Thermodynamic paradox consisting of boundary value problem with mathematical inconsistency observed in rectangular waveguides loaded with magnetized ferrite 01 p0121 A66-10540

Whistler mode propagation in plasma in decreasing static magnetic field 01 p0026 A66-10544

General mode structure and eigenvalues of cavities containing ferrite magnetized in axial direction 01 p0027 A66-10547

Electric field configuration in oversized rectangular waveguide excited by pyramidal transition and terminated by movable short circuit 01 p0046 A66-11078

Oscillation modes on oscillators in locally concentrated magnetic field determined by

simultaneous study of predominant and helical modes 01 p0116 A66-11195

Elliptical waveguide for H-11 modes transmittance, expressed as power transmission along waveguide and square of electric field maximum 02 p0196 A66-11417

Fast wave quasi-TE-11 mode behavior of two circular guides of different size containing same discharge 02 p0197 A66-11450

plasma Modes existing in infinite parallel-plate waveguide with centrally placed unidirectional conducting screen 02 p0198 A66-11578

Microwave propagation through metallic waveguides filled with dielectrics, using field theory, network theory, Rayleigh-Ritz procedure, reaction concept, etc 02 p0206 A66-12009

Electromagnetic wave propagation in plasma filled disk-loaded waveguide, obtaining plasma densities 03 p0332 A66-12426

Transmission modes in grooved guides, calculating cut-off frequency and attenuation 03 p0346 A66-13326

High electric fields effect on propagation of 24-GHz microwaves along surface on n-type indium antimonide 04 p0562 A66-13749

Split-folded waveguide slow-wave structure for high power M-type tubes 04 p0498 A66-14039

Dense sporadic E cloud effects on high latitude HF backscatter observation 05 p0667 A66-14792

Phase steps and amplitude fading of VLF signals at dawn and dusk, supposing two waveguide modes exist in dark part of path and one in daylight 05 p0632 A66-14838

Electromagnetic wave propagation in multimode Earth waveguides of variable height 05 p0632 A66-14839

Comments on Volland paper about analytical model of Earth-ionosphere waveguide supposedly agreeing with Austin radio transmission formula 05 p0632 A66-14840

Propagation mode of plane waves in isotropic plastic solids, deriving tensor equations with numerical solutions 05 p0774 A66-15055

Superimposed vibrations, corresponding to different propagation constants for same frequency parameter, satisfy boundary conditions at flat surfaces of cylinder 05 p0781 A66-15739

Power and energy relations for open and closed uniform and periodic waveguides supporting complex propagation wave 06 p0843 A66-16021

Separation constants for finite gyromagnetic plasmas, discussing ion motion effects 06 p0826 A66-16024

Scattering resonances on fast-wave structure 06 p0843 A66-16028

Propagation in rectangular and circular cylindrical waveguide containing inhomogeneous dielectric varying linearly and quadratically 06 p0848 A66-16108

Solution to problem of cylindrical cavity containing ferrite specimen in form of hollow cylinder 07 p1009 A66-17926

Effect of sample geometry on frequency of helicon waves in lead telluride at low temperature 07 p1101 A66-18201

Propagation mode in waveguide filled with partially ionized magnetoplasma, obtaining dispersion relations for hydromagnetic and acoustic waves by three-fluid method 07 p1091 A66-18408

Electromagnetic theory of waveguides including circular and rectangular waveguides, mode theory, etc 08 p1189 A66-18665

Electromagnetic momentum in relation to waveguide modes, discussing relationship between momentum transfer and mechanical forces 08 p1189 A66-18667

Multimode antennas, discussing mode and mode generation, radiation sum and difference pattern control, discontinuity reflections, monopulse antennas, etc 08 p1191 A66-18945

Propagation in anisotropic radially stratified circular waveguides 08 p1198 A66-19749

Thin conducting susceptances in circular

TE-11 and TM-01 waveguides measured by cavity-resonance method 08 p1198 A66-19750

Eigenvalues and dispersion equations for magnetic and electric symmetric waves in circular multislot waveguides 09 p1358 A66-20809

UK-2 satellite measurement of ionospheric noise bands and propagation of waves in Z mode, including orientation determination methods 10 p1604 A66-21117

Boundary value problem for wave propagation on cylindrical anisotropic dielectric rod solved for hybrid modes 10 p1496 A66-21307

Modal expansions for resonance scattering phenomena 10 p1498 A66-21595

Influence of boundaries on wave propagation in compressible warm plasma 10 p1566 A66-21730

Propagation of quasi-TEM mode in ferrite-filled coaxial line 10 p1506 A66-21913

Propagation mode of harmonics and effects on reflection and transmission coefficient at plane grid 10 p1506 A66-22001

Separation of electromagnetic and plasma modes in two-fluid lossy compressible plasma, deriving field quantities from two Helmholtz equations 11 p1653 A66-22561

Internal gravity wave propagation in thermally stratified atmosphere 11 p1697 A66-22567

Scattering coefficients caused by sudden change in electrical properties of narrow wall of rectangular waveguide 11 p1666 A66-22720

Mode nomenclature in general lossy inhomogeneous waveguide made unique by branch points in complex propagation constant 11 p1669 A66-23111

Auroral zone, ionospheric scattering and nongreat-circle HF propagation statistically analyzed 11 p1700 A66-23141

Propagation of MHD emissions in Alfvén mode along high latitude geomagnetic field lines, auroral zone signal energy penetration and isotropic wave mode transformation 11 p1701 A66-23151

Perturbation method approximation of eigenvalue and eigenfunction of fundamental wave propagating in H-plane bend of rectangular waveguide 12 p1815 A66-23958

Dipolar resonances when axially uniform warm plasma column is subjected to transverse RF electric field 12 p1815 A66-23962

Propagation modes of small disturbances in homogeneous incompressible magnetoelastic medium at Alfvén velocities 12 p1929 A66-24379

Superdirective array of normal mode helical dipoles 12 p1840 A66-24625

Electric and magnetic field components for plasma waveguide in axially directed DC magnetic field 12 p1925 A66-24858

Surface wave propagation in circular waveguide containing axial plasma column 13 p2026 A66-26102

Propagation of circularly polarized electromagnetic waves in circular semiconductor cylinder surrounded by metal tube and immersed in DC magnetic field 13 p2169 A66-26238

Mode selective coaxial directional couplers for measurement of unwanted harmonics effect 13 p2044 A66-26745

Ghost modes in open microwave resonator waveguides containing dielectric slabs of rectangular geometry with anisotropic dielectric constant 14 p2246 A66-26796

Sporadic E layer propagation and reflection of VHF signals 14 p2234 A66-26837

Characteristic admittances of comb-type and undulating waveguide filters, considering diaphragm thickness and TE propagation mode 14 p2250 A66-27147

Electromagnetic wave propagation in two waveguides with different cross section connected by long continuous slot 14 p2251 A66-27169

Plasma-coated structures for utilization as HF waveguides 14 p2238 A66-27512

Surface waves supported by plane boundary of semiinfinite region of gyrotropic plasma analyzed when magnetostatic field direction is parallel to interface and propagation direction 14 p2241 A66-27961

VLF radio wave propagation in model

- Earth ionosphere waveguide with finite surface impedance and arbitrary height 15 p2449 A66-28598
- Helicon wave propagation in InSb and InAs at room temperature 15 p2559 A66-28630
- Resonant modes in ring shaped resonators formed by reflector strip bent into circle, noting eigenfunctions and eigenvalues of integral equation 15 p2457 A66-28786
- Transhorizon propagation using ORBIS, noting burst propagation and quasi-sinusoidal fading 15 p2451 A66-29230
- Ionospheric thin-layer stratifications and valley region analyzed by integrating propagation method and by impedance probe 15 p2494 A66-30042
- Propagation, disturbances causing degradation of performance of space instrumentation and communication links, noting types of space channels, plasma and multipath effects, etc 16 p2650 A66-30555
- Transmission loss in whistler mode of propagation of VLF radio waves for path portion underneath ionosphere, using geometrical optics 16 p2652 A66-30709
- Classification of modes in electromagnetic waveguides using model solutions of source-free homogeneous wave equation 16 p2663 A66-31204
- Modes of elastic wave propagation and orientation dependence of dislocation damping in aluminum 16 p2821 A66-31452
- Dispersion and modes of MHD wave propagation in collisionless plasma 17 p2973 A66-32977
- Propagation modes of infrasonic waves in isothermal atmosphere with constant horizontal winds and under effect of gravity 17 p2959 A66-33032
- Modes in waveguides filled with gyration media 17 p2897 A66-33421
- Propagation of optical-waveguide modes in dielectric slab bisected by metal sheel 18 p3118 A66-34002
- Transverse propagation of waveguide modes in conducting cylindrically stratified magnetoplasma analogous to VLF radio waves propagating in Earth-ionosphere 18 p3071 A66-34565
- Longitudinal wave propagation in plasma waveguide, observing lower and higher modes 18 p3072 A66-34567
- Dispersion characteristics of duct propagation of whistler radio waves along depressed magnetoplasma slab 18 p3072 A66-34568
- Angular propagation constants for electromagnetic modes which may exist in continuously curved waveguide bends of rectangular cross section for microwave application 18 p3072 A66-34569
- Pressure distribution, surface roughness, dry friction and elastic coupling effects on wave propagation and reflection in elastic rod, using modified-Laplace transformations 18 p3259 A66-34940
- Propagation mode of harmonics and effects on reflection and transmission coefficient at plane grid 18 p3072 A66-34978
- Normal modes and mode coefficients of lossless circular multimode waveguide determined from boundary conditions, noting frequency dependence of mode conversion 19 p3317 A66-35718
- Dielectric fiber cylindrical surface waveguide with refractive index higher than surrounding region for energy transmission at optical frequencies 19 p3302 A66-35725
- Electromagnetic field analysis, determining dispersion relationship of array of identical fibers, assuming surface wave modes of each fiber are excited 19 p3305 A66-36418
- Radio wave guiding in horizontally stratified magnetoionic medium in which electron density varies monotonically with height 19 p3305 A66-36629
- Attenuation, guide wavelength and characteristic impedance of rectangular waveguides with indium antimonide side wall derived for propagating modes 20 p3524 A66-37113
- Amplitude and phase of individual modes propagating in overmoded waveguide measured by technique using phase-sensitive detector 20 p3524 A66-37114
- Propagation constants of quasi-transverse electric modes measurement in cylindrical waveguide partially filled with anisotropic plasma 20 p3525 A66-37116
- Spheroidal-type seismogram study of wave generation, propagation, dispersion and attenuation in realistic spherical Earth models, especially Gutenberg-Bullen A-prime model 20 p3550 A66-37433
- Radiation from open-ended circular waveguide, comparing solution for electromagnetic wave propagation with method based on Huygens principle 20 p3529 A66-37705
- Complex modes of open waveguides, noting influence of proper and improper propagation modes on leaky waves 20 p3529 A66-37708
- Power transmission, gain, directivity pattern and reception between large aperture antennas in near-field region 20 p3529 A66-37709
- Propagation paths between hemispheres followed by usual and unusual whistlers, giving rise to series of echoes 20 p3553 A66-38077
- Fading multipath channel behavior simulator for communication system performance study 20 p3534 A66-38359
- Microwave interference measurement of shock velocity in shock tube, noting standing wave pattern 21 p3736 A66-38798
- Alfven wave propagation in incompressible fluid stratified by inhomogeneous fluid density or magnetic field strength 21 p3791 A66-39170
- Spurious mode effects on performance of helix type traveling wave amplifier 21 p3712 A66-39222
- Natural frequency equations for TEM mode oscillations of coaxial resonator with moving dielectric material 21 p3713 A66-39321
- Whistler mode excitation in ionosphere by leakage from VLF guide-wave modes, noting nonreciprocal attenuation over north-south propagation path 22 p3863 A66-39932
- Tropospheric duct propagation above sea in experiment and mode theory of Booker and Walkinshaw 22 p3863 A66-39934
- Long VLF path propagation measurements, determining characteristics of lower ionosphere, noting role of phase and amplitude variations during solar flares 22 p3907 A66-39959
- Microwave-frequency waveguide losses minimized by controlling effects of geometry, propagation mode, construction materials, surface finish and surface contamination 22 p3874 A66-39992
- Tolerances required on straightness of cylindrical waveguide to prevent excessive power transmission into unwanted high loss modes 22 p3876 A66-40169
- Anisotropic acoustic attenuation measured from surface excitation in novel resonant cavity configuration, discussing validity in quartz and effective viscosity in silicon 22 p3866 A66-40407
- Plasmoid density, electron temperature and radius variation during propagation through magnetic field, using electric and magnetic probes 22 p3958 A66-40932
- Transmission curves for retrodiffusion echoes, identifying propagation modes and synthesizing equivalent vertical ionograms 23 p4063 A66-41182
- Theory of steady multimode oscillation of solid state laser extended to cavities with inefficient end mirrors or losses dependent on frequency 23 p4077 A66-41274
- Scattering coefficients caused by sudden change in electrical properties of narrow wall of rectangular waveguide 23 p4045 A66-41458
- Parabolic cylindrical waveguide formed by intersection of two confocal parabolic metal surfaces, determining eigenvalues of wave functions subject to boundary conditions yielding TE and TM modes 23 p4047 A66-41587
- Dual transverse electric mode cavity preselector loaded with large nonferrous metallic perturbation plug 24 p4179 A66-42102
- Bifurcated parallel plate waveguide solution extended to solution of open ended parallel plate waveguide radiating into space 24 p4184 A66-42703
- Electromagnetic wave transmission through and reflection from homogeneous nonlinear anisotropic slab between two linear isotropic media 24 p4173 A66-42706
- PROPAGATION VELOCITY**
- Shock waves in elasticity discussing upstream, downstream and Lagrange coordinate-related configurations, propagation conditions in isotropic medium and developing equations for arbitrary shock amplitudes 03 p0392 A66-12535
- Propagation rate of high power laser light pulse in inversely populated medium 05 p0717 A66-15333
- Time dependent ambipolar diffusion waves, solving electron density equation 07 p1088 A66-17951
- Geomagnetic micropulsations, noting diurnal patterns of phase difference, propagation medium dispersive characteristics, signal velocities, etc 10 p1529 A66-21151
- Ultrasonic echo method of level measuring and monitoring in which acoustic pulse is emitted by vertical transducer and reflected from surface of liquid or gas 10 p1535 A66-21337
- Diffusion and propagation phenomena in air-water and water-steam emulsions in one-dimensional flow 12 p1973 A66-23524
- Integrated circuits with propagation delays in nanosecond range, noting emitter coupled logic circuit 13 p2036 A66-25534
- MHD instability in plasmas, during pinch discharge, noting wave velocity dependence on Larmor radius, Hall effect, electron temperature fluctuations, etc 13 p2142 A66-25704
- Exothermal discontinuities propagation in conducting media without restricting magnetic field orientation, noting velocity and energy released, showing that existence of propagation velocities leads to two detonation modes 13 p2149 A66-26260
- Propagation rate of high power laser light pulse in inversely populated medium 15 p2543 A66-29980
- Energy spacing of geometrical resonance structure in very thick indium films, noting interference between electron-like states which propagate with different velocities 16 p2769 A66-30159
- Propagation velocity and attenuation variation effect in coaxial cables on frequency modulated carrier evaluated, using IBM 1620 computer 16 p2649 A66-30542
- Unsteady interaction between blunt bodies and shock wave, comparing reflected shock wave velocity decrease for plane spherically blunted cylinders 16 p2685 A66-30788
- Flame propagation velocity parameters in turbulent flow as function of flow pulsation velocity, normal burning velocity and relative heating 23 p4149 A66-41792
- Nonlinear reflection of weak shock waves, deriving equations for propagation velocity and velocity vector 23 p4061 A66-42039
- Photometric device for measuring propagation velocity of light fluctuations in arc-heated plasma jet 24 p4212 A66-42776
- PROPANE**
- SA CYCLOPROPANE**
- Electroconductivity of combustion products of propane-air mixture determined by double Langmuir probes 15 p2617 A66-29312
- Xenon sensitized radiolysis of propane, examining heterogeneous neutralization of isopropyl radical 18 p3162 A66-34502
- Stability limits of quasi-cylindrical diverging detonations in propane-oxygen-nitrogen mixtures 20 p3679 A66-37819
- PROPELLANT**
- SA BIROPELLANT**
- SA CASE BONDED PROPELLANT**
- SA COLLOIDAL PROPELLANT**
- SA COMPOSITE PROPELLANT**
- SA CRYOGENIC PROPELLANT**
- SA DOUBLE BASE PROPELLANT**
- SA EXPLOSIVE**
- SA GAS PROPELLANT**
- SA HIGH ENERGY PROPELLANT**
- SA HYBRID PROPELLANT**
- SA HYPERGOLIC PROPELLANT**
- SA LIQUID PROPELLANT**
- SA LITHERGOLIC PROPELLANT**
- SA METAL PROPELLANT**
- SA MONOPROPELLANT**
- SA PLASTIC PROPELLANT**
- SA SOLID PROPELLANT**
- Instrumentation for testing first stage lox-

kerosene rocket engines of ELDO satellite launcher, noting pressure transducer and computer data system
[ISA PREPRINT 1.12-5-65]

05 p0684 A66-15514

Contamination control in missile systems, considering rocket engine cleanliness as quality control parameter 09 p1432 A66-19954

PROPELLANT ACTUATED DEVICE

SA CARTRIDGE ACTUATED DEVICE
SA THRUSTER

Leak detection methods and equipment for testing propellant actuated cartridges, missile fuses and timers 11 p1708 A66-23257

Propellant actuated device /PAD/ functions by using cartridge type energy source wherein chemical reaction is controlled without sonic orifice 18 p3160 A66-34188

Valve technology for spacecraft and rocket engine applications, discussing zero-gravity vent valve, zero leakage valve, insensitive valve seat and solenoid actuator
[ASME PAPER 66-MD-61]

21 p3742 A66-38494

PROPELLANT ADDITIVE

Immiscibility and rapid interface reaction rate as cause of disruption in nitrogen tetroxide-hydrazine impinging jets
[CI PAPER WSCI-65-20]

05 p0743 A66-15145

Additive effects on jet propellants, noting corrosion and oxidation

20 p3627 A66-38296

Effect of fuel-binders ingredients and additives on physicochemical properties of polyurethane-ammonium perchlorate base propellant grains 23 p4119 A66-41434

PROPELLANT BINDER

Cumulative damage and fatigue applicability to solid propellant-liner bonds failure, noting useful life and stress-time relationship

12 p1937 A66-24705

Bonding strength of polyurethane and polybutadiene composite propellants in cast-in-case rocket motors depends on propellant cohesive strength 12 p1934 A66-24706

Polymer chemistry for solid propellant binder development, examining attempts to introduce oxidants into binder

23 p4117 A66-41228

Increase of specific impulse of solid propellants by introducing endothermic groups into binder

23 p4117 A66-41230

Effect of fuel-binders ingredients and additives on physicochemical properties of polyurethane-ammonium perchlorate base propellant grains 23 p4119 A66-41434

PROPELLANT CASTING

Manufacturing large production quantities of precise solid propellant mixtures to meet space booster propulsion system

05 p0743 A66-15005

PROPELLANT CHEMISTRY

Rocket propellant chemistry covering synthesis, properties and capabilities of organic and inorganic rocket fuels

05 p0743 A66-14675

Properties, application and preparation of various propellants for rocket engines

08 p1280 A66-19754

Patents relating to chemistry of solid propellants for rockets over period 1945-1964

17 p2989 A66-33232

Source book on propellant chemistry covering combustion thermodynamics, recombination kinetics, solid propellant binders, oxidizers, etc

18 p3159 A66-33717

Chemical reactor on-site manufacture of propellant oxygen from metallic silicates found on Moon

22 p3977 A66-39895

Advanced propellant chemistry - ACS Meeting, Detroit, April

23 p4116 A66-41218

PROPELLANT COMBUSTION

SA METAL COMBUSTION

SA SOLID PROPELLANT IGNITION

Nitrogen trioxide given off during low pressure combustion of typical double base propellant

02 p0303 A66-11597

Steady state composition mechanism of solid /heterogeneous/ propellants noting linear pyrolysis, exothermal oxidizers, fuels, etc

02 p0278 A66-11681

Parameter relationship governing construction of models for combustion of

liquid fuels in rocket

engines 02 p0279 A66-11707

Flammability hazards of aircraft hydrocarbon fuels as function of temperature and pressure based on equilibrium conditions

[AIAA PAPER 65-801]

03 p0414 A66-12565

Droplet combustion fronts in hydrazine-nitrogen tetroxide system determined from kinetics of vapor decomposition, noting two-flame front model

[CI PAPER WSCI-65-21]

05 p0743 A66-15146

Temperature at which predecomposition or decomposition of ammonium perchlorate occurs, changed by perchlorate surface treatment and reflected in burning rate of propellant containing perchlorate

[CI PAPER WSCI-65-36]

05 p0744 A66-15151

Acoustic combustion instability of solid fuel rocket dependence on response of burning propellant surface to sound field

05 p0744 A66-15783

Development of 23KS20000 motor for Black Brant IIB vehicle with emphasis on internal ballistics

06 p0942 A66-16702

Physical model of composite solid propellant combustion which includes oxidizer particle size and surface heat generation

[AIAA PAPER 66-112]

06 p0941 A66-17098

Ignition of ammonium perchlorate composite propellants by convective heating

[AIAA PAPER 66-65]

06 p0941 A66-17101

Nonacoustic combustion instability of aluminized composite propellant

[AIAA PAPER 66-111]

06 p0941 A66-17105

Solid propellant rockets including stop-restart and variable-thrust engines, materials, propellant structural characteristics, nozzles, thrust-deflection systems, etc

08 p1280 A66-18573

Two-component solid propellant composition and configuration for spherical rocket engine

08 p1281 A66-18721

Binder-oxidizer interaction separation in composite solid propellants containing preirradiated ammonium

08 p1279 A66-18825

Mass flow rate of gas evolution from burning solid rocket propellant during transient depressurization of combustion chamber

[AIAA PAPER 65-104]

08 p1282 A66-19163

Combustion of solid rocket propellants, using potassium nitrate as oxidizer and phenol formaldehyde as

fuel 08 p1319 A66-19201

Servomechanism measurement of solid propellant burning rate

08 p1227 A66-19697

Solid, heterogeneous and gas phase ignition theories of solid propellants

[AIAA PAPER 66-64]

08 p1280 A66-19728

Book on quasi-stationary conditions in open systems with short reaction times in solid propellant rocket engines

09 p1432 A66-20487

Controlled interruption of combustion in solid propellant engine as applied to rockets and missiles

09 p1435 A66-20576

Hybrid rocket engine performance noting stable fuel burning, burning rate, thrust modulation, ignition delay and use of tricomponent fuels

10 p1594 A66-21715

Zero-g vapor feed system with no moving parts, noting ion engine testing, propellant use efficiency and surface tension storage

[AIAA PAPER 66-249]

11 p1761 A66-23083

Combustion of ammonium perchlorate propellants in solid propellant rockets

12 p1978 A66-23965

Limited nozzle throat area variation for combustion termination in rocket motor

[AIAA PAPER 65-194]

12 p1937 A66-24707

Combustion of composite ammonium perchlorate based propellants near extinction pressure, noting burning rate parameters

13 p2171 A66-25181

Overpressure of liquid propellant explosion in vacuum and

atmosphere 14 p2370 A66-27451

Suppression of random transverse thrust components in combustion phase of rockets by varying nozzle profile in region of throat

14 p2220 A66-27488

Periodic processes in combustion mechanism of composite

propellants 14 p2412 A66-27489

Small disturbances and effect on processes of fast combustion of inflammable

compressible mixture 14 p2374 A66-27690

Gaseous hydrogen and liquid oxygen combustion and heat transfer in small rocket chamber

14 p2375 A66-28104

Probability model for defining explosive yield and spill of liquid

propellant 14 p2371 A66-28442

Yield and combustion physics of liquid propellant explosions determined from analytic charts

14 p2371 A66-28443

Missile propellant explosion simulation by digital computer with estimate of physical parameters

14 p2395 A66-28445

Oscillatory behavior in rocket engines, analyzing interaction between shock wave and burning solid propellant surface and stressing gas dynamics

15 p2572 A66-29298

Advantages of higher combustion velocities shown by comparative analysis of radially and axially burning solid artillery rocket propellants

16 p2790 A66-31195

Lead stearate effect on thermodynamic properties of propellant, using heat-of-explosion test

16 p2790 A66-31685

Dynamic differential equation relating perturbations in feeding system with transient states in combustion chamber of liquid fuel rocket engine

17 p2989 A66-31838

Ignition and combustion mechanism of liquid propellant consisting of aliphatic alcohols and mixed acid, using calcium and potassium permanganates as

catalysts 17 p2989 A66-32458

Unsteady flow field, combustion processes and interaction regions during shock propagation in solid-propellant rocket combustors

17 p2991 A66-32486

Ignition model for condensed thermally unstable propellant by exothermal processes taking place in condensed

phase 18 p3260 A66-33719

Radiant heat transfer from hot solid combustion products to combustion chamber walls

[AIAA PAPER 65-559]

18 p3260 A66-33811

Direct measuring radiation calorimeter developed for determining radiant heat flux of solid propellant gas flame in rocket combustion chambers

[AIAA PAPER 65-358]

18 p3159 A66-33814

Response of burning solid propellant to pressure wave of finite amplitude studied by shock tube

[AIAA PAPER 66-601]

18 p3160 A66-34218

Hydrazine/nitrogen tetroxide propellant system, examining reaction mechanisms at rocket chamber conditions

[AIAA PAPER 66-662]

18 p3160 A66-34223

Solid propellant ignition and ignition propagation for rocket exhaust and hypergolic-type igniters

18 p3161 A66-34225

Solid rocket propellant quenching by depressurization, noting gas-side heat transfer coefficient

[WSCI 66-21]

18 p3161 A66-34413

Solid propellant characteristics for application to supersonic combustion, tabulating combustion properties of selected fuels and solid propellants

[WSCI 66-32]

18 p3161 A66-34416

Laboratory burners used as experimental analogs of actual propellant deflagration process, examining dependence of composite solid propellant deflagration on mixture ratio

[WSCI 66-25]

18 p3161 A66-34417

Metal combustion in porous plug configuration for application to solid propellants, noting aluminum porous plug fabrication

[WSCI 66-7]

18 p3161 A66-34420

Propellant composition influence on finite-amplitude axial wave mode instability in solid propellant rockets

[AIAA PAPER 66-600]

18 p3161 A66-34431

Cinephotomicrographic studies of metallized fuel-rich propellants with high aluminum powder content, discussing composition, burning rates, etc

[AIAA PAPER 66-616]

18 p3162 A66-34433

Solid propellant ignition, discussing deflagration wave propagation along gas-solid grain surface, flux equilibrium equation, etc

[AIAA PAPER 66-668]

18 p3165 A66-34441

Solid, heterogeneous and gas phase ignition theories of solid propellants

[AIAA PAPER 66-64]

18 p3162 A66-34580

Combustion of solid or hybrid propellants with one or more solid phases, noting properties, erosive and hybrid combustion, etc 18 p3165 A66-35240

Performance calculations for propellants in terms of composition and enthalpy and principles of rocket engines 19 p3449 A66-36287

Mathematical model of combustion instability in solid propellant rocket engines, noting system dynamic behavior, appearance of limit cycle and effect of large amplitude oscillations on burning rate 20 p3627 A66-36889

Hazards associated with ignition of various condensed phase hydrogen-oxygen systems 20 p3625 A66-37083

Electroexplosive devices in aerospace vehicles in two classes, propellants and high explosives, noting methods for controlling detonation desired effects 20 p3625 A66-37159

Burning rate anomalous dependence on particle size for ammonium perchlorate-polystyrene mixture 20 p3679 A66-37703

Phase relationships of normal stress perturbations in cylindrical combustor operating near atmospheric pressure with remixed air and natural gas 20 p3680 A66-38038

Lead stearate effect on heat of explosion in nitro-cellulose propellant combustion at various pressure levels 20 p3626 A66-38041

Hypergolic liquid propellant combinations, noting effect of feed pressure, injection tube diameter and fluid free path on ignition process in combustion chamber 20 p3626 A66-38140

Equilibrium control and burning rate control of solid propellant in heat exchanger 20 p3629 A66-38155

Lead loss in thermocouple imbedded in burning propellant, noting possibility of loss reduction by using flattened junction parallel to burning surface 20 p3681 A66-38177

Ignition of ammonium perchlorate composite propellants by convective heating [AIAA PAPER 66-65] 21 p3806 A66-38689

Propellant deflagration control for interaction between fluid dynamic disturbance and propellant combustion reaction 22 p3969 A66-39874

Regression rate for gas-solid hybrid motor described by convective heat transfer feedback mechanism through laminar sublayer [AIAA PREPRINT 34B] 22 p3970 A66-39876

Ignition and controlled burning of liquid oxygen-liquid methane mixture, evaluating use as rocket monopropellants [AIAA PREPRINT 28E] 22 p3969 A66-39880

Chemical nonequilibrium losses in solid propellant systems calculation based on heat release of recombination reactions [AIAA PREPRINT 28B] 22 p3971 A66-39883

Unsteady-state solid-propellant combustion subjected to acoustic pressure oscillations, noting effect of combustion parameters 22 p3971 A66-40352

Stability criteria for solid propellant burning for case of linear variation in propellant thermal conductivity, noting parameters and shift in instability modes 22 p3969 A66-40353

Nonacoustic combustion instability of luminized composite propellant [AIAA PAPER 66-111] 22 p3970 A66-40355

Physical model of composite solid propellant combustion which includes oxidizer particle size and surface heat generation [AIAA PAPER 66-112] 22 p3970 A66-40356

Deflagration of hydrazine perchlorate in ure state and with fuel and catalyst additives 23 p4117 A66-41225

Solid propellant combustion stability and physicochemical properties evaluated by measuring and calculation procedure 23 p4120 A66-41437

Rocket motor burning tests, discussing correlation of mechanical properties of polyurethane solid propellants to combustion characteristics 23 p4120 A66-41439

Combustion mechanism of composite propellants including solid propellant combustion rate measurements, flames spectrography, temperature at propellant

surface, etc 23 p4122 A66-41660

Compressible fuel mixture deflagration perturbation stability in induction regime characteristic of heat-stressed combustion chambers of rocket engines 23 p4122 A66-41790

PROPELLANT COMPOUND

Propellant combination selection for space flight missions with no unpowered periods 04 p0571 A66-13540

Nitronium tetrafluoroborate as versatile nitrating agent for nitrogen compounds 23 p4117 A66-41224

Manometric measurement of pressure rise as measure of formation rate of volatile products of thermal decomposition of hydrazinium monoperoxchlorate and hydrazinium diperoxchlorate 23 p4117 A66-41226

Decomposition reaction for nitronium perchlorate involving formation of nitronium perchlorate and oxygen 23 p4031 A66-41227

PROPELLANT DECOMPOSITION

Droplet combustion fronts in hydrazine-nitrogen tetroxide system determined from kinetics of vapor decomposition, noting two-flame front model [CI PAPER WSCI-65-21] 05 p0743 A66-15146

Measurement of hydrogen-fluorine kinetics at high temperatures [AIAA PAPER 66-637] 18 p3064 A66-34437

PROPELLANT GRAIN

SA SOLID PROPELLANT

Analog design technique for pellet motors, gas-generating devices in which propellant is in form of numerous small internal grains [AIAA PAPER 65-193] 03 p0415 A66-12759

Solid propellant difficulties like tail-off or grain cracking avoided, using radial slots molded into grain 03 p0415 A66-13226

Gas compression-conduction mechanism contribution to shock initiation of granular explosives, analyzing surface temperature of interstitial gas and grain distribution [CI PAPER WSCI-65-30] 05 p0788 A66-15141

Model derived describing oxide particle distribution obtained from internal burning cylindrically-perforated aluminized solid propellant grains [AIAA PAPER 65-10] 08 p1282 A66-19137

Thermomechanical response studies of solid propellants subjected to cyclic and random loading [AIAA PAPER 65-160] 10 p1590 A66-21776

Ballistic performance change in spinning rocket motors attributed to internal gas dynamics and combustion effects, noting grain geometry influence 10 p1590 A66-21945

Nonlinear viscoelastic theory to predict solid propellant reliability [AIAA PAPER 65-158] 12 p1934 A66-24703

Photographic method for measuring surface strain in solid propellant grains [AIAA PAPER 65-170] 12 p1970 A66-24712

Elastic stress-strain distribution by photoelastic method for case-bonded grains of solid propellant rocket, noting effect of propellant cavity geometry [AIAA PAPER 65-190] 14 p2402 A66-27871

Thermodynamic and reaction kinetic parameters in solid rocket motor efficiency, examining Le Chatelier effect of environmental pressure, influence of propellant temperature and system thermal losses 22 p3970 A66-39873

Hybrid rocket combustion mechanism, burning rate, mass transfer coefficient, throttling effects and grain design [AIAA PREPRINT 34C] 22 p3970 A66-39877

Structural integrity studies of gravitational and inertial loading effects on British solid propellant grains 23 p4115 A66-41112

Japanese Aeronautical Research Institute Solid Rocket and Special Small Rocket projects, examining propellant design for performance requirements 23 p4132 A66-41418

Direct-casting polyurethane-ammonium perchlorate-based composite propellant grain manufacture for small rocket motor, noting inspection methods 23 p4119 A66-41432

Erosive burning in rocket engines of radial burning type, using polyurethane/ammonium perchlorate base propellant grains, examining flow channel constriction 23 p4121 A66-41433

Effect of fuel-binders ingredients and additives on physicochemical properties of

polyurethane-ammonium perchlorate base propellant grains 23 p4119 A66-41434

Halides used as burning rate depressants on combustion stability of polyurethane/ammonium perchlorate base propellants, examining acoustic instability 23 p4119 A66-41435

Stress and strain analysis of polyurethane-base solid propellant grains under high internal pressure, determining mechanical characteristics and test procedures prior to rocket launching 23 p4120 A66-41438

Photoelastic analysis of stress and strain distributions of case-bonded propellant grains, calculating internal pressure and dependence on mechanical properties of grain material 23 p4120 A66-41440

PROPELLANT OXIDIZER

Extended Hueckel method calculations of bonding in N, F oxidizers 23 p4030 A66-41220

PROPELLANT PROPERTY

Petrographic microscopy has led to thorough optical characterization of phase composition of aged solid-propellant thin sections 02 p0278 A66-11540

Behavior and parameter variability of solid propellants and criteria for failure and for rejection 03 p0414 A66-12734

Propellant properties and particle formation efficiency determined for homogeneous condensation-type colloid thruster [AIAA PAPER 66-253] 11 p1760 A66-22221

Cast-double-base propellant mechanical behavior and failure during slow cooling and rapid pressurization of case-bonded rocket motors [AIAA PAPER 65-161] 12 p1934 A66-24704

Saturn launch vehicle, discussing methods of increasing payload capacity, engine improvements, propellant substitution, etc [SAE PAPER 660453] 18 p3246 A66-33896

Calculation of performance data of seven lithergolic propellant combinations with determination of principal thermodynamic coefficients 20 p3626 A66-38015

Combustion and performance characteristics of lithium aluminum hydride/hydrogen peroxide hybrid rocket [AIAA PREPRINT 34D] 22 p3969 A66-39878

Ultimate energy achievable in propellants, evaluating oxidizing group as propellant with model fuel, hydrazine 23 p4116 A66-41219

PROPELLANT SENSITIVITY

Drop-weight testing procedures using Olin Mathieson tester, noting mounting [CI PAPER WSCI-65-31] 05 p0788 A66-15142

Test method evaluating explosive sensitivity, due to shock, of materials immersed in oxygen difluoride for application to rocket propulsion systems [CI PAPER WSCI-65-34] 05 p0743 A66-15150

Liquid nitrogen dilution effect on LOX impact sensitivity of selected materials 10 p1590 A66-21951

PROPELLANT SPRAY

Heterogeneous detonations, discussing polydisperse and monodisperse spray detonations and liquid fuel film shock-induced combustion [AIAA PAPER 66-109] 06 p0969 A66-16256

Mathematical models to explain parametric dependence of specific charge of liquid droplets produced by electrical spraying through metallic capillary at high potential [AIAA PAPER 66-252] 10 p1522 A66-21458

Negatively charged colloid generation by electrostatic spraying, with capillaries arrayed alternately positive and negative [AIAA PAPER 66-251] 10 p1594 A66-21702

Two propellant injector designs for plasma accelerators that minimize or avoid bearing seal difficulty, using piezoelectric element and pulsed vaporization of filament of liquid conductor [AIAA PAPER 66-241] 12 p1936 A66-24519

Heterogeneous detonations, discussing polydisperse and monodisperse spray detonations and liquid fuel film shock-induced combustion [AIAA PAPER 66-109] 17 p3037 A66-33237

PROPELLANT STORABILITY

Stability of various plastics toward hypergolic rocket fuel components aerzine and nitrogen tetroxide 18 p3125 A66-35242

PROPELLANT STORAGE

Model simulating energy distribution

process /thermal stratification/ within liquid hydrogen stored aboard moving rocket to avoid pump cavitation
 [AIAA PAPER 64-426] 08 p1279 A66-18809
 Large launch vehicle cryogenic propellant logistics including storage and production capacity optimization, cost and heat loss analyses by computer simulation
 [AIAA PAPER 65-259] 16 p2789 A66-30900
 Combustion stability development with storable propellants for liquid rocket engines, showing coupling between technology and engine system
 [AIAA PAPER 65-614] 19 p3448 A66-35609
 Fluid content measurement in storage tanks under zero-g conditions discussing gas law system, trace material, capacitive panel and RF methods
 [AIAA PAPER 65-365] 19 p3340 A66-35611
 Test for space storability of liquid propellants by suitably coating storage tanks
 [AIAA PAPER 65-534] 19 p3448 A66-35613
 Surface tension propellant storage and feed systems for zero-g ion engines
 19 p3450 A66-35615
 Fluid hydrogen slush, discussing advantage of reduced evaporation loss during storage and handling, refrigeration and density
 20 p3625 A66-37074
 Cryogenic propellant boiloff losses in long duration space storage elimination by mechanical reliquefier, considering lunar, Earth-orbit and deep space application for hydrogen and oxygen
 20 p3625 A66-37079
 Storable metallized liquid propellants for rocket engine systems, noting gains in specific impulse and/or propellant density
 20 p3626 A66-38258
 Planar and rotary sloshing motion of liquid, using analytic mechanical model that consists of mass point constraint to parabolic surface
 22 p3993 A66-40361

PROPELLANT TANK
SA FUEL TANK
SA STORAGE TANK
 Rocket fuel tank testing under uniform interior pressure and stress
 calculation 03 p0430 A66-12498
 Tanks for cryogenic fluids on space vehicles noting structure, insulation, manufacturing techniques, materials, construction, etc
 06 p0887 A66-17069
 Design and manufacture of Blue Streak satellite launcher structure, noting propellant tank
 06 p0888 A66-17070
 Violent bubble behavior in liquids contained in vertically vibrated tanks caused by water hammer type of resonance
 [AIAA PAPER 66-86] 06 p0875 A66-17099
 Parametric requirements for eliminating coupling between bending, sloshing and control in large liquid-propelled elastic space vehicles
 10 p1612 A66-21941
 Nondimensional theoretical and experimental pressures and forces acting on flat ring baffle under sloshing conditions
 10 p1525 A66-21952
 Electron beam welding of high-strength titanium alloy propellant tank for third stage of ELDO carrier rocket and determination of optimum welding parameters
 12 p1885 A66-23783
 Rocket equipment simulation on rocket engine test facilities, describing fuel tank design for experiment with suitable flow characteristics and parameters
 12 p1829 A66-24317
 Structural component reliability analysis for rocket engine propellant tanks, noting variance testing of hemisphere strength for statistical tolerance limits
 15 p2507 A66-28795
 Sloshing motion control of liquid-vapor interface in spacecraft fuel tanks, using dielectrophoresis
 16 p2684 A66-30466
 Optimum design of pressurized multicell cylindrical shell, noting antislosh capacity and possibility for single pass welding
 16 p2816 A66-30909
 Violent bubble behavior in liquids contained in vertically vibrated tanks caused by water hammer type of resonance
 [AIAA PAPER 66-86] 16 p2685 A66-30913
 Dynamic law for pressure variation in throttle chamber of hydraulic control booster, taking into account fluid compressibility and change in discharge coefficient
 16 p2637 A66-31219
 Production cleaning of propellant tank of

Saturn S-IC 17 p2929 A66-32205
 Propellant tanking computer system for monitoring and controlling Saturn IB and Saturn V vehicles
 [SAE PAPER 660454] 17 p2904 A66-33162
 Space vehicle containers, discussing prolonged storage of cryogenic liquids, insulation requirements, container configuration and design, etc
 [SAE PAPER 660460] 17 p3017 A66-33165
 Impact of propellant heating on nuclear spacecraft insulation and pressurization systems design
 18 p3240 A66-33816
 Liquid hydrogen-oxygen cryogenic propulsion stages, examining structural material and configuration of propellant tank and thermal flow effects
 18 p3246 A66-34007
 Stability of various plastics toward hypergolic rocket fuel components aerzine and nitrogen tetroxide
 18 p3125 A66-35242
 Lightweight insulations for space vehicle cryogenic storage tanks based on design principles of multilayer radiation shields
 19 p3473 A66-35598
 Weight and size optimization of flight type cryogenic storage supply system of oxygen and hydrogen for fuel cell operation and life support - in manned spacecraft
 19 p3292 A66-36233
 Self-sealing shield for protection of micrometeorite penetration in propellant tank
 20 p3659 A66-37077
 Thermal analysis and weight optimization of low-heat-leak storage tanks, particularly aspects important to designers of propellant tanks for long-term lunar storage
 20 p3676 A66-37078
 Surveyor vernier propulsion system, discussing design of thrust chamber, propellant tank assemblies, functions of VPS, etc
 [AIAA PAPER 66-593] 20 p3629 A66-37632
 Propellant sloshing in tanks of guided missile, giving mathematical description and numerical and experimental results in Coralie stage
 21 p3818 A66-38642
 Monograph on dynamics of body with liquid-filled cavities associated with practical problems of rocket technology such as seismic stability of liquid propellant tank
 21 p3831 A66-39287
 Coupling between spin-stabilized rocket motion and propellant sloshing tested in zero gravity environment
 [AICE PREPRINT 17C] 22 p3897 A66-39887
 Multilayer insulating material thermal-mechanical environmental tests for use as heat shields in cryogenic storage tanks
 [AICE PREPRINT 22F] 22 p3997 A66-39889
 Thermal conductivity of formed-plastic composite insulation systems for liquid hydrogen storage tank
 [AICE PREPRINT 22D] 22 p3997 A66-39893
 Up-rated saturn IB launch vehicle, examining payload augmentation by propellant substitution, S-IB stage propellant tank extension and addition of strap-on solid propellant rocket motor
 [SAE PAPER 660462] 24 p4281 A66-42396

PROPELLANT TESTING
SA ENGINE TESTING
 Liquid hydrogen flow system startup of full scale simulated nuclear rocket engine
 03 p0391 A66-12350
 Heavy confinement cap test characterizing exothermic decomposition of liquid and solid materials subjected to heat, pressure and mechanical shock, determining monopropellant energy releases
 [CI PAPER WSCI-65-35] 05 p0744 A66-15152
 Prediction of failure behavior in composite hydrocarbon fuel binder propellants
 [AIAA PAPER 65-156] 10 p1590 A66-21946
 Liquid hydrogen flow system performance during startup transient of nuclear rocket measured in full-scale simulated engine system, approximating in-flight exhaust conditions
 12 p1911 A66-23699
 Static rocket propulsion testing for various propellants and test instrumentations
 [AIAA PAPER 65-476] 12 p1858 A66-24688
 T-burner tests for combustion stability evaluation of hydrazine diperchlorate
 [AIAA PAPER 66-599] 18 p3264 A66-34430
 Corrosion problems with simulated fuel in launch vehicle models
 21 p3750 A66-38799
 Unmanned space vehicle on board

measurements and data transmission to ground station, examining temperature and propellant measuring techniques
 21 p3741 A66-39631
 Curing problems of highly exothermic propellants investigated using mathematical models, detailing heat conduction and thermal properties
 22 p3968 A66-39868

PROPELLANT TRANSFER
 Aeromedical factors of Titan II ICBM support, discussing human factors in missile crew and propellant transfer
 11 p1648 A66-22582
 Electron bombardment thrusters using liquid mercury cathodes, noting lifetime propellant and power efficiency, feed system, temperature limits, etc
 [AIAA PAPER 66-232] 13 p2172 A66-25172
 Viscosity effect on performance of turbine type flow meters calculated to meet accuracy requirement for complete use of propellants in rocket propelled vehicles
 19 p3361 A66-36646

PROPELLER
SA SHROUDED PROPELLER
 Reduction gears, mechanical systems and automation of modern propellers, rotors and blowers
 01 p0014 A66-11061
 Hovercraft noise due to propeller, engine and transmission, examining reduction techniques, comparing with aircraft and surface transport
 04 p0457 A66-13466
 Solving integral in propeller design and second-order effects in subsonic airfoil theory
 05 p0606 A66-15082
 Undulating propeller, combination of flapping and fixed wing, as propulsion system for water, land and air vehicles
 07 p0987 A66-17484
 Temperature distribution of propeller heated by electric anticler, with solutions for heater and propeller surface
 09 p1328 A66-20753
 Marine propellers and ducted propeller propulsive devices
 16 p2688 A66-31328
 External noise associated with hovercraft propeller
 18 p3051 A66-33689
 Digital computer program for V/STOL aircraft static propeller characteristics and optimization, based on initial wake hypothesis and trailing vortex sheet properties
 22 p3843 A66-40294

PROPELLER BLADE
 Aerodynamic characteristics of blower in form of propeller with rim
 03 p0314 A66-12536
 Monograph on clearance losses between rotating blade of propeller and annular duct, determining reduction by blade blowing
 09 p1327 A66-20454
 Empirical estimation of hovercraft propeller noise level, correction curves for blade number and noise correlation
 10 p1484 A66-21799
 Stability of wing mounted pro-rotor pylon systems in fully converted aircraft configuration, showing in-plane force generated by blade flapping as destabilizing factor
 16 p2633 A66-30599
 Shipborne vibratory stress device for measurements on propeller blade and shaft by periodic data sampling
 20 p3668 A66-37505
 Wind tunnel flight data correlation program, considering tunnel wall effects, measurement and control of thrust and propeller blade angle
 [AIAA PAPER 66-737] 22 p3893 A66-40627
 Comparison between theoretical and experimental measurements of rotation caused by axial load on highly twisted bars following stress relieving
 23 p4138 A66-41380

PROPELLER DRIVE
SA HELICOPTER PROPELLER DRIVE
 Nonmathematical notes on propeller whirl flutter
 02 p0300 A66-11993
 Quad tilt propeller, tilt prop/rotor and two direct lift jets for VTOL aircraft compared for design
 06 p0806 A66-16811

PROPELLER EFFICIENCY
 Propeller control at low airspeed on turboprop engines in any fixed-wing aircraft, with special reference to thrust or drag in approach and landing
 [AIAA PAPER 65-709] 01 p0013 A66-10946
 Propeller control at low airspeed on turboprop engines in any fixed-wing aircraft, with special reference to thrust or drag in approach and landing

AIAA PAPER 65-709] 09 p1329 A66-20242
 Jet-flap controlled lifting propeller,
 examining power and 21 p3731 A66-39592
 efficiency
 Annular vortices method applied to
 determine aerodynamic characteristics of
 lifting propeller in axial and oblique
 flows 23 p4010 A66-41785

PROPORTIONAL CONTROL
 Optimal and suboptimal design of vehicular
 control and proportional navigation system
 based on Pontryagin maximum
 principle 19 p3397 A66-35882
 Gamma angle control method in velocity
 pursuit problem 21 p3770 A66-38987
PROPORTIONAL COUNTER
 Fast and slow neutrons detected by
 proportional and scintillation
 counters 05 p0755 A66-15408
 Neutron albedo measurements on polar
 orbiting satellites 07 p1120 A66-17981
 Neutron intensity increase observed by
 boron fluoride proportional counter at high
 altitude associated with auroral zone X-ray
 event 07 p1121 A66-17983
 Miniature proportional counters with low
 background level for determining ultrasmall
 quantities of Ar 37 and H 10 p1610 A66-22017
 Altitude variation of EAS particle density
 and primary energy/nucleon spectra
 measured with proportional
 counters 18 p3210 A66-35125
 Miniature proportional counters with low
 background level for determining ultrasmall
 quantities of Ar 37 and H 19 p3453 A66-36103
 Rocket instrumentation for galactic X-ray
 observation, noting scintillation counter,
 proportional counter and GM
 counter 20 p3636 A66-38237
 X-rays and Auger electron emission by
 krypton 81 measured, using proportional
 counter 24 p4262 A66-42430

PROPULSION SYSTEM
 SA HOT CYCLE PROPULSION SYSTEM
 SA MAN OPERATED PROPULSION
 SYSTEM /MOPS/
 SA ROCKET ENGINE
 SA TORPEDO PROPULSION SYSTEM
 Reliability design concepts in cryogenic
 fluid systems in Saturn S-IV stage
 propulsion system, noting hydrogen and
 LOX tank pressurization 01 p0129 A66-10079
 XB-70A components and subsystem
 operation and design noting engine,

electrical and cooling control systems
 [SAE PAPER 650841] 01 p0130 A66-10833
 Space transportation systems for Moon
 exploration and beyond noting nuclear,
 nuclear pulse and electric
 propulsion 02 p0295 A66-11649
 Air-augmented rocket engine used as
 propulsion system for carrier
 vehicle 02 p0278 A66-11666
 Performance operation and cost of rockets
 and airbreathing launch system, noting
 preliminary designs 02 p0295 A66-11676
 Operation and future of helicopter noting
 present usefulness in light observation, light
 and medium transport, armed escort, war,
 rescue, civil and general
 utility 02 p0178 A66-11991
 Propulsion-control systems interface for
 V/STOL hover control in aircraft, using lift
 plus lift cruise propulsion concept
 [AIAA PAPER 65-799] 03 p0319 A66-12564
 Propulsion system with solar energy for
 space exploration near
 Sun 03 p0416 A66-13224
 Design and comparison of apogee impulse
 systems developed for booster rocket thrust
 augmentation 04 p0573 A66-13541
 Nuclear power systems for spaceflight
 considering isotope batteries, energy source
 reactors and nuclear
 drives 04 p0544 A66-13547
 Automatic control in captive testing of
 large space-vehicle propulsion systems and
 components 04 p0507 A66-13614
 Integration of propulsion systems with
 airframe, emphasizing aerodynamic lift and
 drag 05 p0605 A66-14934
 Pump-fed fluid rocket engines with
 chamber pressures over 100
 atm 06 p0941 A66-15913
 Electric and photon propulsion systems in
 German-American
 research 06 p0942 A66-15931
 Production and recent developments in gas
 turbines and propulsive engines in West
 Germany 06 p0942 A66-16795
 V/STOL Aircraft Symposium, Wright-
 Patterson AFB, Ohio, November
 1965 06 p0805 A66-16808
 VTOL influence factors for V/STOL
 systems in propulsion 06 p0943 A66-16809
 Control and lift-propulsion systems and
 model testing of Canadair CL-84 V/STOL
 tilt-wing aircraft 06 p0806 A66-16818
 Undulating propeller, combination of
 flapping and fixed wing, as propulsion
 system for water, land and air
 vehicles 07 p0987 A66-17484
 Data on combustion of pyrolyzing solids as
 applicable to combustion chambers of hybrid
 propulsion devices, placing emphasis on
 coal 07 p1154 A66-18028
 Combustion chamber of propulsive duct
 including duct potential, feedback, reed-type
 valve, aerodynamic valve, Venturi design,
 fuel control, etc 07 p1110 A66-18162
 Civilian and Military Uses of Aerospace-
 Conference, New York, January
 1965 08 p1299 A66-18547
 SERT capsule tested two ion engines in
 space 08 p1281 A66-18735
 Electric propulsion including thrusters,
 power systems, solar power, hybrids,
 etc 09 p1434 A66-20247
 Design and propulsion of 2-B version of
 Lockheed L-2000 SST noting drooping nose,
 variable geometry inlets, stressed skin
 construction, etc 09 p1329 A66-20390
 Aircraft and missiles operating at Mach 2
 to 5 using air breathing propulsion systems,
 noting roles of ramjet and turbine
 engines 09 p1435 A66-20667
 Propulsion problems for engine of 5000
 mph aircraft noting ramjet, cooling, intake,
 nozzle, etc 09 p1435 A66-20669
 Electric propulsion system effective mass
 dependent on trajectory, vehicle parameters
 and thruster characteristics
 [AIAA PAPER 64-676] 10 p1595 A66-21936
 Electrothermal propulsion system using
 heated gaseous nitrogen to provide Vela
 satellite with orbital velocity correction
 capability and weight savings
 [AIAA PAPER 66-213] 11 p1759 A66-22217
 Supersonic combustion for possible
 application to ramjets, considering
 propulsion aspects and combustion in
 supersonic stream 11 p1761 A66-23249

Unmanned space missions with regard to
 dynamical requirements, propulsion systems,
 tracking methods, guidance and
 control 12 p1953 A66-23636
 Concord SST propulsion system, discussing
 thrust, flight requirements, medium
 compression ratio straight jet engine, intake,
 exhaust, etc 12 p1935 A66-23706
 Concord SST propulsion system, discussing
 maintainability, monitoring, closed-loop
 control systems, nozzle, intake,
 etc 12 p1935 A66-23707
 Advanced low-thrust propulsion systems
 and propellants evaluation for
 stationkeeping and stability control of NASA
 Manned Orbital Research Laboratory
 [AIAA PAPER 66-226] 12 p1936 A66-24522
 Static rocket propulsion testing for various
 propellants and test instruments
 [AIAA PAPER 65-476] 12 p1858 A66-24688
 Plasma as energy source for thermoelectric
 and electromagnetic propulsion
 systems 13 p2173 A66-26579
 Space power systems engineering -
 Conference Philadelphia, September
 1964 13 p2002 A66-26604
 Statistical techniques in design review,
 with application to
 rockets 14 p2371 A66-26809
 Nonconventional application of electric
 power-generating closed-cycle gas turbines
 [ASME PAPER 66-GT/CLC-8] 14 p2224 A66-26981
 GE-4 turbojet engine for SST design and
 program development, maintenance, safety,
 economics, performance, noise, etc
 [SAE PAPER 660298] 15 p2572 A66-29833
 Microwave beam-powered ferry
 vehicle 16 p2810 A66-30918
 Electrostatic ion sources, noting simulation
 chamber for tests and measurement results
 on emissive power of porous
 tungsten 16 p2791 A66-31191
 Electrostatic ion sources, assessing thrust
 output and lifetime for various space
 missions and satellite attitude
 control 16 p2791 A66-31192
 Aircraft design requirements concerning
 V/STOL technology emphasizing cost, size
 and propulsion system 16 p2634 A66-31323
 Marine propellers and ducted propeller
 propulsive devices 16 p2688 A66-31328
 Propulsion systems for European launch
 vehicles for scientific satellites,
 interplanetary probes and orbiting
 observatories 17 p2990 A66-32370
 Air augmented propulsion in liquid
 hydrogen-LOX rocket booster
 engines 17 p2990 A66-32376
 First-stage propulsion of aerospace
 transporter, discussing design and
 operational requirements 17 p2990 A66-32377
 USAF Aero Propulsion Laboratory research
 in weapon systems and turbine engines,
 ramjets, etc 18 p3269 A66-34956
 Interstellar vehicle propelled by terrestrial
 laser beam 19 p3449 A66-35488
 Low-thrust jet fitted shoe for zero-gravity
 movement 19 p3290 A66-35957
 Minimum fuel transfer between
 neighboring elliptic orbits for low-thrust
 power-limited propulsion system, using
 Pontryagin maximum principle, vehicle
 motion and fuel
 consumption 20 p3645 A66-36875
 Liquid methane fueled propulsion system
 for SST application, noting increased
 payload capacity, propellant characteristics
 and design criteria for storage within
 aircraft
 [AIAA PAPER 66-685] 20 p3625 A66-37259
 Papers of F. Nakanishi covering yield point
 of mild steel, brittle materials, propulsion,
 plasticity, etc 20 p3683 A66-37826
 Liquid rocket POGO oscillations caused by
 closed-loop interaction between longitudinal
 structural mode of vibration and propulsion
 system 20 p3629 A66-38154
 Book on fuel behavior in piston-engine, jet
 and rocket 21 p3806 A66-38950
 Optimum parameters for low-thrust
 propulsion system with energy storage for
 specific maneuver 21 p3808 A66-38974
 Propulsion systems for air cushion craft
 SKIP-I in marine environment
 [AIAA PAPER 66-731A] 21 p3808 A66-39100
 Small liquid propulsion systems testing in

space environment simulator with high vacuum and low pumping
 capacity 22 p3890 A66-40226
 Concorde supersonic transport aircraft propulsion, fuel supply and storage systems 22 p3848 A66-40415
 Performance, kinetic heating, structural weight and effectiveness of air breathing propulsion for first stage of aerospace transport vehicle
 [ICAS PAPER 66-28] 22 p3972 A66-40664
 Propulsion control systems interface for V/STOL hover control in aircraft, using lift plus lift cruise propulsion concept [AIAA PAPER 65-799] 23 p4015 A66-40985
 Deep submergence propulsion and marine systems - AIAA Conference, Forest Park, Illinois, February-March 1966 23 p4054 A66-41205
 Payload capabilities of launch vehicles, particularly for missions with high velocity requirements, analyzing various propulsion systems 23 p4121 A66-41315
 Total system compatibility in V/STOL propulsion system development and testing [AIAA PAPER 66-738] 23 p4121 A66-41325
 Supersonic combustion simulation facility and duplicable static parameters for hydrogen fuel [AIAA PAPER 66-743] 23 p4052 A66-41327
 Lithium chloride power plant theory and technology, noting application to critical weapons systems 23 p4021 A66-41758
 Propulsion system development for very high speed winged vehicles application [ICAS PAPER 66-29] 23 p4122 A66-41933
 Single air flow acceleration and deviation for propulsion and lift of high speed aircraft, analyzing long-range flight paths [ICAS PAPER 66-41] 23 p4122 A66-42070
 Hypersonic transport /HST/ evaluation noting problems in aerodynamics, economics, structures, propulsion systems, etc 24 p4159 A66-42236
 Aircraft flying up to 6000 miles at Mach numbers up to 8, noting problems in aerodynamics, propulsion, structural weight, cooling, etc 24 p4157 A66-42237
 Liquid methane as fuel for SST propulsion in terms of cost, combustion heat and cooling capacity 24 p4261 A66-42240
 Factors involved in bringing propulsion system to operational status noting engine design, development, cost, testing, etc 24 p4296 A66-42243
 V/STOL aircraft for commercial short-haul transports, considering turboprops, fan-wing and propulsion 24 p4159 A66-42891
 Electrical propulsion devices for space vehicles related to plasma physics, ion-beam generation and particle dynamics 24 p4262 A66-43120

PROPULSION SYSTEM PERFORMANCE
 Aircraft control power requirements provided by lift fan propulsion system for V/STOL flight, noting gas power transfer [SAE PAPER 650831] 01 p0130 A66-10830
 Gas Dynamics Laboratory program for study of V/STOL propulsion, using NRC VTOL propulsion tunnel 01 p0008 A66-10964
 Estimation technique for combined effect of all variables acting simultaneously on mission of large launch vehicles 03 p0416 A66-12768
 V/STOL Canadair CL-84, evaluating control and lift propulsion system 05 p0609 A66-14767
 Propulsive duct combustion chamber with application of feedback and spark discharge for VTOL and aircraft propulsion 05 p0744 A66-14997
 Role of ground and flight simulation test facility on past, current and future developments in aerospace propulsion 06 p0867 A66-15932
 Requirements and performance expectations of chemical and nuclear propulsion systems for manned Mars and Venus missions 06 p0942 A66-16499
 Lunar and terrestrial vehicle wheels, frame, steering, suspension, electrochemical energy converters, electric traction power systems and vehicular propulsion [SAE PAPER 660150] 07 p1018 A66-17867
 Electric rocket propulsion system requirements for space propulsion, comparing capabilities with chemical and

electrical rockets 08 p1280 A66-18575
 Aerospace propulsion systems evaluated and compared from standpoint of cost or effectiveness 08 p1280 A66-18576
 Electrical propulsion engine performance accurately measured by thrust balance design, using flotation and flexible propellant lines
 [AIAA PAPER 66-228] 11 p1761 A66-23085
 Working section size and shape for V/STOL wind tunnels, emphasizing wall effect magnitude limitation, aircraft aerodynamic and propulsion system characteristics 12 p1857 A66-23657
 Ground test verification of SNAP-8 flight reactor design and operation of reactor while coupled to power conversion system 12 p1911 A66-23679
 XB-70A propulsion system development and testing emphasizing fuel system, inlet-engine compatibility and engine installation [AIAA PAPER 65-571] 13 p2173 A66-25595
 Incompressible fluid static thrust augmentation devices for aircraft propulsion for cases of presence and absence of heat and work exchange [ASME PAPER 66-GT-116] 14 p2373 A66-27008
 Design concepts, operating constraints and performance of radioisotope propulsion systems for space probes 14 p2330 A66-27885
 Matching planetocentric and heliocentric low-acceleration trajectories in analysis of propulsion system performance 15 p2598 A66-29297
 Diamant French satellite launching examining combustion stability during ignition, vibrations, chemical reactions between oxidizer and pressure feed system, etc 17 p3017 A66-33236
 Solid core nuclear engine clustering and effect of system tradeoffs on vehicle performance 18 p3133 A66-33810
 Design study of two-seat road-going air cushion vehicle 18 p3052 A66-33973
 Supersonic transport propulsion systems noting thrust requirement, noise reduction, commercial feasibility, etc [SAE PAPER 660297] 18 p3165 A66-34943
 Turbojet propulsion system performance analysis methods 19 p3355 A66-35525
 Aerodynamics of propulsion plants, discussing cascade flow parameters, sub and supersonic flows, rocket gas cooling, acceleration of electrically conducting gases, etc 19 p3343 A66-36749
 Pitting of stainless steel, coated and uncoated, occurring when exposed to nitrogen tetroxide during propulsion system testing in space simulation chamber 22 p3890 A66-40221

PROPULSION EFFICIENCY
 Combustion phenomena in model combustion chamber of lift jet engine in terms of efficiency, pressure loss and extinction limit 03 p0443 A66-12400
 Aircraft and propulsion system design matching for long range and endurance aircraft [AIAA PAPER 64-783] 05 p0610 A66-15073
 Low thrust cold gas reaction jet system for small spacecraft with nitrogen, ammonia, Freon-12 and Freon-14, analyzing thrust chamber pressure history [ASME PAPER 65-WA/AUT-11] 05 p0624 A66-15608
 Propulsion efficiency of magnetic annular arc /MAARC/ [AIAA PAPER 66-115] 06 p0808 A66-16251
 Liquid chemical propulsion rocket engines development problems, specifically propulsion system for Titan rocket 08 p1280 A66-18572
 Specific impulse of solid and liquid propellants to increase performance 09 p1433 A66-20801
 Resistojet design and fabrication, using hydrogen propellant and having 3-kw power input [AIAA PAPER 66-224] 10 p1592 A66-21451
 Electron bombardment ion thrusters with two accelerator-grid systems for producing ion beams in directions 180 or 90 degrees apart [AIAA PAPER 66-248] 10 p1593 A66-21457
 Annular magnetic Hall current plasma accelerator 10 p1594 A66-21779
 Energy efficiency trends in two-stage

repetitively pulsed coaxial plasma accelerator 12 p1935 A66-23571
 Aerospacecraft performance optimization and design evaluation for airbreathing-rockets propulsive systems by variational calculus [AIAA PAPER 65-18] 12 p1954 A66-24699
 Liquid cooled high specific impulse arc jet engine has measured engine thrust not completely aerodynamic in nature [AIAA PAPER 64-669] 14 p2374 A66-27477
 Advantages of higher combustion velocities shown by comparative analysis of radially and axially burning solid artillery rocket propellants 16 p2790 A66-31119
 Energy relationships for efficiency of propulsors which induct boundary layer fluid on submerged body of revolution [AIAA PAPER 65-234] 16 p2688 A66-31330
 Efficiency of two-stage repetitively pulsed coaxial plasma engine calculated from engine thrust and total mass flow [AIAA PAPER 66-342] 17 p2990 A66-32444
 Electrostatic ion drives technology problems, considering conversion efficiency, thrust, reliability, high voltage, mass per unit thrust, etc 17 p2991 A66-33233
 Propulsion control systems for Concorde aircraft, noting aero- and thermodynamic reasons for power plant variables subject to manipulation 23 p4122 A66-41770
 Propulsion efficiency of magnetic annular arc /MAARC/ [AIAA PAPER 65-115] 23 p4107 A66-41901

 Personal thermal conditioning system emphasizing heat exchange between body and environment to provide comfort with water-cooled protective clothing 02 p0188 A66-12012
 Flying personnel protection, discussing human organism tolerance to sudden immersion in cold water and protective stratospheric suits 06 p0816 A66-16062
 Test program evaluating protective clothing and safety equipment for personnel working in Saturn booster at minus 100 F in oxygen-rich or deficient environment, noting problems with communications, visibility, breathing, etc 12 p1810 A66-24958
 Aircrew body heat loss from cold water immersion and developments in heating systems and insulative clothing 15 p2442 A66-28656
 Comparative insulative properties of wet and dry type immersion protection flight clothing 16 p2643 A66-31127
 Crash and ballistic protective flight helmets, noting use of improved energy dissipating materials 17 p2863 A66-32146
 Aircrew helmet design for protection against buffeting and against crash impacts 17 p2865 A66-32188

PROTECTIVE COATING
 SA CLADDING
 SA SPRAYED PROTECTIVE COATING
 SA WATERPROOFING
 Protective coatings for extreme temperature environment discussing types, application, performance in oxidizing atmospheres, tests and industrial problems 01 p0084 A66-10090
 Optical damage of spacecraft thermal control coatings in simulated space radiation environment of geomagnetically trapped particles [AIAA PAPER 65-646] 01 p0089 A66-10227
 Spacecraft thermal control surface damage by solar wind bombardment in hydrogen and helium plasmas, with measurements of solar spectral reflectance and thermal emittance

- [AIAA PAPER 65-647] 01 p0089 A66-10228
Low energy proton effect on thermal control coatings
- [AIAA PAPER 65-648] 01 p0090 A66-10229
Proton and alpha particle effects on thermal properties of spacecraft and solar concentrator coatings of anodic-coated aluminum, zinc oxide/potassium silicate, etc
- [AIAA PAPER 65-649] 01 p0090 A66-10230
Reflectance and emittance properties of binary coatings in sintered or compacted powder form in terms of properties of pure components
- [AIAA PAPER 65-670] 01 p0090 A66-10231
Embedment stress effects on electrical characteristics of encapsulated components, presenting capacitor test results
- 02 p0247 A66-11287
Diffused aluminum coating for high temperature application
- 03 p0380 A66-12371
Testing and application of hard facing methods used on turbine engine components to provide wear resistance at high temperature
- 03 p0373 A66-13085
Rapid method for solid state diffusion bonding of aerospace sheet metal structures fabricated from refractory or dispersion hardened metals
- [SAE PAPER 650780] 05 p0688 A66-15008
Oxidation, stress-to-rupture, thermal and vibration fatigue tests at various temperatures carried out on protectively coated molybdenum and titanium-molybdenum alloy
- 05 p0702 A66-15469
Thermionic converter transforming calorific energy of flame into electric energy having protective coating of enamel-covered alumina
- 05 p0623 A66-15594
Optical properties of spacecraft temperature control coatings under simulated geomagnetically trapped electron bombardment
- [AIAA PAPER 65-137] 05 p0706 A66-15792
Measurement of surface emittance of surface coatings for selected metals, providing low-thermal emittance characteristics in IR spectrum for thermal and corrosion control
- [AIAA PAPER 66-18] 05 p0705 A66-15849
Transient resistance and time delay of protective glass coatings on film resistance thermometer
- 06 p0882 A66-16845
Thin film coating effect on silicon solar cell performance
- 07 p0991 A66-17288
Steady state temperature distribution for cylindrical shells under space conditions, calculating effect of internal radiation and surface coatings
- 07 p1143 A66-17591
Solar absorbance and thermal emittance of vacuum-deposited aluminum, zinc oxide-potassium silicate white paint and high emissivity black paint after exposure to salt atmosphere
- [AIAA PAPER 66-41] 07 p1053 A66-17892
Oxidation-resistant ceramic coatings for tungsten, tantalum, molybdenum and niobium
- 07 p1051 A66-18300
Plasma and carbide coatings for protecting graphite surfaces at high temperatures obtained by sputtering or deposition and thermal treatment to induce diffusion
- 10 p1548 A66-21508
Protective coating of printed circuit assemblies against humidity, salt spray and other adverse environmental factors
- 11 p1665 A66-22679
Satellite protective coatings using vacuum UV radiation absorbers for temperature control
- 11 p1720 A66-23125
Magnesium fluoride overcoated aluminum mirrors, discussing thickness monitoring techniques by vacuum UV reflectance measurements
- 11 p1737 A66-23430
Hot-wire anemometer applications to turbulence measurements in conducting liquids and vacuum deposition of quartz film on coated hot-film probe
- 12 p1880 A66-23848
Superalloy coatings for gas turbine components assessed, criticizing lack of objective comparative data, noting pack-cementation and spray diffusion processes
- 13 p2108 A66-25652
Compressible metal for turbine seal, discussing Nicroseal coating used in sealing clearance between rotor and adjacent stationary parts
- 13 p2109 A66-25777
Argon arc and resistance diffusion /vacuum/ welding of Ti and Ti alloys and protective metallic coating deposition on welded parts
- 13 p2110 A66-26027
Diffusion and flame-sprayed coatings and need for standard tests for thermal protection coatings
- 13 p2111 A66-26289
Strength of screw-connected aluminum alloys, noting screw grades, coatings, thread inserts required, etc
- 14 p2301 A66-27254
Plasma sprayed and detonation-flame-plated protective wear-resistant coatings to extend life of aircraft jet engine parts
- [SAE PAPER 660310] 14 p2301 A66-27292
Directional monochromatic emittance of isothermal diathermanous coatings on various conductors
- [AIAA PAPER 65-119] 14 p2411 A66-27410
Spherical substrate converted to parabolic mirror by selective evaporation of aluminum, using silver as nonuniform thickness layer
- 15 p2499 A66-28841
Effect of storage in air at high temperatures on resistance, temperature coefficient of resistance of metal alloy film resistors, noting effect of silicon oxide protective overcoating
- 16 p2783 A66-31426
Near UV effects on thermal control surfaces at cryogenic temperature
- 17 p3035 A66-32749
Stress corrosion in titanium alloys noting measurement techniques, crack forming effect of chlorine and surface treatment via metal coating
- 19 p3378 A66-35651
Oxidation resistant pack cementation coatings for refractory metal complex structures
- 19 p3370 A66-36140
Chemical vapor deposition of thermoprotective coatings on refractory metal structures
- 19 p3370 A66-36141
Chemical vapor deposited thermoprotective coatings for tungsten-and molybdenum-based refractory alloys, discussing diffusion barrier selection, interfacial microhardness, high temperature diffusion-annealing tests, etc
- 19 p3383 A66-36142
Protective coatings for titanium and tantalum refractory alloy brazing envelopes, offering ephemeral protection from oxidation at ultrahigh temperatures
- 19 p3384 A66-36143
Plasma arc metal spraying techniques for deposition of thermo/oxidation protective coatings on refractory metals
- 19 p3370 A66-36144
W-3 oxidation-resistant coating effect on mechanical properties of notched and unnotched TZM Mo alloy, analyzing photomicrographic and microhardness data
- 19 p3384 A66-36145
Oxidation-resistant silicide thermoprotective coatings for tantalum and tantalum-based alloys
- 19 p3384 A66-36146
Thermoprotective coating for high temperature tantalum alloy
- 19 p3384 A66-36147
Oxidation-resistant coatings for high temperature tungsten
- 19 p3384 A66-36148
Oxidation-protective coating of niobium alloy for application on reentry vehicles
- 19 p3384 A66-36149
Thermoprotective coating of niobium-based and other refractory alloy metal foils
- 19 p3384 A66-36150
Tensile properties of protectively coated refractory metals for structural components in high temperature oxidizing environments
- 19 p3385 A66-36151
Effect of chemical chromate film on high temperature oxidation behavior of beryllium
- 19 p3386 A66-36437
Space environmental effects on thermal control coating, describing simulation facility design, components and functions
- 20 p3543 A66-37315
Ion propulsion engine with replenishable liquid-film-protected tungsten electrode, discussing construction and mass loss rate vs temperature
- [AIAA PAPER 65-378] 20 p3629 A66-38167
Simulated solar absorbance of spacecraft thermal control coatings determined calorimetrically in vacuum at room and cryogenic temperatures
- 22 p3889 A66-40217
Interplanetary space environment effect on surface thermal radiative properties, noting results of exposure to simulated solar plasma, solar UV, solar wind, etc
- 22 p3889 A66-40218
Thermal control surface contamination due to rocket exhaust plumes and effects on solar absorbance and IR emittance of protective coatings
- 22 p3891 A66-40231
Strength of joints made in refractory metals using brazing, welding or diffusion bonding, noting role of coating
- 22 p3925 A66-40265
Composite thermal coating consisting of refractory facing and slightly heat-conducting decomposing lining
- 22 p4000 A66-40818
Heat insulation coating for Japanese SSR /special small rocket/ and materials testing by torch-burner method
- 23 p4148 A66-41426
Heat insulation coating on cylinder wall of solid propellant rocket motor using epoxy resin, polysulfide plastic, metal oxides, etc
- 23 p4148 A66-41431
Plasma and carbide coatings for protecting graphite surfaces at high temperatures obtained by sputtering or deposition and thermal treatment to induce diffusion
- 23 p4083 A66-41528
Protective coating problems of superrefractory alloys for use in space gliders at temperatures above 1000 degrees C
- 23 p4081 A66-41655
Iridium coating for graphite oxidation protection at temperatures over 2000 degrees C
- 23 p4083 A66-41891
- PROTEIN**
- SA CHLOROPHYLL
- SA ENZYME
- SA GLOBULIN
- SA HEMOGLOBIN
- SA PEPTIDE
- SA SERUM
- Interaction of messenger RNA and ribosomes studied, using F-2 bacteriophage RNA as model messenger in cell-free Escherichia
- 02 p0182 A66-11807
Relation of earliest proteins to proteol, with tabulated comparison of key properties of acid proteinoids and protein
- 04 p0461 A66-13369
Electron micrographs from fraction I protein of Chinese cabbage leaves, noting substructure in individual particle
- 06 p0811 A66-16119
Amino acid genetic code in which long sequences in DNA spell out instructions transcribed into RNA and subsequently into proteins
- 11 p1644 A66-22714
Nonpolar solutes on structure of water and hydrophobic bond in protein stability in aqueous solutions
- 11 p1649 A66-22988
Physical state of water in living cell and model systems such as collagen and wool
- 11 p1645 A66-22989
Protein synthesis in liver of adrenalectomized and hypophysectomized rats exposed to centrifugation stress
- 13 p2010 A66-25899
Synthesis of constituents of nucleic acid and protein molecule for artificial production of life
- 14 p2227 A66-26866
Gas chromatography for resolution and separation of racemic amino acids as TFA-sec-butanol ester derivatives applied to protein analysis
- 15 p2446 A66-28866
Ultrasonic wave splitting of individual fragments and isolated polypeptide chains of human gamma globulin molecule
- 16 p2639 A66-30793
Microsphere used as cell model, when produced by solution and condensation of proteinoid, for understanding of cellular life origin
- 17 p2852 A66-32098
Properties of microspheres from thermal proteinoid, showing emergence of complex materials and microstructures, reminiscent of cells, from simple processes
- 17 p2853 A66-32099
Protein specificity and nervous functions
- 17 p2860 A66-32859
Simulation of organismic morphology and behavior by synthetic poly-alpha-amino acids
- 19 p3284 A66-35573
Amino-acid-sequence determination in peptides using N-fatty acids, mass spectra of peptide derivatives and computer techniques
- 20 p3510 A66-37057
Origin of constituents of nucleic acid and protein molecules, noting biological molecules synthesis under conditions similar to those prevailing in prebiotic Earth, following Oparin-Haldane hypothesis
- 20 p3507 A66-38029

PROTEIN METABOLISM

Text on evolution, interpreting functions of body organs in terms of chemical processes and tracing development of complex organic molecules

Corticosterone injection in rats, assaying amino acid incorporation into liver microsomal and cell-sap protein

PROTEINOID

Future of environmental biology, discussing space research on living organisms in extraterrestrial environment

Accelerated sodium pyruvate decomposition in aqueous solution due to proteinoids produced by thermal condensation

PROTOBIOLOGY

Substrate specificity of proteolytic enzyme thermolysin /Thermolase/ isolated from bacterial cultures

PROTON

SA RECOIL PROTON

SA SOLAR PROTON

Low energy proton effect on thermal control coatings

[AIAA PAPER 65-648]

Proton and alpha particle effects on thermal properties of spacecraft and solar concentrator coatings of anodic-coated aluminum, zinc oxide/ potassium silicate, etc

[AIAA PAPER 65-649]

Difference magnetic analyzer of low-energy electrons and protons in which particles are separated before arriving at

detector

Time and altitude dependence of 55-mev trapped protons in South Atlantic region detected by nuclear emulsions onboard satellites

IR spectroscopy to determine constant of self-combination of donor acceptors of protons in dilute solution

Proton concentration of hydrogen plasma in alpha apparatus by probe with fast-atom beams

Pitch-angle distribution and differential energy spectrum of polar aurora protons penetrating Earth

atmosphere

Difference magnetic analyzer of low-energy electrons and protons in which particles are separated before arriving at

detector

Mariner IV observation of 500-kev protons in interplanetary space

Effect of 49-, 64-and 100-term expansion of geomagnetic field on reduction of omnidirectional proton counting rate data

Solar modulation of galactic protons and helium nuclei from 1963 to 1965

Balloon-borne Cerenkov scintillation counter for measurements of primary proton and helium spectra and modulations

Shower production by pions and protons with momenta 0.1 and 20 gev/c in thin layers of matter, determining secondary particle energies and multiplicities

Proton concentration of hydrogen plasma in alpha apparatus by probe with fast-atom beams

Excitation of ground state hydrogen atoms by fast protons, evaluating total Born cross section in limit of infinitely massive protons

Corpuscular radiation from UV Ceti stars assumed to be mainly protons, noting role of interstellar matter

Proton environment above 4 mev in model constructed by using exponential energy spectrum

Chirp-radar pulse compression by proton-spin echoes, noting leakage and attenuation

Nuclear magnetic resonance techniques applied to nitrogen tetroxide for determining proton content, noting gas chromatograph with two stainless steel columns packed with porous glass

Large air Cerenkov counter construction and performance characteristics for use in

distinguishing protons and pions in cosmic radiation in 10-45 gev energy region

PROTON I SATELLITE

Soviet space station Proton I placed in orbit July 16, 1965 for solar and cosmic radiation studies

Proton I scientific space station for investigation of ultrahigh energy cosmic ray problems

Proton I and II space stations to study cosmic ray particles of high and ultrahigh energies

Primary cosmic ray energy spectrum measurements via Proton I satellite, noting inelastic interaction cross sections, chemical composition, etc

PROTON BEAM

Classification of possible gyroresonance interactions between plasma and proton beam for strictly longitudinal propagation and comparison with TWT terminology

Instability of cold plasma interacting with helical proton beam in magnetic field

Proton flux measured by satellite at high latitude compared to ionospheric absorption measured with riometers, noting absorption variation with latitude across polar caps

Energy spectra of electrons and protons in islands at back of magnetosphere compared with electron fluxes observed by satellites, noting similarity between particles in islands and those in aurora

High energy particle interaction research, noting that within eight years accelerators will be capable of beams of 28 plus 28 bev protons

Charge exchange of protons in alkali metal vapors with formation of highly excited hydrogen atoms, noting cross section, reaction mechanism, etc

PROTON BELT

SA RADIATION BELT

Four-channel silicon detector and scintillation counter for measuring proton spectrum of Earth radiation belts

Relay I satellite mapping of energy spectrum and spatial distribution of protons in inner radiation belt

Ring current growth tendency prior to sudden magnetospheric compression

Upper bounds on steady state and pulse outflow of neutrons from Sun determined by assuming neutron-decay protons diffuse in interplanetary magnetic field

Violation of second and third adiabatic invariants, examining mirror point change of trapped particles under displacement of guiding centers along force-lines and particle diffusion

Low-energy protons and electrons of outer radiation belt measured by equipment onboard Cosmos XLI

Latitude and longitude variation of count rate and intensity-time dependence of proton flux in inner radiation belt measured by Anton 302 G-M counter in Ariel I satellite

Temporal stability of inner zone protons determined by Injun I satellite measurements in vicinity of South Atlantic magnetic anomaly

Intensity and spectra of 100 to 1700 kev protons in region above two earth radii measured by charged particle detectors on Explorer XII, XIV and XV

Injection of protons into inner radiation belt caused by decay of fast cosmic ray albedo neutrons and superimposition of low-energy protons of unknown origin

Acceleration processes of outer zone protons investigated, using Kellogg hypothesis of radiation belt formation through magnetic disturbances where third adiabatic invariant is violated

Initial energy spectrum and flux of low energy protons responsible for luminescence of hydrogen in auroras

Equatorial measurement of intensity of

protons with energies greater than 400 kev and electrons with energies greater than 1 mev in outer radiation belt center

PROTON DAMAGE

Proton and electron damage to silicon semiconductor device

Low energy proton damage to partially shielded solar cells, noting invalidity of simple area scaling law in predicting decrease in open circuit voltage

PROTON DENSITY

SA MAGNETOSPHERIC PROTON DENSITY

Rocket measurements discussing electron and proton flux, energy spectra and angular distribution in high altitudes

Spatial distribution of protons and electrons captured by terrestrial magnetic field, as measured by Cosmos satellites

Total counting rate and detected multiplicity spectrum of standard IGM neutron monitor analyzed on basis of neutron production and cosmic radiation components

Electronic whistlers for calculation of proton density at satellite heights, based on symmetry existing in expressions containing two time and frequency variables

Statistical equilibrium of fundamental particles at elevated temperatures, determining degeneration parameters

Possible enhancement to low-energy atmospheric proton flux induced by passage of Ikeya-Seki comet examined, using balloon-borne scintillation counter and pulse height analysis techniques

Fluxes, intensities and energy distributions of magnetically trapped electrons and fluxes of magnetically trapped protons at lower edge of radiation belt

PROTON ENERGY

Physical description, module fabrication, sensor construction and calibration details of plasma probe carried on Mariner IV

Satellite observation of solar protons from flares in September 1963, measuring impact zone effect, differential spectrum, latitude distribution of proton energies, proton fluxes, cosmic noise absorption, etc

Rocket measurement of energetic particles discussing proton flux, energy spectra, pitch angular distribution and data

High energy protons in synchrocyclotron testing of polyethylene, aluminum, lead and titanium hydride materials

High energy proton from local radio sources, using telescopic system for Cerenkov effect detection of broad atmospheric showers

Explorer satellite XII, XIV and XV measurements, noting directional intensity energy flux, spatial distribution and spectra of low energy trapped protons and electrons

Cosmos XLI satellite measurements of low energy proton distribution and intensity

Proton injection into radiation belts for large B-L space regions by cosmic ray and solar proton albedo neutron decay injection

Flyable space radiation detector based on spark chamber technology for measuring unidirectional proton spectra in six energy intervals

Mathematical construction of extensive air shower based on hypotheses for nuclear phenomena, noting proton-proton interaction, pion generation, etc

Electron and proton differential velocity spectra observed for low-energy relativistic cosmic rays, noting spectral neutrality of radiation

Proton transfer between hydrogen and methane, ethane, propane and butanes, using high-pressure mass spectrometry, employing

a source with beta rays as ionizing medium 13 p2018 A66-26443
 correlation of time variations of proton and electron intensity of outer radiation belt and dependence on geomagnetic environment 15 p2575 A66-29103
 energy distribution of secondary particles emitted in proton stars for tev energy range proton interactions 15 p2583 A66-29542
 Collision cross sections of high energy nucleon-nucleon interactions in nuclear emulsion 15 p2583 A66-29545
 L flux plots and differential energy distributions for low energy protons in nine energy intervals from 0.17 to 3.4 mev measured with satellite-mounted proton spectrometer 16 p2794 A66-30702
 proton energy spectrum of flux penetrating packs of passive radiation sensors on Gemini IV and V missions 17 p2865 A66-32185
 Proton trajectories in static dipole magnetic field, noting effects in radiation belt proton pitch angle oscillation at cyclotron frequency, etc 17 p2993 A66-32519
 Proton energy density, pressure and compressibility of galactic cosmic ray flux 18 p3165 A66-34140
 X-ray data on solar flares emitting energetic protons in sunspot groups with delta configuration, noting occurrence where magnetic fields have steep gradients 20 p3630 A66-37330
 Energy spectrum of inner zone protons with conclusions drawn about source and loss mechanisms for protons in inner radiation zone 20 p3638 A66-38309
 Distribution of energetic protons in Earth radiation belt between 1962 and 1964, noting secular temporal changes, effects of magnetic storm and aspects of energy spectrum 20 p3638 A66-38312
 Diffusion of protons in outer radiation belt due to violation of third adiabatic invariant for trapped particles 20 p3640 A66-38323
 Height distributions for atmospheric ionization rate and Balmer radiation resulting from precipitation of auroral protons 21 p3734 A66-39338
 Auroral zone proton-electron anticorrelations, proton angular distributions and electric fields 24 p4199 A66-42585
PROTON IMPACT
 Parameters of dynamic modulation determined from measurements of proton and alpha particle spectra, used in cosmic-ray modulation in interplanetary space 11 p1762 A66-22411
 Born approximation of cross sections for electron and proton impact ionization of Na and Mg 11 p1737 A66-22496
 Red and blue flashes in silicate luminescence excited by low-energy proton and lunar reddening by solar-ion excitation 16 p2802 A66-30930
PROTON IRRADIATION
 Doubly differential cross sections of electrons ejected from helium bombarded by protons 04 p0547 A66-13709
 Growth of absorption bands of natural and synthetic calcium fluoride crystals irradiated with protons from cyclotron at Tomsk institute 05 p0741 A66-15857
 High energy photons from discrete sources of cosmic radiation, verifying radio source electron production through proton-nuclei-matter interaction 06 p0947 A66-16572
 Proton irradiation effect on silicon noting rings 06 p0933 A66-17120
 Neutron and proton bombardment effects in exciton spectrum of cuprous oxide 06 p0937 A66-17139
 600-mev proton irradiation effects on density and mobility of majority carriers in n-type germanium 08 p1267 A66-18647
 Biological effect on mice of bombardment by protons of 120 mev 11 p1645 A66-23055
 Flux and energy spectrum of low energy cosmic ray protons, noting rocket measurement results and analogy to solar flare spectrum 11 p1764 A66-23059
 Radionuclide production in iron targets bombarded with 400-mev protons investigated by Monte Carlo method for cosmic ray effects on meteorites 11 p1775 A66-23145
 Injurious effect of gamma radiation and 60 and 120 mev protons on white mice and

protective action of certain pharmacoechemicals 15 p2438 A66-29480
 Effect of shielding individual parts of rats on variations in reaction to radiation during exposure to gamma rays and high energy protons 15 p2438 A66-29481
 Pathomorphological changes in hemopoietic organs of mice after irradiation with high energy protons 15 p2438 A66-29482
 Proton bombardment for generation of polar glow aurora 16 p2693 A66-30338
 Gallium arsenide and silicon solar cells under proton irradiation, noting decrease of short circuit current and open circuit voltage 16 p2636 A66-31018
 Proton radiation induced changes in length of silicon slices 16 p2779 A66-31093
 Monte Carlo calculation of nightglow excitation and maintenance of nighttime ionosphere by low energy protons 18 p3169 A66-34518
 Explorer XVIII satellite measurements of proton energy spectra in region corotating with Sun, noting modulation of galactic cosmic radiation and source of continuous particle accelerations 18 p3177 A66-34754
 Luminescence spectra of meteorites of different classes using proton excitation, giving estimates of radiation conversion efficiency 24 p4273 A66-42363
PROTON MAGNETIC RESONANCE
 Electron spin resonance transitions involving simultaneous changes in spin states of two neighboring protons 03 p0395 A66-12343
 Proton magnetic resonance studies of linewidth, second moment and spin-lattice relaxation time of solid triethylenediamine /TEDA/ 08 p1177 A66-18934
 Cis-and trans-beta-bromostyrene reaction with lithium diphenylphosphide in tetrahydrofuran producing cis-and trans-beta-styryldiphenylphosphine, discussing proton magnetic resonance and configuration retention 14 p2232 A66-27498
PROTON PRECESSION
 Transistorized proton magnetometer for observatory and field measurements, analyzing use of free-proton precession to excite electromagnetic signal 01 p0072 A66-11073
PROTON-PROTON REACTION
 Secondary protons from interstellar cosmic-ray collisions, noting solar modulation effects on detection 05 p0747 A66-14796
 Mathematical construction of extensive air shower based on hypotheses for nuclear phenomena, noting proton-proton interaction, pion generation, etc 13 p2174 A66-25454
 Production spectrum of high energy electrons from high energy cosmic ray pion decay and proton-proton collisions 13 p2176 A66-26762
 High energy measurement of neutron-proton elastic scattering, noting diffraction peak existence, differential cross section and secondary forward peak 18 p3166 A66-34163
PROTON SCATTERING
 Low energy spectrum of cosmic rays corrected for solar modulation and diffusive passage through interstellar matter 04 p0574 A66-14014
 Identification of charged fast particles in nuclear emulsions, measuring multiple scattering of protons and mesons along track with various kinetic energies 07 p1114 A66-17543
 Primary proton-air nuclei interactions leading to EAS containing very few muons, noting energy transfer fluctuation and isobar production 15 p2581 A66-29538
 Proton data from rocket flight into break-up phase of IBC-I aurora, noting proton movement in atmosphere 16 p2794 A66-30701
 Polarization difference in elastic scattering of proton from Ar 40 and Ca 40 due to spin-orbit force difference 18 p3140 A66-35037
 Absorption path of high-energy protons in atmosphere measured by ionization calorimeter 18 p3216 A66-35164
PROTON TELESCOPE
 Cosmic ray telescope /CRT/ carried on Mariner IV Mars probe to measure flux and energy of protons and alpha particles in interplanetary space and near Mars 01 p0072 A66-11112

High energy proton from local radio sources, using telescopic system for Cerenkov effect detection of broad atmospheric showers 05 p0753 A66-15389
 Electron and proton spectrometer detector mounted on OGO-E, measurements cover seven differential energy channels 12 p1877 A66-23690
 Primary proton and helium nuclei flux and East-West and North-South asymmetries measured near geomagnetic equator 18 p3193 A66-34854
PSEUDORANDOM SIGNAL
 Reduction of high residual time sidelobes for phase-coded pulse compression radar systems and technique for increasing ratio of peak to residual amplitudes 06 p0833 A66-16666
 Statistics of product of Gaussian noise process and pseudorandom binary code 09 p1342 A66-19919
 Pseudorandom binary sequential digital simulation of feedback control systems subjected to random input signals 13 p2030 A66-25211
 PCM picture transmission, pseudorandom scanning, noise, bandwidth compression and digital simulation 15 p2450 A66-28785
 Asymmetrical property of binary pseudorandom noise generators, noting Gaussian probability density function in output of low pass filter 17 p2894 A66-33110
 Laser radar ranging system using pseudorandom code modulation, considering application to pulse and digital circuitry, statistical communication theory and electro-optical engineering 18 p3117 A66-33557
 Pseudorandom scanning of uniformly dense rectangular frame 18 p3078 A66-34080
 Multiple access to ideal bandpass limiter channel in pseudonoise system analysis 23 p4040 A66-41593
PSYCHIATRY
 Frequency of neurotic depressive reactions and other neuroses in Air France personnel, stressing importance of neuropsychiatric examinations before employment 09 p1335 A66-20535
 Psychiatric evaluation of candidates for space mission, developing rank order of candidates and stressing empathic approach of psychiatrist 17 p2862 A66-31982
PSYCHOACOUSTICS
S AUDITORY SIGNAL
PSYCHOLOGICAL EFFECT
 Psychological stress susceptibility of naval and marine pilot trainees, examining environmental cue manipulation to control perceptions 03 p0327 A66-12355
 Self-reported stress-related symptoms among air traffic control specialists /ATCS/ and non-ATCS personnel 03 p0324 A66-12358
 Physiological and psychological effects on man during U.S. suborbital and orbital flights from Project Mercury 11 p1642 A66-22483
 Psychological and medical aspects of human confinement, isolation and sensory deprivation 11 p1642 A66-22485
 Emotional problems of astronauts during space flight 11 p1642 A66-22488
 Vigilance in six-hour monitoring as affected by knowledge of results and differential monetary reward 11 p1646 A66-23377
 Psychological reactions to jet aircraft noise, including behavioral reactions and auditory fatigue 12 p1806 A66-24234
 Psychological and sociological stressors on Mars mission vehicle crews such as sensory deprivation, isolation, confinement and limited social interaction 13 p2013 A66-25280
 Physiological, psychological and biochemical effects on humans after 8-hr inhalation of low carbon monoxide concentration 15 p2435 A66-29448
 Space technology jargon, noting language used, origin and formation of words, acronyms, etc 16 p2831 A66-31151
 Human physiological and psychological characteristics effects on design of mobile lunar laboratory 17 p2904 A66-32944
PSYCHOLOGICAL FACTOR
 Human perceptual mechanism defined by psychological research and applied to aircraft cockpit display design 03 p0329 A66-12883

- Man-machine relationship during space flight 04 p0471 A66-14085
 Psychophysiological factors which influence performance of photointerpreter 15 p2504 A66-30008
 Personality development, application of theory to problems of aerospace selection 19 p3294 A66-36378
 Vertical sinusoidal vibration as psychological stress in considering capacity for handling information 22 p3854 A66-40007
 Biological effect of atmospheric conditions and physical and psychological factors on living organisms 24 p4165 A66-43134

PSYCHOLOGICAL TESTING

- Pilot-trainee selection procedures for school-leaving population, using interviews and testings 01 p0019 A66-10606
 Carbon dioxide induced mild hypoxia, correction of alterations on performance of psychologic and psychomotor systems 07 p0998 A66-17661
 Food reinforcement of pigeons, comparing two types of extinction following fixed ratio training, noting response rate variation 09 p1336 A66-20876
 Psychological tests used in selection of aircrew personnel for French Air Force 10 p1492 A66-21754
 Clinical observations and tests of solitary confinement on neurotic pilots 11 p1642 A66-22486
 Military flying and experimental psychology, discussing screening and training of pilots, methods employed and prediction of failure based on psychosociological model 12 p1808 A66-23805
 Inter- and intramodal comparisons of light and tone durations in two-alternative forced-choice situation, noting possible judgment errors 13 p2015 A66-25789
 Psychological testing of military pilots, discussing apprehensiveness under adverse conditions such as bad weather or fatigue 14 p2229 A66-27493
 Experimental psychological testing and role in choice and training of cosmonauts 15 p2434 A66-29442
 Anticipatory psychological stress determiners include perceived probability of occurrence, proximity and unpleasantness associated with occurrence of threatening event 16 p2640 A66-31130
 Pulse stimulated eye response cancellation due to information contained in subsequent pulse with longer duration 20 p3504 A66-36944
 Facilitating effect of repetition on recall of word from list of unconnected words 23 p4025 A66-41044
 Psychological effects of velocity and hermetic compartments on astronaut performance 24 p4166 A66-43146
 Engineering psychology of man-machine interface and relation to spacecraft piloting and systems control 24 p4169 A66-43147

PSYCHOLOGY / GEN / SA FACTOR ANALYSIS

- Origin, setting and evolution of human factors engineering and man-made environment 11 p1648 A66-23100
 Physicochemical processes in memory, learning, consciousness and other mental processes in man 15 p2431 A66-28671

PSYCHOMOTOR PERFORMANCE

SA REACTION TIME

- Practice techniques for maintaining astronaut psychomotor skills during extended missions, with star sighting and flight control test results 05 p0626 A66-14635
 Carbon dioxide induced mild hypoxia, correction of alterations on performance of psychologic and psychomotor systems 07 p0998 A66-17661
 Helicopter pilot proficiency based on performance of separate maneuvers in primary and basic training phases 12 p1809 A66-23929
 Human behavioral effects during 56-day exposure to oxygen-helium atmosphere at 258 mm Hg total pressure, presenting temperature, psychomotor and sleep performances 18 p3061 A66-33780
 Psychomotor test equipment, describing Two-hand Device, Reaction Sensing Device and Rudder Control Test 23 p4029 A66-41042
 Effects of meprobamate and hypoxia on psychomotor performance during

- bidimensional tracking, coded problem solving and response to auditory signals 24 p4164 A66-42456

PSYCHOPHYSICS

- Psychophysical method measuring effects of several variables on loudness fluctuation of binaural beats when amplitude modulated 05 p0628 A66-15733
 Information feedback and psychophysical variables in two-alternative temporal forced-choice auditory-signal-detection task 18 p3063 A66-35023
 Response characteristics of lateral geniculate cells of macaque monkey, discussing hue, saturation and brightness encoding in primate color visual system 20 p3504 A66-36946

PSYCHOPHYSIOLOGY

SA NEUROPHYSIOLOGY

- Biointstrumentation and monitoring device which relates complex environmental variables to development of psychophysiological stress evaluation for controlling environment of space capsules 06 p0878 A66-15963
 Psychophysiological effects of low friction on man, particularly rotation on visual reaction time, heart rate and spatial orientation 06 p0868 A66-16240
 Sleep restriction effects, discussing electroencephalographic measurement results 06 p0812 A66-16733
 Psychophysical orientation mechanisms of man under weightlessness simulation, gravity conditions encountered on Earth, in orbital flight and during free floating in space 06 p0814 A66-17177
 Age, cardiac output and choice reaction time of airline, military and test pilots, attempting resolution of data discrepancy 12 p1806 A66-24397
 Psychophysiological study of compensatory tracking on digital altimeter display and on combined digital and scale-and-pointer display 17 p2869 A66-33448
 Physical and psychological aspects of man in space, examining oxygen supply, temperature extremes, meteorites, radiation and effects of confinement, isolation and sensory impoverishment 19 p3287 A66-36645
 Psychophysiological fusion linking afterimages of separate visual stimuli causing artifacts in visual astronomical observations 20 p3507 A66-38053

PTM

S PULSE TIME MODULATION /PTM/ PULMONARY CIRCULATION

- Alveolar nitrogen concentration and environmental pressure influence upon rate of gas absorption from nonventilated lung in dog 03 p0324 A66-12357
 Measurement error for pulmonary ventilation during sinusoidal vibration and correcting device consisting of time delay and summing circuit 09 p1335 A66-20527
 Respiration and anoxia, noting anoxic anoxia, reduced oxygen carrying capacity of blood and inadequate flow of oxygenated blood to tissues 10 p1488 A66-22112
 Pulmonary blood flow distribution under forward accelerations studied by combined use of human centrifuge and radio-isotope scanning 17 p2856 A66-32153
 Blood saturation decrease due to regional pulmonary arterial venous shunting during exposure to transverse acceleration 17 p2858 A66-32195

PULMONARY FUNCTION

- Experiments with anesthetized dogs subjected to g accelerations, observing behavior of arterial oxygen saturation and pulmonary ventilation during short periods 08 p1175 A66-19083
 Vasovagal syncope induced by application of negative pressure to lower half of human body, noting effect on lung CO diffusing capacity 11 p1643 A66-22580
 Respiratory effects of 56-day human exposure to oxygen-helium atmosphere 18 p3058 A66-33774

PULMONARY LESION

- Proliferative pulmonary lesions in monkeys under high oxygen concentration for various periods 17 p2858 A66-32181

PULSATING FLOW

- Convective heat exchanger using air and subjected to resonant pulsating flow [ASME PAPER 65-HT-30] 04 p0595 A66-13392

- Noise generation mechanisms, discussing pressure-time histories, frequency spectra, sound pressure levels, directionality, etc 09 p1402 A66-20240
 Plasma pulses free-streaming from source plate into vacuum along magnetic field 10 p1567 A66-21821
 Velocity overshoot within boundary layer in alternating laminar air flow near mouth of square channel 10 p1524 A66-21827
 Oscillation spectra of plasma in quasi-steady state characterized by self-consistent distribution of plasma particles and turbulent pulsation 16 p2755 A66-30090
 Nozzle precombustion chamber base pressure for sudden pulsating sonic flow propagation 17 p2909 A66-32582
 Pulsating plasma column acceleration in high current pulsed accelerator 17 p2972 A66-32870
 Critical Reynolds number for pulsating Poiseuille flow determined by studying stability under harmonically and nonharmonically varying pressure gradient [ASME PAPER 66-FE-5] 17 p2914 A66-33260
 Location of instability strip and dependence on mass, luminosity and composition of RR Lyrae stars 20 p3652 A66-37612
 Pulsation properties of stellar models representing RR Lyrae stars obtained, using adiabatic and nonadiabatic linearized pulsation equations 20 p3652 A66-37613
 Erosion destruction mechanism in polycrystalline graphite, noting effect of gas flow over surfaces, flow pulsation frequency and generated aerodynamic loads 21 p3754 A66-38957
 Heat transfer in entrance section in rectangular duct for incompressible fluid in laminar pulsating flow with periodic pressure gradient 23 p4148 A66-41216
 Flame propagation velocity parameters in turbulent flow as function of flow pulsation velocity, normal burning velocity and relative heating 23 p4149 A66-41792
 Critical Reynolds number for pulsating Poiseuille flow determined by studying stability under harmonically and nonharmonically varying pressure gradient [ASME PAPER 66-FE-5] 24 p4195 A66-42578
 Stroboscopic instantaneous velocity measurements near wall in turbulent flow of water in channel and analysis of viscous layer turbulent pulsations 24 p4196 A66-42880
- PULSE**
SA ELECTRIC PULSE
SA GEOMAGNETIC PULSATION
 Relationship between metallurgy of weld and characteristics of electrical pulse producing it 05 p0686 A66-14520
 Maximization of output voltage of linear time-invariant system noting effect of input admittance, assuming input pulse is equal to zero 06 p0860 A66-16190
 Optimal pulse shape determined for signal which gives maximum response energy in ideal limiter filter system 07 p1001 A66-17354
 Short-pulse shaping of high repetition rate with transistorized blocking oscillator 07 p1001 A66-17355
 Calculation of reactive quadrupole circuits for shape square pulses with finite fronts and supply voltage use factor of unity 08 p1191 A66-18920
 Logarithmic pulse storage device, basic characteristics and choice of parameters as function of pulse length and measurable frequency range 09 p1356 A66-20773
 Signal transmission factor and noise storage coefficient of two-stage pulsed-signal storage system 09 p1347 A66-20774
 Feedback to quadrupole that incorporates device for converting voltage into time parameter of periodic sequence of pulses and vice versa 11 p1671 A66-23334
 Pulse shape formed during discharge of chain-type artificial line 14 p2251 A66-27171
 Frequency dividers for sequence of pulses, using relaxation generators with rectangular timing voltage 17 p2887 A66-32704
 Transistor-tunnel diode RC emitter circuit for binary numeration 17 p2888 A66-32841
 Signal transmission factor and noise storage coefficient of two-stage pulsed-signal storage system 22 p3873 A66-39833

- Feedback to quadrupole that incorporates device for converting voltage into time parameter of periodic sequence of pulses and vice versa 22 p3877 A66-40414
- PULSE AMPLITUDE**
- Successive approximations for variational problems in control theory including pulse amplitude and pulse width modulation, using quasi-linearization 03 p0349 A66-12685
- Decimal scaler including pulse shaper accepting sharp pulses and any form signals 03 p0344 A66-13096
- Automatic pulse shaper circuits at pulse length independent of input signal amplitude 04 p0495 A66-13886
- Semiconductor diode pulse parameters measured in various operating conditions, showing changes in leading edge steepness and switching amplitude of 04 p0495 A66-13887
- Two sufficient conditions for monotonic variation of signal to noise ratio of optimal filter during storage of video pulse 04 p0484 A66-14058
- Tunnel diode in superregenerative amplifier, using phase-plane method to investigate volt-ampere characteristics of diode and effect on 04 p0501 A66-14410
- Linear voltage-to-frequency converter provides constant-amplitude output with varying frequencies and constant-frequency output with varying 05 p0649 A66-15263
- Effect produced on pulse by manipulating transform zeros 06 p0861 A66-16191
- Amplitude modulated carrier frequency signal circuit analyzed, showing open loop near pulse system 07 p0104 A66-17439
- Generator for high-voltage pulses with pulses shaped by two-section length of line with transformation by pulse transformer employing coaxial cable 08 p1194 A66-19282
- Correcting network with nonlinear inductance for high voltage pulse generator noting operation, design and fabrication 08 p1194 A66-19283
- Pulse amplifier with tunnel diode, achieving maximum gain for parallel-connected load and diode 08 p1194 A66-19284
- Pulse heights produced when argon, nitrogen and argon-nitrogen mixtures completely stop alpha particles 09 p1405 A66-20680
- Atomic scattering contribution to pulse height defect and energy dispersion of heavy ions in semiconductor detectors 10 p1558 A66-21864
- Nonlinear amplification of light pulse passing through laser operating at saturation regime 10 p1543 A66-21963
- Transistorized device permitting direct conversion of amplitude or duration of input pulse into sequence of 11 p1676 A66-22741
- Three parameter pulse height analyzer and coincidence system for satellite-borne scintillation telescope study of cosmic radiation 12 p1878 A66-23691
- High resolution pulse height analyzer for satellite and balloon-borne telescope 12 p1878 A66-23692
- Low-power multichannel pulse height analyzer for solar neutron detection aboard balloon or rocket 12 p1878 A66-23693
- Pulse-height radio-pulse tunnel diode triggers with internal radio-pulse rectification and amplitude recording of information 12 p1830 A66-23734
- Transient response determined from phase difference of input-trigger oscillations of two self-excited oscillators with common nonlinear load 12 p1830 A66-23738
- Dynamic frequency response, noting measurement of phase and amplitude responses of active and passive devices under RF pulse conditions with very fast FM 12 p1879 A66-23814
- Statistical characteristics of output of nonlinear sampled data control system evaluated by two methods 12 p1855 A66-24639
- Amplitude distribution density measurements of stochastic processes with intensity spectra ranging from 30 cps to 20 kc, using multichannel pulse-height analyzers 12 p1856 A66-24940
- Pulse forming networks whose step responses have ripples of equal height 13 p2029 A66-25205
- Transistorized logarithmic amplitude converter for recording pulses of radiation detector, automatic switching of conversion scale permits amplitude measurements 13 p2077 A66-25321
- Ruby laser experiment yielding giant pulses by separating mirrors from crystals 13 p2092 A66-25684
- Resistance strain gauge measuring propagating dynamic strains, noting independence of waveform, effect of gauge length, time and amplitude errors, etc 13 p2198 A66-26225
- Response of thin cylindrical monopole antenna to DC pulse excitation computed, using Fourier transforms, noting correlation between empirical and theoretical values 14 p2255 A66-27906
- Automatic pulse shaper circuits at pulse length independent of input signal amplitude 15 p2466 A66-29698
- Semiconductor diode pulse parameters measured in various operating conditions, showing changes in leading edge steepness and switching amplitude of circuits 15 p2466 A66-29699
- International specification for shock pulse shapes and magnitudes, noting duration, tolerance, etc 16 p2712 A66-30475
- Laser induced spontaneous electron emission from rear side of metal foils, noting electron energy vs laser energy pulse magnitude, etc 16 p2784 A66-31536
- Two sufficient conditions for monotonic variation of signal to noise ratio of optimal filter during storage of video pulse 17 p2873 A66-32224
- Cosmic ray intensity measured underground by scintillation counter, noting pulse height conversion into digital form 18 p3222 A66-35206
- Device having symmetrical voltage-current characteristics acting as rectifier of pulse or even harmonic distorted waveforms, using Zener diodes 19 p3315 A66-35561
- Giant pulse formation theory, measuring shape and duration of neodymium glass laser pulses for various values of inverse population 20 p3577 A66-37367
- Synchronization of triggering pulses with given phase of HF sinusoidal voltage used in particle accelerators, oscilloscopes, etc 20 p3528 A66-37518
- High-voltage generators of nanosecond pulses, noting delay stability between triggering and output pulses, using thyristors as commutators 20 p3529 A66-37519
- Possible enhancement to low-energy atmospheric proton flux induced by passage of Ikeya-Seki comet examined, using balloon-borne scintillation counter and pulse height analysis 20 p3631 A66-37617
- Cosmic ray intensity recorded with scintillation counter corrected without stabilizing efficiency of counter by recording changes, using pulse height spectrum 20 p3562 A66-38433
- Transistorized pulse height selector with logically separated threshold outputs and trigger circuit with emitter coupling 21 p3713 A66-39324
- Nonlinear amplification of light pulse passing through laser operating at saturation regime 21 p3749 A66-39542
- Pulse-height radio-pulse tunnel diode triggers with internal radio-pulse rectification and amplitude recording of information 22 p3875 A66-40077
- Transient response determined from phase difference of input-trigger oscillations of two self-excited oscillators with common nonlinear load 22 p3876 A66-40081
- Inverse transfer function of pulse-forming network for binary code transmission with small intersymbol interference in time domain and narrow bandwidth in frequency domain 22 p3866 A66-40182
- Pulse amplitude measurement from scintillation cosmic-ray counter 22 p3920 A66-40771
- Photon time-of-arrival distribution measured in highly monochromatic and spatially coherent light beam from low pressure Hg discharge lamp 23 p4076 A66-41285
- Transistorized device permitting direct conversion of amplitude or duration of input pulse into sequence of pulses 23 p4049 A66-41479
- Pictorial representation of pulse-height energy spectra with two independent variables originating from experimental analyzer 24 p4172 A66-42490
- PULSE AMPLITUDE MODULATION /PAM/**
- Approximate methods for plotting logarithmic frequency responses of discrete systems with and without time lag, noting PAM systems 07 p1012 A66-17382
- Second order approximation and perturbation theory applied to determine effect of instantaneous pulse on oscillation amplitude 13 p2127 A66-25451
- Transfer function of pulse amplitude modulated sampled data control systems with element generating arbitrarily shaped pulses and first order element series connected with constant parameter elements 14 p2266 A66-27527
- FM/FM and PAM/PM integrated telemetry systems with MDI for missile evaluation system 16 p2651 A66-30562
- Transient and steady state responses of linear systems under oscillation and PAM 19 p3303 A66-35834
- Pulse amplitude/code modulation /PACM/ system design noting word format, synchronization methods, carrier, etc 21 p3706 A66-39481
- Absolute stability of specific class of nonlinear pulsed automatic systems, noting error signal and amplitude modulation 24 p4189 A66-42948
- PULSE CODE MODULATION /PCM/**
- Pulse code modulation /PCM/ for telemetry and communication between Gemini spacecraft Agena D satellite and ground stations for data processing and display 01 p0081 A66-10938
- Automatic star trackers for long range aircraft navigation, discussing instrumentation methods and use of pulse code modulation for sensor design 02 p0257 A66-12029
- Microvariations of Earth electromagnetic field with results recorded on tape in digital pulse code form 02 p0224 A66-12124
- Bit synchronization of coded messages transmitted by telemetering 03 p0333 A66-12474
- Mariner Mars telecommunications system using PCM/PSK/PM modulation-demodulation in combination with pseudorandom sync codes 03 p0335 A66-12905
- Comparison of PCM and PFM telemetry systems in terms of transmission rate, bandwidth, error rate and power 04 p0477 A66-13584
- Microelectronic PCM multicode using integrated circuits, noting power dissipation, circuit design, packaging, etc 04 p0493 A66-13599
- Optimum message decoding in communication systems with pulse code modulation, using minimum square-error criterion 04 p0489 A66-14415
- Communication system using pulse code modulation with polarized light, deriving bit error probability 05 p0631 A66-14594
- Ground-based Minuteman pulse code modulation telemetry system, discussing routine and novel applications [ISA PREPRINT 1.12-4-65] 05 p0635 A66-15507
- Slope quantized binary pulse code modulation by coding signal slopes with unidigit 1/0 pulses, using special feedback circuit and threshold in coder comparator 07 p1002 A66-18248
- Solid state transmitters for Gemini spacecraft telemetry system, noting PCM system operation and design 08 p1181 A66-18728
- Channel sample-and-hold PCM telemeter, system modules, multiplexer gate groups, analog-to-digital converter, etc 08 p1184 A66-19518
- Optimized hybrid unidigit pulse code modulation system, noting use of secondary feedback loop and equalization of

gain/frequency characteristic of coder 08 p1186 A66-19740

Pulse code modulation coder, using delay line as coding network 08 p1186 A66-19744

Synchronism between transmitting and receiving terminal of transmission systems, particularly single channel systems, using code pulse modulation 09 p1346 A66-20546

PCM transmission system using coherent sinusoidal signals, noting orthogonality, error probability, synchronization, etc 09 p1346 A66-20547

Automated ground station, with computer controlled telemetry system, for Saturn launch vehicle checkout 09 p1347 A66-20675

Long chain of highly multiplexed broadband PCM regenerative repeaters, considering SNR after demodulation, error rate and jitter reducers /suppressors/ 12 p1818 A66-24595

Communications requirements for manned deep space missions, using optical links, with PPM, PCM/PL and coherent reception for each link [AIAA PAPER 66-317] 12 p1823 A66-24782

Random and burst channel error affects output signal-to-noise ratio of delta modulation system 13 p2019 A66-25145

Hybrid PCM-FM communication system, noting quantization error and threshold characteristics 13 p2020 A66-25218

Improved gray scale and coarse-fine PCM systems for digital television bandwidth reduction, considering spacecraft application 14 p2235 A66-27036

Binary pulses in microwave band regenerated, using pulse regenerator with hysteresis characteristic of parametric oscillator employing variable capacitor diode 14 p2248 A66-27059

Microvariations of Earth electromagnetic field with results recorded on tape in digital pulse code form 14 p2287 A66-28082

Microelectronic PCM multicoder using integrated circuits, noting power dissipation, circuit design, packaging, etc 14 p2243 A66-28349

Time correlated burst retransmission PACM telemetry system, memory requirements, data time delay and bandwidth utilization efficiency 14 p2244 A66-28431

Computer design of programmable decommutator for multiformat PCM telemetry data 14 p2246 A66-28432

PCM picture transmission, pseudorandom scanning, noise, bandwidth compression and digital simulation 15 p2450 A66-28785

Statistical characteristics derived for delta pulse-code modulation system, in which coded quantity represents difference between two sampled signal values 15 p2452 A66-29887

Time frequency coded pulse communication systems, noting pulse-position, pulse-code and delta modulation, signal coding, etc 16 p2647 A66-30520

Operational test instrument for PCM bit synchronizers/signal conditioners, discussing importance of bit decision errors 16 p2659 A66-30541

Digital computer to decode digitized or sampled PCM waveform 17 p2875 A66-32502

Approximation techniques for determination of optimum uniform or nonuniform quantizer 18 p3068 A66-33904

Joint maximum likelihood estimator for signal amplitude and noise power density in coherent PCM channel with white Gaussian noise 18 p3070 A66-34256

Computer optimization of baseband design of angle-modulated unified carrier space-ground communication link 19 p3299 A66-35664

Delta modulation pictorial encoding systems analyzed to determine parameters for image communication application 19 p3299 A66-35665

Changing of PCM telemetry from individual, integrated bipolar and/or MOS logic elements to complex MOS subsystems 19 p3317 A66-35700

Ultrahigh speed PCM telemetry systems using high-speed FET circuits 19 p3302 A66-35701

Synchronization efficiency of PCM signals coded in NRZ, RZ and split phase formats in noisy channel 19 p3302 A66-35706

Microelectronics pulse code modulation /PCM/ multiplexer-encoder for Apollo spacecraft, emphasizing packaging techniques, discussing advance circuit design techniques 19 p3317 A66-35707

PCM bandwidth halving and twin working method of superimposing two PCM channels in frequency band occupied by one PCM channel 19 p3305 A66-36625

PCM transmission system based on analog data conversion into binary signals, noting use of Shannon decoder for signal demodulation, circuit design and system properties 19 p3306 A66-36655

Multilevel pulse code modulation system for space communication that uses increased power availability due to larger boosters while meeting reduced bandwidth requirement 20 p3513 A66-37198

Periodic burst technique for real-time retransmission of data from multiple asynchronous PCM telemetry links, providing accurate determination of individual sample time 20 p3513 A66-37200

Parameter evaluation of delta modulation encoding techniques for image communication applications by computer simulation 20 p3513 A66-37201

High speed technique for automatically testing spacecraft PCM telemetry systems 20 p3514 A66-37213

PCM telemetry system for satellites based on projected requirements and subsystems currently available, noting satellite ESRO II as example of digital telemetry application 20 p3519 A66-38062

Data compression for TV transmission from space, using improved gray scale /IGS/ and coarse-fine PCM systems 20 p3561 A66-38262

Multiplexer coder unit for AC carrier transducers and DC signals used in PCM flight trials system 21 p3709 A66-38605

Timing and framing synchronization of PCM communication systems using analog techniques, analyzing transient state and jitter 21 p3705 A66-39226

Pulse amplitude/code modulation /PACM/ system design noting word format, synchronization methods, carrier, etc 21 p3706 A66-39481

Hybrid PCM telemetry system packaging for Nimbus B spacecraft 21 p3706 A66-39585

Space vehicle telemetric data transmission by FM, PCM, frequency multiplex, etc 21 p3717 A66-39633

Self-synchronizing codes derived from binary cyclic codes 21 p3720 A66-39635

Error probability in PCM/FM with phase-lock loop discriminators, noting role of input SNR 23 p4037 A66-41320

PULSE COMPRESSION

SA CODING

Pulsating combustion compared with steady combustion as means of increasing energy conversion 01 p0166 A66-11093

Radar-pulse correlation system for discriminating between close targets at long range 02 p0191 A66-11801

Compression of linear FM S-band pulses in axially magnetized yttrium-iron-garnet delay line 02 p0192 A66-11883

Ultrasonic delay lines operating below 100 megacycles, particularly dispersive lines suitable for radar pulse compression systems 03 p0331 A66-12411

Comparison of matched-filter analysis and quasi-matched filter analysis of linear FM pulse compression 04 p0486 A66-14117

Phase-correlation system for pulse compression in radar 05 p0649 A66-15262

Graphical comparison of Doppler-shift advantage for Chirp, Siebert and frequency hopping pulse-compression techniques 06 p0825 A66-15982

Reduction of high residual time sidelobes for phase-coded pulse compression radar systems and technique for increasing ratio of peak to residual amplitudes 06 p0833 A66-16666

Design methods for lump constant dispersive networks suitable for pulse compression radar, discussing effect of losses and parasitic components 06 p0866 A66-16956

Pulse compression by dispersive gratings on crystal quartz, describing ultrasonic method and wave transformation of frequency-swept radar

pulses 06 p0857 A66-16956

Small peak phase deviation measured from required characteristics in linear frequency modulated and pulse-compression radar system 11 p1652 A66-22386

Comparison of frequency shift keyed and phase shift keyed pulse compression systems via digital computer simulation 12 p1819 A66-24602

Microwave integrated circuits in radar systems, detailing airborne forward-looking radar, using phased arrays and pulse compression 12 p1840 A66-24620

Antenna array response to pulse compression signals, showing dependence of array response on compressed pulse shape 13 p2023 A66-25665

High-explosive driven shock tubes, as sources of short duration high-pressure supersonic pulses, applied in accelerating large objects 16 p2674 A66-30423

Fluid circuit theory, discussing transmission lines, matching, pulse forming and definitions of current and voltage analogies 20 p3500 A66-37643

Computer programming of pulse compression by active and passive generation, noting differences between sidelobe structures of generation 22 p3883 A66-39714

Chirp-radar pulse compression by proton-spin echoes, noting leakage and attenuation 22 p3861 A66-39721

Delay devices for pulse compression radar - IEEE Conference, London, February 1966 23 p4033 A66-41013

Dispersive device for pulse compression radar, discussing effect of signal departure from desired linear characteristics 23 p4033 A66-41014

Pulse compression using diffraction gratings and frequency sweeps of 30 mc in quartz crystal ultrasonic transducer 23 p4034 A66-41017

Pulse compression filter synthesis using ultrasonic delay lines 23 p4034 A66-41019

Pulsed compression network for linear FM signals using short circuited delay line and with sweep frequency corresponding to output response peak 23 p4034 A66-41020

Adjustable time domain equalizer for reduction of distortion caused by paired echoes in pulse compression radar system 23 p4034 A66-41021

Autocorrelation as pulse compression system, giving effective time resolution as inverse of correlation bandwidth and compression ratio of time resolution to signal duration 23 p4034 A66-41022

Statistical correlation-Fourier frequency band analysis of coherent memory filter applied to pulse compression radar systems 23 p4035 A66-41023

S-band waveguide for pulse compression applications, providing cheap means of compressing wideband swept frequency pulses 23 p4035 A66-41024

Inhomogeneously filled waveguides containing dielectric used as microwave delay line for pulse compression radar 23 p4035 A66-41025

Cascaded hybrid rings as idealized model of wideband dispersive system in stripline 23 p4035 A66-41026

Insertion loss and delay characteristics vs frequency of one-port ferrimagnetic yttrium iron garnet delay line for pulse compression at microwave frequencies 23 p4035 A66-41028

Scattering of plane elastic compressional pulse by circular cylindrical cavity in infinite homogeneous isotropic linear elastic solid 23 p4145 A66-41984

PULSE DIFFRACTION

Synchronization of microwave oscillations in n-type GaAs, noting pulse spectrum 03 p0377 A66-12444

Powerful pulse of ruby laser emission generated by ultrasonic traveling wave diffraction modulator 05 p0698 A66-15861

Screen defects of various size and shape, effect on ultrasonic pulses for approximate solution of diffraction problem of elastic waves 11 p1705 A66-22604

PULSE DURATION

Switching transients of semiconductor junction diodes with arbitrarily thick base 06 p0859 A66-17189

Switching transients of semiconductor

action diodes with arbitrarily thick
19 p3314 A66-35547

PULSE DURATION MODULATION /PDM/
output power and pulse duration of ruby
03 p0378 A66-12602

dispersive network system for pulse
duration modulation 06 p0866 A66-16957

Digital-to-analog differential conversion
using differential pulse duration
modulation 07 p1009 A66-17829

Design of parallel frequency-shift keying
system for use in multipath
channels 10 p1504 A66-21661

Laser ranging via digital counter coupled
photomultiplier tube, noting spectral
response, gain transit time dependence,
input coupling and effective cathode
parameter 12 p1830 A66-23759

Physiological telemetry, using pulse
duration approach for acceptable frequency
response 16 p2642 A66-30546

Pulse duration modulator /PDM/
conversion into integrated silicon functional
electronic block 17 p2883 A66-32119

Pulse-shaping networks with frequency-
and limitation, noting approximation of
realized networks with echo
qualizers 19 p3306 A66-36656

PULSE FREQUENCY MODULATION /PFM/
A PFM TELEMETRY
Nonreactive high-voltage pulse resistors,
applying transmission line principles and
noting Chaperon winding 03 p0341 A66-12575

Comparison of PCM and PFM telemetry
systems in terms of transmission rate,
bandwidth, error rate and
power 04 p0477 A66-13584

Stability of pulse frequency modulated
closed-loop control systems determined,
using state variables which define system
output and error 12 p1855 A66-24640

Data processing of PFM telemetry whereby
resolution of frequency measurements is
dependent upon SNR, for application to
satellite parameters 19 p3301 A66-35696

Signal detection techniques for discrete-
frequency, phase-coherent pulse frequency
modulation telemetry system, using analog
and digital circuits 19 p3302 A66-35698

Dynamical system stability examined using
direct method of Liapunov, noting
application to periodic
oscillations 21 p3718 A66-39104

LF pulse propagation, describing
measurement technique and Fourier
transform of signal 23 p4039 A66-41588

PULSE HEATING
High-pressure pulse arc created by
discharging capacitor bank through steadily
burning argon arc 06 p0919 A66-16874

Brightness dependence of pulse arc on
power per unit length of arc, estimating
charged particle density and plasma
temperature 06 p0919 A66-16875

PULSE JET ENGINE
Pulse jet engine where hot gas discharge
rather than developing thrust is used to
obtain shaft power
[ASME PAPER 65-WA/GTP-6] 05 p0745 A66-15721

Twenty kw solar powdered pulsed plasma
engine system, operating life, reliability,
payload delivery capability, etc
[AIAA PAPER 66-114] 09 p1433 A66-20088

Neutral mass density measurements in
repetitively pulsed coaxial plasma
accelerator 21 p3776 A66-38690

PULSE MODULATION
Transistorized high sensitivity pulse
modulator that produces pulses of which
either duration, frequency, spacing or
repetition rate is linear function of control
signal 01 p0043 A66-10709

Digitally coded frequency and pulse
modulation with square wave, performing
spectral analysis and measuring spectral
response 01 p0030 A66-10875

Group delay time and group velocity
measurement methods in radio technology,
noting phase-characteristic transconductance,
pulse modulation, etc 04 p0482 A66-13902

Optimum receiver as ideal two-dimensional
cross-correlator for any desired modulation
function 04 p0486 A66-14118

Distortion of electromagnetic pulse after
propagating through dispersive channel,
using approximate procedures and obtaining
transient response 05 p0631 A66-14834

Operating principles of pulse and
frequency modulation, using step-recovery
diodes as circuit
elements 05 p0651 A66-15835

Synthetic generation of phase coherent
microwave signals for transient behavior of
wideband networks and dispersive
media 06 p0847 A66-16102

Spectrum of two types of sinusoidal
modulation of rectangular pulse
train 06 p0832 A66-16442

Microwave switching and pulse modulation
by impact ionization, using DC electric field
to break down n-type
germanium 06 p0851 A66-16454

HF pulse rise in high-Q synchronous
amplifier with one circuit per stage by
approximation method 07 p1009 A66-18069

Photomultiplier voltage pulse shaping and
transmission network using germanium
tunnel diode 08 p1193 A66-19278

Delta modulation compared to other
systems of pulse modulation, technologically
and economically, noting analysis of
dynamics to which input signal is
subjected 09 p1346 A66-20564

Transistorized high sensitivity pulse
modulator that produces pulses of which
either duration, frequency, spacing or
repetition rate is linear function of control
signal 11 p1664 A66-22624

Signal to noise ratio in amplitude-, angle-,
and pulse-modulated systems with carrier
power exceeding receiver
power 12 p1820 A66-24727

Pulse frequency multistable devices whose
states differ, along with output voltage, by
generated pulse rate 13 p2045 A66-25297

Electronic circuit design handbook
covering control, detection, pulse and
oscillator circuits, configurations,
application, etc 13 p2042 A66-26056

Book on modulation as applied to
information transmission, discussing
mathematical background, linear modulation
systems, FM, PM, etc 14 p2239 A66-27718

Expansion of Inter-Range Instrumentation
Group FM/FM baseband, noting maintenance
of system performance with added
channels 16 p2649 A66-30545

Helium-neon laser modulation by positive
and negative voltage
pulses 16 p2720 A66-31559

Experimental study of emission control in
ruby laser using diffraction modulator with
modulated traveling ultrasonic
wave 17 p2938 A66-33516

Pulse front shaping with monostable
tunnel-diode generator by successive
triggering through storage
inductance 17 p2898 A66-33520

Nonlinear differentiating circuits using
varactor diode for pulse
shaping 20 p3527 A66-37446

Group delay time and group velocity
measurement methods in radio technology,
noting phase-characteristic transconductance,
pulse modulation, etc 20 p3518 A66-37860

Double-strip H-guide structure, examining
field components, characteristic equation
and attenuation coefficient for each
mode 20 p3533 A66-38145

Electron beam interaction with plasma in
magnetic field, obtaining stronger
interaction when beam has initial
modulation 21 p3782 A66-39018

Peak power of pulse modulated RF carrier
measured by sequential comparison with
reference carrier 22 p3872 A66-39726

Experimental study of emission control in
ruby laser using diffraction modulator with
modulated traveling ultrasonic
wave 24 p4219 A66-42129

AM/PM conversion factor of TWT as
function of helix voltage when beam current
is varied to keep gain
constant 24 p4180 A66-42371

PULSE MOTOR

Particle localization in spark chamber and
ion drift in Wilson cloud chamber, noting
experimental result of simultaneous
observation of identical
particles 09 p1379 A66-20233

PULSE POSITION MODULATION /PPM/
Communications requirements for manned
deep space missions, using optical links,
with PPM, PCM/PL and coherent reception
for each link

[AIAA PAPER 66-317] 12 p1823 A66-24782

Scintillating target intensity effect on
performance of PPM optical tracker used as
error sensor in various guidance
systems 13 p2125 A66-25985

PULSE RADAR

Nonreactive high-voltage pulse resistors,
applying transmission line principles and
noting Chaperon winding 03 p0341 A66-12575

Pulsed radar signal analysis based on
steady state response to carrier and actual
pulse train, taking account of pulse
shape 04 p0485 A66-14111

Increasing detectability of signal in noise
or in other interference, noting effect and
functions of radar filter, antenna scanning,
pulse to pulse IF and video
spectrum 04 p0486 A66-14124

Design methods for lump constant
dispersive networks suitable for pulse
compression radar, discussing effect of
losses and parasitic
components 06 p0866 A66-16956

Satellite ionization effects, CW-reflection
and pulse radar techniques in 10 to 20 mc
frequency range 08 p1181 A66-18749

Radar receiving equipment sensitivity
measurement by analog method and by time
selection scheme 08 p1195 A66-19350

Pulse-radar altimeter for Saturn launch
vehicle incorporating molecular and
monolithic integrated
circuits 08 p1225 A66-19521

Ionospherically reflected backscattered
radar pulse structure analyzed, using
simplified geometry 09 p1341 A66-19867

Short pulse radar return of cone-sphere
measured to determine contribution of
individual scattering elements to total
scattered field, noting creeping wave
contribution 10 p1502 A66-21636

Probabilities of detection for fluctuating
radar targets 10 p1506 A66-22051

Spurious sideband power levels for linear
FM carriers encountered in FM-CW and FM
pulsed radars 11 p1658 A66-23482

Detection and false alarm probabilities for
number of sinusoidal pulses in Gaussian
noise subjected to amplitude limiting of
arbitrary hardness 12 p1820 A66-24649

Gemini noncoherent pulse radar system
using interferometer methods for angle
information, noting failures of diode
capacitor combination and methods of
reliability improvement 13 p2035 A66-25508

Pulse radar observation of Moon and four
nearest planets, determining values of
round-trip-delay and Doppler shift for
application to orbital
ephemerides 13 p2181 A66-25535

Frequency agility theory and application
for improved radar, range and angle
detection 16 p2655 A66-31649

Gallium arsenide diode laser as pulsed IR
source for experiment and design
considerations for radar indication of cloud
height and visibility 18 p3066 A66-33616

Fractional nanosecond microwave pulse
generation and measurement techniques,
discussing pulse trains 18 p3075 A66-33617

Angle of arrival in amplitude-comparison
monopulse antenna arrangement including
thermal noise as interference and pulsed
radar with ideal radar
target 23 p4044 A66-41314

Comparison of measurement accuracy for
angular coordinates in radar systems by
linear scanning and equal-signal zone
methods 23 p4038 A66-41522

PULSE RATE
Microplasma and avalanche diode noise
pulse rate determined by carrier generation
within space charge layer of breakdown
region 02 p0197 A66-11431

Semiconductor devices used in switching
circuits at high pulse rates, emphasizing
transistor and tunnel diode
circuitry 04 p0497 A66-13962

Pulsed volt-ampere characteristics of
oxide-coated cathode at various pulse
repetition rates 06 p0838 A66-15890

Neutron and electron irradiation damage in
uniform silicon avalanche junction diode and
effect on avalanche
pulse rate 07 p1012 A66-18410

Pulse repetition rate of magnetic pulse
generators increased by transforming
generator power supply frequency, using

static frequency multipliers 09 p1352 A66-20301
 Laser producing two or three light pulses in sequence with interval between pulses mechanically controlled by optical wedge inserted into resonator 13 p2090 A66-25322
 Atmospheric radio noise in tropics, noting structural characteristics such as amplitude probability, pulse rate distribution of noise envelope, effects of thunderstorms, etc 14 p2234 A66-27034
 Pseudorate sawtooth-pulse reset controller design for satellite attitude control system 21 p3819 A66-38855
 Oscillographic studies of point discharge pulses in individual points in multiple point discharger 22 p3920 A66-40802

PULSE RATE /BIOL/
 In-flight measurement, describing human pulse wave velocity detection system principles, design and application [ISA PREPRINT 1.2-4-65] 05 p0638 A66-15509
 Flight fatigue studies, discussing parametric evaluation of crew performance on overseas flights 06 p0816 A66-16057
 German Air Force functional tests for early diagnosis of cardiovascular disease among aircrew, also discussing therapy 16 p2640 A66-31133

PULSE RECORDER
 Transistorized logarithmic amplitude converter for recording pulses of radiation detector, automatic switching of conversion scale permits amplitude measurements 13 p2077 A66-25321
 EAS front structure and normal energy transfer determined from pulse forms recorded by Cerenkov detectors 18 p3210 A66-35126
 Miniaturized no-moving-parts fluid pulse counter development for ordnance application 19 p3282 A66-36674

PULSE TIME MODULATION /PTM/
 Optimum configuration of main pulse for two cases of normalization of pulse emission time 01 p0022 A66-10222
 Coherence theory for collimation and focusing of time-averaged intensity of pulsed multimode laser radiation 02 p0242 A66-12205
 Radar imperfections and pulse time error on single-delay, double-delay and higher order moving target indication radar filters 04 p0500 A66-14125
 Dispersion of time modulation of leading edge of coincidence pulses in case of large SNR 04 p0488 A66-14404
 Complex signal coding with on-off pulses of varying width and repetition period, using equal-slope approximation of signal waveforms 08 p1186 A66-19739
 Method of demodulating frequency-modulated wave train compared to method for time-modulated wave train 09 p1344 A66-20400
 VHF ionospheric radio signal cross correlation coefficients determined, using pulse counting techniques 10 p1505 A66-21731
 Optimum configuration of main pulse for two cases of normalization of pulse emission time 17 p2872 A66-31906
 Time domain characteristics application to pulse amplifier design, noting correlation with results obtained via frequency method 20 p3538 A66-37582

PULSE TRANSMISSION SYSTEM
 Pulse transmission through cavity, observing if instability or bistable response is present, in connection with behavior of ferromagnetic thin films of permalloy 01 p0120 A66-10529
 Random-phase pulsed signal detection by contrast reception techniques against background of normal correlated noise 02 p0191 A66-11757
 Pulse transmitter for measuring heat transfer in ionized gas flow 03 p0370 A66-12830
 Binary pulse sequence conversion to pseudoternary codes for data transmission 04 p0474 A66-13423
 Statistical accuracy attainable with several types of restoring elements in pulsed transmission of random signals 04 p0482 A66-13972
 Phase shifting and elimination of spectral components effect on transmission channel for pulsed signal frequency limited from

below 04 p0488 A66-14403
 Hyperfrequency parametric amplifier circuit with modulation-demodulation applicable to very rapid pulse transmission 05 p0633 A66-15102
 Absolute stability of multiply connected pulse systems containing linear continuous portion, pulse elements in phase and nonlinear elements with time dependent characteristics 05 p0658 A66-15331
 Experimental verification of spectrum asymmetry at output of pulsed RF klystron amplifier transmitter leads to modulation technique called Control of Unwanted Radiated Energy /CURE/ 06 p0841 A66-15956
 Transmission of large number of instrumentation channels over parallel pulse-modulated light beams, using electro-optical mosaic sources and detectors 06 p0824 A66-15970
 Replacement of linear correcting network by pulse generator producing pulses of suitable form 06 p0832 A66-16509
 Photomultiplier voltage pulse shaping and transmission network using germanium tunnel diode 08 p1193 A66-19278
 Data pulsed transmission over electron-injection laser communication system, using continuous waves 09 p1385 A66-19934
 Optically biased pulsed transmission mode operation of Q-switched laser, in connection with Kerr cells inhibiting lasing action 09 p1386 A66-19937
 Electroexplosive device testing via pulse reflection techniques 12 p1934 A66-24674
 Extremely rapid propagation deformations in phase envelope of rectangular-type carrier pulse with extended spectrum 13 p2031 A66-25424
 Replacement of linear correcting network by pulse generator producing pulses of suitable form 13 p2024 A66-25949
 Noise rejection of pulsed systems for transmitting random Markov signal 15 p2449 A66-28673
 Absolute stability of multiply connected pulse systems containing linear continuous portion, pulse elements in phase and nonlinear elements with time-dependent characteristics 15 p2475 A66-29976
 Microwave switching tube for rapid pulse transmission on microwave communication channel, utilizing glow discharge 16 p2666 A66-31445
 Current wave form observation in GaAs, using transmission line concept and pulse splitting technique 17 p2983 A66-33109
 High scanning frequency for transmitting radar information to vehicles with beam arranged to form coded pulse signal 18 p3070 A66-34257
 Pulse transmitter for measuring heat transfer in ionized gas flow 19 p3362 A66-36772
 Meteor radar with peak power well into megawatt range with pulse transmitter producing 4 mw at 33 mc 20 p3543 A66-37626
 Group velocity of wave packet propagating radially across plasma immersed in static axial magnetic field, examining ringing phenomena due to pulsed transmission 23 p4101 A66-41261

PULSE WIDTH
 Static characteristics of electrohydraulic amplifier for pulse-width control drive 07 p0991 A66-17390
 Laser with neodymium-glass Q-factor modulation 08 p1233 A66-18970
 Pulse train waveforms minimizing suppression of small echoes by large overlapping echoes with identical or dissimilar Doppler shifts when processed by radar receivers which limit on received signal 14 p2235 A66-27060
 Errors in state vector arising from impulse representation of finite pulse width sampled data system 16 p2672 A66-31338
 Optical spectra of ultrashort optical pulses generated by mode-locked glass-doped neodymium lasers, considering saturable absorber cell placed parallel to Fabry-Perot reflector 21 p3747 A66-39115

PULSE WIDTH MODULATION /PWM/
 Successive approximations for variational problems in control theory including pulse amplitude and pulse width modulation, using quasi-linearization techniques 03 p0349 A66-12685

Linear power amplification with switching techniques, using pulse width modulation 13 p2036 A66-25522
 Pulse width modulated switching voltage regulator for spacecraft power supplies [AIAA PAPER 64-742] 13 p2044 A66-26655
 High precision attitude control system using pulse width modulation evaluated by hardware fabrication and digital computer simulation 15 p2606 A66-29658
 Optimal receiver of PWM telemetering signals 17 p2873 A66-32072
 Automatic control system analysis via space-state method, using a first-order differential equation 23 p4049 A66-41393
 Laplace transform analysis of transistor switching circuit controlled by RC time constant, using PWM circuit as example 24 p4185 A66-42949
 Absolute stability of specific class of nonlinear pulsed automatic systems, noting error signal and amplitude modulation 24 p4189 A66-42949

PULSED DOPPLER SYSTEM
 Oscillator stability affecting electromagnetic compatibility during PRF generation, digital system reception, reception with phase lock, etc 12 p1838 A66-24599
 Coherent memory filter for real time spectral analysis of Doppler radar echoes in single circuit coherent integrator 13 p2039 A66-25788

PULSED GENERATOR
 Semiconductor-based pulse generator for laser excitation 01 p0083 A66-11042
 Thyatron generator of nanosecond high voltage pulses 04 p0495 A66-13888
 Electromagnetic shock generator of high voltage nanosecond pulses with controlled length 04 p0495 A66-13888
 Pulse generator for semiconductor studies, including electron heating, impact ionization, etc 05 p0679 A66-15178
 Book on theoretical and engineering problems arising in capacitor discharge technique of pulse generation 06 p0878 A66-16046
 Transient behavior of feedback stabilized phase-angle-pickup system 06 p0861 A66-16358
 Transient characteristics of nanosecond-range pulse devices measured by wideband, interference correlator 08 p1194 A66-19280
 Semiconductor-based pulse generator for laser excitation 11 p1714 A66-23289
 Oscillator stability affecting electromagnetic compatibility during PRF generation, digital system reception, reception with phase lock, etc 12 p1838 A66-24599
 Quasi-steady-state operation of arc thruster obtained with pulse time of few hundred microseconds, producing continuous plasma stream [AIAA PAPER 65-338] 15 p2572 A66-29276
 Self-excited explosive-driven MHD generator as possible source of pulsed electrical power 15 p2429 A66-29302
 Thyatron generator of nanosecond high voltage pulses 15 p2466 A66-29696
 Electromagnetic shock generator of high voltage nanosecond pulses with controlled length 15 p2466 A66-29697
 Pulse switching of permalloy films by use of interrupted pulses and Kerr magneto-optical effect 16 p2773 A66-30683
 Giant coherent light pulse generation by Q-factor-modulated laser 16 p2719 A66-31183
 Pulse generator network synthesis and low-pass/ bandpass conversion 17 p2900 A66-32198
 High efficiency monostable circuit using complementary transistors suitable for generation of rectangular pulses having very short rise and fall times 17 p2886 A66-32382
 Solid state high speed pulse generators utilizing avalanche transistor 17 p2893 A66-32927
 Pulse generator for driving semiconductor laser diode, noting circuit diagram and operating characteristics 20 p3578 A66-37588
 Oscillator circuit needing no standby power and pulsed on when required, with application to tone generators 21 p3714 A66-39495
 Multipurpose ultrahigh speed camera system, noting use as nanosecond Kerr cell,

- age converter and giant laser pulse generator 23 p4071 A66-41675
 Pulsed energy turboalternator power generation system, discussing operation principles and performance 23 p4022 A66-41761
 Electromagnetic shock generator of high voltage nanosecond pulses with controlled length ASME PAPER 64-WA/FE-29] 24 p4157 A66-42580
- PULSED LASER**
 Pentacarbocyanine compound used to reduce monopulse duration in neodymium laser 01 p0080 A66-10262
 Destructive and luminescence effects of focused ruby laser beam on ruby 01 p0080 A66-10265
 Peak power transients of near confocal helium-neon laser working at 6328 angstroms in pulsed discharge basis 01 p0080 A66-10329
 Self-locked gas laser mode dependence on cavity length and position of laser medium in cavity 01 p0081 A66-10347
 Laser action at 5401 angstroms in pure neon pulsed high voltage discharge 01 p0081 A66-10353
 Cadmium telluride laser with electron excitation 01 p0084 A66-11188
 Pressure dependence of output of helium-neon gaseous laser in high pressure range 02 p0239 A66-11375
 Nonlinear propagation of pulse signal in laser type traveling wave amplifier 02 p0241 A66-11841
 Periodic automodulation of radiation and possibility of generating giant pulses in three-level laser with inhomogeneously excited active medium 02 p0241 A66-11842
 Coherence theory for collimation and focusing of time-averaged intensity of pulsed multimode laser 02 p0242 A66-12205
 Mode-controlled giant pulse laser used to produce two-beam hologram in short exposure time of 30 nsec 02 p0233 A66-12215
 Pulsed laser-created plasmas by light absorption by skin effect 03 p0403 A66-12975
 Pentacarbocyanine compound used to reduce monopulse duration in neodymium laser 03 p0379 A66-13307
 Destructive and luminescence effects of focused ruby laser beam on ruby 03 p0379 A66-13310
 Measuring device for pulsed laser output power using bolometer, amplifier and oscilloscope 04 p0520 A66-13888
 Time characteristics in generation of giant laser pulse studied by circuit with prismatic shutters 04 p0530 A66-13889
 Laser oscillations and self Q-switching, discussing pulsed flash-lamp excitation experiments with triply activated confocal barium crown glass 04 p0531 A66-13980
 Stimulated Brillouin and Raman scattering in gases, discussing sound velocity calculation from frequency shift and argon, hydrogen and nitrogen 04 p0531 A66-13981
 Rise time and output power of single pulse in He-Ne laser measured by method of changing Q-factor by plate located in resonant cavity 04 p0533 A66-14332
 Interaction of light pulse from ruby laser with mercury surface, observing mechanical impact believed to be rapid vaporization process 04 p0533 A66-14373
 Plasma generation by focusing laser beam in air at atmospheric pressure and room temperature indicate connection with luminous energy absorption during breakdown 05 p0692 A66-14538
 Shift of emission spectrum in pulsed GaAs laser, noting waveform characteristics 05 p0696 A66-14974
 Propagation rate of high power laser light pulse in inversely populated medium 05 p0717 A66-15333
 Powerful pulse of ruby laser emission generated by ultrasonic traveling wave diffraction modulator 05 p0698 A66-15861
 Pumping power formula for determining characteristics of continuous wave and pulsed lasers 06 p0889 A66-15900
 Search via laser receivers for interstellar communications 06 p0892 A66-16669
 Regular periodic spiking in output of pulsed neodymium doped borate glass laser at pumping levels slightly above threshold 06 p0892 A66-16672
 Laser action on five green lines and six IR lines caused by pulsing manganese discharge of collision laser in atomic vapor of neutral manganese 06 p0892 A66-16763
 Pulsed laser welding, wire-to-wire, sheet-to-sheet, circuit board, vacuum tube, etc 07 p1038 A66-18153
 Decay of F-center excitations in alkali halides induced by short intense pulse of Q-switched ruby laser 08 p1275 A66-19367
 Accurate tracking of Beacon-Explorer orbiting optical reflectors, using pulsed ruby laser beams 09 p1341 A66-19902
 Time dependent emission behavior of single axial mode of diffraction limited ruby laser at room temperature 09 p1386 A66-20420
 Room temperature quasi-continuously pumped ruby giant pulse laser with saturable absorber 10 p1541 A66-21248
 Spontaneous emission noise properties of pair of pulsed ruby laser amplifiers 10 p1542 A66-21310
 Electron and ion emission from pulsed ruby laser illuminated metallic surface into vacuum, determining application to pulsed ion thruster [AIAA PAPER 66-230] 10 p1542 A66-21453
 Laser simulated nucleation in bubble chamber, comparing sensitivity with radioactively stimulated nucleation 10 p1557 A66-21583
 Nonlinear amplification of light pulse passing through laser operating at saturation regime 10 p1543 A66-21963
 Text on high speed optical pulse technology, lasers and measuring techniques, emphasizing capacitor discharge application 10 p1538 A66-22063
 Standing waves in laser resonators verified by placing thin metallic films between external mirrors of pulsed neodymium laser 11 p1713 A66-22893
 Gadolinium molybdenate as ferroelectric host in pulsed laser, noting light modulation and crystal domain 11 p1713 A66-23207
 Gas spectroscopy of laser-induced stimulated Brillouin effect in high pressure oxygen 11 p1715 A66-23432
 Single pulse operation of lasers, noting energy storage and amplification effect for four- and three-level active medium 12 p1889 A66-23667
 Pulse excitation of volume of gas to coherently radiating state applied to beam maser spectrometer 12 p1879 A66-23731
 Cadmium telluride laser with electron excitation 12 p1890 A66-24009
 Laser welding for production microwelding, noting design, construction and application [ASTME PREPRINT MM66-707] 12 p1886 A66-24415
 Steady state value of inverted population, power output, threshold behavior and spiking characteristics for single-mode laser when radiation intensity has spatial dependence 12 p1891 A66-24562
 Pulsed induced emission in hydrogen beam laser for case of two relaxation times, determining polarization only by number of active particles in resonator 12 p1891 A66-24884
 Gas discharge by laser pulse, taking into account photoionization due to electron impact 12 p1891 A66-24887
 Treatment of steel with laser beam, obtaining precision holes without affecting microhardness of metal 12 p1888 A66-24898
 Segmented-rod ruby laser structure operated as giant pulse laser, using Kerr cell to provide Q-switching, noting number of oscillating modes 13 p2088 A66-25038
 Ruby laser amplifier dynamics, noting amplification in energy gain regimes and correlation to theoretical equations 13 p2089 A66-25049
 Formation of ultrasonically gated giant laser pulses by Q-spilling, noting photographs of ruby and role of cavitation in gating mechanism 13 p2089 A66-25057
 Frequency shift in resonance transition induced in potassium vapor by ruby laser pulse 13 p2089 A66-25103
 Laser producing two or three light pulses in sequence with interval between pulses mechanically controlled by optical wedge inserted into resonator 13 p2090 A66-25322
 Nonlinear dielectric laser light absorption by neutral gas resulting in avalanche breakdown of gas due to thermal ionization 13 p2090 A66-25425
 Second harmonic generation by Q-switched laser pulse from silicon and germanium surfaces 13 p2096 A66-26150
 Discrepancy between calculated and experimental values for Raman gain in pulsed laser suggests higher energy distribution due to light trapping or Brillouin scattering 13 p2096 A66-26157
 Multiple stimulated Brillouin emission exhibited by liquids exposed to pulsed ruby laser, noting scattering events, Stokes orders identification and iteration mechanism 13 p2097 A66-26164
 Photon echo, optical analog of spin echo, in ruby crystals, using ruby laser as excitation source 13 p2097 A66-26170
 Q-switched lasers, interaction of high power light pulse with matter and semiconductor lasers pumped with optical radiation and electron beams investigated, using quantum oscillator and amplifier 13 p2099 A66-26180
 Threshold data for ruby and neodymium laser pulse-induced breakdown in Xe, Ar, Kr, Ne, He, oxygen, nitrogen, air and carbon dioxide 13 p2100 A66-26191
 Plasma resonance and scattering, threshold variation and optical reflectivity in pulsed laser beam-induced gas breakdown 13 p2134 A66-26192
 Giant-pulse laser-induced atmospheric electric breakdown causing optical frequency discharge 13 p2134 A66-26194
 Electron impact excitation mechanism of argon-ion continuous and long pulse lasers 13 p2102 A66-26206
 High resolution piezoelectrically scanned Fabry-Perot interferometer used to study gain profiles, mode structures and emission line widths of CW Ar, Kr and Xe ion lasers and Hg-He pulsed laser 13 p2102 A66-26208
 Absolute flux measurement for pulsed and triggered lasers requiring only quantum receivers 13 p2104 A66-26375
 Absorber relaxation effect on passive Q-switch pulse laser 14 p2306 A66-27029
 Light pulse shape variation of laser with modulated Q-factor during nonlinear amplification 14 p2307 A66-27183
 Light detection and ranging /LIDAR/ technique use in atmospheric research, particularly meteorological factors important to aviation and rocket operations [AIAA PAPER 65-464] 14 p2309 A66-27892
 Performance of two-photon laser operating in continuous wave mode, deriving formula for pulse frequency 14 p2310 A66-28166
 Damage thresholds for various glasses exposed to laser pulses, emphasizing internal damage 15 p2524 A66-28732
 CAT detection from Doppler shift in laser light backscattered from atmospheric aerosol 15 p2500 A66-28930
 Mark I SMASER design, submillimeter wave gas laser capable of continuous wave or pulse operation 15 p2514 A66-29009
 Experimental evidence of inverse bremsstrahlung and electron-impact ionization in low pressure argon ionized by giant pulse laser 15 p2544 A66-29115
 Pulsed nitrogen laser action in wind tunnel-simulated supersonic flow 15 p2516 A66-29384
 Ultrashort optical pulses generated by mode locking continuous neodymium doped yttrium-aluminum garnet laser 15 p2517 A66-29391
 Pulsed laser operation in wedge-shaped ruby rod at room temperature 15 p2517 A66-29415
 Measuring device for pulsed laser output power using bolometer, amplifier and oscilloscope 15 p2503 A66-29701
 Time characteristics in generation of giant laser pulse studied by circuit with prismatic shutters 15 p2518 A66-29702
 Dynamics of field and generation frequencies in giant pulse of ruby laser with passive shutter, using solution of cryptocyanine in ethanol, noting mirror reflection coefficient 15 p2518 A66-29727
 Propagation rate of high power laser light

pulse in inversely populated medium 15 p2543 A66-29980

Scattering of light from pulsed ruby laser by plasma jet, noting cross section, electron-phonon interaction, etc 16 p2716 A66-30139

Frequency shift in resonance transition induced in potassium vapor by ruby laser pulse 16 p2717 A66-30282

Writing rate of rotating-mirror streak camera determined, using Q-switched laser technique 16 p2702 A66-30419

Resonator transients used to shorten giant light pulses generated in Q-switched laser oscillators to pump secondary laser oscillator with suitable absorption band 16 p2718 A66-31077

Time resolution of laser-induced electron emission from cesium diode at high laser power 16 p2719 A66-31135

Giant pulses from neodymium glass laser pumped by giant pulses from ruby laser 16 p2719 A66-31354

High voltage pulsed electrodeless discharge in rare gas as light source for ruby and Nd glass laser excitation and observation of output characteristics 16 p2720 A66-31448

Laser cavity output optimization for maximum external quantum efficiency showing dependence on length and reflectivity for given current density 16 p2720 A66-31535

Chorioretinal lesion produced by pulsed ruby laser beam and complex changes in retinal excitability in cats 16 p2641 A66-31761

Focused laser coherent radiation-induced degradation of solid methylene and gas chromatographic analysis of reaction products 17 p2933 A66-31870

Frequency shift relative to spectral width for single pulses of triggered laser determined by measuring variations of emitted wavelength as function of time 17 p2934 A66-32622

Stimulated Brillouin scattering from nitrogen and methane using giant pulse laser, noting convergence angle of backscattered beam sound, velocity measurement, etc 17 p2961 A66-32627

Electron-ion emission pattern distribution obtained by pulsed laser focusing on solid target 17 p2937 A66-33256

Low threshold neodymium glass laser oscillator with high repetition 17 p2937 A66-33325

Mode characteristics of solid state lasers from analytical solution of conservative equation 18 p3118 A66-33839

Spark shadow projections in air for giant pulse synchronization from two lasers, using rotating prism to modulate quality factors 18 p3144 A66-34036

Disintegration of alkali halide single crystals, polymers and glasses under laser radiation, noting parameters of disintegration region magnitude 18 p3119 A66-34681

Faraday rotation obtained with pulsed high-field magnets for controlling laser cavities 19 p3372 A66-35380

Momentum transfer caused by focusing laser giant pulse on surface in vacuum investigated for Be, C, Al, Zn, Ag and W 19 p3373 A66-35418

Alumina high temperature gas discharge tube for investigation of pulsed metal vapor laser oscillations 19 p3374 A66-35810

Laser output energy controller having eight-to-one improvement in pulse repeatability in solid state lasers 19 p3374 A66-36034

Laser giant pulse damage to dielectric mirror coatings immersed in nitrobenzene solution 19 p3444 A66-36075

Pulsed laser action in visible spectrum of singly ionized Ge, Sn, Pb, In, Cd and Zn, listing temperature and pressure ranges 19 p3444 A66-36076

Pulsed discharges of OCS molecular laser 19 p3375 A66-36080

Plasma production by firing giant pulse laser at solid deuterium pellet /ice/, noting strong anisotropy in plasma outburst 19 p3432 A66-36595

Pulsed ruby lasers, considering pumping and threshold, output, quantum mechanics and variation on basic device 20 p3575 A66-36968

Fluorescence of rare earth, actinide and

transition metal ions in insulating crystals as result of optical excitation, discussing spectroscopic properties and operating characteristics 20 p3575 A66-36969

Frequency spectrum of laser impulse in Q-switching regime wider than that of single impulse radiated by laser in ordinary regime 20 p3576 A66-37141

Frequency doubling in resonance laser, obtaining second harmonic field for laser radiation by giant pulses 20 p3576 A66-37144

Threshold determination of pulsed ruby laser by single pulse technique 20 p3578 A66-37548

Identification of number of lines at 11 microns emitted from pulsed carbon dioxide laser as P branch of carbon dioxide vibrational transition 20 p3579 A66-37629

Pulsed operation of electron-beam pumped zinc oxide laser emitting radiation in UV at very low temperatures, noting importance of use of cavity 20 p3579 A66-37768

Mirror damage alleviation in giant pulse semiconductor laser operation, discussing use of high melting point mirrors cooling and oblique incidence 20 p3581 A66-38245

Pulsed nitrogen laser delivering high average power without complications of conventional Q-switching 20 p3581 A66-38266

Plasma flow velocity profile measurement by electrostatic probe detection of plasma drop caused by gas breakdown due to focused giant pulse laser 20 p3612 A66-38395

Pulsed-mode gain characteristics in neodymium-doped silicate glass laser experimentally related to giant-pulse laser energy output 20 p3582 A66-38396

Energies of ions generated from metal surface irradiated by single giant pulse laser 20 p3582 A66-38412

Laser vaporization and ionization of solid materials to obtain ions for time-of-flight mass spectrometer 21 p3749 A66-39385

Nonlinear amplification of light pulse passing through laser operating at saturation regime 21 p3749 A66-39542

Single pulse operation of lasers, noting energy storage and amplification effect for four-and three-level active medium 22 p3929 A66-39711

Spectral and time-dependent characteristics of stimulated radiation from ruby pulse laser, using Fabry-Perot etalon in fine-structure observation 22 p3931 A66-39823

Pulsed coaxial transmission line nitrogen gas laser, noting pressure effect 22 p3932 A66-40107

Room temperature performance of GaAs laser diodes, using SCRs to achieve high pulse repetition rate 22 p3932 A66-40175

Pulsed induced emission in hydrogen beam laser for case of two relaxation times, determining polarization only by number of active particles - in resonator 23 p4076 A66-41091

Gas discharge by laser pulse, taking into account photoionization due to electron impact 23 p4076 A66-41094

Internal self-damage in 25 mw ruby laser oscillator rod 23 p4076 A66-41160

Performance characteristics for pulse type Ar laser with external interferential system of quasi-confocal spherical mirrors 23 p4078 A66-41452

Schlieren photographs of plasma discharges in parallel plate rail tube, using pulsed ruby laser as light source 23 p4104 A66-41510

Ruby laser giant pulse off-axial modes detected with high resolution spherical Fabry-Perot interferometer 23 p4079 A66-41627

Q-switch pulsed ruby laser irradiation-induced chemical dissociation and ionization in residual gases 23 p4079 A66-42076

Absorber concentration effect on pulsed laser system noting performance characteristics, threshold energy, pumping dynamics and time parameters 24 p4220 A66-42254

Q-switching laser system to obtain simultaneous giant pulses from five ruby laser oscillators 24 p4220 A66-42302

Giant pulse generation range in transverse direction after Q-switching in ruby laser, examining resonator properties 24 p4220 A66-42516

Mode selection, relaxation oscillations, mode interaction and thermal effects in

room temperature CW lasers in ellipsoidal pumping systems 24 p4221 A66-42546

Pulsed ruby laser photoelectric receiver experiments determining satellite orbits, supplementing Baker-Nunn camera network 24 p4172 A66-42547

Pulsed laser holograph and problem of overcoming limited coherence 24 p4211 A66-42560

Gas pumping effect on output of repetitively pulsed ion lasers 24 p4223 A66-42569

Narrow spectral outputs from actively Q-switched lasers, deriving fractional energy expression for injected mode group 24 p4223 A66-42570

Light pulse shape variation of laser with modulated Q-factor during nonlinear amplification 24 p4224 A66-42727

Gas-discharge CW lasers, particularly He-Ne, carbon dioxide, argon-ion and pulsed self-terminating lasers, discussing classification, power output and gain, Doppler width, coherence and noise 24 p4224 A66-42801

Detecting concentration of nitric oxide in metastable state in upper atmosphere, using giant-pulse Raman laser sources 24 p4203 A66-43022

PULSED RADIATION

Ratio of average transmission coefficients of L-beta and H-alpha and reabsorption in hydrogen pulsed discharge 01 p0111 A66-10390

Cut-off of ruby laser emission by pulsed electron and bremsstrahlung radiation, using adiabatic temperature 03 p0377 A66-12447

Electromagnetic wave diffraction by moving bodies of revolution subjected to pulsed radiation when spatial dimension of impulse may be less than linear dimension of body 04 p0483 A66-14050

Amplitude, period and stabilization time of pulsations induced in solid bodies by high energy radiation 04 p0532 A66-14258

LF/VLF pulse radiation using solid state elements in switching mode to generate RF power, presenting time and energy functions 05 p0652 A66-14596

Periodic variations in luminosity of quasi-stellar radio sources related to fluctuations of main parameters of magnetic-bremsstrahlung mechanism 07 p1134 A66-17620

Electrical properties of carrier generation-recombination centers in silicon p-n junctions, noting energy levels, effective capture cross sections for holes, etc 07 p1107 A66-18402

Photon echo, short pulse of light spontaneously emitted by dilute ruby crystal after ruby-laser pulse irradiation 07 p1047 A66-18442

Laser development, discussing basic theory, pumping methods and laser types 08 p1233 A66-18700

IR sensor detection of hypervelocity meteoroid puncture radiation emission 08 p1225 A66-19520

Ionization currents in diamond exposed to pulsed excitation and to applied pulsed electric field 10 p1586 A66-22144

Varying luminance and light-dark ratio effects on brightness enhancement of intermittent light 11 p1736 A66-22373

Phase difference due to elastic waves produced by cyclic heating of targets by impacting ions from pulsed beam 13 p2159 A66-25070

Optical emission from ruby induced by short pulses of relativistic electrons in which electron-hole recombination produces excitation of emission 13 p2098 A66-26173

Fluorescence lifetime measuring technique employing pulsed or modulated RF discharges applied to emission of second positive and first negative systems of nitrogen 14 p2337 A66-27974

Pulsed toroidal excitation of gas ion lasers extended to drive high power CW laser transitions in Ar, Kr, Cl and Br, noting operating parameters and power output 15 p2513 A66-28877

CW IR laser oscillation in atomic Cl in HCl and HI gas discharges, noting use of two power supplies and energy level diagram 15 p2513 A66-28880

Optical radar scanning system, using ruby

aser source for meteorological studies 15 p2450 A66-28929
 Delayed cyclotron pulse generation in topside ionosphere deduced from Alouette I data 15 p2452 A66-29678
 Electromagnetic wave diffraction by moving bodies of revolution subjected to pulsed radiation when spatial dimension of impulse may be less than linear dimension of body 17 p2873 A66-32216
 Conducting fluid flow velocity measuring technique using properties of pulsed electromagnetic field 17 p2926 A66-32873
 Transition region of pulse spectrum from REAS particle density recordings by Cerenkov and scintillation detectors 18 p3207 A66-35110
 Jodrell Bank experiment testing Askarian hypothesis on radio pulses coincident with REAS under mutual coherence effects and checking coherent condition, internal reflection, shower energy, threshold and polarization 18 p3209 A66-35118
 Ionization currents in diamond exposed to pulsed excitation and to applied pulsed electric field 19 p3440 A66-35758
 Metal strength in pulsed magnetic fields at low temperatures, noting resistance of copper wire as function of number of pulses 21 p3750 A66-39064
 Characteristics of efficient semiconductor lasers in UV portion of spectrum obtained at both liquid helium and nitrogen temperatures, using pulsed electron beam excitation on ZnS crystals 21 p3747 A66-39114
 Ferroelectric transducers, discussing feasibility of using ceramic transducers as fused power supplies 21 p3741 A66-39504
 Transient resonant response of inhomogeneously broadened nuclear spin system to pulsed electromagnetic field represented as series of Bessel functions modulated by time-varying coefficients 22 p3950 A66-40093
PUMP
 SA AXIAL PUMP
 SA CENTRIFUGAL PUMP
 SA CONDENSATION PUMP
 SA ELECTROMAGNETIC PUMP
 SA FUEL PUMP
 SA HEAT PUMP
 SA HYDRAULIC PUMP
 SA INJECTOR
 SA ION PUMP
 SA JET PUMP
 SA MOLECULAR PUMP
 SA TURBINE PUMP
 SA TURBOPUMP
 SA VACUUM PUMP
 Cavitation testing of high efficiency shear force pump and pump rotor, considering air content and cavitation parameters 07 p1038 A66-18172
 Hubless inducer with shroud eliminates vane clearance cavitation, noting test data, suction speed, interrelation of boundary layer transition and cavitation, etc [ASME PAPER 66-FE-8] 17 p2932 A66-33262
 Photoelectric solar power plant for water pumps in grazing areas noting design, construction and automatic control system testing 20 p3503 A66-38438
PUMP IMPELLER
 Hydraulic performance and sensitivity of various configurations of centrifugal pumps to tip clearance effects [ASME PAPER 64-WA/FE-17] 06 p0884 A66-16211
 Cavitation damage in high-temperature liquid metal pumps for Rankine cycle space power plants studied in water model 07 p1038 A66-18175
 Cavitation performance testing in water of mixed flow pump impeller 07 p1039 A66-18179
PUMP SEAL
 Cermet face seals for inert gas environment sealing shaft of liquid-metal pumps employing conventional lubrication system [ASLE PREPRINT 65AM 4C4] 10 p1540 A66-22039
 Dynamics of pump rotor allowing for hydrodynamic forces arising in seals, determining region of unstable rotor motion and amplitude of oscillations 12 p1964 A66-24049

Seal performance optimization, noting alignment, lubrication, gasketing, balance, etc [ASLE PAPER 66AM 2C2] 16 p2711 A66-30407
 Noncontact liquid and vapor screw-type shaft seals in potassium cooled and lubricated electric power generator for space environment, noting dynamic slinger seal and viscoseal 16 p2714 A66-30627
 Rotating speed effect on design of dynamic seals for rocket engine turbopumps, presenting aspects of design of hydrostatic seal [ASME PAPER 66-FE-18] 17 p2932 A66-33271
 Shaft sealing systems on centrifugal compressors, noting labyrinth, restrictive ring shaft, liquid film and mechanical and special seals [ASME PAPER 66-MD-42] 21 p3742 A66-38490
PUMPING
 SA CRYOPUMPING
 SA MAGNETIC PUMPING
 SA OPTICAL PUMPING
 In-pile pumping system tested on thermionic converter SIRENE 56 for gaseous fission products 05 p0619 A66-15565
 Electron interaction with quadrupole pumping field, noting phase-focusing character in quadrupole region and determination of amplifier effect 06 p0859 A66-17186
 Pressure in sealing groove and increase time due to pumping action of moving wall applied to force cylinder of translational motion, considering liquid in groove laminar 14 p2225 A66-27688
 Cryopumping, titanium-sublimation and ion-pumping mechanisms studied for exhausting vacuum chambers to simulate outer space 16 p2677 A66-30456
 Quasi-linear equations for inhomogeneous plasma in magnetic field applied to pumping of energy of Langmuir oscillations 16 p2762 A66-31176
 Electron interaction with quadrupole pumping field, noting phase-focusing character in quadrupole region and determination of amplifier effect 19 p3314 A66-35544
 Hydrogen pumping by means of phenomenon of hydrogen absorption by solid layer of carbon dioxide condensed at temperature of 20.4-14 degrees K 19 p3400 A66-36099
 Hydrogen, nitrogen, oxygen and helium gas pumping by ionization pressure gauges in space simulators 22 p3891 A66-40233
PUPIL SIZE
 Visual acuity definition and clinical measurement of relevant factors 04 p0462 A66-13793
PURIFICATION
 SA AIR PURIFICATION
 SA CLEANING
 SA STERILIZATION
 Virus purification methods including density gradient centrifugation, liquid-phase partition, etc, evoke high antibody levels 09 p1333 A66-19899
 Purification of turbine oil by hydrogenation, using Al-Co-Mo catalyst 20 p3575 A66-38382
 Plasmoid motion and purification in helical magnetic field and mass spectrograms of pure dense hydrogen 21 p3787 A66-39048
PURINE
 Pressure gradient elution technique for rapid and quantitative chromatographic separation of purine and pyrimidine bases 22 p3860 A66-40402
PURITY
 S IMPURITY
PURSUIT TRACKING
 Pursuit problem covering trajectory equations and motion 04 p0543 A66-13559
 Successive linearization for variational problems of flight 04 p0458 A66-13698
 Differential games, theorem and analysis, discussing controlled object pursuits and computation of minimal time of termination 04 p0539 A66-13989
 Numerical method of determining extremal time controls for achieving optimal pursuit 12 p1902 A66-23767

Successive linearization for variational problems of flight 15 p2425 A66-28539
 Minimax problem for pursuit problem of two linearly controlled objects describable by identical differential equations 15 p2526 A66-28948
 Gamma angle control method in velocity pursuit problem 21 p3770 A66-38987
PWM
 S PULSE WIDTH MODULATION /PWM/
PYRANOMETER
 Radiation measurement error using Eppley radiation sensors in Antarctic 15 p2503 A66-29664
PYRIDINE
 X-ray single crystal diffraction technique determination of structure of pyridinium dicyanomethylide 04 p0472 A66-13364
 Coordination of substituted pyridine N-oxides with oxovanadium IV/ cations, noting stoichiometric variations with changes 09 p1339 A66-20878
PYRIDOXINE
 Chemical radiation protection, covering long period exposure, effect of pyridoxine during supersonic and manned space flights 06 p0815 A66-16053
PYRIMIDINE
 Pressure gradient elution technique for rapid and quantitative chromatographic separation of purine and pyrimidine bases 22 p3860 A66-40402
PYROELECTRICITY
 SA DIPOLE MOMENT
 Pyroelectric effect in barium titanate ceramics used for weak thermal radiation recording 06 p0881 A66-16725
 Maximum efficiency of power converters, using ferroelectric and nonferroelectric pyroelectrics 13 p1997 A66-25036
 Equivalent circuit for pyroelectric materials used in obtaining noise equivalent power for detection of electromagnetic radiation and heat transfer measurement 20 p3562 A66-38405
 Dielectric loss tangent measurement in pyroelectric materials for EM radiation detectors and heat transfer sensors 21 p3740 A66-39386
 Pyroelectric heat-transfer sensor performance compared with thin skin thermocouple heat sensors, noting discrepancy in measurement results in severe environment 24 p4207 A66-42177
 Thin film thermal radiation detector noting construction, calibration, performance, error sources and advantages of pyroelectric over thin film gauges 24 p4208 A66-42179
PYROLYSIS
 Pyrolysis of diol succino-maleates copolymerized with styrene at various temperatures, using gas chromatography [ONERA TP 251] 02 p0188 A66-11678
 Chemical inhibition of pentaborane-oxygen reaction in development of improved fire protection systems 03 p0413 A66-12487
 Nature and rate of linear surface regression of TNT, RDX, Tetra and PETN, using hot-plane pyrolysis technique over surface temperatures to 500 degrees C 04 p0571 A66-13645
 Data on combustion of pyrolyzing solids as applicable to combustion chambers of hybrid propulsion devices, placing emphasis on coal 07 p1154 A66-18028
 Linear pyrolysis velocity measuring device for ammonium perchlorate in one-dimensional flow 08 p1279 A66-18723
 Thermal degradation mechanism of polystyrene, measuring volatilization rate and molecular weight dependence on extent of pyrolysis 08 p1243 A66-19067
 Pyrolysis of boranes using mass spectrometer at increasing temperatures, observing tetraborane, baborane, pentaboranes, etc 12 p1812 A66-23632
 Thermal degradation of mesoporphyrin, obtaining various alkylpyrroles and hydrocarbons, noting role of controlled pyrolysis as adjunct to mass spectrometry 15 p2446 A66-28865
 Deposition of single-crystal silicon films on sapphire substrates by pyrolytic decomposition, noting properties 16 p2782 A66-31419
 Mass spectrometric analysis of contents of flow reactor in which diborane at low

pressure was pyrolyzed, varying temperature, flow time, surfaces, etc 17 p2871 A66-32853
Thermoplastic surface response to intense surface heating exposure, examining linear pyrolysis of polymethyl methacrylate [WSCJ 66-24] 18 p3263 A66-34418
Prior gamma irradiation effect on thermal volatilization of vinyl and vinylidene fluoride polymers 20 p3587 A66-37311
Kinetics of monosilane pyrolysis, detailing gaseous and solid product formation, surface effects and experiments with added gases 22 p3999 A66-40410
Heat of pyrolysis of resin in silica-phenolic ablator determined from combustion calorimetry measurements of heats of formation 23 p4150 A66-41892

PYROLYTIC GRAPHITE

Graphite properties relationship to microstructure and control by fabrication techniques and material selection 07 p1053 A66-18295
Thermoconductivity of annealed pyrolytic graphite from 100 to 900 degrees K, using phonon mean free path characteristics 07 p1055 A66-18518
Permanent compressive deformation of pyrolytic graphite rapidly heated to very high temperatures and loaded in C direction 14 p2318 A66-27877
Preferred orientation of pyrolytic carbons, noting relationships and equivalence of parameters 16 p2780 A66-31099
Pyrolytic graphite production by thermal decomposition of hydrocarbon gas on heated surface, noting annealing, alloying and residual stresses [ASME PAPER 66-MD-54] 21 p3753 A66-38493

PYROLYTIC MATERIAL

SA ABLATING MATERIAL
Electron microscope study of emitter inhomogeneity influence on determination of electron emission constants and performance of thermionic converters 05 p0622 A66-15583
Fabrication, structure and properties of pyrolytic materials, particularly pyrolytic graphite, noting thermal and mechanical properties, oxidation, vaporization, etc 07 p1055 A66-18503
Low temperature chemical vapor-plating process for obtaining pyrolytic titanium diboride filaments for ablative composites 08 p1244 A66-19140
Hydrogen essential in deposition from methyltrichlorosilane of silicon carbide 16 p2729 A66-30247

PYROMETER

SA OPTICAL PYROMETER
SA RADIATION PYROMETER
Photographic pyrometer using variable-density filter noting temperature master curve, attenuation, calibration and error sources 02 p0229 A66-11518
Micropyrometer with constant focal length and replaceable lenses for measuring temperature of small bodies 03 p0369 A66-12829
Spectroradiometric pyrometry of shock heated gases by IR emission and absorption measurements 09 p1382 A66-20508
Cylindrical black body furnace with graphite resistance built in France, attaining 1600 degrees C, for calibration of radiation pyrometers 09 p1383 A66-20909
Pyrheliometers, noting performance, application, environmental effects and calibration based on black body radiation 16 p2703 A66-30509
IR pyrometry of lunar surface 19 p3457 A66-35447
Micropyrometer with constant focal length and replaceable lenses for measuring temperature of small bodies 19 p3362 A66-36771

PYROMETRY

Continuum emission from Venus, Mars, Jupiter and Saturn at 21.2 cm wavelength, measuring brightness temperature to determine source of radiation solar activity effects 11 p1776 A66-23491
Effect of aperture and atmospheric turbidity on readings of pyrheliometers considered, based on measurements concerning radiation intensity within solar aureole 14 p2282 A66-26930

PYROTECHNICS

SA FLARE
Measuring apparatus for autoignition times of explosives, propellants and pyrotechnics under various initial vacuum or pressure ranges 01 p0054 A66-10854
Pyrotechnics for efficient preheating of space power systems by simple lightweight chemical blends that produce heat pyrotechnically 04 p0460 A66-13926
Behavior of pyrotechnic devices and explosives studied when heated to 145 degrees C for 36 hours /three separate times/ for development of dry-heat sterilizable equipment for space vehicles 13 p2014 A66-25288
Military pyrotechnics, discussing initiators and those producing light, smoke, gas, sound, heat and time-delays 18 p3160 A66-34185
Safety and arming devices, discussing rocket motor ignition, staging, destruct and thrust reversal or termination 18 p3160 A66-34190
Pyrotechnic delay systems, discussing ideal characteristics, burning times and rates, housings, loading pressure, surveillance 18 p3160 A66-34193
Neutron radiographic techniques to solve nondestructive testing problem of pyrotechnic cartridge inspection 21 p3806 A66-39153
Behavior of pyrotechnic devices and explosives studied when heated to 145 degrees C for 36 hours /three separate times/ for development of dry heat sterilizable equipment for space vehicles 24 p4260 A66-42784

PYROXENE

SA SILICATE
Isostructural and jadeite mineral called ureyite found as rare emerald-green grains in iron meteorites Coahuila, Toluca and Hex River Mountains 05 p0674 A66-15197

PYRROLE

Synthesis of polyimidazopyrrolones, using previous macromolecular synthesis of ladder segments of aromatic-heterocyclic polymers 13 p2017 A66-26290

PYRUVATE

Accelerated sodium pyruvate decomposition in aqueous solution due to proteinoids produced by thermal condensation 17 p2849 A66-31875
Carbon dioxide control by enzymatic reaction in spacecraft atmosphere by hydrolyase and multienzyme system 19 p3293 A66-36240

P3V AIRCRAFT

S P-3 AIRCRAFT

Q

Q-FACTOR

Dependence in transistorized multistage amplifiers of Q on resistances in collector loops 02 p0206 A66-12270
Electro-optical shutter for Q-factor modulation in neodymium glass laser 04 p0529 A66-13431
Q-factor of nonlinear capacitance microwave diodes determined from standing-wave ratio and phase difference for two bias voltages on diode, using passive linear quadrupole 04 p0499 A66-14062
Equivalent capacitance, inductance, radiation resistance and Q-factor of umbrella top-loaded electrically short antennas 06 p0825 A66-16018
Band stop filters, determining advantages in high power transmission and rejection, power capacity, Q-factor, etc 06 p0844 A66-16081
Q-factor of ferrite-core networks measured by nonlinear inductance 07 p1031 A66-17400
Plasma conductivity measurement in terms of frequency shifts and Q-factor variation in RF oscillatory circuit produced by presence of plasma sample in induction coil 08 p1264 A66-19190
Laser regime with giant pulses generated in dysprosium doped cadmium fluoride under continuous pumping by xenon lamps, obtaining Q factor modulation by rotating prism 08 p1234 A66-19376
Transient processes in nonlinear trigger circuit with capacitive p-n junction used in

bistable trigger systems 11 p1670 A66-23226
Dependence in transistorized multistage amplifiers of Q on resistances in collector loops 12 p1831 A66-23874
Simplified measurement of Q of microwave transmission cavities 12 p1816 A66-24148
Calculation of loss in interdigital and combine filters due to finite conductivity of materials 13 p2029 A66-25204
Relating maximum Q-factor of second-order active filter section to Q-factor stability and to gain in active elements 13 p2030 A66-25209
Synthesis of linear automatic control system with constant parameters for integral Q-factor, noting effect of small parameters on properties of optimum system 14 p2265 A66-27521
Fast-acting fluid seal for Q-factor modulation of neodymium glass laser 14 p2308 A66-27595
Relationship between amplification, bandwidth and noise temperature in maser amplifier, considering paramagnetic permeability and Q-factor 15 p2514 A66-29051
Q-factor modulation of ruby-laser resonator by phthalocyanine series 15 p2516 A66-29353
Laser Q-factor modulation by spectral absorption filters with inverse bleaching 15 p2516 A66-29354
Q-factor of nonlinear capacitance microwave diodes determined from standing-wave ratio and phase difference for two bias voltages on diode, using passive linear quadrupole 17 p2885 A66-32228
Large wavelength changes in gallium arsenide injection lasers due to changes in cavity Q 17 p2935 A66-32635
Discriminating RC amplifier using compound reactive transistor for higher Q-factor 17 p2888 A66-32707
Spark shadow projections in air for giant pulse synchronization from two lasers, using rotating prism to modulate quality factors 18 p3144 A66-34036
Laser regime with giant pulses generated in dysprosium doped cadmium fluoride under continuous pumping by xenon lamps, obtaining Q factor modulation by rotating prism 18 p3119 A66-34178
Synthesis of HF multicircuit band filters with indirect couplings 19 p3312 A66-35324
Q-factor modulation of ruby-laser resonator by phthalocyanine series 20 p3576 A66-37358
Spectral characteristics of two-photon optical excitation and light emission from CdSe semiconductor laser with modulated Q-factor 20 p3578 A66-37565
Laser mode-locking during resonator Q-factor modulation 21 p3748 A66-39303
Stable limiting cycles of laser resulting from mutual synchronization of phase-shifted oscillation modes 22 p3929 A66-39653
Frequency doubling of laser light with variable Q-switched resonator 22 p3929 A66-39654
Low loss waveguide cavities measurement, using simple equipment suitable for high values of Q-factor 22 p3878 A66-40517
Q-factor of active substance of three-level quantum amplifiers with two relaxation times determined with aid of density matrix 23 p4078 A66-41466
Giant pulse generation range in transverse direction after Q-switching in ruby laser, examining resonator properties 24 p4220 A66-42516
Fast-acting fluid seal for Q-factor modulation of neodymium glass laser 24 p4224 A66-42729

Q-SPOILING
Laser Q-switch arrangement with roof prism end reflector and electro-optical retarder 04 p0531 A66-13957
Photographic film used for quantitative measurements of intensity distribution in Q-switched laser beam 05 p0695 A66-14920
Mode competition and coupling in Q-switched ruby laser 06 p0890 A66-16383
Life performance characteristics of uncoated ruby laser Q-switched by rotating prism forming end reflector of laser resonator 06 p0892 A66-16675
Q-switched optical maser synchronization, discussing experimental design, setup and performance 07 p1041 A66-17297
Room temperature quasi-continuously pumped ruby giant pulse laser with

tunable absorber
 switch 10 p1541 A66-21248
 Q-switching of carbon dioxide and nitrous
 oxide gas laser 11 p1714 A66-23354
 transitions 11 p1714 A66-23354
 vibrational and rotational relaxations in
 carbon dioxide and nitrous oxide laser
 systems, using Q-switching
 techniques 11 p1714 A66-23355
 segmented-rod ruby laser structure
 operated as giant pulse laser, using Kerr
 cell to provide Q-switching, noting number
 of oscillating modes 13 p2088 A66-25038
 Ruby laser amplifier dynamics, noting
 amplification in energy gain regimes and
 correlation to theoretical
 equations 13 p2089 A66-25049
 formation of ultrasonically gated giant
 pulse pulses by Q-spilling, noting
 photographs of ruby and role of cavitation
 gating mechanism 13 p2089 A66-25057
 hole burning in bleachable absorbers used
 as laser Q-spoiler 15 p2517 A66-29387
 reversible bleachable dye-solutions for
 expander elements in
 laser 15 p2517 A66-29388
 Q modulation of laser theory and
 application, presenting giant pulse
 production, phenomenological theory, output
 response to step function change, electro-
 optic and mechanical
 modulators 20 p3576 A66-36971
 Electron beam scanlaser based on laser
 cavity directly and/or transversely
 regenerate having Q-spoiled for all modes
 out one 20 p3581 A66-38244
 Dynamic laser wavelength selection by
 insertion of dispersive tunable electro-optic
 Q-spoiler within laser
 cavity 22 p3933 A66-40866
 Mercury, cesium and rubidium vapors
 ionization in intense radiation flux by Q-
 switched ruby laser 23 p4076 A66-41156
 Quantum theory of Q-spoiled laser, noting
 statistics of number of photons in mode
 near qualitative resemblance to Poisson
 statistics 23 p4077 A66-41373
 Stimulated emission of polymethine dyes
 upon pumping with Q-switched laser, noting
 wavelength parameters and
 oscillation 24 p4219 A66-42247
 Q-switching laser system to obtain
 simultaneous giant pulses from five ruby
 laser oscillators 24 p4220 A66-42302
 SO
 S QUASI-STELLAR RADIO SOURCE
 /QSO/
 QUADRATIC EQUATION
 Smoothing of intersection of surfaces of
 revolution with quadrics of
 revolution 02 p0297 A66-11244
 Necessary and sufficient conditions for
 expansion of quadratic polynomial matrix
 into product of linear
 factors 02 p0249 A66-12007
 Stability of automatic control system with
 nonlinear elements, obtaining quadratic
 equations by using Liapunov
 method 03 p0349 A66-12707
 Quadratic form as Liapunov function for
 linear homogeneous vector differential
 equation with constant coefficient
 matrix 04 p0539 A66-13825
 Lowering order of transfer function of
 automatic control system based on use of
 generalized integral quadratic estimates of
 transient processes of
 system 11 p1673 A66-22203
 Control criterion for linear system with
 constant matrix, discussing quadratic
 functionals ensuring aperiodic
 transient 11 p1674 A66-22351
 Uniqueness of mean square approximate
 systems proved by expressing weighted
 mean square error in quadratic form in
 normal coordinates 13 p2116 A66-25139
 New algorithm for quadratic programming
 problems with application to control,
 determining input requiring minimum time
 from initial state to target
 state 13 p2046 A66-25341
 QUADRATURE
 Statistical approach to derivation of
 quadrature formulas 07 p1061 A66-18510
 Transfer function for quadrature
 modulation single band signal generating all-
 pass filter, using differential operational
 amplifier 14 p2253 A66-27586

QUADRATURE APPROXIMATION

Exactness of mechanical quadrature
 approximation of eigenvalues and
 eigenfunctions of Fredholm integral
 equation 01 p0092 A66-10316
 Singular integral equations solved
 approximately by mechanical quadrature
 method 03 p0388 A66-12711
 Quadrature solution to one-dimensional
 problem for helicoidal shell with given load
 and desired force distributions, moments
 and displacements 04 p0588 A66-13564
 Method of quadrature used for
 determination of perturbations in Kepler
 orbit of inertia center of body moving in
 central field of Newtonian
 forces 04 p0577 A66-13819
 Deriving interpolatory type quadrature
 formula by inverting linear systems of
 differentiation formulas 09 p1395 A66-20622
 Field effect theory in semiconductors with
 capture centers, noting basic equation,
 quadrature expressions,
 etc 11 p1751 A66-22732
 Tabulation of constants in two types of
 error estimates for Romberg quadrature
 formulas 11 p1722 A66-22985
 Numerical integration of differential
 equation using exterior node quadrature
 formulas of Ionescu 12 p1904 A66-24190
 Complex cycles of differential equations
 examined, deriving limit cycle of
 multiplicity, integration by quadrature,
 etc 13 p2119 A66-25851
 Erdos and Turan theory of fine and rough
 convergence of interpolation and quadrature
 processes 18 p3127 A66-34543
 Field effect theory in semiconductors with
 capture centers, noting basic equation,
 quadrature expressions,
 etc 23 p4113 A66-41470
 Three families of classical fifth-order
 Runge-Kutta formulas including Newton-
 Cotes, Legendre-Gauss and Lobatto and
 Randau types 24 p4233 A66-43206
 QUADRUPOLE
 Q-factor of nonlinear capacitance
 microwave diodes determined from standing-
 wave ratio and phase difference for two
 bias voltages on diode, using passive linear
 quadrupole 04 p0499 A66-14062
 Electron interaction with quadrupole
 pumping field, noting phase-focusing
 character in quadrupole region and
 determination of amplifier
 effect 06 p0859 A66-17186
 Feedback to quadrupole that incorporates
 device for converting voltage into time
 parameter of periodic sequence of pulses
 and vice versa
 /chronotron/ 11 p1671 A66-23334
 Empirical curve of growth on S/I line of
 1-0 hydrogen quadrupole band obtained,
 laboratory and planetary hydrogen
 quadrupole spectra corrected for
 saturation 13 p2184 A66-25621
 Complex transfer admittance in quadrupole
 transistors from Schottky measuring
 principle for transconductance of electron
 tubes 14 p2246 A66-26797
 Theory of analysis and synthesis of
 quadrupoles and two-dimensional networks,
 defining various waves 16 p2654 A66-31025
 Q-factor of nonlinear capacitance
 microwave diodes determined from standing-
 wave ratio and phase difference for two
 bias voltages on diode, using passive linear
 quadrupole 17 p2885 A66-32228
 Equivalent transfer function determined
 for quadrupole inserted between ideal
 modulator and demodulator from frequency
 characteristics 17 p2928 A66-33492
 Electron interaction with quadrupole
 pumping field, noting phase-focusing
 character in quadrupole region and
 determination of amplifier
 effect 19 p3314 A66-35544
 Electric quadrupole transition in fourth
 positive system of CO observed in bands of
 electric dipole allowed
 transition 19 p3404 A66-36800
 Quadrupole relaxation in multilevel
 systems by method of kinetic
 equations 20 p3512 A66-37140
 Statistical properties of amplitude and
 phase of output signal of electron beam
 quadrupole amplifier with superposition of
 regular signal plus Gaussian noise at

input 20 p3519 A66-37997
 Deflection of plasma jet generated by
 coaxial gun and injected along axis of
 quadrupole magnetic field eliminates neutral
 gas, producing complete
 ionization 20 p3610 A66-38058
 Feedback to quadrupole that incorporates
 device for converting voltage into time
 parameter of periodic sequence of pulses
 and vice versa
 /chronotron/ 22 p3877 A66-40414
 QUADRUPOLE LENS
 Aberration of width of linear image
 created by skew rays in composite
 quadrupole lens 02 p0199 A66-11782
 Achromatic electromagnetic quadrupole
 lens functioning for case of slight
 misalignment of fields
 distribution 02 p0199 A66-11783
 Unscanned large area uniform electron
 beams for space /Starfish/ radiation
 environmental studies, using magnetic
 quadrupole pair and beam
 collimation 16 p2676 A66-30443
 Plasma jet motion from coaxial plasma gun
 through magnetic field of quadrupole lens,
 examining interaction of plasma with
 magnetic field 21 p3788 A66-39054
 Scherzer theorem on aperture aberration
 extended to monochromatic nonrelativistic
 system with electrostatic or magnetic
 quadrupole fields with common planes of
 optical symmetry 24 p4239 A66-43215
 QUADRUPOLE NETWORK
 Resonance requirements at pair of primary
 leads for linear nonautonomous quadrupole
 biased in permanent sinusoidal
 mode 03 p0342 A66-12691
 Optimal value of reactance of microwave
 parametric element 08 p1191 A66-18919
 Calculation of reactive quadrupole circuits
 for shape square pulses with finite fronts
 and supply voltage use factor of
 unity 08 p1191 A66-18920
 Text on electron optics covering principles
 and application, electron lenses, cathode ray
 tubes, mass and beta ray spectrographs,
 quadrupole systems, image converters,
 etc 09 p1402 A66-20333
 Feedback amplifier noise characteristics
 based on noisy quadrupole
 theory 11 p1664 A66-22650
 Linear quadrupoles, wave and operating
 parameters, transfer loss and phase
 coefficient for mismatched
 network 11 p1677 A66-23063
 Electron precipitation onto electrodes of
 quadrupole amplifier and resultant
 impairment of output current and
 efficiency 13 p2043 A66-26468
 Build-up oscillations in system of two
 identical parallel-plate capacitors flanking
 quadrupole capacitor in longitudinal
 magnetic field 13 p2044 A66-26469
 Pulse generator consisting of active
 unidirectional nonlinear quadrupole having
 feedback circuit with linear quadrupole
 containing reactive
 elements 14 p2251 A66-27233
 Internal mismatching in four-pole circuits
 and effect on transmission
 properties 16 p2663 A66-31026
 Resonance at two secondary terminals of
 quadrupole network 17 p2903 A66-33422
 QUALITATIVE ANALYSIS
 Qualitative-quantitative analysis of
 solutions of second order ordinary linear
 homogeneous differential equations and two
 derivatives 01 p0093 A66-10403
 Mathematical representation of nonlinear
 nonhysteretic networks by parametric
 approach 05 p0655 A66-14622
 Wettability determination and detection of
 organic contaminants of
 surface 17 p2870 A66-32206

 Numerical control for inspection of machine tools and parts 15 p2506 A66-28790
 Inspection techniques for NASA, discussing control of supplier plants, Quality Requirements for Hand Soldering of Electrical Connections and personnel accountability 15 p2506 A66-28792
 Conceptual model for industrial quality control problem, noting adequacy in satisfying management goals and customer requirements 15 p2506 A66-28793
 Quality system analysis, determining structural soundness, requirements and functional relationship of components 15 p2507 A66-28794
 Structural component reliability analysis for rocket engine propellant tanks, noting variance testing of hemisphere strength for statistical tolerance limits 15 p2507 A66-28795
 Tradeoff for high reliability program, discussing development of satellite equipment for Telescope project 15 p2507 A66-28796
 Component and pyrotechnic production sampling applied to reentry vehicle program, noting technique for selecting size, frequency and quantity of components for testing 15 p2507 A66-28798

Statistical failure detection, employing distribution analysis of parameter changes which removes artificial constraints imposed by arbitrary specification limits 15 p2507 A66-28799
 Part failure detection methods, noting interrelationship between part sampling and reliability, destructive and nondestructive component testing, etc 15 p2507 A66-28800
 Process of troubleshooting analyzed, noting symptom recognition, defect recording and classification remedial action, cause determination, corrective action and follow-up 15 p2507 A66-28801
 Specified product quality through systems quality control program, noting determination of critical parameters, rejection occurrence, process and capability control and preventive maintenance 15 p2507 A66-28802
 Effect of limited quantity and short delivery requirement orders for electronic components in reliability and quality control 15 p2508 A66-28803
 Analysis of means, using decision lines for nonrandom variability of set of means, noting correlation between analysis of means and error variance 15 p2508 A66-28807
 Exceedance theory application to reliability and quality control problems, noting tolerance limit and life test problem solutions 15 p2508 A66-28809
 Calibration ensuring optimal instrument performance, using statistical quality control, noting background of Assured Performance Calibration program 15 p2508 A66-28810
 Role of metrology in design, manufacturing and acceptance testing, evaluating performance characteristics 15 p2508 A66-28811
 Application of escape probability concept to systems development for quality control, noting minimization of system failure 15 p2508 A66-28812
 Nondestructive testing specifications noting equipment, personnel and acceptance criterias, radiographic ultrasonic penetrant and magnetic particle specifications, etc 15 p2508 A66-28814
 Significant environmental criteria and realistic and standard test conditions for microelectronics testing 16 p2659 A66-30451
 Aerospace sterility control officer and group to verify and certify spacecraft sterility 16 p2642 A66-30494
 Contamination control methods used in Royal Swedish Air Force, presenting special particle counting and patch test methods in hydraulic oils 17 p2870 A66-32204
 Flying qualities and aircraft control during tandem rotor helicopter external sling load operations 17 p2846 A66-32742
 Quality assurance of aerospace ordnance and related devices, discussing factors and functions determining performance characteristics 18 p3116 A66-34195
 Zero defects program, discussing principles, operation and results [ASME PAPER 66-MD-26] 21 p3837 A66-38482
 Neutron radiographic techniques to solve nondestructive testing problem of pyrotechnic cartridge inspection 21 p3806 A66-39153
 Nondestructive testing for material evaluation, noting color radiography, ultrasonic imaging, transmission, attenuation, heat transfer and residual stress measurement 21 p3830 A66-39192
 Reliability handbook covering system effectiveness, fatigue life patterns, reliability testing, malfunction and failure analysis, etc 21 p3744 A66-39215
 Optimal control of variable structure system in presence of perturbation, discussing quality control and preservation of sliding plane 21 p3719 A66-39285
 Adhesives and joining processes in mechanical quality control 21 p3745 A66-39465
 Lunar Excursion Module /LEM/ reliability program, discussing engineering, manufacturing and techniques of design and qualification testing of electronic components 21 p3714 A66-39520
 Cleaning techniques for zip gun or hand-held maneuvering unit and environmental

life support system or ventilation control module used for astronaut White walk in space 22 p3886 A66-4003
 Liquid rocket propulsion system weldmen design and quality requirements, noting efficiency parameters 22 p3924 A66-4025
 Specification and assessment of electronic equipment reliability, emphasizing statistical aspects of optimal cost/reliability estimation 22 p3883 A66-4096
 Premature pressure vessel failure prevention in Apollo spacecraft 23 p4072 A66-4112
 Microbonding - Colloquium, Sunbury-on-Thames, Middlesex, England, January 1966 23 p4043 A66-4118
 Weld quality control in cross wire welding of assemblies in circuit small quantity manufacture 23 p4044 A66-4119
 Motorized vertical rotating table used in inspection of small numbers of large turbine engine casings for avoidance of expensive receiver gauges 23 p4072 A66-4120
 Generalized system for project control and evaluation, considering cost, time, performance and reliability 23 p4152 A66-4177
 Reliability prediction, failure rates, fail-safe design and packaging of integrated circuit and MOS-FET microminiaturized electronic equipment 24 p4179 A66-42098

 Quantitative determination of Nb in large amounts of Zr and Ti in large amounts of Nb and Zr at high temperature, using oscillographic polarography 06 p0823 A66-16840
 Quantitative coulometric analyses of water yield for thermal dehydration of solids, using electrolytic hygrometer cell 07 p1036 A66-18490
 Quantitative interpretation of gas chromatograms, discussing separation process and identification of mixture components 08 p1179 A66-19383
 Quantitative detection and washing and pumping methods for removal of traces of water from alkali halides 09 p1339 A66-20874
 Physicochemical quantitative analysis of cometary nucleus-coma buildup relationship, discussing gas liberation, entropy and enthalpy variation, change of state and gross energy balance 17 p3010 A66-33374
 Quantitative multivariate statistical analysis of average evoked potentials and application to visual stimulus intensity and duration 20 p3589 A66-37050
 Semiquantitative spot test detection of peroxide in low concentrations of hydrogen peroxide 20 p3510 A66-37056
 Quantitative analysis of drops of material transferred during arc welding 21 p3743 A66-38938
 Pressure gradient elution technique for rapid and quantitative chromatographic separation of purine and pyrimidine bases 22 p3860 A66-40402
QUANTIZER
 Approximation techniques for determination of optimum uniform or nonuniform quantizer 18 p3068 A66-33904
 Criterion for optimum design of quantizer imbedded in closed loop dynamic system is optimization of overall system performance expressed by variational criterion 19 p3336 A66-36707
QUANTUM AMPLIFIER
 Group velocity measurements in delay systems of quantum paramagnetic amplifiers 09 p1380 A66-20361
 Gain-bandwidth product determined for traveling wave quantum amplifiers with regeneration by partially reflecting mirrors 11 p1711 A66-22727
 Q-factor of active substance of three-level quantum amplifiers with two relaxation times determined with aid of density matrix 11 p1712 A66-22728
 Onset of unstable modes in paramagnetic quantum amplifier in which feedback is due to energy of active particles in resonator or by external pumping 11 p1712 A66-22729

- Q-switched lasers, interaction of high power light pulse with matter and semiconductor lasers pumped with optical radiation and electron beams investigated, using quantum oscillator and amplifier 13 p2099 A66-26180
- Input signal power effect on performance of multiresonator paramagnetic quantum amplifier 18 p3120 A66-34699
- Group velocity measurements in delay systems of quantum paramagnetic amplifiers 19 p3353 A66-35319
- Gain-bandwidth product determined for traveling wave quantum amplifiers with regeneration by partially reflecting mirrors 23 p4078 A66-41465
- Q-factor of active substance of three-level quantum amplifiers with two relaxation times determined with aid of density matrix 23 p4078 A66-41466
- Onset of unstable modes in paramagnetic quantum amplifier in which feedback is due to energy of active particles in resonator or by external pumping 23 p4078 A66-41467
- QUANTUM COUNTER**
- IR quantum counter based on energy transfer between two rare-earth ions in tungstate mixture 15 p2568 A66-29642
- Two-step excitation quantum counter fluorescence in trivalent thulium ion at room temperature 18 p3152 A66-33607
- QUANTUM ELECTRODYNAMICS**
- SA FIELD THEORY**
- Receiver characteristics for visual range location signal due to quantum structure of field 02 p0193 A66-12272
- Quantum statistics for analyzing radiation fields interacting with other systems applied to model laser operating as linear amplifier 03 p0379 A66-13260
- Plasma interaction of rapid movement of object with electrically conducting surface through ionized gas, representing particle motion by Schrodinger equation 06 p0917 A66-16400
- Random model for classical electrodynamics presents properties of quantum electrodynamics as extension of work on harmonic oscillator under magnetic field 06 p0867 A66-17063
- Macroscopic quantum interference effects through superconducting point contacts, with results for several superconductors 07 p1109 A66-18439
- Effective de Broglie wavelength due to drift current in singly connected superconductor 09 p1418 A66-20037
- Coherent behavior of light-quantum field in quantum electrodynamics, noting explicit terms of correlation and characteristic field conditions for nth order coherence 12 p1913 A66-23727
- Receiver characteristics for visual range location signal due to quantum structure of field 12 p1813 A66-23876
- UV absorption and excitation spectrum of ruby and sapphire, noting structure and polarization effects, quantum efficiency, etc 13 p2162 A66-25378
- Coherence properties of quantized electromagnetic field and hierarchy of correlation functions for complex field operators 13 p2128 A66-26218
- Configuration-space photon number operators in quantum optics, discussing photoelectric measurements of field, photon localization in space-time regions, commutator formalisms, etc 15 p2543 A66-28942
- Laser and maser development, discussing design improvements and application for television, space communications, etc 17 p2934 A66-32353
- Quantum oscillation of transverse and longitudinal magnetothermal emf in n-type indium antimonide compared with oscillations of transverse and longitudinal magnetoresistance and Hall coefficient 20 p3618 A66-37557
- General nonequilibrium system in contact with reservoir described via correlation functions of quantized field operators, noting influence of cavity and optical pump 21 p3746 A66-38633
- Gauge transformations of third kind and operator gauge transformations of first and second kinds, relating electron and photon propagators to quantum electrodynamical vertex function 23 p4098 A66-41392
- Inadequacy of Corson variational principle as foundation of classical and quantum dynamics 24 p4237 A66-42406
- Frequency temperature dependence of longitudinal and transverse hypersonic wave absorption coefficients in quartz and artificial ruby crystal 24 p4255 A66-42514
- QUANTUM GENERATOR**
- Balanced mixer action for optical heterodyning, using Magic-T optical mixer 12 p1890 A66-24153
- Semiconductor GaAs quantum generator with two-photon absorption of neodymium laser emission 14 p2307 A66-27187
- Semiclassical theory of quantum generators, examining laser system response to effect of monochromatic standing wave based on kinetic equation for density matrix 16 p2718 A66-30865
- Mode characteristics of solid state lasers from analytical solution of conservative equation 18 p3118 A66-33839
- High frequency-stability EM wave source, applying thermal excitation methods to pencil quantum generator in IR region 21 p3749 A66-39336
- High frequency-stability EM wave source, applying thermal excitation methods to pencil quantum generator in IR region 22 p3929 A66-39706
- GaAs semiconductor quantum generator heating during injection pulse, analyzing temperature effect on external quantum output and generator efficiency 23 p4078 A66-41621
- Semiconductor GaAs quantum generator with two-photon absorption of neodymium laser emission 24 p4226 A66-43085
- QUANTUM MECHANICS**
- SA FUNCTION SPACE**
- SA RELATIVITY THEORY**
- Quantum theoretic probability of trapping inert gas atom on solid surface with linear lattice 01 p0108 A66-10634
- Quantum RF physics text covering magnetic resonance theory, electron paramagnetic resonance, nuclear magnetic resonances, two-and three-level masers, RF gas spectroscopy and ammonia oscillator 01 p0108 A66-10954
- Quantum-mechanical properties derived for isolated donor atom located on surface of dielectric crystal, noting hydrogenic wave function with planar nodes 02 p0271 A66-11484
- Equation for singlet distribution function as quantum-mechanical analog of Boltzmann equation 03 p0391 A66-12340
- Physical fundamentals of lasers such as population inversion, induced emission and principal optical apparatus explained for communications engineers 03 p0379 A66-13233
- Franck-Condon factors to high quantum numbers covering methods, results and tabulation 04 p0548 A66-13830
- Detectability of coherent and incoherent signals, discovering effect of quantum nature of radiation on signal detection at optical frequency 06 p0828 A66-16110
- Partition function of hydrogen plasma derived classically and by quantum mechanics, obtaining Saha equation containing effective lowering of ionization potential 07 p1090 A66-18155
- Text on theory of superfluidity which applies laws of quantum mechanics to macroscopic physics 07 p1082 A66-18483
- Quantum statistical electromagnetic wave propagation and relativistic damping effects in uniformly magnetized electron-positron gas 08 p1187 A66-19809
- Simplification of algebraic formalism of quantum-mechanical perturbation theory 09 p1405 A66-20678
- Thermal emf quantum oscillation and quantization of electron energy spectrum of n-InAs 09 p1429 A66-20768
- Turbulent vortices in quantum and classical fluid and time dependent meniscus depth of water, He I and He II 10 p1525 A66-21965
- Quantum mechanical nonlinear theory of intensity and phase fluctuations of homogeneously broadened laser noise 11 p1711 A66-22466
- Energy minimization for trial wave function constrained to give expectation value of operator 11 p1738 A66-22883
- Quantum optics theorem on classical source for which effect of detector and dissipation mechanism is negligible 11 p1713 A66-22967
- Quantum mechanical formula for low-field Hall effect in density matrix approach, treating this effect in disordered systems 12 p1927 A66-23723
- Stochastic processes in microscale relativistic fluid mechanics, discussing Dirac fluid, Klein-Gordon equation, diffusion, quantum potential, spin fluids, etc 12 p1914 A66-24093
- Brillouin principle, formulated positively to express information amount in terms of physical entropy, applied to information transmission by electromagnetic field using thermodynamics, noting quantum mechanical expressions 12 p1817 A66-24337
- Quantum mechanics and gravitational effect on origin of cosmic particles, discussing Schrodinger wave equation, electric potential and alpha decay 12 p1944 A66-24465
- Current voltage characteristics of dielectric films 13 p2157 A66-25040
- Quantum size effects in thin bismuth film and specific resistance, Hall effect and reactivity 13 p2160 A66-25107
- Constrained variation method in molecular quantum mechanics, presenting wave function, degree of constraint and energy loss values for lithium hydride molecule 13 p2130 A66-25372
- Physics of quantum electronics Conference, San Juan, Puerto Rico, June 1965 13 p2093 A66-26141
- Nonlinear susceptibility describing second harmonic generation of light measured in semiconductors with zinc-blende symmetry, using quantum mechanics and laser wavelength 13 p2168 A66-26149
- Multiple quantum equations for mode amplitude and frequency determination for magnetic field-tuned gas optical maser 13 p2101 A66-26200
- Nonlinear quantum mechanical analysis of laser steady motion, stability under deviations and noise effect on line width and intensity fluctuations 13 p2103 A66-26213
- Classical and quantum mechanical turbulence in Helium 2 heat flow, noting transition from laminar turbulent flow of normal and superfluid component, Reynolds number dependence on mutual friction coupling, etc 13 p2128 A66-26275
- Transport equation for classical unstable electron plasma extended to quantum mechanical multicomponent case, rewriting kinetic equation 13 p2155 A66-26674
- Thermal emf quantum oscillation and quantization of electron energy spectrum of n-InAs 14 p2361 A66-27303
- Quantum mechanics calculation of transmission functions of rotational band of water vapor for 8 spectral regions at 20 to 50 micron wavelengths 14 p2326 A66-27538
- General cosmological problem (GCP) based on unified field theory involving cosmological expansion, oscillation and organic evolution, discussing quadrant mechanics, entropy, ether, minimum time problem, etc 14 p2389 A66-28408
- Electromagnetic form factors of electron and muon neutrinos evaluated, using intermediate vector-boson theory, noting renormalization induced by electromagnetic interactions 15 p2544 A66-28944
- Dynamics of baryon-meson systems in 27-fold representation, obtaining self-consistent bound state and low lying resonant solutions with Balazs method 15 p2544 A66-28945
- Input and output coupling constants of spin-2 mesons with two pseudo-scalar mesons obtained by producing resonances at experimentally observed positions 15 p2544 A66-28947
- Free energy of single and multicomponent plasmas in particle number density determined, using quantum mechanical perturbation expansion of partition function 15 p2552 A66-29617
- Energy from hydrogen molecule interaction with magnetic field and from hyperfine interaction expressed as products of irreducible spherical tensors 15 p2548 A66-29806

Quantum mechanical potential energy curve of lowest normal state of diatomic helium computed in valence bond scheme, using 17-term wave function of Slater orbitals 16 p2749 A66-30112

Pressure dependent energy loss process determined in atomic light analysis of helium positive column, noting molecular-ion concentration relation to 3 D super 3 population 16 p2750 A66-30114

Three quantum decay of super 1S sub zero state positronium determined via measurement of three quantum coincidence events in Al and oxygen with energy sum of 1.02 Mev 16 p2750 A66-30132

Total and differential scattering cross section for slow electron calculation, using nonrelativistic quantum mechanics, shown to be erroneous 16 p2751 A66-30172

Quantum size effects in thin bismuth film and specific resistance, Hall effect and reluctivity 16 p2771 A66-30286

Radiative corrections to Thomson scattering in laser beams arising from damping of electron motion and photon density, using quantum mechanics 16 p2717 A66-30628

Laser cavity output optimization for maximum external quantum efficiency showing dependence on length and reflectivity for given current density 16 p2720 A66-31535

Planck entropy equation and irreversibility of radiation matter interaction for stationary isothermal gas emitting resonance lines of two-level atoms 17 p2957 A66-32044

Quantum mechanical distribution of modes of open resonator by wave functions of continuous spectrum 17 p2885 A66-32245

Normal ordering method of solving boson equations leading to closed solutions of Schrodinger and density operator equations in certain cases only 17 p2945 A66-32293

Moderately long-range relativistic intermolecular forces, obtaining interaction energies 17 p2960 A66-32401

Retarded intermolecular forces, discussing Casimir and Polder retarded dipole-dipole energy of interaction between two ground state atoms in terms of trigonometric integrals 17 p2960 A66-32402

Two-phonon Raman scattering in cubic crystals, noting use of polarization effect to determine active irreducible representations 17 p2981 A66-32818

Disproof of Senitzky fundamental theorem in quantum optics 17 p2936 A66-33094

Quantum effects in elastic scattering of atoms and molecules, noting classical treatment 18 p3138 A66-34458

Solution of Schrodinger equation for quantum mechanical reflection coefficient of electrons at metal semiconductor barriers 19 p3435 A66-35409

Divergence of third-order term in density expansion of quantum-mechanical transport coefficients analogous to that for classical systems 19 p3401 A66-36173

Approximate molecular-field and quantum mechanical methods used to describe temperature dependence of saturation magnetization in ferrites and ferrimagnets 19 p3445 A66-36317

Quantum mechanical calculations for Lennard-Jones potential show dependence of barrier penetration and resonance effects on phase shifts 19 p3404 A66-36798

Pulsed ruby lasers, considering pumping and threshold, output, quantum mechanics and variation on basic device 20 p3575 A66-36968

Vectorial photoelectric effect and quantum efficiency measurement in thin gold films for two light polarizations, using Lallemand electronic camera 20 p3614 A66-37279

Stimulated two quantum radiation in optical range for transitions occurring between discrete levels of impurity crystals or free atoms 20 p3577 A66-37377

First-order density matrix corresponding to nondegenerate eigenstate be N-representable for time-reversal invariant Hamiltonian and quantum-mechanical system of N identical fermions 20 p3606 A66-38290

Beam foil excitation technique application in measuring mean lives of 2p and 3p levels of hydrogen 21 p3774 A66-38543

Quantum statistical approach to interaction

of electromagnetic waves with hot plasma, noting renormalization of Coulomb interaction between charged particles 21 p3776 A66-38545

Covariant gravitational field equations in de Sitter space and quantum mechanical equations of motion associated with particles of given spin, employing gauge principle 21 p3769 A66-38645

Fokker-Planck equation applied to laser under influence of quantum fluctuations connected with dissipation, pumping and cavity thermal noise, noting distribution and correlation function 21 p3746 A66-38930

Photoionization cross sections for N and O atoms and ions in state of excitation, using quantum defect method 21 p3775 A66-39076

Quantum corrections to second virial coefficient for low-temperature gas 21 p3836 A66-39175

Varying excitation intensity effects on edge emissions from pure and doped CdS powder samples, noting electron-hole recombination mechanisms 21 p3802 A66-39202

Turbulent vortices in quantum and classical fluid and time dependent meniscus depth of water, He I and He II 21 p3731 A66-39544

Charge exchange of protons in alkali metal vapors with formation of highly excited hydrogen atoms, noting cross section, reaction mechanism, etc 22 p3953 A66-39762

Bipolar angle averages and two-center two-particle integrals involving separation between two particles 22 p3947 A66-39906

Unified method for evaluation of electron-repulsion integrals for Slater-type orbitals 22 p3949 A66-39912

Conditions under which optimal wave functions satisfy various time-dependent Hellmann-Feynman theorems 22 p3947 A66-39923

Phase shift from scattering by atoms with attractive potentials, predicting virtual energy states for incident energies in three-turning point range 22 p3951 A66-40906

Quantum mechanical picture of additive interrelation between signal and thermal noise, noting energy loss 23 p4035 A66-41049

Quantum mechanics calculation of transmission functions of rotational band of water vapor for eight spectral regions at 20 to 50 micron wavelengths 24 p4234 A66-42324

Photoelectron emission statistics determining probability distribution of photoelectron counts in photomultiplier illuminated by laser below and above threshold of oscillation 24 p4220 A66-42543

Weak and strict solution existence theorem for initial-boundary value problem for nonlinear hyperbolic equation in relativistic quantum mechanics 24 p4237 A66-42829

QUANTUM NUMBER

S ANGULAR MOMENTUM

QUANTUM THEORY

SA FIELD THEORY

SA SCHUMANN-RUNGE BAND SYSTEM

Quantum statistical theory of multicomponent systems applied to fully ionized gas in thermal equilibrium 03 p0398 A66-12605

Quantum scattering theory of hydrogen-like ions in 1-S, 3-S, 1-P and 3-P states 03 p0395 A66-13110

Quantum theory of gravitation with respect to classical theories and Einstein theory 05 p0757 A66-14530

Analogies of statistical electromagnetic wave theory to quantum field theory, noting probability density function of waves and Green function 05 p0632 A66-14843

Atomic and molecular quantum theory - NATO and AEC International Symposium, Sanibel Island, Florida, January 1965 06 p0910 A66-16163

Radiation induced during electron passage through magnetic field can be intensified and made nonrelativistic by superimposed electrostatic field 07 p1044 A66-18261

Signal propagation on infinite lossless transmission line in quantum field terms, finding total Hamiltonian of system 07 p1046 A66-18403

Collision effects taken into account in determining conductivity tensor of quantum plasma in uniform magnetic field 09 p1407 A66-20077

Generalization of Keesom potential to include quantum effects for adiabatic interaction between two rotating dipolar fields 09 p1405 A66-20677

Radiation induced during electron passage through magnetic field can be intensified and made nonrelativistic by superimposed electrostatic field 09 p1387 A66-20905

Quantum theory of interaction of electromagnetic waves in plasma considered in terms of light-light scattering and plasma-laser beam interaction 10 p1558 A66-21173

Second harmonic generation by laser beams of finite spectral width, using quantum transitions and kinetic equations, noting shape of pumping line at fundamental frequency 10 p1544 A66-22026

Decay theory of closely coupled unstable states based on Green function formulation for transition amplitude 11 p1741 A66-23189

Quantum theory for noise in steady state of laser oscillator above threshold, comparing semiclassical and quantized linear theories 13 p2091 A66-25650

Quantum theory of lasers presented in terms of correlation functions of second-quantized electromagnetic and matter fields 13 p2103 A66-26214

Density operator of optical maser quantized by radiation, with application to laser oscillators 13 p2103 A66-26215

Photomagnetically-generated electric field dependence upon magnetic field and semiconductor parameters for particular quantum region 13 p2169 A66-26505

Quantum gravitation theory, discussing difficulties of covariance of general relativity and nonlinearity of Einstein equation 14 p2332 A66-27215

Nonlinear galvanomagnetic effects in n-type InSb in quantum limit, using uncompensated and compensated samples 14 p2366 A66-27762

Impurity scattering in theory of interband magneto-optical effects, noting inadequacy of first-order perturbation treatment and low and high impurity-atom concentration with weak interaction 15 p2558 A66-28610

Quantum theory of laser having only single-mode oscillation and ignoring atomic motion and spatial variations in cavity mode 15 p2515 A66-29117

Text on experimental low temperature physics covering experimental techniques, liquid helium, superconductivity and electronic properties in metals 15 p2566 A66-29320

Formula representing empirical masses of elementary particles, using two quantum numbers 15 p2546 A66-29568

Second harmonic generation by laser beams of finite spectral width, using quantum transitions and kinetic equations, noting shape of pumping line at fundamental frequency 16 p2718 A66-30845

Spin-free derivation of Pauling rules for evaluating matrix elements for spin-free Hamiltonian over anti-symmetric Slater bond functions 16 p2754 A66-30860

P super n electron configuration for systems where spin-free Hamiltonian is applicable 16 p2754 A66-30861

Core integral and electron repulsion integral for 2p-p1 Slater-type orbitals of allyl radical and benzene molecule transformed to Lowdin orthogonalized basis set of atomic orbitals 16 p2754 A66-31185

Quantum theory of electric conductivity of semiconductors with nonstandard band, discussing influence of spin splitting of Landau levels on oscillations of transverse magnetoresistance in n-InSb 17 p2978 A66-32508

External quantum efficiency of tin doped GaAs electroluminescent diode, noting effect of zinc diffusion conditions 19 p3312 A66-35347

Quantum theoretical ferromagnetic behavior of chemical bonds in transition metals and Hartree-Fock calculation of atomic orbitals 19 p3439 A66-35713

Quantum theory of laser model, deriving kinetic equations for radiation and single-particle density matrices, using Bogoliubov expansion procedure 19 p3374 A66-36008

Generalization of Sternheimer potential to include wave functions involving spin in nonfactorable way, exhibiting approximate

Hamiltonian 19 p3405 A66-36803
 Faraday and Voigt and dispersive magneto-
 optic effects in semiconductors in crossed
 field due to energy band
 transitions 21 p3800 A66-38995
 Radiative equilibrium of electron gas in
 magnetic field based on quantized particle
 motion and perturbation
 theory 23 p4101 A66-41365
 Quantum theory of Q-spoiled laser, noting
 statistics of number of photons in mode
 near qualitative resemblance to Poisson
 statistics 23 p4077 A66-41373
 Master equation solved to obtain diagonal
 elements of density matrix for laser light,
 taking into account pumping scheme
 characterizing three-level
 laser 23 p4077 A66-41374
 Stationary effective interaction between
 particles in quantum Vlasov plasma for
 particular model 23 p4104 A66-41509
 Photomagnetically generated electric field
 dependence upon magnetic field and
 semiconductor parameters for particular
 quantum region 24 p4257 A66-42728
QUARK
 Quark detection in cosmic rays noting flux
 dependence on mass, energy loss through
 ionization, production spectrum threshold,
 etc 18 p3225 A66-35231
 Possible presence of relic quarks in cosmic
 rays 19 p3454 A66-36723
 Quark abundance effect on limits of
 anisotropy of universe determined from
 study of radio and quasi-stellar
 objects 22 p3982 A66-40539
 Electron transitions and sharp emission
 lines in XUV solar spectral regions with
 fractionally charged quarks bound to C, N
 and O nuclei 24 p4280 A66-43189
QUARTZ
 X-ray analysis of neutron irradiated quartz
 crystals at various temperatures, showing
 atomic displacements 01 p0124 A66-10772
 Quartz crystals in frequency stabilization at
 present and in future 01 p0045 A66-10991
 Laser excitation in quartz of elastic modes
 of thick plate, suggesting energy coupling
 mechanisms 03 p0376 A66-12423
 Wave propagation in quartz to determine
 third order elastic
 coefficients 10 p1577 A66-21557
 Quartz crystals in frequency stabilization at
 present and in future 01 p1510 A66-21667
 X-ray analysis of neutron irradiated quartz
 crystals at various temperatures, showing
 atomic displacements 11 p1749 A66-22283
 Hot-wire anemometer applications to
 turbulence measurements in conducting
 liquids and vacuum deposition of quartz film
 on coated hot-film probe 12 p1880 A66-23848
 Quartz crystal units and quartz crystal-
 controlled oscillators, discussing vibrator
 characteristics, trapped energy, aging,
 motional modes, etc 12 p1834 A66-24121
 Load capacitance method for measurement
 of quartz crystal
 parameters 12 p1845 A66-24855
 Stimulated Brillouin scattering in quartz
 analyzed, noting amplification, Stokes wave
 generation and ruby gain 13 p2097 A66-26165
 Quartz self-excited oscillator employing
 Hartley oscillator circuit 14 p2259 A66-28163
 Logarithmic decrements of quartz crystal
 driven in torsional vibration mode at
 resonant frequency determined as function
 of temperature in liquid
 helium 15 p2537 A66-28869
 Optical color center bands in amethyst
 quartz containing ferric ions after
 irradiation 16 p2767 A66-30123
 Internal phase modulation in He-Ne laser
 using electro-optic effect in crystal quartz,
 observing spectrum and RF mode
 beats 17 p2934 A66-32621
 Quartz resonators with DT-cut rectangular
 piezoelements 18 p3075 A66-33633
 Frequency standard system using quartz
 servo-oscillators for design and testing of
 high-stability frequency
 sources 18 p3087 A66-34705
 Quartz crystal active filters noting design
 and operation of multitresonator
 filters 19 p3312 A66-35337
 Planar and needle-like defects in natural
 quartz examined via X-ray diffraction,
 noting composition and diffraction contrast
 when observed from different Bragg

planes 19 p3434 A66-35403
 Properties and performance capabilities of
 solid state delay lines composed of materials
 such as quartz, sapphire and YIG having low
 loss acoustic propagation 19 p3319 A66-36032
 EPR detection of dangling bonds at surface
 of silica and quartz, noting inhomogeneous
 expansion 19 p3445 A66-36341
 Ephemeral georotational variations from
 deviations in quartz oscillator clocks of
 Paris and Greenwich
 observatories 19 p3351 A66-36370
 Frequency modulation in quartz oscillators,
 deriving nonlinear distortion and frequency
 deviation factors and analyzing effect of
 destabilizing factors 20 p3516 A66-37383
 X-radiation alignment of quartz crystals for
 generation and detection of reverberating
 acoustic echoes at liquid-helium
 temperatures 20 p3624 A66-38409
 Clear fused quartz thermal parameter
 measurements 21 p3736 A66-38727
 Anisotropic acoustic attenuation measured
 from surface excitation in novel resonant
 cavity configuration, discussing validity in
 quartz and effective viscosity in
 silicon 22 p3866 A66-40407
 Pulse compression using diffraction
 gratings and frequency sweeps of 30 mc in
 quartz crystal ultrasonic
 transducer 23 p4034 A66-41017
 Brillouin scattering spectra of crystalline
 quartz, fused quartz and Pyrex glass, noting
 acoustic modes in crystalline
 spectrum 23 p4114 A66-41628
QUARTZ LIGHT
 Periodic variation of quality factor of He-
 Ne gas laser cavity by vibrating quartz-
 modulation of light beam 04 p0529 A66-13477
 Metal wall ionized argon lasers, discussing
 use of water-cooled quartz discharge
 channels, CW lasers, development of
 satisfactory metal, etc 13 p2091 A66-25555
 Temperature dependence of UV radiation
 absorption coefficient in quartz undergoing
 phase transition for several spectral
 lines 19 p3447 A66-36722
QUARTZ TRANSDUCER
 Linear quartz crystal temperature sensing
 element for digital data
 presentation 02 p0228 A66-11516
 Quartz thermometer measuring
 temperatures automatically and directly on
 digital display, using quartz wafer with
 linear coefficient cut 03 p0367 A66-12373
 Pulse compression by dispersive gratings
 on crystal quartz, describing ultrasonic
 method and wave transformation of
 frequency-swept radar
 pulses 06 p0857 A66-16958
 Control-voltage transducer synthesis with
 variable capacitor compensation of quartz
 resonator frequency-temperature
 characteristics 09 p1354 A66-20451
 Direct piezoelectric coupling to surface
 elastic waves by spatially periodic electrode,
 noting measurements in quartz plate and
 CdS film 10 p1533 A66-21068
 Packaging quartz pressure
 transducers 13 p2084 A66-26565
 Acoustic-array microwave grating quartz
 transducer creates variable delay
 characteristic with
 frequency 18 p3075 A66-33608
 Mechanical-type filters used in electronic
 circuits including quartz filters, piezoelectric
 materials, metallic resonators, ceramic
 converters, torsion resonators and
 miniaturized filters 21 p3717 A66-39628
 Quartz pressure transducers improved by
 integral acceleration-compensation cancelling
 vibration noise, helium bleed isolating
 transducer from severe environments and
 piezotron lowering output
 impedance 24 p4213 A66-42825

QUASI-STEELAR RADIO SOURCE /QSO/
SA RADIO GALAXY
 Gas clouds in dense star clusters compared
 with quasar properties, analyzing possible
 energy sources like supernova explosions,
 stellar collisions and star gas
 interaction 01 p0137 A66-10494
 Einstein gravitational equation applied to
 galaxies and quasars, using spherical model
 with spherically symmetric distribution of

matter 01 p0138 A66-11033
 Scintillation hypothesis giving physical
 characteristics of quasars, determining
 energy output by star
 accretion 01 p0138 A66-11034
 Earth atmosphere effect on determining
 presence of CH molecule in Martian
 atmosphere, origin of quasars and stellar
 thermonuclear reactions 03 p0428 A66-12990
 Radio emission fluxes of CTA 21 and CTA
 102 from August 1964 to February
 1965 05 p0759 A66-14886
 Radio source spectrum, discussing spectral
 indices, electron energy and H II density in
 quasi-stellar and high brightness-
 temperature sources 05 p0762 A66-15279
 Quasi-stellar radio source 3C 279 observed
 with on-off technique, noting antenna
 recorded temperatures to resemble Gaussian
 distribution 05 p0763 A66-15291
 Quasi-stellar radio source 3C 273 observed
 with on-off and dual-beam techniques at
 millimeter wavelength, noting flux
 variation 05 p0764 A66-15292
 Quasi-stellar radio sources 3C 273 and 3C
 279 observed, using on-off and dual-beam
 techniques at 1 mm wavelength, computing
 flux densities 05 p0764 A66-15293
 Six faint radio sources identified with
 quasi-stellar objects, radio positions agreeing
 with optical positions 05 p0764 A66-15294
 Redshift of quasi-stellar radio source MSH
 14-121 determined from lines 5424, 6068 and
 6644 A 05 p0764 A66-15295
 Data compilation on 21 new quasi-stellar
 radio sources including optical
 positions 05 p0764 A66-15296
 Observational results on radio galaxies and
 quasars, noting nonthermal radio spectra
 believed to originate from synchrotron
 emission 05 p0768 A66-15763
 Periodic variations in luminosity of quasi-
 stellar radio sources related to fluctuations
 of main parameters of magnetic-
 bremsstrahlung
 mechanism 07 p1134 A66-17620
 Quasi-stellar radio sources and probing of
 universe, discussing universe model, general
 relativity and Robertson
 solution 07 p1136 A66-17814
 Density of neutral hydrogen in
 intergalactic space, using spectroscopic
 examination of quasi-stellar source 3C
 9 08 p1288 A66-18782
 Redshift of quasi-stellar radio source 3C
 279 08 p1288 A66-18784
 Observed line spectra of nine quasi-stellar
 radio sources representation for single
 temperature, electron density and ionization
 level 09 p1456 A66-20416
 Variations in optical spectrum of quasi-
 stellar radio source 3C
 345 09 p1456 A66-20417
 UV radiation from galaxies, radio sources,
 quasi-stellar objects and Seyfert galaxies,
 examining Lyman alpha
 fluxes 10 p1598 A66-21098
 Cerenkov measurements of high energy
 gamma ray flux from quasi-stellar radio
 sources in mountains near
 Dublin 10 p1599 A66-21105
 Peculiar galaxies and associated radio
 sources and quasars 12 p1947 A66-23659
 Compton process argument for quasar
 relative nearness to our Galaxy and contrast
 between Compton and synchrotron radiation
 scattering effects 12 p1950 A66-24389
 High resolving power interferometric
 observations of angular diameters of
 anomalous high flux density HF radio
 sources 12 p1950 A66-24390
 Electrical discharge theory of cosmic
 atmospheric phenomena, relating lightning,
 novae and quasars 12 p1950 A66-24394
 Time dilatation of luminosity fluctuations
 of massive stellar object, noting red
 shift 13 p2184 A66-25623
 Quasi-stellar radio source declination
 measurements using radio telescope at 6.4
 cm 13 p2186 A66-26049
 Absorption lines of quasi-stellar object 3C
 191 14 p2387 A66-28131
 Local rather than cosmological origin of
 quasars analyzed, noting observational data
 on spectrum of 3C273B, neutral hydrogen
 line, etc 14 p2387 A66-28169
 Origin and structure of quasars, suggesting
 cosmological and local origin, based on

relation between counts of quasars and steady state model of universe 14 p2387 A66-28170

Quasi-stellar radio sources evolution as function of space-time 16 p2799 A66-30591

Quasars creation of matter in steady state expanding universe 16 p2800 A66-30641

Flux density variations in quasi-stellar radio source CTA 102 16 p2807 A66-31755

Magnitudes and redshifts of quasi-stellar objects, supposing objects are cosmological sources in model universe 17 p2995 A66-31909

Quasi-stellar object origin noting spectrum, intensity distance, etc 17 p2995 A66-31910

Flux density of nonthermal radio sources at 8000 mc noting measurement correction, correlation between curvature index spectral index and component separation 17 p2995 A66-31911

Coherent plasma radio wave emission ineffective for quasar, Crab Nebula and supernovae remnants 17 p2996 A66-31913

Large red shifts detected in spectrum of two more quasi-stellar radio sources at Lick Observatory 17 p3003 A66-32659

Quasar 3C-48 radio wave scattering by interplanetary plasma inhomogeneities 17 p3003 A66-32666

Electron scattering interpretation of ionization, emission and absorption line spectra of quasi-stellar object 17 p3004 A66-32928

Cosmic radio source strength, explaining spectral output from substructures of 3C-273 17 p3007 A66-33084

Empirical decision-making techniques, determining nature of quasi-stellar source or galaxy 18 p3234 A66-34616

Red shifts of quasi-stellar objects and relation to radio and optical magnitudes, concluding that red shifts have no relation to distance 18 p3235 A66-34718

Quasi-stellar radio source characteristics, noting methods of identification, emission of high energy particle flux, etc 18 p3176 A66-34751

Flux limits for high energy gamma rays from quasars and other possible cosmic ray sources 18 p3186 A66-34813

Red shift observed in quasi-stellar radio sources due to high gravitational potential 19 p3459 A66-35587

Quasar and giant elliptic galaxy identification 19 p3465 A66-36606

Spectroscopy of radio galaxies and quasi-stellar radio sources showing radio emission production 20 p3645 A66-36960

Dual beam technique and antenna used to observe variations in flux of radio source 3C 273 20 p3650 A66-37344

Cosmic radioastronomy, discussing radio wave emission from quasars, synchrotron effect, hydrogen emission, leptons, gravitational fields, origins of matter and antimatter, etc 20 p3651 A66-37437

Radio astronomy of quasars, discussing galactic radio source identification, luminosity, optic magnitude, gravitational effect, flux density and classification 20 p3651 A66-37438

Irreversible gravitational collapse as consequence of Postulate X and application to quasars 21 p3813 A66-39208

High-energy gamma-ray absorption in photon field between sources and Earth and within radio sources themselves 21 p3809 A66-39210

Doppler effect in quasar red-shifts and theoretical expected number of blue-shifts and red-shifts of ejected sources 21 p3814 A66-39212

Spectral red shift of 14 quasi-stellar radio sources tabulated and confirmed from Lick Observatory position and color measurements 21 p3817 A66-39566

Quasar research, distributions and possible synchrotron mechanism 22 p3979 A66-40376

Inverse Compton scattering effect in quasars, examining assumption that they are at cosmological distances 22 p3980 A66-40399

Quasi-stellar sources as local objects moving with velocities close to speed of light, noting transverse Doppler effect leads to expectation of fewer blue shifts than red shifts 22 p3981 A66-40484

Theoretical model for quasars characterizes them as galactic flares, based on study of

high energy phenomena associated with solar flares 22 p3982 A66-40536

Comparison of log N/log S curve for radio sources with curve of radio galaxies and quasars alone 22 p3982 A66-40538

Quark abundance effect on limits of anisotropy of universe determined from study of radio and quasi-stellar objects 22 p3982 A66-40539

Millimeter wave radio astronomy, discussing solar system, galaxy and extragalactic sources 22 p3983 A66-40732

Result of testing cosmological models with red shift magnitude observations of cluster galaxies and quasi-stellar radio sources 23 p4125 A66-41066

Identification of radio galaxies and quasi-stellar objects between declinations plus 20 and minus 90 degrees 23 p4127 A66-41147

Cosmological evolution from red shifts of quasi-stellar radio sources 23 p4127 A66-41150

Spectral energy distributions of various quasi-stellar radio sources, using photoelectric spectrum 23 p4129 A66-41806

Quasar-stellar radio sources correlated for prediction of Lyman lines relative strengths and optical depth of nebulas beyond Lyman continuum, using simple models 23 p4130 A66-41807

Evidence against steady state model of universe provided by cosmological origin of quasar red shifts 24 p4273 A66-42418

Suggestion that quasar red shifts result from inflow of matter at relativistic velocity in gravitational field of highly condensed white dwarf 24 p4274 A66-42419

Ambiplasma sources of positronium, protonium and muonium radiation, theorizing that quasars may be ambiplasmas containing admixtures of matter and antimatter 24 p4280 A66-43027

S DYADIC

QUENCHING

SA FLAME QUENCHING

Crystal chemistry of nonmetallic materials prepared under moderate or high pressure and recovered and retained under ambient conditions 01 p0090 A66-10292

Superconducting transition temperatures measured for various tin-gallium compositions in quenched and annealed states 02 p0271 A66-11482

Laser digital devices, examining quenching of gain and optical absorption 05 p0693 A66-14826

Large dislocation loops on basal plane and rows of prismatic dislocation loops in quenched magnesium specimens 07 p1052 A66-18513

Yield strength of tungsten at various test temperatures by assessing contribution of certain treatment effects separately from carbon effects 08 p1237 A66-18763

Quenched-in vacancy data estimated by analysis of quenched-in resistivity in zone-refined aluminum 08 p1240 A66-19062

Stationary IR quenching of photocurrent in CdS, discussing recombination channels 09 p1428 A66-20538

Aus-bay quenching, heat treatment process which minimizes distortion and increases tensile strength 10 p1545 A66-21219

Martensite transformation in stainless steel after reversion with quenching 11 p1719 A66-23400

Quenching and slow-cooling effects on ductile-brittle bend-transition temperature of chromium wire 13 p2107 A66-25587

Threshold studies of ion laser oscillations in sulfur and saturation and quenching of laser intensity 13 p2102 A66-26209

Electron beam heating of alloy specimen and liquid-nitrogen cooled anvils for rapidly cooling it 13 p2084 A66-26560

Relation between nonlinear luminescence quenching and concentration of luminescence centers in laser crystal 15 p2515 A66-29204

Selective diffused junction laser, discussing GaAs laser used for quenching experiment 17 p2934 A66-32408

Relation between nonlinear luminescence quenching and concentration of luminescence centers in laser crystal 17 p2936 A66-33053

Microquenched age-formed titanium alloys

and titanium Bi-alloy composites, discussing production process using spherical particles produced by rotating electrode [SAE PAPER 660458] 17 p2940 A66-33161

Quenching and hysteresis effects between Zeeman oscillations on single axial mode observed in near-zero magnetic fields for short planar laser 21 p3747 A66-39113

Quenching of metastable states by atmospheric particles on basis of rocket measurements of dayglow, noting quenching coefficients of oxygen 22 p3916 A66-40871

Variation of resistivity and inversion of sign of conductivity of quenched specimens of p-type silicon 23 p4115 A66-41833

Homogeneous gas phase and surface reactions based on mass transfer mechanism during quenching of oxygen-nitrogen mixtures from high temperatures 24 p4170 A66-42134

Origin and identity of oxide platelets observed in tantalum sheet and ribbon after oxidation and quenching 24 p4228 A66-42618

QUEUE

Stationary queue length Poisson distribution in single channel service system, considering reliability of device 07 p1003 A66-17862

Markov chains with discrete accident intervention forming semi-Markov process, considering application to single-line mass servicing system with queue 12 p1902 A66-23766

Queueing model digital simulation techniques used to determine reliability of stand-by system with maintenance station 12 p1834 A66-24085

SESAC, electronic machine for statistical simulation consisting of stochastic generator, containing no equations or tabulated functions, only random pulse sources and logic networks 23 p4053 A66-41604

Antenna and receiver noise temperature effect on sensitivity of radar system 04 p0486 A66-14122

Antenna construction, RF system, receiver and detector, information bandwidth, target modulation and efficiency points of monopulse and conical scanning system for tracking radars 04 p0487 A66-14130

Instantaneous direction finding system

- Composed of antenna and RF circuits, three-channel receiver and phase detectors 06 p0824 A66-15979
- High-gain narrow-pulse radar antenna with rectangular beam shape in vertical plane, noting design requirements and experimental results 08 p1196 A66-19511
- Radar polarization scattering matrix invariance properties of elliptic and circular polarized antenna 10 p1500 A66-21619
- First order error analysis, radar antenna calibration technique and polarization scattering matrix 10 p1501 A66-21627
- Angular autocorrelation function of circular-aerial radiation pattern 11 p1662 A66-22397
- Multimode antenna feed in radar design requiring only two hybrids for azimuth and elevation measurements 14 p2255 A66-27806
- Gain, impedance and scan angle variation in polarization of phased radar antenna arrays constructed with hybrid-fed crossed dipole radiating elements 15 p2456 A66-28586
- Helicopter rotor blade applied as scanning radar antenna, noting performance during flight tests, feasibility, etc 17 p2875 A66-32727
- Errors in Gemini rendezvous radar interferometer due to antenna ellipticity and coupling of adjacent antennas 17 p2876 A66-33437
- Radiation pattern of ground surveillance radar antenna measured with aid of airborne signal generator 18 p3070 A66-34266
- Experimental antenna with closed loop profile control, noting light sensor application and fast response characteristics 18 p3081 A66-34278
- Target identification by processing outputs from widely spaced elements of large antenna array to form microwave imaging 18 p3071 A66-34308
- Reflector construction for radar and communications antennas, discussing materials, surface configuration and relative costs 18 p3096 A66-34326
- Two-dimensional microwave lenses with large angular field for radar antenna, noting residual aberrations 20 p3527 A66-37427
- Atmospheric thermal radiation in clouds and rainfall causing antenna radio noise, considering long waves due to heterodyning of molecular radiations 20 p3520 A66-38143
- Wide angle side lobe reduction in radar antennas, considering gain, high directivity, target detection and signal interference 22 p3878 A66-40545
- Probability ratio sequential detector for use with mechanically scanned surveillance radars 23 p4045 A66-41323
- RADAR ASTRONOMY**
- Lunite model based on astronomical and radar data of radio wave reflectance from lunar surface, showing dependence of reflection coefficient on wavelength 01 p0135 A66-10274
- Radar astronomy investigations of Venus, Mars, Jupiter, Mercury and Moon, discussing surface and rotational characteristics to establish astronomical unit 04 p0578 A66-13963
- Radar astronomy, fundamental concepts and equations, measuring techniques and results from planetary and lunar radar experiments 06 p0953 A66-16364
- Muhleman radar scattering law indicates that surface of Mercury is similar to Moon in roughness 09 p1452 A66-20121
- Retrograde rotation of Venus established by radar observations is attributed to collision with 200-km diam asteroid 09 p1452 A66-20122
- Soviet radar observations of Venus in 1964 using frequency-shift keying and periodic linear FM of transmitter 09 p1452 A66-20123
- Recursive estimation of radar or radio astronomy target parameters, considering functional dependence of covariance function of received signals 10 p1505 A66-21841
- Submillimeter and millimeter radar and LIDAR astronomy contribution to solar system communications, and planetary and lunar surface studies 15 p2595 A66-29002
- Geocentric velocity of Leonids measured via meteor radar equipment 17 p3000 A66-32339
- Radar observation of Mars, noting mean reflection coefficient for signals returned by near center disk sections 22 p3985 A66-40955
- Orbit calculation of 12,500 meteors in Earth vicinity based on radar observations of radiants and velocities 22 p3985 A66-40957
- Radar astronomy methods permit determination of range from echo delay, rotation rate from dispersion of echo and surface dielectric constant from reflectivity measurements 24 p4280 A66-43198
- RADAR ATTENUATION**
- Radar interference and attenuation in rocket exhausts, noting effect of altitude and tests at microwave bands 02 p0278 A66-11514
- Plasma due to high-altitude nuclear explosion and effect on radar propagation 14 p2237 A66-27510
- RADAR BEACON**
- Radar for tracking satellites and space vehicle, considering transponder beacons and comparing pulsed and CW systems 04 p0487 A66-14131
- Angular discrimination improvement in radar beacon systems using null-type antenna superposed on normal directional beam 17 p2872 A66-31957
- RADAR BEAM**
- Adaptive coupler providing extended automatic glide slope beam following by compensating for beam convergence 01 p0101 A66-10036
- Blake procedure effectiveness and applicability in computing beam loss of radars, extrapolating for rapid-scan systems 06 p0832 A66-16452
- Microwave attenuation characteristics of rocket exhaust, examining effects of propellant composition, motor configuration and missile trajectory [AIAA PAPER 65-181] 12 p1820 A66-24689
- Radiolocation theory compared with communication theory, noting trading of frequency bandwidth of radar signal for error suppression 15 p2535 A66-29860
- Radar beam trajectory as function of refractive index lapse rate on basis of Fermat principle, assuming isotropic atmosphere with homogeneous stratification 18 p3130 A66-34719
- RADAR CLUTTER MAP**
- Clutter rejection in radar systems using mismatched filter when Gaussian noise is present, giving results for decaying RF signal and rectangular RF pulse 06 p0828 A66-16137
- RADAR CROSS SECTION**
- Model measurement of radar cross section of target with complex outline by use of ultrasonic waves 02 p0189 A66-11366
- CW-equivalent radar cross section measurements of reflectivity of body by short pulses 03 p0332 A66-12429
- Lincoln sphere for radar calibration, noting measurements before and after launching 03 p0430 A66-12449
- Basic radar equation, giving geometrical relationship between radar antenna and target based on antenna gain, aperture and target cross section 04 p0484 A66-14107
- Radar target of fixed geometry and statistical models 04 p0487 A66-14128
- Enhancement of radar cross section of cylinder by impedance loading, with determination of optimum impedance 05 p0631 A66-14636
- Minimization of radar cross section of thin cylinder by central loading, calculating backscatter field 05 p0632 A66-14842
- Radar backscatter cross section from turbulent wakes 05 p0635 A66-15797
- Electromagnetic scattering by finite dense plasma sphere, discussing effects of surface wave, absorption and inhomogeneity 07 p1091 A66-18409
- Electromagnetic wave scattering by satellite caused by ionized coating, noting effect on echo 08 p1182 A66-18754
- Lunar radar scattering behavior indicates wide range of structure sizes on Moon 09 p1452 A66-20124
- Total radar cross section of Moon has much larger value in decimeter region than at shorter wavelengths 09 p1452 A66-20125
- Radar scattering maps of Moon created by delay-frequency analysis of lunar radar echo 09 p1452 A66-20126
- Rayleigh region in terms of radius of convergence of Rayleigh or LF expansion 09 p1348 A66-20961
- Radar scattering, discussing cross section characteristics, quasi-optical approximation, boundary value solutions, etc 10 p1497 A66-21588
- Matrix formulation determination radar cross section arising when smooth conducting obstacle is illuminated by incident electromagnetic wave 10 p1497 A66-21590
- Analytical techniques for estimating backscattering cross section of metal spherical target 10 p1497 A66-21593
- Radar cross section methods for estimation of simple shapes, examining complete spectrum of body dimension to wavelength ratios 10 p1497 A66-21594
- Geometric diffraction theory to predict radar cross section of cones and disks 10 p1498 A66-21597
- Superposition and geometrical optics techniques for approximations of radar cross section of nonconducting bodies 10 p1498 A66-21598
- Radar cross section measurement, principles and techniques 10 p1498 A66-21600
- Range requirements in radar cross section measurements in terms of permissible variations in amplitude and phase of incident field at target 10 p1498 A66-21601
- Radar cross sections of full-sized targets in flight measured by dynamic system at L, S and X bands 10 p1499 A66-21605
- Nanosecond pulse, FM/CW and frequency stepping methods for measuring radar cross section and effects of using wide bandwidth transmission 10 p1499 A66-21606
- Radar cross section estimation methods of complex shapes, emphasizing cumulative distribution 10 p1499 A66-21607
- Bistatic scattering and derivation of bistatic RCS from monostatic RCS measurements for small angles 10 p1499 A66-21608
- Scattering matrix use to determine radar reflectivity independently from polarization, target range and rotation about line of sight 10 p1499 A66-21609
- Electromagnetic theory to determine nose-on radar cross section of perfectly conducting finite cone 10 p1500 A66-21615
- Born approximation applied to electromagnetic scattering from finite cone to determine radar cross section 10 p1500 A66-21616
- Extended physical optics methods for calculating nose-on echo area of axisymmetric thin bodies having sharp apices 10 p1500 A66-21617
- High resolution X-band FM/CW radar for radar cross section measurements 10 p1500 A66-21620
- High data rate radar cross section measurement system for high angular precision and direct digital recording on magnetic tape 10 p1501 A66-21621
- Frequency-stepping system for obtaining frequency-averaged radar cross section data and high range resolution data implemented in X-band 10 p1501 A66-21622
- Anechoic chamber design for higher measurement accuracies for radar cross section and antenna parameters 10 p1501 A66-21623
- Comparison of radar cross sections of single object, using different facilities 10 p1501 A66-21629
- Comparison of microwave scaling method and optical simulation technique for obtaining radar cross sections 10 p1502 A66-21630
- Dielectric constant of lossy dielectric sphere determined by utilizing C band radar cross section measurement 10 p1502 A66-21632
- Radar scattering matrix measurements, predicting radar cross section of body for arbitrary polarization 10 p1502 A66-21639
- Spherical radar reflectors with high-gain omnidirectional response, noting structure, efficiency and achievement of isotropic response 10 p1503 A66-21642
- Variational method of computing radar scattering cross sections to bistatic scattering cross section for chaff dipoles 10 p1503 A66-21643
- Radar cross section of metal bodies

covered by thin plasma calculated, using computer technique, noting modification of TE and TM mode reflection coefficients 10 p1503 A66-21645

Radar cross section of flat base dielectric cones, noting parameters such as cone angle, size, wavelength, etc 10 p1503 A66-21646

Radar cross sections of ducks and chickens at vertical polarization and 400 mc 10 p1503 A66-21647

Standard system for radar cross section error determination, noting calibration techniques, background level reduction methods, etc 10 p1504 A66-21660

Radar cross polarization measurements for target surface property determination, noting application to lunar studies 12 p1819 A66-24603

Radar cross section of Earth surfaces as affected by wavelength, with reference to probing lunar surfaces 15 p2448 A66-28572

Radar partial coherence theory for clutter construction relationship to radar cross section, waveform coding, output signal, mutual coherence function and random noise 23 p4037 A66-41312

Radar scattering equations for transmitting and receiving circularly polarized waves in terms of characteristics for linear polarization 24 p4171 A66-42374

RADAR DATA

Digital data handling method for air traffic control system employing plan position indicators and video correlator for radar video signal analysis 11 p1732 A66-22899

Orbit measurements by radar with random error and radar with random and bias errors [AIAA PAPER 65-31] 14 p2381 A66-27420

RADAR DETECTOR

Statistical performance of energy and heterodyne detection techniques in pulsed-optical radar compared for target detection capability 02 p0240 A66-11456

Regional control radar on Bertagne peak near Marseille operates on L band with peak power of 2 mw and acts as advanced antenna for VHF-UHF air-to-ground communication 03 p0353 A66-13024

Radar target detection analysis in presence of thermal noise 04 p0487 A66-14129

Single-pulse detection probability data for system with instantaneous automatic gain control and 5/1 bandwidth ratio obtained by Monte Carlo simulation 06 p0841 A66-15957

Multichannel radar detection of nonmoving target with variable resolving power 06 p0836 A66-17179

Atmospheric turbulence, power fluctuation and radar detection in laser systems design 07 p1041 A66-17294

Comparison of detection and resolution performance of multiplicative and additive aerial array in presence of noise 08 p1193 A66-19119

Radar detection of sailplanes and other small aircraft aided by aluminum reflecting surfaces 09 p1345 A66-20479

Buffer storage in digital radar smoothing irregular output data flow, noting decreasing bandwidth requirements 11 p1654 A66-22656

Multichannel radar detection of nonmoving target with variable resolving power 19 p3297 A66-35537

Probability of recurrent event defined over t-state r-th-order Markov chain, specifically probability of events in Bernoulli sequence 21 p3757 A66-39103

Chirp-radar pulse compression by proton-spin echoes, noting leakage and attenuation 22 p3861 A66-39721

Turbulent refractivity spectrum and optimization of airborne radar CAT detectors 22 p3944 A66-40429

Detection performance for typical cases of multiplicative radar signal processing used for nonfading and Rayleigh-fading signal amplitudes 23 p4041 A66-41702

RADAR DIRECTION FINDER

Radar localization deviations, examining infinitely-long conducting cylindrical obstacles 04 p0488 A66-14413

Spaceflight radio navigation, detailing position finding methods, active and passive radar control and interferometer control 18 p1133 A66-35241

RADAR DISPLAY

Gemini rendezvous radar using interferometric angle measuring system,

digital range data readout, analog range display and target vehicle command link 09 p1346 A66-20583

Near-real time acquisition of aerial reconnaissance radar imagery from continuously moving and static displays 12 p1808 A66-23921

Feasibility of monopulse radar used for airborne pictorial radar display as aid to low approach aircraft landing 17 p2950 A66-31964

SRT daylight radar display system for air traffic control 17 p2950 A66-32355

Radar displays of true and relative motion to ensure collision avoidance by ships in restricted visibility 21 p3761 A66-38455

RADAR ECHO

SA VENUS RADAR REFLECTION

Ionospheric irregularities and drift parameters deduced from fading records of second-order echoes of radiowave reflected vertically from ionosphere 01 p0022 A66-10160

Variation of radio echo in different types of clouds allows identification from vertical variations in radar reflectivity 02 p0252 A66-11267

Polar aurorae as radar targets and calculation of ionospheric-tropospheric conditions for interpretation of radio observation results 02 p0189 A66-11343

Radar echoes explained in terms of backscatter from field-aligned irregularities in F region 03 p0334 A66-12679

Automatic evaluation of echo signals from circular-scan radar using learning system 04 p0543 A66-13497

New aspect function applied to radar signal return from ground approximates measured data more accurately than any other aspect function 06 p0826 A66-16031

Geometrical approach to investigate airflow toward and within updraft of severe storm cell [AFCRL-SR-32-65] 07 p1061 A66-17368

Initiation of precipitation in vigorous convective clouds traced to cluster of three shower cells which produce radar echo close to -30 C level [AFCRL-SR-32-65] 07 p1062 A66-17369

Time interval distribution of Perseld radar meteors 07 p1134 A66-17523

Reduction of signal power in X-band CW aircraft radar echo 08 p1181 A66-18718

HF radar search for effects of Earth satellites upon ionosphere, discussing reflection, perturbation and anomalies within F layer 08 p1213 A66-18751

Radar echo effects of satellite disturbance in plasma medium, noting electron and positive ion density distribution 08 p1302 A66-18755

Ionospherically reflected backscattered radar pulse structure analyzed, using simplified geometry 09 p1341 A66-19867

Multifrequency radar as remote sensor for exploration of Earth and Moon surfaces, examining variation of backscattering with change in wavelength 09 p1341 A66-19868

Relationship between geometric optic and autocorrelation approach to lunar and planetary radar echoes for Gaussian autocorrelation function 09 p1341 A66-19870

Preliminary results of radar observations of Mars 09 p1451 A66-20118

Radar reflection experiment to verify general relativity theory 09 p1403 A66-20686

Test of general relativity based on influence of solar gravity on echo times of radar waves reflected from planets 09 p1403 A66-20687

Radar echoes and microwave and radio emissions from Moon and planets 10 p1601 A66-21063

Scattering matrix used to determine radar reflectivity independently from polarization, target range and rotation about line of sight 10 p1499 A66-21609

Scattering range which measures reflection properties of objects by inserting them into transmission line 10 p1501 A66-21624

Preferred thunderstorm development near surface boundary between maritime tropical air masses and dry air masses, defining radar echo areas 11 p1731 A66-23382

Ionization structure of polar auroras from spatial distribution of radar-reflecting zones, taking into account magnetic field variations 12 p1871 A66-24293

Coherent memory filter for real time spectral analysis of Doppler radar echoes single circuit coherent integrator 13 p2039 A66-2571

Pulse train waveforms minimizing suppression of small echoes by large overlapping echoes with identical dissimilar Doppler shifts when processed by radar receivers which limit on received signal 14 p2235 A66-2706

Electrical and physical characteristics and distribution density of aerosols in determining microwave scattering and reflection properties in connection with radar angles 14 p2237 A66-2733

Ground clutter shields for L-band radar using 60-ft parabolic reflector with Cassegrain geometry 15 p2457 A66-2855

Radar refractivity fluctuations and wavelength dependence of reflectivity in clear air turbulence regions 15 p2532 A66-2892

Radar echoes of clear-air dot angle type observed in Texas 17 p2874 A66-3238

Radar echo range distribution determined from meteor stream measurements 17 p3004 A66-3296

Radar return from perfectly reflecting target in presence of second medium obtaining first approximation for return an accounting for multiple reflections and dispersion 17 p2876 A66-3310

End-fire radar echo of long thin body minimized by impedance loading technique 18 p3065 A66-3353

Correlation of peak occurrence of HF radar echoes and high-latitude spread measurements near time of local sunset 18 p3107 A66-3452

Meteor radar statistics with tabulation of mean daily values of meteor flux for three categories of meteor echoes from 1958 to 1962 20 p3653 A66-3762

Radar detection probability in presence of unknown parameters, covering pulse-to-pulse, partial and fully coherent cases 21 p3707 A66-3963

Dispersive device for pulse compression radar, discussing effect of signal departure from desired linear characteristics 23 p4033 A66-4101

Adjustable time domain equalizer for reduction of distortion caused by paired echoes in pulse compression radar system 23 p4034 A66-4102

Auroral radar echo wavelength dependence determined by two-frequency radar at Homer, Alaska 24 p4172 A66-42593

Clutter shield for L-band monopulse radar employing Cassegrain parabolic reflector 24 p4173 A66-42620

Stochastic process explaining statistical properties of radar echo patterns 24 p4175 A66-42987

Computer program for calculating average lengths of weather radar echoes and pattern bandedness from exponential function approximations to pattern autocorrelation coefficients 24 p4234 A66-42988

Air motion probe via Doppler radar, noting calculation of speed, direction and application to wind variance analysis 24 p4234 A66-42989

Velocity characteristics of clear-air dot angle echoes determined via Doppler radar measurements 24 p4234 A66-42990

RADAR EQUIPMENT

Open periodic structures applied as high power limited passband loss filter in microwave radar and communications transmitters 01 p0044 A66-10935

Laser application problems in interferometry, radar and holography including mechanical stability, noise suppression, dirty laser beam restoration etc 02 p0240 A66-11454

Development in U.S. of laser application with table including government supported programs in photography, data processing radar, etc 02 p0240 A66-11455

Calibration of ARIS /Advanced Range Instrumentation Ships/ radars for cross section measurements 04 p0479 A66-13611

Fault location in modern airborne radar discussing maintenance reduction techniques and reliability improvement 07 p1006 A66-17491

Doppler equipment including planar-array

antennas, varactor-multiplier sources, etc, evaluated for third generation Decca series 07 p1068 A66-17703

Small low power drain microwave triode cavities as pulsed transmitters and local oscillators for man-portable radar equipment 07 p1011 A66-18268

Data on Northern Hemisphere radio aurora obtained on radar located in England, showing delay in onset of auroral echoes following sudden commencement, depending on local time of SC 11 p1695 A66-22375

Phase shifter for large phased array radar, operation and performance 13 p2037 A66-25548

Reliability demonstration, discussing tests on antipersonnel radar system, selective identification set, quick reaction capability radar, etc 13 p2086 A66-25663

Specifications and component parts of 20-kw meteor trail detection and observation radar equipment 16 p2654 A66-31004

Satellite orbiting via radio command guidance, discussing results with communications and weather satellites, guidance system used, control methods, etc 18 p3131 A66-33848

Microelectronic airborne radar equipment operating in ground mapping, terrain avoidance and air to ground ranging, noting design, packaging, etc 19 p3313 A66-35519

Packaging technique for producing rendezvous radar and transponder noting structural design, reliability, cooling, outgassing, humidity, etc 21 p3715 A66-39527

Exact sample size probability distributions for biased square law sequential detector with signal absent 24 p4173 A66-42637

U.S. strategic missile and air defense, noting Nike-X system 24 p4297 A66-42950

RADAR FILTER

Increasing detectability of signal in noise or in other interference, noting effect and functions of radar filter, antenna scanning, pulse to pulse IF and video spectrum 04 p0486 A66-14124

Radar imperfections and pulse time error on single-delay, double-delay and higher order moving target indication radar filters 04 p0500 A66-14125

Sweep indicator as radar feedback filter, noting double delay 04 p0501 A66-14126

Filter techniques for high-speed diode switches designed to suppress troublesome switching transients 06 p0842 A66-15974

Clutter rejection in radar systems using mismatched filter when Gaussian noise is present, giving results for decaying RF signal and rectangular RF pulse 06 p0828 A66-16137

Reduction of high residual time sidelobes for phase-coded pulse compression radar systems and technique for increasing ratio of peak to residual amplitudes 06 p0833 A66-16666

Pulse compression by dispersive gratings on crystal quartz, describing ultrasonic method and wave transformation of frequency-swept radar pulses 06 p0857 A66-16958

Logarithmic amplifier with pulse-length discrimination followed by high-pass filter for reducing adverse effects of distributed clutter in radar receivers 08 p1180 A66-18712

Matched filter for frequency modulated continuous wave radar signal processing system 11 p1669 A66-23110

Performance characteristics of microminiaturized MTI system, using range-gated filter /RGF/ for surveillance radars 12 p1819 A66-24604

Coherent memory filter for real time spectral analysis of Doppler radar echoes is single circuit coherent 13 p2039 A66-25782

RADAR INSTRUMENTATION

Gemini spacecraft rendezvous radar device noting angle measurements, astronaut display, command link and design problems 01 p0105 A66-10869

Instrumentation monopulse tracking radar AN/FPQ-10 using mainly solid state components at Pacific Missile Range 04 p0480 A66-13629

Radar, telecommunication devices, antiraid equipment and computers for air defense

system 04 p0494 A66-13693

Radar systems with rotating optical disks, describing optical correlation techniques 06 p0834 A66-16729

Imaging and altimeter-type radar employed in orbiting spacecraft for high resolution mapping, scattering cross section studies, climatology, etc 10 p1532 A66-21521

RADAR MAP

Video maps for air traffic control by associating radar picture with geographic features noting mechanical, optical and electronic components 01 p0022 A66-10486

Design details of video mapping equipment including distortion causes and correction measures 01 p0022 A66-10493

Ground based self-phasing and nonrigid airborne arrays for aerial mapping and navigation 08 p1252 A66-19510

Cross correlation radar system for mapping of target distribution 12 p1813 A66-23789

Radar maps of Moon and planets using bistatic continuous wave mode of radar operation between orbiting spacecraft and ground station 12 p1825 A66-24891

RADAR MEASUREMENT

Measuring Meteor 1 rocket flight parameters from ground using phototheodolites and astronomical and optical-acoustic methods 01 p0031 A66-11067

Radar measurement for rotation period of planet Mercury 03 p0426 A66-12891

Improved determination of astronomical unit as result of radar measurements of Venus 03 p0429 A66-13114

Wind velocity measurement by dual beam pattern modification to conventional /non-Doppler/ radars 04 p0541 A66-13669

Ionospheric F region electron density and electron and ion temperatures measured by ground-based radar 05 p0670 A66-14950

backscatter 05 p0670 A66-14950

Distance-and velocity-measurement errors in coherent-pulse systems with periodic modulation law 06 p0837 A66-17180

Combined Faraday polarization and Doppler frequency measurements of lunar radar echoes of Earth magnetospheric wake 08 p1296 A66-19401

Nanosecond pulse, FM/CW and frequency stepping methods for measuring radar cross section and effects of using wide bandwidth transmission 10 p1499 A66-21606

Lincoln radar calibration sphere ejected from Titan III-A transtage to calibrate all but large-scale radar installations 11 p1777 A66-22875

Clear air turbulence research methods, noting structural analysis, computer application, satellite photography, etc 15 p2532 A66-28921

Measurement of distance to Moon by optical radar, discussing ruby laser/photomultiplier apparatus and procedure 16 p2647 A66-30291

Interplanetary plasma stream analysis using bistatic radar transmissions, considering wave propagation in presence of uniform magnetic field, stream velocity, Faraday rotation, etc 16 p2801 A66-30716

Height finding technique using phase-in-space principle for radar system with single antenna and feed 17 p2872 A66-31960

Density fluctuation effect on radar determination of total electron content in terms of recent cislunar density measurement 17 p2917 A66-32520

Distance-and velocity-measurement errors in coherent-pulse systems with periodic modulation law 19 p3297 A66-35538

Interplanetary plasma stream velocities measured by bistatic radar transmissions from Earth to spacecraft, considering presence of uniform interplanetary magnetic field 20 p3648 A66-37214

Ionospheric ionic composition and temperatures as function of altitude in radar spectrographic estimates 22 p3910 A66-39981

Radar measurements of wind regime of meteor zone made by means of pulse-coherent method 22 p3914 A66-40763

RADAR NAVIGATION

Doppler radar for aerial navigation noting decoupling of transmitter from receiver, velocity measurement within frequency spectrum, etc 02 p0256 A66-11896

Doppler radar performance in air navigation noting calibration error, dispersion, hole-altitude phenomena, etc 02 p0256 A66-11897

Doppler radar systems design, operating principles and performance characteristics 03 p0389 A66-12468

Project Accordion data to provide information for decisions on horizontal separation standards and navigational accuracy 07 p1076 A66-17790

RADAR OBSERVATION

Effectiveness and reliability of radar observation of clouds in absence of precipitation 02 p0252 A66-11264

Comparison of simultaneous radar and aircraft observation of upper boundary of clouds 02 p0252 A66-11265

Radar network observation for obtaining accurate meteorological data for synoptic analysis 02 p0252 A66-11269

Radar observation of individual radiants and meteoric velocities, noting two types of orbit for small meteoric bodies in solar system 04 p0577 A66-13880

Radar backscattering for tenuous surface layer on Moon 04 p0577 A66-13895

Photographic and radar observations of meteors, discussing pulse coherent techniques for studying ionospheric drifts and winds 05 p0761 A66-15227

Radar observations of Mars, discussing surface reflecting properties 06 p0954 A66-16731

Planet Mercury rotation theory, applying motion of rigid system in inverse square field 06 p0955 A66-16732

Physical theory for behavior of velocity of meteor encountering atmospheric drag 08 p1296 A66-19400

Microwave radar observations of Venus, discussing surface thermometric temperatures, greenhouse effect, etc 09 p1451 A66-20113

Radar observations of Mercury, Venus, Mars and Jupiter surfaces 09 p1451 A66-20116

Arecibo observations of Mars and Jupiter 09 p1451 A66-20120

Radio reflectivity measurements have provided more data on lunar surface than radar observation 09 p1452 A66-20128

Radar transmission systems, observation techniques, ionospheric and tropospheric effects and meteoric radio reflection applied to satellite communications 09 p1345 A66-20541

Radar hook observed with 21-decibel gain reduction in Kansas-Oklahoma thunderstorm 09 p1400 A66-20732

Range height indicator radar observation of bright band, radar reflectivity and dissipating stage of convective precipitation cells 11 p1730 A66-23099

Text on radar observations using compound signals, comparing Woodward ambiguity function with uncertainty principle for accuracy and resolution of range and velocity measurements 12 p1815 A66-24055

Pulse radar observation of Moon and four nearest planets, determining values of round-trip-delay and Doppler shift for application to orbital ephemerides 13 p2181 A66-25535

Radar observation of Mars using only spectral analysis of echoes 13 p2181 A66-25536

Radar observation of Sun, noting continuous wave transmitter, antenna, etc 13 p2022 A66-25537

Atmospheric observation with advanced light radar, noting equipment characteristics, molecular scattering mechanism, etc 13 p2122 A66-26133

Radar observation of individual radiants and meteoric velocities, noting two types of orbit for small meteoric bodies in solar system 14 p2382 A66-27570

Radar studies of Venus, noting values for rotation vector, latitudes and longitudes of several features and Earth influence on Venus rotation 15 p2602 A66-29955

Lunar surface radar observation techniques and results on dielectric constant of surface material, surface undulations, reflectivity, roughness, etc 19 p3458 A66-35449

Mercury rotational period as consequence of solar torques and equatorial asymmetry,

based on radar data and model developing superharmonic resonance 20 p3650 A66-37337
 Electron density and electron and ion temperatures in F region studied by ground-based radar observations at Millstone Hill 22 p3909 A66-39976
 WSR radar four-year climatology of thunderstorm penetrations of tropopause at ten locations in U.S. 22 p3944 A66-40430
 Spatial distribution of auroral radio signal reflection centers based on radar observations 22 p3915 A66-40777
 Orbit calculation of 12,500 meteors in Earth vicinity based on radar observations of radiants and velocities 22 p3985 A66-40957
 Correlation of like and cross polarized side-looking radar images with geologic features for terrain discrimination 24 p4173 A66-42634

RADAR PHOTOGRAPHY

Radar image edges sharpness relationship to relative humidity near ground 17 p2948 A66-32270
 Geologic evaluation of simultaneously produced like-and cross-polarized radar imagery 19 p3351 A66-36390

RADAR RANGE

Linear homodyne mixer used to eliminate interference and extract range information in CW radars 06 p0833 A66-16644
 Variance of parameter defined by product of powers of several independent random variables estimated in target cross section given by radar range 06 p0833 A66-16655
 Information matrices for estimating range parameters of moving targets obtained by combining a priori information with reflected radar signals with additive white Gaussian noise 08 p1180 A66-18711
 Spectrum and range spectrum analysis of Venus radar echoes obtained from experiments 09 p1451 A66-20117
 Radar range with discretely located passive reflectors for obtaining full scale bistatic radar cross section measurement 10 p1501 A66-21625
 Orientation and construction of high efficiency passive radar targets, noting range and performance for trihedral and octahedral shape 10 p1503 A66-21641
 Radar range measurement accuracy shown to depend on receiver filter 13 p2023 A66-25666
 Frequency agility theory and application for improved radar, range and angle detection 16 p2655 A66-31649
 Monopulse radar air-to-surface slant range measurement 17 p2872 A66-31958
 Radar range accuracy, deriving expression for time domain calculation of accuracy degradation due to nonoptimum filtering 23 p4037 A66-41321

RADAR RECEIVER

Digital IF amplifier for thin film radar receiver 02 p0202 A66-11917
 Antenna and receiver noise temperature effect on sensitivity of radar 04 p0486 A66-14122
 Digital detector for automatic radar target identification, noting design, construction and operation 11 p1654 A66-22655
 Pulse train waveforms minimizing suppression of small echoes by large overlapping echoes with identical or dissimilar Doppler shifts when processed by radar receivers which limit on received signal 14 p2235 A66-27060
 Low residue ambiguity function, using incoherently processed pulse train waveforms for application in clutter environment 18 p3070 A66-34260
 Parametric amplifier based on two-port circuit, employing idler frequency equal to difference between pump and signal frequency, noting negative resistance 18 p3086 A66-34391
 Lunar Excursion Module rendezvous radar and transponder receivers 21 p3715 A66-39526

RADAR RECEPTION

Range, sensitivity and accuracy of meteorological radar improved by use of storage device 02 p0252 A66-11271
 Posterior probability density of parameters of signals modulated by Gaussian random processes, noting radar signals 04 p0502 A66-13700

Time domain and frequency domain analysis of linear time invariant systems applied to radar return signal analysis 04 p0506 A66-14108
 Statistical methods used in estimation of target parameters on basis of signal transmitted radar pulse 04 p0485 A66-14114
 Posterior probability density of parameters of signals modulated by Gaussian random processes, noting radar signals 15 p2469 A66-28541

RADAR REFLECTOR

Bibliography of articles on radar reflectivity and related subjects, 1957-1964 10 p1500 A66-21614
 Spherical radar reflectors with high-gain omnidirectional response, noting structure, efficiency and achievement of isotropic response 10 p1503 A66-21642
 Zonal reflectors creating fan-type radiation patterns possess structural parameters and electrical characteristics for use as high directional antennas 14 p2252 A66-27247

RADAR RESOLUTION

Radar-pulse correlation system for discriminating between close targets at long range 02 p0191 A66-11801
 Signal design criteria, examining range resolution and velocity resolution of radars 04 p0486 A66-14116
 Multichannel radar detection of nonmoving target with variable resolving power 06 p0836 A66-17179
 Optimal processing time of signal in side-scanning radar in presence of phase fluctuation 08 p1183 A66-19111
 Measured reflectivity and resolution of radar antenna for distributed atmospheric targets 08 p1248 A66-19387
 High resolution radar correlometer measurement of spatial correlation radius of RF radiation scattered by disturbed ocean surface 09 p1343 A66-20340
 Radar separation of closely spaced aircraft by fire-control weapon system 10 p1553 A66-21268
 Optimization of high resolution radar based on mathematical results regarding linear transformation of signals and ambiguity functions 12 p1819 A66-24601
 Multichannel radar detection of nonmoving target with variable resolving power 19 p3297 A66-35537

RADAR SCANNING

Pre-and postdetection integration noting signal to noise ratio, finite integration time, scanning radar and high speed airborne target 04 p0487 A66-14127
 Choosing number of faces of phased array antenna for hemisphere scan coverage 06 p0826 A66-16020
 Minimum dispersion of estimate of angular coordinate of target fluctuating in unison with pulse scanning radar 07 p1001 A66-17358
 Geoscience information acquisition by radar return studied by means of terrain target scattering coefficients /scatterometry/ 14 p2244 A66-28407
 Reception of signals reflected from ionosphere in vertical radar probing, examining frequency-difference combinations 22 p3869 A66-40780

RADAR SCATTERING

Dependence of mean scattered power on scattering geometry and wavelength in terms of scale roughness and rms slope of components for bistatic scattering 10 p1499 A66-21612
 Short pulse radar return of cone-sphere measured to determine contribution of individual scattering elements to total scattered field, noting creeping wave contribution 10 p1502 A66-21636
 Surface roughness and tolerances in model scattering experiments, noting shape perturbation consequences, frequency characteristics wave behavior, etc 11 p1658 A66-23406
 Wavelength dependence of angel echoes, using radar backscatter from clear atmosphere 12 p1825 A66-24890
 Atmospheric exploration with lidar, noting high resolution and sensitivity 15 p2530 A66-28600
 CAT detection by radar backscatter measurement of radio refractive index eddies 15 p2532 A66-28925
 Specular returns and diffuse scattering

from Moon and ocean

bottom 16 p2653 A66-30932
 Hydrogen and helium ions formation and destruction, charge transfer, diffusion, role during solar activity, using mass spectrometry, ground radar, etc 19 p3350 A66-36356
 Surface roughness effect on radar backscattering cross section of conducting spherical target examined by applying Kirchhoff method 19 p3304 A66-36407
 Digital computer synthesis of simulated ground clutter of radar signals produced by noise generator and characterized by power spectral density and probability density functions 20 p3514 A66-37222
 Physical-optics solution for backscattering from concave ring singularity 20 p3521 A66-38364
 Bistatic radar method for determination of permeability and permittivity of material for smooth spherical target 22 p3863 A66-39941
 Topside ionosphere, emphasizing experiments with incoherent scatter radars and topside sounder satellites 22 p3908 A66-39970
 Plasma lines caused by radar incoherent scattering from longitudinal electrostatic plasma oscillations in ionosphere 22 p3910 A66-39982
 Tropopause detection by radar, examining detection of high altitude clear-air turbulence by radar and forward-scatter techniques 22 p3912 A66-40304
 Polar auroral radar system using ionospheric propagation effects for aspect sensitive backscatter 22 p3916 A66-40811

RADAR SIGNATURE
 Computer programming of pulse compression by active and passive generation, noting differences between sidelobe structures of generation 22 p3883 A66-39714

RADAR SYSTEM
 Ultrasonic delay lines operating below 100 megacycles, particularly dispersive lines suitable for radar pulse compression systems 03 p0331 A66-12411
 Planetary radar system at Venus site of NASA Deep Space Instrumentation Facility for space communications, noting continuous-wave transmitters and receivers 04 p0478 A66-13602
 Papers on modern radar including basic signal analysis, evaluation and system design techniques 04 p0484 A66-14106
 Complex signal analysis concepts indicating versatility in system design methodology and illustrating tradeoffs in performance due to parameter alteration 04 p0485 A66-14112
 Optimum receiver as ideal two-dimensional cross-correlator for any desired modulation function 04 p0486 A66-14118
 Application, problems and state of low noise amplifiers and traveling wave tubes, maser and Adler tubes gain in radar systems 04 p0500 A66-14123
 Phase-correlation system for pulse compression in radar 05 p0649 A66-15262
 Total tactical radar system, describing integrated system, operational functions and computer simulation method 06 p0823 A66-15955
 Instantaneous direction finding system composed of antenna and RF circuits, three-channel receiver and phase detectors 06 p0824 A66-15979
 Relationship between two-and three-channel monopulse systems, with some logical extensions to various symmetrical configurations 06 p0824 A66-15981
 Graphical comparison of Doppler-shift advantage for Chirp, Siebert and frequency hopping pulse-compression techniques 06 p0825 A66-15982
 Binary counter circuit, discussing relevance to solid state design, performance and operation 06 p0857 A66-16973
 Millimeter wavelength radar to investigate plasma effects associated with ionized flow fields of projectiles launched at hypersonic speeds into free-flight ballistic range 08 p1222 A66-18710
 Radar receiving equipment sensitivity measurement by analog method and by time selection scheme 08 p1195 A66-19350
 Detectability of signal in noise of range

- ated MTI radars, with or without pulse
lengthening in conjunction with Doppler
filtering 09 p1342 A66-19951
- Secar or secondary radar for air traffic
control, noting operating principles,
structure, etc 09 p1346 A66-20555
- Terrestrial test sites and aircraft flights
used in preparing for remote sensing from
Earth orbital spacecraft 10 p1532 A66-21525
- CW bistatic radar design with arrival
direction, distance and Doppler
measurements obtained from phase
comparisons and used in ionospheric wind
determination from meteor 10 p1501 A66-21626
- Microwave circuit design for HF amplifiers
and radar systems using either hybrid
approach with germanium transistors or
monolithic one with silicon
transistors 10 p1512 A66-21761
- High sensitivity fast-response laser
detection system, describing microwave
response photoelectric detector with
amplification and mixing
functions 10 p1544 A66-22046
- Small peak phase deviation measured from
required characteristics in linear frequency-
modulated and pulse-compression radar
system 11 p1652 A66-22386
- Radar and communication systems unsolved
problems, including theoretical foundations
and receiver and transmitter
design 11 p1653 A66-22631
- Master oscillator stability requirements for
coherent radar systems 12 p1835 A66-24132
- Short-term frequency stability affecting
resolution and range of Doppler radar,
noting system and circuit requirements
when operating under severe vibration and
acoustic environment 12 p1815 A66-24133
- Microwave integrated circuits in radar
systems, detailing airborne forward-looking
radar, using phased arrays and pulse
compression 12 p1840 A66-24620
- Component failure examples of Gemini
rendezvous radar, emphasizing need for
closed loop reliability
program 13 p2039 A66-25786
- High powered Q-switched ruby laser
/LIDAR/ for meteorological application,
noting system equations, design, operation,
etc 13 p2122 A66-26548
- Passive series fed generation of multiple
radar beam from single
aperture 15 p2455 A66-28575
- Airborne weather radar to detect
dangerous turbulent condition and other
phenomena 15 p2452 A66-29626
- Intensity display system similar to radar
output, showing real time intensity and
pattern variations created by solar lamp
modules in testing of spacecraft systems in
simulation facilities 16 p2680 A66-30497
- Failure effect on phased array radar
systems, noting treatment of outage
threshold on probabilistic ground and
interdependence of system
parts 16 p2652 A66-30663
- Launching range facilities of Diamant
rocket including equipment, radars,
interferometers, telemetry, data processing,
etc 16 p2682 A66-31233
- Air traffic control system using primary
and secondary radar, radar digitizer and
computer complex 16 p2744 A66-31278
- Air traffic control radars, discussing
airport surveillance radar /ASR/, precision
approach radar /PAR/ and secondary
surveillance radar /SSR/ 16 p2666 A66-31444
- Automation in flight safety, noting role of
radar, flight control system reliability, data
processing system used, 17 p2848 A66-33485
- Measurement of various target signatures
in radar performance prediction, using
transfer function of
target 18 p3070 A66-34258
- Capability, calibration and testing of linear
variable differential transformers /LVDT/
for Gemini rendezvous
radar 18 p3096 A66-34497
- Operational environment formulation for
airborne navigation radar 19 p3397 A66-35521
- Microelectronics impact on future airborne
radar systems reliability, cost and
performance 19 p3314 A66-35522
- Ultralow-noise planetary radar receiving
system with high-performance feed and
maser preamplifiers, noting aperture
utilization 19 p3301 A66-35690
- Improved radar system reliability, using
method of determining potential failure
cases of tolerance
combination 20 p3513 A66-37181
- Resolution of multiple target ambiguities
in twin-channel frequency-modulated
continuous wave radar system using fixed
antenna 20 p3596 A66-37218
- Meteor radar with peak power well into
megawatt range with pulse transmitter
producing 4 mw at 33 mc 20 p3543 A66-37626
- Surveillance radar optimization by
separating search and tracking functions and
controlling operation of radar by tracking
computer 20 p3520 A66-38141
- Design considerations for advanced digital
beam steering computer through use of
geometric optics 21 p3707 A66-38674
- Photographic radar system employing Q-
switched ruby laser, Mullard type 6929
image tube and conventional
camera 21 p3736 A66-38796
- Microcircuits in ground radar, emphasizing
phased array techniques and digitalization of
beam steering functions 21 p3710 A66-38829
- Solid state frequency multipliers for LEM
landing and rendezvous 21 p3715 A66-39525
- Signal processing by coherent and
incoherent light systems for application in
seismology, radar, speech recognition,
etc 22 p3862 A66-39734
- Signal systems design approach to
problems of communication and radar
systems, discussing channel and constraint
modeling, data processor performance and
signal optimization 22 p3868 A66-40720
- Statistical correlation-Fourier frequency
band analysis of coherent memory filter
applied to pulse compression radar
systems 23 p4035 A66-41023
- Comparison of measurement accuracy for
angular coordinates in radar systems by
linear scanning and equal-signal zone
methods 23 p4038 A66-41522
- Maintainability impact on redundant system
design of phased array radar, presenting
Monte Carlo technique for assessing
availability of array
portion 24 p4178 A66-42091
- Ground radar systems for missile defense
providing faster data processing, sensor
location optimization, computer control,
etc 24 p4175 A66-42953
- ## RADAR TARGET
- Probability density of angular fluctuations
of phase front of wave reflected from
complex target 02 p0190 A66-11407
- Radar target of fixed geometry and
statistical models 04 p0487 A66-14128
- Processing gain of receiver as function of
target size 08 p1181 A66-18717
- Comparing search radar performance
against targets with cross section
fluctuations described by Swerling cases 1
and 3 09 p1342 A66-19931
- Target supports of cellular plastic columns
and suspension lines in radar reflectivity
measurements and associated target weight,
measurement frequency and target cross
section 10 p1498 A66-21602
- Target scattering matrix generalized to
include dependence upon radar polarization,
determining matrix through two successive
transmissions at orthogonal
polarizations 10 p1499 A66-21603
- Orientation and construction of high
efficiency passive radar targets, noting
range and performance for trihedral and
octahedral shape 10 p1503 A66-21641
- Probabilities of detection for fluctuating
radar targets 10 p1506 A66-22051
- Angular noise induced random error in
direction finding as affected by target
properties and sense 14 p2242 A66-28149
- Zero crossing principle for detecting weak
narrow band signals immersed in Gaussian
noise, discussing application to incoherent
detection of stationary radar
target 18 p3067 A66-33836
- Optimum radar measurement of multiple
target coordinates with unknown signal
amplitudes and phases 19 p3296 A66-35303
- Radar target tracking error induced by
ground reflection of radar echo from static
beam split autotracking
- radar 20 p3520 A66-38142
- Energy-and heterodyne-detection
techniques compared in pulsed optical radar
applications 23 p4037 A66-41311
- Radar partial coherence theory for clutter
construction relationship to radar cross
section, waveform coding, output signal,
mutual coherence function and random
noise 23 p4037 A66-41312
- Angle of arrival in amplitude-comparison
monopulse antenna arrangement including
thermal noise as interference and pulsed
radar with ideal radar
target 23 p4044 A66-41314
- ## RADAR TARGET SCATTER SITE /RATSCAT/ PROGRAM
- RAT SCAT cross section facility,
examining location and range geometry,
equipment complement, calibration,
measurement errors, etc 10 p1519 A66-21604
- Sand table simulation of full-scale ground-
plane range 10 p1502 A66-21631
- ## RADAR TRACKING
- Polish solid propellant meteorological
rocket, considering methods for measuring
atmospheric parameters and
design 01 p0144 A66-11063
- Final range tests of Polish Meteor 1 noting
tracking efficiency 01 p0144 A66-11066
- Satellite and space-probe tracking by radar,
radio and optical observations from
Earth 02 p0191 A66-11693
- Air traffic control methods using radar for
long-term planning and solution of West
German air traffic control
problems 02 p0256 A66-11858
- Height, wind speed and direction errors
arising from radar tracking with level
balloons 04 p0541 A66-13667
- Pseudorandom binary coded waveforms as
modulating functions for radar signals,
noting autocorrelation
function 04 p0486 A66-14119
- Motion equations for stable rising balloon
systems which consider effects of apparent
mass and wind accelerations, using radar
tracking
[AIAA PAPER 66-398] 12 p1802 A66-24513
- Wind velocity measurement using radar
detection of artificially ionized air column
by radioactive source
[AIAA PAPER 66-404] 12 p1908 A66-24516
- Probability of detection of smooth
satellite-launched aluminum spheres, noting
orbital parameters, microwave radar
efficiency, etc 14 p2391 A66-27039
- Radar characteristics of reentry plasma and
communication problems associated with
reentry plasmas 14 p2343 A66-27508
- S-band automatic tracking telemetry
antenna, using tracking mount and
servosystem of T-9 radar tracker for
microwave telemetry studies and other
experiments 16 p2659 A66-30551
- R.E. North Site Cassegrain aerial system
for monopulse tracker
radar 18 p3086 A66-34322
- Photographing satellite from another
satellite and problems of radar
tracking 19 p3459 A66-35603
- Multivariate statistical error model
representation of single radar tracking
station and analogous model for three
stations used to compare measuring
accuracies 20 p3514 A66-37219
- Video recording and playback systems
applied to radar systems provides capability
of measuring reentry phenomenon and
tracking more than one
object 20 p3514 A66-37220
- LEM rendezvous radar for tracking
transponder on lunar surface or on
Command Module 21 p3714 A66-39523
- Upper wind evaluation by pilot and
radiosonde balloon radar tracking for flat
Earth and effects of Earth
curvature 22 p3943 A66-40428
- Doppler radar tracking system
measurement of impact drag coefficients for
several water entry
configurations 24 p4191 A66-42188
- ## RADAR TRANSMISSION
- Pulsed radar signal analysis based on
steady state response to carrier and actual
pulse train, taking account of pulse
shape 04 p0485 A66-14111
- Statistical decision theory, applying
Neyman-Pearson test, used to detect and

discriminate signal 04 p0485 A66-14113
 Probability density and distribution functions associated with noise and signal plus noise in radar IF, after linear and square law detector, and after these detectors with subsequent video integration 04 p0485 A66-14115
 Comparison of matched-filter analysis and quasi-matched filter analysis of linear FM pulse compression 04 p0486 A66-14117
 Atmospheric spatial inhomogeneities degradation in radar signal-target information 04 p0486 A66-14120
 Airborne laser-radar light detection and ranging /LIDAR/ systems applied to detection of clear air turbulence /CAT/ 05 p0697 A66-15297
 Detection and measurement techniques for collisionless MHD shock wave propagation in interplanetary space, using bistatic-radar Earth-to-spacecraft transmissions 17 p3002 A66-32522
 High scanning frequency for transmitting radar information to vehicles with beam arranged to form coded pulse signal 18 p3070 A66-34257
 Autocorrelation as pulse compression system, giving effective time resolution as inverse of correlation bandwidth and compression ratio of time resolution to signal duration 23 p4034 A66-41022

RADIAL DISTRIBUTION
 Four types of axisymmetrical distribution of stresses and displacements in infinitely long rod of circular cross section with discontinuous boundary conditions 01 p0155 A66-10713
 Extension of Broman theorem stating that if function that is harmonic in unit circle belongs to special class its complete radial variation is bounded everywhere 03 p0387 A66-12634
 Excitation and inversion method in gas lasers noting characteristics of helium-neon laser and ionized and three-level laser system 04 p0530 A66-13951
 Radial distribution of electrical conductivity in ionized gas jet based on value measured by induction method and known temperature distribution 06 p0919 A66-16880
 Instrument measuring field index of DC magnetic fields, particularly circular accelerators using two identical vibrating measuring coils 06 p0883 A66-16946
 Scanning slit across point or line spread function in determination of radial irradiance distribution 07 p1081 A66-18041
 Plastic properties of brittle materials analyzed by hydrostatic pressure, using double ring, calculating radial pressure on sample, between rings, etc 08 p1305 A66-18600
 Radial distributions of number density, electron temperature and plasma potential measured in electrodeless discharge, using symmetric and asymmetric double probes [AIAA PAPER 66-194] 10 p1562 A66-21440
 Charged particle radial distribution determination as function of amplitude of HF magnetic field, using diffusion in discharge induced by HF traveling H-wave 10 p1570 A66-21998
 Edge effect in case of finite pipe under arbitrary axisymmetrical load, determining radial displacement 11 p1782 A66-22851
 Mean radial particle displacement per unit time due to magnetic impulses for two-dimensional transport motion of magnetospheric trapped particle 11 p1765 A66-23149
 Surface finish effect on radial temperature distributions in optically pumped neodymium trivalent ion glass laser rod by observing thermal stress birefringence 11 p1714 A66-23358
 Generalized heat equation solution expansion in terms of radial heat polynomials, Appel transforms and Laguerre polynomials 13 p2118 A66-25793
 Two-dimensional analysis of flow in electrofluid dynamic generator showing effect of radial fields and viscous forces on performance, stressing effect on electrical breakdown of gas, noting basic equations 13 p2001 A66-26257
 Thermal stresses in anisotropic hollow cylinder by arbitrary radial temperature

distribution 17 p3020 A66-31997
 Radial loading effect on vibration frequencies of thin spherical shells 17 p3024 A66-32362
 Plane elasticity theory problem for curve with mixed boundary conditions having radial load distribution 17 p3028 A66-32784
 Charged particle radial distribution determination as function of amplitude of HF magnetic field, using diffusion in discharge induced by HF traveling H-wave 18 p3151 A66-34975
 Ablation analysis in cylindrical coordinates for axisymmetrical configuration of wall materials with temperature-dependent properties and nonlinear heat flux conditions at boundaries [AIAA PAPER 66-542] 20 p3680 A66-38034
 Velocity distribution for inlet flow in finite radial diffuser 21 p3731 A66-39591
 External control of radial distribution of plasma density for magnetoplasma stabilization against helical instability 23 p4103 A66-41486
 Radial distributions of number density, electron temperature and plasma potential measured in electrodeless discharge, using symmetric and asymmetric double probes [AIAA PAPER 66-194] 23 p4107 A66-41907

RADIAL FLOW
 High efficiency radial ventilator design and frictionless incompressible flow treated by conformal mapping 01 p0005 A66-10199
 Heat transfer from shrouded rotating disk to single radial inflow determined, using gas turbine model test facility [ASME PAPER 64-WA/HT-49] 04 p0595 A66-13389
 Aerodynamic analysis of cryogenic radial-inflow turbines, noting optimum velocity distribution [ASME PAPER 65-WA/PID-6] 05 p0608 A66-15604
 Supersonic flow at exit of radial-inflow turbine flat-vane nozzle ring [ASME PAPER 65-WA/GTP-5] 05 p0608 A66-15720
 Radial pressure distribution on enclosed rotating disk with or without blades and with radial outward or inward throughflow [ASME PAPER 65-WA/FE-10] 05 p0691 A66-15729
 Steady flow of incompressible viscous fluid through space between rotating coaxial cones with porous walls, calculating effect of injection and suction on radial flow 06 p0870 A66-16182
 Local and average heat-transfer coefficients for encased rotating disk cooled by radial flow 09 p1471 A66-20829
 Turbulent radial channel flow without swirl between parallel disks having both supersonic and subsonic regions, determining pressure distribution and normal shock [ASME PAPER 65-FE-11] 12 p1799 A66-24547
 Radial diffuser using swirl-free incompressible flow between narrowly spaced disks of radial channel and supply-pipe outlet [ASME PAPER 65-FE-12] 12 p1864 A66-24548
 Heat and mass transfer in radial flow between two fixed or co-rotating parallel disks, obtaining series expansion of Navier-Stokes equation 15 p2615 A66-28619
 Radial pressure distribution on enclosed rotating disk with or without blades and with radial outward or inward throughflow [ASME PAPER 65-WA/FE-10] 16 p2710 A66-30343
 Geometrically different volutes effect on impeller of centrifugal pump performance, discussing radial thrust, head and runout capacity [ASME PAPER 66-FE-14] 17 p2932 A66-33268
 Compositional, anisotropic and nonradial flow characteristics of solar wind as observed by ARC high-resolution Pioneer VI plasma probe 18 p3170 A66-34542
 Radial flow of incompressible viscous fluid between two parallel disks 20 p3548 A66-37990
 Navier-Stokes equation series form of radial flow of incompressible fluid between two rotating parallel disks 20 p3548 A66-37991
 Optimal centripetal turbine impellers with radial blade inlet and semiaxial

discharge 21 p3807 A66-38993
 Tangential velocity and radial flow of unsteady viscous vortex with annular region and flow toward center 21 p3728 A66-3934
 Nonlinear ODE of radial motion of body in nonlinear central force fields, considering drag effects 21 p3773 A66-3943
 Second-order fluid flow over finite rotating disk enclosed within coaxial cylindrical casing 21 p3729 A66-3945
 Torsional oscillations of infinite plate in elasticoviscous fluid solved by motion equation expansion of velocity profile in powers of amplitude 21 p3730 A66-3945
 Hamilton principle, motion equation natural boundary conditions and constitutive relations for finite deformation of one dimensional curved elastica and radial motion and stability of circular ring 22 p3990 A66-4013
 Radial flow effects on helicopter rotor blades, noting minimum drag variation 22 p3843 A66-4024

RADIANT ENERGY
 Radiant heat fluxes on surface of heating body with varying temperature 04 p0597 A66-13822
 Radiolotope-photovoltaic energy conversion system, discussing principal elements, radiative exchange and efficiency calculations 07 p0990 A66-1723
 Mirrors composed of multilayer stacks of dielectric films and attaining high reflectance over extended spectral range 07 p1079 A66-1729
 Validity of Kirchhoff law for apparent local spectral emittance and absorbance and total flux calculations for spacecraft cavities [AIAA PAPER 65-135] 08 p1316 A66-1879
 Stagnation layer of rigid plate resulting from cool energetic plasma stream interaction 10 p1567 A66-2182
 Linear electric shock tubes including segmented series-discharge driver, switchless shock tube, metal-walled driver for radiant energy conservation, etc 16 p2674 A66-30418
 Maximum efficiency contour /MEC/ source collector designed for compact arc sources used in solar simulators 16 p2681 A66-30508
 Radiant energy transport within cryogenic condensates extended to case of explicitly varying condensate depths and wider substrate temperature range 16 p2830 A66-31712
 Direct measuring radiation calorimeter developed for determining radiant heat flux of solid propellant gas flame in rocket combustion chambers [AIAA PAPER 65-358] 18 p3159 A66-33814
 Bench-top calorimeter for determining radiation and convection in small-scale combustion of fuel 18 p3113 A66-34425
 Broadband signals effect on far-zone field of linear arrays studied in terms of energy radiation pattern 19 p3320 A66-36402
 Laplace transform analysis of solid or hybrid propellant ignition by exothermic heterogeneous reactions in presence of radiant energy flux 21 p3806 A66-38688
 Radiant energy transfer below cloud cover in Venus atmosphere, noting greenhouse effect caused by atmosphere containing components capable of IR absorption 22 p3980 A66-40469
 Characteristic equation for linear flutter problem of elastic cylindrical shell immersed in gas flow, discussing energy radiation, traveling wave propagation and discontinuity problem 22 p3995 A66-40510
 Thin film thermal radiation detector noting construction, calibration, performance, error sources and advantages of pyroelectric over thin film gauges 24 p4208 A66-42179
 Acoustic resonance tube used to change radiation to sound 24 p4213 A66-42854

RADIANT HEATING
 Spectral and total radiation studies of bodies traveling at hypersonic speed in simulated Martian and Venusian atmospheres [AIAA PAPER 65-116] 03 p0315 A66-12783
 Ablation rates, surface temperature, emittances and reradiated fluxes of heat shield materials heated by irradiation [AIAA PAPER 66-44] 08 p1318 A66-19070
 Radiation energy transfer rates characteristic of environments for advanced

entry missions, examining laboratory simulation techniques, particularly plasma arc generators 11 p1687 A66-22866
Radiant heat flux in spectral region from 4 to 40 microns at various atmospheric levels 11 p1698 A66-22945
Material properties and thermal inputs on heat shields for Mars entry, noting importance of insulation vs ablation due to uncertainties in radiant heating inputs 16 p2809 A66-30895
Surface heating rates for metals, semiconductors and insulators subject to high irradiance produced by carbon-arc-image furnace 16 p2829 A66-31080
Heat-conducting gas converging spherical shock wave analysis, emphasizing energy accumulation 16 p2689 A66-31514
Optimum temperature conditions for cultivating thermophilic strains of *Chlorella* under varying radiant flux intensities 16 p2644 A66-31589
Energy transport within cryodeposit layer subjected to thermal radiation 20 p3676 A66-37085
Radiant heat flux in spectral region from 4 to 40 microns at various atmospheric levels 20 p3553 A66-37858

Radiation peak formation in nonhomogeneous gas behind shock wave due to radiating atom distribution and heating of electron gas by inelastic molecular collisions 21 p3728 A66-39334
Radiation peak formation in nonhomogeneous gas behind shock wave due to radiating atom distribution and heating of electron gas by inelastic molecular collisions 22 p3897 A66-39704

RADIATION ABSORPTION

Thermal radiation absorption by droplet or spray during ignition and combustion of

atomized liquid fuels 01 p0164 A66-10899
Laboratory simulation of UV and vacuum effects on solar absorptance of spacecraft thermal control materials 02 p0213 A66-11227
Extension of study showing that increase in temperature of silicon carbide increases absorption coefficient of defect, for case of heavy particle irradiation 02 p0274 A66-11723
Influence of absorption of aerosol particles on extinction of solar and sky radiation 02 p0225 A66-12214
Excessive cosmic radiation absorption in lower nocturnal ionosphere at middle geomagnetic latitudes during Forbush effects 04 p0514 A66-13443
Heat transfer and flow friction characteristics of matrices of high porosity with radiation heat source [ASME PAPER 65-HT-6] 05 p0782 A66-14734
High energy protons in synchrocyclotron testing of polyethylene, aluminum, lead and titanium hydride materials 05 p0627 A66-15118
Emission and absorption of radiant energy in model Martian atmosphere composed of 15 percent carbon dioxide and 85 percent nitrogen by volume 05 p0768 A66-15777
Radiation absorption and scattering by small spherical solid carbon particles in wavelength range 0.2 to 40 mu calculated by classical Mie theory [AIAA PAPER 66-134] 06 p0911 A66-16261
Radiative capacity of isothermal serrated surface 06 p0972 A66-16848
Laser radiation absorbed along slant paths, spectral line overlapping and center line shift with pressure variation 07 p1041 A66-17295
Muon absorption curves under ground and under water with absorption less steep at great depths under water than under ground 07 p1116 A66-17564
Radiation by ultrahigh energy muons in lamellar medium, noting frequency 07 p1117 A66-17566
Heat transfer and flow friction characteristics of matrices of high porosity with radiation heat source [ASME PAPER 65-HT-6] 11 p1785 A66-22188
Satellite protective coatings using vacuum UV radiation absorbers for temperature control 11 p1720 A66-23125
Thermal radiation parameter measurements of coating materials, using steady state heat balance method [AIAA PAPER 64-256] 12 p1979 A66-24701
Deviations from BCS behavior in temperature dependence of ultrasonic absorption in superconducting tin 13 p2158 A66-25056
Inverse variation of external efficiency of incoherent radiation in GaAs diode with temperature due to increased absorption, noting constancy of quantum efficiency 13 p2105 A66-26570
Book on solar radiation including astronomical and geographical factors, atmosphere effect, energy distribution, instruments, application, etc 14 p2283 A66-26946
Effect of radiative sound absorption in atmosphere, calculating absorption due to radiation by water vapor in far-IR rotation spectrum 14 p2334 A66-27659
Ozone number densities in 30 to 75 km altitude determined at night by rocket measurements of lunar UV radiation absorption in various bands 15 p2492 A66-30030
Solar radiation absorption by atmospheric water vapor, deriving formulas that include scattering and absorption by aerosol as additional parameter 16 p2691 A66-30228
Laser mode operation in pressure of radiation absorbing impurity analyzed by extended Thomson type system 16 p2720 A66-31558
Perturbation approach to IR absorption in p-type semiconductor with zincblende or zinc telluride structure 17 p2982 A66-32971
Boundary layer problem concerned with effects of radiation absorption and emission for flow of high speed gas over flat plate [AIAA PAPER 66-521] 18 p3047 A66-33662
Temperature dependence of UV radiation absorption coefficient in quartz undergoing phase transition for several spectral lines 19 p3447 A66-36722

Analytic models of stellar evolution, describing homogeneous and inhomogeneous stages, energy conservation and transport radiative and convective transfer mechanisms, etc 19 p3467 A66-36789
Energy transport within cryodeposit layer subjected to thermal radiation 20 p3676 A66-37085
Single continuous correlation for total band absorptance of radiating gases 20 p3678 A66-37121
IR radiation absorption in imperfect ionic crystals 21 p3802 A66-39158
High-energy gamma-ray absorption in photon field between sources and Earth and within radio sources themselves 21 p3809 A66-39210
IR absorption, reflectivity and transmission in n-type gallium arsenide single crystals at room temperature due to impurities and high carrier concentration 21 p3805 A66-39580
Monograph on absorption, scattering and attenuation of light and IR radiation in atmosphere 23 p4087 A66-41272

RADIATION BELT

SA ARTIFICIAL RADIATION BELT
SA INNER RADIATION BELT
SA OUTER RADIATION BELT
SA PROTON BELT
SA TRAPPED RADIATION
SA VAN ALLEN BELT
Basic hypothesis concerning Earth radiation belts origin, discussing neutron albedo and effects of interaction between plasma and magnetic field 02 p0283 A66-11808
Transfer and acceleration of particles in Earth magnetosphere effect on origin of radiation belt 02 p0283 A66-12110
Space exploration discussing terrestrial effects of electromagnetic and corpuscular solar radiation 04 p0574 A66-13805
Particle space radiation environment and latest models 05 p0747 A66-14845
Terrestrial radiation belts, satellite data, geographical coordinate location and cosmic radiation measurement 05 p0749 A66-15230
Electromagnetic disturbances effects on particles trapped in radiation belts 05 p0749 A66-15251
Location and radiation intensity variation in upper radiation belts determined, using scintillation counters aboard Cosmos satellites 05 p0754 A66-15400
Particles in radiation belt of Earth, considering motion in dipole field, sources, loss processes, etc 05 p0756 A66-15745
Auroral phenomena in integral-invariant coordinate system, discussing pole-centered circular nature of isochasms in geomagnetic dipole coordinates 06 p0876 A66-16280
Survey in satellite era of energetic particle radiations, plasmas and magnetic fields in space, including solar wind, solar cosmic rays, etc 06 p0951 A66-16612
Structure and variation of radiation belts during magnetic storm, including configuration of forbidden region in connection with magnetic field 06 p0951 A66-17048
Analysis of data obtained from satellites concerning artificial radiation belt formed by July 9, 1962 high-altitude nuclear explosion 07 p1131 A66-18083
Four-channel silicon detector and scintillation counter for measuring proton spectrum of Earth radiation belts 08 p1223 A66-19042
Polar electrojet causing magnetic substorms in high latitudes flows westward along closed oval curve and is connected with auroral activity and outer radiation belt 08 p1216 A66-19216
Correlated magnetic tail and radiation belt observations from Explorer 18 /Imp I/ satellite and APL satellite 1963 38C in April 1964 08 p1284 A66-19411
Survey of U.S. and U.S.S.R. literature on processes responsible for composition and spatial distribution of radiation belts 08 p1285 A66-19774
Radiation belt formation from neutron decay and geomagnetic trapping as affected by Coulomb encounters and particle diffusion 09 p1440 A66-20226
Terrestrial radiation belt measurement with Cosmos satellite, noting launch and orbit data, instrumentation and

results 09 p1441 A66-20231
 Primary cosmic radiation and terrestrial radiation belt measurement by Cosmos XVII satellite, noting instrumentation, equipment operation and results 09 p1441 A66-20232
 Earth radiation belts, summarizing present knowledge and noting as-yet-unknown particle acceleration mechanism 09 p1444 A66-21021
 Radiation belts theorized as resulting from penetration of charged particles into magnetosphere, accelerated by reversed phase of magnetic storm 09 p1444 A66-21022
 Formation of radiation belts attributed to inward particle drift into interior of magnetosphere 09 p1444 A66-21024
 Earth magnetosphere measurements in radiation belt region from Elektron II satellite 09 p1444 A66-21026
 Distribution and composition of particles in Earth radiation belts from data obtained by Elektron I and Elektron II satellites 09 p1445 A66-21030
 Distribution of trapped particles along orbit of Elektron I 09 p1445 A66-21031
 Effect of satellite size on electron lifetime in artificial belt, causing charged particles in radiation belts to decay at surface 10 p1596 A66-21052
 Coulomb relaxation of distribution of fast electrons or ions in Earth radiation belts 11 p1762 A66-22425
 Proton injection into radiation belts for large B-L space regions by cosmic ray and solar proton albedo neutron decay injection 11 p1764 A66-23130
 Space exploration, discussing terrestrial effects of electromagnetic and corpuscular solar radiation 12 p1938 A66-23638
 Monograph on methods and equipment used by Soviet satellites and space probes to study Earth radiation belts 12 p1938 A66-23802
 Satellite data indicates correlations between cosmic ray variations and radiation intensity of radiation belts and related phenomena 12 p1941 A66-24170
 Satellite observation of radiation belt and absorption of cosmic noise in polar aurora during magnetic storms of February 1964 12 p1943 A66-24267
 Electron acceleration near Earth bow shock measured, using Explorer XVIII satellite, noting solar wind effect, energy spectrum in radiation belt and magnetospheric boundary, etc 13 p2175 A66-26355
 Transfer and acceleration of particles in Earth magnetosphere effect on origin of radiation belt 14 p2377 A66-28069
 Charge particle flux in Earth radiation belt as observed by Cosmos XVII 15 p2573 A66-28496
 Radiation belt origin, examining acceleration of solar plasma electrons to energies of 30 to 100 kev by nonlinear waves called solitons 16 p2792 A66-30156
 Micropulsations generated by low-energy proton via cyclotron instability in outer radiation belt, noting pitch angle scattering 16 p2794 A66-30700
 B-L flux plots and differential energy distributions for low energy protons in nine energy intervals from 0.17 to 3.4 mev measured with satellite-mounted proton spectrometer 16 p2794 A66-30702
 Differential electron spectra in radiation belt in ten energy intervals obtained by satellite spectrometer, noting soft and hard components 16 p2794 A66-30703
 Proton trajectories in static dipole magnetic field, noting effects in radiation belt proton pitch angle oscillation at cyclotron frequency, etc 17 p2993 A66-32519
 Orbit calculations used to evaluate effective atmospheric densities traversed by geomagnetically trapped 125-mev protons in South Atlantic anomaly 17 p2993 A66-32528
 Solar protons and neutrons shown not to play important part in production of radiation belt protons 17 p2993 A66-32529
 Precipitation flux of quasi-trapped energetic electrons near low altitude fringes of inner radiation belt as they drift into South Atlantic magnetic anomaly 18 p3170 A66-34520
 Terrestrial radiation belt during solar minimum, noting results from measurement

with Elektron satellite series 18 p3175 A66-34745
 Energetic electron spikes in and beyond transition region of Earth radiation zones from IMP observations 18 p3196 A66-34870
 Hypothetical mechanism of earthward radial drift of charged particles, noting albedo neutron decay, proton belt, etc 18 p3197 A66-34876
 Stability of Earth radiation belts, considering wave absorption in ionosphere, noting role of proton fluxes, Alfvén wave generation, etc 18 p3197 A66-34877
 Magnetospheric phenomena qualitatively described, discussing radiation belt dynamics 18 p3199 A66-34888
 Radial displacement of particles excited by solar-wind-induced current at boundary of and ring current within magnetosphere 19 p3451 A66-35251
 Fast variations of electromagnetic field measured by satellites electron I and II used as indication of state of radiation belts and magnetosphere of Earth 19 p3344 A66-35257
 Electron and ion acceleration by cosmic plasma waves, examining contribution of these processes to radiation belt formation 20 p3647 A66-37033
 Energy-selective redistribution of trapped electrons in inner radiation belts associated with magnetic disturbances 20 p3630 A66-37294
 ULF radio emission of upper atmosphere and other related geophysical phenomena, analyzing hisses, choruses and contribution to Earth radiation belt 20 p3551 A66-37487
 Radiation trapped in Earth magnetic field - Conference, Christian Michelsen Institute, Bergen, Norway, August-September 1965 20 p3636 A66-38301
 Physical principles of radiation belts and geomagnetically trapped radiation 20 p3637 A66-38305
 Changes in 1 to 4 mev electron population during solar quiet periods and 55-mev protons near South Atlantic anomaly measured by various geophysical satellites 20 p3638 A66-38310
 Distribution of energetic protons in Earth radiation belt between 1962 and 1964, noting secular temporal changes, effects of magnetic storm and aspects of energy spectrum 20 p3638 A66-38312
 Loss rates of trapped electrons by atmospheric collisions 20 p3640 A66-38321
 Survey of U.S. and U.S.S.R. literature on processes responsible for composition and spatial distribution of radiation belts 21 p3809 A66-38770
 Fluxes, intensities and energy distributions of magnetically trapped electrons and fluxes of magnetically trapped protons at lower edge of radiation belt 22 p3974 A66-40557
 Inner magnetosphere inflation during geomagnetic storm observed by Explorer XXVI, noting relation of various phases to charged particles 24 p4200 A66-42589
 Origin of primary cosmic radiation, composition, energy spectrum and time variations 24 p4272 A66-43139

RADIATION CONTROL

Experimental verification of spectrum asymmetry at output of pulsed RF klystron amplifier transmitter leads to modulation technique called Control of Unwanted Radiated Energy /CURE/ 06 p0841 A66-15956
 Radiation control of ruby laser by diffraction modulator with traveling ultrasonic wave, noting computer solution of kinetic equations of population balance, radiation density, characteristic damping, etc 17 p2938 A66-33515
 Solar radiation control for changing meteorological conditions in lower atmospheric layer 20 p3594 A66-38373
 Radiation control of ruby laser by diffraction modulator with traveling ultrasonic wave, noting computer solution of kinetic equations of population balance, radiation density, characteristic damping, etc 24 p4219 A66-42128

RADIATION COOLING

Radiative vs active cooling systems as part of refurbishment requirements critical to economic feasibility of reusable launch vehicle systems 01 p0143 A66-10796
 Radiation discharge cooling of gas behind

shock waves, noting xenon case 03 p0355 A66-12716
 Cooling of lower chromosphere contributed to radiation in individual spectral lines 03 p0427 A66-12915
 Transient cooling of spherical mass of high temperature gas by thermal radiation, neglecting ionization and dissociation effects [ASME PAPER 65-APMW-22] 04 p0598 A66-14223
 Radiation discharge cooling of gas behind shock waves, noting xenon case 09 p1365 A66-19947
 Transient cooling of spherical mass of high temperature gas by thermal radiation neglecting ionization and dissociation effects [ASME PAPER 65-APMW-22] 10 p1621 A66-21468
 IR cooling rate in planetary atmospheres, noting Curtis-Godson approximation, Doppler line shape, water vapor rotation band, etc 11 p1695 A66-22264
 Cooling of lower chromosphere contributed to radiation in individual spectral lines 14 p2380 A66-27264
 Nonhomogeneous solid sphere radiative cooling asymptotic representation based on heat conduction theory by Laplace transforms 14 p2414 A66-28144
 Transient radiative cooling of semilinear solid with parallel walled cavities 18 p3261 A66-34359
 Perturbation analysis of radiative cooling in shock layers and radiative heat transfer effects on hypersonic flow over wedge and circular cone 23 p4011 A66-41882
 Radiative cooling of uniform gas flow to determine reduction of heat flux incident on space vehicle surface, considering nose cap radiation during reentry 23 p4150 A66-41905
 Flat-pack case for thermal resistance of integrated circuit to space environment 24 p4186 A66-43059

RADIATION COUNTER

SA GEIGER COUNTER

SA IONIZATION COUNTER

SA SCINTILLATION COUNTER

Minimization of radiation absorption in order to measure soft beta radiations in solids, liquids and gases 01 p0070 A66-10874
 Stellar-diurnal variation of cosmic rays during period 1958 through 1960, on basis of meson-activity data recorder by two crossed counter telescopes 02 p0281 A66-11335
 Crossed counting telescopes used to determine distortions in cosmic ray anisotropy measurement 02 p0283 A66-12112
 Crossed counting telescopes used to determine distortions in cosmic ray anisotropy measurement 14 p2377 A66-28071
 Combination of point counting and electron microprobe techniques in mineralogical planimetric integration analysis 16 p2707 A66-31196
 Muons and neutrinos from energetic celestial objects, discussing charge ratio, rate and equipment used 18 p3224 A66-35226
 High resolution magnetic hodoscope performance for charged particle analysis, measuring momentum response spectrum and experimental error due to instrumental effects 18 p3115 A66-35228

RADIATION DETECTOR

SA PARTICLE DETECTOR

SA SILICON RADIATION DETECTOR

Fluctuations in energy absorbed within definite periods of time by plane-surface thermal emission sensors of arbitrary dielectric permeability 01 p0069 A66-10722
 Cosmic ray telescope /CRT/ carried on Mariner IV Mars probe to measure flux and energy of protons and alpha particles in interplanetary space and near Mars 01 p0072 A66-11112
 Trapped radiation detector designed and fabricated by Van Allen for measurement of Martian radiation belts 01 p0073 A66-11114
 National Bureau of Standards photoelectric and thermoelectric instrumentation for use in measurement of spectral irradiances of solar simulator 02 p0226 A66-11223
 Solar simulation in vacuum and extreme UV using RF gaseous-type discharge light sources and photomultiplier detector 02 p0212 A66-11226
 Crystalline semiconducting materials for detection, modulation and generation of

- optical and submillimeter wave radiation 02 p0272 A66-11697
- Single crystal semiconductor thermal detector with constant bias current and self-cooling, taking into account end cooling 02 p0232 A66-12063
- Difference magnetic analyzer of low-energy electrons and protons in which particles are separated before arriving at detector 02 p0284 A66-12143
- IR nondestructive testing system for usability analysis in production line inspection of Polaris A-3 motors 03 p0373 A66-12996
- Cosmic ray induced lithium and calcium in iron meteorites by improved technique of potassium isotope detection 04 p0580 A66-14487
- Neutron and gamma sensitivities of nine detectors tested at Sandia Pulsed Reactor 05 p0734 A66-14854
- Solar X-ray radiation, describing rocketborne instruments using photographic emulsion for X-ray emission intensity measurements 05 p0682 A66-15366
- Average energy expended per ionized electron-hole pair in silicon and germanium as function of temperature 05 p0742 A66-15871
- Electron-photon, mu-meson and nuclear-active components of extensive air showers 07 p1117 A66-17571
- Neutrino detecting equipment located in South African mine, discussing theory of neutrino production 08 p1285 A66-19600
- High-altitude nuclear explosion detector design for Vela project 09 p1463 A66-19968
- Modular system of logic for nuclear detectors onboard Vela satellite 09 p1463 A66-19969
- Radiosonde for stratospheric cosmic ray intensity measurement, noting structure, operation and results 09 p1379 A66-20236
- Smoothing recorded tracings of cosmic ray detector 11 p1704 A66-22403
- Radiation detector, nuclear reactor, measurement, etc - Nuclear Science Symposium, San Francisco, October 1965 12 p1910 A66-23670
- Measurement of differential energy spectra of protons, helium nuclei and heavy nuclei by cosmic radiation telescopes mounted on POGO and Pioneer satellites 12 p1877 A66-23684
- Flyable space radiation detector based on spark chamber technology for measuring unidirectional proton spectra in six energy intervals 12 p1877 A66-23686
- Digitized spark chamber for balloon and satellite gamma ray astronomy, noting detector array, high voltage system and data acquisition and handling 12 p1877 A66-23687
- High sensitivity detectors for low-kev cosmic X-ray sources, noting aperture construction from ganging of gas counter outputs 12 p1879 A66-23697
- Ruby laser optical radar detector of upper atmospheric backscattering 12 p1818 A66-24395
- Simultaneous observations of auroral zone X-ray microbursts, using two balloon-borne radiation detectors separated by 300 km to estimate size of region of electron precipitation 12 p1944 A66-24841
- Transistorized logarithmic amplitude converter for recording pulses of radiation detector, automatic switching of conversion scale permits amplitude measurements 13 p2077 A66-25321
- Far-IR laser molecular spectroscopy including IR laser oscillators, photon noise, detectors and nuclear optics 13 p2100 A66-26195
- Self-calibration and automatic correction for wavelength response of monochromator-filter-detector system 14 p2292 A66-27323
- Well shielded ceramic capillary spark source, thermocouple radiation detector and silicon p-n junction diode 14 p2293 A66-27329
- Laser detection of coherent light and superheterodyne and nonlinear parametric studies in optical spectrum 14 p2309 A66-27821
- Difference magnetic analyzer of low-energy electrons and protons in which particles are separated before arriving at detector 14 p2297 A66-28099
- Extensive air shower studies in Australia 15 p2578 A66-29516
- Air showers size, lateral distribution and arrival direction at 5,200 m altitude 15 p2578 A66-29521
- Experimental data concerning electron, photon and muon components of extensive air showers, noting scintillation counters, Geiger-Muller counters, muon detectors, etc 15 p2579 A66-29522
- Hodoscope recordings of extensive air showers with abnormally low content of penetrating particles 15 p2579 A66-29523
- Two large air shower studies of spectrum and isotropy of primary particles 15 p2582 A66-29540
- Collected reports on new development of telescopic, photometric, spectrometric, meteorological, interferometric and detection equipment at various solar and stellar observatories 17 p2923 A66-32020
- Space radiation monitoring systems for categorizing particle types and intensities 17 p2924 A66-32164
- Proton energy spectrum of flux penetrating packs of passive radiation sensors on Gemini IV and V missions 17 p2865 A66-32185
- Detection and measurement techniques for collisionless MHD shock wave propagation in interplanetary space, using bistatic-radar Earth-to-spacecraft transmissions 17 p3002 A66-32522
- Lidar detection of backscatter from upper atmosphere 17 p2875 A66-32929
- Automatic reduction of recorded flight data from balloons equipped with radiation detectors and SPARMO telemetry 17 p2926 A66-33148
- Far IR radiation detected at visible frequency, using nonlinear optical mixing with lasers 17 p2959 A66-33322
- Semiconductor radiation detectors including diffusion, surface barrier, and lithium-doped types 18 p3156 A66-34412
- Primary cosmic radiation modulation study by Ariel I and airborne detector 18 p3180 A66-34770
- Air shower detection with radio receiving system, broadband band helical antenna and Cerenkov particle detector 18 p3115 A66-35119
- Solar and sidereal time variations of small air showers measured by array of water Cerenkov detectors 18 p3213 A66-35143
- Scintillation and semiconductor counter - Symposium, Washington, D.C., March 1966 19 p3358 A66-35906
- Radiation detectors in radiobiology, photobiology and nuclear medicine 19 p3289 A66-35907
- Channelled electron multiplication mechanism, discussing ionic feedback and saturation effects 19 p3359 A66-35910
- Lithium-drifted germanium detector resolution and efficiency as function of temperature for gamma rays 19 p3359 A66-35915
- Low-noise charge sensitive preamplifier for semiconductor detectors using paralleled field effect transistors 19 p3318 A66-35917
- Fluctuations in energy absorbed within definite periods of time by plane-surface thermal emission sensors of arbitrary dielectric permeability 20 p3560 A66-37660
- Intensity and uniformity monitor for solar simulators using thermopile as detector 22 p3891 A66-40229
- Thin film thermal radiation detector noting construction, calibration, performance, error sources and advantages of pyroelectric over thin film gauges 24 p4208 A66-42179
- Vacuum UV radiation measurement from high temperature nitrogen, detecting radiation from shock layer of ballistic model 24 p4208 A66-42182
- Windowless total radiation gauge for shock tube measurements of high temperature gas radiance 24 p4208 A66-42183
- Potential sensitivity of energy radiation detectors, examining measurement error causes for radiation power of natural and artificial sources 24 p4172 A66-42523
- Optical heterodyne receiver antenna properties, noting effective aperture of capture cross section vs directional tolerance and detection of doppler shifts in liquid scattered coherent light 24 p4174 A66-42809

RADIATION DISTRIBUTION

- Radiation patterns of transversely polarized corner reflector antenna, using image method 01 p0044 A66-10937
- Energy balance of cylindrically symmetric hydrogen arc immersed in axial magnetic field led to current-voltage characteristic and radial temperature distribution 04 p0554 A66-14298
- Intensity distribution of radiation immediately after leaving laser and after focusing within lens, noting optimum focusing conditions 05 p0698 A66-15853
- Mu-meson flux irregularities, lateral distribution and average characteristics in extensive air showers at 200 mwe depths 07 p1118 A66-17572
- Radiation pattern from circular aperture with symmetrical inphase illumination described by Neumann series, noting sidelobe level 11 p1652 A66-22398
- Unequally spaced array antennas, noting broadband characteristics, high resolution, radiation patterns, etc 11 p1664 A66-22637
- Twelve monthly world maps of daily means of total solar radiation incident on horizontal surface 11 p1702 A66-23156
- Linear source antenna length determined when radiation pattern, approximation function accuracy and superdirective ratio are known 11 p1670 A66-23232
- Long wave radiation and total radiation balance at Earth surface in Arctic region, based on Stefan-Boltzmann formula 12 p1869 A66-24202
- Arctic short-wave atmospheric radiation absorption, long-wave radiation loss, and tropospheric radiation balance 12 p1949 A66-24203
- Radiation pattern of dielectric antenna using integral equations, noting differences between real antenna and idealized linear traveling wave antenna 14 p2250 A66-27140
- Emission of axisymmetric parabolic antenna with antiphase field distribution at aperture, calculating radiation pattern of principal and cross polarization components of field 14 p2250 A66-27142
- Amplitude and phase selection for maximization of directivity of scalar radiation point source 16 p2745 A66-30286
- Model of reentry plasma layer consisting of magnetic line source in ground plane, determining plasma temperature effect, computing radiation pattern of far-zone field 17 p2875 A66-32387
- Optimization of radiation characteristics of satellite mounted antennas 17 p2894 A66-32990
- Intensity of emergent radiation in finite homogeneous slab absorbing and scattering it isotropically, viewed as boundary value problem determined by imbedding techniques 17 p3037 A66-33012
- Instant antenna patterns for estimating far field characteristics, noting location of peaks and zeros of radiation patterns, voltage ratios, etc 18 p3077 A66-34063
- Latitude distributions obtained for nucleonic and neutron components of cosmic radiation during flights from South Africa, compared with Northern Hemisphere distributions 18 p3197 A66-34878
- Radiation from modulated corrugated surface excited by waveguide, noting reflection coefficient, radiation pattern, etc 19 p3302 A66-35724
- Electric dipole radiation through finite conical plasma sheath about reentry vehicle, calculating radiation pattern 19 p3304 A66-36403
- Transformation coefficient and secondary radiation pattern when doubling frequency of focused coherent light beam in approximation of given primary-beam field 20 p3576 A66-37145
- Japanese antenna engineering, discussing linear, microwave, slot and plate antennas, arrangement, radiation and temperature characteristics, etc 20 p3529 A66-37704
- Radiation from open-ended circular waveguide, comparing solution for electromagnetic wave propagation with method based on Huygens principle 20 p3529 A66-37705
- Antenna radiation pattern synthesis for

various array distributions, noting methods applied 20 p3529 A66-37706

Complex modes of open waveguides, noting influence of proper and improper propagation modes on leaky waves 20 p3529 A66-37708

Interchannel generation transfer and multichannel generation in laser with four unsplit levels, noting radiation density, temperature effect and variations in coefficients of losses 21 p3746 A66-38956

Charged particle and electromagnetic wave interaction with nonequilibrium plasma, noting conversion of transverse into longitudinal waves and angular distribution of scattered radiation 21 p3781 A66-39011

Short distance receiving radiation field pattern of phase-biased array of two isotropic point antennas 21 p3713 A66-39373

Maximum permissible error in radiation patterns calculated by Fourier analysis of near field measurements of antennas 22 p3861 A66-39716

Atmospheric turbulence effect on laser beam intensity distribution 23 p4035 A66-41030

Radiation characteristics of filament with triangular current distribution situated along axis of magnetized plasma column, noting guided and space waves excited by filament 24 p4240 A66-42291

RADIATION DOSE

High dosage nuclear radiation tests of hydraulic systems and components for space vehicle use 01 p0014 A66-10113

Ionizing radiation dosimetry for space pilots on short-and long-term space flights 01 p0021 A66-10803

Silicon surface damage, discussing low energy gamma irradiation effect on bulk lifetime and recombination velocity 05 p0729 A66-14565

Small lightweight ion chamber dosimeter for monitoring radiation exposure to spacecraft crew members 05 p0676 A66-14632

Proton irradiation effect on silicon noting fringes 06 p0933 A66-17120

Average tissue dose of intermediate neutrons for irradiation of thin biological object in nuclear reactor 07 p1035 A66-18157

Biological changes due to microwave absorption, examining energy losses due to ion conductivity and dielectric losses due to polarization relaxation in water molecules 09 p1336 A66-20931

Radiation levels on Gemini IV flight including Van Allen belt and South Atlantic Anomaly 15 p2591 A66-29997

Effective thermal radiation surface of humans subjected to omnidirectional radiation 16 p2645 A66-31806

Capability of white mice to sustain extreme accelerations after exposure to ionizing radiation 18 p3058 A66-33844

Radiation doses measured by onboard dosimeters and those fastened to space suits of crews of Voskhod I and Voskhod II compared, noting radiation composition analysis by means of nuclear emulsions 22 p3855 A66-40473

RADIATION EFFECT

Low energy proton effect on thermal control coatings [AIAA PAPER 65-648] 01 p0090 A66-10229

Proton and alpha particle effects on thermal properties of spacecraft and solar concentrator coatings of anodic-coated aluminum, zinc oxide/potassium silicate, etc [AIAA PAPER 65-649] 01 p0090 A66-10230

Bidirectional reflectance measurements to determine optical degradation induced by UV radiation [AIAA PAPER 65-672] 01 p0066 A66-10233

Radiation damage to germanium, silicon, indium and gallium antimonides and arsenides 01 p0119 A66-10373

Overall profile of ophthalmic injury associated with ionizing and nonionizing electromagnetic radiation fields based on human response to radiation exposure 01 p0018 A66-10793

Argon arc stabilized by cooled walls, considering radiation calculated with aid of dependences describing transport properties of argon plasma 02 p0265 A66-11390

Vibration, acceleration and radiation effects on cell division, chromosome behavior and mitotic activity of bone

marrow and spleen cells in mice 02 p0182 A66-11665

Combined effect of carbon impurity atoms and neutron radiation on structure of molybdenum studied by transmission electron microscopy 02 p0248 A66-12193

Variations in resistivity of silicon slices before and after irradiation 03 p0339 A66-12435

Biological effects of laser radiation with reference to intact animals, primate eyes and skin and malignant tumors of animal and human origin 03 p0325 A66-12994

Pulse energy and power of lasers under continuous operating conditions measured, using calorimeters, photoelectric effect of radiation, etc 03 p0379 A66-13205

Effect of radiation on various types of materials and application of irradiation processes to field of industrial technology 04 p0537 A66-13375

Gamma ray and neutron irradiation and temperature effects on wear-life of solid lubricants for aerospace application [ASLE PREPRINT 65AM 5C4] 04 p0524 A66-13398

Corpuscular radiation effect on electronic components during interplanetary flight, assigning safety margins to each component 04 p0493 A66-13606

Chemical etching method useful for electron microscope observation of damage regions of high-energy neutron irradiated n-type germanium 04 p0562 A66-13738

Electrical, IR property measurements and annealing experiments on electron-irradiated oxygen doped germanium 04 p0562 A66-13747

Biological effects of cosmic radiation under laboratory and flight conditions on various craft to study measures for pharmacological and biological protection 04 p0466 A66-14077

Biological hazards of radiation exposure of man in space discussing recovery, delayed effect, injury treatment and dose 04 p0467 A66-14078

Electrical behavior of microplasmas for determination of density and energy level of capture sites induced by radiation in silicon single crystals 04 p0566 A66-14320

Homeopolar semiconductors, discussing radiation recombination parameters on impurity centers with phonon participation 05 p0731 A66-14654

Nuclear and space radiation effects - IEEE Conference, University of Michigan, Ann Arbor, July 1965 05 p0733 A66-14844

Near-Earth radiation damage to silicon semiconductor devices with respect to minority-carrier diffusion length degradation and ionization dose 05 p0733 A66-14846

Predicting equilibrium primary photocurrent from transistor electrical parameters 05 p0734 A66-14847

Methods for measuring and characterizing transistor and diode large signal parameters for use in automatic circuit analysis programs, noting radiation damage 05 p0648 A66-14848

Linvill lumped model in analysis of semiconductor devices in pulsed ionizing radiation environment 05 p0734 A66-14849

High-energy electron and gamma ray damage in silicon transistor gain, noting changes in recombination and bulk damage 05 p0734 A66-14850

Neutron irradiation induced changes in surface state density, substrate resistivity and carrier mobility of MOS transistor 05 p0734 A66-14851

Monolithic integrated circuits regenerative interaction between substrate parasitics and intended semiconductor circuit elements exposed to ionizing radiation 05 p0734 A66-14852

Pulsed IR laser simulating radiation-induced transient ionizations in semiconductor devices and circuits 05 p0693 A66-14853

Electrical and radiation storage time in transistors with respect to majority carrier storage in base, calculating photocurrent 05 p0735 A66-14855

Radiation damage of p-type silicon investigated by Hall effect, noting dislocation density and annealing behavior 05 p0735 A66-14963

Thermoelastic stresses due to cylindrical half-elliptic inclusion with radioactivity

imbedded at surface of elastic half-space 05 p0673 A66-15045

Secondary particle generation in satellite walls due to 0.1 to 20 bev pi-mesons and protons 05 p0756 A66-15411

Radiation damage to crystalline lattices by energetic particles, discussing consequences on physical behavior of solids, particularly ceramics 05 p0738 A66-15471

Radiation effects in electronics - ASTM and ANS Meeting, Syracuse, N.Y., October 1964 05 p0738 A66-15486

Radiation effect on polyethylene at cryogenic temperature 05 p0739 A66-15487

Transient effect of ionizing radiation on semiconductor and insulating materials 05 p0739 A66-15488

Neutron radiation effects on silicon field effect transistors 05 p0739 A66-15489

Analytical models for predicting semiconductor circuit responses to transient ionizing radiation 05 p0739 A66-15490

Proton and electron damage to silicon semiconductor device 05 p0739 A66-15491

Ionizing radiation effect on transistor gain, examining X-ray test data 05 p0740 A66-15492

Increased reverse current and decreased gain in transistors due to Co 60 irradiation 05 p0740 A66-15493

Transistor gain degradation rates in active and passive state of operation 05 p0740 A66-15494

Radiation test data on solid state equipment of tracking and command system in SNAP-10A environment 05 p0740 A66-15495

Photon radiation effect on ionization of cesium vapor 05 p0615 A66-15533

Gastric secretion after simultaneous action of radiation and hypoxia 06 p0810 A66-16058

Detectability of coherent and incoherent signals, discovering effect of quantum nature of radiation on signal detection at optical frequency 06 p0828 A66-16110

Book on high energy particles dealing with concepts and techniques for studying properties of material through interaction with cosmic radiation 06 p0944 A66-16376

Anisotropic broadening of X-ray diffraction lines and increase in lattice perimeter resulting from neutron irradiation of beryllium oxide powder 06 p0896 A66-16539

Radiation damage resistance and characteristics of aluminum- and boron-doped silicon solar cells, noting annealing 06 p0809 A66-16567

Radiation damage to integrated silicon circuit and individual transistors when exposed to neutron flux 06 p0853 A66-16665

Silicon planar transistors, noting electron flux induced surface damage mechanism 06 p0854 A66-16684

Nuclear reactor radiation effect on microstructure, size of elementary cells, hardness and electrical conductivity of high-melting compounds 06 p0897 A66-16693

Interaction of semiconductor valence electrons with free radiation field 06 p0928 A66-16772

Hall effect and conductivity measurements of carrier removal rate in oriented specimens of n-type Si under electron irradiation at energies from 0.3 to 2.0 mev 06 p0930 A66-17049

Physics of semiconductors - International Conference, Paris-Royaumont, July 1964, Volume 3, Radiation damage in semiconductors 06 p0930 A66-17111

Radiation damage in silicon and germanium semiconductors 06 p0932 A66-17112

Radiation damage in nondegenerate germanium at low temperatures, using hot carrier technique for measuring resistivity and Hall coefficient on antimonide doped samples 06 p0932 A66-17114

Length change, X-ray lattice parameter, small angle X-ray scattering, electron microscopy and thermal conductivity measurements related to radiation-induced defects in semiconductors 06 p0933 A66-17117

Effectiveness of measurements of X-ray diffraction intensities as probe of lattice defects introduced in perfect germanium crystals by energetic particle irradiation 06 p0933 A66-17121

Electron paramagnetic resonance analysis of low temperature irradiation effects on silicon 06 p0934 A66-17122

- irradiation of very pure silicon with intentionally introduced residual impurities, obtaining photoconductivity
 measurements 06 p0934 A66-17123
 Semiconductor radiation damage in III-V compounds indium antimonide, gallium arsenide and indium arsenide, including values of threshold displacement energies, post-irradiation recovery, etc 06 p0935 A66-17129
 Electron irradiation and thermal effects on electrical transport properties of n-type II-VI semiconductors 06 p0935 A66-17131
 Semiconducting properties of electron irradiated silicon carbide 06 p0936 A66-17138
 Point defect mobility and annealing in irradiated germanium and silicon by electron or gamma ray irradiation 06 p0937 A66-17140
 Drift mobility of radiation induced defects in silicon between zero and 120 degrees 06 p0937 A66-17141
 Impurity concentration effect of electron irradiation damage in photovoltaic silicon cell with shallow p-n junction 06 p0938 A66-17145
 Nature of radiation effects in semiconductor devices determined from alteration of electrical characteristics 06 p0938 A66-17149
 Radiation tests on N/P silicon solar cells and other cover materials performed with one mev energy electrons for integrated fluxes, noting effects on physical, optical, electrical and thermal characteristics 07 p0990 A66-17238
 Low temperature alpha radiation and subsequent isothermal recovery effects on electron structure of gold, relating resulting failures to Frenkel defects 07 p1048 A66-17303
 Microhardness changes in polycrystalline aluminum irradiated by alpha, beta and neutron particles 07 p1092 A66-17305
 UV irradiation effect on electrical conductivity of zinc oxide single crystals 07 p1097 A66-17469
 Steady state temperature distribution for cylindrical shells under space conditions, calculating effect of internal radiation and surface coatings 07 p1143 A66-17591
 Accelerator energies to simulate space radiation damage effects in spacecraft systems 07 p1018 A66-18145
 SiC p-n junctions as rectifiers and radiation detectors, studying degradation in charged particles and neutron fluxes 07 p1100 A66-18147
 Degradation of silicon dioxide coated silicon planar transistors after exposure to space-type ionizing radiation, using MOS structure 07 p1010 A66-18148
 Effect of space environment on ceramic materials, considering atmosphere (including vacuum), thermal, radiation and meteoroid environments 07 p1147 A66-18307
 Neutron and electron irradiation damage in uniform silicon avalanche junction diode and effect on avalanche pulse 07 p1012 A66-18410
 600-mev proton irradiation effects on density and mobility of majority carriers in n-type germanium 08 p1267 A66-18647
 Space radiation environment and guidelines for designing satellite electronic equipment for reliable operation in space 08 p1301 A66-18731
 Ionizing radiation effects in mice protected with hypoxia or with chemicals 08 p1175 A66-19086
 Space radiation vs MOS devices and circuits 08 p1196 A66-19497
 Irradiation of indium antimonide with slow neutron 08 p1276 A66-19614
 Book on chemical protection of life against ionizing radiation, with experimental and clinical data and list of protective compounds 09 p1336 A66-20300
 Radiation effects on electronic components noting sensitivity to gamma, fast neutron and electron radiation 09 p1359 A66-20969
 IR absorption spectra of oxygen-defect complexes in irradiated silicon 10 p1581 A66-21737
 Text on life into space covering space biology, extraterrestrial environment, temperature, pressure, acceleration, radiation effects, etc 10 p1492 A66-22062
 Retention of semiconductor properties by gallium arsenide after irradiation by fast-neutron flux 10 p1589 A66-22167
 Oxidation of artificial graphitic carbon 14 oxidized to carbon 14 dioxide in presence of nonsterile soils, noting inhibition of biological activity by electron beam irradiation 11 p1649 A66-22304
 Satellite protective coatings using vacuum UV radiation absorbers for temperature control 11 p1720 A66-23125
 Effects of long-wave radiation exchange near Earth surface, extrapolating air temperature measurements to ground to estimate surface temperature, obtaining equivalent black body temperature of ground 11 p1702 A66-23155
 Steady state modulation by given frequency external signal of electron flow through straight waveguide, determining relation of counterirradiation phase and amplitude to system parameters 12 p1921 A66-24210
 Chromosome injury in mouse bone marrow due to distant ionizing radiation 12 p1806 A66-24396
 Electric conductivity and spectral distribution of impurity photoconductivity of n-and p-silicon bombarded by fast neutrons, noting role of annealing 12 p1929 A66-24450
 Length changes in electron irradiated high purity germanium at liquid helium and nitrogen temperatures, noting large initial expansion 13 p2157 A66-25047
 Irradiation effects by fast neutrons and gammas on collector cut-off current and base current at low current densities analyzed on silicon planar transistors 13 p2032 A66-25486
 Transmission electron microscopic observations on preexisting dislocation as sinks for neutron-irradiation-induced point defects and dislocation reaction to subsequent deformation 13 p2107 A66-25586
 Cosmic and UV radiation effects on breakdown of DNA and production of tumors in mice 13 p2008 A66-25642
 Beam power increase and radiation damage effect on high power accelerator components, determining permeability change 13 p2058 A66-25743
 Enhanced photoelectron emission between 200 and 1300 angstroms, using polygonal cathode to absorb incident radiation 13 p2131 A66-25823
 Homeopolar semiconductors, discussing radiation recombination parameters on impurity centers with phonon participation 13 p2167 A66-25929
 Free radical reactions in irradiation of model systems and role of radicals in radiation damage 13 p2010 A66-26227
 Radiation damage in deoxyribonucleoproteids at molecular and supermolecular levels 13 p2010 A66-26228
 Radiation effects on silicon p-n junction diode solar cell and use of transparent radiation shield 14 p2225 A66-27107
 Resistance transfer factor episode analyzed by measuring inactivation by cobalt gamma radiation, phosphorus and tritium, suggesting existence of DNA 14 p2228 A66-27308
 Ablation of reentry heat shields, discussing fiberglass reinforced phenolic resin, charring, graphite, radiation, etc 14 p2412 A66-27484
 Disturbance propagation in baroclinic atmosphere in presence of radiation and turbulent heat conduction 14 p2325 A66-27535
 Protection and hazard to eyes of uninformed operators and bystanders from laser light 14 p2309 A66-27668
 Space probe sterilization procedures, considering heat and radiation 14 p2230 A66-27844
 Random lighting exposure effects in rats and changes caused in adrenal cortical function, circadian rhythm, endocrine system, group running activity, etc 15 p2429 A66-28487
 Emission bands in electroluminescence from gallium arsenide diodes, noting intensity at high and low voltages and radiation and doping effect 15 p2562 A66-28714
 Recombination centers in gamma irradiated silicon either float-zoned or melt-pulled and doped with phosphorus, arsenic or boron 15 p2562 A66-28721
 Effect of combined action of accelerations, vibration and radiation of nuclei of bone marrow cells in mice 15 p2437 A66-29478
 Postirradiation restitutive capacity of yeast cell suspensions in wort-agar and water after exposure to 1300 rad/min ionizing radiation 15 p2438 A66-29485
 Radiosensitivity differences in yeast cells in terms of differences in chromosome-replication and genetic-structure-restitution intensities 15 p2438 A66-29486
 Czechoslovakian space research including satellite observation, radio emissions, solar activity, Doppler effect measurement, radiation hazards, etc 15 p2601 A66-29912
 Anisotropic broadening of X-ray diffraction lines and increase in lattice perimeter resulting from neutron irradiation of beryllium oxide powder 15 p2524 A66-29986
 Combined Irradiation Facility for simulation of selected space environments used to study optical behavior of materials 16 p2676 A66-30437
 Shock and blast, thermal radiation and nuclear radiation as basic elements of nuclear weapon environment, analyzing effect on personnel and materiel 16 p2745 A66-30440
 Unscanned large area uniform electron beams for space /Starfish/ radiation environmental studies, using magnetic quadrupole pair and beam collimation 16 p2676 A66-30443
 Nuclear radiation hardened telemetry transmitter in L-band, noting tests and radiation effect problems 16 p2650 A66-30554
 Transistor surface properties degradation by simulated space radiation environment 16 p2662 A66-30998
 Proton radiation induced changes in length of silicon slices 16 p2779 A66-31093
 Conservation equations for cylindrical blast and radiation effect on shock layer profiles of blast wave 16 p2686 A66-31114
 Hypersonic flow past blunt body near stagnation point examined, noting surface layer, characterized by increased density and decreased entropy of gas 16 p2630 A66-31305
 Choriorretinal lesion produced by pulsed ruby laser beam and complex changes in retinal excitability in cats 16 p2641 A66-31761
 Feasibility of doping techniques for eliminating extraterrestrial solar degradation of ZnO used as pigment for spacecraft thermal control surfaces 17 p2938 A66-31961
 Hazards of macrofractionated gamma ray irradiation hazards upon Rhesus monkeys 17 p2858 A66-32189
 Transmittance of optical materials between 1050 and 3000 angstroms, noting effect of simulated high energy space environment 17 p2979 A66-32615
 Multiple fracturing caused by putting intense radiation into solid in time short compared with elastic relaxation time 17 p2979 A66-32637
 Pathomorphological changes in hemopoietic organs of mice under combined effects of proton radiation and vibration and gamma radiation and acceleration 17 p2861 A66-32937
 Irradiation of indium antimonide with slow neutron 17 p2983 A66-33128
 Fluorescence bands produced by electron bombardment of ZnSe show threshold of annealing stages of radiation damage 17 p2985 A66-33154
 Crystal lattice defects in metals caused by neutron irradiation 18 p3120 A66-33621
 Photoconductivity induced in uncolored sodium chloride and aluminum oxide single crystals by radiation from ruby laser 18 p3154 A66-33939
 Radiation-induced gas ionization effects on surface properties of shielded transistors 18 p3076 A66-33984
 H, C, N, O, Cl, Ca and Al negative ion formation in plasma, noting role of continuous radiation, formation temperature and metastable and stable states 18 p3144 A66-34041
 Radiation damage in solids including crystal lattice defects, thermal migration, channeling and focusing effects, etc 18 p3155 A66-34136
 Current decay in anthracene irradiated by gamma ray 18 p3157 A66-34476

Fast neutron effect on conductivity and thermoelectric power of germanium, noting decrease of conductivity due to phonon scattering 18 p3157 A66-34626

Radiation-induced solid state explosive polymerization of acetaldehyde 19 p3295 A66-35333

Interaction of semiconductor valence electrons with free radiation field 19 p3434 A66-35369

Absorption spectra modification in silica ceramics after gamma irradiation from Co-60 19 p3388 A66-35463

Space nuclear reactor induction of positive potential and remedy by ambient plasma or positive-ion source 19 p3398 A66-35493

Interstitial dislocation loops in beryllium oxide irradiated at high temperatures 19 p3398 A66-35495

Retention of semiconductor properties by gallium arsenide after irradiation by fast-neutron flux 19 p3441 A66-35781

Catastrophic failures in glass diode packages and integrated circuit chips exposed to high-intensity electron pulse 19 p3318 A66-35920

Flame temperature measurement using response time of Wolfram-rhenium thermocouples to correct radiation errors in optical pyrometer readings 19 p3360 A66-36160

Time-dependent response of polycrystalline cadmium selenide thin film transistor to transient high energy radiation 20 p3525 A66-37316

Transient radiation response and permanent radiation damage in monolithic silicon-junction-transistorized integrated circuit 20 p3526 A66-37318

Ionizing radiation effects on silicon planar bipolar transistors to determine degradation mechanisms 20 p3526 A66-37319

Gamma irradiation from Co 60 effect on indium antimonide, determining defect formation on dose and limiting position of Fermi level for n-and p-type material 20 p3617 A66-37552

Electric conductivity and spectral distribution of impurity photoconductivity of n-and p-silicon bombarded by fast neutrons, noting role of annealing 20 p3619 A66-37682

Geomagnetically trapped radiation effects on solid state electronic device aboard unmanned vehicles 20 p3534 A66-38349

Geomagnetically trapped radiation damage to orbiting solar cells and transistors both before and after Operation Star Fish 20 p3503 A66-38350

Radiation effect on position of lower cloud boundary 20 p3594 A66-38370

Fast-neutron irradiation effects on photoconductivity spectra and induced crystal structure defects for n-and p-type gallium arsenide single crystals 20 p3624 A66-38415

Isochronal and isothermal stage II recovery in high energy electron irradiated n-type InSb semiconductor, based on Hall coefficient and electroconductivity 21 p3800 A66-38994

Particle acceleration by plane wave along magnetic field increased by self-induced resonance, analyzing radiation effect on particle acceleration 21 p3782 A66-39017

Cosmic radiation and space flight effects on lysogenic bacteria and human cells in culture 21 p3700 A66-39315

Laser radiation effect on metals, noting disintegration mechanism, indentation formation and vapor formation 22 p3930 A66-39763

Supersonic transport radiation hazard theoretically analyzed, including physiological aging, increased genetic burden and status of fractional cell lethality 22 p3854 A66-39798

UV radiation effect on polyethylene-terephthalate film tensile strength in vacuum and air 22 p3937 A66-39818

Hypersonic gas flow past blunt body problem solved by integral correlation method, taking into account radiation effects and gas dynamic parameter distribution in shock wave layer 22 p3897 A66-39902

Fission spectrum neutron damage and gamma ray damage in n-type Si, comparing results of measurements by degradation of

minority carrier lifetimes 22 p3962 A66-40086

Seed water content influence on oxygen effect as detected in gamma irradiated barley seeds and prolonged post-storage period in terms of biological effect and paramagnetic resonance signal 22 p3855 A66-40378

Bacteria survival and mutation in radiation environment on Voskhod I and II 22 p3855 A66-40474

Steady state modulation by given frequency external signal of electron flow through straight waveguide, determining relation of counterradiation phase and amplitude to system parameters 22 p3878 A66-40574

Thin film microcircuit fabrication for space environment application 22 p3882 A66-40792

Radiation noise effect on laser optical properties, noting density vs resonator characteristics, energy spectrum, etc 22 p3933 A66-40917

Advances in nuclear science and technology, Volume 3 23 p4111 A66-41210

Transient radiation effects in electronics 23 p4111 A66-41211

Radiation induced chemical decomposition in inorganic solids such as alkali metals and metallic sulfates 23 p4111 A66-41212

Peculiarities in effects of ionizing radiation on space vehicle crew and on functioning of central nervous system 23 p4026 A66-41335

X-ray irradiation effect on venous blood flow in rabbit brain vessels 23 p4027 A66-41344

Neutron, proton and gamma radiation effect on small animals examined, using conditioned response drinking method 23 p4027 A66-41345

Gamma and fast neutron radiation effect on nervous activity of mice examined, using conditioned reflex drinking method 23 p4028 A66-41346

Gamma radiation, fast neutron and proton effect on conditioned and motor responses, nervous activity, excitation and inhibitory processes of white rats 23 p4028 A66-41347

Effect of total chronic and acute gamma radiation on higher nervous activity of white rats 23 p4028 A66-41348

Prolonged gamma-radiation induced electromyographic characteristics of vestibular reflex guinea pig hind-leg muscle 23 p4028 A66-41349

Vestibular analyzer changes of guinea pigs exposed to twofold vibration and prolonged gamma irradiation 23 p4028 A66-41350

Conditioned motor food reflexes of rats exposed to vibration, vibrostand noise and X-ray 23 p4028 A66-41351

Nongray radiation effects on laminar boundary layer of absorbing gas over flat plate, using absorption coefficient with stepwise frequency dependence 23 p4012 A66-41903

Inviscid flow model for stagnation region behind strong shock, examining inviscid energy for radiating gas including self-absorption effects 23 p4150 A66-41906

Performance degradation of transistors and solar cells due to terrestrial radiation effects, from studies on Tiro Operational Satellite systems 24 p4247 A66-42097

Disturbance propagation in baroclinic atmosphere in presence of radiation and turbulent heat conduction 24 p4233 A66-42321

Luminescence spectra of meteorites of different classes using proton excitation, giving estimates of radiation conversion efficiency 24 p4273 A66-42363

Radiation response of low power nuvitors, noting cause of grid current and relation between grid structure and induced current 24 p4258 A66-42961

RADIATION EMISSION

Variations of flux of solar radio emission in 3 to 450 cm range over 11-year cycle /1953 to 1963/ 05 p0748 A66-14868

Jupiter emission data re-analyzed, supporting Bigg finding of control by satellite X 05 p0760 A66-14946

Radiative lifetimes of strongest vacuum UV multiplets of B I, B II, C I, C II, N I and N II measured by phase shift method 07 p1083 A66-18423

Solar X-ray emission due to electron transitions involving lowest energy levels 10 p1597 A66-21081

Radiation energy emitted by magnetic dipole passing along axis of cylindrical waveguide resonator and waveguide of periodic structure 10 p1570 A66-21999

Hot plasma probed with atomic beam in presence of intense self-radiation flux and magnetic field impulse 10 p1571 A66-22017

Solar radiation flux received on surface at any prescribed attitude calculated in terms of total radiation 11 p1702 A66-23157

Intensity of early postexplosion radiation field and high energy electron emission from supernovae 12 p1938 A66-23914

Time-temperature total hemispherical emittance study of gold-plated 304 stainless steel in temperature range of 1000-1800 degrees F 12 p1895 A66-24376

Hard X-rays from exploding wires, noting high penetrating power after current-dip 13 p2127 A66-25573

Radiation due to axially oriented electric dipole situated on axis of infinite cylindrical column of insulating free space surrounded by uniaxially anisotropic plasma 13 p2026 A66-26108

Raman light forward emission in liquids when illuminated by laser, obtaining stimulated Raman action without feedback, which suggests existence of mechanism contributing to modulation of medium polarizability 13 p2097 A66-26160

Ferrite controlled polarization of slot radiator by rectangular waveguide excited by H10 wave 14 p2252 A66-27252

Effective emittance of machined surfaces determined through groove models numerically analyzed 14 p2334 A66-27429

Emission from hot low-density plasma due to bremsstrahlung, radiative recombination and electron collision-induced line emission 14 p2345 A66-28120

IR radiation from gallium arsenide prepared with ohmic contacts and excited by various nanosecond pulses, noting radiation above Gunn effect instability region 15 p2561 A66-28688

Meteor luminescence during atmospheric motion, obtaining radiation coefficient as function of cross sections of particle excitation and pulse transfer processes 15 p2596 A66-29143

Boundary layer problem concerned with effects of radiation absorption and emission for flow of high speed gas over flat plate [AIAA PAPER 66-521] 18 p3047 A66-33662

Radiation energy emitted by magnetic dipole passing along axis of cylindrical waveguide resonator and waveguide of periodic structure 18 p3088 A66-34969

Hot plasma probed with atomic beam in presence of intense self-radiation flux and magnetic field impulse 19 p3407 A66-36095

Turbulent plasma and UHF radiation interaction, determining conductivity and density 19 p3417 A66-36526

Approximate solution for dipole radiator field in space containing two conducting long cylinders with parallel axes 20 p3512 A66-37146

Ellipsoid mirror reflectometer using radiant flux from IR monochromator 20 p3561 A66-38297

Generalized reciprocity theorem for antenna systems containing anisotropic media and antenna systems radiating directly through arbitrary apertures 21 p3711 A66-38835

Radiation fronts in gas dynamics, examining flow through or behind aerodynamic shock 23 p4062 A66-42052

Avalanche radiation from bulk of long thin forward-biased p-n-p silicon diodes 24 p4180 A66-42258

Elimination of singularity in power radiated by point electric dipole in unbounded magnetoplasma within certain frequency range 24 p4241 A66-42373

RADIATION EXPOSURE

Measurement and evaluation of radiation exposure in space flight, noting tissue equivalent system for ionization recording 02 p0182 A66-11647

Radiobiological effects caused by ionizing radiation in mice pre-exposed to effect of acceleration 02 p0182 A66-11664

Gemini V failures and successes, evaluating

spacecraft and rendezvous guidance and navigation systems performances and prolonged exposure to space environment 02 p0296 A66-12011
Pulsed microwave irradiation of dogs noting body weight, rectal temperature and hematologic response 03 p0326 A66-13351
Time dependent fluctuations in photoconductivity of Cu doped low ohmic n-type gallium arsenide exposed to IR radiation 07 p1099 A66-17876
Transient response of MOS-FET transistor investigated by exposing p-and n-channel devices to 600 kev flash X-ray machine 08 p1196 A66-19498
Astronauts with thin shielding in radiation exposure from heavy nuclei in solar particle beams 09 p1336 A66-20521
High oxygen at reduced pressure effect on metabolism of radioactive acetate in rats 15 p2430 A66-28658
Rocket and balloon-borne exposure study of terrestrial microorganism survival in space 15 p2441 A66-29965
Vibration exposure of mice 4 and 24 hours prior to irradiation tends to lessen mortality and increase mean longevity 17 p2861 A66-32938
Measurement and evaluation of radiation exposure in space flight, noting tissue equivalent system for ionization recording 20 p3509 A66-38163

RADIATION FIELD

Microwave radiation and surface patterns formed during application of high currents and magnetic fields to n-InSb 01 p0117 A66-10244
Radiation conditions in terms of motion equations of classical elasticity and field equations show uniqueness of solution to wave scattering problems 01 p0153 A66-10431
Laser with diffraction limited radiation pattern 01 p0082 A66-10450
Relations for interaction between waveguide field and ferrite obtained from reflection and transmission coefficients, using perturbation method 02 p0196 A66-11416
Electromagnetic field and radiation pattern of Hertzian electric dipole antenna in conical sheath 02 p0191 A66-11803
Quantum statistics for analyzing radiation fields interacting with other systems applied to model laser operating as linear amplifier 03 p0379 A66-13260
Laser with diffraction limited radiation pattern 03 p0380 A66-13313
Atmospheric radio noise bursts arising from radiation fields of electrical discharge in LF band at Bangalore, India 04 p0475 A66-13428
Radiation characteristics of isolated circular optical waveguides supporting low-order dielectric waveguide modes for combinations of modes, wavelength, diameter and aperture 05 p0648 A66-14910
Current and directive gain for maximum directivity of orthogonal antenna array with individual elements possessing directivity 05 p0651 A66-15879
Measurement error of radiation pattern parameters assuming polarization of transmitting antenna coincides with that of receiving antenna 06 p0838 A66-15894
Concentric ring antenna arrays with low sidelobes, estimating currents from Fourier-Bessel series 06 p0825 A66-16017
Radiation fields of moving electric dipole falling off faster than $1/r$, having two nonspinning point charges, variable point and moving at relativistic velocities 06 p0832 A66-16453
ULF radiation of polar lights, detailing apparatus for receiving and recording signals 06 p0876 A66-16592
Slab with periodically modulated refractive index, predicting short wave radiation pattern emitted 06 p0836 A66-16983
Circuitry of system for simultaneously obtaining several independent radiation patterns from one ultra-short-wave receiving antenna 07 p1005 A66-17344
Interaction of radiation from distant sources with intervening medium 08 p1288 A66-18785
Solar corona emission line polarization resulting from anisotropic effect of photospheric radiation

field 09 p1442 A66-20463
Nonlinear optical effects of third order in crystals, specifically in Hamiltonian of system containing electrons, nuclei and radiation field 09 p1387 A66-20928
Internal diffuse radiation field computed in finite homogeneous isotropically scattering slab illuminated by parallel rays of radiation 10 p1556 A66-21923
Angular autocorrelation function of circular-aerial radiation pattern 11 p1662 A66-22397
Geometrical theory of diffraction applied to calculation of radiation pattern and impedance of monopole antenna 11 p1663 A66-22545
Radiation field and surface waves generated by linearly phased electric line current and electric current component oriented in plane parallel to unidirectional conducting screen, solved by modal method 11 p1652 A66-22549
Antenna theory, analyzing radio astronomical methods such as antenna axis, radiation pattern, gain, efficiency, etc 11 p1658 A66-23219
Nonsteady radiation field of antenna systems for arbitrary signals via Huygen-Kirchhoff principle 11 p1670 A66-23225
Spatial amplitude of field of ideally parallel laser beam focused by optical systems with spherical aberration 12 p1889 A66-23778
Spectrum, energy and radiation field of charge moving above anisotropically conducting surface 12 p1921 A66-24206
Radiation field in plane-parallel semiminfinite medium illuminated by high-directivity beam bounded from above by mirror surface whose reflection is calculated for various scattering indicatrices 12 p1914 A66-24245
Approximate theory for lumped impedance loaded traveling wave linear antenna, considering possibility of nondissipative loading 12 p1841 A66-24631
Density operator of optical maser quantized by radiation, with application to laser oscillators 13 p2103 A66-26215
Models of matter-electromagnetic field interaction for gas lasers, using perturbation theory 13 p2103 A66-26216
Periodic modulations of energetic electron fluxes observed throughout distant radiation zone by Geiger counters aboard satellites suggest MHD wave activity 13 p2175 A66-26354
Zonal reflectors creating fan-type radiation patterns possess structural parameters and electrical characteristics for use as high directional antennas 14 p2252 A66-27247
Friedmann cosmological equation for noninteracting mixture of radiation and dustlike matter 14 p2380 A66-27275
Radiation efficiency of short whip antenna with loading coil cooled to 77 degrees K and 4.2 degrees K at approximately 20 mc frequency 14 p2257 A66-27925
Satellite-emitted short radio wave field intensity and ionospheric parameters 15 p2447 A66-28493
Cumulative coupling and impedance mismatch and radiation pattern problems in large uniformly spaced flat phased array 15 p2456 A66-28585
Monopulse channel phase measurement by composite radiation pattern of feed 15 p2456 A66-28589
Penetration and absorption of solar optical, UV and EUV radiation in upper atmosphere/ionosphere, exosphere and ozone layer upper boundary/ 15 p2573 A66-28683
Kinetic theory of two-photon absorption from single mode of radiation field, noting dependence on coherence properties of field 15 p2544 A66-28943
Characteristics of lunar radio emission considered, taking into account averaging effect of antenna radiation pattern 17 p2999 A66-32237
Radiation pattern of linear nonequidistant antenna array 19 p3311 A66-35307
Radiated fields for plasma external to dielectric coating surrounding biconical antenna, equivalent circuit developed for terminating impedance 19 p3305 A66-36422
Optimum field thicknesses of radiation-resistant drift-field solar cells obtained by

continuity equation 20 p3500 A66-37492
Electric component of radiation field from same flashes recorded with histograms of product of field strength and distance, showing concentration around mean values 20 p3553 A66-38076
Borgnis U function applied to design of electron tube having drift space between collector and grid controlling current 22 p3876 A66-40173
Spectrum, energy and radiation field of charge moving above anisotropically conducting surface 22 p3956 A66-40570
Radiative equilibrium of electron gas in magnetic field based on quantized particle motion and perturbation theory 23 p4101 A66-41365
Quantum theory of Q-spoiled laser, noting statistics of number of photons in mode bear qualitative resemblance to Poisson statistics 23 p4077 A66-41373
Estimated greatest permissible mirror misalignment, active medium inhomogeneity and extra-axial beam losses for artificial realization of very narrow radiation pattern in real laser 23 p4078 A66-41449
High accuracy directional recording of cosmic ray flux components, using counter telescope 24 p4213 A66-42943
Radiated pressure field due to LF vibration of slender body of revolution expressed as distribution of sources and doublets along body axis 24 p4238 A66-43047

RADIATION FUNCTION

Hamilton variational principle formulation of damped acoustical-structural vibration motion equations, with application to radiation problems 24 p4291 A66-42858

RADIATION HAZARD

Radiation hazard for cosmonaut inside or outside spaceship from Earth radiation belt, considering electron radiative effect, tissue sensitivity, etc 02 p0182 A66-11663
Mathematical evaluation of RF energy effects on electroexplosive devices, taking into account limited maximum response of circuits 03 p0334 A66-12570
Interplanetary plasma origin, behavior and effects on space flight studied by space probe 04 p0576 A66-13501
Radiation hazards to astronauts in interplanetary flight from primary cosmic rays, Van Allen belts and chromospheric bursts 10 p1595 A66-21047
Space radiation environmental hazard to manned space flight 14 p2231 A66-28415
Radiation environment in near Earth space and effect on humans during space flight to Moon 15 p2435 A66-29454
Simulation of solar flare radiation effects on white mice in spacecraft along circumlunar trajectory 15 p2445 A66-29512
Biological hazard of radiation doses to which passengers of high-flying Concorde aircraft may be subjected, considering use of in-flight warning meter 19 p3452 A66-35796
Radiation dose measurements and predictions for space vehicle, noting human response 20 p3665 A66-38352
Electromagnetic and corpuscular radiation hazards to astronauts deduced from data on dogs 24 p4186 A66-43140

RADIATION INTENSITY

Cadmium telluride laser with electron excitation 01 p0084 A66-11188
Seasonal variations of cosmic ray intensity in stratosphere compared with temperature variation in atmosphere 02 p0281 A66-11333
Changes in nature of 27-day variations in cosmic ray intensity 02 p0281 A66-11334
Lunar-diurnal variation of cosmic ray intensity based on observations of neutron and meson component 02 p0281 A66-11336
Mesospheres radiative and photochemical response to fluctuations in UV and visible radiation 02 p0222 A66-11821
X-ray spectrum of plasma electrons after passage through plane layers of obstacle immersed in plasma, setting up equations for electron energy and density 03 p0397 A66-12392
Intensity of corona as index of solar corpuscular radiation noting characteristics of geomagnetic and solar activity 03 p0422 A66-12911
Integrated intensity measurements on fundamental and first overtone band

systems of carbon monoxide between 2500 and 5000 degrees K 04 p0596 A66-13647

Radiation of finite volume of nonequilibrium plasma, discussing integral flux parameters 04 p0552 A66-13873

Background radiation density in isotropic homogeneous universe, discussing Olbers paradox 04 p0574 A66-14017

Stratospheric cosmic ray intensity, discussing Soviet measurements above Antarctica 05 p0751 A66-15375

Secular changes in stratospheric cosmic ray intensity from 1962 to 1964 05 p0754 A66-15397

Primary cosmic radiation, discussing variations of time and space of intensity, energy spectrum and chemical composition 06 p0947 A66-16573

Time dependence of laser operation modes, using laser model with two oscillation types 06 p0891 A66-16626

Directional intensity of electron distribution of energies larger than 40 kev with respect to pitch angles in inner belt from Cosmos V data 06 p0951 A66-17172

Energy and density spectra of X-ray photons in extensive air showers and in stratosphere 07 p1118 A66-17574

Directional intensities of primary cosmic rays near equator by modified scintillator Cerenkov telescopes 07 p1120 A66-17979

Cosmic ray meson intensity diurnal variations measured, using neutron monitor and Geiger counter 07 p1126 A66-18010

Presence of genuine sidereal daily cosmic ray intensity variation in 1961 07 p1126 A66-18011

Correction of cosmic ray meson intensity monitor counting rates for atmospheric temperature variation 07 p1127 A66-18012

Differential changes between cosmic ray intensity level inside and outside ecliptic plane by comparison of intensities recorded in polar and nonpolar regions 07 p1131 A66-18240

Mean lives of 3s, 3d, 4s, 4p and 4d states in hydrogen and relative initial radiation intensities 07 p1083 A66-18420

Sine of angle of incidence of solar radiation graphically represented as geometrical factor of irradiation intensity 08 p1283 A66-18626

Dynamic frequency spectra of short period variations of cosmic ray intensity calculated on basis of random processes 08 p1283 A66-19020

Diurnal and semidiurnal variation of cosmic ray intensity investigated with aid of selective frequency filters 08 p1283 A66-19021

Microwave radiation from high voltage plasma with oscillating electrons and resulting cyclotron frequency harmonics 08 p1264 A66-19180

Intensity variation of nucleonic component of atmospheric cosmic radiation, geomagnetic threshold rigidity and calculation of cosmic ray equator 08 p1284 A66-19398

Galactic and metagalactic cosmic gamma- and X-ray intensities 09 p1437 A66-20203

Complex Doppler effect in dense cold magnetized plasma 09 p1343 A66-20339

Intensity estimation for lunar X-rays excited by high energy terrestrial electrons from solar stream induced geomagnetic cavity 09 p1442 A66-20388

Sidereal component of diurnal variation of cosmic ray intensity 09 p1442 A66-20461

Chromospheric flares effect on hard component of cosmic rays as function of solar coordinates during quiet and magnetically disturbed days 11 p1762 A66-22412

RF spectrum of OH radiation in interstellar space, including emission intensity and linear polarization 11 p1774 A66-22963

Single pulse operation of lasers, noting energy storage and amplification effect for four- and three-level active medium 12 p1889 A66-23667

Cadmium telluride laser with electron excitation 12 p1890 A66-24009

Effects of AZA and PCA on radio wave propagation in Antarctic, noting reliability and radiation power

requirements 12 p1817 A66-24275

Intensity variations of 5303 and 6374 angstrom coronal lines during last two solar cycles compared 12 p1952 A66-24931

Type IV radio event of February 1965, noting four bursts preceded by decreases in background radiation intensity interpreted as absorption of type IV 12 p1952 A66-24966

X-ray spectrum of plasma electrons after passage through plane layers of obstacle immersed in plasma, setting up equations for electron energy and density 13 p2139 A66-25398

Intensity and polarization of radiation diffusely transmitted and reflected by Rayleigh atmosphere for optical thickness from 1.0 to 10.0 13 p2072 A66-25800

Current dependence of recombination radiation intensity in gallium antimonide, determining radiation spectral distribution at low temperature 14 p2358 A66-27089

Intensity of corona as index of solar corpuscular radiation, noting characteristics of geomagnetic and solar activity 14 p2376 A66-27260

Radiation of finite volume of nonequilibrium plasma, discussing integral flux parameters 14 p2343 A66-27575

Formulae relating 21-cm emission intensity to density of interstellar hydrogen gas 14 p2383 A66-27799

Radiation characteristics of horn antennas analyzed, using edge diffraction theory, noting intensity at backlobe and far sidelobe 14 p2255 A66-27908

Behavior of high speed panchromatic emulsions and films sensitive to X-ray and far UV radiation exposed in spectral region 8-10 angstroms 15 p2499 A66-28885

Atmospheric turbidity measurements over India, using daily direct solar radiation measurements for selected spectral regions and entire spectrum 15 p2485 A66-29065

Radiation flux measurements from supernova remnants and radio galaxies 17 p2999 A66-32234

Launching balloon measurements of cosmic ray intensity as function of atmospheric depth at cosmic equator 17 p2994 A66-33150

Experimental study of isotropic term of acoustic radiation intensity in gas 18 p3136 A66-34724

Convolution product theory applied to smoothing neutron monitor data of daily variations in cosmic ray intensity 18 p3186 A66-34808

Cosmic radiation intensity fluctuation in stratosphere, noting absence of explanation for anomaly 19 p3451 A66-35261

Electron and ion concentrations as function of solar radiation intensity and variation of ionospheric conditions, noting nitrous oxide/oxygen ion ratio 19 p3345 A66-35287

Thermal radiation of nonhomogeneous plasma sheath, obtaining radiation intensity formula via fluctuation theory 19 p3409 A66-36281

Barium ion concentration computed from Ba II 4554 angstrom line and Lyman alpha radiation intensity in lower chromosphere 20 p3646 A66-37013

Extension of equivalence principle to take into account contribution to radiation of end point of dielectric rod in dielectric antennas 20 p3531 A66-37728

Numerical evaluation of intensity of radiation scattered outward from turbid atmosphere 20 p3593 A66-38190

Radiation intensity dependence for various spectral bands of diffused gallium arsenide p-n junctions on current density 21 p3798 A66-38921

Coronal emission-line intensities in extreme UV, calculating fluxes for resonance lines of coronal ions from rocket measurement data 21 p3816 A66-39553

Coronal emission lines in presence of strong sky background utilizing difference between gradients of line and sky intensities 21 p3816 A66-39554

Single pulse operation of lasers, noting energy storage and amplification effect for four- and three-level active medium 22 p3929 A66-39711

Intensity and uniformity monitor for solar simulators using thermopile as detector 22 p3891 A66-40229

Current dependence of recombination

radiation intensity in gallium antimonide, determining radiation spectral distribution at low temperature 22 p3967 A66-40845

Transient fiber optics probe for space resolved diagnostics of dense plasmas, noting adaptation to temperature measurements by line intensity and line ratio method 23 p4107 A66-41887

RADIATION LAW

SA KIRCHHOFF LAW

SA QUANTUM THEORY

SA STEFAN-BOLTZMANN LAW

Book on data for plasma in local thermodynamic equilibrium, containing tables on numerical values of reduced Saha-Eggert equations, partition functions, etc 04 p0557 A66-14457

RADIATION MEASUREMENT

SA PYRANOMETER

Ionization chamber for measuring interplanetary space radiation, using Geiger-Mueller counter as secondary detector 01 p0073 A66-11115

Cross-polarized radiation beams of rectangular waveguide antennas with slot arrays, determining radiation pattern for center-fed case 02 p0198 A66-11523

Origin of primary cosmic rays discussing galactic theory, propagation characteristics and measurement results 04 p0574 A66-13807

CdS single crystal optical generator during excitation by ruby laser, discussing two-photon absorption coefficient at 300 degrees K for radiation flux densities 04 p0529 A66-13874

Measuring device for pulsed laser output power using bolometer, amplifier and oscilloscope 04 p0520 A66-13888

Metallic corrosion measurement by radiation backscattering and radiation induced X-rays 04 p0536 A66-13933

Radiation emitted by wake [AIAA PAPER 66-137] 06 p0970 A66-16411

Radiation from carbon particle clouds produced by research rocket motors [AIAA PAPER 66-133] 06 p0970 A66-16413

Experiments in measurement of solar, cosmic and geomagnetically trapped /Van Allen/ radiation to be undertaken by ESRO II satellite 06 p0879 A66-16507

Radiation unit of length, calculating path-length for passage of high-energy electrons and photons through matter 06 p0912 A66-16575

Cosmic radiation measurements in extensive air showers, recording high energy muon fluxes 06 p0947 A66-16577

Azimuthal measurements of cosmic ray variations at Yakutsk, U.S.S.R. 06 p0949 A66-16584

Measurement of cosmic radiation of counter telescope 06 p0882 A66-16894

Total radiation intensity in interplanetary space before and after solar events of March 29 and April 9, 1960 07 p1120 A66-17978

Lunar surface ideal for thermal neutron, molecular and atomic beam measurements 08 p1287 A66-18768

Radiation measurement equipment on Cosmos 41 satellite including scintillation counter, gas discharge counter, etc 08 p1228 A66-19798

Malkevich atmospheric transfer function calculation for Northern Hemisphere in order to correct satellite radiation measurements 09 p1435 A66-19887

Solar X-radiation intensity measurement by Geiger end-window photon counters onboard Elektron II satellite 10 p1595 A66-21044

Scattered Lyman alpha radiation measurements near Earth and in interplanetary space by Zond I, using NO-filled photon counters with LIF windows 10 p1596 A66-21049

Discrepancy between theoretical calculation and measurement of far UV radiation from hot stars 10 p1598 A66-21094

Upper limits to cosmic ray intensity 10 p1599 A66-21104

Visible and IR radiation observations made above atmosphere 10 p1603 A66-21107

Directional radiation from incoherent electroluminescent diodes, noting increase in refractive index for dielectric slab model 10 p1509 A66-21581

Measurement of radiation pattern of ruby laser emission for various resonators and

operating regimes, noting laser effect on angular half-width values 10 p1544 A66-22028

Tube shaped and solid cylinder antennas compared, calculating surface current distribution and radiation 11 p1662 A66-22543

Fields of outgoing radiation in 8-12 micron region, calculating surface temperature and effective water vapor content 11 p1698 A66-22943

Solar and sky radiation and short wave band measured at altitudes approaching 10,000 ft in high Himalayas 11 p1765 A66-23384

Solar simulator instrumentation for measuring radiant flux density, collimation angle and spectral distribution 12 p1858 A66-24700

CaS single crystal optical generator during excitation by ruby laser, discussing two-photon absorption coefficient at 300 degrees K for radiation flux 14 p2308 A66-27576

Superweak radiation spectra measurement by photoelectronic device 14 p2296 A66-27833

Cosmic radiation measurements beyond radiation belts as observed by Cosmos KVI 15 p2573 A66-28497

Measuring devices and observational methodology used in determining time variant and cyclic variations in cosmic ray occurrence 15 p2573 A66-28518

Solar radiation measurements from 50 micrometers to 1 mm at Kitt Peak National Observatory near Tucson 15 p2594 A66-29000

Spark emulsion chamber for balloon-borne cosmic radiation measurements 15 p2503 A66-29569

Radiation measurement error using Epley radiation sensors in Antarctic 15 p2503 A66-29664

Three types of cosmic ray measurement in commercial aircraft, using single Geiger-Muller counter 15 p2591 A66-29679

Measuring device for pulsed laser output power using bolometer, amplifier and oscilloscope 15 p2503 A66-29701

Measurement of radiation pattern of ruby laser emission for various resonators and operating regimes, noting laser effect on angular half-width values 16 p2718 A66-30847

Relative values and daily totals for calculation of global and solar radiation 17 p2917 A66-32269

Near field phase and amplitude measurements of small radiating structures, using standard microwave equipment 18 p3075 A66-33619

Direct measuring radiation calorimeter developed for determining radiant heat flux of solid propellant gas flame in rocket combustion chambers [AIAA PAPER 65-358] 18 p3159 A66-33814

Synoptic interpretation of Tiroso III radiation data recorded on July 16, 1961 18 p3129 A66-34216

Total continuum radiation from high temperature air and components for wavelength greater than 2000 angstroms, based on radiation measurements from constricted arc at atmospheric pressure 18 p3140 A66-34587

Cosmic ray electron component intensity measurements by instrument consisting of telescope made of two scintillation counters 18 p3187 A66-34815

Balloon-borne Cerenkov scintillation counter for measurements of primary proton and helium spectra and modulations 18 p3188 A66-34822

Fields of outgoing radiation in 8-12 micron region, calculating surface temperature and effective water vapor content 20 p3553 A66-37856

Radiation measurement equipment on Cosmos XLI satellite including scintillation counter, gas discharge counter, etc 21 p3736 A66-38794

Stabilization of long high-pressure argon arc achieved by rotation of gas for radiation measurement 21 p3783 A66-39022

Moving source scanning spectrometer for ballistic range radiometry noting spectral resolution, operation and performance characteristics 24 p4208 A66-42180

Radiometer system with photomultiplier tube for measuring absolute radiation from hypervelocity projectile flow

fields 24 p4208 A66-42181

RADIATION MEDICINE

Laser beam use in biology and medicine, noting interaction of electromagnetic radiation with biological systems, hazards, diagnostics, therapeutics, etc 04 p0534 A66-14455

Pathomorphological changes in hemopoietic organs of mice after irradiation with high energy protons 15 p2438 A66-29482

Radiation detectors in radiobiology, photobiology and nuclear medicine 19 p3289 A66-35907

RADIATION PRESSURE

SA LIGHT PRESSURE

Satellite orbit position control using solar pressure for linear propulsion and Earth gravitational and magnetic field for attitude control [AIAA PAPER 64-661] 03 p0424 A66-12738

Minimization of solar radiation pressure effects for gravity-gradient stabilized satellites, primarily attitude errors of pressure torques [ASME PAPER 65-WA/AUT-2] 05 p0770 A66-15703

Hypersonic collisionless source flow analysis of comet dust tail model, assuming composition consists of small dust particles acted upon by solar radiation pressure [AIAA PAPER 66-32] 08 p1289 A66-18948

Theoretical treatment of acceleration of plasma bunch by radiation pressure, using 2-mw magnetron in pulsed operation 10 p1559 A66-21350

Experimental aspects of acceleration of plasma bunch by radiation pressure, using 2-mw magnetron in pulsed operation 10 p1574 A66-21351

Proton energy density, pressure and compressibility of galactic cosmic ray gas 18 p3165 A66-34140

Radiation pressure on vanes of rotary actuator of spacecraft radiation orientation system 19 p3467 A66-35293

RADIATION PROTECTION

Protection devices against vision impairment occurring during exposure of airmen and military personnel to intense visible radiation 01 p0019 A66-10481

Book on problems in dosimetry and radiation protection 05 p0627 A66-15117

Chemical radiation protection, covering long period exposure, effect of pyridoxine during supersonic and manned space flights 06 p0815 A66-16053

Book on chemical protection of life against ionizing radiation, with experimental and clinical data and list of protective compounds 09 p1336 A66-20300

Long duration manned spacecraft material and structural requirements in radiation and meteoroid shielding, thermal control, cabin sealing, etc 11 p1778 A66-23074

Laser safety standards, discussing nature of photobiological mechanisms responsible for tissue damage upon exposure to laser radiation 14 p2309 A66-27775

Space suit for thermal, radiation and exposure protection for man on Moon 14 p2231 A66-28413

Pharmacochemical protection from radiation injuries during space flights 15 p2435 A66-29453

Antiradiation protection and relative biological effectiveness of seldom-ionizing radiation 15 p2435 A66-29455

Injurious effect of gamma radiation and 660 and 120 mev protons on white mice and protective action of certain pharmacochemics 15 p2438 A66-29480

Chemical protection from radiation exposure-induced genetic changes 15 p2438 A66-29484

Physiologically active compounds and cultured antibiotic fluids used to eliminate effects of ionizing beta radiation on plant seeds 15 p2438 A66-29487

Solar radiation protection based on charged particle motion through magnetic field of solenoid [AIAA PAPER 66-512] 16 p2811 A66-31481

Number transmission coefficients for isotropically incident electrons determined for spacecraft shield design [AIAA PAPER 66-511] 16 p2811 A66-31497

Radiation-protective agents /anoxia, serotonin, amino thiols/ tend to increase

sulphydryl groups in mice spleen and Ehrlich ascite carcinoma 17 p2861 A66-32939

Theoretical molecular mechanism of chemical radio-protection based on stabilization of defects of damaged biological structures by molecular adsorption 17 p2861 A66-32940

Effects of radiation protective pharmacochemics /cystamine, serotonin, AET, strychnine, etc/ on animals subjected to centrifugation, for application to astronauts 19 p3283 A66-35292

Laser giant pulse damage to dielectric mirror coatings immersed in nitrobenzene solution 19 p3444 A66-36075

Space environmental effects on thermal control coating, describing simulation facility design, components and functions 20 p3543 A66-37315

RADIATION PYROMETER

Dielectric loss tangent measurement in pyroelectric materials for EM radiation detectors and heat transfer sensors 21 p3740 A66-39386

RADIATION RESISTANCE

Simulated nuclear power plant gamma radiation effects on magnetic film-insulated magnetic wire 02 p0248 A66-11293

Radiation resistance of antennas in gyroelectric media 04 p0492 A66-13424

Impedance cavity on radiation resistance of electromagnetic source 04 p0497 A66-13915

Anomalous behavior of radiation resistance of antennas in anisotropic media 04 p0500 A66-14101

Circular filament of electric current in unbounded magnetoionic medium, measuring radiation resistance for constant current distribution 05 p0633 A66-15122

Equivalent capacitance, inductance, radiation resistance and Q-factor of umbrella top-loaded electrically short antennas 06 p0825 A66-16018

Integration of Poynting vector over real and imaginary space to determine input admittance of one slot in infinite planar array as function of beam pointing direction 06 p0827 A66-16041

Electrically small antennas that distribute tuning and matching components over entire antenna volume to achieve lowest coupling loss 06 p0850 A66-16428

Radiation resistance of elongated conducting electromagnetic radiator in vacuum or linear dielectric 07 p1002 A66-17831

Antenna radiation shows relationship to tangential component of electric field intensity along antenna 08 p1197 A66-19606

Radiation resistance of linear current strip of finite width immersed in uniaxially anisotropic plasma 09 p1408 A66-20370

Radiation impedance of infinite planar dipole array, phased for any angle of radiation, calculated by Fourier series expansion of field in plane waves 14 p2247 A66-26865

Mutual conductivity of half-wave slot on conducting cylinder 14 p2398 A66-27427

Radiation impedance of phased array of rectangular waveguides, noting coupling coefficient amplitude, phase difference, etc 14 p2256 A66-27910

Axially oriented point source current and filament with triangular current distribution in magnetoionic medium, examining ion sheath effect on radiation characteristics 20 p3516 A66-37624

Lithium use in silicon solar cell for radiation resistance improvement, noting preservation of minority carrier lifetime 20 p3502 A66-37775

Impedance cavity on radiation resistance of electromagnetic source 20 p3532 A66-37873

Antenna in interplanetary plasma, noting fluctuation noise in exosphere and radiation impedance when exposed to solar wind 22 p3877 A66-40466

Radiation in magnetoplasmas, noting correctness of infinity catastrophe theory for dielectric radiation sources in magnetoionic media 23 p4105 A66-41632

Antenna radiation theory, noting reiteration of incorrectness of infinity catastrophe theory and application to oscillating dipole in uniaxial

- medium 23 p4047 A66-41633
 Radiation resistance of antennas in magnetoplasma, considering inapplicability of reversible power concept to steady state mode 23 p4047 A66-41634
 Solar cell arrays, thin films and radiation resistance 23 p4024 A66-41771

RADIATION SHIELDING

- SA HEAT SHIELD
 SA SOLAR RADIATION SHIELD
 SA SPACECRAFT SHIELDING
 Radiation shielding requirements for protection of crews of manned satellites 03 p0431 A66-12750
 Lunar shelter design and support system imposed by lunar environment [SAE PAPER 650834] 05 p0660 A66-15016
 Effectiveness of stagnant layer of radiating gas in shielding surface from radiation flux formulated as integral equation, with heat transfer results presented graphically 07 p1155 A66-18346
 Formula for energy deposition from charged particle beams used in techniques for shielding nuclear particles from space 08 p1259 A66-19124
 Critical Stormer pass points for quadrupole field and double-ring-current field with parallel or antiparallel dipole moments 09 p1404 A66-20085
 Space radiation shielding for space vehicles using electric and magnetic fields 11 p1778 A66-23166
 Shielding of manned Mars vehicles from solar and galactic cosmic radiation and radiobiological tolerance criteria 13 p2190 A66-25261
 Space vehicle shielding with two concentric toroidal superconducting coils providing magnetic field for deflection of charged particles 13 p2190 A66-25262
 Forbidden regions produced by two spatially separate point dipoles with parallel axes 14 p2361 A66-27412
 Effect of shielding individual parts of rats on variations in reaction to radiation during exposure to gamma rays and high energy protons 15 p2438 A66-29481
 Electronic analog magnetic shield simulator /Magsim/ for producing radiation-protective region around space vehicles 16 p2681 A66-30610
 Thermal radiation shields for gas temperature sensing probes 17 p2924 A66-32039
 Lightweight insulations for space vehicle cryogenic storage tanks based on design principles of multilayer radiation shields 19 p3473 A66-35598
 SNAP-8 reactor and shield designs and operating experience as heat source for long-term power supply [AIAA PAPER 65-473] 19 p3398 A66-35618
 Short wave transmission station conduction, noting shielding to prevent interference from TV transmission 20 p3543 A66-37723
 Charged-particle shielding technology for spacecraft noting particle interaction with matter, penetration calculation and amassed data 20 p3665 A66-38353
 Space shielding calculation techniques for proton penetration of slabs, thick-target bremsstrahlung and electron penetration 20 p3665 A66-38355
 Computer code packages for radiation shielding calculations 21 p3769 A66-39392
 Multilayer insulating material thermal-mechanical environmental tests for use as heat shields in cryogenic storage tanks [AICE PREPRINT 22F] 22 p3997 A66-39889
 Charged particle radiation shielding in space of solar cell panels by use of concentrator geometry 22 p3852 A66-40512
 Isotope power systems for lunar roving vehicles noting fuel, radiation shielding, performance, weight, etc 23 p4024 A66-41770
 Shield of volatile matter acting as cosmic radiation barrier as possible explanation of contraction between radiation ages of stony and iron meteorites 23 p4065 A66-41832
 Shielding of manned Mars vehicles from solar and galactic cosmic radiation and radiobiological tolerance criteria 24 p4283 A66-42785

RADIATION SICKNESS

- Partial canine body exposure to ionization radiation noting anorexia, weight loss,

- vomiting and hypersialosis due to 1000 kvp X-ray exposure 03 p0326 A66-13352
 Rats resistance to oxygen deficiency while suffering effects of 750 roentgen dose X-ray exposure 15 p2438 A66-29483

RADIATION SOURCE

SA POINT SOURCE

- Jupiter radio emission, with plasma waves in planet ionosphere as source of radiation 01 p0131 A66-10273
 Book on UV radiation covering arcs, incandescent radiation sources, solar radiation, transmission, reflection, detectors and application 01 p0107 A66-10979
 Metallic UV emitter producing continuous spectrum in 2000 to 500 angstrom band 01 p0071 A66-11049
 Design of radiation source system simulating albedo and planetary emission energy flux to space vehicle in any planetary orbit 02 p0212 A66-11218
 High pressure argon arc with intense continuum as possible source in UV radiometry 02 p0212 A66-11225
 Xenon short arc lamps as radiation sources for solar simulation discussing physical and electrical characteristics, radiant properties, operation and performance 02 p0213 A66-11233
 Argon vortex stabilized arc as radiation source for improved solar simulation, discussing spectral energy distribution 02 p0214 A66-11236
 Atmospheric source of diurnal variation of cosmic radiation whose properties undergo substantial variation 02 p0281 A66-11337
 Performance of vortex-stabilized arc radiation source in which arc current, gas pressure, gas flow rate and nozzle diameter are prime variables 02 p0270 A66-12209
 Unidirectional reflectance of imperfectly diffuse surface defined in terms of surface radiance and equivalent hemispherical radiance of source 08 p1227 A66-19704
 Galactic distribution of X-ray sources, noting concentration toward galactic plane 09 p1442 A66-20414
 Characteristics of two high-power high-intensity radiation heat sources developed by Ames Research Center 11 p1638 A66-22214
 Metallic UV emitter producing continuous spectrum in 2000 to 500 angstrom band 11 p1709 A66-23297
 Text on traveling wave antenna design and field equations in terms of TW sources 14 p2254 A66-27720
 Radiation characteristics of vertical dipole in warm plasma, expressing vector potential functions in Fourier integrals 14 p2240 A66-27916
 Efficiency of radiation sources in IR gas analyzer 16 p2706 A66-30849
 Multipole analysis of acoustic radiation to explore dependence of mass density on functional character of source distribution 17 p2957 A66-31951
 Antennas for electronic navigation, discussing aircraft and ground based equipment, radiation patterns, restrictions, etc 20 p3597 A66-37719
 Substrate temperature measurement and control showing desirability of large-area low temperature radiation source for glass substrate heating 24 p4218 A66-43165

RADIATION SPECTRUM

- Transition and bremsstrahlung spectrum from measurement of energy dependence on visible and UV radiation emitted from electron bombarded Ag targets 01 p0108 A66-10195
 Angular and spectral distribution of outgoing radiation in cloudy atmosphere in spectral range beyond absorption band 01 p0133 A66-10757
 Spectral index of radiation from Jupiter between 178 and 610 mc/s 02 p0282 A66-11502
 Forbush decrease in cosmic radiation spectra as function of solar activity 02 p0283 A66-12113
 Ionospheric effect on spectrum of general background galactic radio emission below 10 mc/s 02 p0284 A66-12192
 Cerenkov radiation by charge moving lengthwise in magnetic field of cold plasma, determining radiation spectrum range and total radiation energy 03 p0397 A66-12389

- Gallium arsenide recombination-radiation spectrum discussing effects of impurities on short wave radiation band energy 05 p0731 A66-14616
 Time variation of primary cosmic ray rigidity spectrum over solar cycle derived by measuring latitude effect of nucleon components 07 p1127 A66-18011
 Momentum spectrum and charge ratio of mu-mesons at sea-level, noting theoretical and experimental data 07 p1131 A66-18223
 Day-to-day changes in energy spectrum of daily variation of cosmic ray intensity at middle latitude and equator for IGY 07 p1131 A66-18223
 Solar cosmic ray particle composition charge and energy spectra of nucleon components and isotopic composition of ¹H and He 07 p1132 A66-18226
 High resolution equilibrium radiation spectra for shock layer of blunt bodies at reentry velocities and radiative recombination of N and O ions [AIAA PAPER 66-104] 07 p0984 A66-18455
 Low-background gamma-ray spectrometry of induced radioactivity resulting from Bogou meteorite cosmic radiation 08 p1291 A66-19099
 Correlation factor for induced radiation frequency shifts and crystal temperature variations in ruby laser 08 p1233 A66-19266
 Reabsorption of synchrotron radiation as error source in discrete radio emissor source parameter determination 08 p1297 A66-19450
 Optical laser pumps, high power CW laser operation by cathodoluminescence and suitable selection of phosphors 08 p1234 A66-19546
 Russian monograph on thermal radiation from metals, ceramics, partly transparent bodies, films, etc 08 p1256 A66-19567
 Threshold parameters and spectral composition of radiation of neodymium-glass laser in dispersion resonator 08 p1234 A66-19669
 Expected rigidity spectrum of variations in framework of dynamic piston model of Forbush effect 09 p1438 A66-20215
 Threshold parameters and spectral composition of radiation of neodymium-glass laser in dispersion resonator 10 p1543 A66-21836
 Radiant heat flux in spectral region from 4 to 40 microns at various atmospheric levels 11 p1698 A66-22945
 Atmospheric vertical temperature profile determined from outgoing radiation spectrum, evaluating error probability and accuracy 12 p1874 A66-24869
 Angular distribution of stimulated Raman radiation, discussing axial and off-axial Stokes and surface radiation mechanism 13 p2090 A66-25189
 Cerenkov radiation by charge moving lengthwise in magnetic field of cold plasma, determining radiation spectrum range and total radiation energy 13 p2139 A66-25394
 1964 results of high resolution CW radar spectral studies of Venus at NASA/JPL Deep Space Instrumentation Facility at Goldstone, California 13 p2185 A66-25812
 Gallium arsenide recombination-radiation spectrum, discussing effects of impurities on short wave radiation band energy 13 p2167 A66-25932
 Galactic low RF background radiation spectrum and measurements of sky brightness temperature 14 p2383 A66-27708
 Superweak radiation spectra measurement by photoelectronic device 14 p2296 A66-27833
 Angular and spectral distribution of outgoing radiation in cloudy atmosphere in spectral range beyond absorption band 14 p2285 A66-27856
 Forbush decrease in cosmic radiation spectra as function of solar activity 14 p2377 A66-28072
 Rocketborne photometer data analysis of night sky airglow and spectrum in 6300 angstrom region 15 p2482 A66-28494
 High energy solar cosmic ray spectrum during solar flare of February 23, 1956 15 p2575 A66-29080
 Prediction that above presently measured energy level cosmic ray spectrum will steepen abruptly and finally have cosmologically meaningful

- Termination 16 p2793 A66-30194
- Statistical effects during generation of second harmonic in optically transparent crystals, noting coefficient of correlation between harmonic and fundamental radiation power of solid state laser 16 p2747 A66-31167
- Monograph on intensity distribution and polarization of scattered radiation in ozone absorption bands at selected levels of terrestrial Rayleigh 16 p2698 A66-31226
- True radio-brightness distribution of cosmic radiation source by reducing spatial frequency distortions with passband radio interferometer 16 p2806 A66-31544
- Error correction of recent work on modulation of primary spectrum during solar cycle for rigidities between 4 and 12 billion volts 17 p2994 A66-32536
- Radiation spectra of plasma jets from IR to UV, determining electron density and ionization excitation temperature, noting bremsstrahlung 18 p3144 A66-34103
- Absorption of synchrotron radiation as error source in discrete radio emission source parameter determination 18 p3169 A66-34479
- Transition region of pulse spectrum from EAS particle density recordings by Geiger and scintillation detectors 18 p3207 A66-35110
- Differential momentum spectrum and charge ratio of muons in EAS measured, using solid iron magnet 18 p3212 A66-35137
- Numerical integration based on definition of Riemann integral, describing application of nonlinear integral equations of isotropic scattering of radiation in plane parallel atmosphere 19 p3388 A66-35830
- Recombination radiation from Ga-Sb p-n junctions, noting spectral composition as function of current density and impurity concentration 20 p3618 A66-37563
- Radiant heat flux in spectral region from 4 to 40 microns at various atmospheric levels 20 p3553 A66-37858
- Gamma-spectroscopy determination of special reaction products of cosmic radiation in meteorites 20 p3656 A66-38060
- Expanding universe theory of hot ionized intergalactic gas and blackbody radiation and X-ray emission energy spectra 21 p3817 A66-39561
- XUV C, Ti, Mn, Fe, Ni, Cu, Zn and Ar line spectra and continuum radiation spectra in plasmas produced by focused ruby laser beam 22 p3954 A66-39812
- Atmospheric vertical temperature profile determined from outgoing radiation spectrum, evaluating error probability and accuracy 22 p3912 A66-40330
- Time evolution of synchrotron radiation spectrum of radio sources, considering only radiation losses where magnetic field is isotropic with constant intensity and random space orientation 24 p4278 A66-42707
- RADIATION TOLERANCE**
- Hypoxia protection on taking of second graft of homologous bone marrow in previously irradiated and grafted mice 01 p0020 A66-10609
- Radiation tolerant electric propulsion system to operate on SNAPSHOT satellite, permitting orbital test of ion engine and ion propulsion with nuclear power supply SNAP-10A/ 04 p0544 A66-13630
- Preflight and operational status test set PTS/ using radiating techniques for checking out aircraft electronic equipment without removal from aircraft 06 p0868 A66-15986
- Radiation damage in bipolar, insulated gate, field effect, gallium arsenide and thin film transistors 11 p1672 A66-23467
- Dose-equivalent plastic manikin simulates interaction of all types of radiation with human body geometry for space radiation research 16 p2643 A66-31126
- Lubrication for spacecraft application under space conditions of vacuum, temperature and radiation 18 p3117 A66-34650
- RADIATION TRANSFER**
- Radiation transport in optically thick medium where natural wings of lines are important and 1304 OI triplet in upper atmosphere 02 p0282 A66-11501
- Oscillator strength of CN violet system from shock layer by time-of-flight scanning spectrometer 03 p0393 A66-13152
- Interaction of radiation and convection in laminar boundary layer of perfect gas on flat black plate [ASME PAPER 65-HT-54] 05 p0785 A66-14760
- Ionospheric magnetic dipole transition, noting radiative transfer equation for atomic oxygen and nitric oxide 05 p0667 A66-14793
- Resonance radiation emitted by alkali cloud for ionospheric temperature measurement, considering multiple scattering and radiative transfer inside cloud 05 p0672 A66-15040
- Book on radiative transfer on discrete spaces developed on mathematical and physical basis, covering optical media to geo-optical fields 05 p0716 A66-15084
- Solutions for integral equation associated with equation of radiative transfer for isotropic scattering and complete redistribution in frequency cases 05 p0762 A66-15276
- Structural changes in radiation field following quantum reemission after photoexcitation of atom when true absorption is low 05 p0765 A66-15416
- Monte Carlo method for radiative exchange in enclosure [ASME PAPER 65-WA/HT-51] 05 p0791 A66-15659
- Intrinsic and mutual radiation conductances from slots on wedge, using Markov form of Green function for calculation 06 p0823 A66-15896
- Earth radiation field characteristics from radiation transfer equation for plane model of atmosphere for specific region, considering ozone absorption and molecular scattering 06 p0876 A66-16553
- Absorption effect on Rayleigh atmosphere, calculating reflected and transmitted intensities and polarizations for C wavelength pair used for Umkehr measurements 07 p1028 A66-17364
- Photoionization upstream of strong shock wave determined by ion continuity and radiative transfer equations 07 p1022 A66-18107
- Nonequilibrium radiative and collision ionization, photoionization and shock wave structure in high temperature hypervelocity low density gas 08 p1204 A66-18521
- Shock wave structure in ionized hydrogen, using Eddington approximation to solve Rankine-Hugoniot jump equation 08 p1204 A66-18522
- Optical radiation transfer equations applied to imaging instruments used in radiometry of hypersonic reentry bodies 08 p1222 A66-18709
- Energy transfer by radiation and thermal conductivity in high temperature oxygen and nitrogen [AIAA PAPER 66-182] 10 p1620 A66-21432
- Multidimensional radiation transport equations for nonscattering quasi-equilibrium gray gas obtained by spherical harmonic approximation [AIAA PAPER 65-81] 10 p1621 A66-21774
- Radiative exchange in enclosures, reflectance of whose surfaces can be approximated by sum of diffuse and specular component [ASME PAPER 65-HT-7] 11 p1784 A66-22184
- Atmospheric high resolution transmission in carbon dioxide bands between 12 and 18 microns evaluated, using mixed Doppler-Lorentz broadening and new method for slant-path calculations 11 p1736 A66-22889
- Radiative transfer and imperfect scattering in planetary atmospheres from Chapman approach 11 p1776 A66-23414
- Source function with large Doppler variable 13 p2174 A66-25481
- Nonuniqueness of solutions of nonlinear integral equation for Chandrasekhar S-function for homogeneous semiinfinite atmosphere 13 p2127 A66-25612
- Excitation radiation transfer from trivalent chromium to neodymium examined via fluorescence spectroscopy, noting energy transfer parameters and effect on laser output 13 p2098 A66-26175
- Tables of functions encountered in resonance radiation transfer theory 13 p2189 A66-26574
- Earth radiation field characteristics from radiation transfer equation for plane model of atmosphere for specific region, considering ozone absorption and molecular scattering 14 p2289 A66-28225
- Heat transfer in radiating media and interaction of convection with radiation heat transfer, considering one-dimensional slab problem and optically thick and thin media 16 p2824 A66-30305
- Interaction of radiation and convection in laminar boundary layer of perfect gas on flat black plate [ASME PAPER 65-HT-54] 16 p2828 A66-30988
- Reflection and transmission matrices for computing thick layer properties 16 p2749 A66-31639
- Effect of radiative and photochemical processes on stability of two level baroclinic flow, noting low and high shear instability, wavelength, phase speed, etc 16 p2700 A66-31644
- Radiative interactions between absorbing-emitting and flowing media with internal energy generation [AIAA PAPER 66-434] 17 p3035 A66-32755
- Shadowing effect and anomalous backscattered intensity in diffuse reflection from plane-parallel layer of random particles 18 p3068 A66-34014
- Composition, heat conduction and radiative energy transfer characteristics of hydrogen and argon plasmas produced by arc in cylindrical channel with cooled walls 18 p3142 A66-34023
- Absorption lines and bands in scattering and absorbing medium elucidated by study of distribution of photon optical paths in scattering atmosphere 18 p3230 A66-34148
- Numerical solution of integral form of radiative transfer equation from measurements in finite set of spectral intervals for deducing atmospheric temperature profiles, using satellites 18 p3129 A66-34554
- Difficulties and instabilities accompanying inversion of radiance data to infer temperature structure related to interdependence existing among nominally independent measurements 18 p3130 A66-34555
- Radiation transport in spectral lines as consecutive photon absorptions and emissions, discussing contemporary theories, approximation methods and applications 18 p3120 A66-35076
- Green formula and moment functions, predicting rate of radiative energy loss from boundaries of absorbing-emitting slab or sphere 19 p3479 A66-36597
- Macroscopic velocity field in solar atmosphere and physical nature of motion, analyzing radiative transfer in spectral lines 19 p3465 A66-36604
- Electron temperature of solar corona, noting radiative transfer of radio emission in corona, deriving distribution of brightness temperature over solar disk 21 p3811 A66-38638
- Transfer equation for radiation escape from semiinfinite atmosphere with nonconservative scattering 21 p3808 A66-38639
- Iterative solution of equations for diffuse reflection and transmission in finite plane-parallel atmosphere with arbitrary stratification 21 p3734 A66-39220
- Scattered particle intensity inside and outside finite medium determined from Maxwell and Schroedinger equations 22 p3975 A66-40954
- Planetary atmosphere resolution spectrum noting carbon dioxide lines, radiation transfer, composition, temperatures, pressures, etc 24 p4277 A66-42667
- RADIATIVE HEAT TRANSFER**
- Radiative transfer equation for isothermal model of solar corona, noting radiation flux and electron density variation 01 p0131 A66-10267
- Survey of IR measurement techniques and computational methods in radiant heat transfer [AIAA PAPER 65-657] 01 p0162 A66-10598
- Equilibrium radiative transport properties of high temperature air coupled with aerodynamic flow field generated by planetary reentry

- vehicles 01 p0163 A66-10784
 Numerical solution to equation of radiative transfer for plane parallel horizontal homogeneous medium 02 p0304 A66-11827
 Uniqueness of mixed problem of anisotropic body dynamic thermoelasticity when radiative heat transfer is absent, using thermodynamics and Onsager relations 02 p0300 A66-12001
 Heat resistant ceramic coating on steel produced by gas-flame spraying of refractory oxides investigated for effective heat conductivity and integral radiative capacity 03 p0443 A66-12514
 Quantum statistical theory of multicomponent systems applied to fully ionized gas in thermal equilibrium 03 p0398 A66-12605
 Charring ablative materials effectiveness in combined convective and radiative heating as reentry shield 03 p0444 A66-12792
 Solar photosphere noting radiative equilibrium theory, granules and convection observations for temperature distribution 03 p0420 A66-12840
 Radiative heat transfer in flat layer of absorbing, reradiating and nonscattering gray medium with optical properties independent of temperature 04 p0598 A66-14425
 Heat transfer from Ar and Xe to end wall of shock tube measured, using thin film gauge monitored by IR photocell 05 p0782 A66-14705
 Radiative heat exchange between conducting plates with specular reflection discussing internal conduction, surface radiation and application to radiating fins [ASME PAPER 65-HT-28] 05 p0784 A66-14747
 Potassium condensing tests of horizontal multitube convective and radiative condensers operating at vapor temperatures from 1250 to 1500 degrees F 05 p0786 A66-14932
 Radiative heat transfer calculated by Monte Carlo method 05 p0787 A66-14988
 Shielding of surface from parallel thermal radiation beams by distributed injection of fluid containing absorbing particles into boundary layer flow over surface near stagnation point [ASME PAPER 65-WA/HT-21] 05 p0789 A66-15643
 Book on physical gas dynamics including transport theory, kinetic theory, thermodynamics, equilibrium, fluid flow, radiative transfer, etc 05 p0666 A66-15848
 Asymptotic solutions for viscous flow of transparent radiating gas in stagnation region, using method of matched inner and outer expansions [AIAA PAPER 66-105] 06 p0871 A66-16254
 Book on determining radiative contributions to energy and momentum transport in gas under almost any density and temperature conditions 06 p0913 A66-17157
 Radiant flux to base region of axisymmetric real gas system with nonisothermal temperature distribution 07 p1151 A66-17588
 Radiant transport with isotropic scattering, evaluating approximate solutions for reflection and transmission of parallel plane radiation 07 p1152 A66-17589
 Heat exchange through absorbing media, determining combined modes of radiation and conduction via exchange factor approximation 07 p1152 A66-17590
 Radiant heat transfer from nongray surfaces with external radiation [AIAA PAPER 66-21] 07 p1153 A66-17886
 Steady state radiative transport through homogeneous spherical medium, applying invariance principles of Ambartsumian and Chandrasekhar 07 p1155 A66-18339
 Effectiveness of stagnant layer of radiating gas in shielding surface from radiation flux formulated as integral equation, with heat transfer results presented graphically 07 p1155 A66-18346
 Convective and radiative heat transfer to reentry vehicles at superorbital velocities [AIAA PAPER 66-106] 07 p1155 A66-18459
 Thermal control of spacecraft 08 p1301 A66-18736
 Opacity due to Compton scattering at relativistic temperatures in semidegenerate electron gas 08 p1258 A66-18779
 Nine-level general circulation model of atmosphere for resolving surface boundary layer fluxes as well as radiative transfer by ozone, carbon dioxide and water vapor 08 p1213 A66-18924
 Radiometersonde observations of atmospheric IR irradiance, noting measurement results with improved equipment 09 p1369 A66-19869
 Long-wave radiation flux in optically dense horizontally-stratified layer of clouds as it ascends from lower into upper troposphere with given temperature and humidity 09 p1398 A66-19894
 Temperature field in infinite plate heated simultaneously by radiation and convection 09 p1471 A66-20748
 Equilibrium and nonequilibrium stagnation point shock layer radiation in simulated planetary atmospheres of varying composition 10 p1481 A66-21773
 Sound propagation in transparent gas with specific heat nearly one as affected by radiative heat transfer 10 p1621 A66-21810
 Analog method for solution of unsteady radiant heat transfer problems with combined conduction and convection 10 p1622 A66-21938
 Radiative heat exchange between conducting plates with specular reflection, discussing internal conduction, surface radiation and application to radiating fins [ASME PAPER 65-HT-28] 11 p1784 A66-22183
 Radiative heat transfer due to 9.6 micron band of ozone, noting pressure correction for optical length of absorbing gas 11 p1694 A66-22200
 Characteristics of two high-power high-intensity radiation heat sources developed by Ames Research Center [AIAA PAPER 66-185] 11 p1638 A66-22214
 Unattainability of detailed balancing in thermodynamic equilibrium of gray atmosphere 11 p1772 A66-22776
 Convective and radiative heat transfer during atmospheric reentry examined, using double-diaphragm shock tube operated in expansion tube mode 11 p1684 A66-22828
 Temperature field of elements of thin-shelled surfaces of satellites for radiant heat transfer 11 p1786 A66-23045
 Approximate hypersonic stagnation point flow analysis of thermal conduction and radiative transport in shock layer 12 p1860 A66-23595
 Radiative heat-flux potential for nongray gas derived, noting origins of vector differential equation for gray gas 12 p1977 A66-23596
 Text on engineering radiation heat transfer emphasizing IR energy transmission 12 p1977 A66-23655
 Radiative heat transfer near stagnation point of blunt body in hypersonic flow, noting effect on convective heat transfer 12 p1978 A66-24241
 Spectral and vertical distribution of atmospheric IR radiation flux divergence for five model atmospheres, noting dependence on sighting angle 12 p1874 A66-24868
 Estimates of expected relative magnitudes of convective and radiative heat transfer at stagnation point of blunt body for superorbital speeds and altitudes with continuum flow 13 p1989 A66-25154
 Milne-Eddington model in heat and mass transfer, showing analogy between radiation and particle transfer and correspondence to simplified Boltzmann equation 13 p2208 A66-25162
 Radiative cooling of stellar material and application to solar flares 13 p2174 A66-25617
 Heat transfer in Couette flow of radiating fluid with viscous dissipation, noting conduction coupling, effects of temperature level, profile, wall emission, fluid optical thickness, etc 13 p2210 A66-26718
 Directional monochromatic emittance of isothermal diathermanous coatings on various conductors [AIAA PAPER 65-119] 14 p2411 A66-27410
 Nonhomogeneous solid sphere radiative cooling asymptotic representation based on heat conduction theory by Laplace transforms 14 p2414 A66-28144
 Perturbation solutions in differential analysis of radiation interactions with conduction and convection 14 p2259 A66-28164
 Radiative energy transfer between concentric spheres separated by absorbing and emitting gas, noting analogy to atmosphere with spherical symmetry 15 p2615 A66-28620
 Heat transfer in radiating media and interaction of convection with radiation heat transfer, considering one-dimensional slab problem and optically thick and thin media 16 p2824 A66-30308
 Radiative-type heat shields using backface cooling in analysis, including thermal effects and structural heat short effects [AIAA PAPER 66-507] 16 p2826 A66-30521
 Radiant-interchange configuration factors between various selected plane surfaces with common contact 16 p2826 A66-30530
 Radiative heat transfer configuration factors in multisurface enclosure filled with emissive gas 16 p2827 A66-30814
 Thermal performances of radiative and convective plate fins, considering effect of mutual irradiation between surfaces, solving integro-differential equations describing process 16 p2827 A66-30816
 Book on radiation gas dynamics including radiative heat transfer, waves and shock waves, kinetic theory, relativistic mechanics, free-molecule flow, etc 16 p2829 A66-31314
 Atmospheric heat and moisture transfer during developing cloud conditions 16 p2742 A66-31342
 Vertical profile of atmospheric radiative balance from balloon-borne actinometry at 25 to 32 km 16 p2698 A66-31344
 Radiative flux divergence for lower few centimeters of atmosphere, accounting for combined effects of water vapor, particle absorption and scattering 16 p2699 A66-31640
 Vertical propagation of long period small amplitude temperature perturbation in medium with photochemical processes and radiative heat transfer 16 p2742 A66-31642
 Stability of baroclinic axially symmetric vortex on F plane to axially symmetric disturbances 16 p2700 A66-31643
 Planck entropy equation and irreversibility of radiation matter interaction for stationary isothermal gas emitting resonance lines of two-level atoms 17 p2957 A66-32044
 Self-similarity criteria in radiative flow for unsteady one-dimensional inviscid flow of perfect gas 17 p3034 A66-32471
 Physical process effect on structure of H II regions, noting ionization, Lyman continuum spectral distribution and radiative transfer frequency dependence on absorptive processes 17 p3003 A66-32655
 Electron temperature determination in argon plasma as function of distance measured to axis of inductive windings 17 p2974 A66-33255
 Radiant heat transfer from hot solid combustion products to combustion chamber walls [AIAA PAPER 65-559] 18 p3260 A66-33811
 Control of spacecraft internal temperature, using movable shutters reflecting diffusely [AIAA PAPER 65-425] 18 p3260 A66-33826
 Transient radiative cooling of semilinear solid with parallel walled cavities 18 p3261 A66-34359
 Two-dimensional radiation-coupled wedge flow analyzed, using integral relations method and Rankine-Hugoniot relations 18 p3100 A66-34599
 Radiant equilibrium temperature of opaque absorbing body relation to radiative temperature variations of air 18 p3265 A66-34611
 Survey of IR measurement techniques and computational methods in radiant heat transfer [AIAA PAPER 65-657] 19 p3477 A66-35595
 Coupled radiative and convective heat fluxes in high temperature hydrogen propellant rocket nozzles with shape and temperature variations [AIAA PAPER 65-557] 19 p3449 A66-35612
 Upper atmosphere radiative and heat flux balance and dynamics from balloon-borne measurements 19 p3347 A66-35641
 Role of radiative transfer in mechanism of heat flow in lunar surface, noting magnitude of contribution to transfer 20 p3648 A66-37260

- Radiative heat transfer effect on propagation of plane pressure waves in inviscid nonheat-conducting gas applied in theory of angular intensity distribution of integral radiation 20 p3548 A66-38107
- Aerothermodynamic characteristics of Apollo command module at hyperbolic Earth entry velocities [AIAA PAPER 65-491] 20 p3664 A66-38168
- Long-wave radiative heat transfer between clouds and free atmosphere as basic factor in weather forecasting 20 p3594 A66-38371
- Atmospheric stratification effect on radiative thermal flux, including diagrams for flux estimate from temperature gradient 20 p3594 A66-38372
- Radiative and convective heat transfer between two parallel streams of absorbing and emitting radiating gases 21 p3835 A66-38715
- Radiant heat transfer between concentric cylinders determined by extending validity of Rosseland diffusion approximation by introducing temperature jump boundary condition at gas solid surface 21 p3837 A66-39462
- Shielding of surface from parallel thermal radiation beams by distributed injection of fluid containing absorbing particles into boundary layer flow over surface near stagnation point [ASME PAPER 65-WA/HT-21] 22 p3997 A66-40026
- Radiant heat transfer between concentric spheres and coaxial cylinders, assuming isothermal inner surface to be diffuse emitter and outer surface to reflect specularly 22 p3998 A66-40030
- Calculating specific heat and conductivity of ablating specimens exposed to radiant heat fluxes 22 p3998 A66-40032
- Radiative heat exchange between body and enclosure when temperature and emissivity are not uniform on surface, using series solution 22 p3998 A66-40142
- Spectral and vertical distribution of atmospheric IR radiation flux divergence for five model atmospheres, noting dependence on sighting angle 22 p3912 A66-40329
- Disperse material heating by simultaneous radiative and convective energy with temperatures expressed as integral equations 23 p4148 A66-41270
- Asymptotic solutions for viscous flow of transparent radiating gas in stagnation region, using method of matched inner and outer expansions [AIAA PAPER 66-105] 23 p4057 A66-41881
- Perturbation analysis of radiative cooling in shock layers and radiative heat transfer effects on hypersonic flow over wedge and circular cone 23 p4011 A66-41882
- Atmospheric heat and moisture transfer during developing cloud conditions 24 p4234 A66-42650
- Vertical profile of atmospheric radiative balance from balloon-borne actinometry at 25 to 32 km 24 p4201 A66-42652
- Decay of small temperature perturbations by thermal radiation in atmosphere, noting gray and line absorption, relaxation time constants and numerical computations 24 p4203 A66-42986
- RADIATIVE RECOMBINATION**
- Laser transition identification in electron beam pumped gallium arsenide, primarily on concentration of shallow donors and acceptors 01 p0081 A66-10348
- Recombination radiation of p-n junctions in CdTe-ZnTe system crystals for various current densities and molecular compositions 01 p0125 A66-10780
- Radiative recombination in thin film structures observing characteristic of aluminum 01 p0127 A66-11089
- Radiative recombination of degenerate and compensated germanium indicating that emission line at low temperatures shifts to higher energies with increasing excitation 02 p0273 A66-11715
- Impurity-recombination emission in diodes of n-type Si single crystals alloyed with In 02 p0206 A66-12092
- Relaxation time for recombination radiation from semiconductor source determined by measuring current/emission phase shift 04 p0563 A66-13891
- Photoconductivity and spectral distribution of impurity radiative recombination in n-type silicon containing Indium or boron 04 p0565 A66-14264
- Recombination radiation in gallium arsenide due to alpha particles 04 p0565 A66-14269
- Long-wave recombination radiation of germanium associated with optical transitions involving photon emission and current carrier heating 04 p0568 A66-14348
- Radiative recombination in silicon containing structural defects in lattice 04 p0569 A66-14353
- Recombination of nonequilibrium charge carriers in indium arsenide, noting radiative and impact recombination 04 p0569 A66-14357
- Recombination radiation spectra of n-type gallium antimonide on concentration of tellurium base region 04 p0570 A66-14364
- Homeopolar semiconductors, discussing radiation recombination parameters on impurity centers with phonon participation 05 p0731 A66-14654
- Approximate evaluation of spectral function for stimulated recombination radiation in semiconductors proposed in integral form by Lasher and Stern 05 p0732 A66-14664
- Silicon recombination radiation, describing long wave IR radiation effect and photon energy gain via conversion into short wave radiation 06 p0924 A66-16515
- Comments on radiative recombination of molecular helium ions into dissociative state 06 p0912 A66-16636
- Physics of semiconductors - International Conference, Paris, July 1964, Volume 4, Radiative recombination in semiconductors 07 p1092 A66-17310
- Radiative recombination emission and photoconduction in lead sulphide, emphasizing chemical deposition or vacuum evaporated layers 07 p1094 A66-17311
- Photo-induced recombination radiation from single crystals of PbSe and PbTe as function of carrier concentration and temperature 07 p1094 A66-17312
- Spontaneous emission band analyzed to invoke principle of detailed balance 07 p1094 A66-17313
- Indirect and direct radiative recombination transitions in germanium and use in analysis of lifetime 07 p1094 A66-17314
- Characteristic radiation spectra emitted in process of spontaneous electron transfer from shallow donors to shallow acceptors at liquid helium temperatures in silicon 07 p1095 A66-17321
- Radiative recombination in germanium doped with As, Sb or In, using optical or electrical injection at 10 to 20 degrees K 07 p1095 A66-17322
- Electron capture and hole capture by impurity atoms due to radiative transitions in silicon and germanium 07 p1095 A66-17323
- Recombination radiation of n-type germanium with various dislocation densities, emphasizing mechanism of radiative transitions 07 p1096 A66-17324
- Radiative recombination in p-n junctions produced by diffusion of beryllium into GaAs with very high electron concentration 07 p1096 A66-17325
- Energy spectrum of recombination radiation from forward-biased heavily doped GaAs diodes at 4.2, 77 and 290 degrees K as function of current density 07 p1096 A66-17326
- Effect of injection of charge carriers on recombination lifetime in GaAs diode laser 07 p1042 A66-17331
- Spectral distribution of recombination radiation observed in various samples of GaAs irradiated by electron beam 07 p1043 A66-17340
- Coherent radiation from gallium arsenide p-n junction formed by beryllium diffusion, noting radiative recombination with zinc 07 p1105 A66-18378
- High resolution equilibrium radiation spectra for shock layer of blunt bodies at reentry velocities and radiative recombination of N and O ions [AIAA PAPER 66-104] 07 p0984 A66-18458
- Recombination-radiation spectra of GaP-GaAs p-n heterojunctions 09 p1412 A66-19984
- Silicon recombination radiation, describing long wave IR radiation effect and photon energy gain via conversion into short wave radiation 09 p1431 A66-20896
- Temperature dependence of integral light flux of recombination radiation in indium phosphide n-p junction 09 p1431 A66-20935
- Bremsstrahlung, recombination radiation and electromagnetic emission from high-temperature high density plasmas 10 p1566 A66-21705
- Disappearance of impurity levels in germanium containing arsenic in presence of large injection level 10 p1588 A66-22161
- Recombination radiation of p-n junctions in CdTe-ZnTe system crystals for various current densities and molecular compositions 11 p1749 A66-22293
- Compton process argument for quasar relative nearness to our Galaxy and contrast between Compton and synchrotron radiation scattering effects 12 p1950 A66-24389
- Radiative recombination in gallium arsenide p-n junctions for weak currents, obtaining relation between emission spectra and current-voltage characteristics of diodes 12 p1929 A66-24456
- Width of spontaneous emission region in degenerate gallium arsenide p-n junction, noting spectral shifts, emission, interference, etc 13 p2159 A66-25064
- InAs laser emission, discussing radiative transitions, coherent emission from InAs diodes, recombination mechanisms in IR radiation spectra, etc 13 p2089 A66-25065
- Homeopolar semiconductors, discussing radiation recombination parameters on impurity centers with phonon participation 13 p2167 A66-25929
- Spectral characteristics of gallium arsenide junction luminescence, noting radiative recombination mechanism, energy spread of impurity states and line shape temperature dependence 13 p2168 A66-26186
- Radiative recombination lifetimes in laser-excited silicon, correlating emission with photoconductivity 13 p2105 A66-26597
- Recombination radiation of strongly arsenic-doped germanium, noting narrowing of forbidden band 14 p2358 A66-27080
- Injection-current dependence of intensity of recombination radiation of separate bands in gallium arsenide 14 p2249 A66-27084
- Recombination radiation in semiconductor affected by strong magnetic field 14 p2363 A66-27597
- Long-wave recombination radiation of germanium associated with optical transitions involving photon emission and current carrier heating 14 p2368 A66-28245
- Radiative recombination in silicon containing structural defects in lattice 14 p2368 A66-28251
- Recombination of nonequilibrium charge carriers in indium arsenide, noting radiative and impact recombination 14 p2368 A66-28255
- Recombination radiation spectra of n-type gallium antimonide on concentration of tellurium base region 14 p2369 A66-28263
- Oxygen photochemical equilibrium above 150 km, assuming dominant role of radiative recombination above 120 km 15 p2486 A66-29089
- Relaxation time for recombination radiation from semiconductor source determined by measuring current/emission phase shift 15 p2568 A66-29704
- Spectral distribution of recombination radiation caused by electroluminescence /EML/ in indium antimonide 15 p2568 A66-29726
- Nonlinear diffusion equations in electron beam excited plasma noting two- and three-body recombination, radial distribution of electron density, light intensity, etc 15 p2555 A66-29761
- Valence-band bending to Fermi level and radiative recombination in zinc sulfide with liquid electrodes 16 p2771 A66-30201
- Multiphoton plasma production and stimulated recombination radiation in lead telluride, considering electron-hole pair production rate 17 p2975 A66-31884
- Spectral and spatial distribution of origin of injection luminescence from epitaxial gallium arsenide transistors, noting correlation between energy peak and radiation recombination 17 p2986 A66-33295
- Gas pressure dependence of attachment and recombination coefficients for

thermalized electrons in air and oxygen 18 p3143 A66-34035

Suggested origin of low energy tails in radiative recombination spectra due to degenerate conduction band 19 p3437 A66-35475

Disappearance of impurity levels in germanium containing arsenic in presence of large injection level 19 p3441 A66-35775

Absorption, radiative recombination and photoconductivity of CdSe 19 p3444 A66-36035

Efficiency limitation factors in radiative recombination in electroluminescent GaAs diodes, examining contribution of majority and minority carriers injected into P region 19 p3319 A66-36264

Radiative recombination in gallium arsenide p-n junctions for weak currents, obtaining relation between emission spectra and current-voltage characteristics of diodes 20 p3619 A66-37688

Radiation intensity dependence for various spectral bands of diffused gallium arsenide p-n junctions on current density 21 p3798 A66-38921

Varying excitation intensity effects on edge emissions from pure and doped CdS powder samples, noting electron-hole recombination mechanisms 21 p3802 A66-39202

Recombination radiation from GaAs p-n junctions with and without Fabry-Perot resonator, noting parameter dependence on current density 22 p3932 A66-40314

Recombination radiation of strongly arsenic-doped germanium, noting narrowing of forbidden band 22 p3967 A66-40836

Injection-current dependence of intensity of recombination radiation of separate bands in gallium arsenide 22 p3882 A66-40840

One-dimensional approximation analysis of excess carrier density distribution in illuminated semiconductor and radiative recombination effects 23 p4115 A66-41857

Radiative recombination in annealed electron irradiated zinc doped gallium arsenide 24 p4250 A66-42229

Radiative recombination within space-charge region in germanium exposed to increasing surface field 24 p4251 A66-42308

Recombination radiation in semiconductor affected by strong magnetic field 24 p4257 A66-42731

RADIATOR

SA HEAT REJECTION DEVICE

SA SPACE RADIATOR

SA SPACECRAFT RADIATOR

SA THERMIONIC RADIATOR

Heat rejection per unit weight of radiator with evolve type reflectors compared with radiators with rectangular fins, considering mutual irradiations of neighboring radiator parts [ASME PAPER 65-WA/HT-17] 05 p0790 A66-15647

Grapho-analytical method of determining heat carrier parameters of cooler-radiator system in off-design operation 06 p0970 A66-16326

RADICAL

SA FREE RADICAL

Behavior of excess radical concentrations, H, OH and O as function of height above reaction zone in premixed acetylene-air flames 03 p0414 A66-12488

RADIO ALTIMETER

Inertially augmented radio altimeter guidance system for space booster missions with over-horizon orbital injection requirements 01 p0100 A66-10023

Height measurement from Doppler navigation, examining accuracy of pressure altimeter 09 p1381 A66-20429

Instrument low-approach system and low-level precision radio altimeter for all-weather landings 17 p2951 A66-33100

Inertially augmented radio altimeter guidance system for space booster missions with over-horizon orbital injection requirements 23 p4088 A66-41099

RADIO ANTENNA

Regional control radar on Bertagne peak near Marseille operates on L band with peak power of 2 mw and acts as advanced antenna for VHF-UHF air-to-ground communication 03 p0353 A66-13024

Antenna characteristics, design and

selection noting use in broadcasting, radio navigation, etc 04 p0491 A66-13401

Measurement error of radiation pattern parameters assuming polarization of transmitting antenna coincides with that of receiving antenna 06 p0838 A66-15894

Optimum antenna requirements for radio-slope guidance system and vertical control in blind landing 08 p1254 A66-19833

Linear source antenna length determined when radiation pattern, approximation function accuracy and superdirective ratio are known 11 p1670 A66-23232

Design and testing of cross polarized feed for 10 ft diameter parabolic dish, noting coincidence of focal and aperture plane 16 p2666 A66-31565

Antisolar astronomical probe data transmission system requiring large high-gain antenna for transmission at 40 AU 19 p3300 A66-35669

HF long-distance radio signal transmission and high and low antenna sighting 20 p3521 A66-38358

Narrow band transmitters for response code of secondary radar installations containing identity of aircraft and altitude for air traffic control 21 p3706 A66-39634

Spacecraft and Earth-terminal antennas for interplanetary communication via high power information 22 p3881 A66-40748

Monograph on radioastronomical applications in antenna design, emphasizing reflector antennas and extraterrestrial and artificial radio emission effects 22 p3882 A66-40856

Spaced antenna reception by quadratic addition of signals providing efficient operation at various statistical characteristics of radio channel 23 p4038 A66-41518

RADIO ASTRONOMY

Data on planets obtained by optical and radio techniques with emphasis on space vehicle observation 01 p0133 A66-10176

Radio astronomy - British Science Research Council Report, 1961-1964 01 p0139 A66-11155

Radio astronomy contributions in solar physics, supernovas, morphology and kinematics of galaxy, etc 01 p0139 A66-11157

Radio telescopes and capabilities, resolution and collecting areas noting interferometric, cross-synthesis and aperture-synthesis types 01 p0139 A66-11158

Radio astronomy research in solar system, galaxies, supernovas, radio galaxies and cosmology 01 p0139 A66-11159

Preponderance of negative velocity hydrogen, found equally in north and south galactic polar caps, surveyed with Harvard 60-ft antenna 02 p0292 A66-12187

Comparison of optical and radio observations of spiral structure of galaxies 03 p0423 A66-12454

Textbook on observations, interpretations and associations of solar radio emission, relating them to understanding of solar physics and Sun-Earth environment 03 p0428 A66-12993

Radio astronomic techniques for locating radio sources, measuring intensity and mapping distribution 04 p0576 A66-13464

Origin of primary cosmic rays discussing galactic theory, propagation characteristics and measurement results 04 p0574 A66-13807

Measuring radio source diameter comparable to or smaller than resolution limit of telescope 05 p0763 A66-15287

NEC maser amplifier for radio astronomical observation of Cygnus A, Taurus A and Orion and Omega nebulas 05 p0697 A66-15365

Cosmic X-ray and gamma ray astronomy in studying stellar evolution, cosmic ray origin and structure of universe 06 p0944 A66-16314

Radio astronomy observatory at Nancy, reviewing principles of electromagnetic radiation in Hertzian range 06 p0869 A66-16936

Length of compact function estimated from noisy measurement of modulus of Fourier transform 06 p0867 A66-16977

Atmospheric composition of Venus and effect on radio emission in visible and near IR spectral bands 08 p1294 A66-19325

Power law detector design technique providing output voltage proportional to

input power over 32-db range of inputs 09 p1351 A66-19938

Planetary atmospheres and surfaces - Symposium, Dorado, Puerto Rico, May 1965 09 p1448 A66-20101

Radio observations of Mercury show brightness temperature of only 200 degrees K, with no significant variation with phase 09 p1453 A66-20182

Radio observation of planetary and stellar emission and effects of terrestrial atmosphere 09 p1454 A66-20289

Space research in Sweden including cosmic rays, aurora, radio astronomy, rocket sounding, etc 09 p1459 A66-20724

Radio astronomy, Volume 5 of Progress in radio science 1960-1963, URSI General Assembly, Tokyo, September 1963 10 p1601 A66-21058

Galactic radio astronomy developments including 21-cm line studies, galactic discrete sources, background radiation and polarization 10 p1601 A66-21059

Radio brightness distribution over quiet Sun and various deductions concerning electron temperature and density of corona, including data on overdense regions radiating thermally 10 p1601 A66-21061

Antenna impedance behavior in plasma related to radio astronomy, emphasizing electrically small antennas used in space vehicles 10 p1507 A66-21118

Book on galactic structure including distribution of common stars, solar motion, interstellar hydrogen distribution, galactic radio emission, planetary nebulae, etc 11 p1766 A66-22253

Reception of LF signals by radio astronomy satellites, utilizing mathematical techniques for ray tracing in spherical ionosphere 11 p1651 A66-22367

Focusing inhomogeneities in ionospheric electron density investigated by radio astronomical techniques at frequencies from 13 to 54 megacycles 11 p1696 A66-22415

Antenna theory, analyzing radio astronomical methods such as antenna axis, radiation pattern, gain, efficiency, etc 11 p1658 A66-23219

Criteria for artificial radio sources developed by radio astronomical techniques include spectrum with maximum at 3 to 10 cm, small angular dimensions and variability in time 12 p1947 A66-23891

Aperture synthesis technique for increasing information rate to radio astronomy array by rejecting restriction of fractional bandwidths 13 p2037 A66-25553

Galactic plane emission at 408 mc/s using Australian 210 ft radio telescope 13 p2186 A66-26030

Radio astronomy studies of Venus and Mars noting surface properties, atmospheric structure, etc 13 p2186 A66-26031

Solar radio observation at 600 mc frequency during 1961 at French station, noting flux density and solar daily variation 13 p2188 A66-26322

Anomalous polar type radio emission absorption in ionosphere on April 4, 1965 measured, using radio astronomy 14 p2377 A66-28476

Galactic structure observational aspects - NATO International Summer Course, Athens September 1964 15 p2593 A66-28980

Accuracy of radio astronomy measurements of wavelength, frequency, position, brightness distribution and flux density compared with optical measurements 15 p2594 A66-28982

Radio astronomy measurement of galactic structure, using thermal and nonthermal radiation and neutral hydrogen line emission 15 p2594 A66-28983

Polish space program noting international cooperation, satellite observation, radio astronomy, rocket sounding, etc 15 p2601 A66-29932

Radiometric temperature measurement of Mars surface microclimate, examining heat flow balance, taking into account solar and planetary radiation effects [AIAA PAPER 66-436] 16 p2799 A66-30522

Quasi-stellar radio sources evolution as function of space-time 16 p2799 A66-30591

Quasi-stellar object origin noting spectrum, intensity distance, etc 17 p2995 A66-31910

Intergalactic matter temperature

- parameters such as heating by cosmic ray ionization, dissipation of hydrodynamic turbulence, inelastic electron collision with He and He-ions 17 p2996 A66-31912
- Radio astronomy applications, noting solar and galactical emissions, planetary radiation measurement, instrumentation 17 p2998 A66-32028
- Origin and propagation of cosmic radiation, discussing interplanetary magnetic fields, masmas, Faraday rotation of polarized radiation, Zeeman splitting of hydrogen line, etc 17 p2964 A66-32029
- Parametric and tunnel diode amplifiers for radio astronomy, noting diode quality, operating frequency range, noise, temperatures, etc 17 p2892 A66-32918
- Lunar occultation and identification of SH 19-27 radio source, noting computer analysis of brightness 18 p3225 A66-33549
- Microwave coaxial termination as low temperature noise-reference source, noting variation of VSWR with voltage and frequency 18 p3077 A66-34078
- Steerable parabolic reflector performance characteristics noting gain, noise pattern, polarization and pointing system 18 p3082 A66-34280
- Steerable parabolic reflector /Haystack antenna/ mechanical design, discussing structural properties, test program and operation 18 p3255 A66-34281
- Radio astronomy observations applied to solar wind problem, results include radial variation of electron density, size of coronal irregularities and coronal magnetic field direction 18 p3231 A66-34337
- Radio-source fringe visibilities survey with RAO interferometer of 21,500-wavelength base line 20 p3649 A66-37323
- Solar radio astronomy and radiation observation, describing mechanisms of radio wave emission and propagation through solar atmosphere 20 p3651 A66-37435
- Cosmic radioastronomy, discussing radio wave emission from quasars, synchrotron effect, hydrogen emission, leptons, gravitational fields, origins of matter and antimatter, etc 20 p3651 A66-37437
- Radio astronomy of quasars, discussing galactic radio source identification, luminosity, optic magnitude, gravitational effect, flux density and classification 20 p3651 A66-37438
- Detection of three radio lines arising from transitions between highly excited states of neutral helium 20 p3652 A66-37615
- Large aperture antennas, noting limitations of apertures due to wave propagation characteristics, mechanical problems and optimum gain 20 p3530 A66-37714
- Radio astronomy antenna theory, discussing antenna resolution, brightness distribution of celestial bodies, interferometer patterns, actual antennas, etc 20 p3530 A66-37721
- Radio astronomy satellite with extendible antennas achieves gravity gradient stabilization while receiving electromagnetic radiation, analyzing dynamic behavior and effect of passive damper 21 p3820 A66-38863
- Radio astronomy measurements requiring absolute intensity calibrations, noting flux densities and measurements of very dark areas of sky 21 p3815 A66-39484
- Linear polarization of continuum emission from galaxy and discrete sources, detection in radio astronomy, noting relevant synchrotron theories 21 p3815 A66-39488
- Quasar research, distributions and possible synchrotron mechanism 22 p3979 A66-40376
- Millimeter wave radio astronomy, discussing solar system, galaxy and extragalactic sources 22 p3983 A66-40732
- Monograph on radioastronomical applications in antenna design, emphasizing reflector antennas and extraterrestrial and artificial radio emission 22 p3882 A66-40856
- Optical hydrogen-line profiles in Orion nebula compared to radio profile obtained from antenna response and weighting factors of brightness 23 p4131 A66-41820
- Temperature 23 p4131 A66-41820
- RADIO ASTRONOMY EXPLORER /RAE/ TELLITE**
- Solar burst radiometer for radio astronomy Explorer satellite, measuring spectral energy distribution below ionospheric cut-off level 12 p1883 A66-24679
- RADIO ATTENUATION**
- Effects connected with auroras and magnetic storms in lower ionosphere considering radio wave attenuation, cosmic ray absorption, etc 03 p0365 A66-12854
- Seasonal variation in short-wave signal absorption at different latitudes reflected in seasonal variation of gas density and ionospheric absorption at D region and lower E region 05 p0672 A66-15025
- Atmospheric oxygen absorption factor of centimeter and millimeter radio waves 05 p0636 A66-15878
- Earth troposphere affected by solar corpuscular fluxes, cosmic rays, atmospheric radiation, chromospheric flares and intensified radio wave absorption 08 p1285 A66-19452
- Propagation and attenuation of radio waves in interstellar and near solar space 09 p1348 A66-21014
- Field produced at 100 km altitude by ground located VLF transmitter examined, noting absorption, power propagation and propagation variation 10 p1526 A66-21127
- Auroral zone electron flux and relation to broadband radiowave absorption 11 p1703 A66-23495
- Atmospheric radio wave absorption coefficient and altitude determined and linked to effects of colliding paramagnetic oxygen molecules 13 p2020 A66-25224
- Nonresonant absorption of radio waves in molecular oxygen 13 p2025 A66-26044
- Cosmic radio emission attenuation in ionospheric measurements including characteristic period and seasonal absorption measurements 13 p2186 A66-26050
- Anomalous ionospheric radio wave absorption during winter in 40 degree northern latitude 13 p2026 A66-26741
- Attenuation of radio waves from Taurus A in interplanetary space and in space about Sun 14 p2242 A66-28152
- Field intensity of ultrashort radio waves in superrefraction 14 p2242 A66-28154
- Winter anomaly of nondeviative ionospheric absorption of radio waves and relation to diurnal, seasonal, local and solar cycle variations 15 p2490 A66-29943
- Magnetic beach effect on RF power transfer to ion-cyclotron waves in hydrogen and deuterium plasmas 18 p3146 A66-34463
- Earth troposphere affected by solar corpuscular fluxes, cosmic rays, atmospheric radiation, chromospheric flares and intensified radio wave absorption 18 p3169 A66-34481
- Cosmic radio noise used to measure ionospheric absorption, comparing extraordinary and ordinary wave flux effect in overcoming measurement problems 19 p3351 A66-36361
- Radio wave absorption factors in atmospheric water vapor and oxygen, deriving expressions for effective length, mean temperature and total vertical absorption 20 p3512 A66-37134
- Tropospheric radio wave propagation field strength measurements and attenuation differences among various mixed land and sea transmission paths 20 p3520 A66-38144
- Computer calculations from Sen-Wyller expression for specific absorption of radio wave in lower ionosphere 22 p3906 A66-39954
- Sunrise effect on amplitude of very-long-wave signal level 23 p4036 A66-41201
- Amplification processes in parametrically regenerated circuit with simultaneous complex variation of capacitance and attenuation 23 p4038 A66-41517
- Line shape of RF dimensional effect in metals showing correlation with electromagnetic wave attenuation in skin layer 24 p4172 A66-42528
- Nondeviative radiowave absorption in plane and parabolic ionospheric layers, noting change with time 24 p4174 A66-42760
- Chemical effects on RF attenuation during reentry for blunt-nosed lifting vehicles and sphere-cone ballistic vehicles 24 p4158 A66-42782
- Sporadic E layer reflection used to determine instrument constant in measuring radio wave absorption in ionosphere 24 p4205 A66-43156
- RADIO AURORA**
- Radio aurora onset delay following SSC depends on local time of occurrence 03 p0363 A66-12658
- Origin and behavior of radio auroras noting diurnal, seasonal and long-term time characteristics and direction, range and height distribution 03 p0365 A66-12853
- Data on Northern Hemisphere radio aurora obtained on radar located in England, showing delay in onset of auroral echoes following sudden commencement, depending on local time of SC 11 p1695 A66-22375
- Interpretation of frequency dependence of radio aurora 15 p2483 A66-28817
- Tropospheric and ionospheric refraction, aspect sensitivity and height of radio aurora, backscatter radar aurora observation and geomagnetic field anomalies 20 p3520 A66-38199
- Thermospheric energetics characterized as series of superposed and interconnected atmospheric heat engines and refrigerators 22 p3913 A66-40537
- RADIO BEACON**
- Radio beacon telemetry system for measuring orbital performance of Echo II satellite, including internal pressure and skin temperature 01 p0032 A66-11125
- RADIO BURST**
- SA SOLAR RADIO BURST**
- Continuous electromagnetic radiation of two solar flares attributed to bremsstrahlung of nonrelativistic electrons and synchrotron radiation 02 p0283 A66-11660
- Solar flares, discussing continuous electromagnetic radiation, hard X-ray radiation and microwave radio bursts 05 p0752 A66-15378
- Characteristics of solar radio bursts in microwave region and measurements of atmospheric absorption and solar flux at 17 gc/s 07 p1028 A66-17419
- Coronal and prominence phenomena accompanying solar flares noting shock wave, radio burst, ionospheric fadeouts and absorptions, coronal density and temperature increases, etc 07 p1130 A66-18075
- Satellite ionization effects, CW-reflection and pulse radar techniques in 10 to 20 mc frequency range 08 p1181 A66-18749
- Artificial satellites detected by influences on ionosphere through 20-mc WWV bursts 08 p1181 A66-18750
- High-resolution spectra of decametric radio bursts from Jupiter 09 p1457 A66-20470
- Type IV radio event of February 1965, noting four bursts preceded by decreases in background radiation intensity interpreted as absorption of type IV 12 p1952 A66-24966
- Flux density, polarization characteristics and position measurements for type IV bursts in meter and microwave range 14 p2378 A66-26933
- Outer solar corona during declining portion of solar activity cycle, noting discrepancy between radio and optical values of electron density 15 p2593 A66-28816
- Radio noise bursts from Jupiter at decameter wavelengths noting Cerenkov emission, Doppler-shifter cyclotron emission and escaped-whistler models 18 p3225 A66-33550
- Type V solar radio bursts, examining phenomenological features and properties 18 p3234 A66-34614
- Angular sizes of sources of Jovian radio bursts measured by using interferometers suggest they are produced by diffraction or focusing process in interplanetary space 18 p3237 A66-35083
- Jovian radio bursts containing millisecond pulses, noting effect of Io position on probability of decametric emission 22 p3982 A66-40521
- RADIO COMMUNICATION**
- SA DOUBLE-SIDEBAND RADIO COMMUNICATION**
- SA GROUND-AIR-GROUND COMMUNICATION**
- Electromagnetic wave absorption and cosmic noise absorption measurements useful in radio communication 01 p0072 A66-11101
- Radio search for intelligent extraterrestrial life, estimating civilization distribution,

frequency of best sensitivity and aggregate signal detection 02 p0191 A66-11610

Doppler shift and distortion of key-modulated signals in radio links with moving transmitter and receiver 02 p0191 A66-11751

Radio communication between U.S.S.R. and Great Britain via passive Earth satellite Echo II and Moon signal reflection 07 p1001 A66-17345

Data transmission by continuously-radiating power source moving away from receiver and fluctuation noise of uniform frequency spectrum 11 p1654 A66-22633

Possibility of detection of extraterrestrial civilizations by radio communications 12 p1814 A66-23893

Communication with extraterrestrial civilizations in radio wavelength range 12 p1814 A66-23895

Information theory techniques for search and analysis of radio signals from extraterrestrial civilizations 12 p1814 A66-23896

Tunnel diode amplifier for broadband radio communication using integrated circuits, noting noise figure, stability and saturation effect 12 p1840 A66-24623

Junction filters for eight channels in SHF range with provision for 1800 paths, noting bandpass width signal mixing for antenna feed, attenuation, capability, etc 14 p2252 A66-27351

International RF space allocation for astronomical purposes 15 p2449 A66-28743

Tunable precision frequency source using phase locked variable frequency oscillator for mobile radio sets 15 p2451 A66-29313

System measurement and identification, considering stochastic transformation between input and output functions, noting connection with radio communication problems 15 p2473 A66-29375

Time frequency coded pulse communication systems, noting pulse-position, pulse-code and delta modulation, signal coding, etc 16 p2647 A66-30520

Increased transmission capability of radio communications link by applying multifrequency manipulation and multipositional amplitude manipulation 17 p2875 A66-32702

Satellite broadcasting system for TV, international shortwave and high fidelity FM communication 18 p3066 A66-33783

Computer model study of diversity augmented vehicular radio relay communication system in man-made noise environment 18 p3069 A66-34167

Theoretical calculation of propagation path geometry of VHF aurora backscatter communications compared with experimental observations 19 p3306 A66-36653

Japanese antenna engineering, discussing linear, microwave, slot and plate antennas, arrangement, radiation and temperature characteristics, etc 20 p3529 A66-37704

Book on low noise features of radio communication /telephonic and telegraphic/ in absence of signal attenuation at receiver input 22 p3869 A66-40857

Translunar communication using pumice-like outer layer as propagation medium 23 p4036 A66-41151

Electromagnetic structure of radioelectric whistlers, considering wavefront curvature in D layer, noting signal reception at two distant ground stations 24 p4176 A66-43001

Seasonal and diurnal fluctuation of radio wave in ionosphere in connection with fading process of reflected signal 24 p4204 A66-43155

Book on laser applications in radio communication systems 24 p4226 A66-43226

RADIO CONTROL

Radio interference control component RF characteristics and insertion loss measuring techniques 11 p1665 A66-22681

Text on radio remote control and telemetry and missile application, including modulation and multiplex techniques 17 p2876 A66-33189

Satellite orbiting via radio command guidance, discussing results with communications and weather satellites, guidance system used, control methods, etc 18 p3131 A66-33848

Recoverable and reusable radio controlled sounding rocket equipped with deployable

flexible wings attached to paraglider beams 24 p4284 A66-43071

RADIO DIRECTION FINDER

HF direction finder consisting of two orthogonal interferometers built and tested by 16,000 direction-of-arrival measurements 03 p0344 A66-13019

Real and theoretical accuracy of direction finding discussing phase, frequency and amplitude fluctuation of signal 04 p0544 A66-14412

Angular noise induced random error in direction finding as affected by target properties and sense 14 p2242 A66-28149

Coefficient of mutual correlation of noises for two-antenna phase-type direction finder 17 p2879 A66-31860

RADIO ECHO

Lunite model based on astronomical and radar data of radio wave reflectance from lunar surface, showing dependence of reflection coefficient on wavelength 01 p0135 A66-10274

Minimum ionospheric electron density needed for radio reflection in D layer 01 p0031 A66-11037

Relative backscatter coefficients for 16-mc backscatter from land and sea 02 p0190 A66-11472

Radio-echo observations of sporadic meteors at 68-cm wavelength 03 p0424 A66-12677

Index s determination from mass duration distribution of unstable radio echoes from meteor trails 05 p0759 A66-14883

Tape recording meteor diffraction characteristics from three stations by measuring velocities and orbits of individual meteors by radio 07 p1032 A66-17637

Reflection of radio waves incident on boundary surfaces, noting application to Kraus effect theory 08 p1182 A66-18753

Height and velocity effect on initial radii of ionized meteor trails from general amplitude-time characteristics of radio echoes at two wavelengths 08 p1290 A66-19030

Radio auroral echoes and correlation to geomagnetic disturbance 08 p1215 A66-19205

Radio reflectivity measurements have provided more data on lunar surface than radar observation 09 p1452 A66-20128

Absolute stellar magnitude of meteor determined from duration of meteor radio echoes of unstable type 12 p1945 A66-23512

Meteor trail formation by ionization, examining HF radio wave reflection in communications field 12 p1947 A66-23795

Height of peaks of ionospheric layers using five-point Kelso analysis and single polynomial analysis 12 p1874 A66-24846

Effect of meteor activity on fading of radiowave reflected from E region 16 p2692 A66-30331

Direct phase technique for studying polarization phenomena associated with reflections of radio waves from meteor trails 16 p2655 A66-31543

Ionospheric radio wave absorption, noting inverse correlation between solar activity with stability of reflections from sporadic E layer 19 p3344 A66-35263

Absolute stellar magnitude of meteor determined from duration of meteor radio echoes of unstable type 20 p3646 A66-37025

Radar target tracking error induced by ground reflection of radar echo from static beam split autotracking radar 20 p3520 A66-38142

Microwave beam incident on linearly graded plasma for electron density profile determination, using ray theory 22 p3861 A66-39723

VLF radio wave propagation in model Earth-ionosphere waveguide of arbitrary height and finite surface impedance boundary 22 p3863 A66-39936

Spatial distribution of auroral radio signal reflection centers based on radar observations 22 p3915 A66-40777

Ionospheric drift and radio wave dispersion determined from selective fading records and symmetry of cross correlation functions, using Fourier transforms 22 p3916 A66-40807

Optimum communications working frequencies for F-2 layer reflection selected with aid of communications reliability

function 24 p4176 A66-43160

RADIO ECHO OBSERVATION

Total duration of meteoric radio reflections and space factor at wavelength of 10 m 08 p1299 A66-19795

Radio-echo observation of Perseid meteor shower during August 1962, studying distribution of radio magnitude as function of solar longitude 16 p2694 A66-30642

Harvard Radio Meteor Project observations of physical characteristics of small radio meteors 17 p3002 A66-32525

Total duration of meteoric radio reflections and space factor at wavelength of 10 m 21 p3812 A66-38791

Radio echo observations of Geminid meteor shower during December of 1962 and 1963 23 p4125 A66-41065

RADIO EMISSION

SA THERMAL RADIO EMISSION

Jupiter radio emission, with plasma waves in planet ionosphere as source of radiation 01 p0131 A66-10273

Radio emission in ionosphere during high solar activity explained as electron emission produced by particles moving as corpuscular fluxes 02 p0284 A66-12133

Radio waves, X-ray and energetic particle emission associated with solar flares 03 p0421 A66-12844

Magnetic bremsstrahlung of relativistic electrons in plasma during generation of type IV radio emission 03 p0422 A66-12913

Statistical characteristics of fluctuations in radio emission of atmosphere producing turbulent pulsations and displacements of hydrometeorological formations in scan field of radiotelescope, noting distribution function 04 p0517 A66-14046

Radio emission fluxes of CTA 21 and CTA 102 from August 1964 to February 1965 05 p0759 A66-14886

Galactic cluster radio emission 05 p0759 A66-14887

Origin of continuum radio emission in directions away from Milky Way 05 p0766 A66-15480

Sky brightness and cosmic radio emission in satellite Ariel II 05 p0769 A66-15842

Observations concerning origin of Venus radio emission and about ionosphere surrounding planet 06 p0954 A66-16625

Statistical radio emission characteristics of cloudy atmosphere 06 p0837 A66-17181

Radiation from Jupiter magnetospheric tail contributes to decametric noise 07 p1133 A66-17467

5-cm radio emission from excited hydrogen in Omega nebula studied with quantum parametric amplifier 07 p1134 A66-17624

Extraordinarily enhanced radio emission when radio source Taurus A was occulted by supercorona, concluding that supercorona shape is affected by intensity and direction of inclined interplanetary magnetic field 07 p1136 A66-17643

Spectra of lunar occultations of emission source 3C 273 08 p1297 A66-19449

Reabsorption of synchrotron radiation as error source in discrete radio emission source parameter determination 08 p1297 A66-19450

Radio emission of Moon during lunar eclipse 08 p1298 A66-19459

Ionospheric parameter measurements based on ground reception of radio signals broadcast from Elektron I satellite 09 p1377 A66-21003

Vertical electron density profiles determined at 725 and 1525 kc, using Elektron II satellite /1964 6B/ 10 p1600 A66-21050

Radar echoes and microwave and radio emissions from Moon and planets 10 p1601 A66-21063

EUV radiations compared with radio intensities of quiet Sun at sunspot minimum 10 p1602 A66-21091

Radio emission intensity measurements of Moon at 1.8 cm during lunar eclipse of June 25, 1964 12 p1945 A66-23507

Observation of Martian radio emission at 8 mm with PT-22 radio telescope in March 1965 12 p1945 A66-23514

Radio emission from CTA-21 and CTA-102 sources in cm wavelength range at Pulkovo 12 p1947 A66-23890

Separation of radio emission of extensive

air showers /EAS/ polarized in East-West direction from usual Cerenkov radiation 13 p2175 A66-26023
 Brightness temperature of radio emission from Venus 13 p2186 A66-26034
 Magnetic bremsstrahlung of relativistic electrons in plasma during generation of type IV radio emission 14 p2376 A66-27262
 Formulae relating 21-cm emission intensity to density of interstellar hydrogen gas 14 p2383 A66-27799
 Radio emission in ionosphere during high solar activity explained as electron emission produced by particles moving as corpuscular fluxes 14 p2241 A66-28090
 High resolution observation of radio emission from active regions in solar corona at 26.3 mc/s 14 p2386 A66-28124
 Anomalous polar type radio emission absorption in ionosphere on April 4, 1965 measured, using radio 14 p2377 A66-28476
 Scintillations of Jupiter decametric radio wave emission explained in terms of diffraction and refraction by single ionospheric irregularities 15 p2593 A66-28903
 CAT detection by radiometric measurement of mm wave emission from oxygen molecules and measurement of ambient air temperature and temperature gradient 15 p2532 A66-28926
 Radio wave emission due to shock wave propagation in magnetospheric boundary and electromagnetic scattering in plasma wave field 15 p2575 A66-29083
 Instrument methods determining function and density of length distribution of random radio emissions 15 p2451 A66-29123
 Relation between RF of Jovian decametric emission bursts and modulation by Io searching for modulation by three outer Galilean satellites 15 p2597 A66-29232
 Measurements of location of centroid of Jovian radio emission relative to nearby radio source 15 p2597 A66-29259
 Radioelectric emission of VLF at two conjugate points 16 p2693 A66-30590
 VLF emission associated with flickering aurora 16 p2696 A66-30721
 Jupiter decametric radio emission spectrum during power at various frequencies, mean flux density, magnetic pole locations, etc 16 p2801 A66-30922
 Observations of lunar radio eclipses at mm wavelengths 16 p2806 A66-31542
 Coherent plasma radio wave emission ineffective for quasar, Crab Nebula and supernovae remnants 17 p2996 A66-31913
 Statistical characteristics of fluctuations in radio emission of atmosphere producing turbulent pulsations and displacements of hydrometeorological formations in scan field of radiotelescope, noting distribution function 17 p2917 A66-32212
 Determination of radio brightness distribution across sky dependent upon conditions of radio telescope operation 17 p2999 A66-32236
 Characteristics of lunar radio emission considered, taking into account averaging effect of antenna radiation pattern 17 p2999 A66-32237
 Frequency spectrum of continuous thermal radio emission of plasma layer 17 p2974 A66-33285
 Spectra of lunar occultations of emission source 3C 273 18 p3232 A66-34478
 Reabsorption of synchrotron radiation as error source in discrete radio emission source parameter determination 18 p3169 A66-34479
 Radio emission of Moon during lunar eclipse 18 p3232 A66-34488
 Galactic evolution examined, using luminosity and volume emissivity diagrams 18 p3178 A66-34760
 EAS RF emission detection, discussing enhanced Cerenkov radiation, mutual coherence effects, diffraction, Fresnel zones, Coulomb-field bremsstrahlung, etc 18 p3208 A66-35117
 Statistical radio emission characteristic of cloudy atmosphere 19 p3297 A66-35539
 Radio emission intensity measurements of Moon at 1.8 cm during lunar eclipse of June 25, 1964 20 p3646 A66-37020
 Observation of Martian radio emission at 8 mm with PT-22 radio telescope in March

1965 20 p3646 A66-37028
 Venus brightness temperature and polarization of integral radio emission at 3.75 cm wavelength 20 p3648 A66-37044
 Cosmic radioastronomy, discussing radio wave emission from quasars, synchrotron effect, hydrogen emission, leptons, gravitational fields, origins of matter and antimatter, etc 20 p3651 A66-37437
 ULF radio emission of upper atmosphere and other related geophysical phenomena, analyzing hisses, choruses and contribution to Earth radiation belt 20 p3551 A66-37487
 Radio emission of Venus at 3 cm and solar activity 20 p3653 A66-37616
 Interferometric observation of flux densities of solar radio emission at 4000 mc/sec and relationship to 27-day recurrence tendency of summation of planetary 3-hour indices 20 p3634 A66-38214
 Electron temperature of solar corona, noting radiative transfer of radio emission in corona, deriving distribution of brightness temperature over solar disk 21 p3811 A66-38638
 Direction, frequency and polarization of radio emission from galactic OH determined by hypothesis of stimulated emission 21 p3814 A66-39213
 Radio electron density and magnetic field in galactic halo from primary cosmic ray and radio brightness measurements 21 p3817 A66-39563
 Monograph on radioastronomical applications in antenna design, emphasizing reflector antennas and extraterrestrial and artificial radio emission effects 22 p3882 A66-40856
 Jupiter radiation recorded almost every night with antenna arrays shows emission dependency on Jupiter longitude and Io position 23 p4131 A66-41817
 Radio emission from Venus, Jupiter, Pluto and other planets at 1.9 cm analyzed, using radio telescope, noting effective temperatures 23 p4131 A66-41818
RADIO EQUIPMENT
SA ULTRA-SHORT-WAVE RADIO EQUIPMENT
SA VERY HIGH FREQUENCY RADIO EQUIPMENT
 Ultralong-range propagation of meter radio waves, noting equipment details and television signal reception 02 p0192 A66-12137
 Radio instrument tuning using Gauss-Seidel method, formulating properties of tunable surfaces 11 p1667 A66-22793
 Ultralong-range propagation of meter radio waves, noting equipment and television signal reception 14 p2241 A66-28093
 Optimal set of parameters for radioelectronic equipment automatic control, using nonlinear programming 18 p3091 A66-34986
RADIO FILTER
 Filter for exponential signals that facilitates obtaining required response without waiting for reduction of parasitic terms 03 p0340 A66-12471
 Ideal Kotelnikov receiver discussing invariant regime and noise correlation effects 04 p0483 A66-14007
 Optimal pulse shape determined for signal which gives maximum response energy in ideal limiter filter system 07 p1001 A66-17354
 Dividing filter facilitates simultaneous transmission and reception of data between Telstar satellite and ground station at Raisting 09 p1364 A66-20590
 Ideal Kotelnikov receiver, discussing invariant regime and noise correlation effects 12 p1813 A66-23869
 Filter with constant parameters used for optimum reception in presence of unsteady noise and signal with unknown arrival time 14 p2239 A66-27748
 Small and low cost voltage-tunable audio filter using field effect transistors as tuning element in place of inductors for space communications 24 p4180 A66-42334
RADIO FREQUENCY
SA FREQUENCY BAND
 RF magnetic field effect, applied parallel to external DC field, on Heisenberg ferromagnet with dipolar coupling, using Green function 01 p0122 A66-10579
 RF mass spectrometer measuring ionic and

neutral particle composition of outer ionosphere, mounted on Elektron satellites 02 p0229 A66-11662
 Sinusoidal step response of L-band waveguide to step-modulated RF excitation 03 p0332 A66-12432
 Local resistivity of semiconductor by measuring RF spreading resistance of probe on sample surface without attaching electrical contacts 03 p0371 A66-13252
 Niobium elastic constants tabulated for various temperatures, using RF pulse-echo method 04 p0536 A66-13754
 Nonlinear interaction between plane RF wave and one-dimensional inhomogeneous multicomponent plasma slab 04 p0487 A66-14370
 Nonlinear reflection and transmission coefficients of inhomogeneous plasma slab when RF plane wave is incident upon it 04 p0488 A66-14371
 Reflex klystron as subcarrier detector for microwave signals modulated by RF carriers in 100 to 500 kc range 06 p0853 A66-16651
 Tunnel diode I-V characteristics, RF detector suitability, input-output characteristics, sensitivity and noise 08 p1191 A66-18943
 RF losses in lead and niobium investigated for possibility of constructing superconducting linear accelerator 09 p1416 A66-20026
 Variations of turbulent plasma electric conductivity with input oscillation intensity and with square of RF input voltage 09 p1409 A66-20853
 Harmonic suppression ratios in RF amplifiers calculated, using circuit parameters and applying Fourier transformations 10 p1508 A66-21299
 Breadboard microwave pointing device with attached RF source comprising azimuth angle measuring system, with application in geodesy, tropospheric propagation, etc 10 p1538 A66-22048
 RF electromagnetic fields to control state of flowing thermal plasma [AIAA PAPER 66-166] 11 p1742 A66-22210
 Radio interference control component RF characteristics and insertion loss measuring techniques 11 p1665 A66-22681
 Digital and RF/linear circuits compared noting monolithic, hybrid and thin film circuit limitations, phase locked loop design, etc 12 p1830 A66-23756
 Microwave generation with conventional transistors in avalanche mode, describing circuit, mounting construction and avalanche oscillator frequency 12 p1830 A66-23757
 Dynamic frequency response, noting measurement of phase and amplitude responses of active and passive devices under RF pulse conditions with very fast FM 12 p1879 A66-23814
 Radio wave absorption at high latitudes dependent on frequency, noting AZA and PCA are inversely proportional to powers of frequency 12 p1817 A66-24276
 Oscillator stability affecting electromagnetic compatibility during PRF generation, digital system reception, reception with phase lock, etc 12 p1838 A66-24599
 Double stream instability in finite diameter beams analyzed by numerical experiments on digital computer, showing electron trapping as cause of RF current saturation 13 p2137 A66-25044
 Stimulated Brillouin scattering in anisotropic media, showing excitation and propagation of stimulated phonons at radio frequencies 13 p2097 A66-26163
 RF harmonic oscillator design, using characteristic equations for natural oscillation frequency expressions, analyzing changing load effects, changing passive parameters, etc 14 p2262 A66-28380
 Interpretation of frequency dependence of radio aurora 15 p2483 A66-28817
 Relation between RF of Jovian decametric emission bursts and modulation by Io searching for modulation by three outer Galilean satellites 15 p2597 A66-29232
 RF resistance in mixed state for subcritical currents 16 p2771 A66-30193
 Phase variation of vlf radio waves received from NPG/NLK 16 p2653 A66-30799

Fermi surface of indium investigated by means of RF size effect at 3 Mc 17 p2977 A66-32316

Continuous wave oscillations in n-type GaAs due to voltage controlled negative conductance 17 p2983 A66-33107

Problems when using RF diagnostic systems in flight test evaluation of ICBM systems, specifically when using EM systems during reentry 18 p3239 A66-33634 [AIAA PAPER 66-406]

Related flares, considering radio frequency, geomagnetic phenomena, etc 20 p3630 A66-37331

Instrument for continuous variation of angle of incidence between ion beam and axis of RF quadrupole mass spectrometer from zero to 90 degrees 20 p3561 A66-38174

RF induced gas plasma at 250-300 kc/s 22 p3956 A66-40401

Magnetic losses in superconductors at radio frequencies analyzed in terms of energy dissipation model at local flux trapping centers 24 p4260 A66-43177

RADIO FREQUENCY DISCHARGE

SA ELECTRON EMISSION

Solar simulation in vacuum and extreme UV using RF gaseous-type discharge light sources and photomultiplier detector 02 p0212 A66-11226

RF electric field in electron beam/plasma interaction measurement, using nonperturbing probing technique 02 p0265 A66-11432

Spatial distribution of HF electric field in resonant discharge determined, using electron beam probing technique 03 p0404 A66-12985

Atmospheric radio noise bursts arising from radiation fields of electrical discharge in LF band at Bangalore, India 04 p0475 A66-13428

Plasma conductivity measurement in terms of frequency shifts and Q-factor variation in RF oscillator circuit produced by presence of plasma sample in induction coil 08 p1264 A66-19190

Average electrical conductivity and state of ionization in RF plasma flow device [AIAA PAPER 66-165] 11 p1742 A66-22209

Electron temperatures in several RF-generated plasmas, using air as medium 12 p1919 A66-23599

RF sputtering of insulators, noting effects of auxiliary magnetic field, electrode size, oxygen concentration, substrate temperature and target material on thin dielectric film formation 13 p2157 A66-25039

HF power transistor delivering 40 watts of RF power at 175 mc at 8 db gain and 75 percent efficiency, noting design and operation 13 p2035 A66-25511

Time behavior of 3889 and 5016 angstrom line helium emission during initial transient of RF discharge, noting pressure dependence and signal intensity 13 p2104 A66-26335

Fluorescence lifetime measuring technique employing pulsed or modulated RF discharges applied to emission of second positive and first negative systems of nitrogen 14 p2337 A66-27974

Collisional Stark broadening in RF discharges, noting large ion and electron broadening contribution 17 p2960 A66-31921

Power enhancement in pulsed He-Ne lasers, noting overshooting for RF discharge modulation with square wave 17 p2935 A66-32963

RF breakdown in air studied for two electrode configurations leading to nonlinear Mathieu-like differential equations for confined electron motion 19 p3296 A66-35417

Nonaxisymmetric mode of standing waves excited in RF discharge by small coil around tube 19 p3404 A66-36759

Plasmoid-like RF helium plasma, noting molecular ion formation and destruction leading to evaluation of lower limit for molecular collisional-radiative recombination coefficient 22 p3957 A66-40908

Radiative lifetime and emission intensity measurements, determining oscillator strength and electron transition moment of first positive band system of nitrogen 23 p4033 A66-42082

RADIO FREQUENCY IMPEDANCE PROBE

LF propagation and probe experiment

yielding profile of ionospheric D region, discussing experimental techniques, computations, RF impedance probes and formulas for ionospheric data derivation 03 p0334 A66-12643

Ionospheric plasma density measurement utilizing variable frequency impedance probe, dispersive Doppler measurements and RF spectrometer field strength detection theory 03 p0398 A66-12644

Plasma and electron gyroresonance effects on admittance of RF plasma probe surrounded by ion sheath 09 p1381 A66-20373

Simultaneous comparison of RF standing wave impedance probe, plasma frequency probe and resonance rectification probe techniques in determining ionospheric electron density 10 p1529 A66-21155

RF impedance of absorptive surface plasma probe for case of collapsed ion sheath 13 p2136 A66-26294

RF probe measurements to determine local magnetization direction and H sub k values in planar films 14 p2352 A66-26894

Electrical discharge in air, mercury vapor and nitrogen, using RF signal probe, determining electron density and temperature and random velocity in plasma 15 p2548 A66-29715

RF size effect on ineffective electrons in magnetic field parallel to surface of cadmium plates studied by observing harmonic oscillations of impedance 16 p2772 A66-30289

Rocketborne RF electron density probe for ionospheric profile determination 23 p4064 A66-41683

RADIO FREQUENCY MONITORING

Pulse operated miniature RF switch for space use and design from command decoder 03 p0348 A66-13343

Multiple-access communications satellite discussing modulation and reception techniques for small stations 04 p0478 A66-13596

Times of peak cosmic radio noise concentration and usefulness to forward propagation ionospheric scatter reception on DEW-Line as performance monitor, etc 06 p0825 A66-15985

Receiving equipment for Early Bird satellite at Fucino, Italy 09 p1354 A66-20559

Composition of outer ionosphere measured, using RF mass spectrometers mounted on board Elektron I and II satellites 09 p1378 A66-21008

FM telemetry RF link performance evaluated by constructing model of subcarrier multiplex, based on predicted noise power spectrum at RF demodulator output 16 p2649 A66-30543

Integration of spacecraft tracking, telemetry and command systems using frequency multiplex subcarriers and angle modulated RF signal 19 p3300 A66-35681

Automatic radio atmospherics recorder for simultaneous observation of waveform and energy spectrum 23 p4069 A66-41663

RADIO FREQUENCY RADIATION

Quantum RF physics text covering magnetic resonance theory, electron paramagnetic resonance, nuclear magnetic resonances, two- and three-level masers, RF gas spectroscopy and ammonia oscillator 01 p0108 A66-10954

Mathematical evaluation of RF energy effects on electroexplosive devices, taking into account limited maximum response of circuits 03 p0334 A66-12570

Constant bandwidth baseband with laboratory telemeter in binary configuration for RF application 04 p0477 A66-13585

High power wideband RF voltage and power amplifiers covering design, operating characteristics, differences, etc 04 p0494 A66-13683

LF/VLF pulse radiation using solid state elements in switching mode to generate RF power, presenting time and energy functions 05 p0652 A66-14596

High energy proton from local radio sources, using telescopic system for Cerenkov effect detection of broad atmospheric showers 05 p0753 A66-15389

Surface layers on ferroelectric barium titanate crystals, noting parameters of RF induced electroluminescence 07 p1107 A66-18405

Cosmic ray origins including galactic rays, RF radiation, metagalactic gamma radiation, etc 09 p1437 A66-20207

High resolution radar correlometer measurement of spatial correlation radius of RF radiation scattered by disturbed ocean surface 09 p1343 A66-20346

Power transistors for RF generation and amplification, discussing operation characteristics and testing methods 10 p1508 A66-21291

High RF magnetotonic propagation effects on polarization scattering matrix 10 p1501 A66-21621

Monopole antenna signal produced via bombardment by flux of gamma rays from nuclear explosion 11 p1663 A66-22546

Spectrophotometric studies of double-ringed planetary NGC 3242 show strong component of nonthermal RF radiation 11 p1771 A66-22773

RF spectrum of OH radiation in interstellar space, including emission intensity and linear polarization 11 p1774 A66-22963

Monograph on solar corona physics covering ground based, satellite and sounding rocket observation, spectral emission and absorption lines, ionization mechanism, RF and UV radiation, etc 12 p1949 A66-24069

Galactic low RF background radiation spectrum and measurements of sky brightness temperature 14 p2383 A66-27708

Internal phase modulation in He-Ne laser using electro-optic effect in crystal quartz observing spectrum and RF mode beats 17 p2934 A66-32621

RF electron plasma diagnostics in magnetic field 18 p3148 A66-34730

Flux trapping of RF fields in superconductors from measurements on superconductive resonant circuits in frequency range of 10-1000 mc 21 p3796 A66-38555

Peak power of pulse modulated RF carrier measured by sequential comparison with reference carrier 22 p3872 A66-39726

Coherent amplification of RF radiation in cosmic space 24 p4265 A66-42754

RADIO FREQUENCY SHIELDING

Frequency dependence of cosmic noise levels during anomalous type II absorption, noting shielding sporadic E layer 04 p0574 A66-13859

Siting of static discharger to control nature and occurrence positions of coronas to minimize RF noise capable of causing hazard to aircraft navigational aid systems 19 p3282 A66-36752

RADIO GALAXY

Luminosity distribution of radio galaxies in terms of flux density 02 p0292 A66-12189

Radio galaxies contribution to kinetic temperature of intergalactic gas on basis of cosmological model 03 p0426 A66-12909

Survey of radio emission fluxes from eight Sb-type, ten Sc-type, two Ir-type and one Pec-type galaxy 05 p0759 A66-14873

Observational results on radio galaxies and quasars, noting nonthermal radio spectra believed to originate from synchrotron emission 05 p0768 A66-15763

Spectroscopic analysis of velocity field in radio and Seyfert galaxy NGC 1275 suggests occurrence of violent outburst in galaxy 08 p1287 A66-18776

Radio galaxies luminosity, size, shape, distribution in space, and continuum flux densities from normal galaxies 10 p1601 A66-21060

Radio galaxies contribution to kinetic temperature of intergalactic gas on basis of cosmological model 14 p2380 A66-27257

Radiation flux measurements from supernova remnants and radio galaxies 17 p2999 A66-32234

Quasar and giant elliptic galaxy identification 19 p3465 A66-36606

Galactic magnetic fields, considering magnetic flux, frequency of fields in radio galaxy, disk, interstellar gas dynamics and spiral structure 20 p3645 A66-36958

Spectroscopy of radio galaxies and quasi-stellar radio sources showing radio emission production 20 p3645 A66-36960

Radio galaxy structure, analyzing polarization characteristic of emission,

wavelength dependence of brightness distribution, etc, using pencil-beam antennas, lunar occultations and interferometers 21 p3815 A66-39485

Comparison of log N/log S curve for radio sources with curve of radio galaxies and quasars alone 22 p3982 A66-40538

Result of testing cosmological models with red shift magnitude observations of cluster galaxies and quasi-stellar radio sources 23 p4125 A66-41066

Identification of radio galaxies and quasi-stellar objects between declinations plus 20 and minus 90 degrees 23 p4127 A66-41147

RADIO HORIZON

VHF fading statistics of wave propagation over horizon for scatter radiation with or without reflection components 11 p1657 A66-23106

Tropospheric scatter application for beyond horizon communication between Earth and satellite or aircraft 18 p3067 A66-33899

Tropospheric duct propagation above sea in experiment and mode theory of Booker and Walkinshaw 22 p3863 A66-39934

RADIO INTERFERENCE

Spurious commands and error probability in project RELAY command systems, describing spacecraft equipment 03 p0333 A66-12567

Output criteria function in terms of interference and performance measure 03 p0333 A66-12569

Rocket exhaust plasma disturbance on radio transmission between vehicle and ground station noting multipath, forward and backscatter 04 p0479 A66-13625

Rocket engine generated voltage as source of electromagnetic interference and electronic component damage on interplanetary vehicles 04 p0480 A66-13628

Time-dependent changes caused by fluctuations in tracking parameters in radio signals reflected from ionosphere or Moon and dispersed by 06 p0832 A66-16514

Sporadic E signal strength calculation useful for estimating interference in UHF or HF communications 09 p1344 A66-20380

Radio interference control component RF characteristics and insertion loss measuring techniques 11 p1665 A66-22681

Interference in low-level input electronic equipment design, examining minimization methods for effects of hum, noise, etc 11 p1673 A66-23484

Errors by mutual interference in frequency-time coding in satellite communications systems, deriving expressions relating commissive and omissive error rates, simultaneous users per unit bandwidth, etc 12 p1821 A66-24752

[AIAA PAPER 66-280] 12 p1821 A66-24752

Selection of optimum ranging signal for jam resistant satellite communications system [AIAA PAPER 66-292] 12 p1822 A66-24762

Time-dependent changes caused by fluctuations in tracking parameters in radio signals reflected from ionosphere or Moon and dispersed by 13 p2024 A66-25954

Externally caused radio frequency interference /RFI/ in electronic subsystems of ballistic vehicles at orbital altitudes 13 p2027 A66-26744

Tropospheric induced distortion in frequency band amplitude and delay time of radio signal transmitting over wide frequency bands 15 p2452 A66-29765

Reduction of RF interference 16 p2654 A66-31199

Graphical method extended to problems of interference between terrestrial line-of-sight radio relay systems and communication satellite systems 17 p2871 A66-31816

Signal transmission through double FM regaining LF signal by two-stage frequency demodulation at receiving end 17 p2876 A66-33451

Computer model study of diversity augmented vehicular radio relay communication system in man-made noise environment 18 p3069 A66-34167

Interference levels conducted and radiated from signal wires carrying pulses or step functions 18 p3069 A66-34169

Coupling situations involving two flush-

mounted antennas such as those used in space vehicles, noting interference problems and use of nomographs 19 p3313 A66-35514

Interference in passband of FM or PM channel due to adjacent FM or PM channel in telemetry system 19 p3300 A66-35687

Noise sources analysis in electrical device, applying equivalent voltage or current spectrum 20 p3516 A66-37580

Measurements of voice channel loading with data for systems carrying video information and determination of interference noise 22 p3864 A66-40062

Optimum filtration of signals in presence of arbitrary interference, using orthogonal function series 23 p4037 A66-41514

Comparison of measurement accuracy for angular coordinates in radar systems by linear scanning and equal-signal zone methods 23 p4038 A66-41522

Midpath airplane interference to digital transmission in tropospheric radio, considering scattering of radiant energy by atmospheric layers 23 p4040 A66-41594

Graphical comparison of military RF interference specification limits based on electric field intensity at one meter antenna spacing 24 p4176 A66-43192

RADIO INTERFEROMETER

Interferometric techniques in visual and radio regions for astrophysics 07 p1035 A66-18151

Long-baseline radio interferometer for radio astronomy, combining wideband signal and one-dimensional linear array to restrict spatial response in two dimensions 11 p1704 A66-22562

High resolving power interferometric observations of angular diameters of anomalous high flux density HF radio sources 12 p1950 A66-24390

Monograph on radio-interferometric satellite tracking and application to scientific, military and telecommunications satellites 13 p2019 A66-25128

Long baseline interferometers in form of steerable antenna systems at Jodrell Bank, England 13 p2022 A66-25550

Receiver of hydrogen line interferometer at California Institute of Technology 13 p2182 A66-25551

Postdetector correlation interferometry of size of noise burst at decimeter wavelengths from Jupiter 13 p2182 A66-25552

Resolving power of radio telescopes and radio interferometers as affected by condition of propagation of radio waves in Earth atmosphere and cosmic medium 14 p2239 A66-27735

Directivity diagram of N-antenna radio interferometer when interferometer is in frequency-multiplication regime, noting role of SNR 15 p2449 A66-28640

True radio-brightness distribution of cosmic radiation source by reducing spatial frequency distortions with passband radio interferometer 16 p2806 A66-31544

Jodrell Bank 250-ft Mark I radio telescope as part of long baseline interferometer 18 p3094 A66-34054

Angular sizes of sources of Jovian radio bursts measured by using interferometers suggest they are produced by diffraction or focusing process in interplanetary space 18 p3237 A66-35083

Interferometric techniques in visual and radio regions for astrophysics 21 p3735 A66-38508

RADIO METEOR

Harvard Radio Meteor Project observations of physical characteristics of small radio meteors 17 p3002 A66-32525

RADIO METEOROLOGY

Simultaneous long distance tropospheric propagation measurements at 560 and 774 mc/s over North Sea 04 p0483 A66-14045

Geometrical approach to investigate airflow toward and within updraft of severe storm cell [AFCLR-SR-32-65] 07 p1061 A66-17368

Exact expressions for antenna-tracking parameters when transmitter-receiver scattering angle is constant 11 p1653 A66-22557

RADIO NAVIGATION

Omega network of eight stations for worldwide navigation aid 02 p0258 A66-12041

Omega hyperbolic radio navigation system

for aircraft using eight broadcasting stations 02 p0259 A66-12048

VLF radio propagation conditions and phase delays in design of long range navigation aids 02 p0259 A66-12053

Radiogedetic plotting device for plotting aircraft on assigned track 03 p0389 A66-12507

Universal long range radio navigational system, discussing purpose and function of ground-based system 07 p1065 A66-17671

Supersonic commercial air transport, evaluating communication, navigation and identification systems 07 p1066 A66-17686

British Dectra system as long distance navigation aid, detailing increased power and reduction of ambiguities by means of zone and lane identification 07 p1075 A66-17789

Omega, navigation radio aid with worldwide coverage 08 p1249 A66-18708

Radiolocation theory compared with communication theory, noting trading of frequency bandwidth of radar signal for error suppression 15 p2535 A66-29860

Radio navigation including ADF, VOR, Tacan, information theory, VLF propagation, multimode radar, computers, etc, and their possible combination 17 p2950 A66-31983

Worldwide civilian-aircraft navigation system based on VLF radio using ground stations or satellites 17 p2954 A66-33214

Spaceflight radio navigation, detailing position finding methods, active and passive radar control and interferometer control 18 p3133 A66-35241

Optimum digital filters combining position and velocity information under approximate distortionless constraint for LF navigation 20 p3596 A66-37224

Flight electronics equipment and techniques, discussing communications devices, radio navigation apparatus, all-weather landing and onboard navigation aids 21 p3709 A66-38653

RADIO NOISE

Mean electron density and collision frequency determined from radio noise absorption, average electron drift velocity and magnetic disturbance intensity observations 01 p0065 A66-11167

Variance of number of zeros in narrow band normal noise of finite duration calculated from energy spectrum of phase derivative 02 p0190 A66-11406

Radio noise measurements at high altitudes using rocket probe, suggesting electromagnetic radiation from plasma waves as source mechanism 02 p0288 A66-11506

Metropolitan area man-made VHF/UHF noise in 200 to 500-mc frequency range 03 p0333 A66-12568

Prediction curves showing expected median and upper and lower decile levels of atmospheric radio noise power in tropics for frequencies from 10 kc to 30 mc 04 p0488 A66-14376

Confirmation of systematic and random variations of noise parameters in tropics by 4-year period of measurement of atmospheric radio noise 04 p0488 A66-14377

Noise from terrestrial lightning discharges as source of interference to satellite radio reception 05 p0633 A66-14955

Satellite Ariel II receiver for measuring cosmic radio noise, using dipole antenna 05 p0769 A66-15841

Radio noise emission from Venus surface explained in terms of glow discharge 06 p0957 A66-17174

Amplitude distributions of radio noise at ELF and VLF related to amplitude distribution of lightning discharges 08 p1184 A66-19403

Separation of random number of signals with unknown parameters observed during limited interval of time against background of noise 08 p1185 A66-19673

Brightness distribution of cosmic radio noise at 4.7 mc/s 09 p1456 A66-20410

Galactic radio noise between 1.5 and 10 mc observed by Alouette I 10 p1604 A66-21121

Frequency spectra of atmospherics and atmospheric radio noise at frequencies of 1 to 100 kc from day and night observations in Pacific Ocean 11 p1652 A66-22418

Atmospheric radio noise in tropics, noting structural characteristics such as amplitude

probability, pulse rate distribution of noise envelope, effects of thunderstorms, etc 14 p2234 A66-27034

Crossing rate distribution of atmospheric noise at various frequencies in LF and MF bands, examining relation to amplitude probability distributions 16 p2652 A66-30613

Atmospheric radio noise variations at LF noting daytime increases, distribution of mean source localizations, solar activity effect, etc 18 p3104 A66-33960

Computer model study of diversity augmented vehicular radio relay communication system in man-made noise environment 18 p3069 A66-34167

Separation of random number of signals with unknown parameters observed during limited interval of time against background of noise 20 p3515 A66-37265

Atmospheric thermal radiation in clouds and rainfall causing antenna radio noise, considering long waves due to heterodyning of molecular radiations 20 p3520 A66-38143

Diurnal cyclic intensity variations of atmospheric radio noise at stations widely spaced over globe 22 p3915 A66-40782

RADIO OBSERVATION

Radio measurement of radiants, velocities and altitudes of meteors at inclined trajectory using transmitter and two distantly separated receivers 05 p0759 A66-14889

Quasi-stellar radio source 3C 279 observed with on-off technique, noting antenna recorded temperatures to resemble Gaussian distribution 05 p0763 A66-15291

Faraday rotation analysis of single frequency radio transmission from satellites to determine local electron density 08 p1181 A66-18752

Radio observations of Mercury, Venus, Mars, Saturn and Uranus compared with other observational method results 09 p1450 A66-20109

Radio observation of Mercury, Venus, Mars, Saturn and Uranus and black body temperatures of planets 09 p1450 A66-20110

Ionospheric focusing of extraterrestrial radio waves received by satellite antenna 10 p1496 A66-21120

Mars atmosphere and ionosphere analyzed by measuring effect on radio occultation of planet, determining shape, atmosphere density profile, diurnal variations, etc 13 p2178 A66-25235

Radio observations of comet Ikeya-Seki at frequencies above 160 mc 16 p2694 A66-30656

Solar active region analysis at radio frequencies, using fan or pencil beam scanning and superposition of wide beam transit curves 17 p3007 A66-33083

Radio-observation station functions, observed satellite signals from beyond horizon and Doppler curve deformation 20 p3552 A66-37845

RADIO PROBING

Radio locator for position of plasmoids from coaxial injector 10 p1570 A66-22007

Sporadic E layer electron density detected from VHF ionospheric propagation and reflection 14 p2234 A66-26836

Sporadic E layer structure from very low electron density probing by radio during sunrise period on July 15, 1964 14 p2280 A66-26843

Sporadic E layer support of radio transmission by specular reflection and scattering 14 p2281 A66-26850

Upper ionospheric electron density measurement by signals propagated between two parts of high altitude rocket 15 p2493 A66-30037

Ionospheric electron density measurement by radio-frequency probes, noting error correction 16 p2697 A66-30994

Radio locator for position of plasmoids from coaxial injector 19 p3407 A66-36091

Ionospheric cross modulation analysis by computer-oriented simulation process, noting D region electron density and collision frequency profiles 23 p4041 A66-41641

RADIO PROPAGATION

SA IONOSPHERIC PROPAGATION

SA MAGNETOIONICS

Langvin equation used to study interaction between radio wave and plasma, taking into account collisions between electrons and heavy ions and electric field

caused by group displacement 01 p0022 A66-10322

Radio propagation experiment using transmitted VHF waves from OGO-A to deduce electron density in ionosphere and magnetosphere 01 p0063 A66-10892

Ultralong-range propagation of meter radio waves, noting equipment details and television signal reception 02 p0192 A66-12137

VLF radio wave propagation in Earth ionosphere waveguide assuming finite ground conductivity 04 p0475 A66-13429

Sporadic E layer characteristics according to data on ionospheric propagation at ultrashort wavelengths 04 p0514 A66-13445

Changes in apparent radio path length of ground-to-ground microwave links caused by atmospheric changes 04 p0481 A66-13730

Focusing effects estimated for radio propagation along ricochet trajectory, considering ionospheric refraction 04 p0482 A66-13860

Electromagnetic wave propagation in multimode Earth waveguides of variable height 05 p0632 A66-14839

Propagation between Earth and ionosphere up to 100 km of VLF radio waves sent by ground transmitter, calculating field pattern 05 p0672 A66-15041

Book on radio wave propagation for aircraft radio communication including frequency ranges, waveguides, ionospheric layer influence, noise, antenna properties, etc 06 p0832 A66-16520

Monograph on results of theoretical and experimental studies of long-distance tropospheric propagation of radio waves 06 p0834 A66-16855

Monographs on electromagnetic diffraction and propagation problems, particularly radio propagation in troposphere 06 p0836 A66-17087

Amplitude and duration distribution for underdense echoes from logarithmically distributed meteor trails 07 p1135 A66-17638

Engineering method of calculating Fresnel coefficients based on use of nomograms 08 p1182 A66-18917

Polar absorption and increased magnetic disturbance effect on performance of radio communication links crossing auroral zones 08 p1186 A66-19794

Propagation and attenuation of radio waves in interstellar and near solar space 09 p1348 A66-21014

Integrated field intensity of atmospherics analysis compared to continuous wave method for data acquisition for radio systems design 10 p1496 A66-21073

Spaceborne observations of radio noise from 0.7 to 7.0 mhz and dependence on terrestrial environment 10 p1603 A66-21115

VHF ionospheric radio signal cross correlation coefficients determined, using pulse counting techniques 10 p1505 A66-21731

Nighttime reflection coefficient of radio wave during ionospherically disturbed period is closely correlated with cosmic-ray and solar phenomena 11 p1696 A66-22379

Tropospheric wave propagation, splitting and scattering, transport equation, diffusion, Fokker-Planck approximation, etc., for random continuous medium 11 p1654 A66-22634

Auroral zone, ionospheric scattering and nongreat-circle HF propagation statistically analyzed 11 p1700 A66-23141

Propagation of radio waves in interstellar medium and Earth atmosphere and effect on visible angular dimensions 12 p1814 A66-23897

Fluctuations in diurnal variations of ionization of F-2 layer interfering with radio wave propagation determined by series expansion 12 p1869 A66-24270

Radio wave propagation in artificial ionized cloud in upper atmosphere determined, using geometrical optics 12 p1817 A66-24274

Effects of AZA and PCA on radio wave propagation in Antarctic, noting reliability and radiation power requirements 12 p1817 A66-24275

Ionospheric radio wave propagation and ionization inhomogeneity drift measured, using doubly reflected signals 12 p1873 A66-24687

Q band propagation test carried out over

12-km path, comparing rainfall attenuation with rainfall rate over path, noting scatter of measured values 13 p2023 A66-25555

Resolving power of radio telescopes as radio interferometers as affected condition of propagation of radio waves Earth atmosphere and cosmic medium 14 p2239 A66-27777

Frequency deviations in carrier frequency of ionospherically propagated HF radio waves produced by fluctuations in solar ionizing radiation 14 p2286 A66-27955

Atmospheric propagation of radio waves wavelength of 3.3 mm 14 p2240 A66-27955

Ultralong-range propagation of meter radio waves, noting equipment and television signal reception 14 p2241 A66-28000

Satellite emitted radio wave propagation mechanism based on radio wave paths horizontally inhomogeneous spherically stratified ionosphere with variable electron density 15 p2447 A66-28444

VLF radio wave propagation in mode Earth ionosphere waveguide with finite surface impedance and arbitrary height 15 p2449 A66-28555

Antenna array receiving line-of-sight ground-to-ground transmissions over 28-km path, measuring amplitude and relative phase of arriving wave, noting perturbation in amplitude 15 p2461 A66-28955

Propagation characteristics of whistler mode radio signal over one-hop path from transmitter magnetic conjugate point to far away receiver, noting transmission loss 16 p2652 A66-30755

Ion motion effects on ionospheric radio wave propagation 17 p2917 A66-32355

Frequency variation of ionospheric propagated radio waves by spectrum analysis of received signal 17 p2874 A66-32355

Ionospheric research in Japan with brief outline of work in various areas of study 17 p2917 A66-32555

Transverse propagation of waveguide modes in conducting cylindrically stratified magnetoplasma analogous to VLF radio waves propagating in Earth-ionosphere 18 p3071 A66-34555

Flat Earth approximation of LF radio propagation theory 18 p3072 A66-34755

Solar wind modulation of far daytime field of extra-long radio waves in ionospheric layer 19 p3345 A66-35255

Longitudinal propagation of superlow frequency electromagnetic waves through plane-laminar magnetoactive ionospheric plasma 19 p3296 A66-35255

Multiple diffraction of microwaves over knife-edge obstacles, obtaining path loss 19 p3304 A66-36455

Radio wave guiding in horizontally stratified magnetoionic medium in which electron density varies monotonically with height 19 p3305 A66-36655

Book on tropospheric radiowave propagation, discussing diffraction theories scattering phenomena, transhorizon propagation, etc 20 p3520 A66-38955

Tropospheric radio wave propagation field strength measurements and attenuation differences among various mixed land and sea transmission paths 20 p3520 A66-38155

Occurrence frequency patterns of topside spread-F on Alouette satellite ionogram discussing radio propagation, magnetic irregularities, electron density-induced refraction, etc 20 p3554 A66-38155

Transhorizon microwave propagation measurements using rapidly scanning phased-array antenna 20 p3520 A66-38355

Polar absorption and increased magnetic disturbance effect on performance of radio communication links crossing auroral zones 21 p3703 A66-38755

Microwave plasma diagnostics using longitudinal radio wave propagation 21 p3790 A66-39055

Radio wave propagation in simple plasma in presence of solar gravitational field noting coronal and relativistic effects 21 p3771 A66-39255

Radio wave propagation over Earth surface determining conductivity and dielectric constant taking into account ground effect 21 p3706 A66-39555

Observed Faraday polarization variation satellite transmission radio signals due

ionospheric irregularities, latitudinal
electron density variations and antenna
geometry readout error 22 p3867 A66-40556
Guiding of whistlers due to exospheric
anisotropy, electron density and geomagnetic
field effects 22 p3915 A66-40803
Autocorrelation function and energy
spectrum of radiotelegraph signal, noting
channel parameter dependency on
transmission speed 23 p4036 A66-41050
Auroral disturbances resulting in multipath
distortion in propagation by ionospheric
reflection and description of chirp
sonosonde and antenna
systems 23 p4036 A66-41143
Rectangular terminal block in rectangular
waveguide, and dispersion equation for
surface wave propagating along
waveguide 23 p4046 A66-41516
Ionospheric cross modulation analysis by
computer-oriented simulation process, noting
D region electron density and collision
frequency profiles 23 p4041 A66-41641
Propagation and radiation of radio waves
from dielectric coated prolate spheroidal
core loop antenna surrounded by plasma
sheath 24 p4184 A66-42745
RADIO RANGE
Automatic gain control for reducing
dynamic range of signals at output of phase
radio range finder, noting effect of parasitic
phase shifts 14 p2236 A66-27356
RADIO RECEIVER
Price determining factors considered in
integrated circuit amplifier for AM
receiver 02 p0203 A66-11925
Invalidity of overall noise bandwidth for
receivers using linear or square law
envelope detectors for predetection of
signal to noise ratio 03 p0332 A66-12430
Airborne microwave reconnaissance
